Sastivrata—(1) fast on 5th tithi, worship of the Sun on 6th or 7th; performer gets the same fruit as Aśvamedha; HV I. 627 (from Brah.), (2) on 6th tithi of śu when it falls on Tuesday; perform vrata on different months, reaps inexhaustible merit, HV I. 627–628 (from Vi. Dh.)

Ṣaṣṭhīvratas—Bhav. I. 39–46, Bhav. U. chap. 38–42, KKV 98–103 (only three), HV I. 577–629 (twenty-one vratas), HK 622–624, KN 189–192, TT 34–35, SM 42–43, PC 100–103, VR 220–236.

When the sixth is mixed up with 5th or 7th the general rule is that in the case of vratas and fasts sixth mixed with the 7th is to be chosen except in the case of Skandasasthī where sixth mixed with 5th is to be preferred (KN 190, NA 48, SM 42, PC 100–101); the sixth tithi is dear to Kārtikeya (or Skanda) who was born on it and became the commander-in-chief of the gods on it; Bhav. I 39. 1–13, HK 622 (quoting Brah.), KKN 382–383

One or two special matters may be noted. Skanda is the lord of 6th tithi and is to be worshipped on every 6th tithi with fragrant flowers, lamps, garments, crows as toys, bell, *chowries* and mirror, Kārtikeya is specially to be always worshipped by kings with campaka flowers and no other god (KR 276), 6th of Mārg. śu. is called Mahāsaṣṭhī (HK 623–624). Vide Nār I. 45. 1–51 for Saṣṭhīvrata in the twelve months of the year.

Saṃvatsaravrata—begin on 5th of Cai. śu. in the year called Samvatsara and go on for five days. Agni, the Sun, Soma, Prajāpati and Maheśvara are identified with the five years of a Yuga viz. Samvatsara, Parivatsara, Istāpūrta (Idāvatsara?), Anuvatsara and Udvatsara; they should be established in a mandala each in order with blue, white, red, white-yellow and dark flowers; worship and homa with sesame, rice, barley, ghee, white mustard respectively; for five days *nakta*, at end donate five suvarnas, this is a pañcamūrtivrata; HV II. 419–420 (from Vi. Dh.). The names of the five years that constitute a yuga are variously named in vedic literature; vide Atharva VI. 55.3, Tai. S V. 5. 7. 2–3, Tai. Br. I. 4. 10. 1.

Saṃvatsaravratas—Vi. Dh. I. 82. 8–20 (gives the names of the sixty years, Prabhava, Vibhava &c), KKV 435–451, HV II. 862–867.

Saṃvatsarārambhavidhi—HV I. 360–365. Vide above under Caitra-pratipad pp. 82–84.

Saṅkastacaturthī—on Śr kr. 4th on moonrise (i. e. about eight *ghatikās* after sunset) worship Ganeśa image, establish a

jar, 16 upacāras to be offered, *modakas* (1008, 108, 28 or 8) to be prepared; fast the whole day or no food to be taken till moon-rise, for life or 21 years or one year, gift to ācārya, dinner to 21 brāhmaṇas, SmK 171–177, VR 120–127, VKD 68, D. S 74, the vrata may be observed throughout life or for 21 years, it is narrated that even Śiva did it when he wanted to vanquish demon Tāraka

Saṅkaṣṭahara-gaṇapativrata—on M. kṛ 4, tithivrata at moonrise; Gaṇeśa deity, VR (176–188) sets out a very elaborate procedure, in which Rg. X. 63. 3, IV. 50 6, the Puruṣasūkta (Rg. X. 90), Nār. and numerous Paurāṇika mantras are relied upon and 16 upacāras offered, Gaṇeśa is worshipped with 21 names and the same number of *dūrvā* tendrils, leaves of plants (such as *Bhṛngarāja*, *bilva*, badarī, dhattūra, śamī and flowers (red), there is also worship with 108 names of Gaṇapati; at end five *modakas* to be offered to the priest and dakṣiṇā, it is said that Vyāsa narrated this vrata to Yudhiṣṭhira. Saṅkaṣṭa appears to mean distress or calamity. 'Kaṣṭa' means 'kleśa' and the prefixing of 'sam' makes it a little more emphatic.

Saṅkrāntivratas—Vide HV 727–743 (16 in all), HK 407–438, KR 613–621, KN 331–346, VKK 204–231, SmK 531–545, VR 729–738, PC 357–366.

Saṅkrāntisnāna—Vide under Saṅkrānti above pp. 211–12 for bath on a saṅkrānti and HV II. 728–730 (from Devīpurāṇa for results of bathing on the twelve saṅkrāntis with certain substances put in water for bath.

Saṅghāṭaka-vrata—to be begun on K. śu. 1st; ekabhakta on that day, fast on 2nd tithi and also on 3rd, *pāraṇā* on 4th, tithivrata, Śiva deity; worship in this way for 7½ months if performed only in each bright half, or 3½ months if in both pakṣas which make up 7, two golden images of a male and female to be placed on bedstead and bathed with pañcāmṛta &c, *jāgara*, sleeping on ground; gift of images to *ācārya*, the woman performer never suffers separation from husband or son, Pārvatī secured Śiva as husband by this vrata; HV II. 370–375 (from Var.).

Satkulāvāptivrata—begin on Mārg. śu. 1st; worship of Viṣṇu with three flowers of three different colours, three unguents; offering of *trimadhura*, three lamps, homa with yava and

sesame; donate three metals (gold, silver, copper); Vi. Dh III. 201. 1–5.

Satya-nārāyanavrata—very popular in Bengal and Mahārāstra: described in Bhavisya (Pratisargaparva) chap. 24–29; M. M Hara Prasad Shastri in cat of mss in the Asiatic Society's Library, Calcutta, vol. V. preface p. LXV says that the worship of Satyanārāyana (ms. No. 3370) has a Mahomedan origin. It was originally (and even now in many places) called 'Satyapīrer pūjā'. It occurs in the Revā-khanda of the Skandapurāna (Vangavāsī ed) but does not occur in the Venk. Press edition. Vide also JBORS vol. XVI at p. 328 where the same scholar says that the Mahomedan custom of offering 'Sirni' to Satyapīr was adopted by Bengal Hindus as worship of Satyanārāyana. This is a vrata very popular among lower middle-class people and women Vide I. A. vol. 3 pp. 83–85 for stories current in Bengal about this vrata. It is said that Nārada was told about this vrata by Visnu himself. On any day a man worships Satyanārāyana and offers naivedya of 1½ quantity (such as 1½ *ser* or *maund*) of plantains, ghee, milk and wheat flour (or rice flour), jaggery or sugar; all these to be mixed up for naivedya; performer should listen to the stories and partake of the *prasāda*; jāgara with songs, music, dance; then people go to their houses; this yields all desired objects; stories about a brāhmana who performed this vrata every month, of a vendor of wood, of a trader named Sādhu with a ship full of merchandise and costly things and his daughter Kalāvatī. In these stories Satyanārāyana is represented as very jealous and vindictive The stories are said to have been taken from Skandapurāna, Revā-khanda.

Sadānata—otherwise called 'annadānamāhātmya'. HV II, 469–475 quoting Bhav. U. wherein Krsna narrates to Yudhisthira the importance of giving food to others and refers to the words of Rāma to Laksmana that they suffered exile in a forest because of not feeding brāhmanas, that king Śveta suffered pangs of hunger even when in heaven and was told by Brahmā that his plight was due to his not having fed hungry persons. The word literally means 'vrata (i. e. giving food) always'. In modern times it is often pronounced and written as 'Sadāvarta' or 'Sadābarta' or 'Sadāvarat'; vide *Muarji* v. *Nenbai* I. L. R 17. Bom. 351 for a bequest of rents for establishing a 'sadāvarat'. HV II,

471 quotes a verse saying that 'food is the very life of beings, it is their vigour, strength and happiness and therefore the donor of food is declared to be the giver of everything' The importance of giving food is stressed in the exordium 'atithidevo bhava' in Tai. Up I. 11. 2, vide also Atharva IX 6 ff and Kathopanisad I. 1 7

Santānadavrata—tithivrata; he gives his or another's daughter in marriage on K Full Moon, observes a fast on the confluence of rivers, reaches a happy goal HV II 238 (from Bhav. U.).

Santānāstamī—on Cai. kr 8, tithivrata; Krsna and Devakī to be worshipped; fast, for a year, at end of each period of four months on kr 8 bathe image of Krsna with ghee and donate ghee; HV I. 846–47 (quoting ten verses out of Vi. Dh. III. 217. 1–11).

Sandhyā (twilight)—is the period of three *ghaṭikās* (72 minutes) before sunrise and after sunset and it was provided that one should not engage in four actions in that period, viz eating, sexual intercourse, sleep, Vedic study; HK 694–97, PC 46; Utpala on Brhaj-jātaka VII 1 quotes Varāha that it is the time after half the sun's disc has gone down till appearance of stars and morning twilight is from the east having light till half the sun's disc appears.

Saptadvīpavrata—begin on Cai. śu. 1st and worship for seven days in order the seven *dvīpas* (continents), viz. Jambū, Śāka (of the Śakas), Kuśa, Krauñca, Śālmali, Gomeda and Puskara; *homa* with ghee and donate seven dhānyas, observe nakta and sleep on the ground, one year, donate a figure of dvīpas made of silver; goes to heaven till end of Kalpa; Vi Dh III. 159. 1–7

Saptamī-mrnaya—If 7th is mixed with 6th and 8th tithis a vrata for 7th tithi is to be performed on that day where 7th is mixed with 6th, but if for any reason 7th mixed with 6th cannot be accepted, the 7th mixed with 8th may be accepted; KN 192–194, TT 35–36, PC 103–104.

Saptamīlokavrata—worship seven *lokas* on 7th tithi; one would secure great intellect and unequalled position. HV I. 792 (one verse from Vi Dh)

Saptamī-vratas—Mat chap. 74–80 = Pad. V. 21. 215–321, Bhav. U 43–53, Nār. I. 116 1–72, KKV 103–225 (sets out more vratas of 7th tithi than of any other tithi, 44 in all), HV I.

632–810 (about 62 vratas), VKK 35–38, TT 36–40, VR 231–255. For eulogy of the worship of Saptamī, vide Vi Dh. III. 169. 1–7.

Saptamīsnapana—Mat (68 1–42) describes this at length; HV (I. 763–768) quotes from Bhav. U almost the same verses as those in Mat. It is said to be an antidote against disease, ill-luck or distress or the death of infants It should be performed in the 7th month after a child is born to a woman who lost an infant child or on a 7th tithi in śu, but tithi of the birth should be avoided; offer to the Sun and Rudra and the Mātṛs specially oblations of rice with milk, repeat hymn to the Sun (Ṛg I. 50) and offer homa to Rudra with Ṛg. I. 43; the fuel sticks are to be of arka and palāśa and 108 āhutis of *yava*, dark sesame, and ghee, four jars in four corner directions and a fifth in their midst; and various things (five *ratnas*, *sarvauṣadhis*, clay from several places named) were to be cast in all jars; seven married women should sprinkle water over the woman whose child died and invoke the Sun, Moon and the gods to save the child that is born; golden image of Yama to be donated to ācārya (priest); worship of the Sun and the kapilā cow; performer to eat remnants of food offered to gods.

Saptamūrti-vratas—Vide Vi. Dh. III. 157–166.

Saptarṣi-vrata—(1) worship of seven sages makes one reach them and confers sagehood; HV 1 791 (from Vi. Dh.); (2) begin from Cai śu and for 7 days therefrom worship each of the seven sages viz Marīci, Atri, Angiras, Pulastya, Pulaha, Kratu and Vasistha, with fruits, flowers and cow's milk, subsist in nakta way on those days; homa with sesame and with Mahāvyāhṛtis, for one year; at end donate a black deer hide to an Agnihotrin; performer secures the way to moksa, HV II. 508 (from Vi. Dh. III 165. 1–7)

Saptavāra-vratas—(vratas of the seven week-days); KKV 25-27, HV II. 520–592, KR 593–604.

Saptamyarka-vrata—RM (verses 1172–73; vide ABORI vol. 36. p 314).

Saptasuptamīkalpa—to be undertaken on a Sunday in bright half after the Sun starts on his (apparent) northward passage and on a naksatra with male name; he should observe celibacy and subsist in nakta way on all the seven saptamis

called Arkasamputa, Marica, Nimba, Phala, Anodanā, Vijayā, Kāmikī; observe ekabhakta on 5th and avoid sexual intercourse on 6th and give up honey and meat on that tithi, after writing the seven names on leaves he should cast them in an unused jar and should ask a child (who does not know the meanings of the seven names) to take out one and he observes that particular 7th accordingly; for a year, performer gets all his desired objects and reaches Sūryaloka, KKV 189–191, HV I. 687–689 quoting verses (from Bhav. I. 208. 2–32) Male naksatras have been stated above.

Saptasāgara-vrata or *saptasamudra-vrata*—begin from Cai. śu. 1st; worship Suprabhā, Kāñcanāksā, Viśālā, Mānasodbhavā, Meghanādā, Suvenu and Vimalodakā for seven days in order; homa in their names of curds add dinner full of curds to brāhmanas, and himself partake at night of boiled rice and ghee; for a year, donate seven garments to a brāhmana at a holy place, this is also called Sārasvatavrata; HV II. 507 (from Vi. Dh.). The above seven appear to be the names or branches of river Sarasvatī and therefore Sārasvata appears to be the proper name and not 'Saptasāgaravrata'. Vide Vi. Dh III 164 1–7 for these seven rivers and this vrata being called Sārasvata.

Saptasundarīkalā-vrata—worship of Pārvatī under seven names, viz. Kumudā, Mādhavī, Gaurī, Bhavānī, Pārvatī, Umā, Ambikā; dinner for seven days for seven maidens (about 8 years old); every day one of the 7 names to be used in the form 'may goddess Kumudā be pleased' and so on for six days; on the 7th all seven to be invoked and honoured with gandha &c and tāmbūla, vermillion and cocoanut; after worship a mirror should be presented before each of the seven; this secures beauty, *saubhāgya* and destroys sins; HV II. 886–87 (from Bhav. U).

Samudra-vrata—begin from Cai. śu 1st, every day for seven days; worship with salt, milk, ghee, whey, wine mixed with water, sugarcane juice and sweet curds; performer to eat at night *havisya* food; homa with ghee, for a year, at end donate a milch cow, king becomes supreme on the whole earth, one secures also health, wealth and heaven HV II. 464–65 (from Vi. Dh. III. 160. 1–7). The oceans are sometimes said to be seven, as in Vāyu 49. 123, Kūrma I 45. 4,

viz. of salt, sugarcane juice, wine, milk, ghee, curds and fresh water.

Samudra-snāna—one should bathe in the sea on *parvan* days such as Full Moon and Amāvāsyā, but not on Tuesday or Friday, one should honour the sea and Aśvattha tree, but not touch them; however on Saturday Aśvattha may be touched; there is no restriction as to time in taking a bath at Setu (Rāmeśvara), D. S. 36.

Sampad-gaurī-vrata—on M. śu. 1st (mentioned in Tamil calendars) for all married women and maidens in Kumbhamāsa.

Sampad-vrata—on 5th tithi worship Laksmī and observe fast; for one year; at year's end donate a golden jar with gold in it; performer becomes rich in each birth and goes to Visnu-loka; this is a sasti-vrata; KKV 441–42 (same as Mat. 101 19–20), VKK 34 (quoting Mat.).

Samputasaptamī—Vide Arkasamputasaptamī above p. 261.

Sampūrna-vrata—This vrata renders perfect every vrata that is rendered defective by some mistake or obstacle or Vighna-vināyakas; one should prepare a golden or silver image of the god worshipped in a vrata that is incomplete; one month from the day on which the craftsman prepares the image a brāhmana should bathe it with milk, curds, ghee, fluids and water and worship with flowers &c and offer *arghya* in the name of that deity from a jar full of water in which sandalwood paste is cast, and pray that the vrata which was broken may become perfect and make the offering with 'svāhā'; the officiating priest should say 'your (broken) vrata has become perfect'. The purāna adds 'gods consent to what brāhmanas say, brāhmanas have all the gods in them; their word would not come out to be untrue'; HV. II. 876–879 (from Bhav U).

Sampūrṇa-dvādaśī—on 12th of P. kr; worship of Acyuta (Krsna); not to speak with atheists and the like; two periods of six months each; in the first six months from P. worship as Pundarīkāksa, then as Mādhava, as Viśvarūpa (in Phā.), Purusottama (in Cai.), Acyuta (in Vai.) and as Jaya (in Jy.); sesame to be employed at bath and dinner in the first six months and in the six months from Āsādha pañcagavya; worship in the second half from Ās. with same names as in the first half year; performer to observe fast on ekādaśī and to observe nakta or ekabhakta way on 12th; at year's end

donate a cow, garment, gold, corn, food, seat and bedstead with the words 'May Keśava be pleased'; the performer secures all desired objects and so this vrata is called 'samprāpti' (attainment); HV I. 1094–95 (from Vi. Dh.)

Sambhoga-vrata—fast on the two first tithis and the two 5th tithis; one should concentrate his mind on the Sun, give up love and enjoyment though lying alongside his wife; he would be deemed to have performed great *tapas* for thousands of years; KKV 388, HV II 394 (from Bhav.)

Sarasvatīpūjā-vidhi—in Āśv. śu. invoke Sarasvatī on Mūla-naksatra, worship her every day and take leave of her on Sravana (which is the 4th naksatra from Mūla), in all four days generally from Āśv. śu 7th to 10th; VR 248–249, VKD 93 and 268–269, both provide that during these days one should not study nor teach nor write a book.

Sarasvatīsthāpana—on 9th tithi of Āśv. śu, Sarasvatī is established on books VKD 92–93 and 268–269. In Tamil lands special Sarasvatīpūjā is done by bringing together books and mss used by elders and youngsters, and girls and married women bring together their music books and Vīnā, all of which are worshipped as Sarasvatī Among craftsmen and manual labourers on this 9th tithi āyudhapūjā (worship of the tools of their trade) is done.

Saridvrata—worship the river one desires, one reaps merit; HV I. 790 (from Vi Dh.), which groups it under Saptamī-vratas.

Sarpapañcamī—one should observe *payovrata* on 5th tithi and donate a golden snake to a brāhmana, one would have no danger from snakes; HV I. 567 (from Bhav.).

Sarpabali—Vide SmK 170–171 and H. of Dh. vol. II. pp 821–824.

Sarpavisāpaha-pañcamī—on 5th of Śr śu., one should draw on both sides (of a door) with cowdung the figures of snakes, worship them with wheat, milk and fried grains, with curds and dūrvā tendrils and flowers &c., snakes become pleased and he has no fear from snakes up to his 7th descendant, HV I. 564–565 (from Skanda, Prabhāsa-khanda) KKV 94 mentions a 'Sarpābhayapañcamī' and cites three verses from Bhav. (I. 32. 62–64) two of which occur in HV I. 564 along with others.

Sarvakāmāvrata—(1) on M. kr. 14th tithi worship the group of pitṛs, the performer reaps the fruit of a *yajña*; HV II. 155 (from Vi. Dh); (2) on Mārg. 11th fast and worship the Moon and also eleven deities such as Mars, Sun, Nirṛti (goddess of death and calamity), the lord of rivers (Varuna), Agni, Rudra, Mṛtyu, Durgā; for one year, at year's end donate a cow, he reaches Rudraloka; HV I. 1151 (from Vi. Dh).

Sarvakāmāvāptivrata—This has twelve series from K.; fast on Kṛttikā falling on K. pūrnimā and worship Narasimha with *gandha*, flowers &c. for a year; at year's end donate a white cow with a white calf and silver; he would be free from enemies; from Mārg onwards to Āśv., one has to fast on the naksatra after which the pūrnimās are named and worship Krsna and his forms and *avatāras* under different names (such as Ananta in Mārg., Baladeva in P., Varāha in M. and so on); the gifts made at year's end are different; these yield all desires, remove sins and lead to heaven; HV II. 655-659 (from Vi. Dh.).

Sarvagandha—(lit. all fragrant substances) They are variously enumerated HV I. 44 gives two prescriptions, viz. (a) camphor, sandalwood, musk and saffron in equal proportions are sarvagandha, or (b) vide p. 38 and note 88 above.

Sarvaphalatyāga—begin on 3rd, 8th, 12th or 14th of Mārg. śu. or of other months; dinner of *pāyasa* to brāhmanas; he should give up one out of 18 dhānyas and all fruits and bulbous roots for a year except when medicines are required to be taken; he should get made golden images of Rudra with his bull and of Dharmarāja (Yama); he should make golden, silver and copper sixteen figures, each group representing big fruits (like jack fruit &c.), smaller fruits (like *udumbara*, cocoanut) and bulbous roots (like sūrana-kanda); place two jars full of water on a heap of grains, a bedstead should be got ready; all these to be donated with a cow to a householder brāhmana; he should pray 'may I reap inexhaustible rewards'; Mat. 96. 1-25.

Sarvamaṅgala-trayodaśī—every month on śu. 13th one should subsist by ekabhakta or nakta or observe a fast and worship three viz Krsna, Balabhadra and Mangalā (Durgā) goddess known as 'Ankāvankā'; one overcomes all difficulties by remembering these three or worshipping the images of these

three and offering flowers, meat and wine; HV II. 16–17 (*from Bhav. U.*). Krsna is represented as telling Yudhisthira that when his *guru* Sāndīpani asked him to restore to life his dead son as the *daksinā* for the learning imparted to him, he contemplated on the goddess and restored life to the dead son.

Sarva-vrata—worship Śiva on the 13th *tithi of śu falling on* Saturday and fast thereon, man becomes free from grave sins (like brāhmana-murder), HV II. 24.

Sarvāpti-vrata—This is a Caturmūrtivrata, for a year divided into three periods of 4 months, Visnu has *four forms*, *bala* (strength), knowledge, *aiśvarya* (supremacy) and *śakti* (energy), Vāsudeva, Sankarsana, Rudra and Aniruddha are *the four faces in the east, south*, west and north representing the four forms of strength, knowledge &c., in the four months from Cai performer should worship the forms east to north and the gifts respectively made to a brāhmana are things useful for domestic purposes in Cai, of warlike materials in Vai, of materials useful for yoking (i. e. agriculture) in Jy. and materials useful in sacrifices in Ās; the same procedure in the other two periods of four months from Śr. and Mārg.; he secures heaven and Indraloka and *Sālokya* with Krsna; HV II. 502–503 (from VI. Dh. III. 140. 1–13).

Sarvāptisaptamī—on 7th of M. kr.; worship intently the Sun; for a year, two divisions of the year; in the first six months sesame are to be used at bath and dinner and the names with which the Sun is to be invoked in the 6 months from M. are Mārtanda, Arka, Citrabhānu, Vibhāvasu, Bhaga and Hamsa; in the 2nd period of 6 months pañcagavya is to be used at bath and meals; performer to eat at night but exclude oil and salt; he secures all desired objects; KKV 168–169, HV I. 735–36 (from Bhav. I. 108 1–12).

Sarvausadhi—(all herbs)–They are, Murā, Māmsī, vacā, kustha, śailaja, two Haridrās, śunthī (dry ginger), campaka and mustā, Agni 177. 17, Madanaratna (on Śānti, folio 3a), Krtyakalpaa (on śāntika folio 7 b), VKK 212 (ten), P. C. 307 and VR 16 also enumerate ten but slightly differently. Vide p 183, note 473.

Sarsapasaptami—tithi-vrata; sun deity; on seven saptamī tithis the performer sitting facing the Sun should place *pañcagavya*

or other liquids on his palm and one, two up to seven mustard grains in order on first saptamī, 2nd saptamī up to seventh saptamī, should look at it, bring to his mind some desired object and drink at once without allowing the teeth to touch with a mantra addressed to the mustard; homa and japa; secures sons, wealth and desires; HV I 686–87; Bhav. (I. 68. 29–42) describes it; KKV 187–188.

Sasyotsava—(festival of ready crops)—to be performed in śu. on an auspicious tithi, naksatra and muhūrta by going to the field with songs and music, making a fire and homa therein, carrying some ripe corn and offering it to gods and pitrs to the recitation of Vedic mantras; the performer partakes of the ripe corn mixed with curds and should celebrate a festival. HV II. 914 (from Brah.)

Sahasrabhojanavrdhi—(Procedure of giving dinner to one thousand brāhmanas) SmK pp. 454–455 quoting Baudhāyanasūtra. It should be done in one's own house or in a temple; homa with cooked food and subsidiary *āhutis* with clarified butter in twelve names Keśava, Nārāyana &c.; various gifts.

Sāgaravrata—This is a Caturmūrtivrata, māsavrata, for four months from Śr.; worship of four jars filled with water as symbols of the four oceans, that are Hari with his four forms (God Vāsudeva, Sankarsana &c.); bath in a river on all days in those months, homa every day; on last day of K. honour brāhmanas and donate sesame oil; reaches heaven; HV II. 829 (from Vi. Dh III. 145. 1–6).

Sādhanadasamīvrata—performed on the 10th tithi in śu. as well as in kr.; it is an *anga* (subsidiary observance) of Ekādaśī; AK folio 640.

Sādhyavrata—on Mārg. śu. 12th, tithivrata; Sādhyas deities; for a year; Sādhyas are a group of twelve semi-divine beings; HV I. 1173 (quoting Vi. Dh. III. 181. 1–3). Vi. Dh. names the twelve.

Sāmavrata—It is a samvatsaravrata; bathe images of Śiva and Keśava in a circle made with cowdung for a year; at end donate a golden jar with *tiladhenu* to a brāhmana who sings *sāmans*; KKV 442–43 (from Mat. 101. 25–26), HV II. 864 (almost same verses from Pad).

Sārasvatavrata—(1) This is a Samvatsaravrata described in Mat. 66. 3–18 quoted by KKV 435–36, HV I. 553–55; begin in śu.

on a tithi which has one's favourite deity as the lord or on 5th, on a Sunday or any other auspicious week day; silence to be observed at both twilights and while taking one's meal; worship of Sarasvatī and honour to *suvāsinīs* (women whose husbands are living), the same verses occur in Pad. V 22. 178–194 and Bhav. U. 35. 3–19. (2) observe silence at twilight every day for a year, at end of year donate a jar full of ghee, two garments, sesame and a bell, goes to the Sārasvata world, KKV 441, HV II. 862 (quoting Pad.); this occurs in Mat. 101. 17–18, (3) begin from Cai śu. 1, go on for seven days worshipping Suprabhā, Kāñcanākṣī, Viśālā, the Mānasa lake, Trināḍā, Suvenu, Vimalodakā (all branches or names of Sarasvatī river); every day homa with curds, dinner mixed with curds to brāhmaṇas; he should take only one meal at night of boiled rice with ghee; for one year; at the end i e in kr. of Phā he should donate (from one to) seven garments in order during last seven days; Vi. Dh. III. 164. 1–7.

Sārvabhaumavrata—begin on 10th tithi of K. śu., observe nakta that day with curds and cooked food and offer worship to the ten quarters with holy food; honour brāhmaṇas with flowers of various colours and with edibles, for a year, the king who performs this becomes victorious and an emperor; KKV 309, HV I. 992–993 (both quoting Var. 65. 1–6), KR 420, Vi. Dh. III. 164. 1–7.

Sāvitrīvrata—Vide above pp. 91–94.

Simhastha-guru—When Jupiter enters the sign Simha (Lion or Leo) there is no marching against an enemy, no marriage, no upanayana, no occupying a house (for the first time), no establishment of the images of gods and generally no performance of other auspicious acts; vide Malamāsatattva p. 328 quoting two verses from Bhīmaparākrama which are BB (p. 274) and Śuddhi-kaumudī p. 222. It is believed that all sacred places come to the river Godāvarī when Jupiter is in the sign Lion and therefore one should bathe in the Godāvarī when Jupiter is in Leo (which is for about one year). There are diverse views about celebrating marriage and upanayana in *Simhastha-Guru*; some hold that marriage and other auspicious rites are prohibited only when Jupiter is in Maghā-nakṣatra (i. e. first 13¼ degrees of Leo). Others hold that in the countries between the Ganges and Godāvarī marriage and upanayana

are prohibited through all the days when the Jupiter is in Leo; but other rites may be performed except when Jupiter is in Maghā, still others hold that there is no bar of Simhastha-Guru during the time when the Sun is in Mesa (sign Aries or Ram). Vide SmK pp. 557–559 for discussion of these views. It is popularly believed that the jar of nectar that rose from the ocean was placed by the gods first at Haridvāra, then at Prayāga, then at Ujjain and then at Trimbakeśvāra near Nasik.

Sitasaptamī—on 7th tithi of Mārg. śu. observe fast and worship with lotuses and white flowers the Sun or his image, at end donate white garments; HV I. 778–779 (from Vi. Dh.).

Sitāsaptamī—one of the 14 *yātrās* at Bhuvaneśvara, on M. śu. 7; GK 191.

Siddha—Friday, 1st tithi, 6th, 11th and 13th and the naksatras, Pūrvā Phalgunī (of which Bhaga is the presiding deity), Uttarāsāḍhā, Hasta, Śravana and Revatī are so called; all auspicious rites should be performed on these; NA 30.

Siddhārthakādisaptamī—on M. or Mārg. śu. 7 or if one is ill then on any 7th tithi of any month; brushing the teeth half a *prahara* (about four ghatikās) before sunrise with the twigs of certain trees, each of which is represented as securing some object (e. g Madhūka gives sons, Arjuna makes fortune firm, Nimba confers prosperity, Aśvattha gives fame &c.); prognostications from the way in which the used brush falls when thrown away; seven saptamis to be observed, first with mustard grains, 2nd with *arka* buds, 3rd to 7th respectively with marica, nimba, six fruits, with food excluding boiled rice; japa, homa and worship of the Sun, sleeping before Sun image and recitation (japa) of Gāyatrī (Rg III. 62. 10); divination from several dreams when sleeping before Sun image; the different rewards of worshipping the Sun with various flowers (e. g. fame with lotuses, removal of all leprosy with mandāra, success with Agastya flowers &c.), dinner and gifts to brāhmanas of coloured garments, scents, flowers, *hamsya* food, cow; KKV 172–180, HV I. 679–685 (both from Bhav. I. 193. 2–21, 194. 1–25) and KKV quotes also from Bhav. 197. 1–10.

Siddhivināyakavrata—on śu 4th tithi worship Ganeśa or when a devout impulse takes hold of a man; bath with water

mixed with sesame; worship of golden or silver image of Ganeśa; bathe image with pañcāmṛta and offer *gandha*, flowers, incense, lamp and naivedya with the names Gaṇādhyakṣa, Vināyaka, Umāsuta, Rudrapriya, Vighnanāśana; twenty-one dūrvā tendrils to be offered and 21 *modakas* to be placed before image, one to Ganeśa, ten to the priest and ten to be eaten by the performer; leads to success (*siddhi*) in learning, wealth, war; HV I. 525–529 (from Skanda), SmK 210–216, PC 95, VR 143–151 Vide above p 147 for story about Syamantaka jewel.

Sins (ten)—Vide pp 90–91 above under *Daśaharā* and KR 188 (quoting Bhav.).

Śītalāsaṣṭhī—on M. śu. 6 in Bengal, Śītalāsaptamī in Gujarat on Śrāvaṇa kr. 8; Śītalāstamī in North India on Phā. kr 8.

Sītāpūjā—(1) Sītā means 'cultivated land' as in Kautilya set out in H of Dh. vol. III. p 147 n 186. KR 518 (quoting Brah.) says the earth was measured on Phā. kr 8th by the sons of Dakṣa urged by Nārada; therefore gods and pitṛs desire śrāddha on that day with *apūpas*; (2) worship of Sītā, wife of Rāma, who was born on Phā śu 8, KR 526–528 and 518; vide above p. 354 under Phālgunakṛtya.

Śimollaṅghana—Vide under Vijayādaśamī p 190 note 487 and TT 103, PC 145–148.

Sukalatāprāptivrata—for maidens, women with husbands living and widows; nakṣatravrata; Nārāyaṇa deity, a maiden should worship Jagannātha on three *nakṣatras*, viz. Uttarā, Uttarāṣāḍhā and Uttarā-bhādrapadā and should recite the name (Mādhava), should offer *Priyaṅgu* and red flowers and use saffron as unguent, homa with honey and clarified butter with the words 'salutation to Mādhava'; she secures a fine husband. HV II. 628–630 (from Vi. Dh.); Śiva informs Pārvatī about this vrata

Sukulatrirātravrata—begin in Mārg on a day which is Tryahaspṛk, fast for three days, worship of Trivikrama (Viṣṇu) with white, yellow and red flowers, three unguents and incense consisting of gugguḷu, kuṭuka (? kaṭuka) and resin (*Pinus Longifolio*); offer *trimadhura*, light three lamps, homa with barley, sesame and mustard, donate *triloha* (i. e. gold, silver and copper), HV II. 322–323 quoting Vi Dh. Vide pp 309, 310 for trimadhura and Tryahaspṛk.

Sukṛta-tṛtīyā-vrata—on Śr śu. 3 with Hasta-naksatra; tithivrata: worship of Nārāyana and Laksmī; for three years: Mantras are 'Visnor nu kam' (Ṛg I. 154. 1) and 'Saktumiva' (Ṛg. X. 71. 2); VR 101–103 (Krsna tells his proud sister Subhadrā to perform it).

Sukṛtadvādaśī—tithivrata; Viṣnu deity; fast on Phā śu. 11 and worship of Visnu on 12th; repeat day and night on 11th the words 'namo Nārāyanāya'; performer should give up anger, jealousy, greed, deceit, &c; should revolve in mind the idea that *samsāra* is worthless; the same on 12th also; repeat every month for a year, at end worship golden image of Harī and donate it with a cow, reward is that the performer does not see Hell; HV I. 1079–1081 (from Vi Dh.)

Sukharātrī or *Sukharātrikā*—Laksmīpūjana day (Āśv. amāvāsyā) in Divalī is called Sukharātrikā; vide S. Pr folio 41b, KT 431, VKK 467–469, KV 403–4 and pp 194–95 above.

Sukhavrata—(1) fast on kr. 7th and nakta on kr 8th; leads to happiness in this world and heaven; HV II. 509 (from Bhav only one verse), KKV 387 (changes the tithis to 6th and 7th); (2) on 14th worship of gods; the rest is not clear; HV II. 155 (from Vi Dh.); (3) by worshipping sages on 8th tithi one secures happiness; HV I. 628 (from Vi. Dh. half verse); (4) when on śu. 4 there is Tuesday, observe nakta; to be observed on four caturthīs; worship of Mars, who is supposed to be the son of Umā; place clay on one's head, apply it to whole body and then bathe; touch dūrvā, aśvattha, śamī and cow; homa to Mars with 108 *āhutis*, place image of Mars in vessel of gold or silver or copper or of *sarala* wood or of pine or sandalwood and worship, HV I 514–519 (from Bhav), PC 95; (5) a sastivrata in Mat 101. 73 (one verse only q. by KKV 450); not clear.

Sukhasuptikā—Same as Sukharātrī; HV II, 348–349 (from Ādityapurāna); KKN 421–422.

Sukhācaturthī—when the 4th tithi in śu. falls on a Tuesday it is called Sukhacaturthī or Sukhadācaturthī. Vide HV I. 514 (quoting Bhav I 31. 16), KR 271, VKK 31 (quoting the same verse from Devīpurāna).

Sugatidṛtīyādaśī—begin on Phā. śu. 11th; tithivrata, Krsna deity, fast on that day, worship of Krsna and reciting the

name 'Kṛṣṇa' 108 times, for one year divided into three periods of four months each; in 4 months from Phā. he should recite the name Kṛṣṇa and cast three streams of water on the feet (of the image) of Kṛṣṇa, in 2nd period from Ās. to Āśv. the name to be repeated is Keśava, so that at the time of death he remembers god Keśava; in the third period he should recite the name 'Viṣṇu'; secures divine pleasures and Viṣṇuloka; HV I. 1081–1083 (from Vi. Dh. III. 215. 4–22).

Sugatipausamāsīkalpa (paurnamāsī?)—on Phā. śu. 15th tithi, tithivrata, Viṣnu deity, performer to subsist by nakta way giving up oil and salt, for one year divided into three periods of four months; worship of Keśava accompanied by Lakṣmī; on that day he is not to speak with heretics, atheists, those guilty of grave sins and cāṇḍālas, Hari and Lakṣmī are to be looked upon as the moon and night. Vide Vi. Dh III. 216. 1–17.

Sugativrata—(1) by the worship of lord of gods one secures the best position (or world), HV I. 792 (from Vi. Dh. only a half verse); (2) one should partake food by nakta method on all 8th tithis for a year and at end donate a cow and one reaches position of Indra; tithivrata; Indra deity; HV I 881 (from Pad.); this is Mat. 101 56; AK folio 561 b (calls it Sugatyaṣṭamī).

Sujanmadvādaśī—begin on 12th of P. śu. when it falls on Jyeṣṭhā-nakṣatra; tithivrata, Viṣnu deity, worship Viṣnu every month for a year with fast thereon, donate each month of the year in order ghee, rice, barley, gold, boiled *yavas*, water, grain boiled, umbrella, *pāyasa*, sugarcane juice, sandalwood, garments and should in order partake of one of the twelve things, viz cow's urine, water, ghee, uncooked vegetables, dūrvā, curds, rice, barley, sesame, water heated by the Sun's rays, water in which darbhas are dipped, milk; he becomes free from disease, talented and happy and is born in a family endowed with wealth and corn and knowing no sorrow, HV I 1174–75 (from Vi. Dh.).

Sujanmāvāptivrata—This is a saṅkrāntivrata, begin from the day when the Sun enters sign Meṣa (Ram) and go on through all the twelve saṅkrāntis in the year with fast on each day of the saṅkrānti, and respectively worship the images of the Sun, of Bhārgava Rāma (Paraśurāma), Kṛṣṇa, Viṣṇu, Varāha (incarnation), Narasiṃha, Rāma Dāśarathi,

Rāma (Balarāma), Matsya (incarnation of Visnu); these may also be painted on a piece of cloth for worship; *homa* with appropriate name on each sankrānti; for a year; at end gift of *jaladhenu* with umbrella and sandals and in each month of gold and two garments; worship at night with *dīpamālā* (rows of lights), reward—the performer is not born among lower animals or Mlecchas; HV II. 727–728 (from Vi. Dh.), PC 12; note that worship in Tulā and the following two signs is not mentioned by HV. But in Vi. Dh III. 199 it is said that Vāmana, Trivikrama and Aśvaśiras (Hayaśiras) are to be worshipped when the sun respectively enters Tulā (Balance), Vrścika (Scorpion) and Dhanus (Archer)

Sudarśanasasthī—A king or ksatriya was to perform this, fast on 6th after drawing a mandala with a lotus on the nave of a wheel, establish Sudarśana (discus of Visnu) on the pericarp and the weapons of *lokapālas* on the petals and the performer's own arms in front and worship with red sandal-wood paste, mustard, red lotus, red garments &c and offer *naivedya* of food mixed with jaggery and of cakes and fruits and address mantras to Sudarśana for destroying one's enemies, for success in war and for protection of his army; worship of Visnu's bow (Sārnga), mace &c and of Garuda (Visnu's vehicle); king to be placed on throne and a young woman to wave lights before him; the same procedure when an evil omen arises or on the naksatra of one's birth; HV I. 620–624 (from Garuda-purāna).

Sudeśajanmāvāpti—practically same as Sujanmāvāptivrata, Vi. Dh. III. 199. 1–10.

Sunāmadvādaśī—begin on 12th tithi of Mārg. śu.; ekabhakta on 10th; fast on 11th and worship Sun first and then Visnu; tithivrata; Visnu deity; performer to be pure in thought, word and deed; place a new jar full of water in which sapphire, pearls and precious stones are cast and covered with cloth and worship Keśava's golden image therein; the same procedure to be repeated on the *dvādaśīs* of P., M., and the following months with different names of Visnu such as Nārāyana, Mādhava and so on; for a year, donate the twelve jars with images therein to brāhmanas and twelve cows, garments or (if poor) one cow and a vessel with some gold, HV I. 1063–1072 (from Vahnipurāna); Agni 188. 11 refers to Nāmadvādaśī.

Supūpadā ūdasī—in P. kr. 12th if it has Pusya naksatra; on 11th fast and on 12th worship a golden or silver image of Hari cast in a full jar over which a vessel full of *tilas* is placed; the *naivedya* is to be food mixed with sesame; offering of sesame in fire with mantras from Purusasūkta (Rg. X. 90); Vaisnava śrāddha after homa; jāgara on that night; donate jar and image, reward is freedom from ugliness; HV I. 1205-1213 (Śiva imparts this to Umā and states how Satyabhāmā benefited from it), Vratārka, *folio* 247a (says it is practised among Gurjaras)

Suvrata—From Cai su 8th worship the eight Vasus (named) that are forms of Vāsudeva with gandha, flowers &c; for a year; at end donate a cow; secures all objects and goes to Vasuloka, Vi Dh III 172. 1-7.

Sūryanaktavrata—This is a *vāravrata*; Sun deity; one should always practise nakta on Sunday, ekabhakta when Sunday has Hasta naksatra and from that day nakta on every Sunday; draw a lotus with twelve petals on sunset with red sandalwood paste and make a *nyāsa* in eight directions from the east with different names (such as Sūrya, Divākara); *nyāsa* of sun's horses to the east of pericarp; arghya with the first verses of Rg and Sāmaveda and the first four words of Tai. S, for one year, performer is freed from diseases, has progeny, wealth and goes to Sūryaloka, HV. II. 538-541 (from Mat.).

Sūryapūjāpraśamsā—vide Vi. Dh III 171 1-7 that narrate what rewards are secured by worshipping the Sun on all 7th tithis for a year or by observing nakta on Sunday for a year or by worshipping the Sun always at sunrise Verses 8-14 of Bhav. I. 68 specify the flowers that are desirable in the worship of Sūrya and what rewards follow by offering them.

Sūryarathayātrā-māhātmya—Bhav I 58. The car procession of the Sun takes place in M. If no procession is held every year then it should be held in the 12th year from the time when it was last held, it should not be held after short breaks in the continuity; a śūdra was not to climb upon the car of the Sun The *pūrnimās* of Ās., K., and M are the holiest times for this yātrā. It may also be held on the 6th or 7th tithi falling on a Sunday.

Sūryavrata—(1) fast on 6th tithi and worship of the Sun on 7th with the words 'may Bhāskara be pleased'; becomes free

from all diseases, KKV 388-389; (2) bath at dawn in M. and honouring a householder and his wife with flowers, garments, ornaments and dinner; attains *saubhāgya* and health, HV II. 794 (from Pad.), KKV 444 (which is Mat. 101. 36-37); (3) Begin in Āśv. if there is 14th tithi in śu. and Sunday, tithivrata, Śiva deity; special bath for Śivalinga, *rocanā* being applied to it as unguent and worship with red flowers, naivedya of milk and ghee of *kapilā* cow; gift to a brāhmana devotee of Śiva; the former should have dinner mixed with saffron; reward-sons are born to him; HV II. 64-65 (from Kālottara), (4) on Sunday the performer shaves himself and worships the Sun with cakes mixed with jaggery and salt and observes nakta that day: all desires are fulfilled and he goes to Sūryaloka; HV I. 779-780 (from Vi. Dh.), (5) fast on Cai. śu 6th and on 7th tithi worship the Sun; an altar be made with whitish clay and a lotus with eight petals be drawn thereon with coloured powders, place Sun's image on the pericarp and draw in the eight quarters from the eastern petal certain demigods, goddesses and sages, two each being assigned to the six seasons from spring; homa with 108 *āhutis* of ghee to the Sun, and eight to each of the others, for one year; at end gift of a cow and some gold, he goes to Sūryaloka; if performed for twelve years the performer secures *sāyujya*, HV I. 770-774 (from Vi Dh III. 167. 11-15, 168. 1-30; (6) begin in Mārg. on a Sunday (?) and proceed for 12 months; draw a lotus with twelve petals with pericarp on a copper vessel with red sandalwood paste and worship the Sun thereon; in the several months the names of the god worshipped (such as Mitra in Mārg., Visnu in P., Varuna in M. &c.), the *naivedya* and the special article to be eaten by the performer are different; it destroys sins and secures all desired objects, HV II. 552-557 (from Sauradharma); This is a vāravrata, (7) nakta throughout month of P. and fast on both 7th tithis; worship of Sun and of Agni thrice a day in the month of P.; KR 475-76 (from Bhav.)

Sūryasasthī—begin ekabhakta in Bh. śu from 1 to 5th and on 6th fast and worship of Sun's image; for a year; in each month different name of Āditya; at end elaborate *udyāpana* is described; HV I. 608-615 (from Bhav. U.), NS 134.

Sūryāstamī—Vide Arkāstami p. 261 above.

Somavatī-amāvāsyā—Amāvāsyā on Monday is very holy; vide KV 492 (from Bhav.); HK 643, VKK 9; on this day persons (specially women in the Deccan) go to a aśvattha tree, worship Viṣnu and circumambulate the tree 108 times; Vratārka folios 350b–356, DS. 23, the former remarking that this is not mentioned in the great religious digests (nibandhas) but is based upon usage

Somavāravratas—HV II. 557–566 (only two), Vratārka folio 379b–382b, SmK 149, VKD 437–443. General rule is; begin on the first Monday of Śr., Vai, K, or Mārg; worship of Śiva and total fast or nakta on that day; VKD gives an elaborate procedure of Somavāravrata and its udyāpana The Mondays in Śr. are regarded specially holy even now.

Somavrata—(1) when the 8th in any paksa falls on a Monday one should worship Siva, the right side of the idol representing Śiva and left side Hari and the Moon, bathe the *linga* with pañcāmrta, apply sandalwood and camphor to right side and to the left saffron, *aguru*, *uśīra*, *nīrājana* with 25 lights of the God and the Devī; dinner to brāhmanas with their wives; for a year or five years, KKV 269–271, HV I. 829–831 (from Kālikā); (2) on Vai. pūrnimā fill a copper vessel with water, put image of Śankara therein and cover it with cloth and worship with *gandha* and flowers and donate with the words 'may Mahādeva, lord of the world, who assumes the form of the Moon, be pleased with me'; KKV 353, HV II 174–175, KR 166–167 (all quoting Bhav.), (3) on śu. 2nd tithi one should donate vessel containing salt to a brāhmana; for a year, at end donate a cow; goes to Śivaloka; KKV 451 (59th Sastivrata from Mat 101. 81), HV I. 389 (from Pad.); (4) when 8th tithi falls on Rohinī naksatra, perform this; bathe Śiva with pañcāmrta and apply camphor or sandalwood paste to the *linga* or image and worship with white flowers; offer naivedya of jar of milk mixed with white ground sugar; *jāgara*; yields long life, fame etc; HV I. 863 (from Kālottara); (5) fast on M. śu. 14th and on 15th apply (to the *linga*) a blanket of ghee from top to the *vedī*; donate a pair of dark cows; *jāgara* with songs and dance; HV II. 239–240 (from Bhav.), (6) on the first Monday in Mārg. śu, or Cai or on any Monday when an intense impulse to worship arises; worship Śiva with white flowers (like Mālatī, Kunda &c.), apply

sandalwood paste (to image or linga), offer naivedya; homa; rewards of performance of nakta on Monday in the months from Mārg. described, HV II. 558–566 (from Skanda); (7) on each Monday eight brāhmanas to be treated to dinner for a year; at end a silver image of Śiva to be made and donated; worship of Śiva and Umā with mantra 'tatpurusāya vidmahe' (Maitrā. S. II. 9 1, Tai. Ār. X. 46); Pad. IV 108. 82–90.

Somāyana-vrata—for a month; consists in subsisting on the milk of all four udders of a cow for seven days; for seven days on milk of three udders, then seven days more on milk of one udder and fast for the next three days; destroys all sins. Mārkandeya q by Mit. on Yāj III. 324

Somāstamīvrata—tithivrata; Śiva and Umā are deities, on 9th tithi with Monday worship of Śiva and Umā at night; bathing image with pañcagavya; worship Śiva under the names Vāmadeva and others; apply sandalwood paste and camphor to the right side of image and saffron and Turuska (*olibanum*) to the left, place sapphire on Devī's head and pearl on Śiva's head and worship with white and red flowers; homa of sesame with the name Sadyojāta; HV I. 833–835 (from Skanda) Bhav. U. 59 describes this vrata almost in the same words (1–23); Vāmadeva, Sadyojāta, Aghora, Tatpūrusa, Īsāna are the five faces (or forms) of Śiva. Vide Tai Ār. X. 43–47.

Saukhyavrata—on 8th or 11th or 14th of M. observe ekabhakta and donate white garments, sandals, blanket, umbrella, water and a cup to one who is in want of these; HV II. 440 (from Bhav.)

Saugandhyavrata—this is a rtuvrata; Śiva and Keśava deities; give up use of flowers in Hemanta and Śiśira and of three kinds of *patras* (fragrant substances) on Phā pūrnimā and donate some gold with the words 'May Śiva and Keśava be pleased'; HV II 860.

Saubhāgyatrtīyāvrata—(1) on 3rd tithi of Phā śu. observe nakta and worship Hari with Laksmī or Rudra with Umā (as both are declared in śāstras and purānas to be the same); homa with honey and ghee and sesame; for a year divided into three periods, in months from Phā. to Jy, performer should eat food made from wheat without salt or ghee (or oil) on bare

ground, in months from K. to M. he should eat cooked barley food, on M. śu. 3 he should make golden images of Rudra and Gaurī or of Hari and Śrī and donate these with six vessels containing honey, ghee, sesame oil, jaggery, salt, cow's milk; he becomes fortunate and handsome for seven births, Var. 58. 1-19 q. in KKV 75-77, HV I 479-80, KR 523-524.

Saubhāgyavrata—(1) on K pūrnimā worship the Moon's image on the pericarp of a lotus drawn with 16 petals, on the filaments of the lotus worship 28 naksatras (including Abhijit) and on the leaves worship the tithis and their lords (set out by name); at end of vrata donate two garments, fast or nakta on this day, confers blessedness, beauty, sexual pleasures; HV II 235-36 (from Vi Dh.); (2) give up use of salt on 3rd tithi of Phā and of following months for a year; at end donate a bedstead and house with all paraphernalia and honour a brāhmana and his wife with the words 'May Pārvatī be pleased', he becomes a denizen of Gaurīloka, tithivrata, Gaurī deity; KKV 441 (which is Mat 101. 15-16), HV I. 483 (from Gar.), VKK 29-30 (reads 'śayanam' for 'lavanam') Agni (178 24-25) has almost the same verses, (3) worshipper of the Moon on 5th tithi secures long life, wealth and fame, HV I. 574 (from Vi Dh)

Saubhāgyaśayana-vrata—on Cai śu 3rd tithi worship Gaurī and Śiva images (as Gaurī was married on that day) after bathing the images with pañcagavya and scented water; salutations to the limbs of Devī and Śiva from feet to head and hair, place in front of the images Saubhāgyāstaka, next morning the golden images to be donated, on each 3rd this procedure for a year, different substance to be partaken of and different mantra to be repeated in each month from Cai. and different names of Devī also, special flowers employed in each month, performer to give up eating one fruit for a year; at end donate a bedstead with paraphernalia and golden cow and bull; secures *saubhāgya*, health, beauty, long life; Mat 60 1-49; KKV 56-60 (quotes only Mat 60 14-48), HV I. 444-449 (quotes Mat 60. 1-48), KR 113-118 (quotes Mat. 60. 1-49). The same verses occur in Pad. V. 24. 222-278 and also in Bhav. U 25 1-42.

Saubhāgyasankrānti—This is a sankrāntivrata; on the Ayana or Visuva day having Vyatipāta or on a sankrānti day one

should follow ekabhakta, worship the sun and donate two garments and saubhāgyāstaka to a brāhmana and his wife, for one year; dinner to brāhmanas and donate lavana-parvata, golden lotus and golden sun image; HV II. 735–36 (from Skanda); for gift of substances called parvatadānas, vide H of Dh. vol. II. 882

Saubhāgyasundarī—on the 3rd tithi of Mārg. or M. kr.; tithi-vrata; Umā deity; fast that day, for a year; in each month different name of Umā is used; flowers, fruits and naivedya to be offered are different and also the substance to be eaten by the performer, Vratārka folios 56a–60b, VR 114–120 (quoting Bhav. U.). It is to be performed on 3rd mixed with 4th (and not on 3rd mixed with 2nd).

Saubhāgyāvāptivrata—This is a māsavrata, Krsna deity; begin on the Ist tithi after Māgha pūrnimā (by pūrnimānta reckoning); worship image of Krsna or his picture on a strip of cloth; performer to bathe with water scented with *priyangu* (panic seed or Italian millet), offer *caru* (boiled rice) mixed with priyangu and homa with the same; for a month; on Phā pūrnimā after three days' fast donate two garments dyed with saffron, a vessel full of honey &c; this confers *saubhāgya* and beauty; HV II. 799 (from Vi. Dh. III. 204 1–5).

Saubhāgyāstaka—Mat (60. 8–9) provides that eight things are so called, viz sugarcane, mercury, nispāva (wheat preparation in which milk and ghee are used), *ajājī* (cumin seed), dhānyaka (coriander), curds from cow's milk, safflower and salt. This is quoted by HV I. 48–49, KR 115, VR 16 (with variant and corrupt readings). KR reads 'tavarājah' (white ground sugar) and VR reads 'tarurājah' (palmyra); Pad V. 24. 251 enumerates somewhat differently, reads 'tarurāja, kusuma (v. l. kustumburu) and jīraka' (*pancum miliaceum*); vide Bhav U 25. 9 also for the eight things.

Saumyavidhi—When Sunday has Rohini naksatra, it is called Saumya; bath, gifts, japa, homa, tarpana of pitrs and gods on this day become inexhaustible; observe nakta and worship the sun on this day with red lotuses, red sandal-wood paste, *sugandha dhūpa* and pāyasa (as naivedya); performer is freed from sins, KKV 13–14, HV II. 524.

Saumyavrata—Give up flowers in Hemanta and Śiśira seasons and on Phā. pūrnimā donate three flowers of gold in the

afternoon with the words 'May Śiva and Keśava be pleased', Mat. 101. 13–14 (quoted in KKV 441).

Sauratrivikrama-vrata—This is a māsavrata; Sun deity, for three months or three years; in month of K. worship Jagannātha or the Sun and observe ekabhakta and donate the second meal to a brāhmaṇa; same procedure in Mārg. and P. and Sun to be worshipped as Vibhākara and Divākara; sins committed in youth and middle age and even grave sins are destroyed, it is called 'Trivikrama' because the three names (of the sun) relieve a man in *three months or three years*; HV II. 856 (from Bhav. U.).

Sauranakta-vrata—This is a vāravrata; Sun deity; to be performed on Sunday with Hasta naksatra; honour brāhmaṇas on it, performer is freed from diseases, HV II. 521 (from Nrsimhapurāṇa).

Saurāvrata—This is Mat 101. 63 (a saptivrata) which occurs in KKV 448, HV I. 787 (from Pad.); fast on 7th tithi; Sun deity; for one year; at end donate a golden lotus, cows along with some gold and a jar full of food; leads to Sūryaloka.

Skandasasthī—6th tithi in Ās. śu is so called; worship Kumāra (Kārtikeya) on it after observing a fast the previous day; NA 49, PC 101, SmK 138. NA adds that on seeing (the idol of) Kārtikeya in Dakṣināpatha on Bh. śu 6 one becomes free from even grave sins like brāhmaṇa murder, vide also KR 275–277. In Tamil lands Skandasasthī is important, is shown in the calendar as in (solar) Vṛścika-māsa (K śu. 6) and celebrated in temples and also in some houses, HK 622, KR 119 quote some verses from Brah. saying that Skanda was produced from Agni on amāvāsyā and appeared on Cai. Su 6, was made Commander-in-Chief of gods and vanquished demon Tāraka, hence he was to be worshipped with lamps, garments, decoration, cooks (as a plaything) &c., or he may be worshipped on all su. 6th tithis by those that desire health for their children. Vide TT 35 (saying that 6th of Cai. is called Skandasasthī), SmK 93.

Skandasasthīvrata—on K. śu. 6 subsist on fruits, turning to the south give arghya to Kārtikeya and offer curds, ghee, water and flowers and a mantra, the performer should take his meal at night from food placed on the bare earth, he secures success, prosperity, long life, health, and lost kingdom; one

should not partake of oil on 6th (either in śu. or kr.); Bhav. I. 39. 1–13 q by KK V 99–101, HV I. 604–605, KR 415–416. Vide under 'Ṣaṣṭhīvratas' for proposition that Skandasaṣṭhī mixed with fifth is to be preferred. GK (83–84) speaks of Skandasasthī on Cai kr.

Strīputrakāmāvāpīvrata—this is a māsavrata; Sun deity; the woman passing K. by ekabhakta and observing the rules of conduct such as *ahiṁsā*, who offers to the sun *naivedya* of boiled rice mixed with jaggery and fasts on 6th or 7th tithi, in both fortnights, reaches sūryaloka and when she returns to the world she secures a king or other desired person as husband; special rules about the months from Mārg; HV II. 821–824 (from Bhav.), KR 406.

Snapanasaptamīvrata—for a woman whose child or children die in infancy; Bhav. U. 52. 1–40.

Snuhī-vṛtape manasā-pūjā—on Śr. kr. 5th worship Manasā-devī that removes (danger of) snake poison on a twig of Snuhī plant in one's court-yard; TT 33. Vide above p. 125.

Snehavrata—This is a māsavrata; God (Viṣnu?) deity; person should give up oil bath for four months from Āṣ, he should subsist on pāyasa and ghee; at end he should donate a jar full of sesame oil; this secures people's affection (*sneha*); HV II. 818 (from Pad)

Syamantaka (*jewel*)—story in Harivaṁśa I. 38; vide pp. 147–148 above under Gaṇeśacaturthī. The verse 'simhaḥ Prasenamavadhīt' is Harivaṁśa I. 38 36.

Svarnagaurīvrata—on Bh. śu 3; tithivrata, Gaurī deity; for women only; Gaurī is worshipped with the 16 upacāras; prayer to Devī to bestow sons, health, saubhāgya; on *udyāpana* 16 wickerwork vessels are filled with sixteen edibles and covered with cloth and donated to brāhmaṇa householders and their wives; Vratārka 41a–44b, VR 96–97 (notes that it is prevalent in Karnātaka country and is based on usage).

Svastikavrata—from Ās 11th or 15th for 4 months; for both men and women; said to be well-known in Karnātaka; draw svastikas in five colours (blue &c.), and they are to be presented to Viṣnu; worship of Viṣnu in temple or on land; Vratārka folios 356b–358 from Bhav. U (questions its authoritativeness)

Haṁsavrata—bathe with recitation of Puruṣasūkta, tarpaṇa and japa with same; worship Janārdana called Haṁsa in

midst of a picture of a lotus having eight petals with flowers &c. to the accompaniment of Ṛg X 90, then homa, donate a cow, for a year, he secures all desires, Vī Dh. III. 225. 1-9.

Hanūmat-jayantī—on Cai. śu. 15.

Hayapañcamī or *Hayapūjāvrata*—on Cai. 5th Uccaiḥśravas (Indra's horse) rose from the ocean and so he should be worshipped along with gandharvas (such as Citraratha, Citrasena) who are its bandhus with songs, sweetmeats, *polikas* (Marathi, *poḷī*), curds, jaggery, milk, rice flour, reward-strength, long life, health non-defeat in battle, HV I. 573 (quoting Śāṅkhotra), SmK 92 This is also called Matsyajayantī; AK folio 360b.

Harakālīvrata—on M su 3; tithivrata; Devī is deity; for women, performer should pass the whole night contemplating Umā on green barley sprouts, next day bath and worship of Devī and then dinner, in each of 12 months different names of Devī to be taken and 12 different substances to be partaken of; at year's end honour a brāhmaṇa and his wife; reward—freedom from disease, no widowhood for seven births, son, beauty &c; Śaṅkara asks Pārvatī what vrata she performed to secure the position of sharing half his body.

Haratṛtīyā-vrata—on M. śu. 3; tithivrata, Umā and Maheśvara deity; in a maṇḍapa draw a lotus with eight leaves; in eight directions *nyāsa* of the eight names of Umā viz. Gaurī, Lalitā, Umā, Svadhā, Vāmadevī &c.; place Umā-Maheśvara in the middle, worship with gandha and flowers; place a jar filled with rice grains; homa with four āhutis of ghee and one hundred of sesame, in each of the eight *praharas* perform bath and homa; next day honour a brāhmaṇa and his wife; this to be followed for four years; then udyāpana; golden image of Umā and Maheśvara to be donated to ācārya; gives *saubhāgya* and health; HV I. 480-482.

Haratrivīratva-vrata—one fasting for three days at the root of a *bilva* tree and reciting a lakh of times the name of Hara destroys the sin even of bhrūṇahatyā; HV II. 312 (from Saurapurāṇa). Vide H. of Dh. vol II. p. 148n and vol. III. p. 612 note 1161 for explanations of bhrūṇa.

Haravrata—on 8th tithi draw an image of lotus leaf and worship Hara and perform homa with streams of ghee and fuel-sticks; HV I. 881 (from Bhav.).

Harikālivrata—on 3rd tithi of Bh. śu. worship of Kālī on the sprouts of seven dhānyas sown in a winnowing basket, it is carried at night by women whose husbands are alive to a reservoir of water and discharged therein; HV I. 435–439 (from Bhav. U. 20 1–28). The story is that Kālī was daughter of Daksa, was given in marriage to Mahādeva and was dark in complexion Once in an assembly of gods Mahādeva called her as dark as collyrium She was angered, left her complexion on a grassy plot and threw herself into fire. She was born again as Gaurī and became Mahādeva's wife The dark complexion laid aside by Kālī became Kātyāyanī, who helped gods in their undertakings The gods bestowed on her the boon that those men or women who would worship Kālī existing in green grass would have happiness, long life and *saubhāgya*. The printed HV labels it Harikālī, but no question about Hari (meaning Visnu) arises here. Hari here probably simply means 'tawny' (i.e. Kālī who was once brown or tawny and not fair).

Harikrīḍāśayana or Harikrīḍāyana—on K. or Vai. 12th; tithivrata, Hari deity; place in a copper vessel filled with honey a golden image of Nrsimha with four arms, with rubies for arms, coral for nails and other precious stones on the chest, ears, eyes and head, and fill the vessel with water; worship and *jāgara*; the performer has no danger in a forest or battle, secures wealth and long life; KKV 392–393, HV II. 376–377 (from Nrsimhapurāna).

Haritālikāvrata—Vide above pp. 144–45.

Harimakta—see NS 21.

Harititthi—is 12th, acc. to SmK 29.

Hariprabodhotsava—celebrating the supposed awakening of Visnu in K. Vide pp. 109–111 above.

Harivāsara—The day of Hari. There is a divergence of views on this point, VKK 14 holds that Ekādaśī is really the day of Hari and not dvādaśī. Gar. I. 127. 12 and Nāradapurāna II. 24. 6 and 9 call Ekādaśī Harivāsara; KSS 43 quotes Mat. to the effect that if Ās. śu. 12th falls on Wednesday and has Anurādhā naksatra and if Bh. śu. 12 falls on Wednes-

day and has Śravana naksatra and if K. śu 12 falls on Wednesday and has Revatī naksatra, these are called Harivāsara. SmK 29 holds that Dvādaśī is Harititthi

Harivrata—(1) a person should practise ekabhakta on Pūrnimā and Amāvāsyā; he does not go to Hell; on those tithis he should worship Hari with 'punyāhavācana' and words like 'jaya'· he should feed one brāhmana, bow to him and feed other brāhmanas and the blind, helpless and distressed persons; HV II. 373 (from Narasimhapurāna), KKV 389–390, for punyāhavācana, vide H of Dh vol II p. 216; (2) a person who gives up food on 12th tithi goes to heaven; HV I. 1172 (from Var).

Harisayana—the sleeping of Visnu in Ās.; vide above pp 109–111.

Halasasthī—Bh. kr. 6 is so called, NS 123

Havisya—sacrificial substances that can be partaken of on certain vratas; KR 400, TT 109, NS 106 and H of Dh. vol. IV. p 149 note 334.

Hastagaurīvrata—on Bh śu 3; told by Krsna to Kunti for recovering a kingdom endowed with wealth and grain. Vratārka, folios 50b–52b, AK 280b; contemplation of Gaurī, Hara and Heramba (Ganeśa) for 13 years and udyāpana in 14th year.

Himapūjā—worship the Moon, the left eye of Visnu on Pūrnimā with flowers, *naivedya* of milk, give salt to cows, honour one's mother, sister and daughter with new red garments; if one is near Himālaya, then one should offer to pitrs ice mixed with honey, sesame and ghee and where there is no ice he should repeat the words 'ice, ice' and should feed brāhmanas with māsa food full of ghee, festival with songs and dance should be held and Śyāmā-devī worshipped, fresh wine should be drunk by those used to drinking, KR 471–72 (from Brah.)

Hrdayavidhi—Vide KKV 19–20, HV II. 526, vide above p. 268 under 'Ādityavāra'

Homavidhi—For procedure of *homa* in the Grhyasūtras, vide H. of Dh vol. II, pp. 207–210 and for homa in medieval times, vide HV I. 309–310.

Holikā—Vide above pp. 327–341.

SECTION II

KĀLA, MUHŪRTA, the influence of Astrology on DHARMAŚĀSTRA and CALENDAR

CHAPTER XIV

Conception of Kāla

Among the first of the great problems of philosophy is that of the nature of Space (*dik*) and Time (*kāla*).

The questions that arise are: Are Space and Time ultimately real? Is the world we apprehend spaceless and timeless or has the universe a beginning in time; are Space and Time themselves things or real, attributes or relations of things. Great divergence of views has prevailed on these problems from ancient times to this day. It is therefore advisable to indicate briefly the speculations on Time contained principally in Sanskrit works.

The word Kāla occurs only once in the Rgveda[651] 'as a gambler collects the *krta* (highest stake) at the (proper) time' (Rg. X. 42. 9, 'Krtam yac śvaghnī vicinoti kāle'). The Atharvaveda contains two hymns (XIX. 53 1-10 and XIX. 54. 1-5) embodying a most sublime conception of Kāla. A few striking verses[652] are translated here. 'Kāla (Time) carries (as) a horse with seven reins, thousand-eyed, ageless, endowed with

---

651 Compare कृतं न श्वघ्नी विचिनोति देवने। ऋ X 43 5 (= अथर्व. XX. 17 5) with ऋ. X 42 9 (= अथर्व VII 50 6 and XX 89,9 कृतमिव श्वघ्नी विचिनोति काले); vide also 'श्वघ्नीव यो जिगीवाँल्लक्षमादत्' ऋ II 12 4, Rg. X 43 5 is explained by Chān. Up IV 1 4 'यथा कृताय विजितायाधरेया संयन्ति' (as the lower throws of dice all go to the highest throw, to the winner'.

652. कालो अश्वो वहति सप्तरश्मिः सहस्राक्षो अजरो भूरिरेताः। तमा रोहन्ति कवयो विपश्चितस्तस्य चक्रा भुवनानि विश्वा॥ स एव सं भुवनान्याभरत् स एव सं भुवनानि पर्येत्। पिता सन्नभवत्पुत्र एषां तस्माद्वै नान्यत्परमस्ति तेजः॥ काले मनः काले प्राणः काले नाम समाहितम्। कालेन सर्वा नन्दन्त्यागतेन प्रजा इमाः॥ कालः प्रजा असृजत कालो अग्रे प्रजापतिम्। स्वयम्भूः कश्यपः कालात्तपः कालादजायत॥ अथर्व XIX. 53 1, 4, 7, 10, कालो ह भूतं भव्यं च पुत्रो अजनयत्पुरा। कालादृचः समभवन्यजुः कालादजायत॥ इमं च लोकं परमं च लोकं पुण्यांश्च लोकान् विधृतीश्च पुण्याः। सर्वाँल्लोकानभिजित्य ब्रह्मणा कालः स ईयते परमो नु देवः॥ अथर्व. XIX. 54 5. कश्यप is styled a ऋषि in ऋ IX. 114.2 and is in later mythology the husband of अदिति who is called mother, father and son in ऋ, I 89.10; so probably कश्यप here is the same as प्रजापति In अथर्व. VIII. 5 14 कश्यप is said to have created the amulet jewel 'कश्यपस्त्वानसृजत कश्यपस्त्वा समैरयत्'. विधृति probably means here 'boundaries separating the worlds'.

plentiful seed (power); the wise poets mount him (as one mounts a chariot); all worlds are his wheels (53 1); he (Kāla) himself brought together the worlds and he himself went round (all) worlds together, being the father, he became the son of them (worlds); there is indeed no other brilliance that is higher (or beyond) him (53 4); in Time is mind, in Time is breath, in Time is placed name, all these beings are glad by time when it arrives (53. 7), Time created beings, in the beginning Kāla (created) Prajāpati, the self-existent Kaśyapa sprang from Kāla and (so did) *tapas* spring from Kāla (53. 10); Kāla, the son, created past and the future, from Time arose the ṛk (verses) and the *yajus* (sacrificial formulas) were born from time (54. 3), this world and the highest world, holy worlds and holy *vidhṛtis* having completely conquered these worlds by the *brahman* Time goes on (abides) as the highest god' (54 5).

From these passages it appears that the word Kāla was used even in very early Vedic times in two senses, viz time in general (as in modern Sanskrit and modern Indian languages) and Time as identical with the Supreme Being or the source of creation. This latter sense, it will be shown a little later on, is also emphasized in many Sanskrit works (including the Purāṇas).

In the Śatapatha-brāhmaṇa the word Kāla is often used in the sense of 'time' or 'proper time'[653] e g. 'he (Rudra angry because he was excluded from a share in offerings) flew up towards the north at the time when *suvastakṛt* offering was to be made' (I. 7. 3. 3); Prajāpati (when cattle approached him) said 'whenever you may get anything at the (proper) time or at an improper time you may eat it' (II. 4 2 4)

A few passages from some of the Upaniṣads regarded as ancient by most scholars may be cited here; the Chān. Up. II.[654] 31. 1 (while speaking of Vāmadevya Sāman and its parts) uses the word Kāla as equal to 'end' or 'finish' The Br[655] Up I. 2.4

653 स आयततयोत्तस्त उपोत्थेदे य एष स्विष्टकृत् कालः। शत ब्रा I 7 3 3; यदैव यूप कदा च लभाम्यै यदि काले यज्ञनाकालेऽथैवाइनाधेति॥ II. 4. 2 4.

654 कालं गच्छति तस्मिधन पार गच्छति तस्मिधनमेतद्ब्राह्मदेभ्य निधुने मोतम्। छा. उप II. 13 1.

655. सोऽकामयत द्वितीयो म आत्मा जायेतेति न मुरा ततः सवत्सर आस तमेतावन्तं कालमबिभ । यावान्त्सवत्सर'। तमेतावत कालस्य परस्तादसृजत। बृह उप I. 2 4, नैन मुरा कालात् प्राणो जहाति। ''' नैन मुरा कालान्मृत्युरागच्छति। बृह II 1 20 and 21, नो एव स्वय नास्य प्रजा मुरा कालात्समोहमेति। '''नो एव स्वय नास्य प्रजा मुरा कालात्समीयते। कौषी उप. IV. 12 and 13.

says "He desired 'would that a second self of me were produced' ... He bore him for a time as long as a year; after that long time he brought him forth". In the dialogue between Gārgya and king Ajātaśatru in the same Upaniṣad Gārgya put forward several objects which he reverenced (*upāsana*) as *brahma* when the king replied as to those cases in these words '*Prāna* (breath) does not leave him before the time' and 'death does not come to him before time'. Here the word 'Kāla' is used in the sense of 'proper or appointed time'. In the passage of the Kauṣītaki Br. that corresponds to Br Up II. 1 10 and 12 the words are 'neither he himself nor his progeny pass into unconsciousness before the time' and 'neither he nor his progeny dies before the time'. In some passages of the Śvetāśvatara Up. some thinkers are stated to have put forward Kāla as the cause or source of creation e g. 'what is the cause?[656] Is it Brahma? Whence are we born? Whereby do we live? On what are we established (or where are we going?) .. Time or inherent nature or necessity or chance or elements or *yoni* (prakṛti) or the person, it is to be considered (whether one of these is cause)'; 'Some sages discourse upon inherent nature (as the cause) while other deluded persons speak of Time (as the cause).' Here Kāla is represented as the cause of creation, which is the 2nd meaning of the word Kāla set out from the Atharvaveda. In another passage[657] of the same Up. Kāla is said to have been generated by Him who is intelligent and omniscient The first meaning of Kāla (time in general) is also found in Śvetāśvatara Up. 'He (God) is the beginning, the efficient cause of (all) combinations, He is beyond the three times and is also without parts'. The Māṇḍūkyopaniṣad avers that Omkāra is beyond the threefold time viz. past, present and future.

The Maitrī Upaniṣad[658] has a long but somewhat rambling disquisition on time (VI. 14–16). It first says "Then it has been

656. किं कारणं ब्रह्म कुतः स्म जाता जीवाम केन क्व च संप्रतिष्ठाः। काल स्वभावो नियतिर्यदृच्छा भूतानि योनिः पुरुष इति चिन्त्यम्। श्वे उप I 1–2, स्वभावमेके कवयो वदन्ति कालं तथान्ये परिमुह्यमानाः। श्वे उप VI 1 The बृहत्संहिता of वराह appears to refer to this last when it says (in I. 7) 'कालं कारणमेके स्वभावमपरे परे जगुः कर्म'

657. येनाश्रुतं श्रुतमित्यमतं मतमविज्ञातं विज्ञातमिदं हि सर्वं स ज्ञः कालकारो गुणी सर्वविद्य। श्वे उप. VI. 2, आदिः स संयोगनिमित्तहेतुः परस्त्रिकालादकालोपि दृष्टः। श्वे उप VI. 5, compare माण्डूक्योप० 'भूतं भवद्भविष्यमिति सर्वमोङ्कार एव। यच्चान्यत्त्रिकालातीतं तदप्योङ्कार एव ॥.

658. अथान्यत्राप्युक्तं-अर्कं वा अस्य सर्वस्य योनिः कालश्चास्य सूर्यो योनिः कालस्य। ... एवं ह्याह। कालात्प्रवन्ति भूतानि कालाद् वृद्धिं प्रयान्ति च। काले चास्तं नियच्छन्ति कालो

(*Continued on next page*)

said elsewhere 'Food is indeed the source of this whole world, and time of food; the Sun is the source of time' Then a little later on it proceeds "Thus one has said 'From Time flow beings, from Time they reach growth, and in Time they come to disappear; Time is a form (i. e has definite shape or limits) and is (also) formless" Then it propounds 'There are indeed two forms of *brahma*, Time and Timeless. That which is prior to the Sun is Timeless (form of Brahma) and it is without parts. But that which begins with the Sun is Time that has parts, year is the form of the Time that has parts All these beings are produced from the year, through the year these beings when born grow, and they disappear in the year Therefore the year is Prajāpati, is time, is food, is Brahma nest (or abode) and is Atman And it has been said 'Time cooks (ripens or digests) all beings in the Great Self, that man knows the (real import of) Veda who knows that in which Time is cooked". Here the Maitri Up speaks of Time in its two senses, contains the germ of the later conception of the experience of Time as due to the actions or movements of the Sun, and refers to Time in the same terms in which the Tai. Up (III 1) speaks of *brahma* It is unnecessary to set out passages from other Upaniṣads such as the Mahānārāyana (XI 14 aham-eva kālo nāham kālasya) where Kāla is identified with God (Nārāyana)[659]

The Mahābhārata recurs to the theme of Kāla time and again In the Ādiparva it is said 'Kāla creates beings and Kāla destroys people, Kāla extinguishes Kāla that is engaged in destroying people; Kāla brings about good or evil states (or things); Kāla reduces all people and again sends them forth; Kāla is (the only one) awake when all are asleep (i e dead or

659. काल सृजति भूतानि काल सहरते प्रजाः। सहरन्त प्रजा काल कालः शमयते पुन॥ कालो हि कुरुते भावान् सर्वलोके शुभाशुभान्॥ काल संक्षिपते सर्वा. प्रजा विसृजते पुन॥ काल सुप्तेषु जागर्ति कालो हि दुरतिक्रम.। आदिपर्व I 248-250, काल पचति भूतानि काल संहरते प्रजाः। कालः सुप्तेषु जागर्ति कालो हि दुरतिक्रमः॥ द्रोणपर्व 2 24 The words कालो ... क्रमः occur in शान्ति 221, 41 and गरुड I 108 7.

liberated), for Kāla is invincible'. The Strīparva has the following 'Kāla cooks all beings and Kāla destroys people; Kāla is invincible'. The Śāntiparva[660] in chapters 224 and 227 contains a long disquisition on the formidable influence of Kāla on all including gods like Indra In the Śāntiparva it is asserted 'beyond the mind is the Great Intelligence and beyond the latter, is the Great Time; beyond Time is the adorable Visnu to whom belongs the whole world'. In another place the Śāntiparva, after detailing nineteen *gunas* the last being *dvandva-yoga* (pairs of opposites such as pleasure and pain), remarks that the 20th *guna* beyond the nineteenth is Kāla and that one should know these twenty to be the source and end of all beings. The Aśvamedhika-parva describes (chap. 45) the wheel of Time in an elaborate metaphorical way (verses 1-9) and remarks that the man who well knows the action of Kāla and its sublation is never deluded and reaches the highest goal In Vanaparva Krsna is identified with Brahma, Rudra, the Sun, the Moon, Dharma, Yama, Kāla &c. Vide for further references Śāntiparva 25. 5 ff, 224-225.

In the Bhagavadgītā the word kāla is used in the sense of 'time in general or proper time' in several passages (such as IV. 2, VIII 7 and 27, VIII. 23, XVII. 20) and Kāla is identified with Krsna as Supreme Lord in one of his super-eminent manifestations in X. 30 and 33 (I am Kāla among those that seize and I am Kāla that is imperishable) and XI. 32 (I am Kāla, that has increased (in strength) and that brings about the destruction of the worlds)

Pānini employs the word kāla in his sūtras many times, but in the sense of time in general or the divisions of time or proper time Patañjali on Pānini III. 3. 167 (Kālasamayavelāsu tumun) quotes a half verse about Kāla, which is the same as the one quoted above from the Mahābhārata (in note 659) and which appears to have been cited by Patañjali as a well-known verse. In another place Patañjali while explaining Vārtika 2 on Pānini (II. 2. 5) states a very important theory about Kāla,

660 मनसो महती बुद्धिर्बुद्धे. कालो महान् स्मृत । कालात् स भगवान् विष्णुर्यस्य सर्वमिद जगत्॥ शान्तिपर्व 206 13 (= cr ed 199 11); ऊर्ध्वं चैकोनविंशत्या कालो नामापरो गुण. । इतीमं विद्धि विंशत्या भूतानां प्रभवाप्ययम् । शान्ति० 320. 108-109, स वै नारायणो भूत्वा हरिरासी परन्तप । ब्रह्मा सोमश्च सूर्यश्च धर्मो धाता यमोऽनल । वायुर्वैश्रवणो रुद्र. कालः खं पृथिवी दिश । वनपर्व 12 21-22, काल्र कलयतामहम् । गीता X 30 (here the word काल is derived from the root कल् 10th conj. to compute, to grasp)

He says [661] "People speak of that as Kāla whereby the increases (or growths) and decreases in solid bodies are observed and the same (time) is called day and night when conjoined with some activity. What is that activity? (the reply is). the motion of the Sun When that (motion of the Sun) is repeated again and again there is a month and a year' This means that Kāla does not exist except as a convenient name or word for the manner of measuring change or becoming in what we observe by comparing one series of changes with another

In the Manusmṛti the Supreme [662] Lord is said to have created time and its divisions (I 24 Kālam kālavibhaktiṁśca) and to have, after He produced the universe, disappeared in himself again and again, squeezing one period of time by means of another period (I. 51).

Coming to the philosophical systems, it may be noted that the Sāṅkhya system does not include Kāla as a separate *tattva* in its twenty-five tattvas But Kāla was not altogether forgotten in that system. The Sāṅkhyakārikā [663] states that the *karanas* are thirteen, three being *ābhyantara* (internal i. e. inside the body) and ten being *bāhya*, the latter are concerned with the present, while the former are concerned with the three times (past, present and future)

The Vaiśeṣika-sūtra treats [664] Kāla as included in the nine dravyas (substances, I. 5) and states that the indications of the

existence of Kāla are the apprehensions of a thing as posterior or prior, the apprehension of simultaneity of certain things, the apprehension of a thing as lasting long or as being momentary, that it is *nitya*, one and the (efficient) cause of all things that are created. Praśastapāda gives the instance of an old man and a young man being seen by a person in one place and direction or in different directions, who apprehends after looking at a young man that another man called old differs from a young man as regards a grown-up moustache or beard, wrinkles on the body and baldness and so apprehends that the old man is remote from the young man and therefore apprehends him as beyond (*para*) while he thinks of the young man as near, posterior and so *apara*.

There were certain philosophers who held that Time is either past or future and denied that there is present time (vartamāna). The Nyāyasūtra refutes this view and holds that time is either past, present or future (II. 1. 39–43) From Patañjali's [665] Mahābhāsya it appears that even in his day there were philosophers that held that there was no time called present and that those people quoted certain verses in support.

The Nyāyamañjarī [666] of Jayantabhatta (K. S. S. 1936) has a long discussion on Kāla It first sets out the views of those who deny the very existence of Kāla as a separate entity. These latter say that Kāla is not perceptible like a jar &c and that

the ideas of quickness or slowness depend merely on the observed effects. The same theorists raise the further objection that if Kāla is a *dravya* (substance) that is all-pervading and permanent, as the Vaiśesikas assert, then how is it that Kāla is spoken of as past, present and future. To these objections some reply: Kāla is directly perceived, since it appears to the mind as distinguishing the various perceptions of effects, that the several experiences such as 'these matters happened simultaneously, this happened after long, this happened quickly' cannot be perfectly explained if one denies the existence of Kāla and holds that these experiences depend solely on the perceived objects or actions Others hold that Kāla is really inferred and not directly perceived They argue merely because Kāla is not directly perceived it does not follow that it does not exist; to infer that Kāla exists is proper as it is proper to infer that the other side of the moon exists though we see only that face of the moon that is below the earth; therefore Kāla exists as a separate entity to which is due the common experience of simultaneity, quickness or slowness &c. The differing observations about persons being young or old cannot be well explained without admitting the existence of Kāla, which like *ākāśa* is one, all-pervading and permanent. To the objection how, if Kāla is one, all pervading and *nitya*, it is spoken of as having three divisions, the reply is: in reality there are no divisions in Kāla, but divisions are imagined in Kāla on account of the *upādhi* (a limiting or restrictive adjunct) viz. *kriyā* (activity). When we speak of a man as cooking rice in the present (*odanam pacati*), that is due to the distinguishing nature of the result (boiled rice) which is brought about by several activities (*kriyās*) beginning with the placing of the cooking pot on the fire up to its being taken down on the ground. Then we use the word 'present'. But when we bear in mind the series of activities that produced the boiled rice we use the expression 'he cooked' (in the past tense) for the activities that have ended. In this way we speak of time also as past on account of the distinguishing characteristic of the activities that have ended

It may be noted that Raghunātha on 'Padārtha-nirūpana' (a work of Navyanyāya school) held the view that Space, Time and God are all one and the same thing and not separate substances [667]

667. Vide Prof Ingalls' 'Materials for the study of Navyanyāya' (Harvard) p. 38 n. 36.

In the Yogasūtrabhāsya on III. 51 there is a brief but very interesting and abstruse disquisition on Kāla The sūtra runs[667a] 'by constraint (*samyama*) upon moments (ksana) and their sequence (or succession) (arises) knowledge due to discrimination'. The bhāsya explains. just as an atom is substance or matter (*dravya*) reaching the limit of minuteness, so a *ksana* (moment) is time that reaches the highest limit of minuteness, or a ksana (moment) is time taken by an atom in leaving the position in space it occupies or the time taken in reaching the next point in space; *krama* (sequence) is the non-cessation of the flow of moments; moments and their succession do not form a collection (or combination) of actual (or perceptible) things. Muhūrta (30th part of day and night), day and night and others are combinations made by the mind (or by mental conceptions). This time, though devoid of being a real thing by itself, is indeed only a creation of mental conceptions and results from knowledge derived from words (alone) and appears as if it were an actual object to ordinary people whose doctrines are divergent (or confused) But ksana (moment) falling among (i a. being mixed up with) real perceptible things appears (to the human mind) as dependent on or constituting sequence (or succession). *Krama* (sequence) is of the nature of uninterrupted succession. This sequence is called Kāla by Yogins who know (the real nature of) time. For, two ksanas cannot exist together (simultaneouly) It is impossible that there should be a sequence of two moments that exist simultaneously. When a later moment comes after an earlier one without interruption, that is called *krama* In the present there is only one moment and there are no earlier and later moments in the present Therefore there can be no combination of two moments (in reality). But those moments that have passed away and those that are yet to come are to be interpreted or described as

667a क्षणतत्क्रमयोः संयमाद्विवेकजं ज्ञानम्। योगसूत्र III.52; भाष्य on this is. यथा अपकर्षपर्यन्तं द्रव्यं परमाणुरेवं परमापकर्षपर्यन्त कालः क्षणो यावता वा समयेन चलित परमाणुः पूर्वदेशं जह्यादुत्तरदेशमुपसपद्येत स कालः क्षण तत्समवाहाविच्छेदस्तु क्रम. क्षणतत्क्रमयोर्नास्ति वस्तुसमाहार इति। बुद्धिसमाहारो मुहूर्ताहोरात्रादयः। स खल्वयं कालो वस्तुशून्योऽपि बुद्धिनिर्माणः शब्दज्ञानानुपाती लौकिकाना व्युत्थितदर्शनाना वस्तुस्वरूप इवावभासते। क्षणस्तु वस्तुपतित क्रमावलम्बी। क्रमश्च क्षणानन्तर्यात्मा तं कालविद काल इत्याचक्षते योगिनः। न च द्वौ क्षणौ सह भवत। क्रमश्च न द्वयो. सहभुवोरसम्भवात् पूर्वस्मादुत्तरस्य भाविनो यदानन्तर्यं क्षणस्य स क्रम। तस्माद्वर्तमान एवैकः क्षण न पूर्वोत्तरक्षणा सन्तीति तत्समाहारः। ये तु भूतभाविन क्षणास्ते परिणामान्विता व्याख्येयास्तेनैकेन क्षणेन कृत्स्नो लोक परिणाममनुभवति तत्क्षणोपारूढा खल्वमी सर्वे धर्मास्तयो क्षणतत्क्रमयो सयमात् तयो साक्षात्करणं ततश्च विवेकजं ज्ञानं प्रादुर्भवति॥ विवेक in the सूत्र means प्रकृतिपुरुषविवेक

connected with the (constant) flux of changes (in the world Therefore the whole world experiences change in each sing moment So all these (external) aspects of the world are d pendent on one moment (in the present).

This disquisition shows that the Yogasūtra and its bhāsy held that time was not a *dravya* and not a tangible reality, bu that it was merely a word, a mental concept inseparable from the perception or experience of physical objects as a characteristic (viśesana or upādhi), that it attaches itself to the changing realities, that we measure it according to the movements of or changes in things and that it was not merely like a hare's horn.

I have confined myself to Sanskrit works and particularly to works of the Vedic school type[668] Buddhist and Jaina thinkers had to say a good deal on Kāla For example, the Pramāna[669]-vārtika-bhāsya or Vārtikālankāra of Prajñākaragupta (about 700 A D.) combats the view of the Vaiśesikasūtra and Praśastapāda (quoted above) and holds that there is no separate entity like Kāla, that it is not possible to have the ideas of distant time and near time if Kāla be without beginning and be endless, that the ideas of being distant or near or quick are not distinct from the activities about which they are predicated This Buddhist view practically amounts to saying that time is not a thing, but only an idea, only a subjective condition of human sensorial experiences and intuitions and is non-existent in itself, apart from the subject On the other hand Jaina[670] writers hold that there are six *padārthas* viz jiva, dharma, adharma, ākāśa, *pudgala* and kāla i. e Time has separate existence

---

668 It is surprising that in the two volumes of 'the History of philosophy, Eastern and Western,' published under the auspices of the Govt of India (London, 1952), and compiled by an Editorial Board presided over by such a world-famous philosopher as Dr S Radhakrishnan, not a word is said about the conception of Time in the Vedic Literature and in the Vaiśesika and other systems and only a meagre account is given of the Buddhist and Jain ideas on the subject (vol I pp 159, 175–76 and p 144)

Some of the Purāṇas contain disquisitions on Kāla. The nature of Time is described in the Kūrmapurāṇa as follows: This adorable[671] Kāla is without beginning and without end, it is ageless and immortal, it is a great Lord because it is all-embracing, it is independent and is the self of all, there may be many Brahmās, Rudras and Nārāyaṇas and other gods. It is declared that the divine Lord is one and is omniscient and is Kāla; they (the gods) are created by Kāla, which again swallows (or makes them disappear), the gods Brahmā, Nārāyaṇa and Īśa (Śiva) are said to undergo *prākṛta* disappearance by the power of Kāla and also spring again therefrom as highest Brahma, the elements, Vāsudeva and Śaṅkara Therefore the whole world has its soul in Kāla He alone is the highest Lord' The Viṣṇudharmottara[672] has a similar long disquisition on Kāla the gist of a few verses of which may be set out here 'Kāla is without beginning and without end, it is Rudra that seizes all (or it is Saṅkarṣaṇa); it is called Kāla because it carries off or drives all beings. Kāla is great and the highest Lord, because it is beginningless and endless; it is more subtile than the winking of one's eye, very much more subtile than the subtilest. Its subtileness cannot be understood even by Yogins When a thousand lotus leaves are pierced by a needle ignorant people think that the piercing of all leaves is at the same time, but really the leaves are pierced at separate units of time. This is the subtileness of Kāla. But though Kāla is very very subtile, it is also great and measurement of it can be computed because of the motions of planets' The Vāyu and Kūrma both say 'Time creates beings and again destroys them; all are under the rule of Time, while Time is not under the dominance of

any one' The Viṣṇupurāṇa[673] holds that Brahma which is one, unborn, permanent, ageless appears in the form of Kāla, which is without beginning or end The Bhāgavatapurāṇa[674] also regards Kāla as inferred in regard to its minuteness and its grossness is all-pervading, and holds that it is supposed to have units from the subtlest (atom) to the highest

Among astronomical works the Sūryasiddhānta states[675] 'Kāla is the destroyer of worlds; another (kind of time) is of the nature of calculation; Kāla is of two kinds, gross and subtile, which are also called *mūrta* (physically apprehensible) and *amūrta* (not so apprehended); (the divisions of) time called prāṇa (respiration) and the like are mūrta, while *truti* and the like are *amūrta*' The Caraka-saṃhitā[676] includes Kāla among nine dravyas and holds that it is *acetana* (non-sentient) Thus it agrees with the Vaiśeṣika view. In the Suśrutasaṃhitā it is declared 'Kāla is indeed self-existent, without beginning, middle or end; the poverty or richness of substances that have (one or more of the six) flavours (rasas) and the life and death of human beings are dependent on Kāla It is called Kāla because it does not remain sticking to even the smallest division or because it heaps together (beings by leading beings to death) or drives them together. Of that adorable Kāla which assumes the character of year, the divine Sun produces by his special movements the divisions called twinkling of the eye, kāsthā &c.

Tan

Similarly, philosophical grammarians like Bhartrhari[677] (author of the Vākyapadīya) holds that Kāla is a substance (dravya), all-pervading and permanent apart from activities, that it is the efficient cause of all created things, that it is divided into years, seasons &c. on account of the different activities, just as the same man may be called a carpenter or a blacksmith &c. (on account of his different activities). For reasons of space it is not advisable to pursue the subject of the nature of time from other Sanskrit works of medieval and modern times. For those who desire to make a further study of this subject I would recommend the 'Kālasiddhānta-darśini' composed and published by Shri Haranchandra Bhattācārya of Calcutta in 1941, which exhaustively deals with the philosophical conceptions about Kāla held by different sects, schools and Sanskrit writers.

There is a great temptation to compare Indian ancient and medieval conceptions about Time arrived at more than a thousand years ago with similar or corresponding conceptions on the same subject in modern Western philosophical works such as Kant's 'Critique of pure reason', Prof S. Alexander's 'Space, Time and Deity' (1927, London, two volumes), 'Time and Western Man' by Wyndham Lewis (London, 1927), Pierre Burgelin's 'L' Homme et Le Temps' (1945), Bergson's 'Time and Freewill', S. G. F. Brandon's 'Time and Mankind' (1953). But as this volume has already grown to large proportions, comparisons with Western philosophical views have to be given up.

From very ancient times minute divisions of time have been mentioned. The Vāj. S. states[678] 'that all winkings of the eye (and similar units of time) were produced from the (supreme) Person that is brilliant (like lightning)'. This half verse occurs in the Mahānārāyana Upanisad also. It is stated in the Br. Up.[679] that under the dominion of this imperishable *brahma* the Sun and the Moon are held apart, as also *nimeṣas*, *muhūrtas*, days, and nights, half months, months, seasons, and years stand apart

679. एतस्य वा अक्षरस्य प्रशासने गार्गि सूर्याचन्द्रमसौ विधृतौ तिष्ठतः। "एतस्य वा अक्षरस्य प्रशासने गार्गि निमेषा मुहूर्ता अहोरात्राण्यर्धमासा मासा ऋतवः संवत्सरा इति विधृतास्तिष्ठन्ति। बृह उप. III 8 9.

The Mahānārāyana Upanisad' (I. 8-9) mentions as units of time 'Nimesas, Kalā, muhūrta, kāsthā, ahorātra, half months, months, rtus, year' Manu I. 64 provides that 18 nimesas are equal to kāsthā, 30 kāsthās to kalā, 30 kalās to muhūrta, 30 muhūrtas are equal to one day and night Early and very exhaustive enumeration of the several units of time from subtlest to the highest are contained in Brhat-samhitā of Varāha and in the bhāsya of Praśastapāda on Vaisesikasūtra[680] viz 'Kāla is the cause of the popular usage about the units being *kṣana*, *lava*, *nimesas*, *kāsthā*, *kalā*, muhūrta, yāma (prahara or $\frac{1}{8}$th of a day), ahorātra (day and night), ardhamāsa (half month), māsa (month), rtu (season), ayana, samvatsara (year), yuga, manvantara, kalpa, pralaya and mahāpralaya. The Purānas also dilate upon the units of time from nimesa to pralaya or kalpa. Vide Brahma 231. 6-12, Kūrma I. 5 6-14, Padma V 3. 4-20, Vāyu 57 6-35. Nimesa (lit. winking of the eye) is defined by the Vāyu and Visnudharmottara as the time required for pronouncing a short letter and the latter adds that a smaller unit than it cannot be (physically) apprehended. There is great divergence of views about the number and names of the minute units of time and their mutual relations. A few examples alone can be cited. Manu (I. 64) furnishes the following table: 18 nimesas=kāsthā, 30 kāsthās = kalā, 30 kalās = muhūrta, 30 muhūrtas = ahorātra (day and night). The Arthaśāstra[681] of Kautilya provides. 2 trutas (i?) = lava, 2 lavas = nimesa, five nimesas = kāsthā, 30 kāsthās = kalā, 40 kalās = nādikā, 2 nādikās = muhūrta, 30 muhūrtas = ahorātra Some of the purānas contain the same[682] verse on the names and relations of small units of time viz

682 काष्ठा निमेषा दश पञ्च चैव त्रिंशच्च काष्ठा गणयेत्कलास्ता·। त्रिंशत्कलाश्चैव भवेन्मुहूर्तस्तत्रिंशता राज्यहनी समेते॥ वायु 50. 169=वायु 57. 7 = मत्स्य 142 4, विष्णुपुराण II. 8. 59, ब्रह्माण्ड II 29 6, शान्तिपर्व 232 12

15 nimesas = kāsthā, 30 kāsthās = kalā, 40 kalās = nādikā, 2 nādikās = muhūrta, 30 muhūrtas = day and night together It should be noticed that here the relation of nimesas to kāsthā is different from that in Manu and Kautilya The Arthaśāstra[683] of Kautilya does not stand alone in speaking of *truta* (१ t) as the smallest unit of time. The Sūryasiddhānta (quoted above) provides that truti is the smallest unit of time, that it is *amūrta* (not apprehended physically), that the prāna is the first *mūrta* (physically apprehended) unit of time, that 6 prānas are equal to a vināḍī, that 60 vināḍīs are equal to a nādikā, 60 nādīs are equal to an ahorātra Utpala[684] on Br. S. quotes verses from Pauliśa-siddhānta and Brāhmasphuta-siddhānta to the effect that six prānas are equal to a vināḍikā, 60 vināḍikās are equal to a nādikā or ghatikā and 60 ghatikās are equal to a day (i. e. ahorātra) A smṛti quoted in the Tithitattva states that two trutis make a lava, 2 lavas make a nimesa, so that truti is equal to $\frac{1}{4}$th of nimesa. Hemādri on Kāla (p. 7) quotes a verse that truti is equal to two nimesas and 10 trutis are equal to prāna. The Amarakośa follows Manu as to eighteen nimesas being equal to kāsthā, but it introduces a unit called *ksana* between kalā and muhūrta, so that its scheme is: 18 nimesas = kāsthā, 30 kāsthās = kalā, 30 kalās = ksana, 12 ksanas = muhūrta, 30 muhūrtas = ahorātra The Bhāgavata-purāna (III. 11. 3–10) puts forward a far more elaborate scheme: two atoms (of Time) = anu, 3 anus = trasarenu, 3 trasarenus = truti, 100 trutis = vedha, 3 vedhas = lava, 3 lavas = nimeṣa, 3 nimesas = ksana, 5 ksanas = kāsthā, 15 kāsthās = laghu, 15 laghus = nādikā, 2 nādikās = muhūrta, 30 muhūrtas = ahorātra. In the Atharvana-jyotisa the table is. 12 nimesas=lava, 30 lavas=kalā, 30 kalās = truti, 30 trutis = muhūrta. This agrees with none. Further units of time from ahorātra to *pralaya* will be dwelt upon a little later.

Before proceeding further clarification is required on certain points At least several centuries before Christ Jyotisa had attained the position of being one of the six *angas* (auxiliary

studies) of the Veda The Mundakopanisad[685] states that the *aparā vidyā* (inferior exoteric knowledge) comprises Ṛgveda, Yajurveda, Sāmaveda, Atharvaveda, Śikṣā (Phonetics), Kalpa (ritual texts), Vyākaraṇa (grammar), Nirukta (Etymology), Chandas (metrics) and Jyotiṣa (astronomy and mathematics). The Āpastamba-dharmasūtra enumerates the same six aṅgas of the Veda In the Pāṇinīya Śikṣā[686] the science of the movements of heavenly bodies is said to be the eye of the Veda. The Jyotiṣa which is Vedāṅga (of the Ṛgveda and Yajurveda) was concerned with purely astronomical matters. In the Vedāṅga-Jyotiṣa[687] it is remarked ·' the Vedas arose for the purpose of (use in) sacrifices; sacrifices are enjoined according to the order of times; therefore he who knows Jyotiṣa which is the science laying down the (proper) times knows sacrifices. Just as a tuft of hair stands on the head of peacocks or a jewel (in the heads) of cobras, so *gaṇita* (astronomical calculations) stand at the head of all the sciences that are (spoken of as) Vedāṅgas'. This shows that the words Jyotiṣa and *gaṇita* are used as synonyms in the Vedāṅga-jyotiṣa The Vṛddha-vāsiṣṭhasiddhānta (Benares S. Series) says 'this śāstra is indeed the eye of the Veda, therefore, among the *aṅgas* (limbs, subsidiary lores of Veda) it has got pre-eminence; a man endowed with all other limbs and therefore appearing to be perfect is worth nothing, if he is devoid of eyes' Gradually, however, Jyotiṣa came to include three distinct branches (skandhas) viz the determination of the motions of planets by means of calculations which was called Tantra, the second called *horā* that deals with horoscopes and (was also called *jātaka*) and the third called Śākhā which was an extensive branch and included many topics of divination which are summarised

in Br. S. chap. II. A work embodying complete presentation of the three branches was called *samhitā* [688] and he who well knew the three branches, viz Ganita, Horā and Śākhā was called, as Garga says, 'Samhitāpāraga' (master of saṁhitā). Varāhamihira [689] himself tells us in the Bṛhaj-jātaka, that, for the benefit of astrologers, he compiled a comprehensive work on Jyotisa in its three branches The word Samhitā appears to have been used in two senses, the first [690] (a wider sense) referring to a complete presentation of Ganita, Horā and Śākhā, while the second (a narrower sense) refers only to the Śākhā part Why the third branch was called śākhā is not satisfactorily explained anywhere. It was so called probably because it had to deal with numerous circumstances, such as the fruits of the simple and retrograde movements of planets; the movements of Agastya (Canopus) and *saptarṣis* (Ursa Major), the conjunctions and oppositions of planets, haloes, meteors. earthquakes, lore about the movements and cries of birds, *nīrājana*, removal of the evil effects of *utpātas*. In this sense samhitā was what is called *natural* astrology. Horā again had three sub-sections, viz. *jātaka or janma* (judicial astrology, predictions from the situations of the zodiacal signs and planets at a person's birth), Yātrā or Yātrika (Brhaj-jātaka 28.4–5) that dealt with prognostications on starting on a journey or on a king's marching

II prose), one of which was 'who had mastered the works on the computations of planetary movements, Samhitā and Horā' (ग्रहगणितसंहिताहोराग्रन्थार्थवेत्ता) and also chap. II verse 21 'यस्तु सम्यग्विजानाति होरागणितसंहिता·'। अन्यच्चर्य. स नरेन्द्रेण स्त्रीकर्तव्यो जयैषिणा॥.

against an enemy derived from the tithi, naksatra, the week-day, the muhūrta, the moon's position, dreams, throbbing of limbs, the cries of birds, and *vivāha* i. e examining the horoscopes of the parties to a marriage (called Vivāhakāla or Vivāhapatala).

The usual practice of the Grhyasūtras and Dharmaśāstra works was to take their astronomical requirements and knowledge from astronomers. The Gobhila-grhyasūtra[691] provides 'the work on this point is separate; one should study it or should obtain information about (the exact time of) the *parvan* (New moon and Full moon) from those who know it' The astronomical knowledge of ancient and medieval India has been a subject riddled with acute controversies Somewhat reluctantly I have come to the conclusion that discussions about the theories and practice of astronomy in ancient and medieval India should be omitted from the History of Dharmaśāstra An adequate treatment of ancient and medieval Indian astronomy and discussion of the theories advanced by Western scholars (some of them quite unwarranted) would require a large volume by itself. Here and there I may have to refer to pure astronomical matters for certain purposes. But the two other branches of Jyotisa, viz Horā (astrology) and Śākhā have exerted a vast influence on Dharmaśāstra and will have to be discussed within limits. Though Dharmaśāstra writers took their astronomy from astronomers, they did not hold that astronomers had the last word, but they rather held that if there was some conflict or contradiction between strict astronomical theory and Dharmaśāstra, the latter was to prevail An example may be cited for illustrating this: Suppose that a man has resolved to undertake 'ekabhakta-vrata' on 7th tithi The sankalpa for a vrata is as a general rule to be made in the morning. Suppose that 7th is mixed with 6th and 8th tithis and that 7th commences about 10 A M. on a certain week-day, then according to Yugmavākya (vide p 75 note 191 above) 7th mixed with 6th is to be preferred for the vrata and the sankalpa would have to be repeated in the morning when according to correct astronomical calculation the tithi might be only the 6th at that time Devala declares that a tithi is, for the purposes of religious bath, gifts and vratas, to be regarded as covering the whole day if the Sun sets during the

period[692] of that tithi. Vide Krtyaratnākara p. 299 and Smṛti-kaustubha (on tithi p. 12) for other examples.

About Astronomy and Astrology as developed in India Western scholars such as Weber, Whitney, Thibaut have propounded many sweeping and unwarranted theories based on flimsy data. ' Here and there I may have to refer to them. But I must say in one place how and why their conclusions are often unacceptable In the first place, they do not attach due importance to the fact that a vast literature in Sanskrit has perished beyond recovery (as it is admitted was the case in Greece after Ptolemy composed his Almagest)[693] and what we now have is a mere fraction of what once existed. In the second place, they forget or ignore that much of the literature that survives is religious and not intended to be a historical and full treatment of any topic i. e. most of the references to astronomical matters found in the Vedas and Brāhmanas are not made of set purpose but are incidental or casual. They hardly seem to be aware of the rule of caution and common sense that in ancient literature what is expressly stated may be used for drawing inferences, but the non-mention of certain matters cannot necessarily be a valid reason for arriving at the conclusion of non-existence, unless the subject matter was such that if something connected with it existed it should ordinarily have been mentioned. Further, and most important of all, mere similarities in institutions, usages and other matters should not be regarded as evidence of borrowing by one people from another people. Human mind is the same everywhere, its environment and the needs of human beings are often the same and no people, ancient or modern, can be regarded as having had the monopoly of great intellectual powers. Most of those who wrote on Indian literature and subjects in the 19th century were nurtured on the literature of the Greeks and Romans and on the vaunted superiority of the ancient Greeks in Philosophy, Mathematics, arts and other matters and of Egypt. But as ancient cuneiform tablets in Babylonia and the Middle East countries came to be deciphered, things began to be seen in

proper perspective. Modern scholars have, it is refreshing to note, outgrown the stage when all arts were traced to Greek (see 'Sumerians' by Sir Leonard Woolley, 1928 p. 193, Glanville in 'Legacy of Egypt' p. 160 for the debt the Greeks owed to Egypt). Sir Thomas Heath was obliged to admit that the debt of the Greeks to the Babylonians was much greater than had been imagined.[694] Sarton in 'a History of Science' (London, 1953) has to say that it is childish to assume that science began in Greek (Preface p. IX). It has been found that the Greeks were inferior to the Babylonians in several respects, that their vaunted geometric lore was not as great intellectually as supposed, that out of 200 propositions in Euclid's twelve books only about a dozen are necessary as a preparation for modern mathematics and that the Greeks much developed geometry because they could not easily employ ordinary arithmetical methods owing to their dependence on the abacus.[695] It was further found that the sexagesimal system of degrees, minutes and seconds used by Ptolemy was of Babylonian origin and according to Herodotus (II. 109) the Greeks derived two kinds of Sun-dials and the division of the day into 12 parts from the Babylonians.[696] At present such nations as England, France, Germany, U. S. S. R. and U. S. A. are the foremost nations in Science, Technology and Industry but they clung for about 1400 years to the Almagest of Ptolemy as their astronomical Bible, were ignorant of the decimal place value system and the use of a sign for zero till the so-called 'Arabic numerals' (borrowed from India) were

694. Vide 'Greek Astronomy' (1932) by Sir Thomas L. Heath Intro. p LIV In 'Children of the Sun' by W J. Perry (first published in 1923) on p. 428 (chap. 26) the author, after discussing the possible origin of the archaic civilization of North America, China and India, had the hardihood to say that no good reason could be found for believing that it developed in any of those areas ... and that it is in Egypt that the archaic civilization came into being, though he generously concedes that every element was not necessarily invented by the Egyptians, but he holds that it took shape in Egypt and was propagated thence.

695 Vide Prof. L Hogben in his paper on 'Mathematics in Antiquity' in 'Antiquity' vol 9, pp 193–194 and Cajori's 'History of Elementary Mathematics' (London, 1896) p 39 for the difficulties of using the abacus for division.

696 See Heath, *ibid* Intro p XVII, about the sexagesimal system, sun-dials and twelve parts of the day, Cajori in 'History of Elementary Mathematics' pp 28, 84 about Greece borrowing Babylonian sexagesimal system and Sarton in JAOS, vol. 75 No 3 at p. 168.

introduced into Europe.[697] The intolerance of ignorant and bigoted priests in Europe went so far as to condemn Galileo, one of the greatest intellects in mechanics and astronomy, to perpetual imprisonment at the age of 70 for no greater offence than holding fast to the Copernican theory. Hardly any parallel to such an attempt to suppress honest difference of opinion as regards heavenly bodies can be found in any non-European country claiming to have a civilization

There are controversies about the relation of astronomy and astrology. The marvellous spectacle of the sky at night containing thousands of stars of different brightness all apparently in motion round the earth, the Sun's annual northward and southward passage in the sky, Full Moon and its disappearance for one day and its phases, eclipses of the Sun and the Moon, comets and falling stars—all these must have struck even the most primitive men with wonder and also with fear and forebodings. In course of time arose astronomy and astrology. In ancient times both words had the same meaning. The Cambridge Ancient History (1925, vol. III. pp. 238–239) holds that the whole science of astronomy is due to astrology. On the other hand Prof. Neugebauer and Mr Peter Doig see no evidence for this theory.[698] In my humble opinion if we restrict ourselves to existing literatures of different peoples and eschew mere conjectures and speculation, both astronomy and astrology are equally ancient and must have acted and reacted on one another in very ancient times In the following pages some evidence will be given from Vedic literature of the simultaneous cultivation in India of both astronomy and astrology (particularly natural). To a modern scientist, the lucubrations of astrologers in their available works appear to be sheer nonsense. But the fundamental principle assumed by astrology that heavenly bodies

697. Vide 'Arabic thought and its place in world History' by De Lacy O Leary (London, 1922) pp. 108–109 for an Indian bringing to Baghdad a treatise on Arithmetic and Astronomy and for the introduction of Indian numerals and their being passed on as Arabic numerals, also 'a history of Elementary Mathematics' by Dr. Cajori (pp 11–13) for the discovery of the principle of position by the Hindus, the invention and adoption of the zero and for the introduction of the Hindu notation in Europe in the 12th century by the Arabs. Vide Journal of Near Eastern Studies, vol IX p. 119 for the statement that '*Sindhind*' (i. e Siddhānta) was translated into Arabic in the reign of Mansur (*754–775* A D.)

698. Vide 'Exact Sciences in Antiquity' (1951) p 161 by Prof. Neugebauer and 'Concise history of Astronomy' by Mr. Peter Doig (London, 1950) p. 2

exert predictable influence on terrestrial things and persons is not different from the principles of astronomy or meteorology whereby one can predict tides, eclipses, storms, torrential rains, and the like which affect the world and human beings.

Whether the stars and planets exert some influence on earthly things is not the real question. Probably they do, but the really important question is whether astrological works and astrologers have discovered correct methods and reached correct knowledge about the influence of planets on the human mind and on the day-today activities of human beings

The astronomical and astrological literature in Sanskrit falls into three slightly overlapping periods. The first period is that of the Vedic Samhitās and the Brāhmaṇas from the mists of antiquity to about 800 B. C. The second is represented by the Vedāṅgajyotiṣa, the Śrauta, Gṛhya and Dharma sūtras, Manu and Yājñavalkya, Garga and Jain works like the Sūryaprajñapti and ended about the 3rd century A. D The third period begins at the commencement of the Christian era and is represented by the works called Siddhānta and gave rise to the works of Āryabhaṭa (born 476 A. D.), of Varāhamihira (about 475 to 550 A. D.), Brahmagupta (born in 598 A. D.) and so on Those who want to make a deep study of the History of Hindu Astronomy should carefully read the work in Marathi written by Shankar Balkrishna Dixit in 1896 (2nd edition in 1931 by his son). Even Thibaut who is generally chary of praising any Indian achievement in astronomy was constrained to observe that Dikshit's work is the richest source of Indian astronomical material and that his treatment from Brahmagupta onwards is particularly detailed (Grundriss, p. 3) Dikshit held that the scientific system of Indian astronomy is essentially independent and rests on Indian observations. In my humble opinion this view is far sounder than the view that the scientific astronomy of India was derived from or was greatly influenced by Greek astronomy. I have decided (as stated above p. 480) not to enter into detailed discussions about astronomical matters. Therefore, I shall rest content with mentioning some of the important works and contributions that should be studied by those desirous of intimate knowledge of the History of Indian Astronomy. Davis on 'Astronomical computations of the Hindus' in Asiatic Researches, vol. III. pp 209-277; Bentley's 'Historical view of Hindu Astronomy' in Asiatic Researches, vol. VI. pp. 537-588; Colebrooke's Miscellaneous Essays (1837) vol. II.

pp. 321–373 (on Hindu and Arabic divisions of the Zodiac), pp. 374–416 (on equinoxes), pp. 417–450 (on Hindu Algebra); Warren's 'Kāla-sankalita (deals with South Indian astronomical calculations and calendars); 'Indian Metrology' by J. B. Jervis; Kern's Introduction to his edition of the Brhat-samhitā; the Sūryasiddhānta translated by Burgess and Whitney and with notes by Whitney and a reply by Burgess in JAOS. vol. VI pp. 141–498 and Whitney's criticism of the views of Biot, Weber and Max Müller in JAOS vol. VIII pp. 1–94; the Pañcasiddhāntikā of Varāhamihira edited by Dr G. Thibaut and Pandit Mahāmahopādhyāya Sudhakar Dvivedi with text (from two Mss.) and amended text with Sanskrit Commentary by the Pandit and translation by Thibaut (1889, reprint in 1930 by Motilal Banarsidas); Prof. Weber's 'Uber den Vedakalendar, Namens Jyotisham' (Berlin, 1862), Max Muller's Introduction to the 4th volume (of his four volume edition of the Rgveda) particularly pp. XXXVIII–LXVI; notes of Burgess on Hindu Astronomy in JRAS for 1893 pp. 717–761; B. G. Tilak's 'Orion' and 'Arctic Home in the Vedas'; Thibaut on the Babylonian origin of the lunar Zodiac of the Hindus, Arabs and Chinese in JASB (1894, Part I pp. 744–63, refutes the theory of that origin); S B. Dikshit's 'History of Indian Astronomy' (in Marathi), Thibaut on 'Indian Astronomy, Astrology and Mathematics' in the Encyclopaedia of Indo-Aryan Research (referred to in this book as Grundriss), Alberuni's 'India' translated by Dr. Sachau; I. A. vol. XXIII pp. 154–159 (Jacobi on date of Rgveda), pp. 238–249 (Bühler on Jacobi and Tilak's Orion), I. A. vol. 24 pp. 85–100 (Thibaut on the antiquity of the Vedic civilization); Memoir No 18 of the Archaeological Survey of India on Hindu Astronomy by G. R. Kaye (1924); Indian Historical Quarterly, vol IV for 1928 pp 68–77, Indian Historical Quarterly vol. V pp. 479–512 on 'Scope and development of Ganita'; C. O. S. Menon's 'Ancient Astronomy and Cosmogony' (1931); 'History of Hindu Mathematics' by B. Datta and A. N. Singh; Dr K. L. Daftari's 'Bhāratiya-jyotih-śāstra-nirīksana' (Nagpur, 1929) in Marathi; Prof. P. C. Sen-Gupta's paper 'Āryabhata, the father of Indian Epicyclic Astronomy' (in the Journal of the Department of Letters, Calcutta University, vol. XVIII pp. 1–56, a scholarly piece of work); Dr Mrs. Bina Chatterjee's paper on 'motion of the Sun, Moon, and five planets as found in Ptolemy and Hindu Astronomical works' (a learned, systematic and balanced piece of work), in the Journal of the Asiatic Society of Bengal, Science, part I vol. XV, 1949 pp. 41–89.

CHAPTER XV

Units of Kāla

We shall now turn to the units of time from *yuga* backwards to muhūrta, leaving aside *Manvantara*, *Kalpa* and *Pralaya* for the moment

The word 'yuga' occurs at least 33 times in the Rgveda and appears to have been used in several senses Vide H of Dh vol. III. p 886–890. Two senses stand out as prominent, viz a short period or a very long period For the first sense we may cite Rg. I. 158. 6 ('Dīrghatamas, the son of Mamatā, became old in the 10th Yuga, he became brahmā high priest and leader of the waters flowing to their goal' [699] Here yuga cannot mean a period of more than ten years and probably means a period of five years; in Rg III. 26.3 we read 'like a neighing horse by its mother, Vaiśvānara (Agni) is kindled by the Kusikas in each yuga', vide Rg III 55.18 [700] In the Vedāngajyotisa [701] (verses 1 and 5) yuga is said to comprise five years There is nothing to prevent us from taking this sense in the two passages cited from the Rgveda. In Rg III. 55. 18 it is possible to recognize a recondite reference to five year units of time each divided into six seasons In the Rgveda *saṁvatsara* means a year in several passages such as I. 110. 4, I. 140 2, I. 161 13, I 164 44, VII 103 1, 7, 9, X. 190 2. In Rg X. 87. 17 we have the derivative form 'Samvatsarīna' [702] from samvatsara 'O Agni that observest what men do! May the demon possessing magic devices not partake of the cow's milk that springs after a year'. In Rg X. 62 2 we have

---

699. दीर्घतमा मामतेयो जुजुर्वान्दशमे युगे । अपामर्थं यतीनां ब्रह्मा भवति सारथि ॥ ऋ I 158 6, अश्वो न क्रन्दञ्जनिभिः समिध्यते वैश्वानर कुशिकेभिर्युगे युगे । ऋ III. 26 3; सायण explains 'युगेयुगे' as प्रतिदिनम्' Vide बृहद्देवता IV 24ff for the story of दीर्घतमस्.

700 वीरस्य हु स्वश्व्यं अनासः प्र हु वोचाम विदुरस्य देवाः । योळ्हूळा युक्ता पञ्चपञ्चा वहन्ति महद्देवानामसुरत्वमेकम् ॥ ऋ III 55 18. Here वीरस्य refers to Indra and the 2nd half means 'groups of five years bring him in six ways' *i e groups of five years* (युग) each divided into six seasons

701. पञ्चसंवत्सरमयं युगाध्यक्षं प्रजापतिम् । दिनर्क्षकृत्योतिषं, verse 1. माघशुक्लप्रपन्नस्य पौषकृष्णसमापिन । युगस्य पञ्चवर्षस्य कालज्ञानं प्रचक्षते ॥ *ibid* verse 5

702 सवत्सरीण पय उद्गियायास्तस्य भाशीद्यातुधानो नृचक्षः । ऋ X 87 17 (=अथर्ववेद VIII. 3 17). Probably there is *double entendre* here, one meaning being 'May no magician prevent us from having all cows' milk that would be ours for a year (after the cow is calved)', the other is 'may not a demon

(*Continued on next page*)

the word *parivatsara* 'those ancestors that shattered Vala by righteousness and forced out the wealth consisting of cows' and in Rg. VII. 103. 8 the word 'parivatsarīṇa'. Samvatsara and Parivatsara are two of the five names bestowed on the five years of a yuga in the other samhitās. Just as the word yuga was used in several senses even in the Rgveda it is quite possible that the words 'samvatsara' and 'parivatsara' meant simply year and also successive years of a cycle of five years. In the Tai. S. (V 5 7. 1–3) *namaskāra* (salutation) is offered to Rudra with Samvatsara, to his bow towards the right with Parivatsara, to his bow behind with Idāvatsara, to the bow towards the north with Iduvatsara and to the bow above with Vatsara. The Vāj. S. (27. 45) names these five separately with Idāvatsara in place of Iduvatsara; similarly, in Atharva VI 55.3 salutation is offered to Idāvatsara, Parivatsara and Samvatsara. In Tai. Br. (I 4. 10. 1[703]) Agni, Aditya, Candramas and Vāyu are identified with Samvatsara, Parivatsara, Idāvatsara and Anuvatsara and it should be noticed that the four names of years are brought in close relation to the four cāturmāsyas, viz Vaiśvadeva, Varuna-praghāsa, Sākamedha and Śunāsīrīya. Thus even in the Samhitās names (generally five) are mentioned in a certain fixed order. There is no reason why this should be so unless they formed a fixed series in a cycle. Thibaut in his Grundriss (p. 9) hammers on the fact that sometimes only two or three or four out of the five are mentioned and argues (rather obstinately) that knowledge of the five year yuga cannot be assumed for the Vedic times. It should be noted that Kautilya speaks of the yuga of five samvatsaras and of the insertion of two intercalary months, one at the end of 2½ years and the other at the end of five years.[704]

(Continued from last page)

hold up the water that falls down after a year'. उक्षिया means a cow and may also mean a cloud Vide ऋ. III 55 13 where a cloud is referred to as cow or its udder पाणिनि (V 1. 91–92) has two sūtras to explain सवत्सरीण and परिवत्सरीण 'वत्सरान्ताच्छश्छन्दसि। संपरिपूर्वात्ख च।'

703. अग्निर्वै संवत्सर। आदित्य. परिवत्सर'। चन्द्रमा इदावत्सर। वायु. पुनरनुवत्सर'। यद्वैश्वदेवेन यजते। अग्निमेव तत्संवत्सरमाप्नोति। तस्माद्वैश्वदेवेन यजमानः संवत्सरीणां स्वस्तिमाशास्त इत्याहुरीत। यद्वरुणप्रघासैर्यजते। आदित्यमेव तत्परिवत्सरमाप्नोति। ...यत्साकमेधैर्यजते चन्द्रमसमेव तदिदावत्सरमाप्नोति। . यत्पितृयज्ञेन यजते देवानेव तद्वज्ञवयते। अथवा अस्य वायुश्वानुवत्सरश्चाग्नीतामुच्छिष्येते। यच्छुनासीरीयेण यजते वायुमेव तदनुवत्सरमाप्नोति। तै. ब्रा I. 4.10.1–3.

704. पंचसंवत्सरो युगमिति। .. एवमर्धतृतीयानामब्दानामधिमासकम्। ग्रीष्मे जनयतः पूर्वे पश्चाद्वाप्ये च पार्श्वमम्॥ अर्थशास्त्र II. chap. 20 (वेशकालमान) p. 109.

The Mahābhārata knows of the yuga of five years[705] (in Sabhāparva 11. 38). The Pitāmahasiddhānta,[706] which is not extant now, stated, according to the Pañcasiddhāntikā of Varāhamihira, that yuga means five years of the Sun and the Moon and that an intercalary month was added after thirty months.

The next question is: what was the extent of the year in the Vedic age. Some Ṛk. verses may be cited in this connection. 'The wheel[707] of *ṛta* has twelve spokes, it revolves round the heavens; it does never wear out. O Agni! in this (wheel) seven hundred and twenty sons in pairs abide. Some say that the father (Sun) who sends down water has five feet and twelve forms and remains endowed with fulness in the distant half (part) of heavens while others say that he (the Sun), the all-seeing, is placed in a lower (place) that has seven wheels and six spokes, all the worlds abide in the revolving wheel with five spokes, one wheel and twelve rims (of the wheel) and three naves—who is there that knew these (thoroughly); in that (wheel i. e. year) are placed together three hundred and sixty very unstable nails' (*Rg* I 164. 11–13 and 48). In these passages the sage poses a riddle or puzzle in very metaphorical and mystic language about a year divided into three, five or six seasons, twelve months, 360 days and 720 days and nights (when calculated separately). It is possible to hold that the wheel of *ṛta* means the zodiacal belt

---

705. क्षणा लवा मुहूर्ताश्च दिवारात्रिस्तथैव च। अर्धमासाश्च मासाश्च ऋतव षट् च भारत॥ सवत्सरः पञ्चयुगमहोरात्रश्चहर्निश । सभा 11 37–38

706. रविशशिनोर्यत्र युगं वर्षाणि पितामहोपदिष्टानि। अधिमासैश्शद्भिर्मासैरेभ्यो द्विषष्ट्या तु॥ पञ्चसि XII. I Acc. to वराह, the पैतामहसिद्धान्त employed *śaka* 2 (80 A D.) as its epoch i. e a new yuga began with śaka year 2 (elapsed) It is therefore probable that it was composed about 80 A D

707 द्वादशारं नहि तज्जराय वर्वर्ति चक्रं परि द्यामृतस्य। आ पुत्रा अग्ने मिथुनासो अत्र सप्त शतानि विंशतिश्च तस्थुः॥ पञ्चपाद पितरं द्वादशाकृतिं दिव आहुः परे अर्धे पुरीषिणम्। अथेमे अन्य उपरे विचक्षणं सप्तचक्रे षळर आहुरर्पितम्॥ पञ्चारे चक्रे परिवर्तमाने तस्मिन्ना तस्थुर्भुवनानि विश्वा। ... द्वादश प्रधयश्चक्रमेक त्रीणि नभ्यानि क उ तच्चिकेत। तस्मिन्त्साकं त्रिशता न शङ्कवोऽर्पिताः षष्टिर्न चलाचलासः॥ ऋ I. 164 11, 12, 13, 48 The whole hymn Rg I 164 is full of riddles. In Rg. I. 164. 2 it is said that seven horses are yoked to a chariot (the Sun) that has only one wheel but three naves The wheel means the year, three naves would be three seasons, summer, rains, winter. The wheel is also said in verses 12 and 13 to have six spokes or five spokes, the twelve spokes or rims of wheel (pradhi) represent months. Vide निरुक्त IV. 27 for explanations of these verses, compare आदिपर्व 3 60 for a verse similar to Rg. I. 164 11–13.

divided into twelve parts (dvādaśāra). But it is a very difficult matter to keep in view the twelve divisions correctly. In Rg. I. 164. 15 it is said ' They say that the 7th of those that are born together is born of one; there are only six twin sages born of the gods '. Here there is a reference to seasons, six of which have two months each, the 7th has only one (viz. 13th or intercalary month) and that the 13th month is not fit for religious rites. The Atharvaveda V. 35. 4 [708] also states that samvatsara has twelve spokes and the months have 30 spokes This explains Rg. I. 164. 11–13 and 48. In the Brāhmanas also the year is said to have 360 days and 720 days and nights together; Śatapatha IX. I. 1. 43, Ait. Br. VII. 7 also say the [709] same. We have also to recognize that the Vedic samhitās and Brāhmanas speak of a 13th month that was intercalated. About Varuna the Rgveda says [710] ' He knows the twelve months with their progeny (the days) and also the month that is added.' The Tai. S. (IV. 6. 7. 1–2) refers to a year of twelve months and also of 13 months. The Kausitaki Br 19. 2 speaks of the 13th month. The Tai. S. (I. 14. 4, VI. 5. 3 4) expressly mentions the 13th month called ' Samsarpa or Amhaspatya '. It is called Amhasaspati in Vāj. S. (VII. 30 and XXII. 31) and Samsarpa in Maitrāyani S. III. 12. 13. The Kausitaki Brāhmana connects the 13th month with the Śunāsīriya sacrifice. [711] The Maitrāyani Samhitā (I. 10. 8) draws a distinction between a rtuyāji and caturmāsya-yāji, the former being one who offers sacrifice thinking ' now Vasanta has started, rainy season has started, *śarad* has started while the

708. यस्मान्मासा निर्मिताविंशदराः संवत्सरो यस्मादिमितो द्वादशारः । अथर्व V. 35. 4.

709. त्रीणि च शतानि षष्टिश्चाक्ष्यानि यज्ञकामस्य । त्रीणि वै शतानि षष्टिश्च संवत्सरस्याहानि । तावान्संवत्सरः संवत्सर प्रजापतिः प्रजापतिर्यज्ञ.। . स च वै शतानि विंशतिश्च संवत्सरस्याहोरात्राः । ऐ. ब्रा VII 7, तदाहु. कथमस्यैतच्छतरुद्रियं संवत्सरमग्निमामोति कथं संवत्सरेणाग्निना सम्पद्यत इति । षष्टिश्च ह वै त्रीणि च शतान्येतच्छतरुद्रियमथ त्रिंशदथ पञ्चविंशत् । तसो यानि षष्टिश्च त्रीणि च शतानि तावन्ति संवत्सरस्याहानि तत्संवत्सरस्याहान्याप्नोति। अथ यानि त्रिंशत् त्रिंशन्मासस्य रात्रयस्तन्मासस्य रात्रीरामोति तदुभयानि सवत्सरस्याहोरात्राण्याप्नोति। अथ यानि पंचविंशत्स त्रयोदशो मासः स आत्मा त्रिंशदात्मा प्रतिष्ठा द्वे माणा द्वे शिर एव पञ्चविंशदेतावान्वै संवत्सर· । शतपथ IX. 1 1 43 Here the additional month is said to have been of 35days. This was probably another way of adjusting the Sāvana year of 360 days to the solar year of 365 days and about a quarter more. In six such years about 6 days for each year appear to have been calculated and added as a 13th month of 35 days.

710. वेद मासो धृतव्रतो द्वादश प्रजावतः । वेदा य उपजायते ॥ ऋ. I. 25. 8

711. त्रयोदशं वा एत मासमाप्नोति यच्छुनासीर्येण यजत एतावान्वै संवत्सरो यदेष त्रयोदशो मासस्तदवैव सर्व. संवत्सर आप्तो भवति ॥ कौ ब्रा. V. 8.

Cāturmāsya-yāji is one who offers sacrifice in view of the 13th month'.[711a] How and when the month was inserted in the Rgveda times or the times of the Tai S is not clear What is clear is that one whole month was added Therefore, Thibaut overstates the case when he asserts emphatically (Grundriss p 7) that all Vedic texts agree that the year was exclusively of 360 days. A year in which one month was added (*i e of 390 days*) was also well-known to the Rgvedic Indians. Therefore, in order to explain the facts we have here probably to postulate two calendars, one a purely sacrificial (or religious) of 360 days (12 months of 30 days) probably inherited by the Vedic Indians from their ancestors about whom we know next to nothing, and another calendar where a month was added in order to bring the year in line with visible astronomical data. It is known that the ancient Egyptians[712] had an official calendar of 360 days (12 months of 30 days each) plus five days added at end i. e of 365 days only and no intercalary day was inserted in a year. The result was that the opening day of this calendar would shift back through the solar year until a whole cycle of that year had been completed in 1456 or 1506 years This calendar called sliding calendar was in use for about 3000 years in Egypt from proto-dynastic period until the Roman period. There was also another calendar against which this sliding calendar moved. A year of 360 days (divided into 12 months of 30 days each) was not peculiar to ancient Vedic India nor to ancient Egypt, but played an important role also in Mesopotamia, which had a strictly lunar calendar The co-existence of months of various

711a ऋतुयाजी वा अन्यश्चातुर्मास्ययाज्यश्च, यो वसन्तोदृष्यादृङ्मुख्यस्वर्तुरिति यजते स ऋतुयाज्यथ यत्रयोदशं मास सम्पादयति त्रयोदश मासमभियजते स चातुर्मास्ययाजी॥ मैत्रायणी-संहिता *I.10 8* Vide a very informing paper in Acta Orientalia, vol IV (1926) pp 124-133 on 'the 13th month in ancient Hindu chronology' by B Faddegon of Amsterdam, in which the learned writer tries to explain Maitrāyaṇī Saṃhitā I 10. 8 and certain passages from the Lāṭyāyana-śrauta-sūtra and the Nidānasūtra which appear to have puzzled Weber and Thibaut

712. Vide 'Origins of Egyptian calendar' in Journal of Near Eastern Studies, vol 1, p 396-398 (by Prof Neugebauer); 'the Legacy of Egypt' by S R K Glanville (Oxford, 1942) pp 2-5, 'Origin of ancient Egyptian calendar' by H E Winlock in Proceedings of the American Philosophical Society, vol. 83 (1940) pp 447-463, particularly 460-463, 'Burden of Egypt' by J A Wilson (Chicago) p 30, 'Calendars of ancient Egypt' by R A Parker (Chicago, 1953), where p 56 says that from about 2500 B. C. Egyptians had three calendars all of which continued to be in use to the very end of pagan Egypt.

lengths for later times is vouchsafed by the Arthaśāstra p 108 (Sham Shastri's ed of 1919). A year of 360 days was in later times in India called a *Sāvana* one (from 'savana' meaning extracting of soma juice in a sacrifice) and a month was added after about 30 months to bring the lunar year (of 354 days) in line with the solar year.

In the Śatapatha Brāhmana (II. 1. 3. 2)[713] the Sun's apparent passage for six months in the north and for six months in the south is referred to, though the word *ayana* is not employed in this passage. The word 'ayana' occurs in the sense of 'motion or path' in the Ṛgveda (āyan-n-āpo ayanam-icchamānāh, Rg. III. 33. 7) *Uttarāyana* and *Dakṣiṇāyana* in later literature mean no more than the sun's (apparent) motion or path in the northern celestial sphere and in the southern sphere respectively. The Sun's movement in the north for six months and in the south for six months is mentioned in Br. Up VI. 2. 15-16 also. Thibaut (Grundriss p 10 para 6) cites Kausitaki Br. 19. 3 as stating that the Sun stands still after it has gone for six months towards the south in order to turn again to the north and then observes that no one has a right to assume, from this statement in the Kausitaki[714] Br. that for six months the Sun goes north or south, that the halves of the year are to be understood. What Thibaut is driving at is not clear to me We have in this passage six months passages of the Sun in the north and also in the south. A year has ordinarily only twelve months Therefore it must be assumed that halves of a year are meant. Thibaut does not explain what part of the year these six months in the north and south correspond to. Thibaut is probably swayed by the fact that in the Śatapatha and elsewhere Vasanta, Grīsma and Varṣā are lumped together as the seasons (rtus) for the gods but Uttarāyana does not exactly correspond with these three rtus. That may be so, but the rule or maxim is that names are given on the basis of what is principal or eminent (*prādhānyena vyapadeśā bhavanti*). Vasanta and Grīsma are important parts

713 स पत्रोदगावर्तते देवेषु तर्हि भवति। ...यत्र दक्षिणावर्तते पितृषु तर्हि भवति। शतपथ II. 3. 2 3.

714. स वै माघस्यामावास्यायामुपवसथ्युदङ्ङावर्त्स्यन्नुपैमे वसन्ति। ... स एष्णासाङ्-दङ्ङिच्चा तिष्ठते। दक्षिणावर्त्स्यन्नुपैमे वसन्ति वैषुवतीयेनाह्ना। कौषीतकि ब्रा० 19 3. This shows that the winter solstice, when the sun is farthest from the equator and appears to pause or rest before turning towards the north, occurred on the amavāsyā of Māgha.

of Uttarāyaṇa; *therefore*, by association with these two and for the sake of symmetry *varsā* is also held to be a *ṛtu* for the gods.

As regards the seasons, there are varying statements In Rg. I 15 the word 'ṛtunā' occurs several times, but once we have 'ṛtūn' also 'O Indra' drink Soma according to the seasons from the wealth (i e the richly filled vessel) of the brāhmaṇa' Rg. II. 36 and 37 are styled Ṛtavya hymns The Rgveda itself names five seasons, viz. Vasanta (X 161 4, X. 90. 6), Grīsma (X. 90. 6), Prāvṛs (VII. 103. 3 and 9), Śarad (over 25 times, as in II. 12, 11, VII. 66 11, X. 161. 4), Hemanta (X. 161. 4), but the Rg. does not expressly mention Śiśura Three seasons are metaphorically meant in Rg I 164. 48 and six in Rg I. 164. 15. The Atharvaveda[714a] (VI. 55. 2) mentions all the six, but not in the usual order. The Ait Br. says that the year has five ṛtus[715] by putting together Hemanta and Śiśira. The Maitrāyaṇi Sam. in I. 7. 3 speaks of Saṃvatsara as having five ṛtus and again as having six ṛtus and the Śat Br. (II 1.3.16) says that saṃvatsara comprises six ṛtus. In Śatapatha XII. 8.2.33 the ṛtus are said to be three viz Grīsma, Varsā and Hemanta and in the very next passage they are said to be six. There is mention of seven ṛtus in Atharvaveda VI. 61 2 But one should not be puzzled by this. The 7th ṛtu is probably meant to represent the 13th intercalary month as it is expressly mentioned in Atharva. (V. 6 4). Thibaut surprisingly asserts that the lists of the names of the seasons are only priestly inventions and the Vedic texts exhibit no practical use for them (Grundriss p. 11). Thibaut appears to be obsessed with the influence of priests and offers no good reasons why the names should be regarded as inventions and not as correctly registering what was current in the then society In Tai S[716] IV 4 11.1 the six ṛtus with two months for each are mentioned. Vasanta is mentioned as the first of ṛtus (mukham vā etad-ṛtūnām yad-vasantaḥ) in Tai. Br I. 1.2.6. The Śatapatha[717] provides that Vasanta, Grīsma

716. मधुश्च माधवश्च वासन्तिकावृतू शुक्रश्च शुचिश्च ग्रैष्मावृतू नभश्च नभस्यश्च वार्षिकावृतू इषश्चोर्जश्च शारदावृतू सहश्च सहस्यश्च हैमन्तिकावृतू तपश्च तपस्यश्च शैशिरावृतू । तै. सं. IV. 4.11.1. Pāṇini (IV. 3. 18–21) appears to have this passage in view.

717. वसन्तो ग्रीष्मो वर्षा' । ते देवा ऋतव. । शरद्धेमन्त शिशिरास्ते पितरो य एवापूर्यतेऽर्धमासः स देवा योऽपक्षीयते स पितरोऽहरेव देवा रात्रि पितरः पुनरह्न पूर्वाह्णो देवा अपराह्णो पितरः । ते वा एत ऋतव. । "'ब्राह्मणो वसन्त आदधीत । शतपथ II. 1.3.1–5

and Varsā are the seasons of gods, Śarad, Hemanta and Śiśira are seasons of the pitṛs; similarly the bright half of a month, the day and the forenoon of a day are the times for gods and the dark half of a month, the night, the afternoon of a day are the times for pitṛs and it winds up with the prescription that a brāhmaṇa should consecrate the sacred fires in Vasanta, a kṣatriya in Grīsma and a vaiśya in Śarad [718] At least as early as the edicts of Aśoka the words 'varsa' (which etymologically means 'rains') and 'saṃvatsara' are both used in the same sense viz. a year in the Brahmagiri inscription (vide C. I. I. I. p. 175).

There are Western scholars that deny the knowledge of the planets to the Vedic Indians. But Thibaut (Grundriss p. 6) and Kaye (p. 33) both concede that it is inconceivable that the Vedic Indians did not observe and distinguish at least the larger planets in early times, but they contend that the Vedic passages cited as proving knowledge of the planets on the part of Vedic Indians cannot be accepted as evidence of the record of observations about planets and that the mere mention of the number seven or five (about Ādityas in Ṛg. X. 72. 8-9 or oxen) cannot be relied upon. Both Thibaut and Kaye approach these problems with a peculiar mentality. Their criticism is mainly destructive and has a flavour of special pleading against things and ideas Indian. They hardly ever propose their own explanations of the disputed passages and when they rarely do they do not show how their explanations are more satisfactory than the ones they criticize One typical case may be cited here. Almost all scholars agree that Kṛttikās are the same as Pleiades; but Kaye (Archaeological survey memoir No 18 p. 24 and I. A. vol. 50, p. 45) appears to doubt this, yet he has not the goodness to say positively what other cluster Kṛttikās stand for and why. The principal reason for the paucity of references to planets probably

718. Vide Prof. Renou's article on 'Vedic ṛtus' in 'Indian Culture,' vol 15 pp. 21-26, where he endeavours to establish that ṛtu in the Ṛgveda has no restricted sense but means simply time or suitable time for sacrifice or sometimes 'rule or usage', and that 'ṛtunā' or 'ṛtubhiḥ' in the Ṛg means 'according to the division or distribution.' I demur to this conclusion. In some passages the meaning of ṛtu would have to be 'season', for example in Ṛg I 49,3 'O fair Usas!' winged birds, two-footed (beings) and four-footed (animals) go forth according the several seasons from the ends of the sky for thee (to meet thee)' (यदश्चित्ते पतत्रिणो द्विपच्चतुष्पदर्जुनि। उषः प्रारन्नृतूँरनु दिवो अन्तेभ्यस्परि॥). Similarly, in Ṛg I 95, 3 'ऋतून्' would have no connection with distribution or division.

is that the cult of the worship of planets that we find well developed in Yāj I. 295–308 had not yet arisen in Vedic times. At least Bṛhaspati (Jupiter) appears to be clearly meant in two Vedic verses. 'Bṛhaspati,[719] first appearing in the highest heaven of the great Luminary (the Sun), destroyed darkness &c,' 'Bṛhaspati, when first appearing, rose in front of Tiṣya (Puṣya) constellation'. 'The seven[720] priests guard the dear and fixed seat of the bird (Agni) along with the five adhvaryus; oxen, going eat, ageless, delight in the east, the gods follow the ordinances of gods' (Rg III. 7.7). Here the (five) oxen are taken to be the five planets. Similarly, 'He (Indra) filled heaven and earth and the mid-region; he superintends in various ways the five gods, the 49 gods (Maruts) at the proper seasons together with the thirty-four lights similar to his own but each according to the different ordinances governing each'[721] (Rg. X. 55. 3), 'these five oxen that stand in the midst of the great heaven' (Rg I. 105. 10) Vena[722] may be taken to be the brilliant Venus in Rg. X.

---

719. बृहस्पति: प्रथम जायमानो महो ज्योतिष: परमे व्योमन्। सप्तास्यस्तुविजातो रवेण वि सप्तरश्मिरधमत्तमांसि ॥ ऋ IV. 50.4 = अथर्व 20 88.4. बृहस्पति. प्रथमं जायमानस्तिष्यं नक्षत्रमभिसम्बभूव। श्रेष्ठो देवानां पुतनासु जिष्णु दिशोऽनु सर्वा अभयं नो अस्तु ॥ तै ब्रा III 1 1.5 तिष्य is the same as पुष्य and its presiding deity is बृहस्पति in तै ब्रा. III. 1.1 5, even in such later works as गोभिलगृह्य III. 3.14 तैषी means पौषी (पौर्णमासी). तिष्य occurs in Rg. V 54 13 (Treasure that does not fail as तिष्य does not form the heavens) and X 64 8 'we invoke the three times seven flowing rivers, the great waters, Kṛṣṇā, Tiṣya and Rudra' सायण paraphrases the first as आदित्य and the second as नक्षत्र Vide Fleet's interpretation of Rg. V 54 13 in JRAS for 1911 at page 516 which differs

720. अध्वर्युभि: पञ्चभि: सप्त विप्रा प्रिय रक्षन्ते निहित पद वे:। भाजी मदन्त्युक्षणो अनुव्रता देवा देवानामनु हि व्रता गु ॥ ऋ III. 7 7. The expression सप्त विप्रा. occurs frequently in the ऋ, vide III. 31.5, IV 2 15, VI 22 2.

721. आ रोदसी अपृणाद्रोत मध्यं पञ्च देवाँ ऋतुश: सप्तसप्त। चतुस्त्रिंशता पुरुधा वि चष्टे सरूपेण ज्योतिषा विव्रतेन ॥ ऋ X. 55 3. The verse is rather enigmatic It is in praise of Indra. The five gods are the planets that do not appear all at once but according to their respective seasons (ऋतुश:). The 34 lights are the Sun, Moon, the five planets and 27 naksatras. Ludwig and Oldenberg accept this interpretation No other satisfactory explanation of 34 has been given by any one.

722. अप्सरा गारुधपत्निभिर्याणा योषा बिभर्ति परमे व्योमन्। चरत्रियस्य योनिषु प्रिय: सन्त्सीदत्पक्षे हिरण्यये स वेन: ॥ ऋ. X. 123 5. In the first verse of this hymn Vena is described as ज्योतिर्जरायु: i e surrounded by a sack of light as a foetus is surrounded by a sack and as pushing (towards earth) the waters that are in the bosom of the variegated one. Vena is called Gandharva situated high in the heaven. Gandharva appears to have meant 'any bright heavenly body'.

(Continued on next page)

123. 1 and 5 the latter of which may be translated as follows: 'The young lady (Usas or lightning), approaching with a smile her lover, bears in the highest heaven Vena, the dear one, and she moves about, in the places of the dear (Vena) and sits down with him on a golden wing (a cloud)'. This would be a fine description of Venus rising in the east at dawn.

About months a good deal would have to be said later on. The word is either 'mās' or 'māsa'. We have 'mās' in Rg. I. 25. 8, IV 18. 4, X 52. 3 'He (Agni) appears every day and every month' and we have 'māsa' in Rg. III. 31. 9, V. 78. 9 (may the boy lying in the womb of his mother for ten months come out alive &c.), X. 184. 3. 'Mās' (the measurer) also means the Moon, as in Rg. VIII. 94. 2, X 12.7 ('sūrye jyotir-adadhur-māsyaktūn,' the gods placed light in the Sun and darkness in the Moon), X. 64. 3, X. 68. 10, X 92. 12, X. 93. 5. The words 'mās' (moon) and 'māsa' (month) are Indo-European, as variants of the same occur in many languages of the so-called Aryan family of languages.

Naksatras have been a matter of serious discussions in numerous works. The word 'Naksatra' has in all three senses (1) star in general; (2) 27 equal parts of the zodiac; (3) asterism in the zodiacal belt (which may each consist of one or more stars). In my opinion the first and the 3rd are the most frequent meanings of the word in the Vedic samhitās. It may be that the zodiacal belt was divided into 27 equal parts called naksatras, but the easier, more natural and probably the earlier way was to mark some conspicuous star groups like Krttikās, Mrgaśiras and to refer to them as naksatras. The word 'naksatra' occurs frequently in the Rgveda and the other Samhitās and Brāhmanas; 'the naksatras like thieves go away along with

---

(*Continued from last page*)

For example, in वाज सं. IX 7 'वातो वा मनो वा गन्धर्वा सप्तविंशति. । ते अश्वेऽध्वमयुञ्जन्नेऽस्मिन्नध्वमादधु. ॥' the गन्धर्वs and the 27 (नक्षत्रs) are separately mentioned. In वाज सं. 18 40 we have 'सुपुष्ण. सूर्यरश्मिश्चन्द्रमा गन्धर्वस्तस्य नक्षत्राण्यप्सरसो भेकुरयो नाम' which is explained in शतपथ IX 4.1 9. In अथर्व II 2 5 the Apsarases are called 'wives'of Gandharvas.' In तै स III. 4. 7. 1-3ff गन्धर्व is metaphorically identified with पर्जन्य, यज्ञ, मृत्यु, काम and so on and अप्सरस are identified with दक्षिणा, विश्व, मजा, आपि respectively and so on. It is therefore rather difficult to say what गन्धर्व primarily meant in the early Vedic age, but when वेन is called गन्धर्व and उषस् is called अप्सरस् in ऋ X. 123,5 it would not be altogether wrong to hold that the morning star Venus is called गन्धर्व वेन and उषस् is called अप्सरस्.

nights (to make room) *for the Sun that sees the world*'[723] (Rg. I. 50. 2), 'May the earth, the heaven, the waters, the Sun along with the naksatras and the wide sky listen to us' (Rg. III. 54. 19); 'he (Varuna) *urges on in two ways* the big and high heaven (the Sun) and naksatras and also spreads the earth' (Rg. VII. 86. 1); 'when he (the Sun) comes up, naksatras are not seen in the heavens, no one knows truly (how *this happens*)' Rg. X. 111. 7, 'The Ādityas are strong through Soma, the earth is great *through* Soma and *then* Soma is placed in the lap of these naksatras' (Rg. X 85 2) In some passages like Rg. VII. 81. 2 and X. 88. 13, it is *difficult to say what* 'naksatram' *stands for.* Naksatra in most of the above passages means a star in general But in Rg. X. 85 2 and in X. 68 11 (the pitrs adorned the heavens with naksatras)[723a] naksatra appears to mean the 27 well-known *asterisms.* So also when the Śatapatha contrasts the Krttikās (*that do not swerve from the east*) with other naksatras (that do swerve), naksatra should be taken to mean asterisms in the Zodiacal belt, the 27 (or 28) constellations in the Zodiacal belt in which the moon appears to move. Another word is 'str' (that is an Indo-European word), which always occurs in the instrumental plural in the Rgveda (as in I 68. 5, I. 87. 1, I 166. 11, II. 2 5, II. 34 2, IV. 7. 3, VI. 49. 3 and 12) and is often connected with decking the sky. The word 'rksa' in the sense of 'star' occurs in Rg[724] I. 24. 10 'these rksas that are established high up (in the sky) are seen at night, but where did they go by day'. This refers to the constellation of the seven sages (Ursa Major). In the Atharvaveda VI. 40 1, the constellation of the seven sages is expressly mentioned: "May Heaven and Earth confer on us freedom from danger here, may the Sun and the Moon do the same for us; may the wide mid regions confer on us freedom from danger and may there be *abhaya* for us on account of the oblation offered to the Seven Sages" The Śatapatha states that the seven sages were formerly called 'rksāh' (*note* 727 below) In Rg V. 56 3, VIII. 24. 27, VIII, 68 15 the word *rksa* means either 'bear' or something else It has been pointed out above p 494 that in Rg. X.55.3 there is a reference to twenty-seven

723 अप त्ये तायवो यथा नक्षत्रा यन्त्यक्तुभिः। सूराय विश्वचक्षसे॥ ऋ. I. 50. 2.

723a. Compare अभिद्यव न कृशनेभिरश्व नक्षत्रेभिः पितरो द्यामपिंशन्॥ ऋ X. 68 11 with ऋ I 68. 5 विपेश नाकं स्तृभिः कृशन appears to mean 'pearl or mother of pearl'.

724. अमी ये ऋक्षा निहितास उच्चा नक्तं ददृश्रे कुहचिद् दिवेषु॥ ऋ I. 24. 10, compare उच्चा दिवि दक्षिणावतो अस्थुर्ये अश्वदाः सह ते सूर्येण। ऋ. I. 107 2.

naksatras.[725] Apart from that the Ṛgveda mentions the naksatras Tisya (as above) and Aghā and Arjunī[726] (in Ṛg. X. 85. 13) which two latter correspond to Maghā and Phalgunīs according to the Atharvaveda. It is possible to hold either that Aghā and Maghā were names for the same naksatra in Ṛgvedic times or that Aghā was changed to Maghā by the time of the Tai S. and the Atharvaveda hymns. If the latter alternative be accepted the change in the names of the two naksatras (Aghā and Arjunī) could not have taken place in a short time, but would require at least a hundred years between the time of Ṛg. X.85 on the one hand and Tai. S. and Atharva 19.7 on the other. This would strongly militate against Max Muller's assignment of two hundred years to the Samhitās which are purely hypothetical and the minimum dates (vide Intro p XV to the 4th volume of his 4 volume ed of the Ṛgveda) Apart from Aghā and Arjunī which it is agreed are two of the 27 naksatras, it is probable that the Ṛgveda refers to Mṛgaśiras, Punarvasu, Satabhisak and one or two more by name. The Naksatras are 27 or 28 (adding Abhijit after Uttarā-

---

725. For a myth about the disappearance of Abhijit from the list of naksatras, vide Vanaparva 230 2–11. There it is said that Abhijit, the younger sister of Rohinī, coveted the position of eldership and went to a forest for practising *tapas*. Skanda was approached by the wives of sages, says Mārkandeya, and he said that he would consult Brahmā Then Brahmā arranged that time began with Dhanisthā and the Krttikās went to the heavens This has been interpreted by modern writers on ancient Indian Astronomy to mean that the vernal equinox happened to be in the Krttikās before the time of Yudhisthira and that Abhijit was accepted as one of the naksatras Vide] of Ganganatha Jha R. I. vol XIII at pp. 82–84 (by Prof. T. Bhattāchārya). With the greatest respect for the learned writer, I cannot accept all this. Discussion of his theory has to be given up for reasons of space

726. सूर्याया वहतु प्रागात्सविता यमवासृजत्। अघासु हन्यन्ते गावोऽर्जुन्यो॰ पर्युह्यते॥ ऋ. X. 85. 13 = अथर्व XIV. 1 13 (सूर्याया .. सृजत्। अघासु हन्यन्ते गावः फल्गुनीषु व्युह्यते।). Rg. X. 85 is a marriage hymn, referring to the myth of the marriage of Sūryā, daughter of Savitr, to Soma. In this verse reference is made to the sending of presents (chiefly of cows, it seems) on A hā i e Maghā naksatra and the taking away of the bride after marriage on Arjunī (i. e. Pūrvā or Uttarā Phalgunī) the next day or after one day more. The शतपथ (II 1 2. 10–11) asserts that Phalgunyah is the recondite name of Arjunyah हन्यन्ते in Rg X. 85. 13 does not mean 'are killed' but 'are beaten' or 'driven' (from the house of Sūryā's father to the house of the bridegroom). The Marathi equivalent 'हाण' means 'to beat or drive' Vide आप श्रौ. I, 3. 1–2 'अघाभिर्गावो गृह्यन्ते। फल्गुनीभ्यां व्युह्यते।; रोहिणी मृगशिर्षमुत्तरे फल्गुनी स्वातीति विवाहस्य नक्षत्राणि। बौ. गृ I. 1. 20.

sādhā and before Śravana in ancient authorities) In the Vedic literature, Vedāngajyotiṣa and even in Yājñavalkya-smṛti they are enumerated from Kṛttikā to Apabharaṇī (or Bharaṇī) while in works from the 3rd or 4th century A. D. and in modern times they are enumerated from Aśvinī to Revatī.

It is time now to set out in a list the names of nakṣatras, deities governing them, their gender and the number of stars in each. There is some divergence of views as regards the names and the deities, which will also be pointed out in the appended table: complete lists occur in Tai. S IV. 4.10. 1-3, Tai Br. I. 5 and III. 1, Atharvaveda XIX. 7. 2-5, Kāthaka Saṃhitā 39 13, Maitrāyaṇī Saṃhitā II. 13 20 and Vedāṅga-Jyotiṣa. For European equivalents of the Indian nakṣatras, vide Colebrooke in Asiatic Researches vol. IX chart opposite p 322, Dikshit's Marathi work (2nd ed. p 459) and Burgess in J. R A. S for 1893 p. 756. It is not unlikely that there is a veiled reference to Revatī, Punarvasū and Puṣya naksatras in Rg X. 119. 1-3[728], and Rg X. 86.22 appears to refer[729], as Tilak says in 'Orion' p 166 ff., to the Mṛgasiras naksatra; 'Vṛṣākapi 'O Indra ' when you dashing upwards came to the house, where was that Mṛga guilty of a good deal of sin, to whom did that Mṛga, that confounds people, go? Indra is superior to all'. From Rg I. 161 11 and 13 and IV. 33.7, Atharvaveda IV. 11.11 it appears that the dog-star (Sirius) is referred to, and that twelve days were added at the end of the year during which the Rbhus slept or took rest or enjoyed the hospitality of the Sun.[730] In Rg I. 124.9 'satam te

727. अमयं द्यावापृथिवी इहास्तु नोऽभयं नोस्तु नक्तिता च. कृणोतु । अमयं नोऽस्त्वन्तरिक्षं सर्वाश्च दीक्षाश्च हविषाभयं नोऽस्तु ॥ अथर्ववेद VI 40 1 ; कृत्तिकाणां ह वा एता अग्ने पत्न्य आतु सर्वान्हु ह रूप वै पुरस्तात् इत्याचक्षते । शतपथ II 1 2 4. एता refers to कृत्तिका

728 निर्वर्तध्वं नाहु गावाल्लाल्यिवक्ष रेवती. । अग्रीषोमा पुनर्वसू अग्ने धारयतं रयिम् ॥ पुनरेता नि वर्तन्तालल्यिं पुष्यन्तु गोपती । इहैवाग्ने नि धारयेह विश्वतु चा रयिं ॥ ऋ. X. 19. 1 and 3 (addressed to cows or rain waters). Both Grassmann and Geldner hold that पुनर्वसू refers to the constellation so called

729. वृषाकपे प्रश्निमाजायतन । क्रत्वस्य पुत्रवो वृत्र कनगडनयोपनो विश्वस्मादिन्द्र उत्तरः ॥ ऋग्वेद X 86 22 It has to be supposed that this is addressed by some one else (Indrāṇī probably). निरुक्त XIII 3. explains this verse Prajāpati guilty of the sin of incest is said to have jumped up as a deer in the sky pursued by Rudra. Vide तै ब्रा XIII 10 "स विद्ध ऊर्ध्व उदप्लवतेनैनं वृग इत्याचक्षते य उ एव वृगव्याधः स उ एव रु । या रोहित्ता रोहिणी ।"

730 सुपुर्वासं ऋभवस्तद्वृक्षतागोह्य क इदं नो अबूबुधत् । श्वानं वत्सो मोचयितारमब्रवी स्तवतः इदनवा अरुरुधः ॥ ऋ I. 161. 13 ; द्वादश वृष्णो अरुणस्य सत्यादिद्ये दत्तमृभव सस्तन. । ऋ IV. 33. 7. The first may be translated as follows: 'O Ṛbhus!

(*Continued on next page*)

rājan bhisajah sahasram' it is possible to see a reference to the Śatabhisak naksatra of which Varuna is said be the devatā in the Tai. Br. III. 1, especially as in the following verse (ami ya rksā nihitāsa uccā) there is a special reference to the Great Bear or to naksatras in general.

Some remarks on the naksatras in general and on individual naksatras would not be out of place. In the Ātharvana Naksatrakalpa (the first of the Atharvaparisistas edited by Bolling and Negelein) in chapter 4 verses 1–8 the devatās (deities) of the naksatras are given and chap. 2 states the number of stars in each naksatra In some Purānas also such as the Visnudharmottara (I 83. 13–21) the presiding deities of naksatras are set out. In the Brhat-samhitā Varāhamihira (chap. 97. 4–5) specifies the deities of the naksatras from Aśvinī to Revatī (including Abhijit) as noted below. The Brhat-samhitā (96 1–3), the Ātharvana-naksatra-kalpa (I. 2) and the Visnudharmottara (I. 88 4–7) specify the number of single stars in each naksatra (which are from one to six), those having six stars being Krttikā, Āślesā and Maghā Vide JASB. vol 62 part 1 p. 14 where Hoernle gives a table, from a ms. of Puskarasāri's work, of naksatras, the stars in each, the *muhūrtas*, the *gotra*, *devatā* of each. According to Hoernle the work is very old. Some notes are added on individual naksatras (mentioned in the Vedic works). Krttikā—The Tai. Br. III. 1. 4. 1 specifies the names of seven Krttikās as Ambā, Dulā &c Pānini refers to Krttikā as Bahulā (in IV. 3. 34). J C. Hickey in 'Introducing the universe' (pp 119–120) says that persons of unusually keen 731 vision under favourable atmospheric conditions can see even eleven. Mrgaśirsa—Tai Br. III. 1. 4. 3 mentions both names viz. Mrgaśirsa and Invakā. Punarvasū—In the Kāthaka and Mai S. this is masculine singular; Pānini states (I. 2. 61) that in the Veda the word 'Punarvasu' is employed optionally in the singular (i. e.

(*Continued from last page*)

after having slept you asked this 'O Agohya (the Sun who cannot be concealed by any one)! who is here that awakened us? The goat (the Sun) replied that the dog was the awakener at the end of year and that this was announced that day.' Tilak in 'Orion' (pp. 168 ff) explains at great length the meaning of these verses Though one may not agree with everything that he says, his main contentions seem to be probable.

731. मृगशीर्षमिति नक्षत्रमूर्तिसमूहनाम। इन्वका इति मूर्तिविशेषाणां नाम। सायण on तै. ब्रा. III.1.4 3, छन्दसि पुनर्वस्वोरेकवचनम्। पा. I.2 61. The काशिका has 'पुनर्वसुर्नक्षत्रमित्यिदेवता। पुनर्वसू नक्षत्रमदितिर्देवता।' पुष्यसिध्यौ नक्षत्रे। पा III 1.116. The काशिका explains पुष्यन्त्यस्मिन्नर्था इति पुष्यः। सिध्यन्त्यस्मिन्निति सिध्यः।. फल्गुनीप्रोष्ठपदानां च नक्षत्रे। पा. I. 2. 60, काशिका explains कदा पूर्वेफल्गुन्यौ कदा पूर्वा फल्गुन्यः, कदा पूर्वे प्रोष्ठपदे कदा पूर्वा प्रोष्ठपदाः। आश्वे यम-दहन-कमलज-शशि-चूलभृत्-अदिति-जीव-फाणि-पितरः। पोनि-अर्यम-दिनकृत्-त्वष्टृ-पवन-शक्रोग्नि-मित्राश्च ॥ शक्रो निर्ऋतिस्तोयं विश्वे ब्रह्मा हरिर्वसुवरुणः। अजपादोऽहिर्बुध्न्य. पूषा चेतीश्वरा भानाम् ॥ बृहत्सं. 97. 4–5. पोनि stands for भग the presiding deity of पूर्वाफल्गुनी (in the वेदाङ्गज्योतिष and आथर्वणनक्षत्रकल्प I. 4). The आथर्वणनक्षत्रकल्प differs from बृहत्सं. as to some of the regents of नक्षत्रs

sometimes in the dual, sometimes in the singular) Kālidāsa employs the dual Punarvasū in Raghuvaṃśa XI 36 'gām gatāviva divaḥ Punarvasū.'

Tiṣya—Pāṇini uses the word Tiṣya in I 2 63 and 3, 34 and the words Puṣya and Sidhya in the sense of 'on which undertakings prosper or succeed.'

Phalgunī—Pāṇini provides that the words Phalgunī and Prosthapadā as nakṣatras are optionally used in the dual or plural.

Niṣṭyā—Mai. S shows that this is neuter singular. Niṣṭya in Rg. VI, 75. 19, VIII 1. 13, X 133 5 appears to mean 'outsider or outcaste'.

Viśākhā—Pāṇini (I 2 62) provides that in the Veda 'Viśākhā' is sometimes used in the singular, sometimes in the dual, while in his day it was used in the dual

Anurādhā—The mantra in Tai. Br III 1 2 1 appears to use it as masculine plural

Rohiṇī—Jyesthā is called Rohiṇī in Tai S and Tai. Br (I 5) Jyesthā is styled Jyesthaghnī in Atharva VI 110 2 Vide note 753 below.

Mūla—In Tai S, Vicṛtau is used for Mūla The Atharvaveda brings together Vicṛtau and Jyesthaghnī in VI 110 2-3 and has 'Vicṛtau nāma tārake' in II 8. 1 and VI 121 3 In Rg X. 87 10 (tridhā mūlam yātudhānasya vṛśca) Mūla means 'root, foot' The word 'Mūlabarhaṇa' occurs in Atharva VI 110. 2 and Mūlabarhaṇī in Tai Br. I 5 1 4.

Abhijit—not mentioned in Tai S. and Kāṭhaka, though mentioned in Tai. Br., Atharva and Mai. S It is sometimes mentioned in later works e g. the Anuśāsanaparva (64 5-35) mentions the consequences of gifts to brāhmaṇas on 28 nakṣatras from Kṛttikā to Bharaṇī.

Śronā—Atharva calls it Śravaṇa and Kāṭhaka speaks of it as Aśvattha. In Pāṇini IV 2 22 Aśvattha is mentioned as a nakṣatra, The word Śroṇa in Rg. I, 112 8 means 'lame or cripple'

Prosthapadā—Atharvaveda speaks of 'dvayā Prosthapadā'.

It would be noticed that some of the names of nakṣatras differ such as Invakā (in Tai Br I 5 1 and Kāṭhaka) for Mṛgaśīrṣa, Bāhū for Ārdrā (in Tai Br I. 5 1, Kāṭhaka S and Maitrāyaṇī S), Tiṣya for Puṣya, Niṣṭyā for Svātī (in Tai. Br.), Rohiṇī (in Tai. Br. I. 5 4 and Tai. S) for Jyesthā, Vicṛtau in Tai S for Mūla (in other Vedic texts), Śroṇā (in Tai S, Tai. Br. and Mai S.) and Aśvattha in Kāṭhaka S for Śravaṇa (in Atharva), Śraviṣṭhā for (medieval and modern) Dhaniṣṭhā, Apabharaṇī for Bharaṇī (in Atharva, Mai S and modern times). The deities also differ, the most striking being the change of place between Bhaga and Aryaman as presiding deities of Āsādhās in the Kāṭhaka, Vedāṅgajyotiṣa, Śāṅ gr., and Indra as deity of Citrā in Tai. S and Tvaṣṭr in Tai. Br.

and Kāthaka S, Pitaraḥ as deity for Mūla in Tai S. but Nirrti in almost all other texts; Indra as deity of Śatabhisak in Tai. S. and Mai. S but Varuna in Tai Br (III. 1.) and Kāthaka. Further, it was also specified whether a naksatra had only one star or had a cluster of two or three or more. Besides, the important point for consideration is; why does the Tai S. differ from the Tai. Br and Tai Br. I. 5 from Tai. Br. III. 1 in the number of naksatras, in the names and the deities also of some of them No satisfactory explanation can be given except this that the Tai. S passage is earlier by some centuries than the Tai. Br. section (III 1) or the Tai. S was composed in a country far away from the place where the Tai Br. was composed. This latter does not appear to be probable since one part of Tai. Br. (I 5) differs from another part (III. 1). The latter section speaks of a naksatra-isti in which oblations are offered to 28 naksatras (including Abhijit) and their deities (one naksatra being dealt with on each day from Krttikās) together with *puronuvākyās* (invitatory verses) and *yājyās* (oblation verses) which are different for each naksatra The first fourteen naksatras from Krttikā (up to and including Viśākhā) are called Devanaksatras and the fourteen naksatras from Anūrādhā to Apabharanī or Bharanī are called Yamanaksatras. After Viśākhā, the Tai. Br. (Naksatresti) inserts Paurnamāsī with appropriate puronuvākyā and yājyā verses and after apabharanī an offering to Amāvāsyā with a puronuvākyā (which is the verse 'Nivesanī sangamanī vasūnām' Tai S III. 5 1.1) and a yājyā (which is the verse 'yat te devā adadhur', Tai S. III. 4 1. 1). Besides, it was laid down that the sacrificer had to invoke gods in the sacrifice by a name (to be kept secret) derived from the presiding deity of the naksatra on which he was[732] born (*i. e. if*

732, नक्षत्रदेवता होता एताभिर्यज्ञकर्मणि। यजमानस्य शान्त्यर्थं शान्तिकैर्नाम नक्षत्रजं स्मृतम्॥ वेदाङ्गज्योतिष verse 28 Western scholars usually ascribe the Vedāṅga Jyotiṣa to about 400 B. C For example, 'L' Inde classique' edited by Prof L. Renou and others, Tome II para 1711 assigns, after saying that the date is undetermined, 400 B C as its probable date. I should like to place it not later than 8th century B C for several reasons, If the observation referred to above (p 496) about krttikās were made about 12th century B C (14th century B.C. as some scholars hold) and if 400 or 300 B.C, was accepted as the date of the Vedāngajyotiṣa, it would have to be supposed that the writer of it either did not notice (or purposely ignored) the fact that winter solstice had shifted about 11 or 12 degrees from the originally observed position This is rather difficult to believe A difference of four or five degrees may not be dwelt

(*Continued on next page*)

born on Kṛttikā, then some name like Agnimitra &c., if on Puṣya, Bṛhaspatimitra &c.).

If the nakṣatras (27 or 28) had been borrowed at one time *en bloc* from a foreign source the divergences in the names of the nakṣatras, in the presiding deities, and in the gender and number should ordinarily not have arisen to the extent they do But, if they were an indigenous growth then differences of opinion would naturally have been evolved in the passage of centuries The only asterisms first specialised and named in Greece and Syria were the Pleiades in Job 38. 31, Homer and Hesiod; Orion in Job 39 31, Homer and Hesiod; Arcturus in Job 9.9 and in 39.32, Homer and Hesiod, the great Bear in Homer and Hesiod, Aldebaran in Homer and Hesiod and three more including Sirius (vide 'Dawn of Astronomy' by Norman Lockyer, 1884 p. 33) This is several centuries later (if not thousands) than the early Vedic texts wherein the whole scheme of nakṣatras appears.

Further details contained in the Tai Br and Baudhāyana śrauta sūtra (28 3–4) are not set out here The Nakṣatreṣṭi in the Tai. Br (III. 1) has been competently dealt with by Prof Paul Emile Dumont in the Proceedings of the American Philosophical Society, vol 98, No 3 (1954) with text, English translation and notes The nakṣatras had been closely observed and many legends arose from imaginary resemblances of star groups to certain familiar animals and also fanciful interpretations of the constellations observed in the sky. The nakṣatras were closely concerned not merely in a religious rite called Nakṣatreṣṭi, but they were of prime importance in the basic śrauta rite, viz. consecration of the sacred fires (Agnyādhāna) In the Śatapatha Brāhmaṇa (II. 1. 2) reference is made to several nakṣatras from Kṛttikā onwards together with their presiding deities as being fit for Agnyādhāna (viz Kṛttikā, Rohiṇī, Mṛgaśīrṣa, Pūrvā Phalgunī, Uttarā Phalgunī, Hasta, Citrā) The Tai Br. recommends spring, summer and śarad for Agnyādheya in the case of

upon Besides, the facts that the Bandhāyana-śrauta-sūtra has a similar passage, that Kauṭilya follows the five year cycle and says that there is an intercalary month at the end of $2\frac{1}{2}$ years and another intercalary month at the end of the cycle of five years (II 2 on p 109) and the fact that the Mahābhārata (Virāṭaparva 52 3–5) speaks of adding two intercalary months every five years rather suggest an earlier date for the Vedāṅga-Jyotiṣa Vide Swamikannu Pillai's 'Indian Ephemeris' vol I part I p 448 ff for discussion on the probability of the antiquity of the वेदाङ्गज्योतिष

brāhmana, ksatriya or vaiśya sacrificer respectively. The Śatapatha appears to condemn setting up of sacred fires in relation to naksatra alone and recommends that Agnyādheya should be performed on the New Moon of Vaiśākha on which there is Rohinī naksatra;[732a] but these rules did not apply when a person had resolved upon performing Soma sacrifice and he should not in that case stop to consider the season or naksatra.

Very interesting information and legends are given in the Vedic texts about some of the naksatras. About the Krttikās the Śatapatha Brāhmana[733] states 'other naksatras contain one star, or two or three or four stars, but these Krttikās are many, the sacrificer reaches plenty; therefore one should set up sacred fires on the Krttikās. These (Krttikās) indeed do not swerve from the east, while all other naksatras do swerve from the eastern direction.' The recondite allusion in Rg. I. 164. 33 (atra pitā duhitur-garbham-ādhāt) and X. 61. 7 (pitā yat svām duhitaramadhiskan) are developed into a myth, a lengthy account of which is given in the Ait. Br XIII. 10 and Śatapatha I. 6. 2. 1–4 (Prajāpati approached his daughter, some say the heaven and others say it was Usas &c.) and about Rohinī, Mrga, the Mrgavyādha (Sirius) and the three stars in the belt of Orion. Prajāpati[734] is said to have had 33 daughters which he gave in marriage to king Soma, who was fond of Rohinī and on account of that suffered from Rājayaksman (Tai. S. II. 3. 5 1)

Why the naksatra lists begin with the Krttikās in the Vedic Literature and why with Aśvinī in classical Sanskrit literature can be explained only on astronomical considerations. The ver-

732 a. तस्माज्ज नक्षत्र आदधीत।" योसौ वैशाखस्यामावास्या तस्यामादधीत सा रोहिण्या सम्पद्यते। आत्मा वै प्रजा पशवो रोहिणी। "'शतपथ XI. 1 1 3 and 7

733. एकं ह्वे त्रीणि चत्वारीति वा अन्यानि नक्षत्राण्यथैता एव भूयिष्ठा या कृत्तिकास्तद्भूमानमेवैतदुपैति। तस्मात्कृत्तिकास्वादधीत। एता ह वै प्राच्यै दिशो न च्यवन्ते सर्वाणि ह वा अन्यानि नक्षत्राणि प्राच्यै दिशश्च्यवन्ते। शतपथ II 1. 2. 2–3. It should be noted that the present tense (*cyavante*) is used here, whence it follows that this passage was composed when the position of the Krttikās on the equator was an observed fact and their declination was nil. From this S B Dikshit deduced the date 3000 B C (I A volume 24 pages 245–257). The कृत्तिकाs are said to be seven in Maitrāyanī S I 6.9 and Tai Br III 1 4 1.

734. प्रजापतेस्त्रयस्त्रिंशद् दुहितर आसन्। ता. सोमाय राज्ञेऽददात्। तासां रोहिणीमुपैत्। तै सं. II. 3 5 1. प्रजापतिर्वै सोमाय राज्ञे दुहितॄरददात्नक्षत्राणि स रोहिण्यामेवावसत्। काठकस XI. 3 The number 33 is arrived at by adding 7 कृत्तिकाs and the remaining 26 नक्षत्रs

nal equinox was in Kṛttikā about 2300 B. C Instead of admitting this as a probable date for the Vedic works, Fleet boldly asserts that the list of naksatras beginning with Kṛttikās has no basis in fact, but belongs entirely to ritual and astrology (*JRAS for 1916 p 570*). No detailed arguments are deemed necessary Fleet does not specify cogent evidence, nor does he assign reasons why priests later on changed the beginning of the list from Kṛttikā to Aśvinī, nor does he vouchsafe how the list of naksatras in the Vedic age began in fact for ordinary folk if the Kṛttikā list was a pure priestly invention Even Thibaut (in I A. vol. 24 at p. 100) had to admit that the beginning of the naksatra series with Kṛttikā instead of with Aśvinī seriously affects Max Muller's assignment of 1500 B. C. to 800 B C. to the Vedic period In the Tai. S VII 4 8 there is a discussion about the time for undergoing the dīkṣā in a Sāmvatsara-satra'.[735] It is proposed there that the dīkṣā may be performed on the Full Moon in Phalgunī because that is the beginning of the year; then an objection is raised against this and it is proposed that the dīkṣā may be taken on Full Moon in Citrā, because that was the beginning of the year. If the year began with the winter solstice in those days this reference would have to be placed at 4000 or 6000 B. C. This passage probably embodies traditions that the year began in different months in different periods of antiquity.

Great controversies have raged over the question whether the Indian naksatras are indigenous or were borrowed from some other people. The great French astronomer Biot held that Indians borrowed the naksatra system from the Chinese and Whitney followed Biot There were others who held that Indians borrowed them either from the Babylonians or the Arabs I cannot enter here into the merits of these discussions The Arabs themselves admit that they borrowed their astronomy from Indian Siddhāntas and there is hardly anything to show that they knew the complete naksatra system as early as at least 1500 B. C. Therefore, we may leave the Arabs out of account altogether (vide Thibaut in Grundriss p. 14) Great scholars are often blinded by prejudices and shut their eyes to basic facts. The Chinese system of Sieu had at first only 24 and then it became one

735 फल्गुनीपूर्णमासे दीक्षेरन् सुखं वा एतत् संवत्सरस्य यत्फल्गुनीपूर्णमासो सुखत एव संवत्सरमारभ्य दीक्षन्ते । तस्मैकेव निर्या यत्सामेध्ये (ध्ये ?) विषूवान्संपद्यते चित्रापूर्णमासे दीक्षेरन् सुखं वा एतत्संवत्सरस्य यच्चित्रापूर्णमासो सुखत एव संवत्सरमारभ्य दीक्षन्ते। तस्य न काचन निर्या भवति। तै. सं VII 4 8. निर्या appears to mean 'defect'.

of (it is said) 28 at about 1100 B C. (as said by Thibaut in Grundriss p. 13.) There are no clear traces in the Vedic texts that naksatras were held to be 24 during the times of those texts. We should not accept at their face value the assumptions of the antiquity of astronomy in China that are sometimes advanced (vide 'East and West', Rome, vol. VI. p. 288.) Besides, neither in Babylonia nor in China were the asterisms thoroughly integrated with the religious system. In Vedic times one was not entitled to perform solemn sacrifices unless he had already set up sacred fires on certain naksatras Further, the months (Māgha, Phālguna, Caitra &c) were named after certain naksatras and exist only in Sanskrit, not in Greek, Latin or Chinese. The deities that were deemed to preside over the naksatras from such ancient days as those of the Tai S. and Tai. Br. are almost all of them exclusively Vedic and have no counterparts in Babylonia or China. Besides, though thousands of cuneiform tablets have been found in Babylonia no one has, so far as I know, pointed to a single tablet where all the naksatras appear in an orderly series of 27 or 28, as we find in Vedic Samhitās. It is at least clear that long before the Taittirīya Samhitā the Vedic people had fixed the number of the naksatras (at 27 or 28), their names and order and their presiding deities and had made the naksatras a most integral part of their sacrificial system. Furthermore, almost all of the Indian names of naksatras are siginficant or have ancient legends connected with them. For example, Ārdrā means 'wet' and the naksatra was called Ārdrā because when the sun was in it rains set in. Punarvasu was probably so called because the grains of paddy or barley sown in the ground sprout up as new wealth after being buried; Pusya, was so called because the young sprouts grow and become nourished; Āśresā or Āślesā, because the grown-up plants of paddy or barley grow high enough to embrace each other; Maghā, because the paddy or other plants are putting forth the standing crop which is wealth in itself; Krttikā, because they (being six or seven), look like the skin of the spotted deer on which a religious student was to sit for Vedic study. In these circumstances the burden to prove borrowing of the naksatra system by Indians was very heavy on those who affirmed it. What is the evidence? There is very little evidence except prejudice and speculation The main tangible evidence they can and do rely on is that the Chinese or Babylonians had also 28 naksatras as the Indians had. But these scholars, though very learned and far-seeing in their own way, never stopped to consider how from

China and Babylon the naksatras could reasonably be supposed to have been derived by Indians more than 3500 years ago (on a most modest estimate) and allowed to be the very centre and basis of their religion of sacrifices, what were the means for the communication of the thoughts and ideas underlying the naksatra system and why one may not surmise that the real state of things was the other way about (viz the Babylonians and Chinese derived the system from the ancestors of Indians) or that all systems were derived from a common prehistoric source. Another reason for discounting the theories of Biot, Weber and Whitney may also be advanced viz the researches of Tilak in his 'Orion' (particularly pp. 61–95) and of Prof. Jacobi have at least made this clear that the Kṛttikā series is not the oldest arrangement of the naksatras known to Indians, but that the Indians had once an older arrangement, which placed Mrgaśīrsa at the vernal equinox. Those who are interested in these somewhat novel and rather barren controversies raised by Biot, Weber and others may read Weber's 'der vedischen Nachrichten von den Naksatras', two volumes, I A vol 23 pp. 154–159 (Jacobi on the 'date of the Rgveda'), pp. 238–249 (Buhler's note on Jacobi's theory and Tilak's Orion, I A. pp. 85–100 (Thibaut on 'antiquity of Vedic civilization') and pp 361–369 (Whitney), I A 48 pp. 95–97. The word 'naksatra' is derived by Yāska[736] from the root 'naks' meaning 'to go', while the Śatapatha Br. (II 1. 2. 17–18) and Tai Br. II 7 18 derive it as from *na* plus *ksatra* and Pāṇini (VI 3 75) accepts this derivation. The word 'naksatra' (m) is applied even to the Sun in Rg. VI. 67. 6. Tai. Br teaches how one is to mark the naksatra on which one has to perform a religious act, viz. he should mark about dawn and before the first rays light the sky the part of the sky where the naksatra appears and when the sun appears the naksatra would be to the west of the sun, at which time he should perform what he has to do. It is stated that sage Matsya established into eminence Yajñesu and Śatadyumna by this method (Tai. Br. I. 5. 2 1.)

Even so early as the Ait. Br.[737] Vedic Indians had arrived at the conclusion that the Sun was one and never sets. 'This Sun

736. नक्षाः स्तृभि—इति नक्षत्राणाम्। नक्षत्राणि नक्षतेर्गतिकर्मणः। नेमानि क्षत्राणि—इति च ब्राह्मणम्। निरुक्त III. 20 The first derivation is supported by तै. ब्रा. I. 5.2.10 'यो वा इह यजते अर्धं लोक्यं नक्षते तन्नक्षत्राणां नक्षत्रत्वम्'

737. स वा एष न कदाचनास्तमेति नोदेति। त यदस्तमेतीति मन्यन्तेऽह्न एव तदन्तमित्थाथात्मानं विपर्यस्यते रात्रीमेवाधस्तात्कुरुतेऽह परस्तात्। अथ यदेन प्रातरुदेतीति मन्यन्ते

(Continued on next page)

indeed never sets nor rises. When people think that he (the Sun) sets what happens is he reaches the end of the day, reverses himself, creates night below and day above When people think that he rises in the morning, that means that having reached the end of the night he reverses himself, makes day below and night above. He indeed never sets'. This is in very interesting contrast to the Jaina view in Sūryaprajñapti of two suns and two moons or the view of Heraclitus in Greece (6th century B C.) that a new sun was born and died every day (Eisler p. 42.)

In the Brāhmana period Indians had[737a] found out the day called Visuvat or Visuva (which is said to be in the middle of the sacrificial year) when the day and night were of equal length: 'As a person fastens the two wings or sloping sides of a hall (or shed) to the bamboo ridge or beam that is in the middle (of the shed), so people use the Divākirtya day for stretching across the two sides (half years)'.

I have purposely devoted some space to the subject of the astronomical knowledge of people in the Vedic age. Several European scholars that have written on the astronomical achievements of ancient and medieval India, have indulged in very disparaging and contemphuous statements about Indians

रात्रेरेव तदन्तमित्वाऽथात्मानं विपर्यस्यतेऽहरेवास्तात्कुरुते रात्रिं परस्तात्। स वा एष न कदाचन निम्लोचति। ऐ ब्रा *III*, 44 *This idea is taken up by soma Purānas also For example,* विष्णुपुराण II 8 15 says नैवास्तमनमर्कस्य नोदयः सर्वदा सतः। उदयास्तमनाख्यं हि दर्शनादर्शनं रवेः। ब्रह्मगुप्त in ब्राह्मस्फुटसि XI, 3 criticises the Jain view "भानि चतु पञ्चाशद्द्वावर्केन्दवो जिनोक्तं यत्। ध्रुवमत्यस्यावतीं भवति यतोद्वा ततस्तदसत्॥" The पञ्चसिद्धान्तिका (XIII 8) also refers to this Jaina view.

737a. एकविंशमेतदहरुपयन्ति विषुवन्तं मध्ये सवत्सरस्य। ऐ ब्रा IV 18 (18 4), यथा शालायं पक्षसी मध्यमं वंशमभिसमायच्छति एवं संवत्सरस्य पक्षसी दिवाकीर्त्यमभितंतन्वन्ति मार्तिमार्च्छन्ति। तै ब्रा I 2 3 सायण explains on ऐ ब्रा 'दिवैव कीर्तनीयं मन्त्रजातं यस्मिन्विषुवत्यहनि तदहर्दिवाकीर्त्यम्।' The षाण्डवब्राह्मण (IV. 6. 3–13 and IV 7. 1) refers to विषुवत् day and provides that दिवाकीर्त्यसाम is to be sung that day since the Gods removed by Divākirtya the darkness with which Svarbhānu, the son of an Asura, had pierced the sun and that विषुवत् is the soul of the year and two wings or two sides go round it. Vide H of Dh vol II page 1240 for the arrangement of the 'Gavām-ayana', a संवत्सरसत्र and the position of the विषुवत् day It should not be forgotten that the Equinox itself is more or less an astronomical fiction and cannot be accurately observed without scientific apparatus As the sacrificial year had only 360 days and a day called विषुवत् was in the middle that would come to 361 days while the solar year is, 365¼ days nearly and therefore विषुवत् would have been a day of equal day and night only approximately.

not only in astronomy, but generally. To take only one or two instances Thibaut (Grundriss p. 3) is pleased to observe that what Indians knew before Greek influence is not much and is of a primitive character. This is how Whitney, a learned American scholar of Sanskrit, unburdens himself; 'there can be no question that, from what we know in other respects of the character and tendencies of the Hindu mind, we should not at all look to find the Hindus in possession of an astronomical science possessing so much of truth They have been from the beginning distinguished by a remarkable inaptitude and disinclination to observe, to collect facts, to record, to make inductive investigations' (J A. O S vol. VI p. 471) His coadjutor, Mr. Burgess, differed from him even in regard to astronomy (*ibid.* pp. 477–480).

One is tempted to return Whitney's compliments to Indians in the same coin by saying that for 1400 years from Ptolemy, the ancestors of Whitney and other highbrows hardly ever made any discovery of astronomical importance, stuck unthinkingly and slavishly to the Almagest and were literally in the dark about the true astronomical position during what are often called the Dark Ages of Europe Even Luther who rebelled against the authority of the Pope denounced Copernicus as a fool, charged the latter with turning upside down the science of astronomy and relied upon the Bible, which, he said, declared that Joshua commanded the Sun to stand still and not the Earth (Joshua 10. 12). This betrays the old mentality that if there is a contradiction between the words of the Bible and Nature, the believers in Scripture must correct their ideas of Nature in accordance with the Bible and not the Bible in accordance with what is found to be Nature This also reminds one of the maxim of the Pūrvamīmāṃsā that there is nothing too heavy for a sacred text.

I should request all Western authors interested in Indology and dazzled by some writings of a few Greeks to ponder deeply over the following words of Sir Norman Lockyer in his 'Dawn of Astronomy' (1894) 'Anaximander told us that the earth was cylindrical in shape and every place that was then known was situated on the flat end of the cylinder, and Plato, on the ground that the cube was the most perfect geometrical figure, imagined the earth to be a cube, the part of the earth known to the Greeks being on the upper surface In these matters the vaunted Greek mind was little in advance of the predecessors

of the Vedic priests' (p. 8). If the Greeks forged ahead in one or two branches, there were several other peoples in the world that far surpassed them in other equally important matters. I would also recommend to them to read carefully what Sarton says in his Preface (p. IX) to 'A history of Science' where he charges Western writers with unpardonable omissions viz. ignoring the scientific efforts of Egypt, Mesopotamia and other countries and assuming childishly that science began in Greece and secondly hiding the superstitions which surrounded eminent Greeks. Writers at least in the 19th and 20th centuries should have no reason to run down one people and praise to the skies another people, but their endeavour should be to arrive at well-documented, well-balanced, impartial and cautious judgments upon the achievements of ancient peoples of the world

The chronology of the Vedic age is far from certain. Jacobi, Dikshit, Tilak and some others would put the Vedic age back to 4000 B. C. or even earlier Winternitz puts it as far back as 2500 B. C, while Max Müller and following him many Western scholars would thrust all Vedic Literature between 1500 to 800 B. C. Even taking these latter timings the Vedic Literature shows a good deal of progress in astronomical matters which Indians could not have owed to Greece. There is no extant literature in Greece that can be placed earlier than about 900 or 800 B. C with certainty. The Homeric poems and the works of Hesiod are the oldest surviving literary writings in Greek. Homer mentions the Sun, the Moon, the morning and evening star, the Pleiades, Hyades, Orion, Great Bear, Sirius (Orion's Dog), Bootes (Arcturus) and Hesiod mentions practically the same stars as Homer; Hesiod says that spring began sixty days after winter solstice, puts down moon's period at thirty days, but does not mention equinoxes.[738] It should be noted that Vedic astronomy several centuries (if not thousands of years) earlier than Homer and Hesiod was at least as advanced as that in the two Greek authors. The very ancient peoples (besides Indians and Chinese) are the Egyptians, the Babylonians, the Hittites and Chaldeans. About the Egyptians, the Cambridge Ancient History (vol. II p. 218) states that there is very little trace of the application of Mathematics to Astro-

738. Vide 'Greek Astronomy' by T. L. Heath (1932) introduction XI–XII and Sir Norman Lockyer's 'Dawn of Astronomy' (1894) p. 133 for the knowledge of only a few stars exhibited in the Book of Job and by Homer and Hesiod.

nomy in Egypt and that, though the length of the solar year had been fairly accurately determined, this was done by observation of the heliacal rising of Sirius or Sothis which happened to correspond rather closely with the first rise of the Nile and involved no calculation whatsoever About Hittites and Chaldeans there is not much to be said as no one asserts that naksatras were borrowed from them Even about 800 B. C. Homer's and Hesiod's knowledge of astronomy was meagre. Even Hipparchus, regarded as the greatest astronomer of antiquity who completed his catalogue about 130 B C, had access to a continuous series of observations made in Mesopotamia reaching back to 747 B C[738a] Ptolemy wrote about 150 A. D., his Almagest is based on the observations of Hipparchus, and almost all that is known about the predecessors of Ptolemy is derived from the latter's work, as, owing to the very excellence of Ptolemy's work, all writings of his predecessors ceased to be studied and have not been recovered. The theory of Greek influence in astrology will be dealt with a little later on, but a few words may be said here about the supposed influence of Greek astronomy on the Indian Siddhāntas[739] and later works. In the

738 a. Vide Rawlinson in 'Five monarchies of the Ancient World,' vol. II. p 574, also Breasted in 'Ancient Times' p. 214 for the passing of the observations of Nabunassar and Kidinnu (who practically discovered the Precession of the Equinoxes) to the Greeks and for the Greek engineer Meton taking the length of the year from the tables of Nabu. A continuous record of dated observations began with the reign of Nabunassar (who began to rule in 747 B C), from which date the observations continued till Ptolemy's day. vide Heath's 'Greek Astronomy' p XIV and pp. 142-143. Prof. Neugebauer has recently questioned the claims of Babylonian Kidinnu to have discovered the precession of the equinoxes (in JAOS for 1950, vol. 70 pp 1-8) and Morris Jastrow (Jr.) in 'Hepatoscopy and Astrology' contributed to Proceedings of American Philosophical Society vol XLVII at p. 671 appears to have done the same before him Sarton (in JAOS vol 75 No 3 p. 169) supports Prof. Neugebauer, though he admits that some of the Babylonian observations made it easier for Hipparchus to discover precession of equinoxes.

739. पौलिशरोमकवासिष्ठसौरपैतामहास्तु सिद्धान्ताः । पञ्चम्यो द्वाभ्यां प्याख्याभ्यां लाटदेवेन ॥ पौलिशाकृत स्फुटोसौ तस्यासन्नत्वतु रोमक प्रोक्त । स्पष्टतर सावित्र. परिशेषौ दूरविभ्रष्टौ । पञ्चसिद्धान्तिका I 3-4 It is said here that पौलिश and रोमक were commented upon by लाटदेव, that the Sūryasiddhānta is most accurate, Paulisa is accurate and Romaka approaches it in accuracy and that Vāsistha and Pitāmaha are far from accurate Thibaut (in Intro. to पञ्चसिद्धान्तिका pp. XLIX-L) holds that Paulisa-siddhānta known to Utpala (about 966 A D.) was different from the one known to Varāhamihira, that both Romaka and Paulisa known to Varāha could not be placed later than 400 A. D. (Intro p. XXXIII).

first place no Indian work of the Siddhānta class admits that any Yavana knowledge was at the basis of the Indian astronomy nor do these ancient Sanskrit works on *astronomy* set out any large number of purely astronomical terms of Greek origin as Varāha does in astrology. The subjects to be dealt with in the Pañcasiddhāntikā are set out in chap. I. verses 5–7 and there is hardly any word therein that can be said to be originally Greek. *Reliance is* placed by Weber and others on the fact that two of the five Siddhāntas the characteristics of which are summarised by Varāhamihira in his *Karaṇa*[740] called Pañcasiddhāntikā are designated Romaka and Pauliśa and it is argued that this clearly suggests Greek influence. One should like to know the number of purely Greek astronomical words employed in the Siddhāntas (older than Varāha) and different from the 36 or 37 Greek words said to have been employed in Sanskrit astrology by Varāha and others Conceding for argument that Romaka stands for the Alexandrian school that does not prove Greek influence on the Siddhāntas. There is hardly any evidence to show that any medieval work or calendar in India followed or was based mainly upon the data of the Romaka[741] The length of its year is 365 days, 5 hours, 55 minutes and 12 seconds which exactly agrees with the determination of the extent of the year given by Hipparchus and accepted by Ptolemy (Thibaut in Grundriss p. 42) The rules set up by Varāha for *ahargaṇa* according to Romaka give results for the meridian of Yavanapura (and not for that of Ujjayinī). It did not occur to any Western scholar so far that the Romaka-siddhānta being in Sanskrit was most probably composed by some Greek[742] settled in India familiar with

740. Difference is made between a siddhānta work and a karaṇa. The latter is a compendious astronomical work which does not discuss astronomical theories at length (as the siddhāntas do) and furnishes a set of concise and approximately correct rules for the quick performance of the more important astronomical computations

741. Not only was the Romaka not followed, but a comparatively early writer Brahmagupta (born 598 A. D.) condemns it as beyond the pale of smṛtis: युगमन्वन्तरकल्पाः कालपरिच्छेदकाः स्मृतावुक्ताः। यस्माच्च रौमके ते स्मृतिबाह्यो रौमकस्तस्मात्। ब्राह्मस्फुटसिद्धान्त I. 13 quoted by S. B. Dikshit in I. A vol. 19 pp. 133–142, where Mr. Dikshit contends that the Romaka summarised in the Pañcasiddhāntikā is different from the Romaka of Śrīṣeṇa and that the former was composed before 150 A D.

742. The Pauliśa-siddhānta is supposed by Weber to have been borrowed from Paulus Alexandrinus (4th century A. D.) Kern (preface

(*Continued on next page*)

Sanskrit as well as with the Greek or Alexandrian astronomy that preceded Ptolemy and probably even Hipparchus and that therefore Varāha gave a summary of it in his *karaṇa*, just as in his famous work on Astrology, *the Bṛhajjātaka*, he mentions the views of the Yavanas and frequently differs from them. Further Varāha is generous in his appreciation of Greek astrology[743] 'Yavanas are indeed Mlecchas and this *śāstra* is well cultivated (or established) among them; even they (the Yavanas) are honoured as if they were sages. What need it be said about a brāhmaṇa well-versed in Astrology (he will be honoured much more)'. The word 'śāstra' in this verse when read along with 'daivavid' in the 2nd half must be taken in the sense

---

(*Continued from last page*)

to Br S p 49) rebukes Weber for proceeding to this conclusion on the slender ground of the identity of name, but Kern himself feels that Paulśa was a Greek. D. E Smith in 'History of Mathematics' (ed. of 1922, vol. I p. 145) avers that Greek scholars settled in India after Alexander's time. In my paper on 'Yavaneśvara and Utpala' contributed to the J B B. R. A S vol. 30 parts 1 and 2 pp. 1–8 I refer to two extensive works on astrology in several thousands of fine Upajāti and Indravajrā verses composed by Sphujidhvaja and Mīnarāja, both of whom claim to be the overlords of Yavanas. The Besnagar column Vaisnava inscription on the Garudadhvaja in honour of Vāsudeva by Heliodora, a devotee of Vāsudeva and son of Diya and hailing from Takṣaśilā (Taxila) who was a Yona (Yavana) ambassador of king Antalikita (Antalkidas) to the court of king Bhāgabhadra shows how even high-placed Greeks became *devotees* of Vāsudeva, settled in India and got the inscription engraved not in Greek nor in bilingual characters, but in the Indian language and *lipi*. Vide W. W Tarn in '*Greeks in Bactria* and India' pp. 313–14, 380–81, 390–91 for Greeks knowing Indian languages, for many Greeks becoming Indianized and J. R. A. S. for 1909 pp. 1053–1056, 1087–1094, J. B, B R. A S vol 23 p 104 and I. H. Q vol. VIII (for 1932) p. 611 for the Besnagar Inscription.

743. म्लेच्छा हि यवनास्तेषु सम्यक् शास्त्रमिदं स्थितम्। ऋषिवत्तेऽपि पूज्यन्ते किं पुनर्दैव-विद् द्विजाः॥ बृहत्संहिता II 15 (Kern) Alberuni (Sachau, vol I.p. 23) refers to this verse. In पाणिनि IV. 1 49 twelve words (ङ्याप्प्रातिपदिकात् · यवनमातुलाचार्याणानाङ्) are mentioned to most of which the affix आनी is added in the sense of 'Wife' The word यवन is an exact reproduction of the word Ionia which was originally a strip of mountainous coast in Asia Minor about 20 to 30 miles broad There is nothing to show, as Western writers are fond of saying, that Pāṇini refers to Alexander and the Greeks that came with and after him. Miletus was in the 6th century B. C. the richest city in the Greek world In Pāṇini's days यवनानी meant the wife of a yavana while in Kātyāyana's days यवनानी meant only the yavana alphabet Later on all Greeks came to be called Ionians Vide Will Durant in 'Life of Greece' (1939) p 134, Sarton in 'A History of Science' p. 162.

of 'horā-śāstra'. But Varāha nowhere pays a similar compliment to Yavanas about their proficiency in Astronomy and Mathematics This would suggest that in astronomy he did not rate them high or did not think they had anything special to impart to Indians or at least he did not base his astronomical theories on the works of Greek astronomers. He hardly ever employs any Greek words that are not already employed in his work on astrology.

Thibaut (Grundriss, p 42) holds that the name Puliśa has decidedly a non-Indian appearance. One fails to understand why these learned writers are so positive about a certain name being non-Indian. We have in Sanskrit such ancient names as Pulastya,[744] Pulaha, Paulastya (for Kubera) which contain most of the elements of the word Puliśa and are very similar to it. Even in these days Hindus bear such names as Nabobsingh. The siddhāntas are called Paitāmaha and Pauliśa because they were deemed to have been composed by Pitāmaha and Puliśa. Alberuni, Thibaut says, traces the name Puliśa to a Greek author Paulus; but Alberuni who was familiar with both Indian and Greek authors might have committed a mistake, as even such a scholar as Weber, whose vast reading and phenomenal industry are a marvel, was misled by mere similarity in name and one recalls what was said in the drama Śākuntala by the attendant of Śakuntalā's little son that the child was misled by the similarity of names. Thibaut himself admits that it cannot be proved that the Pauliśa siddhānta is related to the work of the Greek astrologer Paulus. Pauliśa-siddhānta appears to have restricted itself mostly to astronomical matters. We have seen (p 488) that the Paitāmaha-siddhānta was composed about 80 A. D. Therefore, that Siddhānta could not have borrowed anything from Ptolemy (150 A. D.). Prof. Neugebauer again has[744a] no doubt that the original impetus to scientific Hindu

744 Pulastya is quoted about a dozen times by Aparārka (first half of 12th century A. D) and about three dozen times by the Smṛticandrikā (first half of 13th century A. D.) as a writer on Smṛti and Pulaha also is quoted as a Smṛti writer by the latter work. Manu I. 35 speaks of Pulastya and Pulaha as two of the ten sons of Prajāpati. Pulastya and Pulaha are two of the seven sages (in Br. S. 13, 11).

744 a. Vide 'Journal of Near Eastern Studies' vol. IV. at p 30 (Prof. Neugebauer on 'History of Ancient Astronomy'). Whitney also (Sūrya-siddhānta in J. A. O. S. vol. VI p. 474–75) suggested that it was pre-Ptolemaic astronomy that was transmitted to India and Prof. Neugebauer, relying

(*Continued on next page*)

astronomy came from Hellenistic astronomy, since he thinks that the use of the eccentric-epicyclic model alone is sufficient proof. But he is inclined to hold that the period of reception lies between Hipparchus and Ptolemy and hopes that a systematic study of Hindu astronomical works might reveal information about pre-Ptolemaic Greek astronomy no longer preserved in available Greek sources. It is doubtful whether that hope will ever be fulfilled. If ancient Indians were capable of analysing the elements of the Sanskrit language and raising such a system as Pāṇini's, if they could plumb the depths of the human mind and create a mental discipline like the Yoga, if they carefully noted centuries before Christ the parts of the glottis and other organs in the mouth in the production of the letters of their language and produced the Prātiśākhyas and Śikṣā works, if they could create a fable literature and invent the game of chess and make a gift of these two to the whole of mankind, if their knowledge of Algebra was of a superior order (*vide* Colebrooke's Essays, vol. II. at p. 446 and Cajori's 'a History of Elementary Mathematics' pp 93–101), if they invented the decimal place value[744b] system for numbers and propagated it and the sign for a zero to Europe through the Arabs in the 12th century A. D, there is hardly any compelling reason for saying that it would not have been possible for them to arrive at their own eccentric and epicycle system (of which Prof. Neugebauer makes so much) independently of any other people to explain the

---

(*Continued from last page*)

only on a few translated Sanskrit texts, probably repeats what Whitney suggested without any substantial evidence. Prof Neugebauer in J A O. S. vol. 70 (1950) p 7 admits that scholars are very far from a real insight into the development of Hellenistic astronomy before Ptolemy. In his review of the work on Indian studies by Professors Renou and Filliozat Prof. Neugebauer seems to hold that the discussion of Greek influence on Hindu astronomy and mathematics is of very little interest, since most of the Greek material was well known in Mesopotamia in the middle of the 2nd millenium B. C. and might have spread from Mesopotamia towards the east (vide 'Archives Internationales d'Histoire des Sciences' for April—June 1955 at p. 170).

744 b. Mesopotamians used 60 as their basic number instead of 10 With them each position counted for 60 and not for ten 123 in our decimal place value system is equal to $1 \times 10^2 + 2 \times 10^1$ plus 3 A similar notation in Mesopotamia would give $60^2 + 2 \times 60^1$ plus $3 = 3723$ For numbers below 60 the notation was clumsy as a dividing line had to be used for the tens and integers.

supposed motions of the Sun, the Moon and the planets round the earth.

One more observation must be made here. The Vedānga-Jyotisa[745] says 'The sun and the moon start towards the north in the month of Māgha at the beginning of Śravisthā (i. e. Dhanisthā) and the Sun starts towards the south in the middle of Āśleśā in the month of Śrāvana' i e. winter solstice was in the beginning of Dhanisthā In the Brhatsamhitā Varāhamihira tells us that in his day the two *ayanas* of the Sun took place at the beginning of Karkataka and of Makara respectively, that indeed at some time in the past *Uttarāyana* began at the beginning of Dhanisthā and *dakṣināyana* commenced in the middle of Āśleśā and that therefore it was so declared in former śāstras. This shows that, between about 505 A D. when Varāha planned and probably wrote his Pañca-siddhāntikā and the observation contained in the Vedānga-Jyotisa, the commencement of Daksināyana had shifted from the middle of Āśleśā to the last quarter of Punarvasu i e in all about 23 degrees and 20 minutes. Varāhamihira makes no effort to explain this. It is therefore quite reasonable to argue that he was probably not aware of the theory of the precession of the equinoxes. Authorities are not in complete agreement as to the yearly extent of precession. Taking it at 50 2 seconds per year, the total number of years between Varāha and the date of the observation in Vedānga Jyotisa would be about 1673 and deducting 505 years (the time of Varāha's epoch for a siddhānta calculation) the observation would refer itself to about 1168 B. C. If Varāha and his predecessors had borrowed scientific astronomy directly from the Greeks, they should have been quite aware of the precession of

---

745. मपद्येते अनिष्टादौ सूर्याचन्द्रमसावुदक्। सार्पार्धे दक्षिणार्कस्य माघश्रावणयोः सदा॥ वेदाङ्गज्योतिष (of ऋग्वेद), verse 6 (and 7 of यजुर्वेदाङ्गज्योतिष); आश्लेषार्धाद् दक्षिणमुत्तरमयनं रवेर्धनिष्ठाद्यम्। चूर्नं कदाचिदासीद्येनोक्तं पूर्वशास्त्रेषु॥ सांप्रतमयनं सवितुः कर्कटकाद्यं सृगादितश्चाप्यत्। बृहत्संहिता III 1-2 सार्प means आश्लेषा, of which the presiding deity is serpents पूर्वशास्त्रेषु refers to वेदाङ्गज्योतिष and similar works. The पञ्चसिद्धान्तिका (II 21 p 9) refers to this: आश्लेषार्धादासीदयनं निवृत्ति. किंत्वोष्णकिरणस्य। शुक्लमयनं तदासीत्साम्प्रतमयनं पुनर्वसुतः॥. We find in the बौ. श्रौ. सूत्र a passage almost identical with वेदाङ्गज्योतिष verse 7, viz माघमासे धनिष्ठाभिरुत्तरेणैति भानुमानर्धाश्लेषस्य आवणस्य दक्षिणेनोपनिवर्तत इति। (26 29) The words माघ "भानुमान् form a half अनुष्टुप् verse.

equinoxes, since precession is said to have been discovered by Hipparchus, and was adopted by Ptolemy.[745a]

This consideration has special force in view of the fact that Varāha believed that the constellation of the Saptarsis (Ursa Major) was in the Maghās at the time when Yudhisthira ruled, that that star group remains for one hundred years in each of the 27 naksatras and that therefore to complete one cycle through all naksatras the star group of Saptarsis required 2700 years.[746]

There are other serious difficulties also in holding that the Sanskrit scientific astronomical treatises were acquainted with or borrowed from Ptolemy's work. Numerous discrepancies in essential matters exist between Ptolemy's work and Hindu astronomical works such as the assignment of different dimensions to the epicycles of the planets by Ptolemy and by Hindu writers. Therefore, it is altogether improbable that the Hindu works were directly based on Ptolemy's work. Nor is there any direct evidence to show that Hindu works were based on Hipparchus or the works

---

745 a Vide 'Greek Astronomy' by Heath p 611 and Prof Neugebauer in Journal of Near Eastern Studies, vol IV. p 24 In the Poona Orientalist vol. VIII. pp. 68–80 Mr Raja Rao endeavours to prove that ancient Pravargya legend is based on a knowledge of the precession of the equinoxes. In the first place, too much has to be taken for granted to make that thesis probable and in the 2nd place it would have to be admitted that precession, though known in the Vedic age, was forgotten before the times of Varāhamihira who is apparently not aware of it Prof. K. V. Abhyankar (in Dhruva commemoration vol III pp 155–164) tries to show that 'precession of the equinoxes' had been discovered in India in ancient times, but his arguments are far-fetched and not at all convincing

746. आसन्मघासु मुनयः शासति पृथिवीं युधिष्ठिरे नृपतौ। षड्द्विकपञ्चद्वियुत शककाल-स्तस्य राज्ञश्च॥ एकैकस्मिन्नृक्षे शतं शत ते चरन्ति वर्षाणाम्॥ Several purāṇas mention that the Saptarsis were in Maghā at the time of Parikṣit and that they are in one naksatra for a hundred years Vide वायु 99 421–23, मत्स्य 273 42–44, on बृ सं 13 3–4, उत्पल quotes a verse of Vrddha Garga who is earlier by some centuries than वराहमिहिर "कालिङ्गापरसंधौ तु स्थितास्ते पितृदैवतम्। मुनयो धर्मनिरता प्रजाना पालने रता॥" पितरः are the deity of मघा In the विष्णुपुराण IV. 33. 34 it is said that at the time of king Parikṣit the Saptarsis were in Maghā naksatra In बृहत्सं 13. 2 वराह promises that he would follow the doctrines of वृद्धगर्ग about the motion of Saptarsis (Ursa Major) According to the Śalyaparva of the Mahābhārata (chap. 37. 14–15) Vrddha-Garga was an adept in the computation of time and in auspicious and inauspicious phenomena and a holy place on the Sarasvatī river was named Gargasrotas, which Balarāma is said to have visited Therefore, Vrddhagarga must have preceded Varāha by many centuries.

of other Greek writers. No such Greek works are now available nor are even Greek elementary manuals of astronomers available which can be said to agree with Hindu scientific works That an extensive Sanskrit literature on astronomy has perished is clear from Varāha-mihira's works and Utpala's quotations in his commentaries on the Br. S. and Brhaj-jātaka. Modern Western writers would do well to observe at least for the present a non-committal attitude instead of repeating *ad nauseum* that Hindu scientific astronomy was derived from Greeks on slender similarities between the two systems and on obscure and ill-understood passages and extracts in old astronomical works (vide E. Burgess in J. A. O S. vol. VI at p 480).

After having briefly indicated the astronomical knowledge to be gathered from Vedic works, it is now necessary to show that astrological knowledge is also found in the Vedic texts from the oldest times. The human mind is very curious to know the future and is very prone to regard certain days, times and appearances as auspicious or favourable and others as inauspicious Various means were adopted by ancient peoples to pry into the future The word astrology is now generally understood[747] to mean the predictions about what would befall an individual based on the configurations of the Sun, the moon and the planets at the time of his birth. But this was not the sense or at least the only sense in which the word was used in very ancient times. Astrology known to us from the ancient Assyrians was concerned almost wholly with the interpretation of celestial phenomena and planetary configurations and the predictions about the immediate future in relation to the country, its people, its government or king, in such matters as the crops, floods, storms, invasions or other calamities. The events in the heavens, in the sky and even on the earth were supposed to intimate the thoughts of the gods, and to convey indications about impending happenings. This may be called natural astrology. Horoscopic astrology is a later development Predictions were also derived by skilled diviners from various other happenings such as dreams, the flight and cries of birds, and the interpretation of the mysterious signs on the livers[748] of the sheep killed in sacrifices to gods in Babylon and Rome

747. Vide Frankfort's 'Cylindrical seals' p. 157, Prof. Neugebauer in E S. A p 163

748 Vide Breasted in 'Ancient Times' p. 175, Cambridge Ancient History vol. I p 409 This lore called 'Hepatoscopy' does not appear to

(*Continued on next page*)

The first thing that we notice is that even in the Ṛgveda we have frequent references to 'auspiciousness of days' (*sudinatve ahnām*) in Ṛg III. 8 5, III. 23.4, VII. 88 4, X. 70 1, ('sudinatvamahnām' in Ṛg. II. 21. 6 and 'sudinesvahnām' in Ṛg. IV. 37.1). A few of these may be translated here. 'O Indra! establish amongst us abundance of wealth, freedom from injury to our bodies, sweetness of speech and luckiness of days' (Ṛg II. 21 6); '(The sacrificial post) when planted on an auspicious day goes prospering in the sacrifice attended by many men' (Ṛg III 8 5),

---

(*Continued from last page*)

have been developed in India Vide 'Hepatoscopy and Astrology in Babylonia and Assyria', a paper in the Proceedings of the American Philosophical Society, vol. XLVII, pp. 646–676 Divination is either voluntary or involuntary In the former marked arrows were used (apparently referred to in Ezekiel 21. 21) or birds were sent out and the directions in which they flew were noted and interpreted or such things as dipping buds or flowers in water and placing them at the feet of the images of gods in India and noting whether the flowers on the right or left side fell down first. Involuntary divination depends on all kinds of signs, phenomena and happenings that force themselves on one's attention such as aspects of the sun, the moon, planets, lightning and clouds, dreams, chirping of birds and falling of lizards on one's body and the like The Babylonian and Assyrian priests attached to temples made very extensive collections of omens and portents, but the interpretations almost exclusively concerned general welfare (viz. crops, pestilence, war, famine, plenty &c.) and if an individual was referred to it was only the king. The theory underlying hepatoscopy was that the animal offered was assimilated to the deity and the soul of the animal entered into the inner being of the god. The seat of life and of the soul was supposed to be the liver The chief parts of the liver were the right and left lower lobes Among the Romans the heart and lungs also were examined, the right representing the favourable side and left the unfavourable side. The priests did not hesitate to announce to the king unfavourable results and applied their systems consistently. Astrology represented a comparatively more scientific view of the universe The planets came to be regarded as gods even in the oldest astrological texts in which the five planets were identified with the chief gods of the Babylonian pantheon, viz Jupiter with Marduk, Venus with Ishtar, Saturn with Ninib, Mercury with Nebo and Mars with Nergal, Jupiter (=Marduk p 654) being always mentioned first. It was believed that through the planets and stars one can see gods at work. Prognostications varied according to the season or month of the year and the day The Greek astrology offered a great contrast to the Babylonian, since in the former the individual came to be all in all The Greek astronomers obtained from the Babylonians the names for the constellations of the ecliptic, which are used even now in Europe. Vide Jastrow's 'Religion of Babylon and Assyria' p 370 for identification of Marduk, Ishtar and other Babylonian gods with planets and p. 371 for the fact that Ishtar (Venus) figures most prominently among the preserved astrological texts and 'Babylonian and Assyrian Religion' by S. H. Hooke pp. 24–30.

'O Agni! I establish thee on the best place of the earth (the *uttaravedi*), the place of worship and for libation, securing luckiness of day; may you shine opulently on the (river) Drsadvatī, on the concourse of people, on the river Āpayā and on Sarasvatī (Rg III. 23.4).[749].

There are several other passages in which a wish is expressed that the days would be auspicious or lucky for sacrificers etc. Vide Rg. IV. 4 7, V. 60 5, VII. 11. 2, VII. 18. 21, I. 124.2 (May new dawns like the past ones shine for us with wealth and lucky days), X. 39 12 [749a]

It has already been seen above (note 726) that in Rgvedic times cows were driven (by way of dowry) to the bridegroom's house on Aghās (Maghās) and the bride was carried in a chariot to the bridegroom's house after the marriage on the Arjunī (or Phalgunī) naksatra In accordance with this the naksatras on which marriage should be celebrated are enumerated in the Baud. gr. as Rohinī, Mrgaśīrsa, Uttarā-Phalgunī and Svātī.

It has already been shown above (on p 506) how *Agnyādheya* (the setting up of the sacred fires) was to be performed on one of seven naksatras or in spring, summer and autumn according to the *varna* (class) of the performer (vide Kāthaka S. 8.1, Śat Br. II. 1.2, Tai Br. I. 1 2 6–7). But an exception was recognized in the case of one performing a Soma sacrifice. It was provided that whenever a man had a desire to perform a Soma sacrifice he might establish the sacred fires in any season and that would bring prosperity to him.[750].

In ancient Vedic passages no clear line of demarcation appears between what may be called natural astrology and

749. पोषं रयीणामरिष्टिं तनूनां स्वाशानं वाचः सुदिनत्वमह्नाम् ॥ ऋ. II 21, 6; जातो जायते सुदिनत्वे अह्ना समर्य आ विदथे वर्धमानः । ऋ. III 8 5, नि त्वा दधे वर आ पृथिव्या इळायास्पदे सुदिनत्वे अह्नाम् । दृषद्वत्या मानुष आपयायां सरस्वत्यां रेवदग्ने दिदीहि ॥ ऋ. III. 23. 4.

749 a. The Greeks held the waxing moon lucky and the waning moon unlucky Hesiodic system (which is at least several centuries later than the Rgveda) furnishes the earliest evidence for lucky and unlucky days, though Hesiod admits that there was divergence of opinion on that point. Hesiod puts a special ban on the 5th day of the month, while the 7th day was sacred to Apollo in Greece and was held sacred in Babylon also Vide L. R. arnell in 'Greece and Babylon' p 294.

750 अथो खल्वु पवैवैनं यज्ञ उपननेदथादधीत । सैवास्यर्धिः । तै ब्रा. . I 1. 2. 8, सोमेन यजा इति वा अग्निनाधत्ते यस्मिन्नेव काले[ऽ]र्तां आदधीत सोमेन यक्ष्यमाण.। काठक 8 1.

individual astrology. For example, in the Tai. Br[751] it is provided that people plough their fields on Anurādhā naksatra, of which Mitra is the presiding deity. The Pāraksaragrhya prescribes in the same strain that a man should put the ploughshare (*in his field*) on an auspicious day or on Jyesthā naksatra of which Indra is the presiding deity (*and rains are in the hands of Indra*). On the other hand, the same Brāhmana[752] (Taittirlya) provides that if a man desires that his daughter should be dear to her husband he should get her married when the moon is in Nistyā (Svāti) naksatra and that if he does so his daughter becomes dear to her husband and never comes back to her father's house. The naksatras from Krttikā to Vlsākhā have been declared to be Devanaksatras and whatever rites are performed on them are declared to have been performed on a holy day (*punyāha*). Even as early as the Atharvaveda[753] it appears to have been believed that a boy born on Jyesthā or on Vicrt (i e Mūla naksatra) or on a day called tiger-like (on an evil or terrible naksatra) might himself die or bring about the death of his father or mother. The two verses may be translated as follows: '(the boy) is born on Jyesthaghnl (*i. e* Jyesthā) or on Vicrt which belongs to Yama; guard him against being uprooted, may (Agni) take him beyond all evil results in order that he may reach the long life of a hundred autumns. This valiant son was born on a tiger-like day and naksatra; may he not, while he grows, kill his father or his mother that gave him birth.'

Thus it appears that some naksatras were called *punya* (auspicious or holy) as in Tai. Br. I. 5. 2. 1 or III. 1, 2. 8, while

751 मैत्रेण कृषन्ते। तै ब्रा. I 8. 4 2. पुण्याहे लाङ्गलयोजन ज्येष्ठया वेन्द्रदैवत्यम्। पारस्करगृह्य II. 13

752. यां कामयेत दुहितरं प्रिया स्यादिति सा निष्टक्षाया दद्यात् प्रियैव भवति नैव ह पुनरागच्छंति। तै ब्रा. I. 5. 2. This very passage is quoted in the आप कृ I 3. 3-5 (यां कामयेत - गच्छतीति ब्राह्मणवेकारो विधि.। ह्रस्वकाक्षब्दो सुगक्षिरसि निष्टक्षाशब्द स्यातो) and in भारद्वाजगृह्य I. 12.

753. ज्येष्ठघ्न्यां जातो विचृतोर्यमस्य मूलबर्हणात्परिपाह्येनम्। अत्यंन नेषद् दुरितानि विश्वा दीर्घायुत्वाय शतशारदाय॥ त्र्यायेह्रयजनिष्ट वीरो नक्षत्रजा जायमान सुवीर। स मा वधीत्पितरं वर्धमानो मा मातरं म मिनीज्जनित्रीम्॥ अथर्व० VI. 110 2-3 शतशारदाय occurs in Rg VII 101 6 and X 161 2-3 विचृतो. is loc. dual of विचृत्. Vide उद्गातां भगवती विचृतौ नाम तारके। विक्षेत्रियस्य मुञ्जतामधनं पाशमुत्तमम्॥ अथर्व० II 8 1; compare also III. 7 4 and VI 121 3. The Kauśikasūtra (46 25) prescribes अथर्व० (VI 110) as a hymn to be repeated in a Śānti rite for one born on an evil naksatra

some others (like Jyesthā, Mūla) were held to be pāpa (evil) nakṣatras.

From a passage in the [754] Br. Up. it appears that certain nakṣatras were called male "if a man desires 'May I reach greatness' he should observe milk diet for twelve days beginning in the northward passage of the Sun, in the bright half of a month and on a favourable day he offers into the fire on a male nakṣatra &c."

From the above examples it will be apparent that prognostications were based in very early Vedic times on the nakṣatras either of birth or on nakṣatras deemed auspicious or inauspicious. Puṣya appears to have been regarded as a very auspicious nakṣatra long before Pāṇini, who mentions another name of it as 'Sidhya'. But in these early times it does not appear that any rules had been arrived at about the influence of planets (except perhaps of Jupiter in Puṣya) in certain nakṣatras or about horoscopes with planets in nakṣatras or *rāśis* (signs of the zodiac) or in certain 'houses'. In those days prognostications were confined mainly to nakṣatras, days and natural phenomena and bodily marks. For example, Pāṇini I. 4. 39 ('राधीक्ष्योर्यस्य विप्रश्नः') provides a rule for a diviner considering the good or bad luck of a person. The काशिका explains 'विधिः प्रश्नः विप्रश्न। स कस्य भवति यस्य शुभाशुभं पृच्छयत। देवदत्ताय राध्यति ईक्षते वा नैमित्तिकः पृष्टः सन् देवदत्तस्य दैवं पर्यालोचयति।'. In पाणिनि IV. 3. 73 'अणृगयनादिभ्यः' it is provided that the affix अण् (and not ठक्) is applied in the sense of 'तत्र भवः' or 'तस्य व्याख्यानः' to the words in the ऋगयनगण, which contains among others the words अङ्गविद्या, उत्पात and निमित्त (i. e. नैमित्तिक and औत्पातिक would mean 'one who expounds the future consequences indicated by उत्पात i. e. earthquake &c. and निमित्त throbbing &c.). Under पाणिनि III. 2.53 the काशिका gives the examples जायाघ्नस्तिलकालकः, पतिघ्नी पाणिरेखा (line on the palm).

We find from certain verses of the Ṛgveda that the cries of such birds as kapiñjala were deemed even in those ancient times

754. स यः कामयेत महत्याप्नुयामित्युदगयने आपूर्यमाणपक्षस्य पुण्याहे द्वादशाहमुपसद्व्रती भूत्वा "मुंसा नक्षत्रेण मन्थं संनीय जुहोति। बृह. उ. VI 3 1, compare a similar passage in छा. उ V. 2 4–9 and कौषी. उ. II 3 In later times there was some difference of opinion as to male nakṣatras. मातृदत्त on हिरण्यकेशिगृह्य I. 1.5 says 'अश्वयुक् पुनर्वसू तिष्यो हस्तः शतभिषक् मोत्तरा इति पुंनामधेयानि नक्षत्राणि,' while स्मृतिच I p 17 quotes from रत्नकोश 'हस्तो मूलं श्रवण. पुनर्वसुर्मृगशिरास्तथा पुष्यः। पुंसंज्ञितेषु कार्येषु शेषाणि शुभानि विध्यानि॥'

to indicate coming events, auspicious or otherwise; [755] '(the bird) crying again and again and voicing (indicating) coming event sends forth his speech as an oarsman propels a boat; O bird! may you be auspicious to us and may no unfavourable sign reach you from any quarter; O bird! may you that are auspicious and whose cry forebodes good cry to the south of (our) houses; may no thief master us nor may any one declare that we may meet danger.' Br S, 98. 14 provides that birds indicate to a person going on a journey the evil results of actions, good or evil, done by him in former lives. The Yoga-yātrā of Varāhamihira (chap. 14) and Adbhutasāgara pp. 569-582 deal at length with *śakuna* (prognostications from the sight, flight or cries of birds and other animals). Yogayātrā (14. 2 and 26) provides that certain birds and animals when they are to the right or *southern side of a man* starting on a journey indicate auspicious results and that when a cāsa bird with something in its mouth flies to the right side of a man that is an indication of welfare.

The result of the dependence on ideas of lucky and unlucky days and naksatras was that some people began to make observations and deduce conclusions and a lore called 'naksatra-vidyā' arose When Nārada approached the great teacher Sanatkumāra for knowledge, the latter questioned him as to what he already knew and then Nārada enumerated a long list of lores (including [756] the four Vedas, Itihāsa-purāna), one of which is 'naksatravidya' ('the science of naksatras' i. e. astronomy and astrology). It can be easily imagined how credulous people in ancient times as even in these days consulted those who professed to know what the stars foretold and were often deceived or felt frustrated. Hence arose even in early times a prejudice against star-gazers, astrologers and the

755 कनिक्रदज्जनुष प्रब्रुवाण इयर्ति वाचमरितेव नावम् । सुमङ्गलश्च शकुने मवासि मा त्वा काचिदभिभा विश्व्यविदत् ॥ अव क्रन्द दक्षिणतो गृहाणा सुमङ्गलो भद्रवादी शकुन्ते। मा नः स्तेन ईशत माघशंसो बृहद्वदेम विदथे सुवीराः ॥ ऋ II 42 1 and 3. The first verse is explained in the निरुक्त IX 4. The आश्व गृ III. 10 9 prescribes that one on hearing the unpleasant cries of birds should recite inaudibly the two hymns Rg. II. 42 and 43. The word अभिभा occurs only once in the ऋग्वेद, compare 'नो नो विददभिभा मो अशस्तिर्मा नो विदद् वृजिना द्वेष्या या।' अथर्व० I 20. 1, V 3 6.

756. स होवाचर्ग्वेदं भगवोऽध्येमि यजुर्वेदं सामवेदमाथर्वणं चतुर्थमितिहासपुराणं पञ्चमं वेदानां वेदं ... नक्षत्रविद्यां सर्पदेवजनविद्यामेतद्भगवोऽध्येमि। छा उ VII. 1. 2; also छा उ VII. 7. 1.

like. One of the earliest references to this prejudice against star-gazers in Sanskrit literature is found in the Tai Br. III. 4 4 and Vāj. S. 30. 10 and 20, where the[757] 'nakṣatradarśa' (star-gazer) is made over as a victim to *prajñāna* and tha 'ganaka' (calculator of the movements of stars and planets) is consigned to aquatic animals along with the headman of the village Among the long list of brāhmanas that should not be invited for religious rites in honour of gods or in *śrāddhas*, Manu (III 162) includes one who maintains himself by the practice of astrology (nakṣatrair-yaśca jīvati) and in (VI. 50) Manu prohibits ascetics from desiring to secure alms by foretelling the results of portents (like earth-quakes) or of bodily[758] movements (such as the throbbing of the eye or árm) or by nakṣatravidyā (astrology) or *aṅgavidyā* (palmistry) or by casuistry or by telling what the śāstra ordains on a (disputed) point. The ancient sūtras of Hārīta and of Śankhalikhita declare that a *nakṣatrajīvin* (one who lives by practising astrology) and a 'nakṣatrādeśavṛtti' (who makes his livelihood by conveying the message of nakṣatras) respectively are unfit to sit in a row with other brāhmanas (q by Krtyakalpataru on śrāddha p. 88) Similarly, Sumantu (in a prose passage q on śrāddha by Krtyakalpataru p. 91) states the same about a 'mūlyasāmvatsarika' (who practises astrology for money) The Visnudharma-sūtra (chap. 82. 7) includes those who maintain themselves by astrology (nakṣatra-jīvinah) among those who are not to be invited for śrāddha rites. Similarly, the Tevijjasutta (S. B. E vol. XI pp 196–197) and Mahāśīla in Dīghanikāya (I. p. 68) condemn for Buddhist monks maintenance by such low arts as guessing at the length of a man's life or by foretelling future events (such as eclipses, falling meteors, victory and defeat &c.) But the mere study of constellations is allowed by Buddha (in S. B E vol. XX pp. 292–294). Among obstacles to gain[759] Kautilya enumerates

757 मज्ञानाय नक्षत्रदर्शमाशिक्षायै मश्विनं। वाज सं 30. 10. यादसे शावल्या ग्रामण्यं गणकमभिक्रोशकम् &c । वाज सं 30 20. In the Purusamedha the star-gazer is assigned to 'prajñāna' (in order that he may collect thorough knowledge) and the ganaka to aquatic animals (like sharks or crocodiles),

758. न चोत्पातनिमित्ताभ्यां न नक्षत्राङ्गविद्यया । नाङ्गशासनवादाभ्यां भिक्षां लिप्सेत कर्हिचित् ॥ मनु VI. 50 = वसिष्ठधर्मसूत्र X. 21. In the 'rgayanādigana (पा IV. 3.73) the काशिका enumerates अङ्गविद्या

759. लाभविघ्न. कामः क्रोध. साध्वस . मङ्गतिथिनक्षत्रोहि(दृ?)त्वामिति । नक्षत्रमति-पृच्छन्तं बालमर्थोतिवर्तते । अर्थो ह्यर्थस्य नक्षत्रं किं करिष्यन्ति तारकाः ॥ साधना प्राप्तवन्त्यर्थान् नरा यत्नातैरपि । अर्थैरर्था. प्रबध्यन्ते गजा. मतिगजैरिव ॥ अर्थशास्त्र, 9th अधिकरण, 4th chapter p 351 (Sham shastri's ed of 1919).

many such matters as passion of love, anger, timidity and desire to find out an auspicious tithi and naksatra' and winds up with two fine verses characteristic of the great genius that placed Candragupta Maurya on the throne of Magadha. 'The desired object (or wealth) eludes that childish man that is excessively in search of what the stars portend: for the desired object is (itself) the star that governs (success) in securing it; what will stars do? Men striving (to attain their ends) will secure their objects after hundreds of efforts; wealth is caught by wealth just as elephants are bound by other elephants (opposed to them)' From the above it is quite clear that several centuries before Christ an astrologer (who maintained himself on money acquired by the practice of astrology) was very much condemned.

What Kautilya regards as reprehensible is extreme reliance on and pursuit of naksatra astrology, but it is not to be supposed that he ignored prognostications altogether. About the king's *purohita* (priest) he lays down the following[760] 'the king should appoint as priest a person whose family and character are highly spoken of, who has well studied the Veda together with the six *angas*, the divine and other portents and the science of the government of people and who can prevent divine and human calamities by means contained in the Atharvaveda, the king should follow him as a pupil does his teacher or a son his father or a servant his master' Yāj (I. 313), who is later than Kautilya by some centuries, also lays down in almost identical words that 'the king should appoint as *purohita* one who is proficient in astrology, endowed with all requirements declared in śāstras, and is proficient in the science of government and the propitiatory and magic rites of the Atharvaveda'.

Another set of texts indicates another stage in the development of astrology based on naksatras, which seems to have been somewhat on the lines of the later horoscopic system of 'houses'. Traces of it exist though they are not very ancient. The Vaikhānasasmārta[761] sūtra (IV 14) refers to naksatras called Janma, Karma, Sānghātika, Sāmudayika and Vainā̆śika and these terms are explained in the Yogayātrā of Varāha and in the

760 पुरोहितमृद्वितेतोदितकुलशीलं पडङ्गे वेदे दैवे निमित्ते दण्डनीत्यां चाभिविनीतमापदां दैवमानुषीणामथर्वभिरुपायैश्च प्रतिकर्तारं कुर्वीत। तमाचार्यं शिष्य पितरं पुत्रो भृत्य स्वामिनमिव चानुवर्तेत। अर्थशास्त्र I. 9 pp 15–16, compare याज्ञ स्मृति I 313 'पुरोहितं प्रकुर्वीत दैवज्ञमुदितोदितम्। दण्डनीत्या च कुशलमथर्वाङ्गिरसे तथा॥'

761. The date of the Vaikhānasasmārtasūtra is a difficult problem, but it lies probably between 200 B C. to 200 A. D.

Visnudharmottara-purāna.[762] The Yogayātrā remarks[763] 'the naksatra on which a man is born is called *ādya* (first), the tenth from it (from *ādya*) is called *karma*, the 16th naksatra from the ādya is called 'sānghātika' (pertaining to a group or a collection of human beings), the 18th (from ādya) is called Samudāya (collection) and the 23rd (from ādya) is called Vaināśika (lit. pertaining to death or destruction), the 25th (from ādya) is called *mānasa* (pertaining to the mind), in this way all persons are concerned with six naksatras (1st, 10th, 16th, 18th, 23rd and 25th), they say that the king is concerned with nine naksatras, the three additional ones being those connected with his *jāti* (caste), his country and with the naksatra on the day of his coronation The Yogayātrā and Visnudharmottara (I. 78. 14–16) further provide 'when the naksatra of one's birth is affected by evil (star or aspect) the results are the appearance of disease, loss of money, and disputes; if the naksatra called *karma* is affected then one's undertakings do not succeed; if the Sānghātika (16th) is affected then there is treachery; when the Sāmudayika (18th) is affected there is loss of accumulated wealth; when the Vaināśika (23rd) is affected, one's desired objects perish; when Mānasa (25th) is affected, there is anxiety and unhappiness. The Nāradapurāna,[763a] after defining the above, remarks that one should not commence any auspicious act on these. When the (six) naksatras are not affected (by evil stars or aspects) a person is healthy, enjoys happiness, his body is well-nourished and he is endowed with wealth; but if the six naksatras are affected he

763 a. जन्मभाद्दशमं कर्म साङ्घातकं तु षोडशम् । अष्टादश सहुदय त्रयोविंशं विनाशनम् । मानसं पञ्चविंशर्क्षं नाचरेत् शुभमेषु तु । नारदीय I. 56. 358–359.

perishes and the king also (meets the same fate) if the six along with the extra three are affected When[764] the naksatra on which a king was crowned is affected by evil planets or aspects, one should predict loss of the kingdom, if the naksatra of the country is affected trouble to the country and capital is indicated and if the naksatra of the king's caste is affected then one should predict king's illness. The naksatras according to the caste of the king are as follows[765]. the three Pūrvas (Phalgunī, Purvāsādhā and Purvābhādrapadā) and Krttikā are naksatras of the king of the brāhmana class; the three Uttarās (Uttarā Phalgunī, Uttarāsādhā and Uttarābhādrapadā) and Pusya are naksatras for a king of the ksatriya caste; Revatī, Anurādhā, Maghā and Rohinī, of agricultural class; Punarvasu, Hasta, Abhijit and Aśvinī are naksatras of the *vaiśk* (trader) class. The countries governed by the naksatras are set out in chap. 14 of the Brhat-samhitā Herein Varāha differs from Ptolemy in two respects: (1) Varāha does not mention countries governed by rāśis, but countries governed by naksatras; (2) Varāha confines himself to India, while Ptolemy in his Tetrabiblos (II 3 pp. 157–159, Loeb Classical Library) deals with all countries then known. This is an important circumstance against the theory that Varāha's astrology is borrowed from Ptolemy or later Greek writers. If he had known Ptolemy's work he could have easily followed him even as to countries outside India. The whole of India is divided into nine parts, the Madhyadeśa and the regions in the eight quarters from the East to the North-east, each part being under groups of three naksatras from Krttikā onwards. Vide also Visnudharmottara I. 86. 1–9. When the group of three naksatras in each of nine divisions is affected by the Sun, Mars or Saturn, the countries falling under any of the three naksatras of the group suffer calamities The Mārkandeya-purāna (chap 58. 10–54 in B. I. edition, chap. 55 in Venkateśvara Press edition) also specifies the countries in the nine groups, but the names differ to some extent There is some divergence

764. पीडिते चाभिषेकर्क्षे राज्यभ्रंशं विनिर्दिशेत्। देशर्क्षे पीडिते पीडा वेशस्य च सुरस्य च॥ पीडिते जातिनक्षत्रे राज्ञो व्याधिं विनिर्दिशेत्। विष्णुधर्मोत्तर I. 87. 17–18.

765 The बृहत्संहिता (15. 28-30=योगयात्रा IX 5–7) specifies the naksatras of brāhmana, ksatriya, agriculturists, traders &c Two may be quoted here, पूर्वात्रयं सानलमग्रजानां राज्ञां तु पुष्येण सहोत्तराणि। सपौष्णमैत्र पितृदैवतं च मजापतेयं च कृषीबलानाम्॥ आदित्यहस्ताभिजिदाश्विनानि वणिग्जनानां भवन्ति भानि। मूलाश्विनेज्यानिल-वारुणानि भान्युग्रजाते' प्रभविष्णुताया॥; compare विष्णुधर्मोत्तरपुराण I 87 11–14 for verses similar to those in योगयात्रा. Vide also अद्भुतसागर p 464 which quotes बृहत्संहिता verses on जन्मर्क्ष and the other नक्षत्रs

about the nomenclature also According to Parāśara and the Visnudharmottara (I. 87 7) the 4th naksatra from the naksatra of birth is called Mānasa A naksatra[766] is said to be affected (*upahata*) when the Sun or Saturn occupies it or when Mars is retrograde in it or occults it or an eclipse (of the Sun or Moon) occurs in it or a meteor strikes it or when the moon continuously affects it (by occulting or occupying its middle or goes to the southern part of it) The Visnudharmottara (I. 89. 1–13), Yogayātrā IX. 13–18, and Parāśara (quoted by the Adbhutasāgara pp 271–274) prescribe certain *śānti* rites for averting the evil effects of the above noted nine naksatras being affected.[767]

It should be noted that in the astrology depending on twelve *rāśis* and twelve *bhāvas* (places or houses) *karma* is the name given to the 10th house from the first (just as in the case of naksatra astrology) and mrtyu (i e vināśa) is the name of the 8th *bhāva*.

The Mahābhārata and the Rāmāyana contain numerous passages where the planets in relation to certain naksatras are stated to indicate misfortunes to people in general, to warring armies and to individuals A few examples may be cited by way of illustration. When in the sanguinary battle between Rāvana and Rāma, the former seemed to be getting the better of Rāma, the Rāmāyana states[768] 'Mercury stood covering the Rohinī naksatra which is presided over by Prajāpati and which is the favourite of the moon and thereby indicated evil fortune to people'. Similarly, it is said 'Mars stood covering the naksatra Viśākhā in the sky, which is presided over by Indra and Agni and which is the naksatra of the Kosalas'. In the Mahābhārata numerous statements are made about the position of the planets, the naksatras and tithis, which it is almost

766. रविरविसुतभोगनागतं क्षितिसुतभेदनवक्रदूषितम्। ग्रहणगतमथोल्कया हतं नियतमुपाकरणैर्हितं च यत् ॥ तदुपहतमिति प्रचक्षते प्रकृतिविपर्ययचातमेव वा ॥ योगयात्रा IX 8–9 = बृहत्संहिता 15 31–32

767 In the Mālavikāgnimitra of Kālidāsa the Vidūsaka says to the king in the 4th Act 'astrologers declare that your naksatra is afflicted and (therefore) you should release all persons confined in jails'.

768 राजापत्यं च नक्षत्रं रोहिणीं शाशिनः प्रियाम्। सनाकम्य बुधस्तस्थौ प्रजानामशुभावह ॥ कौसलानां च नक्षत्रं व्यक्तमिन्द्राग्निदैवतम्। आक्रम्याङ्गारकस्तस्थौ विशाखामपि चाम्बरे ॥ रामायण, युद्धकाण्ड 103. 30 and 33. The बालकाण्ड (5 5–6) states that the country of Kosala was situated on the Sarayū and Ayodhyā was its capital रघु, the ancestor of राम, is called कोसलेश्वर in रघुवंश IV. 70, vide also रघुवंश VII. 34. Acc to बृहत्संहिता 14. 8–10, कौशल is the first country in the south-east, of which आश्लेषा, मघा and पूर्वा are presiding नक्षत्रs

impossible to reconcile. Vide H of Dh. vol III. pp 903–923 for consideration of the astronomical data in the Mahābhārata. Here we are concerned only with the beliefs about certain omens and portents. In the Bhīsma-parva we read[769] 'a white celestial body stands traversing Citrā naksatra, one sees therein specially the destruction of the Kurus; a very frightful comet stands covering Pusya-naksatra; this great *graha* will bring about terrible evil to both armies A white blazing *graha* resembling fire emitting smoke stands covering the bright Jyesthā-naksatra whose presiding deity is Indra; a cruel comet standing between Citrā and Svāti afflicts Rohinī and the Sun and the Moon'

There are several statements about Mars that are more or less irreconcilable[770] For example, the Udyogaparva says 'Mars having been retrograde in Jyesthā seeks (to reach or afflict?) Anurādhā presided over by Mitra, as if bringing death'; while Bhīsma-parva remarks 'Mars is retrogade in Maghā and Jupiter is in Śravana and Saturn afflicts the naksatra presided over by Bhaga (i. e Purvā Phalgunī). About Saturn several[771] statements are made 'a refulgent and malignant planet, Saturn, afflicts the naksatra (ruled over by Prajāpati i. e. Rohinī) and will afflict people more'; 'Saturn stands afflicting Rohinī'; 'Jupiter and Saturn are near Viśākhā'.

One very remarkable feature of the Mahābhārata passages is that while they put forward dozens of times the positions of the Sun, the Moon and planets in reference to naksatras, not a single passage gives the position of the planets in relation to *rāśis*, the signs of the Zodiac, or week-days (such as Tuesday, Sunday &c.).

The Atharvana Jyotisa furnishes a somewhat different scheme of naksatra astrology. It says,[772] the 10th naksatra from

769. श्वेतो ग्रहस्तथा चित्रा समतिक्रम्य तिष्ठति । अभार्यं हि विशेषेण कुरूणा तत्र पश्यति ॥ धूमकेतुर्महाघोरः पुष्यं चाक्रम्य तिष्ठति । सेनयोरुभयोर्घोरं करिष्यति महाग्रहः ॥ ' श्वेतो ग्रहः प्रज्वलितः सधूम इव पावकः । ऐन्द्रं तेजस्वि नक्षत्रं ज्येष्ठामाक्रम्य तिष्ठति ॥ रोहिणीं पीडयत्येष शनैश्चरः । सोमं च शशिभास्करौ ॥ भीष्मपर्व 3 12, 13, 16, 17

770. कृत्वा चाङ्गारको वक्रं ज्येष्ठायां मधुसूदन । अनुराधा मार्थयते नैर्ऋतं सङ्गमपत्रिव ॥ उद्योगपर्व 143 9. मघास्वङ्गारको वक्र श्रवणे च बृहस्पतिः । भगं नक्षत्रमाक्रम्य सूर्यपुत्रेण पीडयते ॥ भीष्म 3. 14.

771. प्राजापत्यं हि नक्षत्रं ग्रहस्तीक्ष्णो महाद्युतिः । शनैश्चर पीडयति पीडयन् प्राणिनोऽधिकम् ॥ उद्योगपर्व 143 8; रोहिणीं पीडयत्येष स्थितो राजन् शनैश्चरः । भीष्म 2 32; संवत्सरस्थायिनौ च ग्रहौ प्रज्वलितावुभौ । विशाखायां समीपस्थौ बृहस्पतिशनैश्चरौ ॥ भीष्म 3. 27.

772 जन्मसम्पद्विपत्क्षेम्यः (क्षिप्रत्यैम्यः ?) प्रत्वर साधकस्तथा ॥ नैधनो मित्रवर्गश्च परमो मैत्र एव तु ॥ आथर्वणज्योतिष, नक्षत्र प्रकरण, verse 4, it appears that these very names are

(*Continued on next page*)

the naksatra of a man's birth is called karma, the 19th (from janma-naksatra) is called garbhādhānaka (naksatra of conception), the 2nd, 11th and 20th constitute the group called *sampatkara* (bringing about prosperity), the 3rd, 12th and 21st (from 'janmanaksatra') constitute the group of *vipatkara* (bringing about ill-luck or distress), the 4th, 13th and 22nd are called *ksemya* (causing prosperity), the 5th, 14th and 23rd are called '*pratyara* (*pratyari*?)', 6th, 15th and 24th constitute (the group called) *sādhaka* (that accomplish), the 7th, 16th and 25th are called *naidhana* (relating to death), the 8th, 17th and 26th are *maitra* (friendly), the 9th, 18th and 27th constitute a highly friendly group These are nine groups (each made up of three naksatras from among 27 naksatras and each one in each group being separated by the number 9 from the next in the same group). These names make a further approach to the scheme of twelve *bhāvas*[773] viz. *janma* (which corresponds in name and import to *tanu* or *lagna*), *sampat* (corresponds to the 2nd bhāva called *dhana*), *karma* (is same as 10th bhāva), *naidhana* (corresponds to 8th bhāva called vināśa or mrtyu), *maitra* (corresponds to the 4th bhāva called *suhrt*), *ksemya* (corresponds to the name of the 11th bhāva called āya or lābha). The Atharvana-Jyotiṣa then provides at some length what should be done or not done on these nine groups and their constituents. The above mentioned words (vipatkara, ksemya &c.) occur also in Brhad-yogayātrā

(Continued from last page)

mentioned in स्वरोदय quoted by शुद्धिकौमुदी p.203 'जन्मसम्पद्विपत्क्षेम प्रत्यरि' साधको वधः। मैत्रं परममैत्रं च जन्मादीनि पुनः पुन ॥ प्रत्यर appears to be a misreading for प्रत्यरि the आथर्वणज्योतिष (10, 1-11) provides what should be undertaken or avoided on the नक्षत्रs called जन्म, आधान, नैधन &c The योगयात्रा II. 34 (MS in Bhau Daji Collection Bombay Asiatic Society, II. 35 in Mr. Jagadish Lal's Edition) provides that the king should get himself shaved on every fifth day but he should avoid the naksatra of birth and the third, fifth and seventh naksatra from that of birth राज्ञः कार्यं पञ्चमे पञ्चमेऽह्नि क्षौरकें वा ह्यश्च तत्पोदये वा। त्यक्त्वा तारा: सप्तपञ्चत्रिपूर्वा यात्राकाले नैव कार्यं न युद्धे ॥ योगयात्रा II 34 उत्पल comments 'सप्तमी तारा नैधनः (or ना?), पञ्चमी प्रत्यहरा (?) तृतीया विपत्करा पूर्वा प्रथमा जन्मतारा। एतास्तारास्त्यक्त्वा विहाय अन्यासु सम्पत्करक्षेमसाधकमैत्रातिमैत्रासु &c. प्रत्यहरा is probably प्रत्यरि In बृ. चि IV 12 is जन्मारव्यसम्पद्विपद् क्षेम-प्रत्यरि साधका। वधमैत्रातिमैत्रा स्युस्तारा नामसदृक्फलाः ॥

773. The twelve names of the bhāvas in a horoscope are enumerated in लघुजातक I. 15 as follows: तनु-धन-सहज-सुहृत्-सुत-रिपु-जाया-मृत्यु-धर्म-कर्मायाः। व्यय इति लग्नान्नाक्षत्रमारभ्येऽर्कं चतुर्थे॥

(*folio* 5 b, IV. 17), in Viṣnudharmottara II. 166 at end and in the Tantrika work Śāradātilaka [774].

It should be noted that the Ātharvaṇa-Jyotiṣa gives at least five names that are the same as the corresponding bhāvas in extant *Jātaka* works. It is difficult to state the date when the extant Ātharvaṇa Jyotiṣa might have been composed. It mentions week-days but does not enumerate the twelve zodiacal signs, it refers to the doctrine of Bhṛgu (9.1). Verses 1–4 of Ātharvaṇa Jyotiṣa (chapter 13) are the same as Manu III. 46–49, similarly, Ātharvaṇa Jyotiṣa 12. 8–9 are almost the same as Manu IV. 41–42. It is quite possible that the present text is a recast of an older work. In any case the present text of the Ātharvaṇa Jyotiṣa cannot be placed earlier than the 2nd or 1st century B.C. and may be a little later still. But it appears that the present Ātharvaṇa Jyotiṣa only collects together the ideas then current and therefore the five names (janma, sampat, naidhana, mitra and karma) could very well have been current centuries before the present Ātharvaṇa Jyotiṣa text. Similarly, it is difficult to assign an exact date to the Viṣnu-dharmottara-purāṇa. It is in the nature of an encyclopaedia of the then knowledge of several lores and its present text may be assigned to some period between the 4th and sixth century A. D.

From the passage of the Bṛhadāraṇyaka Upaniṣad (in note 754) it would be seen how auspicious times were prescribed for rites to be performed by an individual. The Brāhmaṇas and Kalpasūtras prescribed the auspicious nakṣatras and seasons for solemn Vedic sacrifices. The *gṛhya* and *dharma* sūtras prescribed for domestic rites auspicious times, which were either the same or similar to those prescribed in the Brāhmaṇas, Br. Up. and the Kalpasūtras. A few examples may be cited here. The Āśvalāyana (I. 13. 1), Āpastamba (VI. 14. 9), Baudhāyana (I. 10. 1) and Pāraskara (I. 14) and other gṛhyasūtras provide that the rite of *Puṃsavana* (that would produce male issue) was to be performed in the third month after conception on Tiṣya (Puṣya) nakṣatra or on a day on which the moon would be in

---

774 यस्मिन्नक्षत्रे पुरुषस्य जन्म तन्नक्षत्रं तस्मान्नक्षत्राच्च दशमं तत एकोनविंशज्जन्मनक्षत्रमिति विद्यात्। तत्र सम्पत्करक्षेमसाधकमैत्रातिमैत्रेषु सर्वाणि कर्माणि कुर्यात्। दशमर्क्षे च। विष्णुधर्मोत्तरे II 166 at end (in prose), जन्मभे(जन्मभ?)कर्मधानीतिवितत्तु सम्पद्विपत्करक्षेमाः। प्रत्यरिसाधकवैनाशिकाश्च मित्रातिमित्रे च॥ बृहद्योगयात्रा *folio* 5*b*, IV. 17, जन्मसम्पद्विपत्क्षेम प्रत्यरि. साधको वध। मित्र परममित्र च जन्मतीनि पुन. पुन॥ शारदा॰ II 125–126

a male naksatra.[774a] The Bhāradvājagrhya expressly mentions Tisya, Hasta, Anurādhā, Uttarā Bhādrapadā as the proper naksatras for pumsavana As regards *caula* (tonsure) Āpastamba-grhya (VI 16. 3) prescribes that it should be performed in the third year after birth on Punarvasu naksatra The name of the naksatra may be noted, which literally means 'fresh wealth or new growth.' The Kauśika-sūtra mentions 'pāpanaksatra' (in 46 25) and pumnaksatra (lucky naksatra) in 35. 2. There are varying provisions about marriage. The Āp. gr says that all seasons are proper for marriage, excepting the two months of Śiśira (viz. Māgha and Phālguna) and excepting the last month (Āsāḍha) of summer, and all naksatras declared to be auspicious[775] The sūtra also quotes an ancient gāthā stating that persons for choosing a girl should be sent out on Invakās (i e Mrgaśīrsa) and then they are greeted with success As regards marriage the Gobhila-grhya provides a simple rule that it should be performed on an auspicious (*punya*) naksatra, while the Pāraskara [776] is more elaborate viz. one should take a maiden's hand in marriage in the northward passage of the sun, in the fortnight of the increasing moon, on an auspicious day and on Uttarā Phalgunī, Hasta, Citrā, Uttarāsādhā, Śravana, Dhanisthā, Uttarā-bhādrapadā, Revatī, Aśvinī, Svātī, Mrgaśiras and Rohinī naksatras. The Baudhāyana-grhya [777] declares. all months are proper for marriage; some (sages) say that the months of Āsādha, Māgha and Phālguna are to be avoided; the naksatras for marriage are Rohinī, Mrgaśīrsa, Uttarā Phalgunī and Svātī; while for other auspicious rites the naksatras are

The last is a gāthā quoted by the sūtrakāra as said by the commentator Haradatta. इन्वकाः are the stars resembling an arrow with which Rudra pierced the running Mrga in the heavens In the legend the arrow succeeded in piercing the Mrga.

776 पुण्ये नक्षत्रे दारान् कुर्वीत । गोभिलीयगृह्य II 1. 1 , उद्गयन आपूर्यमाणपक्षे पुण्याहे कुमार्या. पाणि गृह्णीयात् त्रिषु त्रिषूत्तरादिषु स्वातौ मृगशिरसि रोहिण्या वा । पारस्करगृह्य I 4.

777. सर्वे मासा विवाहस्य । शुचितपस्तपस्यवर्जमित्येके । रोहिणी मृगशीर्षमुत्तरे फल्गुनी स्वातीति विवाहस्य नक्षत्राणि । पुनर्वसू तिष्यो हस्त. श्रोणा रेवतीत्यन्येषा भूतिकर्मणाम् । धौ. गृ. I 1. 18–22

Punarvasu, Tisya, Hasta, Śronā (Śravana) and Revati The Āśvalāyana-grhya generalises the auspicious times for several important *saṃskāras* as follows:[778] 'the rites for *caula, upanayana, godāna* and marriage are to be performed in the northward passage of the sun, in the fortnight of the waxing moon and on an auspicious naksatra; some (sages) hold that marriage may be performed at all times'. Āśv further provides that the maiden after marriage was to observe silence and to begin speaking after seeing the Polestar, Arundhati and the constellation of the Seven Sages This generalisation is carried further by the Pūrvamīmāmsā-sūtra which provides[779] 'all rites in honour of the gods are to be performed in the northward passage of the sun, on a day in the bright half of the month and on an auspicious day'.

It will be seen clearly from the above discussion that an auspicious naksatra was the *sine qua non* in almost all Vedic rites and also in ordinary domestic rites in the times of the Brāhmanas and sūtras (several centuries before the Christian era), the tithi was rarely mentioned, the week-day was not mentioned nor the name of any *rāśi* (zodiacal sign) nor is there any reference to the planets Jupiter and Venus in most sūtras even when prescribing proper times for upanayana or marriage.

This requirement of finding out an auspicious day or naksatra for the celebration of a marriage or other domestic rite or for engaging in any undertaking was said in medieval Sanskrit works to be a search for an *auspicious muhūrta* It is therefore necessary to hold a discussion on the meaning and history of the word *muhūrta*

---

778 उद्गयन आपूर्यमाणपक्षे कल्याणे नक्षत्रे चौलकर्मोपनयनगोदानविवाहाः। सार्वकालमेके विवाहम्। आश्व गृ I 4 1-2. गोदान is the same as Keśānta and was performed in the 16th year for a brāhmana, in 22nd year for a ksatriya and 24th year for a vaisya (Manu II. 65, Yāj. I. 36). केशान्त. शुक्लोदाकाख्यं कर्म वर्णोदाख्य षोडशे वर्षे ब्राह्मणस्य कार्यम्' मिता on या I. 36, vide H of Dh. vol II. pp. 402-405 for details.

779. उद्गयनपूर्वपक्षाह पुण्याहेषु क्रियानि स्मृतिरूपान्यार्थदर्शनात्। पूर्वमीमासासूत्र VI. 8. 23. The आप गृ I 1 1-2 begins 'अथ कर्मण्याचाराख्यानि वृत्तन्ते। उद्गयनपूर्वपक्षाहःपुण्याहेषु कार्याणि।' It would be noted that आप. गृ and पूर्वमीमासासूत्र use the same words for the auspicious times for rites

CHAPTER XVI

Muhūrta

The word 'muhūrta' occurs twice in the Rg. In the dialogue between the rivers and sage Viśvāmitra that had come to the confluence of the Sutudrī (modern Sutlaj) and the Vipāś (modern Beas) occurs the following[780] 'for the sake of my words (of your praise) that will be followed by the offering of *soma* may you, that follow the established order (of nature), stop from[781] flowing for a short while'. In another place the Rgveda says 'the opulent Indra, employing many tricks, often assumes different forms from off his own body, since he, being invoked by mantras addressed to him and upholder of the cosmic order and drinking soma at (usual and even) unusual times, comes thrice from heaven for a short time.' In both these passages 'muhūrta' means 'a short time, a few moments'. This meaning of muhūrta is found in the Śat Br. I. 8 3. 17 (tan muhūrtam dhārayitvā) and II. 3. 2. 5 (atha prātaḥ anaśitvā muhūrtam sabhāyām-āsītvāpi) and in classical Sanskrit works like the Raghuvaṁśa (V. 58).

There is another meaning of the word 'muhūrta' in Śat. Br. X. 4. 2 18 and XII 3. 2. 5 where it is said that there are fifteen muhūrtas of the day and fifteen of the night (i.e 30 in *ahorātra*) and that in a year there are 10800 muhūrtas (30 × 360[782]).

---

780. एनश्चं ने वचसे सोम्याय ऋतावरीरुप मुहूर्तमेवैः। ऋ III. 33. 5. This is paraphrased in the Nirukta (II 25) as follows उपरमश्चं ने वचसे सोम्याय सोमसम्पादिने ऋतावरीः ऋतवत्यः. 'मुहूर्तम् एवै अयनै अवनैर्वा। मुहूर्त मुहु- ऋतु । ऋतुः अर्तेः गतिकर्मण । मुहु मूढ इव कालः।'. मुहूर्तं here means 'for a short time, for a moment'. The निरुक्त derives it from मुहु- and ऋतु- (time that passes quickly)

781 रूपंरूपं मघवा बोभवीति मायाः कृण्वानस्तन्वं परि स्वाम् । त्रिर्यद्दिवः परि मुहूर्तमागात्स्वैर्मन्त्रैरनृतुपा ऋतावा ॥ ऋ. III. 53 8. There are three savanas (soma pressings in the day) viz प्रात सवन, माध्यन्दिनसवन and तृतीयसवन Vide H. of Dh vol II p 981 for references to the three *savanas* in the Rgveda itself

782 स पञ्चदशाद्धो रूपाण्यपइयदाप्नवन्तन्वो मुहूर्ताँ लोकम्पृणा. पञ्चदशैव रात्रेस्तथ्यमुहुरापन्ते तस्मान्मुहूर्ता । शतपथ X 4. 2 18; दश वै सउत्राण्यष्टौ च शतानि सवत्सरस्य मुहूर्ता यावन्तो मुहूर्तास्तावन्ति पञ्चदशकृत्वः क्षिप्राणि यावन्ति क्षिप्राणि तावन्ति पञ्चदशकृत्व पतर्हीणि &c। शतपथ XII. 3. 2 5. मुहूर्तः are so called because 'they straightway save'.

Here the word *muhūrta* means 15th part of the day (i.e in a general way about two nādikās or ghaṭikās) Rg. X. 189. 3 appears[783] to contain a somewhat recondite allusion to thirty parts of the day and night 'by the rays of the sun thirty locations of the day (and night) shine forth; a laud is offered to the bird (the sun).' The fifteen names (viz citra, ketu &c.) of the muhūrtas of the day and 15 muhūrtas of the night occur in Tai Br. III.[784] 10 1. 1-3. The Vedāṅga-Jyotiṣa states that two nādikās are equal to a muhūrta (verse 7 of Vedāṅga-Jyotiṣa of Rg.) and that there is a difference of six muhūrtas (i.e 12 *ghaṭikās*) between the longest and shortest day[785] Manu I. 64, Kauṭilya (quoted in note 681) and several purāṇas (quoted in note 682) state that day and night are together equal to thirty muhūrtas Therefore, the second meaning of muhūrta from early Brāhmaṇa times at least was 'a period of two ghaṭikās'. The Kauṣītaki-upaniṣad speaks of muhūrtas called Yeṣṭihas[786]

It appears that some centuries before the Christian era the 15 muhūrtas of the day had received names different from those in the Tai Br. The Baudhāyana-dharma-sūtra (II. 10. 26), Manu IV. 92 and Yāj. I. 115 prescribe[787] that a householder should get up from his bed in the Brāhma-muhūrta (the last half watch of the night). The Brāhmamuhūrta is mentioned in

---

783 त्रिंशद्धाम वि राजति वाक्पतङ्गाय धीयते। प्रति वस्तोरह द्युभिः॥ ऋ. X. 189. 3. The same is अथर्ववेद VI 31 9 with different readings 'त्रिंशद्धामा विराजति वाक्पतङ्गो अक्षिभ्रियत्। प्रति वस्तोरहर्द्युभि॥'. सायण and Geldner take the words त्रिंशद्धाम as referring to 30 मुहूर्तs of day and night.

784 चित्रः, केतुः, प्रभाव्, आभाव्, संभाव्, ज्योतिष्मान्, तेजस्वान्, आतपन्, तपन्, अभितपन्, रोचनः, रोचमानः, शोभनः, शोभमानः, कल्याण। ते वा III. 10 1. These are 15 मुहूर्तs of the day The 15 मुहूर्तs of the night are: दाता, प्रदाता, आनन्दः, मोदः, प्रमोद, आवेशयन्, निवेशयन्, संवेशनः, संशान्त, शान्तः, आभवन्, प्रभवन्, संभवन्, संभूतः, भूतः.

785 धर्मबुद्धिरपां ग्रन्थः कृष्णपक्षस्य उद्गमनौ। दक्षिणे तौ विपर्यस्तौ षण्मुहूर्त्ययनेन तु॥ वेदाङ्गज्योतिष 7th of ऋग्वेदाङ्ग-ज्योः and 8th of यजुष The longest and shortest days would be 36 and 24 ghaṭikās and this would be approximately true for the extreme North-West of India about 32 degrees of north latitude and some miles north or north-west of Taxila

786. तस्य ह वा एतस्य ब्रह्मलोकस्यारो ब्रह्मः। मुहूर्ता येष्टिहाः। विजरा नदीः॥ &c. कौषीतकि उप I 3.

787. अथ ब्राह्मे मुहूर्ते उत्थाय कालं च मातरमिहोत्रं जुहोति। गौ गृ. सू. II. 10. 25, ब्राह्मे मुहूर्ते बुध्येत धर्मार्थौ चानुचिन्तयेत्। मनु IV 92, ब्राह्मे मुहूर्ते चोत्थाय चिन्तयेदात्मनो हितम्। याज्ञ 1. 115, मार्कण्डेय 31. 17 (Venk. ed.). मिता. explains 'ब्राह्मे मुहूर्ते उत्थाय पश्चिमेऽर्धप्रहरे मुहूर्त्य'.

Dronaparva (80.23). In the Raghuvaṁśa (V. 36) Kālidāsa says that Aja was born on the Brāhma muhūrta (i. e. Abhijit of which Brahmā is the presiding deity) and in the Kumārasambhava (VII. 6) he says that the female relatives of Pārvatī decked her in readiness for her marriage on Maitra muhūrta and when the Moon was in Uttarā-Phalgunī-naksatra. tithi (5th). Besides, in several places auspicious tithis, naksatras and muhūrtas are mentioned in general (e. g. Sabhā 2. 15 and 25. 4, Vana 253. 28). The Ātharvana Jyotisa (1. 6-11) names the 15 muhūrtas of the day as noted below.[788] The Muhūrtadarśana (or Vidyā-mādhavīya) gives almost the same 15 names (except Gāndharva for Viśvāvasu), inserts Śakra before Vāruna and omits Saumya and states that seven of these are auspicious viz.[789] Abhijit, Vairāja, Śveta, Sāvitra, Maitra, Bala and Vijaya. The Ādiparva (123. 6) states that Yudhisthira was born when the moon was in the naksatra presided over by Indra (i. e Jyesthā), on the 8th muhūrta called Abhijit, when the sun was on the meridian by day and on a tithi called pūrnā (here the 5th) In the Udyogaparva it is stated that a purohita was sent as a *dūta* of the Pāndavas on Pusya-yoga[790] and Jaya muhūrta (here Jaya is probably the same as Vijaya). The Manusmrti says that naming the child should be done on the 10th or 12th day (from birth) on an auspicious *tithi, muhūrta* and *naksatra*.[791] It would be proper to assume that the auspicious muhūrtas intended by Manu are the same as the seven mentioned in the Vidyāmādhavīya. The

---

788. The 15 मुहूर्तs are रौद्र, श्वेत, मैत्र, सारभट, सावित्र, वैराज, विश्वावसु, अभिजित् (मध्याह्ने), रौहिण, बल, विजय, नैर्ऋत, वारुण, सौम्य, भग: आथर्वणज्योतिष 1. 6-11.

789. संज्ञाः पुराणकथिता रौद्रः श्वेतस्तथा मैत्रः। आरभट: सावित्रो वैराजश्चाथ गान्धर्वः। अभिजित्र रौहिणबली विजयाख्यो नैर्ऋतः शाक्र.। वारुणभगदैवत्याविति विज्ञेया विना मुहूर्तानाम्॥ अभिजिद्वैराजश्च श्वेत. सावित्रमैत्रबलविजयाः। शुभकार्यसिद्धिजनकाः सप्त मोक्ताः पुराणज्ञैः॥ विद्यामाधवीय chap 4 pp 277-80 उत्पल on बृहत्संहिता 98.3 quotes a long prose passage from पराशर in which occur some of the names of मुहूर्तs, such as श्वेत, मैत्र, सारभट, रोहिणी (रौहिण?), आत्मसह, अभिजित्, बल, जय, गन्धर्व.

790. स भवान् पुण्ययोगेन मुहूर्तेन जयेन च। कौरवेयान्प्रयात्वाशु कौन्तेयस्यार्थसिद्धये॥ उद्योगपर्व 6 17-18.

791. नामधेयं दशम्यां तु द्वादश्यां वास्य कारयेत्। पुण्ये तिथौ मुहूर्ते वा नक्षत्रे वा गुणान्विते॥ मनु II. 30.

Vāyupurāna enumerates the names of the 15 muhūrtas in the day somewhat differently and also of the night [792] The Matsya-purāna (in chap 22 2) refers to two muhūrtas, Abhijit and Rauhina and mentions eight muhūrtas as auspicious on which to begin the construction of a new house [793] It also speaks of Kutapa as the 8th muhūrta (22 84) and states that Kutapa and the following four muhūrtas are the home of *svadhā* (i. e. śrāddha must be begun on kutapa and completed before the 12th muhūrta ends). It would be seen from the above that the names of muhūrtas were given at least twice, first in the Tai. Br and then in the Atharvana Jyotisa and the Purānas A further stage was probably reached when their names receded into the background and practically disappeared from such works as those of Varāhamihira and only the names of the deities presiding over the 30 muhūrtas of day and night remained and the muhūrtas came to be known by the names of the deities. Though Varāhamihira refers to the muhūrtas of day and night in Brhat-samhitā 42. 12 and 98 3, he does not set out their names in that work, but in his Brhad-Yogayātrā he sets out the 30 names of the deities presiding over the muhūrtas of day and night as quoted in the note below.[794] Varāha remarks: what-

792 रौद्रः सार्प (र्पे?) स्तथा मैत्र· पित्र्य (पित्र्यो?) वासव एव च। आप्योथ वैश्वदेवश्च ब्राह्मो मध्याह्नसंज्ञितः। प्राजापत्यस्तथा ऐन्द्रस्तथेन्द्रो निर्ऋतिस्तथा। वारुणश्च तथार्यम्णो भागश्चापि (भाग्यश्चापि?) विनाश्रिता। एते दिनमुहूर्ताश्च दिवाकरनिभिर्मिता· । वायु 66 40–42 The text is corrupt and the names of devatās are used in most cases, e g. ब्राह्म is अभिजित् as ब्रह्मा is the presiding deity of अभिजित्, प्राजापत्य is probably रौहिण as प्रजापति is the presiding deity of रोहिणी Verses 43–44 of वायु 60 enumerate the names of the 15 muhūrtas of the night as आजस्तथाहिर्बुध्न्यश्च पूषा-दि यमदेवता· । आग्नेयश्चापि विज्ञेय· प्राजापत्यस्तथैव च। ब्रह्मा सौम्यस्तथादित्यो बार्हस्पत्योथ वैष्णव । सावित्रीथ तथा त्वाष्ट्रो वायव्यश्चेति संग्रह । एकरात्रिमुहूर्ता स्तु· क्रमोक्ता दश पञ्च च। But almost all these are names of presiding deities

793. स्वातौ (श्वेते?) मैत्रेऽथ माहेन्द्रे गान्धर्वाभिजिति रौहिणे। तथा वैराजसावित्रे मुहूर्ते गृहमारभेत्। मत्स्य 253 8–9.

794 शिवमुजगमित्रपित्र्यवसुजलविश्वविरिञ्चिपङ्कजभवा· । इन्द्राग्नीन्दुनिशाचरवरुणार्य-मयोनयश्चाहि ॥ कृष्णाजाहिर्बुध्न्या· पूषा दस्रान्तकाग्निधातार· । इन्द्रदितिगुरुहरिरवित्वष्ट्र-निलाख्या क्षणा रात्रौ॥ अह्न· पञ्चदशानां रात्रेश्चैवं मुहूर्ता इति संज्ञा। बृहद्योगयात्रा VI. 2 4 (Ms in the Bhau Daji Collection in the Bombay Asiatic Society) Vide also रत्नमाला VII. 1–2. These are quoted by उत्पल in his com on बृहत्संहिता 42 12 and 98 3 and in his com on योगयात्रा II. 3–5 and V 10 It should be noted that the verses about the मुहूर्तs of night in वायु (note 792) correspond to these verses of वराह The मुहूर्तमार्तण्ड II. 4 specifies the devatās of the 15 muhūrtas of the day and 15 of the night. Alberuni (Sachau, vol. I pp 338–342) discusses at length how muhūrtas may be short or long and gives the dominant deities of the 15 muhūrtas of the day.

ever has been stated as proper for being done on certain naksatras, may be done on tithis presided over by the deities of those naksatras and also on *karanas* and on muhūrtas; that leads to success as the deity is the same.[795] For example, if a certain thing is recommended for being done on Ārdrā naksatra, then it may be done also on the muhūrta of Śiva (i. e. the first muhūrta of the day) as the *devata* of both (the naksatra Ārdrā and the first muhūrta) is the same (viz Rudra). The Ātharvana Jyotisa (2. 1–11) and (3 1–6) dilates upon what should be done on the 15 muhūrtas of the day. Some examples may be cited here: on Raudra may be done whatever is of a terrific nature; on Maitra should be done whatever is affectionate or friendly; on Sārabhata black magic may be resorted to against enemies; Abhijit is proper for all desired objects and gives success in all undertakings; Vijaya leads to victory if one marches on it, one may perform auspicious acts on it and *sānti* rites, on Bhaga-muhūrta one should choose a brāhmana maiden for marriage and such a one married on Bhaga does not turn out unchaste It may be noticed that Patañjali (on Vārtika one on Pānini V. 1. 80) refers to the fact of a person being engaged for a month to teach one muhūrta every day.[796]

After the vernal equinox, days become gradually longer than the night and after the autumnal equinox nights are gradually longer and longer than the day. As there are only thirty muhūrtas from one sunrise to the next sunrise it is proper to say that a muhūrta is equal to two ghatikās (i. e 48 minutes). But it is also said that there are 15 muhūrtas of the day. The longest day in India of the Vedānga-jyotisa locality was of 36 ghatikās and therefore if one insisted on the number 15 each muhūrta on that day would be $2\frac{3}{5}$ ghatikās, while as the shortest day was 24 ghatikās in length each muhūrta of that day would be only $1\frac{3}{5}$ ghatikās. This difference in length in the case of muhūrtas is noted by the Visnudharmottara (I. 73 6–8) and by the Brahmāndapurāna (I. 2. 21. 122–133). The Visnudharmottara (I. 83 67–73) sets out the names of the deities of the 30 muhūrtas. It appears that in ancient times it was understood that the longest day gained and was of 18 muhūrtas, while the short night of

795. यत्कार्यं नक्षत्रे तद्देवत्यासु तिथिषु तत्कार्यम्। करणमुहूर्तेष्वपि तद् सिद्धिकरं देवतासदृशम्॥ बृहत्संहिता 98. 3.

796. The वार्तिक is अधीष्टभृतयोर्द्वितीयानिर्देशोऽनर्थकस्तत्रावदर्शनात्। (on समधीष्टो भृतो भृतो भावी। पा V 1 80), on which पतञ्जलि explains "न ह्यसौ मासमधीष्यते। किं तर्हि। ह्यूर्वमसावधीष्टो मास तत्कर्म करोति।".

that day had only 12 muhūrtas i. e. 6 muhūrtas got attached to the day sometimes and 6 muhūrtas got attached to the night sometimes when it was longest. Patañjali[797] in his bhāsya on Vārtika 2 of Pānini II. 1. 29 mentions this This would be a matter of personal observation which need not extend beyond a few years But even here Prof. Neugebauer smells Mesopotamian influence ('Exact sciences in Antiquity' p 178). This is a characteristic example of the jaundiced eyes with which most Western writers look at things Indian. If the writer of the Vedānga Jyotisa was a native of the extreme north-west of India or had stayed there for some years he would have easily noticed the difference between the longest day and the shortest day as about twelve ghatikās, particularly as that very verse of the Vedānga-jyotisa shows that water clocks were then used. Even illiterate people in the villages of Bombay State know that the difference between the longest and shortest day in their villages is about six ghatikās (as Bombay is a little over 18 degrees, N Lat). There is nothing to show that the writer of the Vedānga-Jyotisa was not a person who was either born in the extreme north-west of India or stayed there The North-west of India was a centre of Sanskrit culture at least six centuries preceding the Christian era and Taksaśilā (Taxila) was a great University where princes came to learn (vide Rhys Davids in 'Buddhist India' p 8). Pānini hailed from that part, it appears, and teaches the formation of words like Saindhava, Tāksaśila and Śālāturīya as meaning a person whose ancestors lived in or who himself stayed in Sindhu or in Taksaśilā or in Śalātura (Pān. IV. 3. 89–90 and 93–94). Later writers call Pānini Śālāturīya (vide Bhāmaha VI 62–63). To suppose that a learned Indian who was writing a work on Jyotisa had to run all the way from India to Mesopotamia a thousand or more miles for finding out the difference between the longest and shortest day in his own country or for saying that the difference between the longest and shortest day in Mesopotamia being 12 ghatikās the same was the difference between them in India or for consulting works written in the Cuneiform characters for that purpose almost borders on the absurd Besides Prof Neugebauer is not quite correct. The latitude of Babylon is 32°. 40' North and even there the ratio would not be exactly as 3 to 2 Gāndhāra is 31°. 40'

797. अनन्यन्तसंयोगार्थं तर्हीदं वक्तव्यम्। षण्मुहूर्ताश्चराचराः। ते कदाचिदहर्गच्छन्ति कदाचिद्रात्रिम्। तदुच्यते। अहर्गता रात्रिगता इति। नैतदस्ति। गतग्रहणावन्येतदिसद्धम्॥ महाभाष्य on वार्तिक 2 on पा. II 1. 29

North Lat; one who is to the north of Gāndhāra may quite naturally say that the ratio is about 3 to 2. Vide C. R. C. Report p. 225. Further in Journal of Near Eastern Studies, vol 8 (pp. 6-26), Prof. Waerden points out (at p. 18) that even in Babylonia the great omen series started from the primitive ratio 2:1 and that it was only later that the more accurate value 3:2 became known.

It has been shown so far that the word 'muhūrta' had two meanings in the ancient Vedic times, viz 'for a short time' and 'a part equal to two ghaṭikās' As some muhūrtas of the day (of the duration of two ghaṭikās) were declared to be auspicious, gradually a third meaning came to be attached to this word viz. 'time that is fit for the performance of an auspicious act'[798]. It would be shown later on how the medieval Dharmaśāstra works are full of muhūrtas in this sense.

In order to thoroughly understand the requirements about muhūrta in this third sense some knowledge of the planets, the twelve *bhāvas* (houses or places in a horoscope) and the *rāśis* would be necessary. Before entering on a discussion of these latter matters reference must be made to the change that came over even the best minds of India from about the 4th century B.C. It has been seen above (p. 527) how the star-gazer and the *ganaka* had come to be condemned and how one who was a professional astrologer (for money) had been looked down upon as an unworthy brāhmana. All the same there was even about 500 or 600 B. C. a small section of people who looked upon the astrologer as all important, particularly to the king. The Gautamadharmasūtra[799] provides 'the king should choose as his *purohita* (palace priest) a brāhmana endowed with learning, good family, eloquence, handsomeness, (middle) age (neither too young nor too old), character, and who is righteous in conduct and austere, the king should perform all (religious) acts as directed by the priest; he should respect (i. e. follow and not discard) what those who have devoted

799. ब्राह्मणं च पुरोदधीत विद्याभिजनवाग्रूपवयः शीलसम्पन्नं न्यायवृत्तं तपस्विनम्। तत्प्रसूत कर्माणि कुर्वीत। ... यानि च दैवोत्पातचिन्तका ब्रूयुस्तान्याद्रियेत। तदधीनमिव लोके योगक्षेमं मन्यन्ते। गौतमधर्मसूत्र XI 12-13, 15-16 For the various meanings of योगक्षेम, vide H of Dh vol III pp 588-589 The बृहत्संहिता II. declares that दैवचिन्तक is one who is a master of Saṃhitā (संहितास्कन्ध दैवचिन्तको भवति). It may be noted that in Italy the court astrologer was an established officer at the beginning of the 14th century A D and from Italy he found his way to the French court (vide 'Star-crossed Renaissance' by D. C. Allen, p. 51).

tendencies viz. (firstly) daiva is all powerful, (secondly) human effort is superior, (thirdly) a golden mean between the two. Vide H. of Dh vol III. pp 168–169 for discussion and for passages supporting all the three views. The first chapter of Brhadyogayātrā (20 verses) and also of the Yogayātrā (22 verses) deal with *daiva* (Luck, Fate) and *purusakāra*. In spite of this, from the king to the lowliest man, almost everyone was firmly in the grip of astrology and even now astrology has great influence over some highly educated Indians. Astrology based on horoscopes and dealing with individuals was called *horāśāstra* or *jātaka*. By the time of Varāhamihira even learned men had forgotten the origin of the word *horā*. The Brhajjātaka says[802] 'according to some the word horā is obtained from *ahoratra* by dropping the first and last syllables, that horāśāstra well manifests what the fruition of acts, good or bad, done in previous lives is going to be'. It should be noticed that the Brhajjātaka insists on two matters, viz (1) it links up the horoscopic astrology to the doctrines of *karma* and *punarjanma* (re-incarnation to wipe out karma) and (2) the śāstra holds that the horoscope to be only a map or plan, which indicates future trends in a man's life arising from what he had done in a previous life or in previous lives. It does not here say that the planets in a man's horoscope will compel him to do this or that, but it says that the horoscope will only intimate in what directions a man's future might be evolved. These principles were repeated even by late medieval writers. For example, Raghunandana[803] in his Udvāhatattva (p 125) agrees with the Dīpikā that the planets only convey that sins were committed in former lives, but they do not themselves produce evil results and quotes the Matsyapurāna in support that 'evil actions done in former lives bear fruit in the present life in the form of diseases, distress and the death of those dear to one'. There was probably a third underlying principle viz. the stars are the temples in which the gods reside,

803. अत एव दीपिकायां–ये ग्रहा रिष्टिसूचका –द्रव्यनेन ग्रहाणां पूर्वसिद्धपापबोधकत्वमिति न तु पापजनकत्वम् । तथा च मत्स्यपुराणम् । पुरा कृतानि पापानि फलन्त्यस्मिंस्तपोधना । रोगदैर्गत्यरूपेण तथैवेष्टवधेन च । तद्विधाताय वदयामि सदा कल्याणकारकम् ।' उद्वाहतत्त्व p. 125.

as said in the Śat. Br. and Tai. Br.[804] The Babylonians[805] and Assyrians based their astrology mainly on three assumptions viz. (1) the stars are temples in which the gods reside, (2) the stars reveal to men the intentions of the gods with regard to the future; (3) human history is predetermined at a heavenly council over which Marduk presides. These, except the first, are entirely different from the principles emphasized by Varāhamihira and those who came after him The Babylonians and Greeks had no (generally believed) doctrines of *karma* and *punarjanma*. Therefore, they could not make astrology serve indirectly a higher purpose, viz of inducing people to lead a life of virtue in the present. Instead of the somewhat childish and often immoral legends of ancient times the cult of planetary influence and worship seemed to many minds far more rational and convincing.

The Sārāvalī of Kalyāṇa-varman follows this and adds[806] that what is known among the people as Jātaka is called *horā* in this śāstra or the word (horā) may indeed be taken to be a synonym for 'consideration of what the destiny would be'. The word 'horā' has two other meanings in Sanskrit astrology viz *lagna* (that sign which is rising on the eastern horizon at a particular moment) and half a *rāśi* (Bṛhajjātaka I 9). Extravagant claims were made for the importance and utility of astrology and astrologers The Sārāvalī declares[807] there is no one else except astrology that would serve as a helper of men in acquiring wealth, as a boat in the sea of calamities and as a councillor when one starts on a journey or invasion Varāhamihira boasts[808] 'Even those who have resorted to a forest (i e.

(Continued on next page)

who have become forest hermits), who are free from worldly attachments and are without property, ask questions of one who knows the movements of heavenly luminaries. As the night without a lamp or the sky without the sun, so a king without an astrologer (with him) wanders about (or wavers) as a blind man on a road. If there be no astronomer and astrologer, auspicious times, *tithis*, naksatras, seasons and the *ayanas* (northward and southward passages of the sun),—these would all become confused What a single astrologer knowing the country and time can effect, that even a thousand elephants or four thousand horsemen cannot accomplish.'

The Rājamārtanda provides[809] 'the *purohita* (family or palace priest), an astronomer, a councillor and an astrologer as the fourth – these must always be supported by the king even with great trouble, as in the case of women'

It has, however to be noted that Varāhamihira himself frequently gives up the principle that the horoscope is only a map showing tendencies and talks the language of certainty and of the planets causing this or that state of things. To mention one or two examples In Brhaj-jātaka[810] he says 'the sages declare that a person is born from a paramour for certain (and not from his reputed father) if in his horoscope Jupiter has no *dṛṣṭi* (aspect) either on the *lagna* or on the moon or on the sun and moon that are in conjunction (in his horoscope) or when the moon is in conjunction with the sun and with a malefic planet (Mars or Saturn)'. In VI. 11 Br J. says[811] 'the moon in conjun-

ction with a malefic planet in the 1st, 5th, 7th, 8th, 9th or 12th house (in a horoscope) causes death (of the new-born child) if it is not also in conjunction with powerful Venus, or Mercury or Jupiter or if it is not in aspect with one of those powerful three.' Again in Bṛhaj-jātaka XIV 1 it is said. If the sun is in conjunction with another planet, he produces the following results, viz with the moon a man who makes (lethal) machines or works in stones; with Mars a man addicted to evil ways; with Mercury a man who is skilful, intelligent, famous and happy, with Jupiter, a cruel man or one intent on carrying out the objects of others; with Venus a man who makes money by going on the stage (or in a ring for boxing &c.) or by the use of arms, with Saturn a man clever in metals or different kinds of (merchandise or) vessels The Sārāvalī very frequently says that such and such a position produces (janayati, utpādayati) or causes (karoti or kuryāt &c.) certain results. Vide chap. 33 48–61.

Before proceeding further I must point out that India was not singular in its firm belief in Astrology The case was the same throughout Europe and among the Greeks after Alexander the Great. It has been already seen (p. 521) how Babylonian astrologers made reports to the king about the position of the Sun, the Moon and the planets and what they portended for the country, the king and the people Vide for example, Nos 9, 15, 16, 21, 32, 33, 52, 53, 63, 66, 67, 72, 74, 76, 86, 151, 164 from 'The Reports of the Magicians and Astrologers of Nineveh and Babylon' by R Campbell Thompson (vol I and II, Luzac and Co. London, 1900). But horoscopic astrology was developed by them later In the Old Testament Isaiah (759–710 B. C) 47 1 and 5 apostrophize Babylon as the daughter of the Chaldeans and in verse 13 we read 'let now the astrologers, the star-gazers, the monthly prognosticators stand up and save thee from these things that shall come upon thee'. In Daniel 4.7 it is said that on Nebuchadnezzar's order 'came in the magicians, the astrologers, the Chaldeans and the soothsayers.' Vide also Daniel 1 20 and 2.2 and 27. The Chaldeans held that the five planets specially controlled men's destinies and five Babylonian deities were identified with them As Bouché-Leclercq observes (in 'L' Astrologie Grecque', p 572) 'Chaldean astrology had lived on a fund of naive ideas, it began at a time

(Continued from last page)

from Sārāvalī X. 98 that the Moon must be kṣīna (waning, i. e. from 8th of dark half to the 8th of the following fortnight) for the application of this rule.

when the heavens were deemed to be nothing but a cover of the earth, when all the stars were ranged at small distances on the vault and the planets were supposed to move in the midst of stars like shepherds inspecting their flocks. Greek science having extended the world, the influence of stars moved back at enormous distances was not a postulate of common sense' (vide note 748 above). Herodotus[812] (*II.* 82) refers to a peculiar practice of the Egyptians to regard each month and day as sacred to some deity, and says how from the day of a man's birth they determined his fortune, character and the manner of his death. But this has no reference to horoscopic Astrology. The Egyptians knew nothing about the Zodiac before the Alexandrian age There is no trace of astrology in early Greek astronomical writers and it appears that the Greeks got it from Babylon[813] after Alexander conquered Babylon, when teachers of astrology began to arrive in Greece. The Hellenistic mind was soon completely captivated by astrology. Before the advent of astrology the Greeks tried to peep into the future by oracles, interpretation of dreams and inspection of the entrails and livers of sacrificed animals, from the flight and cries of birds and from prodigies and unusual occurrences such as eclipses, comets and meteors Berossus[814], a priest of the god Bel at Babylon, dedicated to his patron Antiochus I Soter (280–261 B C.) an elaborate work on Babylonian and Chaldean history and it was he who was instrumental in spreading Babylonian astrology in Greece by first introducing it in his school at Cos, an island not far from the south-western corner of Asia Minor. From Greece astrology spread to Rome about the 2nd century B. C The signs of the Zodiac became house-hold words in Greece and Rome. Stoics like Posidonius

813. Vide E J. Webb in 'The names of the stars' (1952) p 189 and in Journal of Hellenistic Studies, vol 48 p. 66; C V Maclean in 'Babylonian astrology and its relation to the Old Testament' p. 7, in J of Near Eastern Studies vol. IV at p. 26 Prof Neugebauer averred that the Mesopotamian origin of the astrological omina cannot be doubted, but in 'Exact Sciences in Antiquity' p 164 he appears to modify his position by saying that only the original impetus to horoscopic astrology in Greece came from Babylon and that its actual development must be considered as an important component of Hellenistic Science In the same journal at p. 15 he does not know how horoscopic astrology in Greece originated from the totally different omen type astrology of the preceding millenium.

814 Vide Cambridge Ancient History, vol. I. p. 150, Gregory in 'Nature vol. 153 at p. 515.

helped it by defending it. Cato in[815] his work on agriculture warns a farmer against consulting a Chaldean and in 139 B. C. an Edict was passed for expelling Chaldeans from Italy. Diodorus[816] Siculus (a contemporary of Augustus of Rome) describes the theory and method of the Chaldeans in casting horoscopes. Horace[817] (died in 8 B. C) in his ode to Maecenas refers to the influence of the signs Libra, Scorpion and Capricornus and of the protective power of Jove and about baleful Saturn in his horoscope. Strabo,[818] who died in 24 A D., averred (XVI. 1.6) that some Chaldeans were skilled in astronomy and the casting of horoscopes. Petronius (1st century A. D) describes in his novel Satyricon a dinner in forty pages in which a tray displayed the signs of the zodiac under each of which was placed appropriate food (vide Will Durant in "Caesar and Christ" page 298, (New York 1944). Juvenal,[819] who flourished about the close of the 1st century A. D, strongly inveighs against ladies who have great confidence in Chaldean astrology. It should not, however, be supposed that no dissenting voice was raised against astrology in Rome and medieval Europe. Cicero did not believe in astrology[820] as he said that the planets were too far away (Bouché Leclerq's work p 572). St. Augustine (354–430 A. D.) in his work 'City of God' calls astrology a delusion[821] There were some points of difference between Babylonian astrology and Greek astrology, viz Babylonian astrology originally at least was interested in the State and the royal family, while Greek astrology was interested only in the indi-

vidual and Babylonian astrology was a priestly business while in Greece the astrologers were laymen. Astrology became a study of international importance in Europe and was cultivated in the Universities as a subject of real value throughout Europe by the side of astronomy. Its great vogue among even well educated people was due to its apparent scientific structure with its houses, planets, twelve signs and so forth Allen (in 'Star-crossed Renaissance' Preface p. VIII) says that everybody in the Renaissance period in the West believed to, some extent in astrology. In 'Stars above us' by Prof. E. Zinner, Tycho Brahe is quoted as saying that he prepared every year an astrological forecast for his king (p. 76). Even Copernicus, Galileo and Kepler practised astrology themselves or countenanced its practice. Bacon was prepared to say that there was no fatal necessity in the stars, but they rather incline than compel Ptolemy's Tetrabiblos reigned supreme for about 1400 years and is even now a work of great authority for those who believe in astrology. It may interest the reader to know that the great German poet, dramatist and philosopher, Goethe[822] (1749–1832), begins his Memoirs by mentioning the aspects of planets at his birth.

Two circumstances tended to weaken the influence of astrology in Europe, viz. the giving up of the geocentric theory in favour of the heliocentric theory and the vast additions to astronomical knowledge made during the last two centuries. But it should not be supposed that astrology has become defunct in the West or U. S. A. The immense strain and distress caused by the two world wars provided a powerful fillip for the spread and influence of astrology. Even in papers the circulation of which runs into millions there is a regular astrological feature every day or every week, which tells people what the stars portend for twelve groups of the world's population in the week

822. 'Memoirs of Goethe' (London, 1824, vol I) 'I was born under fortunate auspices, the Sun was in the sign of the Virgin at the utmost degree of elevation. The aspects of Jupiter and Venus were favourable to the day. Mercury testified no signs of hostility, Saturn and Mars were neutral. The Moon, however, then near the full, was an important obstacle, and the more so as the labour which attended my birth coincided with the hour of her new phase She retarded my entrance into the world until the moment had elapsed'. Vide 'Stars above us' by Prof. Zinner p. 68 for Goethe's horoscope.

or on the day mentioned.[823] What benefit the people derive from these prognostications it is difficult to understand. Often the prognostications are extremely vague and not of greater extent than three or four short cryptic sentences. There must be millions of people in each of the twelve groups (such as those born from 23rd September to October 23rd, those born from 24th October to 22nd November and so on). It is said that in U.S.A. alone there are about 25000 registered astrologers.

Those interested in astrology in general and Greek astrology in particular and those who desire to know how astrology is regarded by many modern scientific minds may read 'L' Astrologie Grecque' by A. Bouché-Leclercq' (1899, a masterly work in French on Greek Astrology) pp 570-593 (for arguments against astrology), 'The Royal Art of Astrology' by Robert Eisler (London, 1946), which contains a reasoned and sustained refutation, and Mr. J. C. Gregory's Article on 'Ancient Astrology' in Nature, vol 153 pp. 512-515 (a brief, but instructive and detached survey of astrology from Chaldean times to this day). The number of books in favour of astrology or expounding it is large and I do not propose to mention them. One book arrested my attention, viz. Louis de Wohl's 'Secret service of the sky'. On p 31 he propounds a doctrine very similar to what Varāha-mihira laid down as the scope of *horāśāstra* viz. that Astrology has nothing whatsoever to do with mere predictions, that it only indicates tendencies and that human will is free He began well, but he did not observe his own precepts. On p. 235 he predicts 'I do not believe that Mahatma Gandhi will survive the first half of 1939' This prediction turned out to be untrue and it is well-known that Mahatma Gandhi was killed on the 30th of January 1948.

The English language itself bears witness to the great influence of astrology in England, e. g. such words and expressions as 'ill-starred expedition', 'disastrous consequences', temperaments being either jovial, mercurial, or saturnine, 'moon-[824]

---

823. The following may be cited as a sample Taurus (April 21–May 20)– 'You realise that a break in one relationship is probably inevitable. This week you will see your way to making it without undue loss. Harden your heart where money is concerned and don't allow friendship to interfere with business.'

824. It is believed that the moon (*luna*), when full, increased madness; hence a mad man was called lunatic Vide an article 'Lunar influence on

(Continued on next page)

struck (mad) lover'. The word influence (from *fluo* to flow) itself is due to astrological beliefs and words like 'aspect', 'conjunction', 'ascendant', 'retrograde' are all due to the language of astrology.

In support of Astrology Ptolemy (in Tetrabiblos, 1.2) puts forward certain arguments. The Sun not only affects everything on the earth by the change of season, but by its daily revolutions furnishes heat, moisture, dryness and cold in regular order. The Moon, the nearest heavenly body to the earth, causes the seas to change their tides with its own rising and setting times, and plants and animals wholly or partly wax and wane with the moon. The planets often signify hot, windy and snowy conditions of the air and affect mundane things. The changes of seasons and winds are understood even by very ignorant men and by some dumb animals. Sailors know the special signs of storms and winds that arise periodically by reason of the aspects of the sun, moon and planets. But because sometimes sailors err, no one says that there is no science of navigation. Therefore, a sufficiently observant man wise enough to know accurately the movements of the sun, moon and planets can predict whether the weather will be warmer or [825] wetter. Why can he not, with respect to an individual, perceive the general quality of his temperament from the surroundings at the time of his birth, as for example that he would be such and such in body and mind? Ptolemy then condemns impostors who do not study the science but deceive common and trusting people and fill their pockets. He further points out that the nativity alone is not the sole basis of judging a person's future, that the country of birth, the

(*Continued from last page*)

living things' by Prof. George Sarton in Isis vol. 30 (1939) pp. 495-507, where he examines the beliefs about the Moon's connection with lunacy, tides, menstruation, terrestrial magnetism, says that these are matters for experiment, advises scientists to keep an open mind and holds that lunar influence is unproved as to some of them.

825. A short passage from Bouché-Leclercq (p. 574) may be set out here: 'how to justify the ridiculous associations of ideas attached to the purely imaginary forms of the figures of the Zodiac and the reciprocal influence of planets on the signs and of the signs on the planets when these are (one knows this since a long time) at a great distance from the constellations and do not appear to be placed there except by the effect of perspective'?

race to which he belongs, the customs of the people among whom he is born, the way in which he is reared, the age in which he lives have also to be considered, all which will contribute materially to the proper prediction, other things being equal. In IV.10 he points out that if one looks only at the horoscope without paying attention to nationality, manners and customs and the like he may call an Ethiopian fair[825a] of complexion and having straight hair and a German a dark-skinned person and endowed with woolly hair or not knowing the peculiar customs say that an Italian whose horoscope is being examined may marry his sister (as ancient Egyptians did) or that the man may marry his mother (as only Persians did) Vide Tetrabiblos IV. 10 p. 439 (Loeb. cl Library). In I. 3 Ptolemy argues that astrology is not only possible but is beneficial, because fore-warned is fore-armed. It is a very far cry to argue from the undoubted influence of the Sun and the Moon on mundane matters, such as heat and cold, rains, storms and droughts that the particular positions and aspects of the Sun, Moon and planets at the time of birth or conception (as some hold) are throughout an individual's life (it may be for a day or a hundred years) the dominating factor (if not the sole factor as many astrologers say) governing his conduct, character, family affairs and destiny. The reasoning of Ptolemy, though very cleverly put and though with a slight scientific appearance, is rather vague and not at all cogent or convincing He distinguishes between universal or general astrology (treated of in Books I–II) which relates to whole countries, races, cities and large bodies of men and particular or genethlialogical astrology treated of in books III–IV.

---

825 a. Utpala on Laghujātaka IV. 1 states similarly that one (the astrologer) should specify the form (or appearance) of a person after knowing his caste, since śvapākas (cāṇḍālas) and niṣādas are dark-skinned by caste; similarly, he should consider in what family, whether of fair persons or dark persons, the person (whose horoscope is being examined) was born or in what country, since all people from Karnāṭaka are dark, people from Videha (i. e. Mithilā, part of present Bihar State) are dark-brown and from Kashmir fair लघुजातक IV. 1 is : सर्वं रजस्तमो वा त्रिंशांशे यस्य भास्करस्वाद्वक्तुः। बलिनः सदृशी मूर्तिर्ज्ञेया वा जातिकुलदेशात्॥ जातिं बुद्ध्वा मूर्तिनिर्देशः, यतः श्वपाकनिषादा जातित एव कृष्णा भवन्ति। तेषां च एव निर्देशः॥ कस्मिन्कुलेयं जातो गौराणां कृष्णानां वा कस्मिन्देशे जात, यत कर्णाटका. सर्व एव कृष्णा. वैदेहा श्यामाः काश्मीरा गौराः। folio 15b of commentary on लघुजातक IV, 1 (Ms. in Bhadkamkar collection of the Bombay University). For śvapāka vide p. 97 of H. of Dh. vol. II and for niṣāda pp. 43, 46, 86–87 of the same.

Indian works also require the astrologer to consider the customs of the country and of the people. The Rājamārtaṇḍa[825b] says 'First the usages of people must be considered; whatever is firmly established in the several countries, that alone must be followed; the learned give up what is hateful to the people; therefore an astrologer should proceed along the people's way. A learned man should never go against the inclinations of the family (to which the person belongs) and of the country'; and then he gives examples of the astrological requirements as regards planets in the case of marriages in several countries. The general astrology about calamities or occurrences that affect all people spoken of by Ptolemy would fall under *Śākhā* or *Saṃhitā* in the narrower sense (vide notes 688 and 690) Some important and interesting conclusions of Ptolemy may be noted here.

Ptolemy speaks of beneficent and malefic planets (I. 5), of masculine and feminine planets (I.6), of diurnal and nocturnal (in Sanskrit *dinabalī* and *niśābalī*) planets (I. 7), (I. 12) masculine and feminine rāśis (signs), the aspects of the signs (I. 13) viz. opposition (180 degrees), trine (120°), quartile (90°) and sextile (60°), of the houses (*svagṛhas* in Sanskrit) of the planets. In Book II he divides the inhabited world into quarters equal in number to the triangular formations of the signs of the zodiac and after a disquisition which would be regarded by modern men as casuistical and practically unintelligible, Ptolemy sets forth a list of over seventy countries (then known), assigning to each sign some countries. For example, to Aries he assigns Britain, Gaul, Germania, Bastarnia, Syria, Palestine, Judaea and one more; to Capricorn he assigns India, Ariana, Gedrosia, Thrace, Macedonia, Illyria. The whole of America, almost the whole of Africa (except the northern part), Indonesia and Australia and the other neighbouring lands are not considered by Ptolemy at all, because these were unknown then. He remarks at the end of II. 3 that as to metropolitan cities they should be treated like individuals and their nativity is to be cast by taking the time of the foundation[826] of the city

825b लोकाचारस्तावदादौ विचिन्त्यो देशे देशे या स्थितिः सैव कार्या। लोकाद्विष्टं पण्डिता वर्जयन्ति दैवज्ञोऽपि लोकमार्गेण यायात्॥ कुलस्य देशस्य च चित्तवृत्तिर्न खण्डनीया विदुषा कदाचित्॥ बृहस्पतौ गोचरशोभनस्थे विवाहमिच्छन्ति हि दक्षिणास्थाः। एवौ विशुद्धे भवतश्च गौढा न गोचरो मालवके प्रमाणम्॥ राजमार्तण्ड folio 25 b verses 399–401. The first two also occur in the सुजशल of भोज (pp 34–35 verses 143–144).

826. An interesting Indian example is furnished by the Mirat-i-Ahmadi translated by C. N. Seddon which gives (on pp. 248–253 supplement) the

(*Continued on next page*)

instead of the times of birth, but where the exact time of foundation is not known then the nativity of the founder or of the king is to be taken.

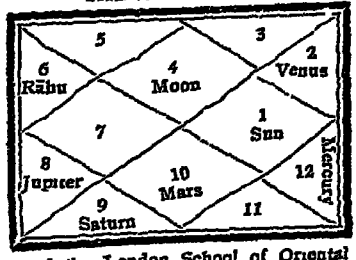
A few important points of agreement and disagreement between Sanskrit astrological works and Ptolemy will be set out later on.

The literature on *muhūrta* (auspicious time for undertaking anything) is extensive. Almost all works on Kāla mentioned above such as Hemādri on Kāla, the Kāla-mādhava, Kālatattva-vivecana, Nirnayasindhu are in a way works on muhūrta, since they discuss the proper times for performing the samskāras and religious rites. Among the works the names of which begin with the word muhūrta are: Muhūrtakalpadruma (published by Nirn Press, Bombay) composed by Vitthala Dīksita in 1628 A.D.; Muhūrta-ganapati composed in 1685 A. D. by Ganapati Raval, son of Harishankar; Muhūrta-cintāmani composed at Benares in *śake* 1522 (1601 A. D.) by Rāma, son of Ananta, with a commentary called Piyūsa-dhārā composed in śake 1525 (1604 A.D.) by Govinda, son of Nilakantha elder brother of Rāma (published in 1945 by the Nirn. press); Muhūrtatattva by Ganeśa, son of Keśava (ms in Bhau Daji collection of Bombay Asiatic Society); Muhūrtadarśana (also called Vidyāmādhavīya) by Vidyāmādhava with a commentary called Muhūrta-dīpikā (about 1363 A.D.) by his son Visnu, edited by Dr. Shamsastri (published

(*Continued from last page*)

date and horoscope of the foundation of the city of Ahmedabad in *śake* 1314, *samvat* 1449, Vaiśākha śu. 5, Thursday, 15 *ghaḍs* (*ghaṭis*) and 35 *pals*.

THE HOROSCOPE



In the Bulletin of the London School of Oriental Studies vol. 9 for 1935-37 there is a paper (pp. 125-139) on some chronological data relating to the Sassanian period in which reference is made to an Arabic book on astrology composed about 275 of the Hejira (equal to 888-889 A. D.) by a Persian astronomer and astrologer, the 2nd part of which describes a horoscope of the accession of Khosrove to the throne on a date corresponding to 18-8-531 A. D. (p. 129).

by Mysore University, 1923–1926, in three parts); Muhūrta-dīpaka by Nāgadeva (a short work in 9 folios, ms. in Bhau Daji collection); the Muhūrta-mārtanda, composed in śake 1493, Māgha (1572 A. D.), by Nārāyana, son of Ananta, of Tāpara village to the north of the temple of Śiva which is to the north of Devagiri, with his own commentary called Mārtaṇḍavallabhā (published by Nirn. Press, 1925); Muhūrtamālā by Raghunātha (ms in Bhau Daji collection); Muhūrta-muktāvali (incomplete ms. with only 45 verses in the same collection). Out of these, three works alone are now available in print viz. Muhūrta-darśana, Muhūrta-cintāmani and Muhūrta-mārtanda. The rest are mss. (in Bombay Asiatic Society's Library). In this section on muhūrtas reliance has been placed mainly on the three printed works along with the Jyotisaratnamālā of Śrīpati (about 1039 A. D.), the Rājamārtanda of Bhoja (ms in B. O. R. I., Poona) and the other works on Kāla. Among the works described as especially dealing with muhūrtas, the most elaborate are the Muhūrta-cintāmani (containing about 480 verses with a very exhaustive commentary) and the Muhūrtadarśana (with about 600 verses) and also a very elaborate commentary. It would not be possible to deal with all matters contained in these works. The Muhūrtamārtaṇḍa (containing 161 verses) follows a middle course. 'According to it the subjects dealt with in it are briefly as follows:—what positions and aspects of the planets, what *yogas*, what tithis, naksatras, months and conditions of the family and of the mind should be avoided in the case of *śubha* (auspicious) actions; the proper times for samskāras, such as *garbhādhāna*, *pumsavana*, *jātakarma*, piercing the infant's ear, *caula*, *upanayana*, the end of the period of Vedic study; topics connected with marriage (this takes up 55 verses i. e. a little over one-third of the entire work); times for kindling sacred domestic fire (grhyāgni); times for construction of a house and for first entrance into it; the proper times for starting on a journey or marching against an enemy king; auspicious and inauspicious śakunas (omens or prognostications), times for king's coronation, for wearing of rich clothes and ornaments and for agricultural operations, for sale and purchase of animals (such as cattle, horses), for bath with sesame and myrobalan, for finding lost articles, for constructing wells and tanks. times when Vedic study should be stopped (*anadhyāya*) for long or temporarily; the results of a lizard or chameleon falling on one's body; what planet is inauspicious or auspicious in which sign from the sign of one's birth; the punyakāla of

Saṅkrāntis. It may be mentioned that many of the provisions about auspicious aspects of planets, about upanayana and marriage, construction of and first entrance into a house, śakunas about the fall of lizards and chameleons were observed in the author's boyhood and are still observed by many, though there is gradually an increasing looseness of observance in these matters.

It should be noted that even as to *śakunas* Varāha-mihira puts forward the principle that it is the fruition of actions, good or evil, done in previous lives by men, that is manifested by śakunas for those who start on a journey or invasion.[827]

How people had become almost crazy with the idea of finding out a *muhūrta* for everything from shaving, wearing a new garment to such solemn matters as marriage is well illustrated by the provision of a muhūrta for a theft in the Muhūrta-muktāvali, viz the act of thieving succeeds when done on the naksatras Āśleṣā, Mṛgaśiras, Bharaṇī, Svātī, Dhaniṣṭhā, Citrā and Anurādhā, on a Saturday or a Tuesday and on a *riktā* tithi (4th, 9th and 14th).[828]

Before entering on a discussion about individual acts or rites, it is necessary, in order that the reader may understand the prescriptions about muhūrtas, to explain some simple details of *Jātaka*. To discuss in detail all the details of Jātaka works is much beyond the scope of this work and would necessitate the writing of a volume by itself. A middle course has to be followed Besides naksatras, their lords and their classifications, one has to bear in mind the rāśis, the planets and the *bhāvas* (houses or places) in a horoscope. For these reliance will be mainly placed on the Bṛhatsaṃhitā and Bṛhaj-jātaka of Varāhamihira, the Sārāvalī, Jyotiṣaratnamālā of Śrīpati, the Rājamārtaṇḍa, Jātakālaṅkara of Ganeśa (composed in śake 1535, 1613-4 A D.). The 27 or 28 naksatras and their presiding deities have already been enumerated above (pp. 499-504 and note 731). It has to be remembered that the devatā of a naksatra is often employed to indicate the naksatra or the tithi itself also Here the classification of naksatras will be first discussed. From a passage of the

827. अन्यजन्मान्तरकृतं पुंसां कर्म शुभाशुभम् । यत्तस्य शकुनः पाकं निवेदयति यच्छताम् ॥ बृहद्योगयात्रा 23 1.

828. सार्पेन्द्रान्तकस्वाती (सार्पेन्द्रन्तक?) धनिष्ठा शाक्रमैत्रभम् (मे?)। शनौ च भौम (मे?) रिक्तायां चौर्यकर्म प्रसिध्यति । मुहूर्तमङ्गावली verse 42 (ms. in the Bombay Asiatic Society).

Brhadāranyaka Upanisad quoted above (in note 754), it is clear that the naksatras had very early (i. e. about 1000 B.C. at least) been classified as *punya* (auspicious) and *pāpa* (inauspicious) and into male and female. The Vedāngajyotisa (Yājusa) gives a classification of naksatras into *ugra* and *krūra*.[829] The naksatras are further classified in the Brhat-samhitā (chap. 97. 6-11) into dhruva (or sthira = fixed), tīksna (or dāruna), ugra (or krūra), ksipra (or laghu), mrdu (or maitra), mrdutīksna (or sādhārana or miśra), cara (or cala).[830]

The Br. S. (97. 6-11) states that on Dhruva naksatras the coronation of a king, śānti (propitiatory rite for averting impending evil or calamity), planting of trees, foundation of a city, charitable acts, sowing seeds, and other permanent acts should be done; on tīksna naksatras succeed attempts to harm, the acquisition of mantra (mystic verse or formula), raising ghosts, arrest (of a person), beating, separating (two friends or) relationships; *ugra* naksatras are to be used for success in extermination, destruction of another's *property*, cheating, arrest, poisoning, incendiarism, striking with a weapon, killing; ksipra (or laghu) naksatras are declared as leading to success in sales, in making love, in the acquisition of knowledge, decoration, arts, crafts (such as carpentry), medicines, journeys; the mrdu naksatras are beneficial in securing friends, sexual affairs, clothes, ornaments, auspicious ceremonies (marriage, *upanayana* &c.) and singing; the mrdu-tīksna (or sādhārana) naksatras produce mixed results (on which mild or fierce acts may be done); the *cara* naksatras are beneficial in doing fleeting actions The Muhūrta-mārtanda provides that wise men engage in actions similar to the names of the groups of naksatras for attaining success. It should be noticed that some works like the Jyotisaratnamālā (III. 9) and the Muhūrta-cintāmani (II. 2-8) hold that Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday are respectively dhruva, cara, ugra, miśra, laghu, mrdu, and tīksna and that actions that are appropriate for naksatras of those groups are appropriately performed on the respective week days.[831]

The Brhaj-jātaka devotes fourteen verses for the characteristics of persons born on the 27 naksatras from Aśvinī. Two

829. उग्राण्यार्द्रा च चित्रा च विशाखा श्रवणोत्तरभद्रे । क्रूराणि तु मघा स्वाती ज्येष्ठा मूलं धनस्य च ॥ वेदाङ्गज्योतिष (याजुष verse 42).

830. For classifications of nakṣatras, vide note 558 above.

831. संज्ञानुरूपमिहाचरन्ति सुधियो कार्यं हि संसिद्धये । बृ सं II. 3.

verses are translated for sample:[832] a person born on Aśvinīs is fond of ornaments, is handsome, has a prepossessing appearance, is clever (in all things) and intelligent; one born on Bharanīs is of firm resolve, truthful, free from disease, clever and free from worry; one born on Kṛttikās is a heavy eater, fond of other's wives, impatient, famous; one born on Rohiṇī is truthful, pure, of agreeable speech, of resolute intellect and is handsome. The Rājamārtaṇḍa in verses 16–40 sets out the synonyms of 27 naksatras which include the names of the lords of the naksatras and synonyms of the lords of naksatras. The Jyotisaratnamālā, Bhujabala and M. C. 2. 22–23 divide 28 naksatras (including Abhijit) into four groups[833] of seven each, called 'andhāksa' (blind), 'mandāksa' (of dim sight), 'madhyāksa' (of medium sight) and 'svaksa' (of good sight) and state that property stolen on 'andhāksa' naksatras may be recovered quickly, stolen on 'mandāksa' naksatras after effort, stolen on 'madhyāksa' (there is no recovery but) the owner may hear that it has been taken to a distant place by the thief; stolen on 'svaksa' or 'sulocana' the owner would not recover it nor even hear about its whereabouts. The Bṛhat-saṃhitā (chap. 14) has already been referred to (on p. 530) in connection with the provinces of India governed by nine groups of naksatras (three naksatras in each group) and chapter 15 of the same (1–27) sets out what substances are governed by the 27 naksatras from Kṛttikā to Bharaṇī.[834] One verse is translated as a specimen: under Kṛttikās are white flowers, those who have consecrated the Vedic fires, those who know Vedic mantras, sūtras and bhāsyas (commentaries), officers over mines (or stores), barbers, brāhmaṇas, *purohita*, astrologers, potters.

The Bṛhat-saṃhitā (104.1–5) declares what naksatras (out of 27) form part of Time looked upon as a *puruṣa* (Person). This is

832 प्रियभूषणः सुरूप- सुभगो दक्षोऽश्विनीषु मतिमांश्च। कृतनिश्चयसत्यारुग्वद् सुचिस्तब्ध भरणीषु॥ बहुयुक्परदाररतस्तेजस्वी कृत्तिकासु विख्यातः। रोहिण्या सत्यशुचि प्रियंवदः स्थिरमति. सुरूपश्च॥ बृहज्जातक 16. 1–2 The बृहत्संहिता (chap. 160) has the same verses as बृहज्जातक 16

833. The सुजबल (pp. 253–254) arranges the 28 नक्षत्रs counting from रोहिणी into the four groups (of seven each) and calls them अन्ध, मन्दाक्ष, मध्याक्ष and सुलोचन viz रोहिणी, मृग, आर्द्रा, पुनर्वसु are अन्ध, मन्दाक्ष, मध्याक्ष, सुलोचन respectively, then पुष्य, आश्लेषा, मघा, पूर्वा are the same four अन्ध &c., and so on

834. आग्नेये सितकुसुमाहिताग्निमन्त्रज्ञसूत्रभाष्यज्ञाः। आकरिकनापितव्रिजघकारपुरोहिताब्दज्ञाः॥ बृहत्सं. 15 1.

an extension of a very old conception. The Tai Br. says: 'Prajāpati has Hasta-naksatra as his hand, Citrā as his head, Nistyā (i e Svātī) as his heart, the two stars of Visākhā as the thighs, Anurādhās as his stability (or support) This is indeed Prajāpati in the form of groups of naksatras'[835].

From the above it would be noticed that a naksatra astrology apart from the rāsi astrology had been thoroughly developed in India while Ptolemy is hardly concerned with the naksatras, but concentrates only on *rāsis*.

The twelve *rāsis* are to be found in the Zodiacal belt (or circle), each extends over $2\frac{1}{4}$ naksatras i e Mesa extends over Aśvinī, Bharanī and $\frac{1}{4}$ of Krttikā, Vrsabha extends over $\frac{3}{4}$ of Krttikā, whole of Rohinī and half of Mrgaśirsa and so on. These twelve rāsis from Mesa are identified respectively with the following limbs of the Kālapurusa[835a] viz. the head (Mesa), mouth (Vrsabha), chest, heart, stomach, waist, the abdomen (between the navel and the private parts), the private parts, the pair of thighs, the pair of knees, the two shanks, the two feet. Varāha adds that the words *rāśi*, *ksetra*, *grha*, *rksa*, *bha* and *bhavana* are used as synonyms in Jātaka The purpose of the identification of *rāsis* with the limbs of Kāla put forward by astrological works is that if a malefic planet occupies in a person's horoscope a certain rāsi, he is adversely affected in that limb of his body to which the rāśi corresponds among the limbs of Kāla, but if a beneficent planet occupies at birth a rāśi, then the person prospers as to the corresponding limb This is succintly put by the Sārāvalī (III. 5–6) The twelve rāsis with

835a कालाङ्गानि वराहाननमुरो हृत्कोहवासेत्यृतोः बस्तिर्जघनमूरुजानुयुगले जङ्घे ततोऽङ्घ्रिद्वयम्। मेषादिष्वमधर्मा नवर्क्षचरणाश्चक्रस्थिता राशयो राशिक्षेत्रगृहर्क्षमानि भवनं चेंकार्यसंमत्यया. ॥ बृहज्जातक I. 4 उत्पल on this quotes similar verses from पाटराचण, a predecessor mentioned by वराहमिहिर in बृहत्संहिता 39 1. The लघुजातक I 4 mentions the same limbs and rāśi's but in a shorter compass, the वाननपुराण (chap 5 30–42) holds that Rudra assumed the form of Kāla and identifies the rāśis from Mesa onwards with the head and other limbs of Kāla and the Mārkandeyapurāna (55 75–79) assigns rāśis to the several limbs of Nārāyana. कालनरस्यावयवान्पुरुषाणां कल्पयेन्यथक्रकाले। मदसदग्रहस्तयोगान्पुष्टान्मेषादयोऽथापि॥ सारावली III. 6.

their English and Latin equivalents and their synonyms are set out below:

English	Latin	Sanskrit	Synonyms
Ram	Aries	Mesa	Aja, chāga, *krtya*
Bull	Taurus	Vrsabha	Uksan, vrsa, go, gopati, *tāvuri* (or *Tavuru*)
Twins	Gemini	Mithuna	Yugma, nryuga, *jituma*, *jutuma* or *jitma*.
Crab	Cancer	Karka	Karkin, karkata, *kulīra*
Lion	Leo	Simha	Hari, Mrgendra, *leya*
Virgin	Virgo	Kanyā	Anganā, yuvati, pramadā, kumārī, *Pāthona* (*Pāthena*?)
Balance, Scales	Libra	Tulā	Tauli, dhata, vanij, tulādhara, *jūka*
Scorpion	Scorpio	Vrścika	Ali, kita, *kaurpya* or *kaurpi*
Archer	Sagittarius	Dhanus	Cāpa, kārmuka, dhanvin, hayānga, *Taukṣika* (or *Tauksa*)
Goat	Capricornus	Makara	Mrgāsya, mrga, *Akokera*
Water-carrier	Aquarius	Kumbha	Ghata, kumbhadhara, *hrdroga*
Fishes	Pisces	Mina	Matsya, jhasa, animisa, *Ittha* (or *Celtha*?)

The words in this list that are put in italics are mentioned in a separate verse by Varāha (Brhaj-jātaka I 8)[836]

836 क्रियताद्धरिजिनुमकुलीरलेयपाथोनजूककौर्पास्थया । लौकिक आकोकेरो ब्रह्मोक्तश्चान्त्यभ चेत्थम् ॥ बृहज्जातक 1 8. The words अन्त्यभ चेत्थम् create a difficulty. Utpala takes them to mean 'and the last sign, in this way' 'Antyabha' is a pure Sanskrit word and not Greek and there is on this interpretation no Greek word corresponding to Mina (Pisces). Another commentator Gunā-

(*Continued on next page*)

It should be noted that the list of synonyms is not exhaustive; other words with the same meaning are often employed. For example, for Simha, Mrgarāja may be used or for Mīna the word *prthuroman* may be used. The words in italics are deemed by Weber and many others as borrowings from or Sanskrit adaptations of Greek words It may be admitted that most of them bear a striking resemblance to Greek names of rāśis Pāthona should be Pāthena to correspond with the Greek word. There is no reason why kulīra should be regarded as a Greek word Kern (preface to Br S. p. 29) thinks that it is a pure Sanskrit word There is no Greek word corresponding to Kulīra in Ptolemy. The word Karka or Karkin appears to mean 'white' and occurs as early as in Atharvaveda IV 38. 6-7 All that the Bṛhaj-jātāka (I 8) means is that there are other words like *kriya* used for the twelve rāśis in other works Varāhamihira frequently refers to the views of the Yavanas and sometimes differs from them. It has been shown by me in my paper on 'Yavaneśvara and Utpala' (in J of Bombay Asiatic Society, vol. 30, pp. 1–8) that there is a Sanskrit work on astrology called Yavana-jātaka of about 4000 verses composed by a king of the Yavanas called Sphujidhvaja and another Vrddhayavanajātaka also in several thousand verses by Mīnarāja who styles himself the overlord of Yavanas I cannot agree with Prof Sen-Gupta ('Ancient Indian Chronology' p 99) that words like Mesa and Vrsabha in verses like Rg I. 51. 1 (abhi tyam mesam) refer to rāśis, when he himself had to concede that he could not find the other ten in the Rg

---

(*Continued from last page*)

kara says that the last rāśi is called 'cettha' (vide Subrahmanya Sastri's translation of Brhajjātaka p 8) The T S S. edition of बृहज्जातक has 'द्वयोगश्चेर्थसि क्रमशः' i e. the last rāśi is called 'irthasi'. The सुहृत्तदर्शन has इत्थसि 'संज्ञाभि क्रियलेपजूकजतुमा. कौपिः कुलीरस्तथा द्वयोगेत्थसितौक्षिकाश्च कथिता' पाथोनकस्ताक्षुक । I 9 Ptolemy employs a Greek word for Pisces (Loeb Classical Library pp. 52, 314, 328 &c.), to which 'ittha' or 'ikthasi' or 'irthasi' would correspond rather than 'cettha'. The Sārāvali (III 7) reads संज्ञास्तु जूककौपिकतौक्षाकोकेरद्वदयरोगान्त्या That shows that it had no Greek word for 'mīna' before it It may be noted that the Sārāvali expressly says that as Varāha's work is brief it (Sārāvali) took essential matters from the extensive śāstras composed by Yavanaṇarendra and others I have not been able to find the word *ittha* or a similar Sanskrit adaptation for Mīna in the Brhajjātaka Vide Indische Studien vol II pp, 254–261 and JRAS for 1893 p 747 for the Greek and Latin equivalents of the Sanskrit words for the signs of the zodiac, planets &c,

The appearance of the rāśis is briefly described by the Bṛhajjātaka[837] I. 5 and explained by Utpala as follows: (The sign Mīna i e Pisces) appears as two fishes (each facing the tail of the other), Kumbha appears as a man carrying an empty jar placed on his shoulder, the sign of Gemini is represented as a man carrying a mace and a woman holding a lute, the sign of Sagittarius is a man with a bow whose legs are like those of a horse, the sign Capricorn is a crocodile with the face of a deer, sign of Libra is a person holding scales, the sign Virgo is represented by a maiden in a boat with an ear of corn in one hand and fire in the other; the remaining signs are similar (in form) to the objects indicated by their names and all signs reside in places appropriate to their names For more detailed descriptions, vide the twelve verses quoted from Yavaneśvara by Utpala which I have quoted and translated in my paper in the Journal of the Bombay Asiatic Society vol. 30 parts 1 and 2 pp 1–7 and which are found in the Yavana-jātaka of Sphujidhvaja (a palm-leaf ms of which exists in the Nepal Durbar Library) and in the Vṛddhayavanajātaka of Mīnarāja Those verses also name the special objects and places governed by the different rāśis Several verses of Kāśyapa are quoted by Utpala on Br. S 40 that deal with the materials or things that are under the influence of the several rāśis For example, Mesa is the lord of garments, woollens, cloth made of the hair of a young goat, of *Masūra* pulse, wheat, resin, barley, gold and plants that grow on dry land.[838] The Vāmanapurāna[838a] (chap 5 45–60) describes the appearance of the rāśis and the places and objects they reside in or dominate and the verses closely resemble the wording employed in the two Yavanajātakas of Sphujidhvaja and Mīnarāja Some verses are quoted below by way of illustration From Varāha's description it appears that Mesa, Vṛsabha, Karkata, Simha, Vṛścika, Makara and Mīna are figures of animals (either four-footed or

837 मत्स्यौ घटी भूमिसुतं सगदं सवीणं चापी नरोऽश्वजघनो मकरो मृगास्य । तौली ससस्यदहना खगा च कन्या त्रयोपः स्वनामसदृशा स्वचराश्च सर्वे ॥ बृहज्जातक I 5. some read खचराश्च सर्वे (all move in the sky) But this appears redundant and meaningless.

insects) and the remaining five resemble human beings with special characteristics in each case These rāśi names have more or less the same meanings in Babylonia,[839] in Europe including Greece and in India But it should not be supposed that everywhere the several groups of stars were imagined to be identical with the figures of the same animals or of human beings. In China for instance, the twelve rāśis are rat, ox, tiger, hare, dragon, serpent, horse, sheep, monkey, hen, dog and pig (Encyclopaedia Americana, vol. 29 under the word 'zodiac' and New Funk and Wagnall's Encyclopaedia vol 36 under 'Zodiac')[839a]. It is further stated that these are still found in some parts of Asia, in Japan and also among the remains of the Aztec race in America There are many who deny that except for a few signs (like the Scorpion) there is hardly any very striking similarity between the twelve groups of constellations called Aries &c. and the natural appearance of the objects denoted by the twelve names[840] The origin of the names assigned to Zodiacal signs is unknown The zodiacal signs named Mesa, Vrsabha &. are purely imaginary, are mere subjective configurations of stars which appear to be in one plane and which appear to certain persons to possess somehow the outline of a scorpion or a lion which are, as modern astronomy tells us, situated at enormous distances (light years as they are called) from each other. The same constellation is often given different names; e g. the constellation called Great Bear was called by Thales 'the wain' (waggon drawn by horses) The twelve Zodiacal signs are clearly absent from the sacred astronomy of Egypt[841] and the Egyptians knew nothing of the Zodiac before the

839. Vide Campbell Thompson's Intro to 'Reports of the Magicians &c.' for a table of late Babylonian, Assyrian and modern English names of signs (pp XXIII–XXIV) and Expository Times, vol 30 (for 1918) pp 164–168 on 'Assyro-Babylonian astrologers and their lore' by T. G Pinches. On p.167 the latter says that Europe is indebted to the Babylonians for the names of the signs of the Zodiac except Crab and Archer and sets out the Babylonian names with their meanings and modern names (*Ram* &c.) These two tables do not agree Babylonians called Capricorn goat-fish. Bouché—Leclercq (on p 57 note 1) gives a list of the twelve Chaldean zodiacal signs, which differs from both the above.

841 'Legacy of Egypt' (ed by Glanville) p 162, 'The names of the stars' by E. J. Webb p 96.

Alexandrian age and very few Zodiacs are older than the Roman times. Since Assyriologists began to reveal the astronomical knowledge in the valley of the Euphrates, the Babylonian origin of the Zodiac has been taken for granted by almost all scholars[842]. The dissenting voice is that of E. J. Webb in 'Names of stars'[843] who very strenuously argues against the Babylonian origin of the Zodiacal signs and holds that the Zodiac as we know it is a Greek invention and that Cleostratus who according to Pliny was concerned in forming it lived about 520 B. C. In spite of the vehemence of Webb's arguments, in my humble opinion, he is far from convincing and for the present at least the Babylonian origin of the Zodiacal signs has to be accepted. The passage of Pliny on which Webb relies is differently understood by Prof. J. K. Fotheringham.[844] The latest work of Sarton on 'History of Science' (1953) holds that the Zodiac had been distinguished by Babylonian astronomers a thousand years before Cleostratus and all that Cleostratus probably did was to divide those constellations into twelve equal lengths of the ecliptic i. e. the twelve signs of the Zodiac. A somewhat amusing argument has been advanced by Hickey[845] that the fact that there are in the sky no animals (figures) suggestive of Egypt or India such as the hippopotamus and the elephant seems to rule out those countries as sources. Is there any logical necessity that certain animals must be introduced in a system of Zodiacal signs if that system originated in a certain country that may be the home of dozens of wild and tame animals? Are all the principal animals of Mesopotamia or of Greece included in the seven animals that figure as signs, if one of the above two was the origin

842. Vide Bouché-Leclercq. p. 53 ('L' 'Astrologie Grecque'), p. XVI of the Intro. to Heath's 'Greek Astronomy'; Alexander Moret on 'The Nile and Egyptian civilization' (1927) p. 453 (where he says that the Greek Zodiac was itself derived from Babylonian astronomy).

843. Vide pp. 163–175 and p. 189 of 'Names of Stars' by E. J. Webb.

844. Vide Journal of Hellenistic Studies, vol. 39 pp. 164–184 and vol. 45 pp. 78–83 (both by Fotheringham), *ibid* vol. 41 (pp. 70–85) 'Cleostratus Redivivus' by E. J. Webb (who himself remarks on p. 70 that the question when and by whom our constellations were invented is never likely to find its solution) and *ibid* vol. 48 pp. 54–63 on 'Cleostratus and his work' by E. J. Webb. Vide Prof. Neugebauer in 'Exact Sciences in Antiquity' p. 67 (note) about the history of Zodiacal and planetary symbols being virtually unknown. But in the Journal of Near Eastern Studies, vol. IV at p. 28 Prof. Neugebauer asserts that the predominant influence of Babylonian concepts on the grouping of stars into pictures must be maintained.

845. Vide 'Introducing the universe' p. 103 by J. C. Hickey.

of the present Zodiacal signs? All the seven animals in the Zodiac are found in abundance in India even now, while some of them may not be found in the present day Greece or Babylonia. At present I am only concerned to say that out of the three ancient lands, viz Egypt, Mesopotamia and Greece, Mesopotamia has the greatest claims to be regarded as the source of the Zodiacal signs. The case of India will be dealt with a little later on

The astrological *rāśis* are[846] variously classified as male and female, *cara* (movable) and *sthira* (fixed or lasting) and

Rāśi	Lord of	Male or Female	Cara or Sthira	dinabala or nisābala	saumya or krūra	prsthodaya or śirsodaya
Mesa	east	male	cara	n.	krūra	p.
Vrsabha	south	female	sthira	n	saumya	p.
Mithuna	west	male	dvisvabhāva	n.	krūra	ś.
Karka	north	female	cara	n.	saumya	p.
Simha	east	male	sthira	d.	krūra	ś.
Kanyā	south	female	dvisvabhāva	d.	Saumya	ś.
Tulā	west	male	cara	d.	krūra	ś.
Vrścika	north	female	sthira	d.	saumya	ś.
Dhanus	east	male	dvisvabhāva	n	krūra	p.
Makara	south	female	cara	n.	saumya	p.
Kumbha	west	male	sthira	d.	krūra	ś.
Mina	north	female	dvisvabhāva	d.	saumya	both p. and ś.

846 गोजाश्विकर्किमिथुना· समृगा निशारूया· पृष्ठोदया विमिथुना कथितास्त एव शीर्षोदया दिनबलाश्च भवन्ति शेषा लग्नं समेत्युभयत. पृथुरोमयुग्मम्॥ क्रूरः सौम्य युक्तवनिते ते चरागद्विदेहा प्रागादीशा क्रियवृषसृयुक्कर्कटा सत्रिकोणा। बृहज्जातक I 10–11 Separate चरागद्विदेहा· as चर + अग (अचल or स्थिर) + द्विदेह (= द्विस्वभाव) त्रिकोण is the 5th or 9th rāśi from a specified rāśi (Brhaj-jātaka I 11). There is another meaning of त्रिकोण (which उत्पल calls मूल-त्रिकोण) in बृहज्जातक I 14 viz, सिंह, वृषभ, मेष, कन्या, धनु, तौलि, कुम्भ are त्रिकोणs of the Sun, Moon, Mars, Mercury, Jupiter, Venus and Saturn

dvisvabhāva (of both characters), as *saumya* (mild) and *krūra* (fierce or malignant), as *dinabala* (powerful by day), *niśābala* (powerful by night), as *pṛṣṭhodaya* (rising from the hind part), *śīrsodaya* (rising by their head first) or *ubhayodaya*, and as lords of the four main directions (east &c.) The above table will show at a glance these classifications, in which n. stands for niśābala, d. for dinabala, p. for pṛsthodaya and ś. for śīrsodaya.

The Brhajjātaka compresses these details in I. 10–11 and Utpala explains the purpose of some of these technical terms. Yātrā (invasion) undertaken on śīrsodaya rāśis yields the desired result but if undertaken on prsthodaya rāśis there is failure and one's army is routed. Those born on krūra signs are of cruel nature and those born on saumya signs are mild by nature, while those born on male signs are energetic and those born on female signs are mild. Those born on *cara* signs are unsteady by nature, those born on *sthira* signs are of a fixed nature and those born on dvisvabhāva signs are of mixed character. The knowledge of the signs as lords of quarters is useful in finding out the direction where a person who stole something on a particular sign could be found or the stolen article could be found. Ptolemy's Tetrabiblos I. 11 speaks of Taurus, Leo, Scorpio and Aquarius as solid signs (*sthira*) and Gemini, Virgo[1] Sagittarius, Pisces as bi-corporeal (*dvidcha* or *dvisvabhāva*), and in I. 12 there is agreement with Brhajjātaka as to the masculine and feminine signs but there is disagreement as to *diurnal* (dinabala) and *nocturnal* signs (niśābala), since Ptolemy holds that Aries and other signs are alternately diurnal or nocturnal, while Varāha holds Aries and the next three and also Sagittarius and Capricornus as nocturnal and the rest diurnal. It does not appear that the Brhajjātaka knows of the commanding and obeying signs (Tetrabiblos I. 14) and of signs which behold each other or of disjunct signs (Tetrabiblos I 15 and 16) The Br. J. (I. 20) and Laghujātaka I. 6 assign the following colours to the twelve rāśis from Mesa onwards viz. red, white, green (like a parrot's body), dark-red (pink), whitish like smoke, speckled, dark, golden, yellowish, variegated, deep brown (like ichneumon), white. There is hardly anything corresponding to this in the Tetrabiblos. The rāśis are also divided into four classes viz. anthropomorphic (Mithuna, Kanyā, Tulā, Dhanus forepart, Kumbha), quadruped (Mesa, Vrsa, Simha, Dhanus latter portion, Makara forepart), aquatic (Karkata, Mina, Makara

latter part), insect (Scorpion). Vide Tetrabiblos IV. 4 pp. 389 and 391 for slightly varying enumeration

Br J. (chap 17. 1–12) sets out the characteristics of persons born when the Moon was in Mesa and the following rāśis and remarks at the end (in verse 13) that the results described will come out fully if the moon, the rāśi it occupies and the lord of that rāśi are powerful. In Br. J. I 19 it is said that two-footed rāśis (mithuna, kanyā, tulā, kumbha and forepart of dhanus) are powerful by day if they be in *kendra*; four-footed rāśis (mesa, vrsa, simha, makara forepart and dhanus latter part) are powerful at night in kendra position and the rest i. e. watery signs and insect signs (kulīra, vrścika, mīna and latter part of makara) are powerful at twilight, when in kendra position. Br. J 18. 20 provides that similar results (as in chap 17) follow if a person is born when the *lagna* at his birth is mesa or any one of the other rāśis.

Planets, their relations to the rāśis and their conjoint influence will now be briefly indicated. We saw above (pp. 493–495) that in the Vedic Samhitās and Brāhmanas express references to planets other than Jupiter are almost absent, that in some Vedic verses five planets and Venus (as Vena) appear to be referred to. Svarbhānu, the son of an asura, is said to have struck the sun with darkness (i e. caused an eclipse) in Rg V. 40. 5, 6, 8, 9. In the Chāndogya Upanisad the soul that has acquired true knowledge is said to shake off the body after casting off all evil like a horse (that casts off dust by) shaking his hair (mane and tail) or like the moon becoming free from the mouth of Rāhu.[847] The Maitrāyanī Upanisad mentions Śanī, Rāhu (ascending node) and Ketu (descending node)[848] But hardly anything is said about the astrological significance of planets in the ancient Vedic Literature In the Mahābhārata there are plenty of references to the evil influence of planets, but that is restricted to naksatras. Both Rāhu and Ketu are said in Karnaparva to rise in the sky for (i. e. portending) the destruction of the world[849] Kautilya offers the curious information that a foreknowledge of rainfall can be had from the position, the motion and the *garbhādhāna* of Jupiter, from the rising, setting and motion of Venus and from the natural and unnatural

847 अश्व इव रोमाणि विधूय पाप चन्द्र इव राहोर्मुखात्प्रमुच्य धूत्वा शरीरमकृत कृतात्मा ब्रह्मलोकमभिसम्भवामि। छान्दोग्योप VIII 13

aspects of the sun and that from the sun the sprouting of the seed (can be predicted), from Jupiter the formation of abundant sheaves of corn when the seeds are sown and from the (movements) of Venus rainfall (can be predicted)[850] It will be seen from the above that general or universal (not individual or horoscopic) astrology like the reports made by royal priests in Mesopotamia was prevalent in India many centuries before Christ The Brhajjātaka (II 2-3) enumerates the nine planets, Sun, Moon, Mercury, Mars, Saturn, Jupiter, Venus, Rāhu and Ketu and furnishes some synonyms of all these.

Observations of planets by the Babylonians go back to 2nd millennium B C. Venus was the first to be studied Tables about Venus based on observations are found from 1921–1901[851] B C., Jupiter and Mars were also observed. Jupiter was held to be normally favourable when he shone brightly or followed the moon, while Mars was the planet of ill-luck, but, if Mars shone weakly or disappeared, its evil influence disappeared. Saturn as its name indicates ('firm standing one') was regarded mostly a planet of good luck Various favourable prognostications were made about a child, according as the planets like the Moon, Venus or Jupiter were rising or unfavourable prognostications were made if Mars was rising or if Jupiter or Venus were setting[852] Each planet received a variety of names in the astronomical texts of Babylonia The teaching that every planet has its exaltation i. e the strongest pitch of its might and influence when in a particular sign goes back to ancient Babylonia.[853] The arrangements of the order of planets differed at different times. Planet comes from a Greek word meaning 'a wanderer' and the word was applied to the planets because as compared with the stars they appeared to wander in different ways and at

850. तस्योपलक्षिर्बृहस्पते स्थानगमनगर्भाधानेभ्यः शुक्रोदयास्तनयचारेभ्य सूर्यस्य प्रकृतिविकृताश्च । सूर्याद् बीजसिद्धिः । बृहस्पतेः सस्यानां स्तम्भकरिता । शुक्राद् वृष्टिरिति ॥ अर्थशास्त्र II 24th अध्याय p. 116 (Sham shastri's ed of 1919) For गर्भाधान as to rainfall, vide बृहत्संहिता chapter 22 Aratus (270 B C) and Theophrastus (322 B C.) say that the disappearance of the constellation *corresponding* to our Pusya was reckoned by the ancients as a sure presage of rain Vide Dr. Fleet in J. R A. S for 1911 at p 516

851. Vide Heath's 'Greek Astronomy', Introduction pp XVII–XVIII, Meissner's 'Babylonien and Assyrien' (1925) vol II pp 254–256, Sarton in 'A history of Science' p. 77.

852. M. Jastrow in 'the Religion of Babylonia and Assyria' (1898) p 460.

853. Meissner, ibid, vol II p. 406.

different times[854] In modern times there are three more planets, viz. Uranus, Neptune and Pluto discovered respectively in 1781, 1846 and 1930 A. D[855] Bouché Leclercq mentions that modern astrologers asserted that Chaldeans saw Uranus and Neptune and three other planets (Juno, Vulcan and Pluto), when they had good eyes (p 573 note 2 of 'L' Astrologie Grecque).

The Br. J. (II. 2–3), Sārāvalī (IV. 10–11) and Rājamārtaṇḍa (verses 8–15) set out the various names for the sun, the moon and the other seven planets They are specified in the note[856]

854. C. V Maclean on 'Babylonian Astrology and its relation to the Old Testament' (United Church Publishing House, Toronto) p 27, Prof Neugebauer in E. S A p 162 (for arrangements of planets in cuneiform texts in Seleucid period and in Greek horoscopes). In the Seleucid period the standard arrangement was Jupiter—Venus—Mercury—Saturn—Mars. Ordinary arrangement in Greek horoscopes is Sun, Moon, Saturn, Jupiter, Mars, Venus, Mercury. For the planetary week the arrangement in Greece is said to be Saturn–Jupiter–Mars–Sun–Venus–Mercury–Moon On p 163 Prof Neugebauer thinks that Hindu arrangement of planets is obviously Greek in origin for two reasons, as it is based on the arrangement according to distance from the earth and also on a division of days into 24 hours, which is not Babylonian but Hellenistic and ultimately of Egyptian origin In this latter he can be said to be wrong, as a similar arrangement of week days can be arrived at by relying on the 60 ghaṭikā system of India. We saw above that *horā* in Indian astrology has three meanings, viz Jātaka, *lagna* and half a sign, but the very early Sanskrit astrological texts at least do not appear to employ the word horā in the sense of 'hour' or $\frac{1}{24}$th part of the whole day or $\frac{1}{12}$th part of the day Any one who asserts that the arrangement of week days is copied from the Greeks must prove two things, (1) the definite time when the Greeks hit upon the particular arrangement of planets for purposes of week-days and (2) the borrowing people had definitely not arrived at the same arrangement before the Greeks Prof Neugebauer, so far as I can see, offers hardly any evidence on any of these two matters beyond mere assertions and conjectures. It has further to be remembered that Alberuni (Sachau, vol. I. p. 343) states that nobody in India uses the hours except the astrologers, for they speak of the dominants of the hours The 30 muhūrtas of *ahorātra* are much older than the Śatapatha Br. and it was easy to divide a muhūrta into two nāḍīs or ghaṭikās as the Arthaśāstra does (I 19 p. 37 'Nālikābhiraharaṣṭadhā rātrim ca vibhajet) and Purāṇas like Viṣṇu VI. 3. 6–9 do. There is hardly anything in the vast Sanskrit Literature (of ancient or medieval times) to show that common people or writers (not being astronomers or astrologers) employed the method of 24 hours of the day.

855. Vide Prof. Van Den Bergh in 'Universe in space and time' p 177 and D S. Evans in 'Frontiers of astronomy' p 41 for tables and data about planets from Mercury to Pluto as regards distance from the Sun, period of revolution, diameter, mass &c.

856. The sun : सूर्य, रवि, भानु, इन, आदित्य, सवितृ, भास्कर, अर्क, दिवाकर, तिग्मांशु, तपन, सहस्रांशु, प्रभाकर, उष्णकर, उष्णांशु, मार्तण्ड, दिनमणि, दिनकृत्, हेलि.

(*Continued on next page*)

below and the names underlined are deemed by Western writers to have been derived from Greek; but it should be noted that no Greek name for the moon occurs in these or other works and I am not convinced that Jīva is a Greek word or adaptation of a Greek word The word Jīva occurs in the Ṛgveda itself in many places (as in Ṛg. I 164 30, X 18 37) and means 'living being, an individual' and in Chāndogya Upaniṣad VI, 3 2 it means 'individual soul'. When Bṛhaspati came to be regarded as the most prominent of planets and was said to preside over knowledge and happiness (as in Br. J. II 1 'Jīvo jñāna-sukham') he came to be regarded as the very life of beings and was called Jīva The Sārāvalī (X. 116) says that Bṛhaspati is the life of men (Bṛhaspatir-nṛnām jīvaḥ). In Bhujabala it is said 'what will all the planets *do to* him in whose horoscope Jupiter is in *kendra* position. A herd of wild elephants is killed by a single lion.'[857] The Br. J. and Sārāvalī provide that further synonyms may be derived from popular usage.

In the following some characteristics of the planets (based on Br. J II. 5–7) are brought together, viz. the colour ruled by each, the lords of each, the direction, element, Veda and class (brāhmaṇa, kṣatriya &c) dominated by each and whether they are beneficent or malefic.

(*Continued from last page*)

2 The moon — विधु, इन्दु, चन्द्र, चन्द्रमस्, शीतांशु, सोम, मृगाङ्क, निशाकर, शीतरश्मि, निशानाथ, रोहिणीपिय, शशिन्, हिमांशु, शीतांशु, नक्षत्रपति

3 Mars — अङ्गारक, कुज, भौम, भूमिज, महीसुत, आवनेय, लोहिताङ्ग, क्षितिसुत, क्रूराक्ष, माहेय, रुधिर, वक्र, आर.

4 Mercury — बुध, ज्ञ, विद्, बोधन, विबुध, कुमार, राजपुत्र, सौम्य, चन्द्रसुत, तारापुत्र, रौहिणेय, हिमरश्मिज, हिम्न (*or* हिम्मा)

5 Jupiter — गुरु, इज्य, ईड्य, आङ्गिरस्, सुरगुरु, सुरमन्त्रिन्, सुराचार्य, बृहस्पति, वाक्पति, गिरीश, धिषण, सूरि, जीव

6 Venus — शुक्र, भृगु, भृगुसुत, सित, भार्गव, कवि, उशनस्, दैत्यमन्त्रिन्, दानवपूजित, असुरगुरु, काव्य, आस्फुजित्

7 Saturn — शनैश्चर, सौरि, सूर्यपुत्र, मन्द, असित, अर्कनन्दन, आर्कि, भास्करि, विनेशात्मज, सहस्राक्षज, पाताङ्गि, यम, शनि, छायासुत, कोण

8 Rāhu — राहु, तम., असु, असुर, स्वर्भानु, सिंहिकासुत, दानव, मुरारि, भुजङ्गम, विधुन्तुद, अमृतचौर, उपप्लव

9 Ketu — केतु, शिखिन्, ब्रह्मसुत, धूम्रवर्ण Vide Campbell Thompson's 'Reports of the magicians &c' vol II Introduction p XXIII for the Babylonian and Assyrian names for Moon (Sin), Sun (Shamash) and so on The sun is called Helu in Devīpurāṇa quoted by Hemādri on vratas vol II p. 434 and frequently in Bhaviṣyapurāṇa as in I 104 2 'सप्तम्यां शुक्लपक्षे तु फाल्गुनस्यैह मानवः। जपन्हेलीति देवस्य नाम भक्त्या पुनः पुनः॥'

857 किं कुर्वन्ति ग्रहा सर्वे यस्य केन्द्रे बृहस्पतिः। मत्तवारणसङ्घात सिंहेनैकेन हन्यते॥ भुजबल p 280 verse 1262.

planet	colour dominated by	by whom ruled	direction	element ruled by	Veda	class	beneficent or malefic

858. उत्पल on Br J II 5 explains 'कृष्णाष्टम्यर्धाच्छुक्लाष्टम्यर्धं यावत् क्षीणश्चन्द्रः । "शुक्लपक्षाष्टम्यर्धात् कृष्णपक्षाष्टम्यर्धं यावत् चन्द्रः सौम्यः । बुधः पापयुतः सोम्य एव'. Tetrabiblos I. 5 regards Jupiter, Venus and Moon as beneficent and places the Sun on the same footing as Mercury. Utpala notes that Yavaneśvara holds that Moon is never malefic and quotes two verses from him, which are found in the Nepal Durbar ms. of Yavanajātaka of Sphujidhvaja,

In the Yogayātrā VI. 1 a distinction is made between the gods that rule the eight directions and the planets that rule them. Indra, Agni, Yama, Nirrti, Varuna, Vāyu, Yaksa (Kubera) and Śiva are the lords of the eight directions from East to North-East, while the same directions are governed by planets as in the above table.

The purpose for these classifications is explained as follows: As regards colours ruled by planets, they are useful in indicating the colour of the thing lost by or stolen from a man and the colour of the flowers with which the planets are to be worshipped, the lords of the planets are to be worshipped along with the planets in *grahapūjā*; the direction in which a king should march on an invasion is indicated by planets that rule the directions; according as beneficent or malefic planets are powerful in the horoscope, the character of the person concerned is indicated as good or bad. The Br. J. II. 7 further provides that the Moon, the Sun and Jupiter are lords of *sattva-guna*, Mercury and Venus of *rajo-guna*, Mars and saturn of *tamoguna*. Utpala points out that Varāha differs from Yavaneśvara, who regards the Sun, Mars and Jupiter as Sāttvika, the Moon and Venus as full of rajoguna, Saturn as having tamoguna and Mercury taking on the character of the planet with which it is in conjunction.[858a] Rāhu is the ascending node or the point where the orbit of the moon intersects the ecliptic in passing northwards. Br. J. (II 8–11) and Laghujātaka II 13–19 describe the form and appearance of the planets from the Sun to Saturn, giving full rein to association of ideas, imagination and to personification of them. For illustration, I translate one verse (10) 'Jupiter[859] has a large body, his hair and eyes are brownish in colour, he has eminent intellect and has a phlegmatic constitution; Venus is given to pleasures, has handsome body and pretty eyes, has wind and phlegm in his constitution and black but curling hair on his head.' Another table based on Br. J. II. 11, 12, 14 and Sārāvalī IV 15–16 about the parts of the human body

858a अत्राचार्यस्य यवनेश्वरेण सह मतभेद । तेन मौम सात्त्विक उक्त । तथा च तद्वाक्यम् । सत्त्वाधिका भास्करभौमजीवा भृग्वात्मजो राजसिक शशी च । ज्ञनैश्चरो तामसिको बुधस्तु सयोगतोऽस्माद्भवते विशेषान् ॥ उत्पल on II 7. The verse occurs on folio 6 of यवनजातक (Nepal ms.)

859 बृहत्तनु पिङ्गलमूर्धजेक्षणो बृहस्पति श्रेष्ठमति कफात्मक । भृशु सुखी कान्तवः सुलोचन. कफानिलात्मासितवक्रमूर्धज. ॥ बृहज्जातक II. 10, compare the similar descriptions in बृहत्स 8 53.

governed by the planets,[860] about their *habitat* (*sthāna*), about the kinds of cloth they govern, about the metals, precious stones and the flavours they rule is given below.

Planet	bodily part	habitat	cloth	metals & jewels	*rasa* (flavour)
Sun	bones	temple	coarse	copper	pungent
Moon	blood	watery place	cloth fresh from loom	jewels	salt
Mars	marrow	fire-place	burnt in a part	gold	bitter
Mercury	skin	play-ground	wet	bronze	mixed (all six together)
Jupiter	fat	treasury	neither new nor much worn	silver	sweet
Venus	semen	bedroom	strong	pearl	sour
Saturn	muscles	dust-bole	tattered	iron	astringent

It was said that if Jupiter was in his own house (i. e. Dhanus or Mīna), then Jupiter also ruled over gold.[861] The object of assigning these was practical, viz the astrologer could judge of the place of birth if the planet was powerful or of the place of the thief or, if a question were put about the food which one invited to a dinner may be served with, the powerful planet would suggest the kind of food.

The Br. J. (II. 5) states that the Sun, Mars and Jupiter are masculine, the Moon and Venus feminine, while Mercury and Saturn are neuter or common (*napuṁsaka*). Here Tetrabiblos differs (I. 6), as it regards Saturn as masculine. Acc. to Br. J. II 21 the Moon, Mars and Saturn are nocturnal (powerful at night), the Sun, Jupiter and Venus are diurnal (powerful by day) and Mercury is common (both diurnal and nocturnal). The Tetrabiblos differs (I. 7) by making Venus nocturnal and Saturn diurnal

860. Vide Tetrabiblos III 12 pp 319 and 321 for parts of the human body governed by planets, which description differs from that of the Br J.

861 अर्कादि ताम्रमणिहेमयुक्तिरजतानि नौक्तिकं लोहम्। वक्तव्यं यत्नवद्भिः स्वस्थाने हेम जीवेपि॥ लघुजातक quoted by उत्पल on बृहज्जा II 12 The relation between planets and the chief metals was, it seems, based on colour similarity. The theory that different planets governed different areas and limbs of the body led to the influence of astrology on medicine.

Certain rāśis are declared to be the houses (svagṛha) of planets and certain other rāśis as their ucca (exaltation) and certain parts or degrees of the ucca are declared to be paramocca; the 7th rāśi from the ucca is said to be nica i e depressed and certain parts (or degrees) of the latter are said to be paramanīca. The Sun and the Moon have each only one rāśi as svagṛha, while the other five planets have two each The following diagram will indicate all this at a glance

Planet	Svagṛha	sign of Exaltation	sign of Depression
Sun	Simha	Mesa 10	Tulā 10
Moon	Karkata	Vrsabha 3	Vṛścika 3
Mars	Mesa and Vrscika	Makara 28	Karkata 28
Mercury	Mithuna and Kanyā	Kanyā 15	Mīna 15
Jupiter	Dhanus and Mīna	Karkata 5	Makara 5
Venus	Vrsabha and Tulā	Mīna 27	Kanyā 27
Saturn	Makara and Kumbha	Tulā 20	Mesa 20

The figures under signs of exaltation and depression are the *amsas* (degrees) respectively of *paramocca* and *paramanīca*. The explanation offered by Yavanajātaka of Sphujidhvaja and the Vrddhayavana-jātaka of Mīnarāja is that the sign of Leo was assigned to the Sun as his house because it is the most powerful sign and Cancer (a watery sign) was assigned to the Moon, and the Sun and the Moon each gave one sign out of the remaining to the other five planets viz Kanyā, Tulā, Vrscika, Dhanus and Makara were given by the Sun to Mercury, Venus, Mars, Jupiter and Saturn (arranged according to distance) and the Moon gave to the same five planets one each of the rāśis of Mithuna, Vrsabha, Mesa, Mīna and Kumbha (vide my paper on 'Yavaneśvara and Utpala' in J B B. R. A. S. vol. 30 on p. 5

for the verses of Mīnaraja and p 7 for translation) Tetrabiblos I. 17 practically gives a similar explanation about houses (svagṛhas) and I 19 agrees with Br. J I 13 about the exaltation and depression signs. Ptolemy does not give the degrees (of paramocca and paramanīca[862]).

That rāśi that is occupied by its own lord or has an aspect (dṛsti) of its lord or is occupied by Mercury or Jupiter or has an aspect with them is powerful[863] if it be not occupied by any one or more of the remaining planets or has no aspect with any one of the rest There is a further provision that Scorpion if it is in the 7th house is powerful, the human signs (Mithuna, Kanyā, Tulā, the forepart of Dhanus and Kumbha) are powerful in the *lagna*, the watery signs (Karkata, Mīna, latter half of Makara) are powerful if they occupy the 4th house and the quadrupeds (Mesa, Vṛsa, Simha, latter half of Dhanus, and the forepart of Makara) are powerful in the 10th house (Br J. I. 17.)

The natural powerfulness of planets is in the following order: Saturn, Mars, Mercury, Jupiter, Venus, the Moon, the Sun, each succeeding one is more powerful than each preceding one; if the power of any two or more is equal in other respects, then one has to take into consideration this natural powerfulness for determining which is more powerful[864]

The astrological houses in a horoscope are twelve and each is expressed by various synonyms, many of which indicate what particular matters are to be judged from the state of that house. They are enumerated in Br. J. I. 15–19, Laghujātaka I 15–19, Sārāvalī III. 26–33

862 सूर्यस्य भागे दशमे तृतीये सोमस्य जीवस्य तु पञ्चमे स्यात्। सौरस्य विंशे स्वधिसप्तके च विद्याद् भृगोः पञ्चदशे बुधस्य॥ सौमस्य विंशेऽस्तुते (परोक्षम्)। विंशाहते स्वोच्चगृहे निवेशात्। स्वोच्चात्तु जामित्रमुशन्ति नीचं विंशाहतो यत्र समानसख्यः। folio 4 of palm-leaf Nepal ms of यवनजातक of स्फुजिध्वज q. by उत्पल with slight variations as from यवनेश्वर on बृहज्जा 1 13 Vide सारावली III 35–36 for उच्च, परमोच्च, नीच and परमनीच

863. अधिपयुतो दृष्टो वा बुधजीवयुतेक्षितश्च यो राशिः। स भवति बलवान् यदि शुक्रो दृष्टोपि वा क्षैर्वे॥ लघुजातक I 14, vide also बृहज्जातक I 19

864 मन्दार-सौम्य-वाग्पति-सितचन्द्रार्का यथोत्तर बलिन। नैसर्गिकबलमेतद् बल-साम्येऽस्मादधिकाचिन्ता॥ लघुजातक II. 7, quoted by उत्पल on बृहज्जा II 21, the last quarter of which is 'शनिकुजबुधगुरुशुक्रसाद्या बुद्धितो धैर्यवन्तः', where शनिकुजबुधगुरुशुक्रस stand for शनि, कुधिर (अङ्गारक), बुध, गुरु, शुक्र, चन्द्र and सवितृ

1st house —*horā*, tanu, kalpa, śakti, mūrti, lagna, deha, anga, udaya, vapus, ādya, vilagna.

2nd „ —dhana, sva, kutumba, artha, kośa

3rd „ —sahottha, vikrama, paurusa, sahaja, *duścikya.*

4th „ —bandhu, grha, suhrt, pātāla, *hibuka*, veśma, sukha, caturasra, ambu, jala, ambā, yāna, vāhana

5th „ —suta, dhī, putra, pratibhā, vidyā, vāk-sthāna, *trikona*

6th „ —ari, ripu, ksata, vrana

7th „ —jāyā, *jāmitra*, *dyūna*, *dyūta*, patnī, strī, cittottha, astabhavana, kāma, smara, madana.

8th „ —marana, randhra, mrtyu, vināśa, caturasra, chidra, vivara, laya, yāmya

9th „ —śubha, guru, dharma, punya, tritrikona, *trikona*, tapas

10th „ —āspada, māna, karma, *mesūrana*, ājñā, kha, gagana, tāta, vyāpāra.

11th „ —āya, bhava, lābha, āgama, prāpti.

12th „ —vyaya, *rikpha* (or *risphа*), antya, antima.

It should be noted that the appellations given to these bhāvas are of two classes, (1) those which are used as mere designations, without indicating the special function of the house, such as horā, duścikya, mesūrana, rikpha, caturasra, the second class of these appellations conveys the special functions of the houses, such as *tanu* (body), sva (wealth) or kutumba (family), sahaja (brothers)

There are certain appellations that apply to a number of houses. The 1st, 4th, 7th and 10th houses are all called kantaka, *kendra*, catustaya, the houses beyond the kendra are called *panaphara* (2nd, 5th, 8th and 11th), the 3rd, 6th, 9th and 12th houses are called *Āpoklima*, 6th, 8th and 12th houses are called trika, the 3rd, 6th, 10th and 11th houses are called upacaya and the rest are called apacaya Garga held that the 3rd, 6th, 10th and 11th are called upacaya only if there is no aspect of them with malefic planets or with the enemy of the lord of them. Trikona is claimed to be a Greek word.

From the several names of the bhāvas, it appears that the following were to be predicted from the several bhāvas; from first bhāva, health and the growth of the body, from 2nd the

wealth of one's family; from 3rd brothers (and sisters) and valour; from 4th relatives friends, happiness, house and mother, from 5th sons, intellect, learning; from 6th enemies and wounds; from 7th wife, love affairs., marriage; from 8th death, one's foibles and sins; from 9th dharma, elders (including parents), austerities; from 10th actions and dignities or position and father; from 11th acquisition of good qualities and of wealth; from 12th expenditure, debts

Thibaut (in Grundriss p 68) following Jacobi boldly asserts that the doctrine of the twelve astrological houses which is a chief point in the Indian system found developed in Varāhamihira does not occur among Western authorities earlier than Firmicus Maternus (middle of 4th century A. D) and that Greek astrology entered into India only between Firmicus and Varāhamihira One is regretfully constrained to say that this is a case of one blind man following another In the first place the conception of houses (bhāvas) is not totally absent even in Ptolemy's Tetrabiblos, as can be seen in II 8 p 191, III. 10 pp 273–275 (Loeb Classical Library), where houses I, VII, IX, X and XI are referred to, though Ptolemy does not pay much attention to the system of *bhāvas* Probably this escaped the attention of both Jacobi and Thibaut In the second place, the system of bhāvas does not occur for the first time in Varāha Varāha refers to a host of Indian writers before him as will be shown below in whose works the system appears in a fully developed form It is not possible to believe that all this vast literature was developed in a hundred years or so after Firmicus. Besides, authors like Garga, Parāśara, who are placed between the Vedāngajyotisa and the siddhāntas (about 800 B C to 250 A D) knew this system and Garga is assigned to 50 B. C. by Kern (Preface to Br S p 50) Thibaut, a great scholar, proposing to write an encyclopaedic work on Jyotisa is content to rely on Jacobi and does not appear to have cared to see for himself even Ptolemy and examine works like the Atharvana Jyotisa, the Vaikhānasasūtra, Visnudharmottara which teach astrology based on naksatras. This, to say the least, is most surprising Prof Zinner (in 'Stars above us') p 67 says that the twelve houses denote life, business, brothers, father, sons, health, wife, death, religion, gain, good deeds, gaol. In the 3rd place Thibaut takes no account of Sanskrit works written by Yavanas settled in India, to whom Varāha frequently refers, from whom he sometimes differs on vital points of doctrine and from whom Utpala quotes hundreds of verses,

which are found in the ancient Yavanajātaka of Sphujidhvaja. Further, it has been shown above (*pp. 533–34*) that extant references to astrology based on naksatras actually exhibit the names of at least five bhāvas centuries before Firmicus It is quite possible to argue that Firmicus borrowed his astrology from the predecessors of Varāha, who were Greeks and wrote in Sanskrit, or that even Ptolemy did so as he knows of the bhāvas, but furnishes only a dilettante treatment It may be further noted that no adaptations of Greek words for all the bhāvas from the first to the twelfth are to be found in Sanskrit works Such words occur only for some viz. 1st, 3rd, 4th, 7th, 10th and 12th bhāvas and for groups of a few bhāvas (such as kendra, panaphara and āpoclima). Besides, the peculiar points to be deduced from the several bhāvas as stated in Br. J do not all agree with what Firmicus says. Varāha designates the 2nd bhāva as kutumba and sva (family, wealth) while Firmicus calls it 'lucrum' (how one shall earn one's living), the 11th bhāva is called āya (income) and bhāva by Varāha while Firmicus calls it the house of good deeds; in Firmicus the 4th bhāva is that of father or parents, while Varāha calls it 'bandhu' (relatives) and grha in Br J. and 'suhrt' (friends) in Laghujātaka and some later Indian writers say that 4th and 10th bhāvas are respectively of the mother and father. In Firmicus the 6th and 12th bhāvas are respectively wealth and jail, while Varāha holds them to be 'enmity' and 'expenditure'.

Certain technical words have yet to be explained. One meaning of *horā* is half a rāśi. In the case of the rāśis of odd numbers (viz. 1, 3, 5, 7, 9, 11) the lord of the first half is the sun and that of the 2nd half is the moon, while in the case of rāśis of even numbers (2, 4, 6, 8, 10, 12) the lord of the 1st half is the moon and of the 2nd half the sun (Br J. I. 11) The purpose of this is that those born on sun's horā are energetic (assertive) by nature and those born on moon's horā are mild by nature. Br. J. (I. 12) mentions the view of some[865] (of

865 केचित्तु होरां प्रथमां भपस्य वाञ्छन्ति लाभाधिपतेर्द्वितीयम् । द्रेक्काणसंज्ञामपि वर्णयन्ति स्वद्वादशैकादशराशिपानाम् ॥ बृहज्जातक I. 12, उत्पल quotes on this a verse of यवनेश्वर 'आद्या तु होरा भवनस्य पत्युरेकादश क्षेत्रपतेर्द्वितीया । स्वद्वादशैकादशराशिपाना द्रेक्काणसंज्ञा क्रमशस्त्रयोऽत्र ॥'. This verse occurs in the यवनजातक of स्फुजिध्वज on *folio* 2. It would be noticed that one पाद is the same in both बृहज्जा॰ and यवनजातक. In the यवनजातक of स्फुजिध्वज (Nepal ms.) the 24 horās of the 12 rāśis are described at length in about 48 rather poetic verses and it winds up the description with the words 'एतास्तु होरा यवनैर्निरुक्ताश्चिन्तासहस्रैर्गणिताश्चार्या (?)' (*folio* 9.)

Yavaneśvara, according to Utpala) that the lord of the first horā is the same as the lord of the rāśi and the lord of the second horā is the lord of the 11th house in the horoscope The result of this view would be that all planets can be lords of horās and not the sun and the moon alone as Varāha, Satya and others say Each rāśi (of 30 degrees) is divided into three parts, each of 10 degrees, called dreskāna or drekkāna or drkāna or drgāna (in Br. J. III 5, probably for the sake of the metre) The lords of the three parts of each rāśi are respectively the lord of the rāśi itself (of the first part), the lord of the 5th rāśi (of the 2nd part) and the lord of the 9th rāśi (of the 3rd part). For example, in the case of Vrsabha (of which the lord is Venus), the lords of the 1st, 2nd and 3rd parts are respectively Venus, Mercury (lord of 5th from Vrsabha) and Saturn (lord of 9th from Vrsabha). And so on for the other rāśis

A few words must be said about dreskāna Weber and others think that it represents the Greek word 'decanoi' The 'dekans' were a legacy from ancient Egypt, which[866] had originally no zodiacal signs. Bouché-Leclercq has discussed[867] the question of decans at great length in his 'L' Astrologie Grecque' pp 215–240 The decanal system can be traced as far back as the third dynasty of Egypt (about 2800 B. C.) and may be older still. Originally, the decans were conspicuous stars or groups of stars rising at particular hours of the night during 36 successive periods of ten days each that constituted the year in Egypt The series began with Sirius and they were distributed in a wide equatorial belt The ancient Egyptians had a fixed idea that each division of time, large or small, must have its protective tutelary deity. Therefore, the decans were originally the divinities (or *genii*) that presided over the 36 decades of the Egyptian year. Each period of ten days was marked by the rising of the next decan on the eastern horizon at sunset. Bouché Leclercq points out that in the Egyptian language a specific name (like the Greek word 'decanos') is not met with and that the decans are designated by a number of synonyms. When the Zodiacal signs were introduced in Egypt by the

866 'Legacy of Egypt' ed by S. R K. Glanville (Oxford, 1942, p. 163).

867. 'L' Astrologie Grecque' p 220 note 2 Vide 'The royal art of Astrology' by Eisler p 82 and plate VII facing p. 81 for Egyptian Decan-stars on the lids of a sarcophagus of the 6th Dynasty.

Greeks, the tutelary spirits slipped into or got intertwined with the signs of the Zodiac (each sign of 30 degrees being divided into decans of 10 degrees) and played an important part in astrology. The original division referred to the equator, while the later distribution of 36 decans among the twelve signs refers to the[868] ecliptic. Bouché Leclercq avers (p. 53) that it has been proved beyond doubt that the Egyptian Zodiacs (they had four, viz. 2 at Denderah, one at Esneh and one at Akhmim) are all of the Roman epoch and are imitations of the Greek Zodiac.

The Bṛhajjātaka has a special chapter 27 (in 36 verses) called dreṣkāṇādhyāya in which the 36 presiding deities of dreṣkāṇas are described. This chapter appears to conserve the ancient Egyptian conception of the decans as guardian[869] divinities. The language must be regarded as rather metaphorical or symbolic. It is parts of the Zodiac that are being described. Nearly two-thirds of 36 are male and the rest are female. Some composite figures of males and females and quadrupeds or birds or serpents occur. In verses 2, 19 and 21 (of chap. 27) Varāha expressly says that he only sets out what the Yavanas have said.

---

868. Vide Webb in Journal of Hellenistic Studies, vol. 48 (1925) p. 56, Prof. Neugebauer in E. S. A. pp. 81–83. The latter notes that with the exception of Sirius and its neighbours decans have defied identification with known constellations. Vide Prof. Neugebauer's latest note on 'The Egyptian Decans' in 'Vistas in Astronomy' (ed. A. Beer, vol. I, pp. 47-51).

869. Vide for 'Dreṣkāṇa' Colebrooke's Miscellaneous essays, vol. II pp. 364–373. Colebrooke (on pp. 370–71) states that Manilius employs the word Decania, that Firmicus differs in the names and does not allow the complete degrees to each decanus. This would show that the Br. J. could not have followed about dreṣkāṇa. Firmicus in astrology as Jacobi supposed but some other more ancient author. Nor can it be said that the Br. J. follows Manilius. The description of the middle dreṣkāṇa of Mesa rather resembles the rotund figure in Plate 10 in Prof. Neugebauer's book 'Exact Sciences in Antiquity' p. 83, which plate reproduces the representation of the Decan deities on the tomb of Senmut (in Egypt). B. L. Van Der Waerden in his paper 'Babylonian Astronomy, thirty-six stars' in Journal of Near East Studies, vol. VIII (pp. 6–26) shows how thirty-six stars from old Babylonian times finally became mixed up with the twelve Zodiacal signs and 36 Egyptian decans. On p. 8 he gives lists of 36 constellations, the so called 'decans', which were found on coffin lids of the middle kingdom in Egypt and on ceilings of tombs belonging to kings of the New Kingdom. The risings, culminations and settings of decan constellations were supposed to determine not only the date but also the time of the night. On p. 20 he gives a table of Babylonian stars and their modern equivalent stars and their times.

Here I translate two verses (2 and 21) 'the Yavanas have declared the form of the middle dreskāna of Mesa sign (Aries) viz. she is a female clad in red garments, intent on ornaments and food, has the mouth of a horse and has a jar-like (i e. rotund) form, she is oppressed by thirst and is standing on one leg'; 'the Yavanas have declared the appearance of the last dreskāna of Tulā (Scales) as a male having the form of a monkey, decked with ornaments, frightening deer in a forest, wearing golden armour and quiver, and holding fruits and flesh (in his hands)'. There is nothing in the Tetrabiblos of Ptolemy corresponding to this and Varāha probably refers to a Sanskrit work by a Yavana writer much earlier than even Ptolemy and Manilius. Manilius, author of 'Astronomica', a didactic poem on astrology, referred to the decans but he wrote about 9 A. D. and it appears that decans had gone out of vogue in Greece by the time of Ptolemy. Bouché-Leclercq notes (p. 219) that the system of decans is a characteristic of Manilius and that after him one does not hear it spoken of any longer. On p 219 of his work Bouché-Leclercq furnishes a figure of the Decans of Manilius, which is entirely different from the descriptions of decans given by Br J. Manilius divides each sign into three parts, each of which represents no deity but the signs themselves. For example, Aries is divided into three parts and those three are the same as Aries, Taurus and Gemini. The Sārāvali[869a] in chap. 49 devotes thirty-six verses to the description of 36 dreṣkānas, but the description differs from that of the Br J. as the note below will show. The Sārāvali had probably before it a Sanskrit *yavana* work different from the one relied upon by Br. J

Some other technical words may be mentioned and defined here. The six items, viz the rāśi of a planet, the horā, dreskāna, navāmśa, dvādaśāmśa and trisāmśa of the rāśi are each called the *varga* or Sad-varga of that planet (Br. J. I. 9) The first navāmsa of Mesa, Karki, Tūlā and Makara (that are *cara* signs)

---

869 a. Compare 'रक्ताम्बरा भूषणभक्ष्यचित्ता कुम्भाकृतिर्वाजिमुखी तृषार्ता। एकेन पादेन च मेषमध्ये द्रेक्काणरूपं यवनोपदिष्टम्॥' (बृहज्जा. 27 2) with 'क्षीचञ्चलो विहारी पतिमान् गीतप्रियो मनस्वी स्यात्। मित्रार्थभाक् सुरूप. स्त्रीवित्तचर्चिद्वितीये च॥' सारावली 49. 2. In the Nepal ms of यवनजातक the मेषद्वितीयद्रेक्काण is described as follows: गौरः प्रहारी रिपुदारुणाक्ष' शुक्लाम्बरो वारणतुल्यमूर्धा। वक्त्रायुधा (?) धातुरसार्थवित्त्व मेषे द्वितीयो वृषलोनशाङ्कः॥ folio 9 This indicates that the यवनजातक had a third tradition about द्रेक्काण. It is expressly stated that the three parts of a rāśi are known among the Yavanas as dreskānas 'षड्भ्रगुणा (?) राशितृतीयभागा द्रेक्काणसंज्ञा यवनारब्धया ये।' folio 9.

is called Vargottama, so also the 5th navāṁśa of Vṛsabha, Siṁha, Vṛścika and Kumbha (that are *sthira*), and the 9th navāṁśa of Mithuna, Kanyā, Dhanus, Mīna (that are *dvisvabhāva*) are called Vargottama (Br. J. I. 14) and they yield beneficent results.[870] The vargottama-navāṁśas of all rāśis bear the same names as the rāśis themselves. The Yoga called Sunaphā occurs when some planet other than the sun occupies the 2nd house from that occupied by the Moon; the Yoga Anaphā occurs when some planet other than the sun occupies the 12th house from that occupied by the Moon and Durudharā occurs when planets occupy the 2nd and 12th houses from that occupied by the Moon. The Yoga called Kema-druma occurs when the above three don't occur and the Moon is not in kendra position or if kendra is not occupied by any of the planets (except the Sun) Br J 13. 4 notices that varieties of Anaphā and Sunaphā are 31 each and the varieties of Durudharā are 180. The Br J. does not devote more than 6 verses to all these four yogas but the Vrddha-Yavanajātaka of Mīnarāja has 30 verses on Anaphā, 30 verses on Sunaphā, 172 verses on Durudharā. The rāśi which is 2nd from the rāśi occupied by the Sun in a horoscope is called 'Veśi' (Br. J. I. 20). All the above five words are said to be Greek. The word 'liptā' meaning '60th part of a degree' is also said to be Greek. The word 'harija' occurring in Br. J. V. 17 means 'horizon' and Kern says it is adapted from Greek (Preface to Br. S p. 29)[870a] The Greek word is *horos* (boundary) All the words used by Varāha and supposed to be Greek by Weber, Kern and others may be brought together in one place here (37 in all), Kriya, Tāvuri, Jituma, Kulīra, Leya, Pāthena, Jūka, Kaurpya, Tauksika, Akokera, Hrdroga, Ittha (?), Heli, Āra, Himna, Jīva, Āsphujit, Kona; horā, dreskāna, kendra, trikona, panaphara, āpoklima, mesūrana, duścikya, hibuka, jāmitra, dyūna, rihpha, anaphā, sunaphā, durudharā, kemadruma, veśi, liptā, harija. I dispute the derivation of *kulīra* and trikona from Greek and Kern agrees that they are pure Sanskrit words. I also doubt whether *Jīva* is an adaptation of Zeus Zeus

870. वर्गोत्तमाश्चरगृहादिषु पूर्वमध्यपर्यन्तत: शुभफला नवभागसज्ञा:। बृहज्जातक I 14, उत्पल explains वर्गोत्तमासमूहे उक्तना:। 'तथा च यवनेश्वर। ते ते गृहेषु स्वगृहाकारा ये वर्गोत्तमास्ते यवनैरुक्ता:'. This occurs in यवनजातक of सुजिध्वज folio 4

870 a. उत्पल on बृहज्जातक V 17 paraphrases हरिज as उदयलेखा and quotes a Sanskrit half verse defining it. 'यत्राकाशं भूम्या सह सस्पृक्त समन्तात् दृश्यते तद्धरिजम्। उक्तं च। हरिजमिति यत्रसमवनौ सम्पृक्तमिव लक्ष्यते यधोत्तौषु।' This is probably a quotation from यवनजातक.

agrees with Sanskrit Dyaus and not with Jīva and Zeus is an Indo-European word meaning 'Heaven' or 'sky'. The different forms of the word dreskāna or '*dyūtam* for 'dyūnam' should not be separately counted The word *horā* is used in early Indian astrology in three different senses, none of which agrees with the sense of hour. It is possible that even in Greek it is a word borrowed from Egypt or Babylonia, since in the definite sense of an hour, it is much later and it is doubtful whether Hipparchus (140 B. C) uses it in that sense. If we exclude these four words only 33 words may at the most be argued to have been adapted from Greek. Some of these words such as the 12 names of rāśis and six of the planets, some names of the *bhāvas* like *kubuka*, *jāmitra*, *dyūna* and *kendra* have several synonyms (sometimes by the dozen) in Sanskrit employed in Br. J. and so no emphasis should be laid on them. They were mentioned by Br J. because they had been employed by ancient Greek authors who wrote in Sanskrit and so Br. J. took cognisance of them for the sake of completeness of treatment Even *kendra* meaning 1st, 4th, 7th and 10th houses or *bhāvas* has two Sanskrit synonyms 'kantaka' and 'catustaya', besides the fact that its meaning is different in Sanskrit astrology from the meaning of the Greek word (*kentr on*, spike) Therefore, barely ten Greek words like Anaphā, Sunaphā remain which have a very minor role to play in Indian astrology and it is a far cry to argue or assert from the occurrence of these few words that the whole Indian astrology as developed in Varāhamihira was borrowed from Greek works It is extremely doubtful whether any Indians except a few sages or gymnosophists ever went to Greece or lived long in Greece or settled there and returned to India to spread Greek words and astrological knowledge in India; but we have ample evidence that Greeks settled in India, composed inscriptions in Sanskrit and wrote extensive works on astrology in Sanskrit. Vide 'L' Astrologie Grecque' by Bouché-Grecque p. XIX for the Greek. Latin, French names and astrological symbols of the signs of the zodiac and planets and G. R Kaye in Memoir No. 18 of the Archaeological Survey of India pp 39-40 (for the Greek twelve names of Zodiacal signs and nine other Greek words occurring in Br. J) and p. 100 for Greek 'bhāvas' and symbols for signs and planets.

A good deal is said in Bṛ. J. II. 15-17, Laghujātaka II. 10-12, Sārāvalī IV 28-31, Muhūrta-cintāmani (VI. 27-28) and other works about the planets being friends, enemies or indifferent

among themselves. Friends and enemies are of two kinds, natural and incidental (temporary) The following table will show natural friends and enemies amog planets

Planet	Friend	Enemy	Indifferent (udāsīna or madhya or sama)
Sun	Moon, Mars, Jupiter	Venus, Saturn	Mercury
Moon	Sun, Mercury	none	Mars, Jupiter, Venus, Saturn
Mars	Sun, Moon, Jupiter	Mercury	Venus, Saturn
Mercury	Sun, Venus	Moon	Mars, Jupiter, Saturn
Jupiter	Sun, Moon, Mars	Mercury, Venus	Saturn
Venus	Mercury, Saturn	Sun, Moon	Mars, Jupiter
Saturn	Mercury, Venus	Sun, Moon, Mars	Jupiter

It may be noticed that there is no reciprocity for these relationships For example, the Moon has Mercury as one of its friends, while Mercury has the Moon as its enemy; the Moon has no enemy but Venus has the Moon as its enemy. According to the Yavanas no planet is *sama* (neither friend nor foe) but that planets are either friends or enemies [871]

As regards temporary friendships and enmities the following rules apply; when planets are in 2nd, 3rd, 4th, 10th, 11th or 12th places from each other they become friends for the occasion (such as marriage, invasion or journey &c), otherwise they become enemies when in the same rāśi or in 5th, 6th, 7th, 8th or

871. Vide उत्पल on बृहज्जातक II 15 'अत्र च तेषा शत्रुमित्रव्यवहार एवेदो नोदासीनव्यवहारस्तस्मान्मित्रेभ्योऽन्ये ह्यमित्राणीति केचिद्यवनेश्वरादय'। तथा च यवनेश्वर। खेटैरुक्तमित्रमतोन्यथान्ये शुक्रेसु भौम परिहाय सर्वे। चान्द्रेरनर्का भृगुनन्दनस्य त्वर्केन्दुवर्ज सुहृद मविष्टा॥ भौमस्य शुक्र शशिजश्च मित्रे इन्दोर्बुधं देवगुरु च विद्यात्। सौरस्य मित्राण्यसु-रेन्दुसूर्या शेषान् रिपून् विद्धि तृणा च तद्वत्॥. These occur on folio 6 of Nepal ms of यवनजातक

9th from each other There are differences of opinion here but they are passed over.

The *bala* (strength) of planets is of four kinds (arises in four ways) viz place, direction, activity (*ceṣṭā*), time. A planet is powerful in its position when it is in its own house or in exaltation (*ucca*) or in its friend's house or in its *trikona* or navāmśa. This is *sthānabala*. Mercury and Jupiter are powerful in the east (i e when they are in the *lagna*), the Sun and Mars in the south (i. e. in the 10th house), Saturn in the West (i e. 7th house), the Moon and Venus are powerful in the north (i e. 4th house). This is *digbala*. The Sun and Moon are powerful in the northern ayana[872] (i. e. in the six rāśis from Capricorn); the remaining planets are powerful when they are retrograde or in conjunction with the Moon or when there is a fight (between planets other than the Sun and the Moon), the one to the north being more powerful. Garga quoted in the Adbhutasāgara says that *grahayuddha* (fight of planets) occurs when one planet occults the other, or when it slightly covers, or when the light of one throws into the background the light of another or when one planet is to the left of the other slightly. This is *ceṣṭābala*. The Moon, Mars and Saturn are powerful at night, Mercury is powerful both by day and night, and others are powerful by day; *krūra* and *saumya* planets are respectively powerful in the dark half and bright half of the month, a planet is powerful in the year of which he is the lord, or on his own week-day or horā or in

---

872 उदगयने रविशीतमयूखी वक्रसमागमगा परिशेषाः । विपुलकरा युधि चोत्तरसंस्था-श्चेष्टितवीर्ययुता· परिकल्प्या· ॥ बृहज्जातक II 20. This is explained by the following verse of विष्णुचन्द्र : दिनसकरेणास्तमय· समागम शीतरश्मिसहितानाम् । कुजशुक्रादीनां युद्धं निगदतेऽन्योन्ययुक्तानाम् ॥ q. by उत्पल on बृ. जा II. 20. Conjunction of planets is of three kinds, when any planet is in conjunction with the sun, that is called *astamaya* (setting), when in conjunction with the moon it is called *samāgama*, when the other planets, Mars &c. are in conjunction with each other that is called *yuddha* (fight of the planets). (in the case of yuddha) that planet which is to the north of the other is called victorious or powerful (except in the case of Venus that is powerful when to the south of the other) गर्ग: । छादन रोधन चैव रश्मिमर्दस्तथैव च । अपसव्यं ग्रहाणा च चतुर्धा युद्धमुच्यते ॥ अद्भुतसागर p 207. The अ. सा (p. 208) quotes पराशर as saying that there is no real fight between planets, but a sight of them being together or close indicates to people auspicious or inauspicious happenings The अ सा. is quoted in शान्तिकमलाकर (D. C. ms. No. 306 of 1884–87) folio 81a

the *month* of which he is the lord This *is kālabala.*[873] Yavaneśvara says 'for ten days from the 1st tithi of the bright half the *Moon is of middling* power but in the *next period* of ten days (from sukla 11th to krsna) 5th Moon's power is highest and in the last ten days (from krsna 6th to *amāvāsyā*) the Moon has slight power, but if Moon has an aspect with *saumya* planets (*Jupiter &c.*) he is always powerful

A planet is said by Sārāvalī to have nine vicissitudes,[874] *dīpta* (blazing, when it is in exaltation), *svastha* (at ease when it is in its svagrha), *mudita* (glad, when it is in a friend's *svagrha*), *śānta* (quiet, when it is in an auspicious *varga*), sakta (capable, when it is shining brightly), *nipīdita* (oppressed, when it is overwhelmed by another planet), *bhīta* (frightened, when it is in depression), *vikala* (impaired when its light is lost is Sun's light), *khala* (evil, when it is in the midst of evil company). The Sārāvalī (V. 5–13) describes at length the *results* of a planet *being* in these nine conditions.

How even mythological accounts are pressed into service by astrological works may be well illustrated by two verses from the Yogayātrā of Varāhamihira: 'The Sun was born in Anga (Bengal), the Moon among Yavanas, Mars in Avanti (Ujjayini), Mercury in Magadha, Jupiter in Sindhu, Venus in Bhojakata, Saturn in Surāstra (Kathiawar), Ketu among Mlecchas and Rāhu in Kalinga; if these planets are affected, they cause distress to the countries in which they were born· hence a king should invade the respective countries when any one or more of the planets are affected[875]

In Brahmapurāṇa 201.9 Bhojakata is said to be the capital of

(*Continued on next page*)

A very important doctrine of Indian astrology is that of *drsti* (lit. glance, i e aspect) The Br. J. II. 13, Laghujātaka II. 8, Sārāvalī IV. 32-33, Muhūrtadarśana I. 27 lay down the following rules. All planets[876] have a full aspect (pūrna drsti) on the 7th house from the one which each occupies Besides, Saturn has full aspect on the 3rd and 10th rāśi from the one which it occupies and on the planet which is 3rd or 10th from its own position. Similarly, Jupiter has full aspect on the 5th and 9th rāśi from the one it occupies and also on the planet that is 5th or 9th from itself; Mars has full drsti on the 4th and 8th rāśis and the planet in the same. So the Sun, Moon, Mercury and Venus have full drsti only on the 7th rāśi from the one each of them occupies and on the planet that is 7th from them. Besides, all planets have 1/4th drsti on the 3rd and 10th, half drsti on 5th and 9th, ¾ drsti on 4th and 9th There is no aspect of any planet on any rāśi or *sthāna* except the seven expressly mentioned (viz 3rd, 4th, 5th, 7th, 8th, 9th and 10th) and in the case of partial drstis the fruit also is partial (i.e. ¼, ½ or ¾) The Tetrabiblos (I. 13 and 20) treats of four aspects viz. opposition (7th house of Varāha), trine (5th and 9th houses), quartile (4th and 10th), sextile (difference of 60 degrees and two signs) and does not distinguish between fractions of drstis as Varāha does. So in the matter of aspects also there is substantial difference between Ptolemy and Varāha-mihira.

Another important doctrine is that of *yogara* It means[876a] the consideration about the auspicious or inauspicious positions of planets at any particular period in question in places either

---

(*Continued from last page*)

Rukmin, of Vidarbha Similar verses occur in the वृद्धयवनजातक of भीनराज chap II 9-10 (I O ms folio 4b and Baroda ms No 9183 folio 4b) In the अथर्वपरिशिष्ट (No. 41.1. 3-5) on ग्रहयुद्ध, verses 3-6 are similar but there the sun is said to have been born in कलिङ्ग, Venus is said to have been born in महाराष्ट्र, केतु on मलय, राहु on गिरिशृङ्ग Vide Indische Studien vol. X p 317 The बृहत्संहिता has chap. 17 on ग्रहयुद्ध. In verse 2 वराह says that *the planets move one above the other*, but, on account of the great distances, to the human eye they appear level with each other. The बृहत्संहिता describes at length the results to different countries and peoples of *yuddha* between different planets The अथर्वपरिशिष्ट adds 'यस्मिन्देशे तु यो जात स ग्रह· पीडयते यदा। त देश घातितं विद्याद् दुर्भिक्षेण भयेन वा॥'

876 त्रिदशत्रिकोणचतुरस्रसप्तमान्त्यबलोकयन्ति चरणाभिवृद्धित. । रविजामरेज्य-रुधिरा परे च ये क्रमशो भवन्ति किल वीक्षणेऽधिका ॥ बृहज्जातक II 13 This has been variously interpreted as testified by Utpala

876 a. तत्र जन्मराशित· प्रोक्तनिषिद्धस्थानस्थितेदानीतनग्रहवशेन शुभाशुभनिरूपणं गोचर इत्युच्यते। पीयूषधारा com. on सु चि. IV 1.

declared auspicious or inauspicious judging from the rāśi of birth. The Muhūrta-cintāmaṇi in five verses (of chap 4) deals with this subject I shall illustrate the application of the word by some examples If the Sun is in the 6th place from the rāśi of birth he is auspicious but if at the same time the 12th place from the rāśi of birth is occupied by other planets (except Saturn), then, though auspicious by himself, he becomes inauspicious This result does not arise in case one planet is the father or son of the other (as Saturn is the son of the Sun and Mercury is the son of the Moon). Similarly, if Mercury is in 2nd place from rāśi of birth or in the 4th or 6th or 8th or 10th or 11th and other planets (except the Moon who is the father of Mercury) are respectively in the 5th, 3rd, 9th, 1st, 8th or 12th, Mercury, though originally auspicious, becomes inauspicious for the time being *Kāraka* is another word to be explained It is rather complicated Br. J. XXII and Sārāvali[876b] VI. and VII. deal with it. As many planets as occupy their own *gṛha* or *ucca* or *Mūlatrikona* and also are in the 1st, 4th, 7th and 10th places (in the horoscope) they become *Kārakas* of each other, while the planet that is in the 10th place (in horoscope) is specially kāraka. Suppose the lagna is Karka and the moon occupies it (it is moon's svagṛha) and Mars, Saturn, the Sun and Jupiter are in their *uccas* (i e in Makara, Tulā, Mesa and Karkata respectively), they are all kārakas of each other Many more rules are given in this matter in Br. J XXII. and Sārāvali VI. The Sārāvali gives (VII. 7–13) another meaning Each planet is specially concerned with, rules over or produces several matters or persons &c I shall quote two verses The Moon is the lord of poets, flowers, edibles, precious stones, silver, conch, salt, waters, clothes, ornaments, women, ghee, sesame, oils and sleep Jupiter is the lord of auspicious things, *dharma*, rites for prosperity, greatness, education, orders, cities and nations, vehicles, seats, beds, gold, corn, dwelling house and sons.

Then there is the doctrine of *daśās* and *antardaśās* of the seven planets In the Viṃśottarī system man's maximum life is supposed to be 120 years and in Astottarī it is supposed to be 108 and those are distributed among the planets in varying numbers of years and it is said that daśās have further

876 b स्वर्क्षतुङ्गमूलत्रिकोणगा कण्टकेषु यावन्त आश्रिता । सर्व एव तेऽन्योन्यकारकाः कर्मणस्तु तेषा विशेषत ॥ बृहज्जातक XXII 1. कविकुसुममोज्यमणिरजतशङ्खलवणोदकेषु वक्ष्याणाम् । भूपयनारीघृततिलतैलकनिद्राभमुद्भवन्ति ॥ भाङ्गिरसधर्मपीठिकमहत्त्वशिक्षानियोगपुरराष्ट्रम् । यानासनशयनसुवर्णधान्यवेश्मप्रजापो जीव ॥ सारावली VII 8 and 11.

divisions of antardaśās This doctrine is elaborated in the 8th chapter of the Brhajjātaka and Utpala quotes numerous verses from Yavaneśvara on this The theory of Astakavarga is set out by Varāha in chapter 9 of the Bṛhajjātaka viz that the seven planets and lagna are eight entities and they produce their fullest or auspicious results only when they are in particular houses and at particular periods of a man's life All this has to be passed over for reasons of space

In the Brhatsamhitā, the Brhaj-jātaka, and the two works on Yātrā, Varāhamihira mentions a host of his predecessors in astrology In my paper on 'Varāhamihira and Utpala' (JBBRAS, N S. vol. 24-25, 1948-49, pp. 1-31) I brought together the names of all the predecessors of Varāhamihira and gave extensive references to them in his works That paper may not be available to all readers of this volume of the History of Dharmaśāstra and therefore I propose to give a brief abstract of it here for ready reference Purely astronomical writers or works have been generally not included in the following list: Atri (who acc. to Br. S. 45. 1 wrote a work on *utpātas* for which Garga gave him instruction, or who was the disciple of Garga); Bādarāyana[877] (named in Br. S 39. 1) from whom about one hundred verses are quoted by Utpala in his several commentaries, in one of which on Br J. VI 2 the view of Yavanendra on the premature death of a child is cited; Bhāguri (Br. S 85. 1 mentions him as an ancient author on *śakunas*), Bhāradvāja (mentioned in Br. S 85. 2 as an author on whose treatise king Dravyavardhana of Ujjayinī based his own work on *śakunas*); Bhrgu (Br S 85 43); Cyavana (Br. Y. 29. 3), Devala (mentioned in Br. S. 7 15 for the four motions of Mercury such as straight, retrograde and on Yogayātrā IX. 12); Devasvāmin (mentioned in Br. J. VII. 7); Dravyavardhana (mentioned as king of Ujjayinī and as an author on *śakunas*); Garga[878] (over three hundred verses of Garga are quoted by Utpala in his commentary on Br. S alone, a work called Mayūracitraka is ascribed to him by Utpala on Br. S 35. 3 and on Br. S I. 5 Utpala quotes three verses of Garga about Vedāngajyotisa, about his deriving astronomy from it and about other sages

877. पूर्वापरभागगतं शुभाशुभंरलिनि कर्कटे लग्ने। जातस्य शिशोर्मरणं सद्य. कथयन्ति यवनेन्द्रा ॥ बादरायण q by उत्पल on बृहज्जातक VI 2

obtaining it from him), Vrddhagarga[878a] (twenty-five verses of his are quoted by Utpala on Br. S I 11, in one of which the rāśis are expressly referred to); Gārgi (usually styled 'bhagavān' by Utpala who quotes about 60 verses of his on Br J. alone); Gautama (in Br. Y 29 3), Jivaśarman (named in Br. J VII 9, XI 1 and Utpala on XIII 3 quotes him for the words Sunaphā, Anaphā, Durudharā and Kemadruma), Kaśyapa (in Br. Y. XIX. 1); Kāsyapa[879] (Utpala quotes about 260 Anustubh verses from him in his commentary on Br S., some of which show his acquaintance with all the rāśis); Māndavya (named in Br. S. 103. 3 and quoted by Utpala several times on Br J. VI. 6, XI 3 and 5, XIII. 2 and XV. 4); Manittha (mentioned in Br J. VII 1 along with Maya, Yavana, and Parāśara on *āyurdāya*, and in Br. J. XI. 9, while Utpala quotes 13 Āryās and 2 Anustubh verses of his on Br.[880] J. alone), Maya (mentioned several times in Br. S 24. 2, 55. 29, 56 8, in Br J. VII. 1 with Yavana, Manittha and Parāśara on the topic of length of life, on Br. J. VII. 13 an *āryā* verse of Maya is quoted by Utpala and to Maya king of *dānavas* the science of Jyotisa was imparted by the Sun, as stated in the last chapter of the extant Sūryasiddhānta and in a verse quoted by Utpala on Br. S 2.14); Nārada (mentioned in Br S.

878 a Garga and Vrddha-Garga appear to be different authors and flourished several centuries before Varāhamihira. Vide my paper 'Varāhamihira and Utpala' in JBBRAS, N. S vol 24-25 pp. 6-8 Whether Gārgi is another writer than the above two or the same as Garga is discussed in the same paper at p. 9 Vide Kern's Preface to Br S pp 33-40, where he assigns Garga to 50 B C. It may be noted that though Garga is not expressly named in Br. J, he is named 15 times in Br S, and Utpala on Br S 16 41 cites a verse of Garga which clearly shows his acquaintance with the Rāśi system, स यद्वा स्वोच्चराशित्थो मित्रभे स्वगृहेपि वा। स्थित शुभग्रहैर्दृष्टः स धुरणाति परिग्रहम् ॥ Kern states that the incomplete ms of गार्गीसंहिता which he had secured had almost the same titles for its chapters as Br. S. has

879. तथा च काश्यप। मेषे सुवर्णस्थलजा गोधूमाजाविकास्तथा। ब्रह्मवर्णेक्षसयोगे क्षोभने सफलं भवेत् ॥ उत्पल on बृहत्सं. 40 2.

880. *From* Utpala's com on Br. J VII 9, it appears that Manittha in his Horāśāstra refers to Parāśara 'चित्रं भोजेन्द्र पराशर' कथयते दौर्भाग्यवं योवितास्-इत्येवमादि मयमणित्थयोर्होराशास्त्रे विद्यते, मणित्थ may be an Indian name also like डित्थ which occurs in the महाभाष्य on वार्तिक 5 on पाणिनि V. 1 119, There were two Maniṭṭhas, one a contemporary of Berosus, who wrote a history of Egypt, the other, author of Apotelesmata an astrological *poem* in Hexameters The मणित्थ whom उत्पल quotes composed his work in Sanskrit verses and is probably an Indian double, if at all, of the Greek Manittha. Vide Kern's Preface p. 52 for मणित्थ.

11.5 as holding the view that Ketu was one though assuming various forms, Br. S. 24 2 mentions that Nārada learnt from Brhaspati on Meru the results of the conjunctions of the Moon with Rohinī on which he composed a work on which Br. S. draws); Parāśara (a Parāśaratantra is named in Br. S. VII. 8 on Budhacāra, Br. S. XI. mentions Parāśara's treatment of *Ketucāra* along with that of Garga and of Asita-Devala, Br S XVII. 3 mentions Parāsara's disquisition on four kinds of *grahayuddha*, Br. S. XXI 2 mentions him on prognostications about rainfall along with the works of Garga, Kāśyapa and Vajra, Br. J. VII. 1 refers to the work of Parāsara on length of life along with those of Maya, Yavana, Manittha from whom Utpala on Br J VII. 9 quotes a verse in which Parāśara is named, Br. J. XII. 2 mentions Parāśara as having spoken of two Yogas called Srak and Sarpa), Pauliśa (vide pp. 515-517 above), almost all quotations in Utpala are on purely astronomical matters, except that on Br J. II. 20 Utpala quotes half an *āryā* of astrological character; Pitāmaha (reputed author of one of the five siddhāntas, from Br. S. I. 4 it appears that Pitāmaha regarded Tuesday as inauspicious); Ratnāvali (mentioned in Brhadyoga-yātrā II 1), Ṛsiputra (Br. S. 48. 85 names him and then Br. S quotes 15 verses from him, Utpala quotes about 20 Anustubha verses from him on different verses of Br. S and a long prose passage on Br S 85. 15 and several Anustubh verses on Yogayātrā 1 15, one peculiarity being that he quotes the views of over a dozen authors such as Garga, Gautama, Devala, Parāśara, Brhaspati), Satya (very frequently named in Br J. such as on VII 3, 9-11, 13, XII. 2, XX 10, and in Brhadyogayātrā XI 34, about 60 *āryās* being quoted by Utpala on Br J. alone, in Br. J. VII. 11 Varāha refers to him as 'Bhadatta' according to Utpala, which may be really 'Bhadanta)', Sārasvata (named in Br. S. 53. 99 as a writer on '*dakārgala*', over 20 Anustubh verses being quoted by Utpala), Siddhasena (Br. J VII. 7 names him along with Devasvāmin and Visnugupta on the length of life); Usanas (named by Varāha in Yogayātrā V. 3 for the view that no march should be made on Svāti or Maghā); Vajra (named by Br. S 21.2 along with Garga, Parāśara and Kāsyapa about prognostications of rainfall and on *Ketucāra* in Br. S. XI 1 with Garga, Parāsara and Asita-Devala), Vasistha mentioned in Br. S. 51 8, in Brhad-Yogayātrā II. 3, VIII. 6 where his view is opposed to that of Satya, IX. 2 (about Horā and Drekkāna), XI 9 (which mentions that Vasistha and Manittha held the same view), Visnugupta (mentioned in Br. J. VII. 7 as holding the same view as Devasvāmin and Siddhasena

about the length of life to be judged from a horoscope, in Br. J XXI 3 where Visnugupta is opposed to the views of Yavanas that the Kumbhadvādasāmśa in the *Lagna* is inauspicious, and Utpala quotes two āryās from him, mentioned in Brhad-yoga-yātrā 23.4, whether identical with Cānakya discussed in the paper on 'Varāhamihira and Utpala' p 19), Yavana (generally mentioned by Varāha in the plural as in Br. J VII 1, VIII. 9, XI 1, XXI 3, XXVII 19 and 21, Laghujātaka IX. 6 about Vesi, Utpala on VIII 9 refers to Purānayavana-mata and Sārāvali 21. 11 mentions pūrvayavanendras, vide paper on 'Varāhamihira and Utpala' pp. 19–21 and on 'Yavanesvara and Utpala 'JBAS, vol for 1957, pp. 1–5)

The vast literature presupposed by these numerous authors cannot be compressed as said above within the brief space of a hundred years or so but requires the lapse of several centuries From Garga, who is assigned to 50 B C. by Kern to Varāhamihira there is a period of about five centuries which might be held to suffice for the production of this vast astrological literature Garga himself knew the rāśi system, the system of the exaltation of planets and of dṛṣṭis as the quotation in note 879 will show. Ptolemy came at least two hundred years after Garga and Firmicus four hundred years after him. Therefore there is nothing to prove that the rāśi system in India was borrowed from Greek authors The Greeks themselves got their inspiration for horoscopic astrology from Babylon after the invasion of Alexander in 4th century B.C and particularly after Berossus

It would be necessary to say something about the signs of the Zodiac. The word Zodiac is derived from a Greek word 'Zodion' meaning 'little animals' and means literally a 'circle of animals'. In Herodotus I. 70 it is used in the sense of 'figure painted or carved'. It was then applied to one of the figures imagined as formed by certain star-groups in the belt of the heavens. The Zodiac is a belt in the sky about 16 degrees broad, divided in two by the ecliptic, in which the Sun, Moon and planets move. The expression 'signs of the Zodiac' may be used in two senses,[881] viz. (1) the 12 groups of constellations which

881 Vide Meissner in 'Babylonian and Assyrian' vol II. p 406, Webb in Journal of Hellenistic, studies, vol 41 p 72, Sarton in 'a History of Science' p. 179 note 2 Webb in 'Names of stars' p 166 points out that Crab and Scales are only 19 and 17½ degrees in extent respectively, while Virgo and Fishes are respectively 48 and 41 degrees in extent in the sky

are found sown in the vicinity of the ecliptic (the path of the Sun) irregular in position, unequal in extent and in brightness, (2) the twelve equal artificial divisions of the belt each extending to 30 degrees of longitude It is generally held that the first meaning alone can be the earlier of the[882] two. Meissner points out that the most ancient Babylonian observation text belonging to the 37th year of Nebuchadnezzar (567 B. C.) knows only the figures or pictures of the constellations, while the twelve equal divisions occur first of all in a text of the reign of Darius II (about 418 B C.). Nothing definite is known about the first formation of these picture-signs nor is it known who gave these fanciful names to stars There is hardly any doubt that the picture names were due to popular fancy and not to men of science. The names were probably given at different times. Meissner states that the picture signs are already mentioned in part in a Hittite text of the 13th century B C and are also to be found on boundary stones of the same period.

Schiaparelli in 'Astronomy in the old Testament' (p. 85) observes that in Babylonia upright stones were placed in fields as boundary marks (*Kudurru* in Babylonian) or rather as titles of property by way of public notice, of which thirty have been so far discovered on which figures are drawn and on which inscriptions are found containing most terrible curses on those who would remove the stones. On p 86 he gives the drawing on a Babylonian monument of the 12th century B. C. in which the Moon, the Sun and Venus occupy the central position and round about them there is a crowd of figures, of which one can easily recognize the scorpion, the goat with a fish's tail (Capricornus) and the Archer.[883] Hooke remarks that several constellations are

882. Vide Webb in Journal of Hellenistic Studies vol 48 (1925) p 59, and Journal of Near East Studies vol 8 pp 6-26 by Waerden on Babylonian Astronomy (at p. 25) in which he refers to an observation text from 6th year of Darius II (420 B C.) containing such statements as Jupiter and Venus being at the beginning of Gemini and the like and emphasizes that Babylonian signs were of equal length

883 The same figure occurs in Rawlinson's 'Five great monarchies of the ancient world' (ed of 1889) vol II, p 374 and that author thinks that there are the Ram, the Bull, the Scorpion, the Serpent, the Dog, the Arrow, the eagle or vulture Vide George Smith's 'Assyrian Discoveries' (London, 1875) pp. 235-241 where he gives a figure on a boundary stone of about 1370 B. C which records the grant of land to one Merodach Baladan and a complete English translation of the inscription. Smith thinks (p. 237)

(*Continued on next page*)

assigned to Ea in the astrological texts, the two most frequently mentioned being Pisces and Aquarius and that Ea's symbol as represented on boundary stones was either Ram's head or goat-fish.[884] It is stated by Frankfort[885] that of Zodiacal signs in their Babylonian forms only two, Cancer and Sagittarius, do not occur on the seals of the first dynasty of Babylonia

It is possible to argue that in two verses of the Rgveda (I 24.8 and I. 164. 11) there is a reference to the Zodiacal belt 'King Varuna made a wide path in order that the Sun may follow it'; 'the wheel of *rta* has twelve spokes and it again and again revolves round the sky, but it is not worn out'[886]

The above references to Babylonian boundary stones and monuments are enough to show that in Babylonia some four or five signs of the Zodiac had been distinguished before 1000 B. C But the complete list of picture sings of the Zodiac was known in Babylonia at least from about 6th century B. C. as Meissner (referred to above) says.[887] Sarton cautiously suggests the probability of Babylonian influence on other Oriental peoples (Iranian, Indian and Chinese) but he gives up the discussion of this question as a debatable[888] one. Authorities are agreed that the oldest horoscopes are found in Mesopotamia and not in Greece nor in Egypt. Sarton states that the first known horoscope is a cuneiform tablet in the Bodleian referring to the date 29th April 410 B C., and that the second is another tablet in the

---

(*Continued from last page*)

that the figure contains the symbols of the Sun and Moon, a Scorpion, dove-winged lion, a ziggurat (tower). One can also detect therein a bull and a goat with fishes' tail. Waerden in Journal of Near Eastern Studies, vol 8 at p 22, holds that symbols on boundary stones are of little help and that the figure of Scorpion might first be an earthly Scorpion considered as a symbol of a god or it might be a zodiacal Scorpion.

885. Vide 'Cylinder seals' (1939) p 156

886 उरु हि राजा वरुणश्चकार सूर्याय पन्थामन्वेतवा उ। ऋ I 24 8. बाज स. VIII 23, तै. सं I. 4. 45 1. द्वादशारं नहि तज्जराय वर्वर्ति चक्रं परि द्यामृतस्य। ऋ I. 164 11, अथर्व IX. 9. 13.

887. M. Jastrow in 'Aspects of religious life and practice in Babylonia' (1911) pp 230-231, where it is said that, besides the Ram, Twins, Lion, Crab, Scorpion, Archer, Fishes in Babylonian and Assyrian astrology, in place of the Virgin we have a constellation designated 'plant growth' and instead of the "bull" a spear.

888. Vide 'A History of Science' p. 78,

pierpont Morgan Library referring to April 263 B C. (in JAOS. vol 75, No. 3 p. 172). F. C. Cramer in 'Astrology in Roman Law and Politics' (Philadelphia, 1954) agrees with this and gives references to horoscopes of 258 B. C, 235 B C and 142 B. C. (pp. 5-8). Prof. Neugebauer on the other hand remarks[889] that only seven horoscopes are found preserved from Mesopotamia, all written in Seleucid period, the earliest being of 263 B. C. C. V. Maclean refers to a horoscope of 28th February 142 B C. Sarton says that the very word 'horoscopos' was coined very late in Greece, that it is used by Manilius (first century A. D) and Clement of Alexandria (150-220 A D.) and that its use cannot be found earlier.[890] The earliest Greek horoscope from Egypt concerns the year 4 B C. and Prof Neugebauer says that he knows about 60 horoscopes from 4 B. C. to 500 A. D. The earliest Demotic and Greek horoscopes were written about the beginning of the Christian era and the earliest Demotic horoscope refers to 13 A D.[891] Prof. Neugebauer holds that the rising times of zodiacal signs mentioned in Brhajjātaka (I. 19) are precisely the same as the rising times of zodiacal signs in the Babylonian system (called A) Vide Journal of Cuneiform Studies, vol. 7 No, 3 pp 100-102

It has been seen above that not only was general astrology developed in early Vedic times, but individual astrology based on naksatras had begun te be studied even as early as the Atharvaveda.[892], that beginnings of a regular terminology resembling the later *bhāva* nomenclature had been made and prognostications had been based on the naksatra of birth and on the naksatras at certain distances from the naksatra of birth Here we have the germs of the basic assumptions of early and

889 Journal of Near Eastern Studies, vol IV at p 16 Vide Maclean s 'Babylonian Astrology and its relation to the old Testament' p 7 note 3

890 'A History of Science' p 453 note 79,

891. Prof. Neugebauer in E. S A p 85 and in 'Demotic Horoscopes' in J A O S vol 63 pp 115-124

892 Vide above pp 523-525 notes 751-754 Hemādri on 'vrata' (vol, II pp 645-648) contains a dialogue between Garga and Bhārgava, wherein Garga says to the questioner that if a child be born on Mūla first quarter, it causes the father's death, if in 2nd quarter mother's death, if in the 3rd quarter loss of property and birth in the 4th quarter is beneficial and then provides that in case of birth in 1st quarter the child may be pierced and blood allowed to flow, in the 2nd quarter it may be handed to a stranger, in the case of birth in the other two quarters a *Śānti* rite may be performed

medieval astrology, viz. that a person's future is determined at the time of the birth and that his destiny can be inferred from his horoscope. It will be shown immediately that India was in contact with Mesopotamia and the countries of the Near East from very ancient times. This contact became very close after Alexander's invasion of India about 325 B C. and in the 3rd century B. C. It appears to me probable that Indians who had already the naksatra astrology saw the signs of the Zodiac on Babylonian monuments and boundary stones and adapted them to their own astrological purposes just about the time when the Greeks derived their inspiration for individual astrology from Babylonians.

In 'Gayā and Buddha Gayā' (Calcutta, 1934) Dr. B. M Barua draws attention (pp 90–92 and 121 of vol. II) to the fact that one can detect on the railing pillars at Buddha Gayā some of the motifs representing the rāśis or signs of the Zodiac (vide figures 43 a to j, which resemble the signs from Vrsa to Tulā, Dhanus and Makara). These figures were drawn in the 1st century B. C and would go at least some way towards negativing the view of Weber and others that the rāśi system was borrowed by Indians from such Greek writers as Firmicus and Paulus in the 4th century A. D. These Buddha Gayā figures closely resemble the figures drawn on monuments and boundary stones in Babylonia (vide figures opposite) All the railing pillars are not preserved.

A few words may be said about the intercourse between Babylon and India. A. H. Sayce says[893] that as far back as the 3rd millennium B C there was cultural and possibly racial continuity between Babylon and the Punjab and the intercourse was by land and that so far there is no evidence that it was by sea. Peacocks, rice and Indian sandalwood were known in Palestina under their Tamil names in the Hebrew chronicles of Genesis and Kings[894] The Bogozkeui Inscription of about 1400 B. C. recording treaties between the king of Hittites and the king of Mitanni shows the dynasts of the latter people had the

893 'On Aryan problem–fifty years later' in Antiquity vol. I (1927) pp 204–215, particularly p 206 and p 210; on p 204 he rebukes the European scholars, and especially Germans for their fondness for treating negative evidence as of great value in putting forward theories which broke down on further search being made.

894. Vide I Kings chap. X 11–29, 2 Chronicles IX. 21 and 'Early commerce of Babylon with India' JRAS for 1898 pp 241–273,

Vedic gods Indra, Varuna Mitra and Nāsatya in their pantheon.[895] The archives of Bogozkeui contained an elaborate treatise on four tablets on the training of horses by a certain Kikkuli of the land of Mitanni in which are found certain technical terms akin to Sanskrit; and the personal names of the kings and nobles from Mitanni, Nuzi and Syrian documents betray an Indo-European [896] origin. The Bāveru-jātaka refers to the trade by sea between Babylon and India.[897] Greek ambassadors such as Megasthenes from Seleucus to Candragupta Maurya, Daimachus to Bindusāra (son of Candragupta) had been sent to India and it is not too much to hold that there was reciprocity from the Indian side and Indians had gone as envoys to the Seleucid and Ptolemaic courts many years before Aśoka sent his missionaries.[898] Asoka's edict No. 13 refers to five kings of the Near East to whom Buddhist missionaries had been sent, viz. to

895. L. R. Farnell (1911) in 'Greece and Babylon' p. 46, Winternitz's History of Sanskrit Literature vol. I. pp. 303–306 (English tr.,) and 'Antiquities of Iraq' by Svend Aage Pallis (Copenhagen, 1956) p. 615.

896. Vide J. A. O. S. vol. 67 (for 1947) pp. 251–253 by Dr. P. E. Dumont, Gurney on 'The Hittites' (Pelican series) pp. 104–105, Sarton in 'A History of Science' p. 85. Hrozny tentatively puts the date at 1360 B. C. A. H. Sayce in Pavry commemoration vol. pp. 399–402 draws attention to the fact that Hittite numerals like aika, tera, panz, satta, nāwa are Sanskrit and also words like aikawartanna (one turn) and concludes that in Mesopotamia and East Asia Minor lived in 15th century B. C. a people that spoke Sanskrit. Vide 'Comparative Grammar of the Hittite Language' by E. H. Sturtevent and E. A. Hahn, vol. I (1951, Yale University Press) p. 4 para 8 about the treatment of the few Indian words that are quoted in the Bogazkoy documents. It is stated there that the works on horses composed by Kikkulis of Mitanni contain several technical terms that include Indian numerals, that a treaty between the Hittite king Suppiluliumas and Mathiwaza of Mitanni contains the names of several vedic gods, and that these forms are clearly traces of the language of Indian aristocracy in the Hurrian State of Mitanni.

897. 'Jātakas' tr. by Francis and Neil, vol. III p. 83 (Jātaka No. 339) about a crow and a peacock carried in a ship to Bāveru, where the peacock was the Buddha in a former life.

898. Vide 'House of Seleucus' vol. I p. 297 by E. R. Bevan (London 1902). Strabo (15. 1. 4 and 15. 1. 73) states that an embassy from a king Pandion (Pāndya) was received in the west and that an Indian embassy brought to Augustus a letter from its king in Greek written on parchment and a sophist from Barogsa (? Barygaza or Broach). The Junagadh Inscription of Rudradāman (2nd century A. D.) mentions a *yavanarāja* Tuṣaspha, a provincial governor of Aśoka in Kathiawar (E. I. vol. VIII p. 36).

Antiyoga (Antiochus of Syria), Turamaya (Ptolemy II of Egypt), Antikina (Antigonus of Macedonia), Magā (Magas of Cyrene) and Alikasundara [899] (of Epirus) The Gospel of Matthew (chap. 2, 1–2) states that at the birth of Christ in Bethlehem wise men from the east came to Jerusalem saying that they had seen in the east the star of the newly born child and had come to worship him. The life of Apollonius of Tyana written by Philostratus [900] (in the first quarter of the 3rd century A. D.) states that it was usual in India to show great hospitality to Babylonians and that the Indian king, Iarchus, presented to Apollonius seven rings named after the seven planets of which he was to wear one on each week day.

The theory that is sought to be propounded here is that the sight of the signs of the Zodiac on such patent objects as monuments and boundary stones in the 4th and 3rd centuries B.C excited the curiosity of Indians visiting Babylonia, that on knowing their significance they brought the knowledge back to their country and fitted it on to the naksatra astrology that already existed in India and developed the rāsi astrology in their own way Varāhamihira expressly says about dreskānas that he describes them in accordance with the views of Yavanas If the whole Indian astrology had been derived from the Yavanas there was nothing to prevent him from saying so The verse 'Mlecchā hi yavanās &c' (in note 743 above) implies that the Yavana astrological tradition and Indian one were not the same and that the Yavanas had composed Sanskrit works on astrology (as the author's two papers show). Varāha expressly differs from the Yavanas on

---

899 The latest date at which all these five kings were alive is 258 B C Vide Corpus Inscriptionum Indicarum, vol I (ed by Hultzsch, 1925) pp 48, 87.

900 Vide a summary of the 'Indian travels of Apollonius' by Osmond De Beauvoir Priaulx in JRAS 1860, pp 70–105 (p. 78 for Babylonians and p 99 for seven rings), Loeb Classical Library, vol I p 323 Some scholars hold that the life is a fabrication and that Apollonius never came to India. Supposing for argument that it is a fabrication, the fact remains that in the first quarter of the 3rd century A D Philostratus knew that Babylonians were respected in India, that seven planets were known in India and that planets were supposed to be propitiated by the wearing of rings on appropriate week days Charpentier wrote a booklet 'Indian travels of Apollonius of Tyana' (Leipzig, 1934) in which he stated that he felt convinced that Apollonius had been in India but did not go further than the altars of Alexander (vide 'Indian Culture' vol III, p 241 for a review of Charpentier's booklet)

several substantial points.[901] About 200 B. C. the vernal equinox was at the beginning of the divisional sign Aries, which very closely coincided with the picture sign Aries The Indian astronomers, when they began to make use of the signs Mesa and others, switched over from the reckoning with the Krttikās as the beginning of the series of naksatras on to the reckoning from the naksatra Aśvinī, and counted Aśvinī as the first naksatra, though the vernal equinoctial point has now receded owing to precession to the Uttarābhādrapadā naksatra group. It is difficult to trace and describe the early efforts of Indian astrologers in the centuries preceding the Christian era on the system of rāśis, since the excellent work of Varāha, the Bṛhajjātaka, eclipsed all its predecessors and led to their gradual disappearance just as the two works of Ptolemy, Syntaxis (or Almagest) and Tetrabiblos, led to the gradual loss and disappearance of Greek works on astronomy and astrology composed before Ptolemy. Though all scholars maintain that Greek horoscopic astrology was influenced by Babylonian astronomy and astrology, the connecting links have snapped and become obliterated.[902] It is likely that, as both India and Greece were influenced by the Babylonian system of signs and astrology, both show some common characteristics. But it is too wide of the mark to assert that Indian astrology as developed in Varāhamihira was *borrowed* from Firmicus and Paulus Alexandrinus. Prof. Neugebauer, while asserting that the Sūrya-siddhānta is based on Greek eccentric and epicyclic devices, holds that they were modified by

---

901. To mention only a few striking matters of differences of opinion between Varāha and Yavanas, (1) Yavanas favoured the view that all planets could be lords of horā (half of a rāśi), while Bṛ J. said no to this (I 11-12); (2) Yavanas held that the moon was never a malefic planet, Br J. (II 5) said it was so in certain cases; (3) Yavanas regarded Mars as sāttvika, while Br. J. (II. 7) held Mars to be *tāmasika*, (4) Yavanas held that planets could only be friends or enemies among themselves, while Br. J. (II. 15) held that they could also be neither friends nor foes; (5) Yavanas and Varāha differed on the temporary friendship or enmity of planets (Br. J. II. 18), (6) Yavanas spoke of Vajrayoga, but Bṛ J. (XII 3 and 6) held that such a yoga was impossible, (7) Yavanas held that only the Kumbha-dvādaśāṁśa was inauspicious, the Bṛ J. (XXI 3) found fault with this.

902. Vide Prof Neugebauer in E. S, A., p. 93 Prof. Waerden (in Journal of Near Eastern Studies, vol 8 p. 76) remarks that Hellenistic Astrology is a mixture of Chaldean, Egyptian and Greek elements and that there are more Babylonian elements in this mixture than is generall supposed.

the Indians and that what he means is not that there was *copying*, but an intelligent modification of the initial impetus (vide 'Archives Internationales D'Histoire des Sciences' for April-June 1955 (at p. 171 and note 32) It has been shown above in note 869 that the Br J differs from Firmicus as to dreskānas and about *bhāvas* (places in the horoscope) My hypothesis is that Indian astrology about *rāśis* and bhāvas was developed before even Ptolemy I have pointed out the differences between Ptolemy and Varāha in many places.[903]

Horoscopes are cast not only for individuals, but also for companies, ships, animals,[903a] foundations of buildings, cities and countries. If a person comes to an astrologer for consultation on any matter, the astrologer notes the sign rising at the time the question is asked, calculates the positions of the planets also for that day and time and then makes his prognostications[904] For casting the horoscope of an individual one must know the year, month, day, hour or *ghaṭikā* of birth and the place of birth. Almanacs are prepared on the basis of the latitudes and longitudes of cities like Bombay or Poona or Calcutta and they furnish tables by following which one can find the sign rising at the time of the birth of a person But the almanacs being based on the latitudes and longitudes of certain towns and cities, if a person uses an almanac prepared in Poona for casting the horoscope of a person born in Berar or Central India there is likely to be some inaccuracy in arriving at the proper *lagna*.

---

903. Vide e g pp. 568, 575, 583, 589

903 a Aldous Huxley in his novel 'Crome yellow' (*Phoenix Library*, 1929) satirizes society ladies who spent their days in casting the horoscopes of horses on which they laid heavy bets (p. 13).

904 There are two well-known works dealing with astrology connected with the time of questions, viz Sat-pañcāśikā of Prthuyaśas, son of Varāhamihira, and the Āryāsaptati of Utpala (printed by Nirn. Press, Bombay) Two verses (5 and 35) from the first book may be quoted here· होराश्चित' पूर्णतद्वं शशाङ्को जीवेन दृष्टो यदि वा सितेन। क्षिप्रं प्रणष्टस्य करोति लब्धिं लाभो· पयातो बलगान् क्षुमश्च॥ दूरगतस्यागमनं सुतधनसहजस्थितैर्बलैर्लग्नात्। सौम्यैर्नष्टमाप्ति लघ्वा· गमनं गुरुसितास्यात्॥ लग्नात् in verse 35 means the lagna at the time the question is asked Verse 55 of the same is अंशकाज्ञाप्यते द्रव्य द्रेष्काणैस्तस्करा स्मृता' राशिभ्य कालविग्देशा वयो जातिश्च लग्नपात्॥ 'material stolen is inferred from the navāṁśa of the lagna at the time of the question, the characteristics of the thieves from dreskānas of the lagna (as described in Br J chap. 27), from the rāśis time, direction and location are learnt and the age and caste of the thief from the lord of the lagna'.

Horoscopes are framed either in square figures or in circular figures and even as to square horoscopes, there is some variance in the practice of placing the *lagna* (the sign rising on the horizon at the time of birth). Supposing the lagna is Simha, the square horoscope as usually drawn in Mahārāstra would be as follows where the figures 6, 2 and 4 would represent the 2nd, 10th and 12th *bhāvas* (places), while a horoscope cast on the modern European method would be like the one next to it with the same lagna and employs symbols for the signs as for Aries and for planets such as for Mars.

CHAPTER XVII

MUHŪRTAS FOR RELIGIOUS RITES

We shall now turn to the muhūrtas for religious rites and actions of individuals. Only a few of the rites and actions can be briefly dealt with here.

A few general rules may however be first stated The Atharvana[905] Jyotisa says that a wise man should perform an act or rite with the concurrence of all the four, viz. *tithi*, *naksatra*, *karana* and *muhūrta*, if he wants success in it. if a proper tithi cannot be secured then the other three should be availed of, if the first two are not available then the next two, if the first three are not available then secure *muhūrta* alone; but if there be necessity to hurry and none of the four can be secured, then with the loud declaration by (learned) brāhmanas that it is an auspicious day he should do the act and success is secured Certain religious acts have to be done at stated times and in those cases, one should not consider the conditions of Jupiter and Venus called *bālya* and old age or the fact of Jupiter being in Lion sign, or of *daksināyana* or there being an intercalary month, as for example, in the rites from *pumsavana* up to *annaprāśana*. The Rājamārtanda[906] states 'the correct astrological position of planets and days is not meant for times of distress, all these (rules about auspicious positions) are to be considered when life is easy (matters are in good condition), so says Bhrgu'. Monday, Wednesday, Thursday and Friday confer success in all actions (begun on those days), only those actions succeed on Sunday, Tuesday and Saturday, for which those days are expressly laid down as proper. But the Nāradapurāna says that Wednesday, Thursday and Friday are the best, Sunday and Monday are middling and the other two, viz. Tuesday and Saturday, are condemned for Upanayana[907]

---

905 चतुर्भि कारयेत्कर्म सिद्धिहेतोर्विचक्षण.। तिथिनक्षत्रकरणमुहूर्तेनेति निश्चय ॥ दूरस्थस्य मुहूर्तस्य क्रिया च त्वरिता यदि। द्विजपुण्याहघोषेण कृतं स्यात्सर्वसम्पदम् ॥ आथर्वण-ज्योतिष VII. 12 and 16.

906. ग्रहवत्सत्वशुद्धिश्च नार्ते कालमपेक्षते। स्वस्थे सर्वमिद चिन्त्यमित्याह भगवान्भृगुः ॥ राजमार्तण्ड folio 25a, verse 388

907. सोमसौम्यगुरुशुक्रवासराः सर्वकर्मसु भवन्ति सिद्धिदाः। भानुमौमशनिवासरेषु च मोक्षमेव खलु कर्म सिध्यति ॥ रत्नमाला III 15; आचार्यसौम्यकाव्याना वारा प्रशस्ता. शशीनयो। वारौ तु मध्यमौ चैव व्रतेऽन्यौ निन्दितौ मतौ ॥ नारदीयपुराण I. 56. 359–60

The general rule is that all undertakings succeed when they are begun while the 3rd, 6th, 10th and 11th places from the *lagna* are either in conjunction with or have an aspect with an auspicious planet and the lagna is also in conjunction with the two, when the 8th and 12th places are faultless and the Moon is in the 3rd, 6th, 10th or 11th place.[908]

It should be remembered that the usual tendency of our medieval Dharmaśāstra writers is generally to heap details on what were originally simple ceremonies.

Among the samskāras it is best to begin with Jātakarma (rites at the birth of a child). The Ratnamālā[909] provides that the rites on the birth of a son should be performed on a *mrdu, dhruva, ksipra* or a *cara* naksatra and the good recommend the giving of a name when Jupiter or Venus is in *catustaya* (i e. in the 1st, 4th, 7th or 10th bhāva in the infant's horoscope). As regards birth some writers (e. g. M. M. IV. 19) speak of Gandānta which is inauspicious in birth, marriage and starting on a journey or invasion, viz the conjunction of 15th tithi with *pratipad* for two *ghatikās*, similarly half a ghatikā when Cancer and Lion or Scorpion and Archer or Fish and Ram join and the four ghatikās of the junction of Revatī and Aśvinī, Āśleśā and Maghā, Jyesthā and Mūla These Gandānta conjunctions produce evil for the child's father or mother &c. Similar results are predicted for birth on certain parts of Āślesa and Mūla. About naming a child Manu provides that it should be performed on the 10th or 12th day from birth or on an auspicious tithi or on a muhūrta or naksatra possessed of auspicious characteristics[910] About *caula* or cūdākarma (tonsure) Āśvalāyana-grhya (I. 17. 1) provides a simple rule that it should be performed in the third year after birth or according to family usage, while Manu (II 35) provides that it may be performed in the first or third year; the Āśv. gr, however, has provided for caula, upanayana, godāna and marriage the proper time of the northward passage of the sun, the fortnight of the waxing moon and an auspicious naksatra The Āp. gr. (16. 3) states that it may be performed

909. मृदुध्रुवक्षिप्रचरेषु भेषु सूनोर्विधेयं खलु जातकर्म। गुरौ भृगौ वापि चतुष्टयस्थे सन्तः प्रशंसन्ति च नामधेयम्॥ रत्नमाला XIII 2

910 नामधेयं दशम्यां तु द्वादश्यां वास्य कारयेत्। पुण्ये तिथौ मुहूर्ते वा नक्षत्रे वा गुणान्विते॥ मनु II. 30.

in the 3rd year after birth on Punarvasu naksatra. But medieval writers have added numerous astrological details For example, the Rājamārtanda devotes thirty-two verses to *cuula* (folios 16 to 18), one remarkable provision being that the Yavanas regarded *cūdākarma* in the Sun's northward passage as auspicious [911] Vyāsa quoted by Sm. C. says 'tonsure should be performed on Aśvinī, Śravana, Svātī, Citrā, Pusya, Punarvasu, Dhanisthā, Revatī, Jyesthā, Mrgaśirsa and Hasta and should not be performed on the person's naksatra of birth, nor on Pūrvābhādrapadā, Uttarābhādrapadā and Krttikā, one should avoid for tonsure the first tithi (after amāvāsyā), *riktā* tithi (4th, 9th and 14th), *Visti*, Sunday, Tuesday, Saturday and night [912]

Similar rules are laid down for ordinary shaving in the case of grown-up men [912a] Some verses may be quoted here 'the following naksatras are beneficial in the matter of shaving, viz. the naksatras, Hasta, [913] Citrā, Svātī, Mrgaśiras, Śravana, Dhanisthā Śatabhisak, Revatī, Aśvinī, Jyesthā, Pusya and Punarvasu or when any naksatra is at the time of its rise in conjunction with the moon provided there is also *tārābala* (as defined below). Shaving is commended when the rising sign is Makara, Dhanus, Kanyā, Mithuna or Vrsa; observing this produces prosperity, strength and growth of intelligence, if shaving is done when any of the other signs is rising, that leads to disease and danger Shaving is allowed on all naksatras at the king's command, with a brāhmana's consent, at the time of marriage, on the advent of impurity due to death, on the release of an imprisoned person and in *dīksā* (consecration rites) on a solemn Vedic sacrifice'

We now turn to Upanayana, one of the two most important *samskāras*. Āsvalāyana-grhya (I. 4. 1) as noted above (p 605)

912a A proverbial line quoted as early as 4th century A D. by Ausonius (310-393 A D) in Eclogues p 203 (vide Loeb Classical Library, 1919) runs 'cut nails on Tuesday, beard on Wednesday, hair on Friday.'

913 हस्तात्रयं मृगशिर श्रवणत्रय च पौष्णाश्विशुक्रगुरुभानि पुनर्वसू च । क्षौरे तु कर्मणि हितान्युदयक्षणे च युक्तानि चोडुपतिना यदि शुद्धतारा. ॥ क्षौर प्रशस्तं मृगचापलग्ने

(*Continued on next page*)

laid down one simple rule for the proper time of four samskāras. Ap Dh [914] S. laid down two further rules providing that the upanayana of a brāhmana, ksatriya or vaiśya boy should be performed respectively in spring, summer and autumn and the proper ages for these three are respectively the 8th, 11th and 12th from conception The same ages are prescribed by Manu II. 36 and Yāj. I. 14. It may be noted that none of the sūtras nor the smrtis of Manu and Yājñavalkya say a word about the position of planets or rāśis or week-days or month. Gradually such rules were heaped up. The Rājamārtanda devotes 70 verses (from 304 to 373 on folios 20a to 24a) to upanayana It states that the years were to be counted from conception or birth. To find proper muhūrtas for upanayana has become a very intricate matter and such muhūrtas are few and far between. Only a few such rules can be indicated here. First as to months. One text lays down 'Upanayana is commended (for all) when performed in the five months from Māgha (i. e from Māgha to Jyestha); while Vrddha-Gārgya quoted in Kālādarśa provides that it may be performed in the six months from Māgha. [915] Another rule provided 'that no auspicious rites (like upanayana and marriage) should be performed on the naksatra, month and week-day on which the person concerned was born and no auspicious rite for the eldest son or eldest daughter should be performed in the month of Jyestha' [916] The sages differed about the month of birth. Vasistha said that only the day of birth was to be avoided, Garga says only eight days of the month of birth were to be

कन्याकन्यलग्ने मिथुने वृषे च। पुष्टिं बल बुद्धिविवर्धनं च शेषेषु रोगं कुरुते भय च॥ वृषाङ्गया ब्राह्मणसंमतेन विवाहकाले सुतसूतके च। चन्द्रस्य मौढ्ये क्रतुदीक्षणे च सर्वेषु शस्तं क्षुरकर्म भेषु॥ राजमार्तण्ड folio 16b, 17b, 18a, verses 258, 272, 279, भुजबल pp 130–131, अपरार्क p 30 (first verse), स्मृतिच I. p. 23 (last verse) The last verse (वृषाङ्गया &c.) is बृहत्संहिता 98, 14 (Kern's ed.).

914. वसन्ते ब्राह्मणमुपनयीत ग्रीष्मे राजन्यं शरदि वैश्यं गर्भाष्टमेषु ब्राह्मणं गर्भैकादशेषु राजन्यं गर्भद्वादशेषु वैश्यम्॥ आप. ध सू I. 1. 1. 19 Śabara in his bhāsya on Jaimini VI 1 33 quotes the words वसन्ते ब्राह्मण वैश्यम् apparently as a Vedic text. उपनयनमाहुरिष्ट द्विजस्य गर्भाष्टमेऽष्टमे वाब्दे। नो चेच्चत्वमे वर्षे त्रयोदशे द्वादशे वा॥ राजमार्तण्ड verse 310.

915 तथा च ज्योतिःशास्त्रम्। माघादिषु तु मासेषु मौञ्जी पञ्चसु शस्यते। स्मृतिच I p 27, नि सि p 262 (quotes it from हेमाद्रि on काल p 747), कालादर्शे वृद्धगार्ग्यः। माघादिमासपञ्चके तु मेखलाबन्धनं मतम्। नि. सि. p 262.

916. जन्ममासि न च जन्मभे तथा नैव जन्मदिवसेऽपि कारयेत्। आद्यगर्भभवितु सुतस्य वा ज्येष्ठमासि न तु जातु मङ्गलम्॥ रत्नमाला XVI. 5 of श्रीपति q by com on मुहूर्तचिन्तामणि V. 45. This prohibition about Jyestha has no basis beyond the fact that the same word is applied to the month and to the eldest son or daughter.

avoided, Atri says ten days and Bhāguri says the fortnight of birth in the month was to be avoided [917] No upanayana was to be performed when the moon was lost in the rays of the sun, when Venus had set, when the sun was in the first *amśa* (degree) of a *rāśi* and on days which were declared to be unfit for vedic study and on *galagraha* [918] Certain tithis and times were called galagraha (as stated in the note) [919] If Jupiter be in the 2nd, 5th, 7th, 9th or 11th rāśi from the rāśi of birth, then Jupiter is very auspicious; if Jupiter be in the 1st, 3rd, 6th or 10th rāśi from the rāśi of birth he becomes auspicious after a *śānti* rite; if Jupiter be in the 4th, 8th or 12th rāśi from birth he is inauspicious. [920]

One rather convenient doctrine of the astrologers was that an evil planet may be mollified and the evil consequences of its influence avoided, or, if not altogether avoided, substantially reduced or abated by appropriate rites (called *śāntis*) or by wearing certain precious stones and metals and by various other means enumerated in the Ratnamālā [921] 'one should wear coral for appeasing Mars and the Sun, silver for Venus and the Moon, gold for Mercury, pearl for Jupiter, iron for Saturn and *rājāvarta* (a kind of inferior gem) for the other two (Rāhu and Ketu). The Ratnamālā provides that planets may not possibly afflict a man if he engages in prostrations before images of gods and before brāhmanas, if he carries out the advice of elders, by holding daily conversations with the good, by listening to the

loud recitation of the Vedas and to the stories about the great, by offering *homa*, by seeing the performance of Vedic sacrifices, by making the mind pure, by *japa* (inaudible repetition of mantras), by making gifts. The Brhatsamhitā has a similar verse. Ratnamālā X. 16 and Muhūrtacintāmani IV. 9 provide that one should possess a golden ring divided into nine compartments, one being in the middle in which there is to be a ruby for placating the Sun, and in eight directions from the east onwards should be set in order: a diamond for placating Venus in the east, a fine pearl for the moon (in S. E), coral for Mars (South), *gomeda* for Rāhu (in S. W.), fine sapphire for Saturn (West), Vaiḍūrya (cat's eye gem) for Ketu (N. W.), pusyarāga (topaz) for Jupiter (North), emerald for Mercury (N. E.). Such rings are worn even in these days by some people.

As in ancient times upanayana was meant for conferring on the boy the authority to study Veda and as the planet Jupiter (Guru) was identified with Brhaspati, the *guru* of the gods and the Lord of Speech, great importance was attached to the position of Jupiter But exceptions were introduced even when Jupiter was apparently not favourable. One exception was 'even if Jupiter be in the 8th place from the rāśi of birth or be in the sign of Lion (which is the svagrha of the Sun) or in depression (i. e in Makara) or in the house of his enemy, upanayana would be auspicious if performed in Caitra when the Sun is in Pisces (which is the svagrha of Jupiter) This exception is due to the fact that the principal time for upanayana is the 8th year from conception or birth and other conditions are of secondary importance, as the Dharmasindhu says.[922] Certain naksatras alone were declared to be auspicious for upanayana and *samāvartana* of dvijas viz on the naksatras Hasta, Citrā, Svāti, Pusya, Dhanisthā, Revatī, Aśvinī, Mrgaśiras, Punarvasu and Śravana; upanayana was to be performed on a commended tithi when the Moon is powerful (i e from 5th of bright half to the 5th of the dark half) [923]

Very intricate astrological rules are provided for marriage. The Āśv. gr. S. (I. 4. 1–2) laid down a very simple rule about

---

922 अष्टमवर्षादिमुख्यकाले मुख्यबलाभावेपि मीनगतरविसुतचैत्रे वा ज्ञात्वा वा व्रतबन्धः कार्यो न तु मुख्यकालातिक्रम । नित्यकालस्य बलीयस्त्वात् । धर्मसिन्धु p 201.

923. एतत्त्रये मुख्यधनिष्ठोत्त्र पौष्णाश्विसौम्यादितिविष्णुमेषु । शस्ते तिथौ चन्द्रबलेन युक्ते कार्यो द्विजानां व्रतबन्धमोक्षौ ॥ हेमाद्रि on काल p. 749, रा. ना (folio 20 b verse 316) quoted by अपरार्क p. 32 (without name)

the proper times for four samskāras which has been quoted above (p. 536 note 778). The Baud. gr. (I 1. 18–20) provides that marriage may be celebrated in all months, that according to some, the months of Āsādha, Māgha and Phālguna are to be avoided and that the auspicious naksatras for marriage are Rohinī, Mrgaśīrsa, Uttarā-Phalgunī and Svātī (vide notes 726 and 777 above). The Āp gr. (I. 2. 12–13) is to the same effect as to months (vide note 775). The Kauśikasūtra[924] (75. 2–4) approaches medieval and modern practice as it prescribes that marriage should be celebrated after the Full Moon of Kārtika up to the Full moon of Vaiśākha or one may do as one likes but one should avoid the month or half month of Caitra. In medieval and modern times there was some difference of opinion. The Rājamārtanda (that devotes over 150 verses to the treatment of marriage) allowed all months for marriage except Caitra and Pausa[925] But works like the Dharmasindhu say that the months of Māgha, Phālguna, Vaiśākha and Jyestha are auspicious, Mārgaśīrsa is middling and in some works Āsādha and Kārtika are allowed and that usages of the country should be followed.

Then consideration is to be given to the naksatras, the week days, the positions of the planets, particularly Jupiter, Venus, Sun and Moon. But before doing so I would like to draw the attention of modern sticklers for astrological requirements about the marriage of a girl to the practical advice and wise words of the Rājamārtanda and Bhujabala composed in the first half of the 11th century A. D. The Rājamārtanda[926] says 'when

926. राज्ञा ग्रस्तेऽथवा दुष्टे पितृणा प्राणसंक्षये। अतिमौढा तु या कन्या न तु काल प्रतीक्षते । अतिमौढा तु या कन्या न तु धर्मविरोधिनी । अविक्षुब्धा तु सा देया लग्नचन्द्रबलैर्विना ॥ राजमार्तण्ड (folio 24b and verses 397–398) q by उद्वाहतत्त्व p 124 (reads नाहकूर्च्यं प्रतीक्षते and चन्द्रलग्नबलेन तु), नि. सि p 303 (reads राहुग्रस्ते) संवर्त (verse 67) laid down that a girl was to be married before she reached puberty, but the marriage of a girl when she is eight years old is to be commended. Parāśara (VII 9) says that a brāhmana who marries a girl after she has reached puberty becomes unfit to sit for dinner in a row of brāhmanas and he becomes the husband of a vrsali राजमार्तण्ड (folio 25a verse 391) is: अष्टवर्षा भवेद्गौरी दशवर्षा च कन्यका । संप्राप्ते द्वादशे वर्षे प्रायस्तु रजस्वला ॥. So some stigma atta-

(*Continued on next page*)

(an invading) king has seized a country or when war is raging or when the life of the parents is in danger, a maiden who is very much grown up is not to wait for an (auspicious) time; when a maiden is very much grown up, but does not act against the rules of dharma she should be given in marriage, even though she is impure, without minding whether the Moon and the *lagna* are powerful'. The Bhujabala[927] (or Bhujabalabhīma) provides 'the sages declare that in the case of maidens the auspiciousness of planets and of the year, the month, *ayana*, season and days is to be considered only before maidens reach the age of ten years'.

There is some difference of opinion about the auspicious naksatras for marriage, but all are agreed as to Rohinī, Mrgaśiras, Maghā, Uttarā-Phalgunī, Uttarāsādhā, Uttarā-bhādrapadā, Hasta, Svātī, Mūla, Anurādhā, Revatī (vide Br. S. 100. 1). Others like Haradatta add four more viz. Aśvinī, Citrā, Śravana, Dhanisthā. But if any one of these is in conjunction with a malefic planet, it should be avoided. Among weekdays, Monday, Wednesday, Thursday and Friday are auspicious, the other three are middling. According to a verse quoted in Jyotistattva weekdays have no force at night and particularly Tuesday, Saturday and Sunday.[928] Among tithis amāvāsyā is forbidden; *riktā* tithis (4th, 9th, 14th) yield little good, the other tithis yield much good; the bright half of a month is the best and the dark half of a month upto 13th tithi is middling.

Marriage[929] in the case of maidens should be performed in even years after the 6th year if Jupiter is auspicious; in the case of bridegrooms marriage is auspicious (in uneven years), if the Sun is auspicious; marriage is auspicious to both if the Moon is

ches to the grown-up girl also. The भुजबल says 'वृशवर्षव्यतिक्रान्ता कन्या शुद्धिविवर्जिता। तस्मात्तारेन्दुलग्नानां शुद्धौ पाणिग्रहो मतः॥' p. 152. Therefore the राजमार्तण्ड employs the word अविशुद्धा. The उद्वाहतत्त्व softens the rule by saying that all that should be considered is the moon and the lagna at the time of the marriage of a grown-up girl

927 ग्रहशुद्धिमब्दशुद्धिं शुद्धिं मासायनर्तुदिवसानाम्। अर्वाग्वृशवर्षेभ्यो सुतयः कथयन्ति कन्यकानाम्॥ भुजबल q by उद्वाहतत्त्व p 124, ज्योतिस्तत्त्व p. 605.

928. ज्ञानरत्नमालायाम्। न वारदोषा. प्रभवन्ति रात्रौ विशेषतो भौमशनैश्चरार्काः। ज्योतिस्तत्त्व p 595.

929 गुरुशुद्धिवशेन कन्यकानां समवर्षेषु षडब्दकोपरिष्टात्। रविशुद्धिवशाच्छुभो वराणा-मुभयोश्चन्द्रविशुद्धितो विवाह॥ मु. चि VI. 12.

beneficent If Jupiter is in exaltation[930] or in its own house or in the house of a friendly planet then he confers full life, various kinds of wealth and happiness, but if Jupiter is in the first or 8th or is depressed or in the house of an enemical planet or lost in the brilliance of the Sun he produces widowhood and distress to the issue. As regards the lagna at the time of marriage the Sun in the 3rd, 6th, 8th from it, the Moon in the 2nd, 3rd or 4th place from it, Mars in the 3rd and 6th, Mercury and Jupiter in the 8th and 12th are to be avoided. If Venus is in the *lagna* or in the 2nd, 4th, 5th, 9th or 10th place from it, Saturn, Rāhu and Ketu in 3rd, 6th and 8th from it and every planet in the 11th place from *lagna* conduces to happiness in marriage. If at the time of marriage Jupiter[931] is 2nd, 5th, 7th, 9th, 11th from the rāsi of birth he is auspicious to the maiden; if in 1st, 3rd, 6th or 10th place therefrom, he becomes beneficent by performing a śānti rite; if he is 4th, 8th or 12th he is inauspicious: but if Jupiter is (at the time of marriage) in Karka, Dhanus or Mīna, he ceases to be inauspicious even though he may be in the 4th, 8th or 12th place (from rāśi of birth); in a time of pressing difficulty Jupiter though in the 4th or 12th becomes auspicious after performing two śāntis (Bṛhaspati homas) and though in the 8th after three śāntis. In the case of the bridegroom the Sun in the 3rd, 6th, 10th or 11th rāśi from the bridegroom's rāśi at birth is auspicious; if in other rāśis the Sun becomes auspicious after the performance of a homa.

If a maiden[932] has attained the age of puberty then one should not stop to consider whether Jupiter is auspicious; even if Jupiter be 8th from the girl's rāśi of birth marriage should be brought about after three śāntis.

If Jupiter be in the house of the Sun (i. e. in Simha sign) and the Sun is in the house of Jupiter (i. e in Mīna or Dhanus) that is called Gurvāditya, which is condemned for all rites.

932. रजस्वलायाः कन्यायाः गुरुशुद्धिं न चिन्तयेत्। अष्टमेपि प्रकर्तव्यो विवाहस्त्रिभिरर्चनात्॥ लल्ल q. by नि. सि. p. 304.

A good deal is said in the medieval works on Simhastha Guru and the rules laid down on this topic are even now observed by most people. The Rājamārtaṇḍa devotes six verses to it When Jupiter is in the sign Lion several rites would become inauspicious such as marching on an invasion, marriage, *upanayana*, first entrance in a newly built house, the establishment of the image of a god. Certain modifications were introduced by sages. Parāśara provided that no marriage should be performed in the countries between the Ganges and the Godāvarī, when Jupiter was in Lion sign and that when Jupiter was in Maghā naksatra (the first of the 2¼ naksatras of Simha) and when the Sun was in Mīna no marriage in all the countries (of India) should take place; Vasiṣṭha said 'marriage and Upanayana are not bad in *simhastha* Guru when performed in a country north of the Ganges and to the south of the Godāvarī.[933]

On account of the complicated nature of the muhūrta for marriage, a short cut was hit upon called *Godhūlī* or *Gorajas* (literally, dust raised by cows) muhūrta The Rājamārtaṇḍa devotes ten verses to it (folios 34b and 35a, verses 550–559). Three of them are set out here.[934] 'While the Sun, though setting, appears like saffron or red sandalwood paste, while the stars in the sky are not seen to sparkle with their light, while the sky is filled with the dust pounded by cows (returning to their pens) with the tips of their hoofs, that time is declared to be Godhūlikā, which gives rise to wealth and crops and prosperity. In this muhūrta the planets, the tithis, Viṣṭi or stars or constellations do not create an obstacle; this unimpeded *yoga* was

933. यात्रा विवाहो व्रतबन्धनं च प्रवेशयानं च सुरप्रतिष्ठा। अन्येषु कार्येषु च क्षोभनेषु दोषो भवेत्सिंहगते सुरेज्ये । मुजबल p. 275, गुरौ हरिस्थे न विवाहमाहुर्हरीतगर्गमसुरा मुनीन्द्रा । राजमार्तण्ड folio 67a verse 1057, पराशर.। गोदाभागीरथीमध्ये गोदाह. सिंहगे गुरौ। मघास्थे सर्वदेशेषु तथा मीनगते रवौ॥ वसिष्ठोपि। विवाहो दक्षिणे कूले गौतम्या नेतरत्र तु। भागीरथ्युत्तरे कूले गौतम्या दक्षिणे तथा। विवाहो व्रतबन्धश्च सिंहस्थेज्ये न दुष्यति॥ नि. सि. p. 305.

934 यावत्कुङ्कुमरक्तचन्दननिभोऽभ्यस्ताचले भास्करो यावच्चोडुगणो नभ स्थलगतो नो दृश्यते रश्मिभिः। गोभिश्चापि खुराग्रभागदलितैर्व्याप्तं नभ पांसुभिः सा वेला धनधान्यवृद्धि-जननी गोधूलिका ख्यायते॥ नास्मिन्ग्रहा न तिथयो न च विष्टिवारा ऋक्षाणि नैव जनयन्ति कदा न विघ्नम्। अन्यादृत. स तु नामवा (सततमेव ?) विवाहकाले यात्रासु चापसुदितो मृगजेन योगः॥ लग्नं यदा भाति विशुद्धमन्यद् गोधूलिकं साधु तदादिशन्ति। लग्ने विशुद्धे सति वीर्ययुक्ते गोधूलिकं नैव शुभं विधत्ते॥ राजमार्तण्ड folio 34b and 35a, verses 551, 556, 559. The last two are quoted by ज्योतिस्तत्त्व (without name) pp. 610–611 (and one more viz 555). Compare बृहत्सं. 102 13 'गोपैर्पटद्या हताना खुरपुटदलिता या तु धूलिर्दिनान्ते सौहार्दे सुन्दरीणा विपुलधनसुतारोग्यसौभाग्यकर्त्री॥ तस्मिन्काले न चर्क्षं न च तिथिकरणं नैव लग्नं न योगः स्यात्. सुखार्थं शमयति दुरितान्युत्थितं गोरजस्तु॥'

declared by Bhārgava as time for marriage and for starting on an invasion. When no other auspicious *lagna* can be found then sages direct that Godhūlikā (muhūrta) is auspicious; but if a lagna which is auspicious and powerful can be found the Godhūlikā muhūrta does not bring about auspicious results. The Dharmasindhu (p. 254) simply quotes the Muhūrta-mārtanda IV. 38, which says that this muhūrta is intended for śūdras, but that in times of great difficulty when the girl has reached puberty it may be auspicious also for brāhmanas and persons of other varnas. In these days also this Gorajas muhūrta is sometimes resorted to by all varnas.

There are other complicated astrological matters for consideration in marriage such as Daśayogacakra (R M. folios 35b–36b), Saptaśalākācakra (R. M folio 36b–37b), which are passed over here. But there in one matter that is sometimes gone into even now and that must be briefly alluded to, viz the calculation of the *gunas* (marks) on the comparison of eight matters concerning the naksatra and rāśi on which the intending bride and bridegroom were born This is designated 'vadhūvaramelakavicāra' or 'ghatitagunavicāra' The eight matters (kūtas as they are called) are varna, vaśya, tārā, yoni, grahamaitrī, ganamaitrī, rāśikūta and nādī,[935] varna carrying one mark, each succeeding one having one more mark (in all 36) than the one immediately preceding All of them are not described even in the latest works; for example, the Dharmasindhu deals only with the last four. Two of these, viz gana and nādī are attached great importance even now among brāhmanas and other classes also. I have described these two in H of Dh. vol II. p 515. All these eight are described at length in Muhūrtamārtanda (IV. 1-12) and Muhūrta-cintāmani (VI. 21-35), Samskāraprakāśa (part of Vīramitrodaya) pp 773ff and Samskāra-ratna-mālā pp. 519ff. One[936] rule made matters easy in some cases, viz when the rāśi of birth of both bride and bridegroom was the same, but the naksatras of their birth were different or where the naksatra was the same but the rāśis were

935 वर्णो वश्यं तथा तारा योनिश्च ग्रहमैत्रकम । गणमैत्रं भकूट च नाडी चैते गुणाधिका. ॥ मु चि. VI. 21.

936 राश्यैक्ये चेद्भिन्नसूक्ष द्वयो· स्यान्नक्षत्रैक्ये पादभिदे शुभ. स्यात् ॥ मु. चि VI 36. If, for example, the bridegroom was born during the first quarter of kṛttikā naksatra and the bride in the 4th quarter of the same their rāśis would be different (viz. Meṣa and Vṛṣabha) but the nakṣatra would be the same.

different, then no consideration need be paid to *gana* and *nāḍi* and the like and if the naksatra of both is one and the same it would be auspicious if they were born on different quarters of the same naksatra Now that in most educated families the age of the bride and bridegroom is twenty years and beyond and there are also love marriages the rigours of this examination of astrological details have been very much reduced, but they are not completely gone even now. In the author's youth nearly sixty years ago, even if the girl was quite eligible from all other points of view, a marriage among the well-to-do classes was almost impossible if this tallying of marks was not astrologically favourable.

Great importance was attached to the favourable position of Jupiter in the case of marriages. The Ratnamālā[937] states 'Mercury that could be seen (being a good deal away from the Sun) and occupying the 1st, 4th or 10th place in the horoscope removes one hundred astrological defects; Venus removes double of such defects and the teacher of the gods (Jupiter) when powerful certainly renders nugatory even one hundred thousand defects'.

In marriages both *candrabala* and *tārābala* were required. As stated in note 772 above the 3rd, 5th and 7th naksatras from the naksatra of birth were called respectively 'vipad (calamity), 'pratyari' (facing enemy) and 'vadha' (destruction) and they yielded results in consonance with their names; therefore they were to be avoided in auspicious rites and particularly in marriage. The naksatras from that of birth were arranged in three groups of nine In the 2nd group the evil ones would be 12th, 14th and 16th and in the 3rd group 21st, 23rd and 25th. It was laid down that, where the Moon[938] is powerful, the *tārābala* need not be considered, but where the Moon is weak (as in the dark half), then the strength of tārās is pre-eminent. Some authors regarded even the naksatra of birth as one to be avoided in certain rites, though acceptable in others. The evil tārās called 'vipad', 'pratyari' and 'vadha' were to be placated respectively by gifts to brāhmanas of jaggery, salt, and gold with sesame.

937. दोषाणां शतमपहन्ति सौम्यसुतः केन्द्रस्थो द्युनमपहाय दृश्यमूर्तिः। दैत्येज्यो द्विगुणमिद द्युनर्बलीयानाचार्यः शमयति लक्षमप्यदृश्यम्॥ रत्नमाला XVI 26

938. जन्माद्यर्क्ष सम्पदथो विपच्च क्षेमप्रत्यरिसाधका वधश्च। मित्रातिमैत्रेति नवैव तारास्युर्जन्मभात् त्रि परिवर्तनेन॥ न खलु चद्वलपक्षे शीतरश्मे प्रभावः कथितमिह हि तारा वीर्यमार्यैः मधानम्। ... शुक्ले पक्षे शीतरश्मिर्बलीयान् न प्राधान्यं तारकायास्तु तत्र। ...चान्द्रोद्धाद्येषु कार्येषु मूर्ते संज्ञाग्रहण्यं तत्फलं चिन्तनीयम्॥ रत्नमाला XI 4, 5, 6, 7, कृष्णे बलवती तारा शुक्ले च बलवान् शशी। तस्मात्कार्यं प्रयत्नेन विशुद्धे चन्द्रतारके॥ राजमार्तण्ड folio 38b, verse 617.

In relation to marriage the Rājamārtaṇḍa[939] says: tithi is declared to have a single value while weekday is four times as good, naksatra is 16 times better, *yoga* has a hundredfold result, the Sun is a thousandfold efficacious, while the Moon is efficacious one hundred thousand times; therefore leaving aside all other *balas* (astrological strengths) one should look to the strength of the Moon as (the pre-eminent) strength.

Now that in most countries including India the kingly office has been abolished, muhūrtas for coronation are of purely academic interest and therefore they are not set out here. Those interested may refer to Ratnamālā XIV. 1-8, Muhūrtamārtaṇḍa VIII. 1, Muhūrta-cintāmani X. 1-4, Rājanītiratnākara pp. 82-84 (ed. by K. P. Jayaswal)

One very important astrological subject was *Yātrā*, which has two meanings, viz. starting on a journey for going to *tirthas* or for earning wealth and marching out for victory by kings The first kind of yātrā is common to persons of all varnas, while the second is concerned only with *ksatriyas* or the king.[940] It appears that not only professed works on astrology but also the Smrtis, the Arthaśāstra of Kautilya and Purānas attached great importance to this subject. The Āśramavāsikaparva[941] 7 12-18, *Manu VII. 181-212*, *Matsya 240-243*, *Agni 233-235*, Visnudharmottara II. 175-176, the Arthaśāstra in books IX ('the work of one who wants to be an invader') and X (relating to war) deal exhaustively with the subject of *Yāna* or *Yātrā*. The subjects of Yātrā are summarised in the Brhat-samhitā as follows[942]. Under Yātrā are included knowledge of proper

tithis, week days, *karanas*, naksatras, muhūrtas, the vilagna (the lagna at the time of starting), the (different) yogas (conjunctions of planets, naksatras, rāśis &c.), the throbbings of the limbs of the body, dreams, baths for victory, sacrifice to the planets, worship of deities in groups (such as Guhyakas), the indications drawn from fire-flames (at the time of homa), the indications derived from the gestures of elephants and horses, the talk of men in the army and its activities, the (nine) planets, the employment of six *gunas* (*sandhi*, *vigraha*, *yāna*, *āsana*, *dvaidhībhāva*, *āśraya*) according to the strength of planets, auspicious and inauspicious things and sights, the four upāyas (sāma, dāna, danda, bheda), *śakunas* (omens), the ground for army encampment, the colour of the flames of fire, the employment as time may require of ministers, spies, envoys, forest tribes and means of securing the enemy's forts.

Varāhamihira, besides devoting several chapters of the Brhatsamhitā (such as 43-50, 88-96) to matters falling under 'Yātrā' composed three works on it, viz. the Brhadyogayātrā, the Yogayātrā and Tikkanikā.[943] Apart from the verses in the Brhatsamhitā, Varāhamihira devotes over 1100 verses to Yātrā. Yātrā is dealt with in several other works also such as the Ratnamālā (XV. 1-74), Rājamārtanda (folios 42a-50a, verses 653-795), the Muhūrtacintāmani (XI. 1-109). The reason why the work is

943. I have not been able to find any printed edition of Bṛhad-yogayātrā I have used a badly written ms. of it in the Bhau Daji collection of the Bombay Asiatic Society. Part of the Yogayātrā (chapters 1–9) was published by Kern in the Indische Studien vol. X pp 161–212, vol XIV pp 312-358, vol XV pp. 167–184 (with translation in German). Mr. Jagadish Lal of Lahore published the whole of it in 1944, but he had a defective ms. and there are many gaps in the text as printed There is a ms of the Yogayātrā in the Bhau Daji collection of the Bombay Asiatic Society with the commentary of Utpala There are 16 chapters of the Yogayātrā with about 467 verses (17 chap in the Lahore ed.) and the Brhadyogayātrā ms. has 34 chapters and about 520 verses i e. the latter is slightly larger than the former. The Ṭikkanikā is a small work (in nine chapters and about one hundred verses) recently published by Mr. V. R Pandit (who devotes great industry and acumen in arriving at a tolerable text) in the Journal of the Bombay University, vol. XX part 2 (for 1951) pp. 40–63 Vide my paper on 'Varāhamihira and Utpala' in JBBRAS vol 24–25 (new series) pp. 2–4 and 27. The word is variously written in the mss and by Utpala as टिक्कनिक, टिक्कणि, टिक्कनिका, टिक्कनिकयात्रा.

called Yogayātrā is as follows: When a war[944] is impending, to look out and wait for auspicious tithis, week-days, naksatras would involve a great delay. Therefore, the conjunctions and positions of certain planets in some fixed places (i e. yoga) is looked upon as the principal astrological matter The Yogayātrā and Ratnamālā say:[945] Just as even a poison may work like nectar when mixed (with other substances like milk) or just as even honey taken with ghee may act like poison, in the same way a planet giving up its own peculiar power yields results due to certain conjunctions. Kings march out on conjunctions, thieves and bards act on *sakunas*, brāhmanas act on the efficacy of naksatras, others (than these) secure their objects on the strength of muhūrtas.

In Brhaj-jātaka (28.3) Varāha declares that he will enumerate the topics concerning Yātrā[946] and verses 4-5 specify th topics, which agree in the main as to names of titles and their order with those in the Brhad-yogayātrā chapters II-XX and not with those of the Yogayātrā All these works cover a very wide field and deal with many subjects that are not strictly astrological (as the quotation from the Brhatsamhitā cited above in note 942 will show) Even the purely astrological material runs into hundreds of verses and all that can be attempted here is to indicate very briefly some of the material

If a person's rising sign at birth (lagna) is not known, then the lagna at the time of asking a question about Yātrā may be used for astrological purposes. If such a lagna is either Mesa, Karka, Tulā or Makara and is occupied by auspicious

946 नेष्टा योगा जातकं " जन्मन्येतत्यात्रिक चाभिधास्ये॥ प्रश्नास्तिथिर्मे दिवस: क्षणश्च चन्द्रो विलग्नं स्वथ लग्नभेद:। शुद्धिर्ग्रहाणामथ चापवादो विमिश्रकाख्यं तद्वेषनं च॥ अत पर शुद्धग्रपूजन स्यात्स्वम तत स्नानविधि प्रदिष्ट। यज्ञो ग्रहाणामथ निर्गमश्च क्रमाच्च दिष्ट शकुनोपदेश॥ बृहज्जातक 28 3-5

planets or has an auspicious aspect with any of them, then the questioner becomes successful in his undertaking; but if the lagna, whatever it may be, is occupied by Mars and the Moon or if the Moon is aspected by Saturn or is in the 7th or 8th place and the Sun is in lagna or if a malefic planet occupies the lagna or the 4th, 7th or 8th place, then in all these cases the questioner would be defeated or destroyed (by his enemies)[947] The week–days were regarded as not of much importance in Yātrā. The 6th, 8th, 12th tithi, Full Moon tithi, amāvāsyā, riktā tithi (4th, 9th, 14th) and the first of the bright half were not commended for Yātrā (the rest were commended) and yātrā was commended on nine naksatras, viz. on Aśvinī, Punarvasu, Anurādhā, Mrgaśiras, Pusya, Revatī, Hasta, Śravana and Dhanisthā The Yogayātrā IV, Rājamārtanda (verses 695-752), Ratnamālā XV verses 1-74, Muhūrtacintāmani XI. 55-74 furnish numerous conjunctions that would make a king successful. A few are set out here by way of sample That king that has at the time of marching on an expedition Jupiter in the *lagna*, Mercury and Venus respectively in 4th and 5th places, Mars and Saturn in 6th, the Sun in the 3rd and the Moon in the 10th secures the complete fruit of what he desires[948], (the king is victorious) if Jupiter is in the lagna and the other planets are in the 2nd and 11th places,[949] when at the time of marching the king has Venus, Mercury and the Sun respectively in the 1st, 2nd and 3rd places his enemies fall into the fire of battle like moths,[950] when Venus occupies either the 4th, 3rd or 11th house, if he has an aspect with Jupiter that is in a *kendra* (1st, 4th, 7th or 10th house) and the malefic planets are in places other than the 7th, 8th or 9th place such a conjunction procures for the king heaps of wealth (and victory).[951]

Certain other astrological matters may be alluded to here. Rainfall in the four months from Pausa is called unseasonable;

947 Vide मुहूर्तचिन्तामणि XI 4–5.

948 लग्ने सुरर्षिभृगू हिबुकात्मसंस्थौ षष्ठे कुजार्कतनयौ दिनकृत् तृतीये। चन्द्रश्च यस्य दशमे भनति प्रयाणे तस्याभिगान्त्रिजतफलातिरलं नृपस्य॥ योगयात्रा IV 6, compare मु चि XI. 55

949 लग्नगत स्याद्देवपुरोधा। लाभधनस्थै शेषनभोगै॥ मु चि XI. 58.

950. मूर्तिवित्तसटजेषु सस्थिता शुक्रचन्द्रसुततिग्मरश्मय। यस्य यानसमये रणाजिरे तस्य यान्ति झटभा इवारय॥ योगयात्रा IV 11; compare मु चि XI 60 almost in the same words

951 अशुभखगैरनवाप्तमदस्थैर्हिबुक्तसहोदरलाभगृहस्थ। कविरिह केन्द्रगोऽपितिहृदो वसुचयलाभकर खलु योग॥ मु चि XI. 67, योगयात्रा IV 20 is almost in the same words.

one should avoid vrata and yātrā for seven days thereafter; unseasonable rainfall does not create any defects to a king (starting on an invasion) if the ground is not (so muddy as to be) marked with the soiled footprints of men and beasts [952] The Muhūrtacintāmani says[953] 'one (the king) should not start as long as the periods of upanayana rite, the establishment of an image, marriage, festivals (like *holikā*) and impurity (on birth or death) have not come to an end and for seven days after unseasonable flashes of lightning, clouds, fall of rain or snow'.

Going out of the house on the 9th tithi from the tithi of entrance, or entering a house on the 9th tithi after the tithi of leaving it and the 9th tithi itself are prohibited and the same applies to week-day and naksatra also.[954]

One should avoid starting in such a way as to face Venus. This belief is very old as the Śāntiparva and Kālidāsa refer to it [955] If the king or any one else has decided on a very auspicious day and conjunction for marching out, but some unforeseen or urgent business prevents him from actually going, he should arrange for what is called *prasthāna* (starting, but returning after going a very short distance or sending forward something on the auspicious day and starting within a certain number of days thereafter) A brāhmana should[956] send out a sacred thread, (a ksatriya) a weapon, vaisya should send honey and a śūdra should send out a pure fruit (like cocoanut) or anyone of whatever varna may send whatever is dear to his heart. The sages differed as to the distance one should proceed

956. अस्थानं ब्राह्मणादीना यज्ञसूत्रमथायुधम्। मध्यमलफलोपेतं प्रशस्तं वृद्धिकारणम्॥ रा मा. folio 49b, verse 771, कार्यार्थेरिह गमनस्य चेद्विलम्बो भूदेवादिभिरुपयंतिमायुध च। कौद्र श्यामलफलमाशु चालनीय सर्वेषा भवति यदेव शुस्थिर्य वा॥ मु चि XI. 89.

for *prasthāna* and then return. Gārgya[957] said that he may proceed from his own house to another house (though very near), Bhrgu holds that one should leave the boundaries of one's village and stay in another village, Bharadvāja provides that one may go as far as an arrow may be discharged and Vasistha says he must go out of the city The *prasthāna* should be made in the direction in which one intended to proceed. If the king resorts to prasthāna he cannot stay in one place for ten days (i e he may stay nine days), a feudatory chief not for seven days and any other ordinary person not for five days and if a person stays beyond these limits he can only start again on a fresh good muhūrta.[958] Even in modern times some people resort to this method of *prasthāna* and generally it is a friendly neighbour's house where the bundle of substances (some rice, betelnut, turmeric &c.) is kept and taken away when actually starting on a journey.

The Yogayātrā XIII. 3 provides that a king when starting on an expedition should see, hear and touch *mangalas* and enumerates them in verses 4-6, 10-15 at length. A few of them are noted here. Auspicious sounds are those of the recitations of the Veda and the auxiliary lores of the Veda, of conches, drums, of words like 'punyāha' (it is a holy day) and of the Purānas Dharmaśāstras, Arthaśāstras, the Mahābhārata and the Rāmāyana; the auspicious chirpings of cranes, *cāsa*, peacocks, swans and jīvajīvika (partridge), crows sitting on the backs of tortoises marked with mud; auspicious objects are the bilva tree *chowries*, sandalwood, cow with calf, a goat, *priyangu* creeper fried grains, a chariot filled with men; banners, *sarvausadhi svastika* sign, vessels filled with presents, horse, undried ginger cowdung, mustard, mirror, a bull bound with ropes, meat, a jar full of water, turban, lute, umbrella, curds, honey, ghee, yellow pigment, maiden, flagstaff, gold, lotus, conch, white ox, flowers fine clothes, fish, well-dressed brāhmanas, street walkers, and dancing girls, fire in flames, elephants, wet earth, goad, weapons various precious stones such as emerald, ruby, crystal; a young woman accompanied by her son; these signs and objects should

957. गृहाद्गृहान्तरं गार्ग्यः सीम्न. सीमान्तरं भृगुः। शरक्षेपाद् भरद्वाजो वसिष्ठो नगरद्वहिः। स. मा folio 49b verse 769. हु. चि XI. 90 is almost in the same words

958 वसेत्र चैकत्र दश तितीर्षो दिनान्यथो सप्त च माण्डलीकः। प्र. प्राकृतः सोपि पञ्चरात्रं भद्रेण यात्रा परतः प्रयोज्या॥ रत्नमाला XV. 56; vide हु चि. XI 92 for similar verse

be arranged for or they may present themselves spontaneously. The Agnipurāna chap. 243, Ratnamālā XV. 97–98, Muhūrtamārtaṇḍa VII. 15–16, 20 and several others contain similar long lists of auspicious matters on a king's *yātrā*. Long lists of auspicious and inauspicious sights, persons, animals and substances are furnished by the Br. S chapters 86–96 (expressly based upon the works of Ṛsabha, Bhāguri, Devala, Bhāradvāja and authors on yātrā like Garga dealing with śakunas of all kinds, including barking of dogs, chirping of birds and crows), the Brhadyogayātrā chapters 21–28 dealing with omens derived from the movements of elephants, horses, the cries of she-jackals, crows &c, the Yogayātrā XIII. 14, Muhūrtacintāmani XI. 99–100, Muhūrtamārtaṇḍa VII. 17–19, Rājanītiprakāśa pp 335–360 and other works. As an illustration only one verse from the Yogayātrā is [959] translated here The following are inauspicious (on Yātrā)– cotton, herbs and drugs, black corn, salt, an impotent person, bones, orpiment, fire, serpent, coals, poison, serpent's slough, excreta, razor, diseased persons, one who has vomited or is mad or paralysed or blind, grass, husk, a famished person, butter milk, an enemy, one whose head is completely shaved, one whose body is anointed with oil, one with hair dishevelled, a sinner, one wearing reddish garments

The construction of a house (*vāstu*) is a very important matter even in the grhya and dharma-sūtras. Construction of a house and the first entrance into it have been described in the H. of Dh. vol. II pp. 833–836 but the astrological requirements were not illustrated there. The Pāraskara-grhya[960] simply provides that the construction of a house should be begun on an auspicious day. The Hiranyakeśigrhya is more specific and says that a shed or house should be begun after kindling fire in the northward passage of the Sun, in the fortnight of the waxing moon, on the naksatras of Rohini or the three Uttarās, viz.

Uttarā Phalgunī, Uttarāsādhā and Uttarābhādrapadā. The Matsyapurāna chap. 253, Ratnamālā chap. 17, Rājamārtanda verses 805–884 (folio 51b–55b), Hemādri on Kāla pp. 817–829, Muhūrtadarśana IX, Jyotistattva pp. 662–670, Muhūrtacintāmani XII, 1–29, Nirnayasindhu p. 364 deal with the construction of a house Matsya (252 2–4) names eighteen teachers of Vāstuśāstra. A few astrological details are set out here Matsya (253 1–5) states the results of beginning the construction of a house in the twelve months from Caitra respectively as disease, fine cows, death, good servants and plenty of cattle (in Āsādha), servants, loss, wife's death, wealth and crops (in Kārtika), rice, danger from thieves, various benefits, gold and son (in Phālguna). The auspicious naksatras for commencing a house are Aśvinī, Rohinī, Mūla, the three Uttarās, Mrgaśiras, Svātī, Hasta and Anurādhā and all weekdays (except Sunday and Tuesday) are auspicious (Matsya 253. 6–7) The Rājamārtanda[961] puts many of the astrological requirements in two verses as follows; 'the sages say that the auspicious work of (constructing) a house should be begun on the auspicious naksatras of Punarvasu, Pusya, Rohinī, Mrgaśiras, Citrā, Dhanisthā, Uttarā (three of them), Revatī, Śravana, Śatabhisak, Anurādhā, Svātī endowed with auspicious tārās, on Monday, Wednesday, Thursday or Friday, on an auspicious Yoga, on a tithi other than *riktā* (i. e 4th, 9th, 14th) and on a day when there is no Visti, when beneficial planets occupy the kendra (1st, 4th, 7th and 10th places), the 8th and 12th places, when malefic planets occupy the third, 6th and 11th places, when Jupiter is in the *lagna* or *kendra*, or Venus occupies any of these latter and when the *rāśi* of the owner is auspicious, and when any of the *sthira* naksatras are rising, one should commence a house or make the first entrance into it. The Ratnamālā says that the construction of a house should not be begun on *cara* rāśis. There are several other complicated calculations and diagrams employed in finding out a proper time for beginning the construction of a house such as *āya*, *vijaya* and *Rāhumukhacakra* that are passed over here.

961. आदित्येज्यभरोहिणीमृगशिरश्चित्राधनिष्ठोत्तरा पौष्णं विष्णुशताम्बुराभपवने· शुद्धे सुतारान्विते· । सौम्याना दिवसेऽथ पापरहिते योगे विरिक्तातिथौ विष्टिव्यक्तदिने वदन्ति मुनयो वेश्मादिकार्यं शुभम् ॥ शुद्धैर्द्वादशकेन्द्रनैधनगृहे· पापैस्त्रिषट्त्रायगैर्लग्ने केन्द्रगतेथवा सुरगुरौ दैत्यस्य भुज्येथवा । सर्वारम्भफलप्रसिद्धिरुदये राशौ च कर्तुं शुभे शुद्धांशे स्थिरभोदयेषु भुवनं कार्यं प्रवेशोपि वा ॥ राजमार्तण्ड (folios 55b, 56a, verses 886-87), the first q by ज्योतिस्तत्त्व p 666; compare रत्नमाला XVII, 17–18.

It is stated in the Rājamārtanda verse 887 (quoted in note 961) that the same astrological conditions are required in the case of the first entrance in a newly built house as in commencing to build a house. Vide Rājamārtanda (folio 57 verses 900–908), Ratnamālā XVIII. 1–11, Jyotistattva pp 670–71, Muhūrtacintāmani XIII, Nirnayasindhu p. 366 for rules about grha-praveśa (first entrance into house). The Rājamārtanda says that[962] first entrance into a newly built house should be made on the naksatras Revatī, Dhanisthā, Śatabhisak, Rohinī, the three Uttarās, on an auspicious week-day, when the moon is not weak, on a tithi other than *riktā* He should enter the house on the floor of which plenty of flowers are strewn, which has good ornamental arches, which is adorned with jars filled with water, in which the gods have been worshipped with sandalwood paste, flowers and offerings and which rings with the recitation of (the Vedas by) brāhmanas

It may be stated here that some of the astrologicial requirements about the construction of a house and the first entrance into a newly built house are observed even now.

The proper times for the establishment of the images of gods are specified in many works such as Brhatsamhitā 60. 20–21, Matsya-purāna (264), Visnudharmottara III. 96, Rājamārtanda (folios 57b–59b, verses 909–943), Hemādri on Kāla pp 830–847, Jyotistattva pp 666-667 and 672–73, Nirnayasindhu pp. 334-335, Dharmasindhu p 318 The Brhatsamhitā[963] lays down the general rules for the establishment of the images of all gods. 'In the northward passage of the sun, in the bright half, when the moon is in the *vargā* of Jupiter, when the *lagna* is a sthira rāśi and the navamāmśa rāśi of the lagna is sthira and beneficent planets occupy the kendra places or the 5th and 9th places in the horoscope (of the establisher), when the malefic planets are in the 3rd, 6th, 10th or 11th places, on naksatras called *dhruva*

962. पौष्णे धनिष्टास्वथ वारुणेषु स्वायम्भुवर्क्षे त्रिषु चोत्तरासु। अक्षीणचन्द्रे शुभवासरेषु तिथावरिक्ते च गृहप्रवेशः॥ भूरिप्रसूनानिकरं सुतोरणं तोयपूर्णकलशोपशोभितम्। गन्धप्रसूनबलिपूजितामरं ब्राह्मणध्वनियुतं विशेद्गृहम्॥ राजमार्तण्ड (folio 57, verses 900 and 907), last q by पीयूषधारा on मु चि. XIII 7.

963 उदगयने सितपक्षे जिशिरोगभस्तौ च जीववर्गस्थे। लग्ने स्थिरे स्थिरांशे सौम्यैर्धीधर्मकेन्द्रगते॥ पापैरुपचयसंस्थैर्धुनभूदुरितिष्वायुदेवेषु। विकुजे दिनेऽब्जकूले देवानां स्थापनं शस्तम्॥ बृहत्संहिता 60. 20–21 (Kern's ed and chap 59 in Dvivedi's edition) वर्ग has been defined in बृहज्जातक I. 9, जीववर्ग would be धनु or मीन राशि, its होरा, द्रेष्काण, नवमभाग, द्वादशभाग, त्रिंशभाग, स्थिरलग्न would mean वृषभ, सिंह, कुम्भ

or *mṛdu* or on Śravana, Puṣya or Svāti naksatra, on a favourable week day (other than Tuesday) the establishment of the images of gods is commended'. The Matsya states (264. 3–12) that the establishment (*pratiṣṭhā*) of the images of all gods leads to beneficent results when done in the months of Caitra, Vaiśākha, Jyestha, Māgha or Phālguna, in the bright fortnight after daksināyana ends, on the tithis 2nd, 3rd, 5th, 7th, 10th, Full moon, 13th (this is the best), on sixteen named naksatras (excepting Bharanī, Krttikā, Ārdrā, Punarvasu, Āśleṣā, Maghā, Pūrvā-phalgunī, Citrā, Viśākhā, Dhanisthā, Śatatārakā), when the *lagna* has an aspect with the three beneficent planets Mercury, Jupiter and Venus, on an auspicious *yoga*, when the lagna or naksatra (of establisher) is free from malefic planets and on *brāhma* muhūrta.

The Ratnamālā[964] provides different naksatras for the establishment of the images of different gods, one interesting provision being that the image of Buddha was to be established on Śravana naksatra. In the case of the images of the Mātrs, Bhairava, the Varāha, Narasiṁha and Trivikrama incarnations and of Devī, the killer of Mahiṣāsura, establishment may be made even in Daksināyana. For the establishment of Linga special rules are provided for which Nirnayasindhu (pp. 335–336) may be consulted.

The Rājamārtanda[965] provides that the 2nd, 3rd, 10th, 13th and 15th tithis are always commended for establishment of images of gods and even the 7th and 6th if the establisher likes.

In the Indian Antiquary vol. VI. p. 363 we find an inscrition of Cālukya king Mangaliśa dated *śake* 500 (578–79 A. D.) recording the grant of a village named Lañjīśvara on the auspicious occasion of the establishment of an image of god Visnu.[965a]

Auspicious times were prescribed for wearing new garments for the first time The Nirnayasindhu quotes two verses[966] 'It is desirable to put on new garments for the first time on naksatras of Asvini, the three Uttarās, Punarvasu, Pusya, Revatī, Dhanisthā. The following are the consequences of wearing new garments for the first time on the week days from Sunday respectively, viz becoming worn out, constantly wet with water, sorrow, wealth, knowledge, meeting with one's dear ones, becoming dirty; the woman who wears new garments or new ornaments for the first time on Rohinī, Pusya, Punarvasu, Uttarā-Phalgunī and takes a bath on Śatatārakā naksatra does not stay with her husband (i e. she leaves him) If a woman wears for the first time a garment dyed with *Kusumbha* (safflower) or ornaments of gold, precious stones, coral, glass, conch-shell on Revatī, Aśvinī, Dhanisthā, Hasta, Citrā, Svātī, Viśākhā, Anurādhā, that leads to male progeny, wealth and happiness, but if she puts on these on Rohinī, the three Uttarās, Punarvasu and Pusya, that leads to the unhappiness of the husband.

Muhūrtas are prescribed for beginning to take medicine in Rājamārtanda (folio 62a, verses 973 ff), Jyotistattva pp 678 ff, Nirnayasindhu p 362. Only one verse is cited[967] here; 'If one begins to take medicine on the naksatras Mūla, Anurādhā, Mrgaśiras, Pusya, Punarvasu, Revatī, Asvinī, Śravana, Jyesthā, Hasta, Citrā, Svātī, and on Monday, Thursday or Friday, that would benefit the patient Medieval works like the Rājamārtanda, Bhujabala, Muhūrta-mārtanda, Jyotistattva, Nirnayasindhu describe the muhūrtas and inauspicious times for all matters under the sun (not necessarily religious) such as for purchase and sale of merchandise and animals, for agricultural operations, for planting trees, for digging tanks and wells, for oil bath, for baths with ground myrobalans &c

The foregoing discussion about the astrological requirements in several religious and secular matters are enough to show how astrology and omens have had a very firm hold on the minds

966. रोहिणीषु कृरपञ्चकोश्विने ऽत्तरासु च पुनर्वसूदये। रेवतीषु वसुदैवते च मे नव्यवस्त्रपरिधानमिष्यते॥ जीर्णं क्लेदी सततमम्बुभिरार्द्रमिन्दौ भौमे क्षुच्चे बुधदिने तु भवेद्धनाय। ज्ञानाय मन्त्रिणि भृगौ प्रियसङ्गमाय मन्दे मलाय च नवाम्बरधारणं स्यात्॥ रोहिणीषुनर्वसूत्तरे या विभर्ति नववस्त्रभूषणे। सा न योषिदवलम्बते पतिं स्नानमाचरति वारुणेऽपि या॥ श्रीपति p. by नि सि p 357 Vide ज्योतिस्तत्त्व p. 671 for other verses on the same subject.

967. मूलानुराधमृगतिष्यपुनर्वसौ च पौष्णाश्विनीश्रवणशक्रकरत्रये च। वारेषु वाक्पतिसितेन्दुदिनेषु शस्तं भैषज्यभक्षणमनीषु हितं नराणाम्॥ चण्डेश्वर quoted by नि सि p. 362.

of Indians for the last two thousand years or more. With regard to favourable and unfavourable omens Varāhamihira himself says 'If all favourable and unfavourable signs[968] were on one side and on the other side there is purity of heart, it is the latter that brings success' or 'on one side all omens, on the other the purity of the mind (it is the mind that counts), in a battle the mind may be suddenly seized with fear and even the wind may be the cause of victory or defeat'. The Matsyapurāna after mentioning unusual occurrences and omens in connection with the march of a king on an invasion winds up as follows;[969] 'Auspicious planets are commended, particularly Jupiter (as indicative of future success). Belief in god, faith, honouring those that deserve honour—all these are commended and whatever else may be approved by one's conscience. In this matter (of invasion) the peace of the mind is the highest indication of (coming) success, when all omens are on one side and the mind's peace on the other'. A purely astrological work like the Ratnamāla[970] of Śrīpati says the same thing.

Owing to the almost universal belief in astrology, there was always the temptation to fasten fanciful horoscopes on renowned avatāras and heroes Some Mss. of the Rāmāyana[971] contain a few details of the horoscope of Rāma, the principal ones being that the lagna was Karkaṭa, in which the Moon and Jupiter were in conjunction and that five planets were in exaltation (*ucca*) As the Moon was in Cancer, that planet was not in exaltation, since Taurus (Bull) is exaltation of the Moon. As Rāma was born on Caitra bright half 9th the Sun was in Mesa (Aries, Ram), which is also the *ucca* of the Sun. Therefore,

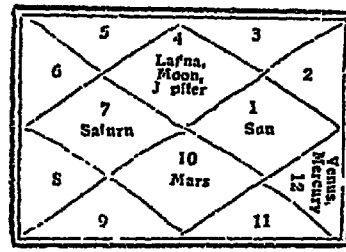
971. ततश्च द्वादशे मासे चैत्रे नावमिके तिथौ। नक्षत्रेऽदितिदैवत्ये स्वोच्चसंस्थेषु पञ्चसु। ग्रहेषु कर्कटे लग्ने वाक्पताविन्दुना सह। प्रोद्यमाने जगन्नाथ सर्वलोकनमस्कृतम्। कौसल्याजनयद्रामं सर्वलक्षणसंयुतम्॥ बालकाण्ड 18, 9-10.

Mercury must be either in conjunction with the Sun or in Taurus or Pisces. None of these is the *ucca* of Mercury. Probably Mercury should be taken to be with Venus as they are friends, while if Mercury be placed in Vrsabha (Taurus or Bull) he would be in the house of an enemy. The Rāmāyana does not mention Rāhu and Ketu at all. So the horoscope of Rāma would be as follows: [972]



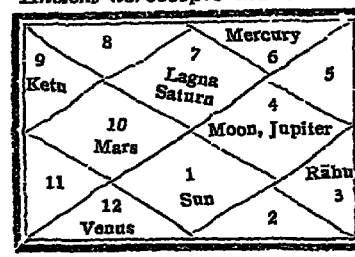
Vide Pillai's 'Indian Ephemeris' vol. I part 1 pp 112–123 for discussion on Rāma's horoscope. Kālidāsa in the Raghuvaṁśa (III. 13) states that Raghu, the ancestor of Rāma, was born when five planets were in exaltation and were not setting (i e were a good many degrees away from the Sun) But he does not furnish the *lagna* nor even the month of his birth.

As regards Paraśurāma, the Nirnayasindhu quotes the Bhārgavārcanadīpikā[973] to the effect that Visnu himself was born as the son of Renukā on Vaiśākha, bright half, 3rd tithi, on Punarvasu naksatra in the first quarter of the night, when six planets were in exaltation and Rāhu was in Mithuna (Gemini, Twins). The Moon being in Punarvasu, that is either in Mithuna or Karkata, none of which is Moon's *ucca* all the remaining six planets must be held to be in exaltation. Therefore, Paraśurāma's horoscope must be supposed to be somewhat like this:

---

972. Vide my paper in the Journal of Oriental Institute, Baroda, vol. I. pp 5–7 about the horoscopes of Rāma and his three brothers stated in the Rāmāyana.

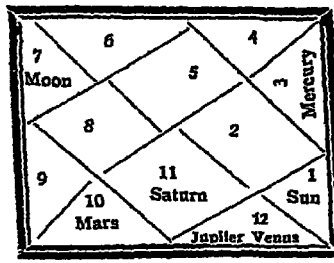
973. तदुक्तं भार्गवार्चनदीपिकायां स्वाम्यभविष्ययो: । वैशाखस्य सिते पक्षे तृतीयायां पुनर्वसौ । निशाया: प्रथमे याने रामाख्यः समये हरि: । स्वोच्चगैः षड्ग्रहैर्युक्ते मिथुने राहुसंस्थिते । रेणुकायास्तु यो गर्भादवतीर्णो हरिः स्वयम् ॥ इति । नि सि p. 95.



This horoscope cannot be right. The *ucca* signs of the Sun a Mercury are Mesa (Aries) and Kanyā (Virgo) respective Mercury cannot be so far away from the Sun. So this is only fancy horoscope without any reality behind it

Coming to historical times, Bānabhatta[974] in the Harsacar (4th Ucchvāsa) tells us that Harsa was born on the 12th of t dark half of the month of Jyestha, on Krttikā naksatra, at nig fall when all the planets were in exaltation. But Bāna delightfully vague about the name of the *lagna* and it is clear what he means by 'all planets' being in exaltation. the end of Jyestha the Sun cannot be in Mesa, which is t ucca of the Sun, but may be in Vrsabha or Mithuna.

The commentary Sudhāvidyotini[975] on the Saundaryalah a work attributed to the great philosopher Śankarācārya, furnis a horoscope of Śankarācārya, viz. the *lagna* was Simha (Le Jupiter in Fishes, Sun in Ram, Mercury was in Mithuna, Ve in Fishes, Saturn in Aquarius, Mars in Capricornus, M swallowed by Rāhu (there was an eclipse) and in Hasta Citrā (either in Kanyā or Tulā). This horoscope also seem be a fancy one, since Mercury cannot be in Mithuna when Sun is in Mesa.



974 ततश्च मासे ज्येष्ठामूलीये मासि बहुलासु बहुलपक्षाद्दवयो व्यतीते प्रदोष समावरुक्षति क्षपायौवने''' भान्धाता किलैर्वंविधे व्यतीपातादिसर्वदोषाभिषङ्गरहितेऽहनि सर्वे स्थानस्थितेष्वेवं ग्रहेष्वीदृशि लग्ने भेजे जन्म। हर्षचरित IV.

975. Vide Journal of Indian History, vol. 4 p. 39.

Kalhana[976] in the Rājatarangini says that king Harsa of Kashmir(born 1059 A.D., ruled 1089–1101 A.D) was born on the Karkata *lagna* when Mars and Saturn were in the 5th house, Jupiter and Mercury in the 6th, Venus and the Sun in the 7th and the Moon in the 10th, that like Duryodhana he caused the extinction of his family as the astrological conjuction at his birth indicated and as the authors of *Samhitās* declared that Kauravas destroyed their families because in their horoscopes the Moon, Venus and malefic planets were in the 10th, 7th and 5th houses. This horoscope may be true, as Kalhana wrote only about fifty years after Harsa's death.

Some inscriptions show that kings rewarded men for astrological devices. For example, the Kadaba plates of the Rāstrakūta king Prabhūtavarsa Govindarāja III granted in *śake* 735 to a Jain *Muni* the village of Jālamangala for having warded off the evil influence of Saturn from Vimalāditya, one of his governors [977].

Some of the previous volumes of this History of Dharmaśāstra have been criticized in two different ways by critics Some said that the author should have stopped at describing what transformations several of the topics dealt with underwent in the course of centuries and that no personal opinions should have been expressed about what changes should be made in the present or in future Another set of scholars complained that the author should have expressed his personal views in many matters on which he expresses no definite opinion or does not advance a definite theory of his own. Bearing in mind these criticisms the author proposes to indicate his own personal views on Indian Astrology in relation to Dharmaśāstra.

Modern scientists, philosophers and theologians have generally ignored astrology. Some ridicule it, some have condemned it as superstitious, as 'a delusion and a snare'. In spite of the condemnation by eminent scientists astrology enjoys great vogue among millions of people in the educated West. Many of those who condemned it in scathing terms appear to have done so on *a priori* arguments and do not appear to have studied

976 राजा दुर्योधन इव स्वदशाच्छेदमिच्छता। सोधूजातकयोगेन कारित. स्वकुलक्षयम्॥ तत्यास्ता ऽमार्कजौ जीवबुधौ शुक्रोऽष्टगः शशी। तनयामित्रजामित्रखेषु कर्कोदयजन्मनः॥ चन्द्र-दैत्येज्यपापेषु खमदात्मजगेषु यत्। आहुः सुसंहिताकारा· कौरवादीन् कुलान्तकान्॥ राजतरङ्गिणी VII, 1718–1720.

977. Vide E. I. vol. VI, pp 332–349 at p. 340.

astrological works. The more effective method would perhaps have been to study the horoscopes of well-known persons, to examine them by the rules of the astrologers themselves, to show that the application of their own rules leads to contradictions, confusion and absurd results and lastly to exhibit that the principles on which they evolve their rules and make their predictions have hardly any basis in fact and are imaginary.

The fundamental doctrine of astrology that the Sun, the Moon and the planets exert some influence on terrestrial life and things is scientific [978] The matter to be considered is whether the principles laid down in such astrological works as the Brhajjātaka can stand rational analysis and tests. The author may state here that in his boyhood there was an astrologer called Mahādkar Jyotishi who never took money, who was employed as a bailiff in a civil court in the Bombay State and who correctly stated the *lagna* and the positions of the planets in the horoscopes of people by looking for a few minutes at their faces, eyes and hands. The percentage of his mistakes in this respect was very low, barely one to five percent. This led many educated people to believe in those days that astrological works may be right so far that the physical features of a man may have some relation to the planets and their positions at his birth But, when he set about the business of stating important facts about the lives of the persons whose horoscopes he correctly stated he often went wrong. One cannot also ignore the facts that some predictions turn out to be true. Unless one holds that they are all mere inexplicable co-incidences, they require to be carefully considered There is an astrological *sanad* (grant) which records most wonderful and detailed predictions that came out to be true. The grant was made in 1793 A D. to one Chinto Mahadeo Gole by Govindrao Gaikwad, a scion of the Gaikwad family that ruled in Gujarat at Baroda It recites [979] that Govindrao Gaikwad had to leave his inheritance at Baroda and stayed near Poona for twenty-five years, that thereafter he consulted Chinto who was a great astrologer, and it was agreed that he should make a prediction after consulting *śāstras* as to when Govindrao would be able to recover his inheritance and if the prediction proved true Govindrao agreed to donate to Chinto a village yielding five thousand rupees yearly revenue The grant

978. Compare Prof. Neugebauer in E. S A p. 164, J. C Gregory on 'Ancient Astrology' in 'Nature', vol 153 pp. 512–515.

979. Vide Indian Antiquary, vol 16 p. 317.

further recites that the astrologer gave to Govindrao a closed letter which stated that the Peshwa at Poona would call Govindrao to his presence in the first watch of Friday, 8th tithi, Mārgaśirsa dark half of *śake* 1714 (7th December 1792 A. D.) when the sign ascending would be Dhanus (Archer) and, after taking from Govindrao an agreement to give certain cash and to cede some territory, would restore him to his inheritance and honour him by the present of three *śirpeñch* (turban ornaments or spray of gems) containing 45 rubies and 14 diamonds (out of which three would be large and eleven small), one pearl crest (containing about 496 pearls), one elephant and one blue horse. It is further recited in that sanad that the letter stated that even after this Govindrao would have to stay for eleven months in Poona out of which he would suffer for eight months great calamities, that thereafter the Peshwa would return to Govindrao the territories he had agreed to cede, that he would then return to Baroda in the month of Māgha. The sanad in the end recites that all this that was contained in the closed letter came to be true to the very letter and therefore as agreed before the village of Ayana was donated. It would be noticed in what details the prediction entered. There is no reason to doubt the solemn words of this grant that everything as predicted came out to be true. How the astrologer pointed out all these details is not at all clear, as no astrological work that I know of, enters into such detailed predictions or gives rules for that purpose.

Just as the Sun and the Moon influence terrestrial phenomena such as the tides, the author feels from the instance of the Mahadkar Jyotishi mentioned above and from the hundreds of horoscopes that he has seen that it might be possible to state the physical characteristics of the persons concerned from their horoscopes. But no such efforts have been made by anybody nor published if made. The author, however, feels also that hardly anything can be said about the mental capacities of a person or the fortunes and vicissitudes of his life from his horoscope. It would not be relevant to enter into further discussion of this matter in this work.

What firm grip astrological considerations had on the minds of people and writers on astrology is demonstrated by certain rules in astrological works about a child's birth on Āśleṣā or Jyesthā naksatra or on what is called *Gaṇḍa* or *Gaṇḍānta* and how it was recommended that the innocent and helpless infant born on these supposed very unlucky times should be abandoned

in spite of what love and pity should dictate. We have seen above that the roots of this belief go back to the Atharvaveda (vide note 753 above). Some verses are translated here. Garga quoted in Prayogapārijāta[980] prescribes 'a child born on Gandānta by day causes the father's death, one born in the night on Gandānta causes the mother's death and one born at twilight causes its own death; no Ganda is safe (free from danger). Abandonment of children born on Ganda is laid down or (the father) should avoid seeing it or hearing its cry for six months'. Bhallāta[981] provides 'a child born during the period of the last *ghatikā* of Jyesthā and the first two ghatikās of Mūla should be abandoned or the father should not see its face for eight years; in the case of a child born on the first quarter (of Mūla) the father dies, if born in the second quarter of Mūla the mother dies, if born in the third quarter there is loss of wealth and (birth in) the 4th quarter (of Mūla) is auspicious; the same results follow in the case of birth on Āślesā but in the reverse order from the last quarter of it.' The author knows the case of his father's first cousin who was born to his father when the latter was over forty years of age and when he had been long and anxiously waiting for a son, that was born on an unlucky quarter of Mūla naksatra. The astrologers recommended that the child be abandoned at the foot of a sacred tree. The father absolutely refused to accept the advice, saying that he would rather gladly die than abandon an innocent and anxiously desired son. The author saw the father when he had lived beyond 80, and the son also reached a pretty old age.

Ptolemy subscribed to the geocentric hypothesis and in order to account for the puzzling movements of the planets adopted the theory of eccentric orbits and epicycles Though his theories viewed in the light of modern astronomical science were wrong,

981. भल्लाट. । अमुक्तमूलसम्भवं परित्यजेत्तु बालकम् । समाप्तकं पिताधवा न तन्मुखं विलोकयेत् । तदाद्यपादके पिता द्वितीयके जनन्यथ । धनक्षयस्तृतीयके चतुर्थकः शुभावहः । मतीपमन्त्यपादत· फलं तदेव सार्पभे ॥ अमुक्तमूलं त्वाह वृद्धवसिष्ठः । ज्येष्ठान्ते घटिका चैका मूलादौ घटिकाद्वयम् । अमुक्तमूलमित्याहुस्तत्र जातं शिशु त्यजेत् ॥ निर्णयसिन्धु p 244. The great Hindi poet and saint Tulsidas (born in *samvat* 1589 i. e. 1532 A D) was an अमुक्तमूल child and was abandoned by his parents and was brought up by a *sādhu*. Vide Grierson in I. A vol. XXII at p. 265.

he and his followers could predict eclipses. That suggests that correct inferences may be drawn in certain cases from premises some of which may be wrong. Besides, no one appears to have examined the theory of Varāhamihira and his followers that a horoscope is only like a sketch or plan that indicates only future trends in a man's life depending on his actions in his previous life or lives. It is not probable that this theory will ever be tested and examined. There are weighty and practical reasons for this. Millions of people are not at all interested in knowing what they did in their past lives nor do many of them believe in metempsychosis or the theory of past and future lives of the individual soul. They are mainly concerned with predictions about their future. The theory of horoscopes being only sketches or maps indicating future tendencies cuts the very ground from under the feet of professional astrologers They would, if they persisted only in telling their clients mere future tendencies and did not furnish positive predictions, find that their occupation was gone. In the minds of millions not only in India but in many parts of the world astrology is a living faith and it appears that neither scientists nor historians can possibly destroy such a tenaciously held and deep-seated belief. But the belief that planets *cause* persons to do certain things is likely to have serious consequences The sense of moral responsibility for all acts done by a person will be impaired by such a belief; and a person guilty of a crime may plead (or may at least believe) that he was helpless before the influence of the heavenly bodies.

Before closing this brief account of Indian astrology I must in a few words advert to a work called Bhrgusamhitā in Sanskrit which is supposed to contain numberless horoscopes with descriptions of persons born on the twelve rāśis from Mesa onwards, references to the deeds of such persons in previous lives, the horoscope with the positions of the several planets, the important happenings in each person's present life from the year of his birth to his death. Persons who profess to have in their possession the Bhrgusamhitā are generally averse to showing the whole work to any one, but read to those who consult them verses from the work said to be in their possession and people feel often amazed at the accounts about themselves which are read out to them There is much of deception in this I have examined four Mss in the Desai Collection of Sanskrit mss in the Bombay University called Bhrgusamhitā said to have been imparted to Śukra by his father Bhrgu on mount Gandhamā-

dana which contain about 600 horoscopes each of the four *lagnas*, Mesa, Vṛsabha, Mithuna and Karka, describing in 15 to 20 verses each of the horoscopes in the same lagna but with different positions of the planets in each case. No Bhrgusamhitā can be accommodated even in a big library if it contains descriptions of all possible horoscopes in 15 or 20 verses each. There are twelve rāśis as lagnas, 9 planets (including Rāhu and Ketu) and twelve *bhāvas*. By permutations and combinations of these there would be crores of possible horoscopes and if at least 15 verses were to be assigned to each there would be millions on millions of verses. Hence describing a horoscope by extracts from Bhrgusamhitā is often a fraud.

In Indian Astrology the most important matters are the rāśis, the planets and the twelve bhāvas (or places). Take the rāśis first. What is the reason for naming certain groups of stars or constellations as Mesa or Vrsabha &c. ? There are no Rams and Bulls in the sky. Some observers on the earth imagined that certain constellations presented to the eye the appearance of certain animals, human figures and mythical beings. As shown above (p. 565) the Chinese and Japanese name them differently. Therefore, there is a great element of arbitrariness and imaginary analogies in naming the so-called rāśis. Once named, the rāśis are classified in various ways and predictions are based on the class to which a rāśi belongs. All these classifications are based on ideas of symmetrical sequence and fancy. Why should Mesa and Mithuna (which is represented as ' twins ' man and woman) be called male, while Vrsabha and Vṛścika be classed as female ? There is no explanation except this that the twelve rāśis had to be classified in two groups, male and female, and symmetry required that they be alternately called male and female. For the same reason of symmetrical order Mesa and Karka are grouped as *cara* (mobile), while Simha and Vṛścika are classified as *sthira* (firm immobile). The Sun (the giver of all light and support of the world) is called *krūra* or *pāpa* (a malefic) planet along with Mars and Saturn, while Jupiter and Venus are classed as beneficent and the waning Moon is also held to be malefic. Here association of ideas and analogy play a great part Jupiter and Venus are both brilliant and white or whitish, while Mars is red (the colour of blood). Besides, the first two are supposed to be the preceptors of the gods and *asuras* respectively. Therefore, they are beneficent and the blood-red Mars is malefic. The Sun, Jupiter and Mars are said

to be masculine, the Moon and Venus feminine and Mercury and Saturn neuter for the same reason, viz. association of ideas and analogy. The Moon and Venus are beautiful and mild, therefore they are feminine, while the Sun (that has fierce heat), Mars (with blood red hue) and Jupiter (the ācārya of the gods) are masculine. Modern astronomy declares that the Moon is dry and waterless and contains the remains of extinct volcanoes; yet if the astrologers be followed we shall have to regard the Moon as feminine. In classical Sanskrit the Moon is called 'Śaśānka'. The Japanese Moon Goddess Gwaten is drawn with a hare. Vide figure opposite p. 18 in Prof. Zinner's 'The stars above us.' Then we may consider the doctrines of *svagrhas* and *uccas* (exaltations of planets). There are twelve rāśis and seven planets; five must be given two rāśis as *svagrhas* and the other two only one rāśi each as *svagrha*. The Br J. assigns only one rāsi as *svagrha* to the Sun and Moon, viz. Simha (Lion) and Karka (Crab) respectively, while two rāśis are assigned to each of the other five planets. There is absolutely no logical or satisfactory explanation of this. Moreover, in assigning two rāśis as *svagrhas* the only principle that seems to have been followed is that of sequence, viz. one rāśi beyond Simha and one beyond Karka i. e. Kanyā and Mithuna to Mercury and in the same way to the remaining planets in the order of distance. The result is that Vrsabha and Tulā (Scales) are the svagrhas of the beautiful and brilliant planet Venus and Dhanus (Archer) and Mīna (Fishes) are the svagrhas of Jupiter. If one turns to the doctrine of exaltation, no rational or astronomical explanation is given why Aja (goat), Vrsabha (Bull), Makara, Kanyā, Karka, Mīna and Tulā should be the *uccas* of the Sun, the Moon, Mars, Mercury, Jupiter, Venus and Saturn respectively. The naming and arrangement of the twelve *bhāvas* hardly follows any rational basis. One may at the most concede that the first bhāva in which the sign rising at a person's birth is placed is plausibly called *tanu* (body) and that regarding the 7th *bhāva* therefrom as the one on which love and marriage may be considered has also some plausibility. Birth and death are the two ends of a person's life. If the first bhāva is called *tanu*, the bhāva about death should be the 12th, the last, but in the Brhaj-jātaka and other works, it is the 8th bhāva that is called mrtyu (death). Some of the bhāvas have too many matters crowded into them. For example, the 4th bhāva is supposed to be the one on which a person's relatives, friends, house, happiness and conveyance are to be considered.

The fifth bhāva is concerned with sons, intellect, learning, speech. Supposing that that bhāva is very favourably placed, the prognostications would have to be that the person would have many sons, he would be a learned man and a good speaker. But all these very rarely go together. A man of great intellect has often no sons, while a very learned man is often not a good speaker.

Then there is the question of friendships and enmities among planets. There is no rhyme nor reason in this respect. Why Venus, a beneficent planet in theory, should be the enemy of the Sun, when Jupiter another beneficent planet is a friend, is something which it is difficult to understand or explain. Besides, these relationships are not reciprocal. The Moon has no enemy, but from the point of view of Venus, the Moon is the enemy of Venus. Mercury (mythologically the son of the Moon) is said to be a friend of the Moon, but from the point of view of Mercury the Moon is its enemy. There is a further strange matter to be noticed. As men fight among themselves, it has been supposed that the planets (excepting the Sun and the Moon) fight among themselves[982] (vide note 872 above). Besides there are thousands of minor planets between Mars and Jupiter and ancient and medieval horoscopes took no account of Uranus, Neptune and Pluto among the planets nor of the numerous satellites of Jupiter.

Another important doctrine in Indian astrology is that of drsti (glance, aspect) which has been explained above (note 876). That doctrine had some plausibility when the distances between the planets and the stars were not known. But in view of modern astronomical knowledge the doctrine of the drstis of planets has hardly any meaning. Every planet and star really

---

982. The idea of ग्रहयुद्ध is very old as the बृहत्संहिता chap. 17 (1–27 verses) deals with it at great length and as it expressly states that Parāśara and other sages of old had developed it long before It deals with the astrological results of ग्रहयुद्ध to specific countries, kings, and people Three verses are quoted here आसन्नक्रमयोगाद्भेदोल्लेखांशुमर्दनास्तस्य। युद्धं चतुष्कारं पराशरार्यैर्मुनिभिरुक्तम्॥ भेदे वृद्धिविनाशौ भेद्यसुहृदां महाकुलानां च। उल्लेखे शस्त्रभयं भन्निविरोधः मियाजत्वम्॥ अंशुविरोधे युद्धानि भूभृतां शस्त्रशकुशुद्धवमर्दाः। युद्धे चाप्यपसव्ये भवन्ति युद्धानि भूपानाम्॥ बृहत्संहिता 17 3–5 q by अद्भुतसागर p. 208 भेद, उल्लेख, अंशुमर्दन and अपसव्य correspond to the words छादन, रोधन, रश्मिमर्द and अपसव्य of गर्ग quoted above in note 872.

faces every other planet and star in this vast Universe at all times unless there happens to be another celestial object in the line connecting any two of them and it is very difficult to understand how one planet can look at another planet or star at a quarter or a half or 3ths aspect (i e. at various angles)

When an astrologer says that a planet (say Venus) is in its svagrha (own house) i e Vrsabha (Bull) with the Moon let us understand what it means The rāśi Vrsabha is constituted by many stars, the most brilliant of which is Rohini (Aldebaran). Light travels at 186000 miles a second and modern astronomy finds that light takes 57 years to reach the earth from Aldebaran. The position then is this that the observer on the earth sees the Moon, Venus and Aldebaran very near each other. According to modern astronomy the Moon is only about two hundred and forty thousands miles from the earth, Venus a few *crores* of miles from it and Aldebaran billions of billions of miles away. They appear to be near only on account of the effect of perspective. This creates difficulties which the astrologers altogether ignore. When an observer sees Aldebaran to-day the rays he sees today started some 57 years ago, while the rays of Mars are seen within a few minutes of their start and of the Moon almost immediately.

The principles of rāśi astronomy were probably established in India in the three centuries preceding the Christian era. The predecessors of Varāhamihira and Varāhamihira himself saw Mesa, Vrsabha and other rāśis occupying certain definite sectors of the Zodiac and propounded certain rules about the physical and mental characteristics and professions of persons born when the Moon was in Mesa and the other rāśis (in chap. 17 of the Br. J.) and also of persons born on Mesa and the other rāśis, when the Sun, Mars and the other planets occupied those signs (*ibid.* chap. 18). The zodiacal section where Vrsabha stood about two thousand years ago is now occupied by the constellations comprising Mesa (Ram) owing to precession. How can the astrological consequences of being born on Taurus two thousand years ago be the same now when Taurus does not occupy the Zodiacal sector which it occupied then and when that particular sector is occupied now by Aries?

The above discussion is enough to show the flaws in the teachings of Indian astrology and would lead thoughtful persons

to conclude that the rules of astrology should have very little influence in determining the times of their undertakings. It appears that astrological details which were conspicuous by their absence in ancient Dharmaśāstra works have attained so much growth during the last two thousand years that the fundamental religious requirements have been smothered thereby. Those who believe that all events affecting men are necessitated by the planets and stars appear to go wrong in two ways. They thereby deprive God of control and providence in human affairs and they take away man's free will The dilemma is that if astrologers cannot stop or foil what the planets indicate, what is the use or benefit of their prescience; if they can stop or frustrate what is deemed to be fated to happen how can they support the thesis that planets compel events ?

The question arises then how far religious matters, such as Upanayana and marriage, should be regulated by astrological considerations It has been already shown above (p 606 and p 610) how the astrological requirements for Upanayana and marriage were very few and simple in the times of the gṛhya-sūtras and the Manusmṛti (i. e several centuries before the christian era), how later writers went on adding one requirement after another and how even in the 11th century A. D. orthodox works like the Rājamārtanda advised neglect of all astrological requirements in the case of girls whose marriages had to be postponed very long for some reason or other. Therefore, in respect of religious ceremonies like Upanayana and marriage the author would advise, as a first step towards getting rid of oppressive and meaningless astrological conditions, that people should revert to the simple rules of the grhyasūtras and Manu. There are two views on the observance of the rules about the details of religious rites. One is that a person[983] need not go beyond the provisions contained in the grhyasūtra of his own Veda or *Śākhā* and that when one observes those provisions he would be deemed to have performed all that the śāstra requires of him. The second view (held by a majority of medieval writers of digests) was that one should include in a religious rite details mentioned in works of other śākhās, though not mentioned in his own śākhā, provided the former details are not

---

983 यद्यल्पं वा स्वगृह्योक्तं यस्य कर्म प्रकीर्तितम्। तस्य तावति शास्त्रार्थे कृते सर्वः कृतो भवेत्॥ कात्यायन q by अपरार्क p. 8, स्मृतिच I. p 5.

in direct conflict with the details in his own śākhā[984] These people follow what is called the 'sarvaśākhā-pratyayanyāya' of the *Pūrvamīmāṃsā*. Both these view-points have been explained at great length by the author in H. of Dh. vol. III p. 870 and vol. IV pp 852–855. In these times one may at most follow the astrological rules provided by the *sūtras* and Manu. Though the author has pointed out great flaws in the whole structure of Indian astrology, he does not think that it is his duty as a mere historian of Dharmaśāstra to advise people how far they should accept or discard astrology in general.

984 यच्चाम्नात स्वशाखाया पारक्यमविरोधि यत्। विद्वद्भिस्तदनुष्ठेयमग्निहोत्रादिक यथा॥ गोभिलस्मृति I. 35 q. by अपरार्क p. 8, हेमाद्रि on श्राद्ध p 756, आचारादर्श of श्रीदत्त folio 115a (of ms. D. C. No, 194 of 1884–87).

CHAPTER XVIII

Calendar, eras, various reckonings about years, months &c.

In order to be able to perform *vratas* and celebrate *utsavas* at the proper times and in order to find out the appropriate times for religious rites like sacrifices, upanayana and marriage people require a calendar or almanac. A calendar is a methodical combination or book about days, months and years for the purpose of registering in advance religious festivals and astronomical or astrological phenomena and for purposes of civil life. In India about thirty calendars are in use by Christians, Parsis, Moslems and Hindus Confining oneself to Hindus there is a bewildering variety of calendars in use at present. Some are based on the data of the Sūryasiddhānta and some on those of the Āryasiddhānta, while others follow comparatively later manuals like the Grahalāghava; some begin the year with Caitra *śukla pratipad* (or *pratipadā*), others with Kārtika śukla pratipad and there are small tracts like the Halar[985] *prānt* (in Kathiawad) where the year begins with the 1st day of the bright half of Āṣādha. Gujarat and North India except Bengal use the Vikrama era, while the Deccan and South India generally employ the Śaka year, but Kāshmir follows the *Laukika* reckoning. In some parts (North India and Telangana) and communities the months are pūrnimānta (i. e end with Full Moon), while other parts (Bengal, Mahārāstra and south India) follow the amānta (month ending with amāvāsyā) reckoning. The result is that some fasts and celebrations universally observed throughout India such as the Ekādaśī and Śivarātri fasts and the celebrations of the birth of Śrikrsna are observed on two different days in different parts of the country and by different sects and there is a difference of one month between the days of some observances i. e while on the pūrnimānta reckoning a certain festival may be observed in Āsvina dark half, the same month

985 Vide Mrs Stevenson's ' Rites of the twice-born ' p 301 n, also I A, vol. 18 p 93, where it is said that the Halari year used in Halar prant of Kathiawad and also at Amreli and Jetpur begins on Āsādha śukla pratipad instead of Kārtika śukla and there is also another beginning on *amānta* Āṣādha krsna 2

may be called Bhādrapada dark half (by amānta reckoning) and the same festival may be celebrated one month later. The confusion is worse confounded in modern times by some calendars being what are called *Drk* or *Drkpratyaya* based on the data of the Nautical Almanac in order that such happenings as eclipses predicted in the pañcānga may be found to tally exactly with what is actually seen by the people. It appears that in South India there are rather too many pañcāngas (calendars). In Tamilnad there are two kinds of pañcāngas, one is based on *drk-ganita*, the other is based on the Vākya method (that follows medieval calculations based on Āryabhata which produce less accurate results) There is the Pudukottai pañcānga (a Vākya one) issued under the authority of the *rājas* of the principality of that name. The Śrīrangam pañcānga (a Vākya one) is used by the Śrīvaisnavas, while followers of another Vaisnava sect, the Mādhvas, have a pañcānga of their own. The Kanjanur pañcānga is the most common Vākya pañcānga used by the smārtas who do not use the *drk-ganita* pañcānga issued under the authority of the Śankarācārya. The Telugus follow the Siddhānta-candra[986] pañcānga based on the Grahalāghava of Ganeśa composed in *śake* 1442 (1520 A. D.). In Malabar the people have a drk-pañcānga, but it is based on a revision of the old Malabar system called Parahita and is not the drk-pañcānga followed by the Tamils. The Telugus follow the Cāndra reckoning and begin their year called Yugādi from Caitra śukla, while the Tamils follow the Saura reckoning, start their Caitra with Mesa Visu, though, their vratas and religious ceremonies being based on *tithis*, they have to follow the *Cāndra-māna*. Bengalis use solar months and lunar days with triennial adjustment by the insertion of an intercalary month.

There are three siddhāntas in use, viz. the Sūryasiddhānta (used throughout India on account of its accuracy), the Āryasiddhānta (relied on in Travancore, Malabar, and by the Mādhvas in Karnātaka and in Tamil Districts of Madras State) and the Brāhma-siddhānta (followed in Gujerat and Rajputana). The last, however, is losing ground in favour of the first In the Siddhāntas calculations are made from the epoch of the

986. Warren's Kālasankalita (pp 65-68) publishes a skeleton of the Siddhāntacandra pañcānga for the 4924th luni-solar year of the Kaliyuga current (i. e śake 1745, A D. 1822) for the Meridian and Latitude of Madras which is mainly based on Telugu Pañcānga, but furnishes Tamil data also.

mahāyuga and are so elaborate that pañcāngas can hardly be made from them direct. Therefore, works called karanas based on the Siddhāntas are used to prepare pañcāngas, such as Makaranda in Bengal and the Grahalāghava of Ganeśa; the tables of the latter called Tithicintāmani are used in the Deccan, Central India and some other parts of India. There are two important points of difference between the Siddhāntas among themselves viz the length of the year (but the difference is only of a few *vipalas*) and the second is the number of revolutions of the Moon and the planets in the Kalpa or Mahāyuga or Yuga. The Siddhāntaśiromani (I. 6) specifies the matters with which a siddhānta must deal, the very first of which is the enumeration of the units of time from *truti* up to the end of *pralaya*.

It should not be supposed that India is singular in this respect. The present European calendar is also very unsatisfactory. Originally it was Julius Caesar who introduced a revised calendar in 46 B C with the provision that every 4th year was to be a leap year. But his calculations were not very accurate and the result was that by 1582 A. D. the spring equinox occurred on 10th March instead of on 21st March. Pope Gregory XIII declared that 4th October 1582 was to be followed by 15th October (i. e. ten days were dropped). He further provided that century years were not to have a leap year unless they could be divided by 400 (so that years 1700, 1800, 1900 of the christian era have no additional day, but 2000 would have one) Even so, there is still a slight error, but only after more than 33 centuries one day would have to be dropped. The Gregorian year is longer by 26 seconds than the correct length of the year arrived at by modern astronomical calculations. Protestant England did not follow Pope Gregory's reform till 1750 A. D. when Acts were passed whereby 2nd of September 1752 was to be followed not by 3rd September but by 14th September (dropping eleven days) Vide 'the Calendar New Style Act' 1750 (24 Geo. 2, chapter 23) and the Calendar Act 1751 (25 Geo. 2, chapter 30), which changed the year beginning from 25th March to 1st January and embodied the reforms made by Pope Gregory XIII. The European calendar is still very inconvenient Under it a month may have from 28 to 31 days, the quarters of a year consist of 90 to 92 days, the two halves of the year (January to June and July to December) contain respectively 181 (or 182) and 184 days, working days per month vary from 24 to 27 days and years and months begin on different

week-days Easter, the Queen of feasts, could fall even after 1751 on 35 different dates from 22nd March to 25th April, as Easter is first Sunday after the Full Moon occurring on or after 21st March.

It has been stated above (p. 480) that this work will not deal with pure astronomical questions; therefore, the author proposes to avoid going into details of astronomical computations. But something would have to be said about them as occasion requires. Those who are interested in ancient Indian astronomy and its later ramifications may consult and study the following works and articles; Warren's Kālasankalita; the Sūryasiddhānta translated and annotated by Whitney; Indian Metrology by J. B Jervis, pp 174-259, the Pañca-siddhāntikā of Varāhamihira (text and translation by Thibaut and M. M. Suddhakar Dwivedi), S. B. Fotheringham pp. 754 ff; 'Ancient Indian chronology' by Prof. Sen-Gupta (1947, University of Calcutta); Karana-kalpalatā (in Sanskrit) and Bhāratīya-Jyotihśāstra-nirīksana (in Marathi) of Dr. K. L Daftari, Dr. M. N. Saha's paper on 'Reform of the Indian calendar' in 'Science and culture' (Calcutta), 1952 pp. 57-68, 109-123 and Report of the Calendar Reform Committee (published by the Government of India 1955, a very exhaustive and useful work.)

Among all nations the fundamental periods of time are the same, viz. the day, the month and the year (consisting of

seasons). The years are the constituents of eras that are vital for chronology and history. Though the fundamental periods of time are the same, there are variations in the arrangement of days to form months and years, about the sub-divisions of the day, about the commencement of the day, about the divisions of the year among seasons and months, about the number of days in each month and in the year and about various kinds of months. The great time measurers are the Sun and the Moon. The day is due to the revolution of the earth round its axis. The month is mainly a lunar phenomenon and the year is due to the apparent motion of the Sun (but in reality it is due to the revolution of the earth round the sun). The tropical year is the time of the passage of the Sun from one vernal equinox to the next. The latter is shorter than the sidereal year (i. e. the time between the two successive arrivals of the Sun at the same fixed star) by about 20 minutes as the vernal equinox point shifts to the west at the rate of about 50 seconds per year.[987] A modern calendar mentions the current year (by some era), the month and the day of the month and generally the week-day, besides several other matters of religious and social interest. The eras and accurate knowledge of the length of the year and the month came to man rather late. The synodic month is a little over 29½ days, while the tropical year is a little less than 365¼ days. These are incommensurable periods. For ordinary life and calendars whole days are required; besides, the starting of the year and the month must be properly defined and must correspond to seasons and some era must be used These are the requirements of a calendar which has to be used for civil and religious purposes The complexity of calendars is due mainly to the incommensurability of the above two astronomical

987 Besides the two motions of the earth (viz its daily revolution on its own axis and its yearly revolution round the sun) there is a third motion which is not so well-known. The earth is not a sphere, its equatorial diameter being longer than its polar diameter. The result is that there is a mass of matter bulging out at the equator which is in excess of what it would be if the earth were perfectly spherical, The earth's axis has a slight conical wobbling motion like that of a toy top and it describes a cycle in about 25800 years, the yearly shift being about 50''·2 seconds, due to the pull of the sun and the moon on the equatorial bulge. This causes the appearance of the fixed stars and even the pole-star changing their positions from century to century or from period to period Vide Sir Norman Lockyer's 'Dawn of astronomy' pp. 124–128, Van Den Bergh in 'Universe in Space and Time' p. 82, Hickey's 'Introducing the Universe' p. 117

periods. The Moslems solved it by ignoring the length of the tropical year and holding fast by the Moon as the measurer of time. They had a purely lunar year. The result was that the Moslems' year was of 354 days and that in about 33 years all their festivals travelled through all the months of the year. On the other hand, the ancient Egyptians ignored the moon as the measurer of time and their year was of 365 days (12 months of 30 days each plus five epagomenal, i. e additional days). Their priests stuck to this system for 3000 years, they had no leap years or intercalary months. Most ancient peoples including Indians followed a luni-solar calendar and tried to adjust the lunar months to the solar year by the system of intercalary months. It has been seen above (p. 489 note 710) that even the Rgveda speaks of an additional month (in I. 25 8) but how it was arrived at and where in the scheme of months it was introduced we do not know. We know that the Vedāngajyotisa[988] added two months in five years. The people of those ancient times had to solve the problem of adjusting the reckoning of the months by the moon and the years by the sun. People wanted to know in advance when the Full Moon or New Moon on which many ancient festivals were celebrated may be expected, when to expect monsoon or winter, when to prepare ground for sowing and when to sow. Sacrifices had to be in spring and other seasons, as also on New Moon and Full Moon. The lunar year of 354 days was less by about 11 days than the solar year. Therefore, the seasons would shift back if the lunar year alone were observed. Hence intercalary months were introduced by several nations. The Greeks had the 'Octaeteris' (eight years cycle), that contained 99 months of which three were intercalary, viz. in the 3rd, 5th and 8th years Then was introduced the Metonic cycle of 19 years in which occurred seven intercalary months (19×12 plus $7 = 235$). Olmstead (in American Journal of Semitic Languages, vol. 55 for 1938) says at p. 116 that the cycle of intercalation in Babylon was of eight years and that it was followed by the Greeks Fotherigham (in Journal of Hellenistic studies, vol 39 p 179) says that intercalation in Babylon was irregular till 528 B. C. and in Greece it was unsystematic in the 5th and 4th centuries B. C. Vide also C. R. C. Report pp. 175–176.

988 Vide Lokamanya Tilak's 'Vedic chronology' pp 21–25, Journal of Ganganath Jha Research Institute, vol IV pp 239–248 for the Vedāngajyotisa Calendar and its salient features and Pillai's 'Indian Ephemeris' Vol I, part 1 pp. 443–456.

The use of eras in India for calendrical purposes is not much older than about two thousand years. Continuous era reckoning first began to be employed in the records of the Indo-Scythian kings that ruled over modern Afganistan and North Western India between about 100 B. C. and 100 A. D. This is not peculiar to India, most of the ancient civilizations such as those of Egypt, Babylon, Greece and Rome did not employ a continuously running era till late in their careers. In the Jyotirvidābharana (which is a later fabrication, though it professes that it was finished in *gatakali* 3068 i. e. 33 years before the christian era) mentions the names of six persons as the founders of eras in Kaliyuga, viz Yudhisthira, Vikrama, Śālivāhana, Vijayābhinandana, Nāgārjuna, Kalkin[989] and states that their eras respectively last for 3044, 135, 18000, 10000, 400000, 821 years. In ancient[990] countries no continuous era was used, but only regnal years were employed In India also Asoka employs only regnal years in his edicts (e. g the 4th pillar edict at Lauriya-nandana-garh and the 5th pillar edict at Rāmpurvā, C I I. vol. I pp. 147, 151, were engraved in the 26th year of his kingship). Kautilya[991] also, when setting forth the business of the collector

---

989. युधिष्ठिरो विक्रमशालिवाहनौ नराधिनाथो विजयाभिनन्दनः। इमे तु नागार्जुन-मेदिनीविभुर्मौलिः क्रमात् षट्। शकाश्चकाः कल्की॥ Some read कल्की पढेते for कलिः &c Vide Z D. M. G. vol. 22 p 717 verse 110, Fleet in JRAS for 1911 p. 694 for variant readings in this verse, Poona Orientalist vol V pp 205–209 on 'Jyotirvidābharana and the Nine Jewels' by K Madhava Krishna Sarma for other readings and date

990 Vide Fotheringham in Explanation to Nautical Almanac for 1935 at p. 755 about Egyptians not using a continuous era, but being content to number the years of each reign separately.

991. राजवर्षे मासः पक्षो दिवसश्च व्युष्टं वर्षहेमन्तग्रीष्माणां तृतीयसप्तमा दिवसोनाः पक्षा. शेषा. पूर्णाः पृथगधिमासक इति कालः। Arthaśāstra II 6 p. 60. This passage is variously interpreted by Fleet, Sham Sastri and others. The difficulty is due to the word 'vyusta', which literally means 'daybreak or light' and here means 'the first day of the year which is deemed to be very auspicious.' Vide 'तत्र च दीयते कार्यं भवबट्। व्युष्टादिभ्योऽण्।' पा॰ V. 1 96–97. To the author it appears that this passage means 'the royal (or regnal) year, month, fortnight, day, the auspicious (first day of the year), the third and seventh fortnights of the three seasons viz rain, winter, summer have one day less (than thirty), the other fortnights are full (i e months have full 30 days each), an intercalary is a separate (period of time) – these are the times (the collector of revenue has to note). In ancient times, the year had six seasons, twelve months and 30 days in each month. The Arthaśāstra here says that there were six fortnights of 29 days each and so the (lunar year was of 354 days In order to bring it in line with the solar year an intercalary month had to be resorted to.

of revenue specifies the times with which the collector would be concerned as 'the royal year, the month, the fortnight, the day &c.' This practice continued even under the Kusanas and Sātavāhanas; vide Luder's list in E.I. X, No 22, 32 for Kaniska, No. 1024 (Kanheri cave Inscription of Gotamiputa-sāmi-Siriyaña Sātakani), No 1100 and 1122 (Karle and Nasik cave inscriptions of Vāsiṭhiputa Siri-Pulumāvi) The Kalinga king Khāravela (generally assigned to the 2nd century B. C.) uses only regnal years and no era (vide E. I. vol. 20 p 71 at pp 79–80).

A variety of eras have been used in India for hundreds of years; this has created a great deal of confusion in chronology and history. For the lists of eras now in use or met with in inscriptions and Sanskrit literature, vide Cunningham on Indian eras, 'Indian Ephemeris' by Swamikannu Pillai vol. I part 1 pp 53–55, V. B. Ketkar's 'Indian and foreign chronology' pp. 171–172; P. C. Sen-Gupta in 'Ancient Indian eras' (pp. 222–238) and Dr Saha's paper in 'Science and Culture' for 1952 (Calcutta) at p 116 that gives a table of eras with the starting year of the eras, their current years, year beginnings (solar and luni-solar), lunar month end, provenance &c. Vide also p. 258 of the C.R.C. Report (Table 27) for a similar long list of eras. In this work only a few eras of importance will be briefly dealt with. Alberuni (Sachau vol II. p. 5) names five eras, viz of Śri Harsha, Vikramāditya, Śaka, Valabha and Gupta He gives two different versions about the first and leaves the question undecided.

Differing views were held even in ancient times, as to when the Kaliyuga[992] started and what event the Kaliyuga era commemorates. At present the Kaliyuga era is supposed to have started in 3102 B. C and a past Kaliyuga year is to be arrived at by adding 3101 to the A. D. years. There are four principal views about the starting point, viz. (1) the starting point is when Yudhisthira ascended the throne, (2) it is 36

992. Vide JRAS for 1911 pp. 479–96 and 675–698 (Dr Fleet), H of Dh vol. III pp. 896–902 for discussions about the Kaliyuga beginning In 'Ancient Indian chronology' Prof Sen-Gupta after a lengthy and somewhat vehement argument concludes that the date of the Bhārata battle is 2449 B C. and that the year 3102 B. C. for it is wrong (p 1–59). Vide C R.C. Report pp 252–254 for Kaliyuga era It may be noted that Janamejaya, son of Parikṣit, is mentioned as the performer of an Aśvamedha sacrifice in Śat Br XIII. 5. 4. Whether he is the same as the Mahābhārata hero is more than one can say, but it is not unlikely that he is the same.

years later when Yudhisthira crowned as king Parikṣit, the grandson of Arjuna; (3) according to the Purāṇas [993] Kaliyuga started when Kṛṣṇa passed away (vide Viṣṇupurāṇa IV. 24. 108 to 113); (4) According to [993a] to Varāhamihira, 2426 years prior to the starting of Śaka-kāla, Yudhisthira era started i. e. 653 years after the start of Kaliyuga according to the 2nd view. The Aihole inscription appears to follow the 2nd view, since it equates [994] 556 śaka year with 3735 Kaliyuga year (past). One of the earliest references to the Kaliyuga era is that by Āryabhata who states that he was twenty-three years old when 3600 years of Kaliyuga had expired (i. e he was born in 476 A. D.).[995] There is an early Cola record dated 4044 of the Kaliyuga era (i. e 943 A. D.) Vide JRAS for 1911 pp. 689–694 for several instances of the employment of Kaliyuga era in inscriptions. Medieval Indian astronomers believed that all planets (including the sun and the moon) were together at sunrise on Sunday of Caitra śukla pratipad at the beginning of Kaliyuga and also of Kalpa.[995a] It is suggested by modern writers like Burgess and Dr. Saha that this epoch was arrived at by astronomical calculations carried back-ward at a late period and is a mere fiction (vide p. 253 of the C. R. C. Report). It is rather difficult to hold that this was all pure imagination on the part

---

993. यस्मिन् कृष्णो दिवं यातस्तस्मिन्नेव तदाहनि। प्रतिपन्नं कलियुगमिति भाहुः पुराविदः॥ भागवत XII 2 33; compare वायु 99. 428–429, मत्स्य 273. 49–50, विष्णु IV. 24. 110, ब्रह्माण्ड III. 74 241 for similar verses.

993a. आसन्मघासु मुनयः…शककालस्तस्य राज्ञश्च॥ बृहत्संहिता 13.3 quoted in note 746. This is followed by कल्हण in his राजतरङ्गिणी I. 51 "शतेषु षट्सु सार्धेषु त्र्यधिकेषु च भूतले। कलेर्गतेषु वर्षाणामष्टपञ्चाशदूनेषु कुरुपाण्डवाः॥

994. त्रिंशत्तु त्रिसहस्रेषु भारताद्दाहवाहितः। सप्ताब्दशतयुक्तेषु गतेष्वब्देषु पञ्चसु॥ पञ्चाशत्सु कलौ काले षट्सु पञ्चशतासु च। शतासु सप्तसीतासु शकानामपि भूभुजाम्॥ E. I. vol. VI at p 7 Apparently here कलियुग is deemed to have started immediately after the Bhārata War. Later astronomical works hold that the śaka era began when 3179 years of Kali era had expired; vide "यानाः यस्मान्नो युगानि नमितान्यब्धयुगाद्रिवर्यं नन्दाद्रीन्दुगुणास्तथा शकनृपस्यान्ते कलेर्वत्सराः। सिद्धान्तशिरोमणि I. 28. नन्दाद्रीन्दुगुणा. is equal to 3179 (नन्द = 9, अद्रि = 7, इन्दु = 1, गुण = 3).

995 षट्त्रिंशद्भेदानां षष्टिर्यदा व्यतीतास्त्रयश्च युगपादाः। त्र्यधिका विंशतिरब्दास्तेह मम जन्मनोऽतीता॥ आर्यभटीय, कालक्रियापाद verse 10 (ed. Kern)

995a लङ्कायामर्कोदयाच्च भानोस्तत्रैव वारे प्रथमं बभूव। मधोः सितादेर्दिनमानवर्षयुगादिकानां युगपत् प्रवृत्तिः॥ ग्रहगणित मध्यमाधिकार verse 15 (of भास्कराचार्य); चैत्रसितादेरुदयाद् भानोर्दिनमानवर्षयुगकल्पाः। चटवार्दो लङ्कायां ननं प्रवृत्ता दिनेऽर्कस्य॥ ब्राह्मस्फुटसिद्धान्त I 4.

of the ancient Siddhānta writers; it is more probable that they had a persistent tradition of long standing before them.[995b]

In the *Saṅkalpa* (declaratory formula) for every religious ceremony the performer has to mention the grand divisions and sub-divisions of time beginning with Śvetavārāhakalpa, such as Vaivasvata manvantara, Kaliyuga and its first quarter together with the geographical position of the place of performance in Bharatavarsa, and the Zodiacal signs occupied by the Sun, Jupiter and other planets, the era, name of year (Jovian), the month, the fortnight, the tithi, naksatra, Yoga and Karana. A verse of Devala states that if a man performing a religious rite does not mention the month, the fortnight, the tithi and the occasion (of the rite) he will not reap the merit of the rite.[996] That is the importance of eras, years and its sub-divisions in the religious life of our people Therefore a calendar (*pañcānga*) is absolutely necessary for every religious Hindu

The origin and use of the Vikrama era are as much shrouded in doubts and mystery as is the case with the *saka* era.[997] Doubts have been expressed as to whether there was any king called

---

995 b. Vide E. I. vol VIII p 261 In E I vol. 28 p 63 there are plates of Arkeśvara-deva dated in *yugābda* 4248 (i. e in Kaliyuga era), corresponding to 6th February 1148 A D. Vide also a paper contributed to 'Annals of Science', vol 8 No 3 (1952) pp 221–228 by Prof Neugebauer and Dr O Schmidt on 'Hindu Astonomy at Newminster in 1428', in which reference is made to an anonymous treatise composed in England at Newminster containing astronomical calculations for the year 1428 and for the latitude of Newminster. That treatise quotes several Arabic authorities, among which is one 'Omer' (or Umar, who died about 815 A D) and the treatise remarks that Alfonso began the year of the Flood on February 16, 3102 years before the Incarnation, a date which is obviously identical with the beginning of the Kaliyuga era (employed by Indian astronomers)

997 On Vikramāditya the reader may consult the scholarly paper of Dr H C Rayachaudhuri 'Vikramāditya in History and Legend' in the Vikramāditya Commemoration volume (Ujjain, 1948) pp 483–511. Vide also Journal of Benares H University vol VIII pp 163–205 for Vikrama and his era, Bhandarkar Commemoration volume pp 187–194 (*D R. Bhandarkar*) Vide Mr S K Dikshit's paper on '*The problem of the Kusānas and the origin of the Vikrama Samvat*' in A B O R I published in book form in 1958.

Vikramāditya about 57 B. C. the supposed starting point being[998] Nov. 58 B C in Gujarat where the year begins with Kārtika *śukla* pratipad and April 58 B C in Northern India where the year begins with Caitra *kṛsṇa* pratipad The expired Vikrama year is equal to A. D. year plus 57. In certain rather early inscriptions, years are referred to as Krta For example, in Nandsa Yūpa Inscription the Kṛta year 282 is mentioned and in three Maukhari Inscriptions on *yūpas* (sacrificial posts) the year 295 Krta is found[999] The Bijayagad pillar Inscription is dated in Krta 428, the Mandasor Inscription in Krta 461 and the Gangadhar Inscription in Krta 480[1000] Scholars are generally agreed that the Krta era is a precursor of the Vikrama era. But the name Krta applied to the years has not been satisfactorily explained[1001]

---

998. K. P. Jayaswal (I A vol. 47 p 112 and I. A 46 pp 145–153) holds that Vikrama was historical, ended the rule of Nahapāna–Śakendra in 58 B C, and belonged to the Sātavāhana family.

999 Vide E I vol. 23 pp 42–52 for three Maukhari Inscriptions dated the 5th day of Phālguna śukla in *Krta* year 295 (i e 239 A. D.) by Dr. A S. Altekar. For Nandsa Yūpa Ins of Krta 282, vide E. I vol. 27 pp 252–267 (ed by Dr. A. S. Altekar)

1000. For the Gangadhar Inscription dated in 480 of the Kṛta-year (i. e 423–424 A. D) and the Bijayagadh stone pillar Inscription of Krta year 428 (371–72 A D expired), vide Gupta Inscriptions edited by Fleet pp. 73–78 and pp 252–254 respectively.

1001. Vide Bombay University Journal vol. 17 pp 19–25 where Prof, K. B. Vyas puts forward the rather novel theory that the word *Krta* in the ancient Inscriptions refers to the Katha people and J of Indian History vol. 24 (for 1945) pp 105–109, where Prof D. N. Mookerjee mentions nine Inscriptions in the Krta or Mālava-gana era and contends that Krta is the era started by Kalkin who is supposed to have ushered in the Krta-yuga in the 5th century B C The author does not agree with both these views. Prof. Sen–Gupta in 'Ancient Indian Chronology' pp. 238 ff holds that the Krta era started in 63 B. C His grounds are that certain Mahābhārata and Paurāṇic passages set out in a prophetic vein the circumstances when Krta-yuga will start and he holds that those conditions were satisfied about 63 B C. and therefore the era was called Krta In the first place the passages refer to a future date. No one thought in ancient India that the start of the Krta age was near. Besides, one of the passages on which he relies is Mahābhārata, Vanaparva 190. 90–91 (of the Bombay edition) and 188 87 (of the critical BORI edition) and is differently read in the Śāradā Codex and several Kāśmir Mss. viz. as यदा चन्द्रश्च सूर्यश्च तथा तिष्यबृहस्पती। एकरात्रे समेष्यन्ति प्रपत्स्यति तदा कृतम्॥ and not एकराशौ as he reads Therefore this verse is hardly of use for chronological purposes Besides Vāyu 99 413 also reads ekarātre (only one Ms. reads 'eharāśau') Some Purāṇas like Viṣnu IV. 24. 102,

(*Continued on next page*)

Some inscriptions are also dated in the era of the Mālava-gana (Malava tribe), as e g the Mandasor[1002] Inscription of Naravarman. The Krta and Mālava era are held to be identical and the inscriptions so far discovered as dated in these two eras are found in eastern Rajasthan and Western Malva. It is further to be noted that, whereas we have inscriptions in 282 and 295 of the Krta year, no inscription of the Mālava era has yet been found that is dated so early. It is possible that Krta is the earlier name and when the Mālavas adopted the same era it came to be called 'Malava-ganāmnāta' or 'Mālava-gana-sthiti.' But it may be remarked that if Krta and Mālava both refer to what later became the Vikrama era, they were both being used concurrently for at least one hundred years, as we have the Krta era

---

(*Continued from last page*)

Brahmānda III 74. 225 no doubt read एकराज्ञौ. The three Matsya-purāna verses he quotes are not from the same chapter. The first verse simply says that Visnu created *Yavas* on 3rd tithi of Vaiśākha bright half and that he started Krtayuga on that tithi. It is impossible to draw any definite date from this verse by itself. The other two verses are Matsya 65. 2-3. They describe a vrata and fast on 3rd tithi of the bright half of Vaiśākha, which yield inexhaustible *fruits to the performer*, equal to all good deeds If on that tithi when joined to Krttikā one does special worship, whatever is donated or offered in the fire and whatever mantras are recited become inexhaustible These two verses contain not a word about Krtayuga and the first says nothing about Krttikā It is, to say the least, a strange method to put together verses apart from their context and aver that a particular date has been established.

1002. Vide I A. vol. 42 (1913) p 161–163 for Mandasor Inscription of Naravarman which is dated the 5th of the bright half of Āśvoja of the Mālava year 461 (404 A. D.) as traditionally handed down by the Mālava tribe (Mālavaganāmnāta) The important verse is : श्रीमालवगणाम्नाते प्रशस्ते कृतसंज्ञिते। एकषष्टयधिके प्राप्ते समाशतचतुष्टये ॥ In the Mandasor Pillar Inscription of Yaśodharman occur the words 'मालवगणस्थितिवशात्कालज्ञानाय लिखितेषु' (year 589 of Mālava era); vide Gupta Ins No. 35 at p 154) On मालवगणस्थिति, vide Prof. Shembavnekar in J I. H. vol. X pp. 143–155, where (on p. 145) he holds that 'ganasthiti' is equal to 'gananāpaddhati'. His arguments though plausible are not correct There should be contemporary authority (of the 5th or 6th century A. D.) for 'gana' meaning 'gananā'. In the Bijaygadh stone Ins (Gupta Ins. No, 58 p 251) we come across the words 'यौधियगणपुरस्कृतस्य महाराजमहासेनापतेः &c'. Therefore 'Mālava-ganasthiti' should really mean 'the usage of the Mālavagana' and मालवगणाम्नात, should mean 'as traditionally handed down among the Mālavagana' Besides a 'Mālavagana-visaya' mentioned in the Nandsa Yūpa inscription edited in E. I, vol 27, p 252 at p 259 makes it almost certain that 'Mālavagana' means 'Mālava tribe' and nothing else.

480 and also the Mālava era year 461. The author does not think it possible that the word Krta was applied to the era because it was believed at its foundation that the Krta-yuga had started. It is possible that Krta has the same meaning as *siddha* (just as krtānta means siddhānta) and it indicates that it was established by agreement among certain people. The Vikrama era is specifically mentioned by name only from about 8th or 9th century A. D [1002a] Besides, the Vikrama era has hardly ever been employed in Sanskrit astronomical works and it is generally designated *samat* to distinguish it from the śaka era. The Yedarāve Inscription of Cālukya Vikramāditya VI shows that that king superseded the śaka era and started a Cālukya Vikrama era the first year of which was 1076-77 A. D. Vide Bombay Gazetteer vol. 1 part 2 p 447 and 477 (and I. A. VII pp. 61–66 for reference to 400 śakakāla 1478 A. D.).

Almost all astronomical works in Sanskrit from about 500 A. D employ the Śaka era Why the Śaka era is so called, whether it was to commemorate the coming of the famous Kusāna king Kaniska to the throne or when and where it came to be first used are among the most difficult and unsolved problems of Indian History and Chronology. In one of the earliest inscriptions expressly dated in the Śaka era, viz that of Cālukya king Mangaleśvara in 500 śaka (expired, i.e, 578 A.D.) it is cited as the era of the crowning of the Śaka [1003] king. Varāhamihira speaks of it as Śakakāla (in the Pañca-siddhāntikā [1004] and Brhat-samhitā 13. 3) and as Śakendrakāla

---

1002 a. Vide I A. vol. 12 p 155 the Dhinkī Grant of King Jāikadeva of Saurāstra of the Vikrama year 794 (737 A D.) 'विक्रमसंवत्सरशतेषु सप्तसु चतुर्नवत्यधिकेषु अङ्कत ७९४ कार्तिकमासापरपक्षे अमावास्यायां आदित्यवारे ज्येष्ठानक्षत्रे रविग्रहणपर्वणि &c

1003. 'शकनृपतिराज्याभिषेकसंवत्सरेष्वतिक्रान्तेषु पञ्चसु शतेषु महाकार्तिकपौर्णमास्यां &c ' in I. A vol III p 305 and VI. 363, Kielhorn's list No 3 in E. I. VII. Appendix.

1004. सप्ताश्विवेदसंख्यं शककालमपास्य चैत्रशुक्लादौ । अर्धास्तमिते भानौ यवनपुरे सौम्यदिवसाद्ये ॥ पञ्चसिद्धान्तिका 1 8, which means 'deducting śaka year 427 (from the śaka year for which ahargana is required) at the beginning of the bright half of *caitra* when the sun has half set in Yavanapura at the beginning of Monday.' Since Varāha employs in his several works the words शककाल, शकेन्द्रकाल and शकभूपकाल as synonyms it cannot be gainsaid that to him at least Śakakāla has something to do with śaka kings One regrets that

(Continued on next page)

or Śakabhūpakāla (in Brhat-samhitā VIII 20-21) Utpala (about 966 A D) while commenting on Brhat-samhitā (VIII. 20) remarks that the Śaka era started from the time when the Śaka king was killed by Vikramāditya Its years begin with Caitra for luni-solar reckoning and Mesa for solar reckoning Its years are generally expired ones and it begins with vernal equinox of 78 A. D The earliest inscription so far discovered in which the śaka era is expressly mentioned is that of Cālukya Vallabheśvara dated in 465 śaka (i e 543 A. D)[1005] The inscriptions of the Ksatrapa kings that bear the number of the year but no era are generally ascribed to the śaka era, e g those of Rudradāman in 52 and 72, of Rudrasimha in 103, of Rudrasena in 122 (Luder's list Nos 965, 963, 962) Emperor Kaniska (of the Kusāna race) is also connected by some with the foundation of the śaka era [1006] One of the earliest date for the śaka era in literature is mentioned as śaka 380 in the Jain work Loka-vibhāga of Simhasūri [1007] As the Pañcasiddhāntikā (XII 2) takes the 2nd year of the śaka era as the epoch of the Pitāmaha-siddhānta, it is not too much to assume that the original siddhānta of which a summary is given by Varāhamihira was composed according to him in the first quarter of the first

---

(*Continued from last page*)

since independence some Indian scholars are bent upon not admitting patent facts of history and put forward novel theories The verse 'आसन्... राज्ञश्च' in note 746 does not stand by itself and has to to be taken along with the other verses in the same work (as in Br. S VIII. 20-21) and शकेन्द्रकाल in पञ्चसिद्धान्तिका (vide note 1008); the verse 'आसन् &c.' says that śaka years when added to by 2526 (or 2566) represent the time of Yudhisthira The suggestion made by some that śakakāla simply means method of reckoning cannot be accepted in view of the words Śakendrakāla or Śakabhūpakāla One may raise a dispute as to whether the śaka era was *founded* by a *śaka king* or whether it was *founded by an Indian king* who defeated the Śakas But the central fact remains that śaka-kāla has something to do with the śakas and a Śaka king.

1005 Vide E. I. vol 27 pp 4-8 Vide E I. vol. 16 p 19 at p 23 for Andhau Inscription of Rudradāman in the year 52 'फल्गुणबहुलस द्वितीय ५ २'

1006. Vide Prof. A. L Basham's interesting paper on 'Śaka-Kusāna' in Bulletin of the London School of Oriental and African Studies, vol 15 pp 80-97, where he brings together much that has been written about Śakas, Kusānas, Vikramāditya &c.

1007. Vide Mysore Arch. Report for 1922 p 23 quoted on p. 5 of I. 27 'सत्तरे तु द्वाविंशे काग्रीक्षः सिंदमर्मण' । अशीत्यग्रे शकाद्राना (ν l शकाब्दाना) सिद्धमेतच्छतत्रये ॥.

century of the śaka era [1008] In later medieval and modern times (as also in the Jyotirvidābharana) the śaka era goes by the name of Śālivāhana. But the form Śālivāhana as that of the era occurs only in the inscriptions of the 13th or 14th century A D. e g. the two earliest inscriptions so far discovered mentioning the word Śālivāhana are those recorded in the plate of Devagiri Yādava king Krsna dated in Śālivāhana era 1172 (1251 A. D.) [1009] and the plate of Bukka I dated in śaka 1276, current (1354 A. D.). Vide No 455 in Kielhorn's list in E I. VII. It is possible that the name Sātavāhana (mentioned in Harsa-carita as the composer of the Gāthāsaptaśatī) was changed into Śālavāhana, then into Śālivāhana and this conjecture is supported by the fact that in the Gāthāsaptaśatī (V. 67) king Sālāhana (a Prakrit form of Sātavāhana) is mentioned; 'only two know how to raise high distressed families (by *śleṣa*, the family of Aparnā), viz. Śiva beloved of the heart of Gaurī or the king Sālāhana (Sātavāhana)' Vide C. R. C. Report pp. 244–256 for the śaka era and Ludwig Bachhofer's paper on 'Greeks and Śakas in India' in J. A O. S. vol 61 (1941) pp. 223–250, where he attacks some of the downright and very emphatic assertions of Dr. W. W. Tarn in 'the Greeks in Bactria and India'

Another era, which is current even now in Kashmir, is the Saptarsi era, also called Laukika era. According to the Rājatarangini the Laukika year 24 was equal to śaka 1070 (expired).[1009a] In the use of that era the centuries are generally omitted. It is a luni-solar era supposed to have begun in April 3076 B. C on the first day of Caitra-śukla Vide Cunningham's 'Indian eras' pp. 6–17 and Stein's Introduction to translation of the Rājatarangini pp. 58 ff The Brhatsamhitā [1010] notes a tradition that the Saptarsis (Ursa Major) occupy each naksatra for a hundred years and that they occupied the constellation of Maghā when king Yudhisthira reigned Probably this is the

1008. द्व्यूनं शकेन्द्रकाल पञ्चभिरुद्धृत्य शेषवर्षाणाम्। युगणं माघसितादौ कुर्याद् युगणं तदब्दयुद्यात्॥ पञ्चसिद्धान्तिका XII. 2.

origin of the Kashmir era in cycles of one hundred years. For Inscriptions dated in the Laukika era, vide Bhandarkar's list No. 1431–1443 in E. I. vol. 20 Appendix and No. 1444–45 for Saptarsi era.

Several other eras such as the Vardhamāna and Buddha-nirvāna eras, Gupta, Cedi, Harsa, Laksamana-sena (in Bengal), Kollam or Paraśurāma era (prevelent in Malabar), most of which were once in great vogue (at least in civil life) but are now practically unused, are passed over here, as of only academic interest in these days For Vardhamāna nirvāna era, vide I. A. vol 25 p 346 where the year 2493 after the nirvāna of Vardhamāna is said to be equal to Vikrama year 1888 and śaka year 1752 (1830 A D.) and Buddha-nirvāna era in JRAS for 1875 at p 358 (a Ceylonese Inscription of Sāhasa-malla's time about 1191 A. D), where mention is made that the king was crowned 1743 years, three months and 27 days after the *nirvāna* of Buddha Great controversies have raged over the Gupta era (which Fleet holds began in 319 A. D) There are some who hold that it is really the Vikrama era (J. I H vol. 17 p. 293 ff and J. I. H. special number of March and April 1941 pp 71–84). For Harsa era, vide E. I. 19 p 52 and Nos. 1385–1421 in Bhandarkar's list in vol. 20 Appendix of E. I. From Alberuni (Sachau vol II p 5) it appears that Harsa era started in 606 A.D. There has been some conmflict of views on this; vide IHQ vol. 27 pp. 321 ff, vol. 28 p 280 ff (by R C. Majumdar) and vol 29 pp 72–79 (Dr D. C Sirkar). The Kollam era is said to have started in 1176 B. C.

It has already been shown how in Vedic works the year was denoted by several synonyms such as samvatsara, samā, varsa. In the Nārada-samhitā[1011] it is said that there are nine kinds of

---

1011 ब्राह्मं दैव मानुष च पित्र्यं सौर च सावनम्। चान्द्रमार्क्षं गुरोर्मानमिति मानानि वै नव। एषा तु नवमाना व्यवहारोऽत्र पञ्चभि। तेषा पृथक् पृथक् कार्यं वक्ष्यते व्यवहारत॥ नारदसंहिता III 1–2. (Chowkhamba S Series) कल्प (*to be explained later*) is a day of Brahmā (Sūryasiddhānta I. 20), one human year was supposed to be a day of the gods (एक वा एतद् देवानामहो यत्संवत्सर। तै ब्रा III. 9. 22. 1), one human month was held to be the *ahorātra* of pitrs (मनु I. 66) मानुषमान is विमिश्र (mixed) because men employ four reckonings (*māna*) for different purposes as stated in the सि शि 1 30–31 (क्षेय विमिश्र तु मनुष्यमानं मानैश्चतुर्भिर्व्यवहारहेतोः॥ वर्षायनर्तुयुगपूर्वकमत्र सौरान्मासात्तथा च तिथयस्तुहिनाद्युमानात्। चक्रुश्चतुष्कचुलकाचिकित्सित-वासरार्धं वत्सावमान्च यतिकादिकर्मक्षमानात्॥) But the सि शि further on (I 32) says that computations about planets are to be made by human reckoning (ग्रहास्तु साध्या मनुजै. स्वमानात्).

reckonings of time, viz. Brāhma (of Brahmā), Daiva (of the gods), Mānusa (human), pitrya (of the Pitrs), Saura, Sāvana, Cāndra, Nāksatra and Bārhaspatya, but that in ordinary wordly matters only five of these are employed. The Vedāṅga-jyotisa appears to refer to four when it says that in a *yuga* (of five years) there are 61 *sāvana* months, 62 lunar months, 67 nāksatra months. Hemādri (on Kāla, p. 9) dwells on only three of these year reckonings, viz. cāndra, saura, and sāvana, while Mādhava (in Kālanirnaya-kārikās 11–12) speaks of two more, viz Nāksatra and Bārhaspatya. The Visnudharmottara speaks of four (not mentioning Bārhaspatya). The three mentioned by Hemādri are those most employed in religious and civil matters, and dharmaśāstra works are specially concerned with them, while the other two are rarely referred to in the latter. A cāndra month[1012] is a time period from the end of one amāvāsyā (New Moon) to the next amāvāsyā and twelve such months make the cāndra year of 354 days It is also called a lunation. The length of a cāndra month varies from 29.246 to 29.817 days owing to the eccentricity of the moon's orbit and other causes and its average period is 29.53059 days. A saura month is the time taken by the sun to move through one sign of the zodiac; twelve such months constitute the solar year,[1013] and the first day of a solar year is the

---

1012. नाडीपञ्चा तु नाक्षत्रमहोरात्रं प्रकीर्तितम् । तत्त्रिंशता भवेन्मासः सावनोऽर्कोदयैस्तथा ॥ चेन्दवस्तिथिभिस्तद्वत् संक्राम्त्या सौर उच्यते । सू. सि I. 12–13; वृद्धौवधि चान्द्रमुशन्ति मासं सौरं तथा भास्कररशिभोगात् । त्रिंशद्दिनं सावनसंज्ञमाहुर्नाक्षत्रमिन्दोर्भगणभ्रमाद्य ॥ रत्नमाला I 20, वायुपुराण 50 187–88, विष्णुधर्मोत्तर I 72 14–20 (q by हे on काल p 10) and उत्पल on बृहज्जातक VIII 10 mention the four reckonings चान्द्र, सौर, सावन and नाक्षत्र and their employment for certain purposes

1013. The वेदाङ्गज्योतिष (which is in two recensions, attached to Ṛgveda and Yajurveda respectively) summarizes the several items of the saura year as follows —त्रिंशत्यहा सपदपद्विरब्दः षट् चर्तवोयने । मासा द्वादश सौरा स्युरेतत्पञ्चगुणं युगम् ॥ वेदाङ्गज्योतिष verse 31 (Sham Shastri, ed.) The Vedāṅga-jyotisa holds that 366 days constitute a year. The modern Sūrya-siddhānta says that there are 365 258756 days in a year. The other siddhāntas slightly vary from this According to modern astronomy the year consists of 365 242196 days Vide 'Indian Culture' vol VIII. pp. 114–116 for a note on this (by N. C. Lahiri) and Preface p. VIII. and p. 240 of the (C. R. C Report). For the length of Jupiter's revolution round the sun, vide 'Frontiers of Astronomy' p 47 by D S Evans. The meaning of the above verses is: a solar year contains 366 days, it has six ṛtus (seasons) and two *ayanas*, twelve months, these multiplied five times make a *yuga*.' It does not profess to be a treatise on astronomy as then known, but its aim was a thoroughly practical one viz, to enable the Vedic

(*Continued on next page*)

first day of the Saura month, Mesa. If the entry of the sun into the sign is in the day time then that day is the first day of the month. If the entry is in the night, the next day is the first day of the month. The time of entry of the sun into a rāśi differs from almanac to almanac and the result is that the entry may be before sunset in one almanac and after sunset in another Therefore, there may be the difference of one day as to the first day of the month. Owing to the adoption of different ayanāmśas and the difference in the length of the year, the Drk, Vākya and Siddhānta almanacs may differ about the first day of the year, about Pongal and other festivals. A Sāvana year is of 12 months of 30 days each, the day being counted from one sunrise to the next. A nāksatra month is the time taken by the moon to pass through the 27 naksatras; the Bārhaspatya year is the time taken by Jupiter to pass through one sign of the zodiac (i. e about 361 days). According to modern astronomy, Jupiter takes 11.86 years (for its revolution round the sun). All these four or five divisions are not mentioned in early works and even in later days all these four divisions do not appear to have been fully utilised, though mentioned in astronomical and dharmaśāstra works. Kautilya provides that[1014] the month for workmen is of thirty days and nights, the Saura month is one half day larger i. e. (30½ days in a month), the lunar month a half day less (i. e. 29½ days), the nāksatra month is of 27 days, the intercalary month is of 32 days (*or* occurs in the 32nd month?), the month is of 35 days (for the wages) of those who tend horses and of 40 days for those who are keepers of elephants. The month for workmen was of 30 days, but it need not have coincided with Full Moon or New Moon, while lunar months end with amāvāsyā or pūrnimā. The Brāhmasphutasiddhānta quoted by Utpala on Brhat-samhitā II 4 p 40 provides that from the saura reckoning one derives the extent of Yuga, the year, Visuvat, Ayana, seasons, the increase and decrease in the length of the day and night, from the cāndra the details about tithis,

---

(Continued from last page)

priest having some knowledge of elementary arithmetic but not knowing astronomy to determine a required *tithi* (age of the moon) and the place (naksatra) of the moon and the sun on a particular day in the *yuga* of five years.

1014 त्रिंशदहोरात्र प्रकर्ममास। सार्धसौरः (सार्ध-सौरः?)। अर्धन्यूनश्चान्द्रमासः। सप्तविंशतिर्नक्षत्रमास। द्वात्रिंशद्मलमास। पञ्चत्रिंशच्चवाहाया.। चत्वारिंशद्धस्तिवाहायाः। अर्थशास्त्र II 20 p 108. The महाभाष्य on वार्तिक 2 on पा. IV. 2 21 mentions a भृतकमास (month of hired service), which seems to be the same as प्रकर्ममास

karanas, intercalary month or *ksaya* month, all acts to be performed at night; from *sāvana* reckoning sacrifices, the *savanas* (the three soma libations) the motions of planets, fasts, impurities on birth and death, medical treatment, expiations and other religious rites Vide Visnudharmottara I. 72. 26–27 for similar verses.

At present the year begins either in caitra or kārtika in different parts of India. But in ancient times it began in different months in different countries and for different purposes. Many Vedic[1015] passages show that the reckoning was pūrnimānta, that the year began after the Full moon of Phālguna and that Vasanta was the first season of the year. It is due to this that Mādhava says in his Kāla-nirnaya p 63 (Calcutta ed.) that Śruti (Veda) is insistent on the pūrnimānta month (paūrnamāsyantatve śruteh katākso bhūyān) The Sm C. (on śrāddha p 377) notes that the *amānta* reckoning is followed in Deccan the (Daksinā-patha) and pūrnimānta in North India (Uttarā-patha). Vide Mundakhede plate of Sendraka Jayaśakti on 10th of Phālguna dark half of year 602 (must be śake) for indicating that in north Mahārāstra there was amānta reckoning then (E I. vol 29 part V pp 116–117). The Vedāngajyotisa[1016] says that the first year of the cycle of five years began in Māghaśukla i. e. at the winter solstice Alberuni (Sachau II. pp. 8–9) mentions that the year began in Caitra, Bhādrapada, Kārtika, Mārgasīrsa in different parts of India. Kautilya[1017] provided that the year for work in the Government office of Accounts was a *cāndra* one and ended on the Full Moon of Āsādha. From Vanaparva[1018] it appears that the year began in Caitra It is

1015. न पूर्वयो फल्गुन्योरन्तिमाद्धीत। एषा वै जघन्या रात्रि सवत्सरस्य यत्पूर्वे फल्गुनी। ... उत्तरयोरादधीत। एषा वै प्रथमा रात्रि' संवत्सरस्य यदुत्तरे फल्गुनी। मुखत एव संवत्सरस्याग्निमाधाय वसीयान्भवति। तै ब्रा I. 1 2 13, मुखं वा एतत्संवत्सरस्य यत्फाल्गुनी पौर्णमासी मुखमुत्तरे पुच्छं पूर्वे। कौ ब्रा V. 1; माघस्यामावास्यायामुपवसत्युदद्वृत्ता वत्सर्ण्यन्युपेते वसन्ति। ...तस्मादत्र न दीक्षेरंश्चैत्रस्यामावास्या एकाह उपरिष्टाद्दीक्षेरन्नागतं तस्य भवति महान्यहानि भवन्ति. । शाङ्खायनब्रा. 19 3, फाल्गुने दीक्षेरन्। मुखं वा एतत्संवत्सरस्य यत्फाल्गुनी . । चित्रापूर्णमासे दीक्षेरन्। चक्षुर्वा एतत्संवत्सरस्य यच्चित्रापूर्णमासो मुखतो वै चक्षु । ...चतुरहे पुरस्तात्पौर्णमास्या दीक्षेरन्। ताण्ड्यमहाब्राह्मण V 9 7–12 Vide तै सं VII. 4 8 for similar words For वसन्त vide p. 492 and notes 716–717 above.

possible to suggest that the year began with Mārgaśīrsa because Anuśāsana (106. 17–30) deals with the results of practising *ekabhakta vrata* from Mārgaśīrsa to Kārtika The Krtyaratnākara (p. 452) quoting Brahmapurāna says that the year began with the *pratipad* of Mārgaśīrsa in Krtayuga. From Gītā X. 35 (māsānām mārgaśīrsoham) it does not, I humby think, follow that Mārgāśīrsa was the first month of the year, since most of the vibhūtis with which Lord Krsna identifies himself are the best in that particular category and as even among Pāndavas Arjuna is mentioned, not as first but as the best. Only a few such as *akshara* or Dvandva are the first of their respective categories. The Varsakriyā-kaumudī and Nirnayasindhu p 79 say that the Brahmapurāna[1019] generally accepts the pūrnimānta reckoning and that it (N. S.) would deal with tithi-nirnaya by generally following Brāhmapurāna. The Bhavisyapurāna when speaking of Holikā festival on Phālguna Full Moon states that it was the end of Phālguna (Uttara-parva 132. 1). Matsya 159 3–6 say that Skanda and Viśākha are said to have been born on the 15th of dark half of caitra in a clump of reeds and it is added that the two were made into one by Indra on the 5th of the bright half of caitra and on 6th crowned as commander. It follows that Matsya thinks the month to have been pūrnimānta.

Something must be said about the 60 year cycle called Bārhaspatya (Jovian). The Visnu-dharmottara[1020] says that the first year called Prabhava of the sixty year cycle began on Māghaśukla when the sun and the moon occupied the naksatra Dhanisthā and were in conjunction with Jupiter In Brhatsamhitā 8. 27–52 the *phalas* of the 60 years from Prabhava to Ksaya are described, as also in Agnipurāna chap. 139, while the Visnudharmottara I. 82. 9 ff and Bhavisya quoted in Jyotistattva pp. 692–697 enumerate all the 60 by name with their *phalas*. Each year of the Bārhaspatya cycle has the word 'Samvatsara' added to it. As *yuga* means five years, the sixty samvatsaras of Jupiter are twelve times five and are so described in Br. S. 8. 23–26 and in Visnudharmottara I. 92. 9 and later writers suppose that the samvatsaras are affiliated to the lunar

1019. पौर्णमास्यन्तमासेनैव ब्रह्मपुराणादौ तिथिकृत्यस्य निर्णीतत्वात् । ध कि कौ. p 499

1020 माघशुक्लं समारभ्य चन्द्रार्कौ वासवर्क्षगौ । जीवयुक्तौ यदा स्याता पष्टिसंवत्सरादयः । विष्णुधर्मोत्तर I. 82 8. आद्यं धनिष्ठाप्रभवं प्रपन्नो माघे यदा वासवदेवयुक्ते । षष्टिसंवत्सरपूर्व प्रभवः स नाम्ना प्रथते भूतहितप्रदाब्दः ॥ बृहत्संहिता 8 27

year alone[1021]. In the Deccan now (and in older times also) it appears that at the beginning of each year the Jovian name is changed. But in northern India Vijaya is the first year instead of Prabhava. The length of Jupiter's year is 361. 9267 days and is shorter than the sidereal year by 4 23 days. The result is that in 85 sidereal years there are 86 Jovian (or samvatsara) years and therefore there is the suppression (ksaya) of one year after 85 years (which is done only in Northern India).

The Jovian cycle must be an ancient one. some Purānas and Varāhamihira speak of it as an established institution. Vide Cunningham's 'eras' pp. 11–25 (60 year cycle) and pp. 26–30 (12 year cycle), Warren's 'Kālasankalita' (pp. 199–216), V. B. Ketkar's work on 'Indian and foreign chronology' pp. 73–82, I. A. vol. 18 pp. 193–209 (Kielhorn) and pp. 221–224 (Fleet) and Gupta Inscriptions, Introduction pp. 169–176 (a note on 12 year cycle and 60 year cycle of Jupiter by Sh. B. Dikshit) for origin and information about the Bārhaspatya cycle and tables. In Malabar and Travancore the Jovian cycle is of twelve years, but it is passed over here for reasons of space.

The names of the 60 Bārhaspatya years are (with some differences such as that Br. S. 8. 35 puts Nata after Subhānu and then brings in Tārana and omits Pārthiva):

1. Prabhava	16. Citrabhānu	31. Hemalambin	46. Paridhāvin
2 Vibhava	17. Subhānu	32. Vilambin	47. Pramādin
3. Śukla	18 Tārana	33. Vikārin	48. Ānanda
4. Pramoda	19. Pārthiva	34. Śārvarin (or Śar)	49. Rākṣasa
5. Prajāpati	20. Vyaya	35. Plava	50. Anala
6. Angiras	21. Sarvajit	36 Subhakrt	51. Piṅgala
7. Śrīmukha	22. Sarvadhārin	37. Śobhakrt (Śobhana)	52. Kālayukta
8 Bhāva	23. Virodhin	38. Krodhin	53 Siddhārtha
9. Yuvan	24. Vikrti	39. Viśvāvasu	54 Raudra
10. Dhātr	25. Khara	40. Parābhava	55. Durmati
11 Īśvara	26. Nandana	41. Plavanga	56. Dundubhi
12. Bahudhānya	27. Vijaya	42 Kīlaka	57. Rudhirodgārin
13. Pramāthin	28 Jaya	43 Saumya	58. Raktākṣa
14. Vikrama	29. Manmatha	44. Sādhārana	59. Krodhana
15. Vṛsan	30. Durmukha	45. Virodhakrt	60. Ksaya

1021 चान्द्राणां प्रभवादीना पञ्चके पञ्चके युगे। सम्परीवान्त्रिदित्येतच्छब्दपूर्वास्तु वत्सरा - इति माधवोक्तेरेव मानत्वात्। सकलशिष्टव्यवहारसहकृतादत एव माधववचनाच्चान्द्रविषया एव प्रभवादिसंज्ञा धर्मानुष्ठानोपयोगिन्यो न तु वत्सरान्तरविषया इत्यपि सिद्धम्। स्मृतिकौ p. 530 (संवत्सरदीपिति); चान्द्राणा ..वत्सरा· 18 कालनिर्णयकारिका of माधव verse 13.

The names of the Bārhaspatya years occur rather early in Inscriptions Among the earliest references are two, one to Siddhārtha-samvatsara in the 5th year of the reign of the Cālukya king Mangaleśa (I. A 19 p 1 ff at p. 18) and the other is to Saumya-samvatsara in the Alas plate of Rāstrakūta king Govinda in *Śaka* 692 (E. I vol VI p. 209) How the samvatsara names were supposed to indicate different consequences for the years concerned can be illustrated by citing two verses from the Brhatsamhitā (8 28-29) 'when the samvatsara Prabhava starts there are drought, strong winds and destruction by fire and also other calamities (like excessive rain, locusts &c), there are diseases due to phlegm, but still people are not distressed.' The consequences in the next four samvatsaras are auspicious, viz. the king rules over a kingdom which is full of paddy, sugarcane and barley and other crops, which is free from dangers, in which there are no hatreds, in which the people are joyous and free from the evil results of kaliyuga (such as *adharma*, poverty, accidental deaths &c).

The subject of months is one of the most complicated. Indians followed the luni-solar calendar from very ancient times like the Babylonians, Chaldeans, Jews and the Chinese. All had therefore to resort to the device of intercalary months (adhika-māsa or malamāsa). But Indians had rarely a *ksaya* month also which is absent in the systems of the other peoples. This difference arose owing to the different ways of the calculations of the motions and positions of the sun and moon, in which I do not propose to enter for reasons already stated But a few words to indicate how an additional month arises may be said here. The solar year exceeds the lunar year by a little over eleven tithis This excess amounts to one lunar month in about 32 solar months The Babylonians had a cycle of 19 solar years in which there were 7 intercalary months (i e in all 235 lunar months) The same cycle was called Metonic cycle after Meton, an Athenian, who introduced it in Greece. This cycle is the foundation of the Jewish and Christian calendars, especially so far as Easter is concerned From the Vedānga-Jyotisa[1022] it appears that in a cycle of five years there were two intercalary

1022 द्व्यूनं द्विषष्टिभागेन ज्ञेयं सौरे सपार्वणम् । यस्कृत्वानुपजायेते मध्येऽन्ते चाधिमासकौ ॥ याजुषवेदाङ्गज्योतिष verse 35 (ed by Sudhakar Dwivedi, Prabhakari Press, Benares, 1906). एवसर्वतृतीयानामब्दानामधिमासकम् । ग्रीष्मे जनयत पूर्वं पञ्चाब्दान्ते च पश्चिमम्॥ अर्थशास्त्र II. 20 p 109, quoted in कालविवेक p 113 from ज्योति शास्त्र

months, one being a 2nd Āsādha at the end of 2½ years and the other a second Pausa at the end of the *yuga* of five years. Kautilya's Arthaśāstra merely echoes this The Pitāmahasiddhānta provided that an intercalary month was to be added after thirty months.[1023] In the Virāṭaparva[1024] it is said that the period of 13 years (12 years in exile and one year *incognito*) was more than completed by the Pāndavas if the cāndra reckoning were followed, as two months were to be added in five years. The purāṇas and other works give varying periods after which an intercalary month occurs A few examples may be cited. Visnudharmottara[1025] states that the solar year has eleven days more than the lunar one and that after two years eight months, sixteen days and four ghaṭis a month has to be added. This is not to be taken literally, otherwise it would have to be held that after four ghaṭikās on 2nd tithi of the dark half of a month an intercalary month has to be added All that the passage of the Purāna does is to indicate the number of days in the lunar reckoning after which an additional month is possible Similarly, a passage of the Kāthakagṛhya[1026] says that in the lunar month in which there is no *saṅkrānti* or there are two sankrāntis a month is added after thirty months have expired from a previous intercalary month. This too indicates only a possibility and not a certainty. The Nirnayāmṛta[1027] declared that a month is added between thirty and thirtysix months. This too is only approximate. A more definite rule is that the lunar month in which no sankrānti occurs is called adhika (intercalary) and bears the same name as that of the

1027. त्रिंशत्तमान्मासाद्यूर्ध्वं षट्त्रिंशन्मासात्पूर्वं त्रयोदशो मासो भवतीति नियम इति निर्णयामृतोक्तं चिन्त्यम् । स्मृतिकौ p 521 (संवत्सर०).

next lunar month which is called *śuddha* or *nija* or *prākṛta* to distinguish it from the intercalary month or if in one solar month two amāvāsyās[1028] and then there is an adhikamāsa or *malamāsa*. That lunar month in which two sankrāntis occur gets two names of which the first is retained and the second is suppressed (i. e. this second becomes a *kṣaya* māsa). This means that a kṣaya māsa occurs when there are two sankrāntis in a month. That lunar month in which the sun enters Mesa sign is called Caitra, that in which he enters Vrsabha is called Vaiśākha and so on.[1029]

One or two points more about *adhika* and *kṣaya* months may be mentioned. The seven months from Phālguna to Aśvina can become only *adhika* but never *kṣaya*. Kārtika and Mārgaśīrsa may become both Adhika and Kṣaya, but rarely; Māgha can become adhika but it has never been adhika or ksaya (vide Ketkar's work p. 40). But the Śuddhikaumudi says that Māgha was a kṣaya month in śake 1397;[1030] and the Malamāsatattva quotes a text to the effect that Māgha may be an intercalary month, but Pausa never. About Pausa, Mr. V. B. Ketkar (in 'Indian and foreign chronology' p. 40) says that Pausa has almost no chance of becoming *adhika*, but has greater chance of becoming *kṣaya* than Mārgaśīrsa' (but see a little below). A kṣaya month is generally preceded and followed, though not immediately, by an adhika month, so that there are two adhika months when a kṣaya month occurs in some years. The Siddhānta-śiromani states that one out of the three months only viz. Kārtika, Mārgaśīrsa and Pausa can be kṣayamāsa and that when a kṣaya

1029. मेषगरविसक्रान्तिः झटिमासे यत्र तत्रैत्रम्। एव वैशाखाद्या वृषादिसक्रान्तियोगेन ॥ ब्रह्मगुप्त q. by शुद्धिकौमुदी p 255, समयप्रकाश 141 (explains 'शुद्धमासाभिप्रायेण प्रायिकं न तु सर्वत्र मलमासाव्यापकत्वात्); चैत्रम् is explained as चैत्र एव चैत्रं स्वार्थे अण् दैवतादिशब्दवत्। क्वचित्स्वाधिकमध्यया लिङ्गमतिवर्तन्ते ॥

1030 कार्तिकादित्रये इति प्रायिकदर्शनं सप्तनवत्यधिकत्रयोदशशतकाब्दे माघे क्षय मासदर्शनात्। शु कौ p 272. 'तृज्ञानो फाल्गुनादीना प्रायो भावस्य च क्वचित्। नपुसकत्वं भवति न पौषस्य कदाचन ॥ नपुंसकत्वं मलमासत्वम्।' मलमासतत्त्व p. 774

māsa occurs there is an adhikamāsa before and after it within three months (Grahaganita, Madhyamādhikāra, verse 6, explanation). The curious reader may consult pp. 246-251 of the C. R. C. Report for light on the intercalary months The Siddhānta-śiromani[1031] mentions some śaka years in which ksaya-māsa occurred or would occur, viz. in saka year 974 (expired) occurred a ksaya month and a ksaya month will occur in śaka 1115, śaka 1256, śaka 1378 and a ksaya month generally occurs after 141 years and rarely in 19 years. In No. 1387 in the list of Inscriptions by D. R. Bhandarkar there is a reference to the 2nd tithi of the bright half of the first[1032] Pausa (dated samvat 34, probably of Harsa era), for a reference to 2nd Asādha see Sohawal plate of Śarvanātha in year 191 (probably Gupta) in E. I. vol. 19 at p. 130, for 2nd Pausa Jesar plate of Siladitya in 357 Valabhi era in E. I. vol 22 p. 120 may be seen.

The rules about what religious acts should be done or not done in an intercalary month will be dealt with a little later. The Śāntiparva refers to the ksaya of samvatsaras, months, paksas and divasas (tithis)[1033]. When there is a ksayamāsa, the adhikamāsa before it is like all ordinary māsas i. e there is no prohibition of doing religious acts in it, but the adhikamāsa that follows a ksayamāsa is the one that is declared unsuitable for religious rites. Adhikamāsa and ksayamāsa may be illustrated by one example for each. Suppose that there was Mesa sankrānti on Caitra amāvāsyā, that from the first tithi following the amāvāsyā to the next amāvāsvā (which is Vaisākha) there

---

1031 गतेऽब्धयद्रिनन्दैर्मिते शाककाले तिथीशैर्भवित्व्यथाङ्काक्षयें। गजाग्न्यब्धिभूमि-स्थया मासशोऽप्य कुर्वेदेन्दुभि. स्यात् क्वचिद्वेकुभिश्च॥ सि शि (ग्रहगणित, मध्यमाधिकार verse 7) q. by नि सि 10, समयमयूख p. 142

1032. मेषादिस्थे सवितरि यो यो मास प्रपूर्यते चान्द्र। चंत्राद्य स ज्ञेय पूर्तिद्वित्वेऽधिमासोन्त्य (q. by स्मृतिकौ p 522. This verse is quoted by Bapudevashāstri (editor of सिद्धान्तशिरोमणि p, 49 note) as from ब्रह्मसिद्धान्त. The 4th pāda lays down that if there are two sankrāntis in one lunar month an intercalary month is required and that the intercalary is the latter of the two There were two methods of naming adhimāsa, one was to give to the adhimāsa the name of the next following month, the second was to give to an adhimāsa the name of the preceding month, in these days it is the first method that is followed The कालनिर्णयकारिका 18 says 'चान्द्रेऽधिमासोऽसंक्रान्त सोत्तमर्भवति द्वौसरे॥', हे on काल p 32 says 'अधिमासस्योत्तरमासस्यपूर्वोऽर्धमासइत्तरमासस्यसंज्ञा'. Vide App. to E I. vol XIX-XXIII for first Pausa

1033 क्षयं संवत्सराणा च मासानां च क्षयं तथा। पक्षक्षयं तथा ज्ञात्वा दिवसानां च तत्त्वतः। क्षयं वृद्धिं च चन्द्रस्य ज्ञात्वा मत्पक्षतस्तथा॥ शान्ति 301 46-47

is no saṅkrānti and then Vṛsabha *saṅkrānti* occurs on the 1st tithi thereafter; the month that had no saṅkrānti would be *adhika* Vaiśākha and the month on which Vṛsabha saṅkrānti takes place would be the śuddha (*proper*) Vaiśākha Now as to *kṣaya māsa*; suppose that there is Kanyā saṅkrānti on Bhādrapada amāvāsyā, then there is adhika Āśvina followed by Śuddha *Āśvina*, on the first tithi of which there is Tulā saṅkrānti, then on Kārtika-śukla 1st there is Vṛścika saṅkranti, than on Mārgaśirṣa śukla pratipad there is Dhanus *saṅkrānti* and in the same month on amāvāsya there is Makara saṅkrānti. Then that month having two saṅkrantis (Dhanus and Makara) would be called kṣayamāsa and so there would be one month Pausa (constituted by two months, Mārgaśirsa and Pausa). Then on Māgha amāvāsyā there is Kumbha saṅkrānti, then Phālguna would be *adhika māsa* and there would be Mina-saṅkrānti on śuddha Phālguna sukla pratipad. Thus in the year in which there is a kṣayamāsa, there are still 13 months and the days of the year amount to some days less than 390.

The four kinds of months, Cāndra, Saura, Sāvana and Nāksatra [1034] have already been described (p. 657) when speaking of the Cāndra and other years. As observed by the Kṛtyaratnākara (p. 80) the nāksatra month is not required in Dharmaśāstra, but is known only in Jyotiṣa-śāstra. Pañcāngas are generally prepared for each year They contain separate [1034a] pages for the two pakṣas (fortnights) of each of the twelve months (or 13 months if there be an intercalary month) The five important parts of the Indian calendar are[1035] *tithi*, week day, *nakṣatra*, *yoga* and *karana*. The Muhūrtadarśana [1036] says that

---

1034. मासास्तु सावन सौरश्चान्द्रो नाक्षत्र इत्यपि । दर्शान्त. पूर्णिमान्तो वा चान्द्रोऽसौ विभेदतः ॥ ... सौरे राज्ञ सावनस्तु यज्ञे ज्योतिष्टिकेऽपर ॥ कालनिर्णयकारिका 16-17, आद्यदर्शादावपरो नाक्षत्र इत्यर्थ .

1034a The accompanying printed page is from the reformed calendar prepared according to the Karanakalpalatā and used by some people in Mahārāstra It may be compared with an extract of one fortnight from a pañcānga 223 years earlier than the one for śake 1878 It will be found that the fundamental contents are the same in both

1035. न च तिथिनक्षत्रयोगकरणाना पञ्चाङ्गात्पतिना निर्णय कृत्वा स्वस्व पार्वी शास्त्रीयकर्मोपयोगी भवतु कुत उपेक्षित इति शङ्कनीयम् । अहोरात्रपरिमितत्वेन वासरे सम्भवाभावात् । कालनिर्णय p 331.

it may have six parts if the signs of the zodiac are given and seven if the positions of the planets are mentioned. Vāra (weekday) is the period of time between one sunrise and the next and not much will have to be said about it except about the origin of week days. A great deal has already been said about tithis and naksatras What remains to be said about these, if at all, and the treatment of Yoga and Karana will be dealt with later on. We must revert to the topic of naksatras.

The names of the twelve solar months distributed two each among six seasons are very ancient. They occur in the Taittirīya-samhitā IV 3 11. 1, Vāj S 13 25 They are Madhu, Mādhava, Sukra, Śuci, Nabhas, Nabhasya, Isa, Ūrja, Sahas, Sahasya, Tapas and Tapasya[1037]. In the Brāhmanas we meet with months (lunar) named form naksatras. It is therefore that some works speak of *ritus* (seasons) as of two kinds, viz. Saura and Cāndra. The former begin either with Mīnarāśi or Mesarāśi, while the latter are called Caitra and the rest[1038] The name of the naksatra is often formed into a derivative and joined to the word Paurnamāsī, Pūrnamāsa or Amāvāsyā and sometimes the names of the months such as Phālguna and Caitra occur in the Brāhmanas (vide note 1015 above).[1039]

Pānini derives the names of the months like Caitra from Paurnamāsī and expressly names the Āgrahāyanī (IV. 2. 22), Phālgunī, Śravanā, Kārtikī and Caitrī (IV 2 23). 'Paurnamāsī' itself is derived from Pūrnamāsa by the Vārtika 2 on Pānini IV. 2. 35. The Full Moon tithi which has Pusya naksatra is called Pausī by the sūtras (Pān. IV. 2. 3 and IV, 2 21). Thus there were three stages; first the 27 naksatras were distinguished and named in the very ancient Vedic samhitās, then the Full Moon day was called Caitrī Paurnamāsī (and so on) because on that tithi the Moon was in Citrā naksatra and so on; then

---

1037. वायुपुराण (chap 50, verse 202) enumerates these twelve months The gṛhyasūtras employ the saura month names, vide p 610 above about the months for marriage They occur in inscriptions also as the month 'Sahasya' and 'Tapasya' in the Mandasor Inscriptions of 493 and 529 of the Mālava era (Gupta Inscriptions p 79 ff)

1038 वसन्तादयस्तु द्वेधा चान्द्रा सौराश्च चान्द्रकाः । चैत्राद्या ह्याद्य मीनाद्या मेषाद्या वा विवस्वतः ॥ कालनिर्णयकारिका 15

1039. नक्षत्रेण युक्तः कालः । पा. IV, 2 3. तस्मिन्पौर्णमासीति । पा IV. 2. 21; पूर्णमासाद्वण् । वार्तिक 2 on पा. IV. 2. 35. The महाभाष्य explains 'पूर्णमासी यस्यैऽस्मिन् काले पौर्णमासी सिथिः'.

the months were called Caitra, Vaiśākha &c. because they had Caitrī or Vaiśākhī Paurnamāsi in it. All this occurred long before Pāṇini. Later the saura names Madhu, Mādhava &c. came to be indentified with lunar months Caitra, Vaiśakha &c. and became synonyms. When this occurred it is difficult to say. But it is much older than the Christian era. It must be long before Kālidāsa, who in his Meghadūta first speaks of Āsādha and then refers to the next month Śrāvana as Nabhas. Often on the Full Moon day the Moon might not actually be in or very near Citrā or Śravaṇa naksatra but that did not matter; the month would still be called Caitra or Śrāvana as the case may be.[1040]

It has already been shown that in ancient Brāhmana times the months ended with the Full Moon (i. e. were pūrnimānta). When foreigners like Kaniska and Huviska ruled over Northern India they struck to the Pūrnimānta Indian months in their records, though here and there they employ Macedonian month names. For example, the Greek month Gurppiya is used in Huviska's reign (28th year) in the Mathurā Brāhmī Inscription and the Greek month[1041] Artemisios also occurs. In the Zeda Inscription the month must be held to be pūrnimānta as the naksatra Uttaraphalgunī is there said to have occurred on the 20th day of Āsādha.[1042] The Tekkalı plates of Devendravarman record a grant on the occasion of a lunar eclipse on the 30th day of Māgha.[1043] Similarly, in the Lodhia plates of Sivagupta

1040. नेपादित्ये सवितरि यौ यौ वर्ज प्रवर्तते। चान्द्रमासानक्षत्रवन्नाम्नेत्याद्या द्वादश स्मृता ॥ तेषु या या पौर्णमासी सा सा चैत्र्यादिका स्मृता। कादाचित्कन यौगेन नक्षत्रस्येति निर्णय ॥ q by सुन्दत्त on गौतमधर्मसूत्र 16 1, who explains 'तद्वत् सिंहस्थे सवितरि या अमावास्या तद्वन्ते चान्द्रमसे मासि पौर्णमासी सा श्रवणा श्रावणीति चोच्यते। श्रवणयोगस्तु भवतु मा वा भूत्।' Mr. Tarakesvara Bhattacharya in his paper on 'History of ancient Indian Astronomy' in J of Ganganatha Jha Research Institute, vol. XI-XII (1953-55) at p 17 quotes as from अमरसिंह the verse 'युक्तयुक्ता पौर्णमासी पौषी माघे तु यत्र सा ॥ नाम्ना स पौषो माघाद्याश्चैत्रमेकादशापरे ॥'. It appears that क्षीरस्वामी does not accept this verse as the original verse of Amara, but only as a variant reading Mr. Bhattacharya seems to be unaware of this. The महाभाष्य on वार्तिक 5 on पा IV 2 3 says 'युक्तसमीपगते चन्द्रमसि नक्षत्रो भवति युक्तेनाद्य नक्षत्रियेति'.

1041 Vide E I vol 21 p 56 at p 60 for the first and C. I. I. vol. II p. 170 for the second written as 'Arthamisiya' on the Wardak vase of the year 51

1042 E. I. vol. 19 p 1 at p 15 = C. I I vol II p. 145 'Sam 10 1 Ashadasa Masasa 20, Uttaraphalgune'

1043. I. H Q, vol XI p 300 at 302.

Bālārjuna of Kośala (i. e. Chhattisgarh region) published in E.I. vol. 27 p. 319 the date 'Sambatsare sapta pañcāśattame Kārtika-pornamāsyām ankena samvat 57, Kārtika-dina 30' (p. 325) shows that the month was pūrnimānta. The Rājatarangini[1044] says that king Harirāja came to the throne at the beginning of Āsādha in the 4th year (of the Laukika era), who ruled only for twenty-two days and died on 8th of the bright half of Śuci (i e. Āsādha) and thereby shows that the month was pūrnimānta in Kāshmir then as now.

Though inscriptions before the Christian era rarely mentioned the names of months (such as Kārtika 14th in the Kharosthī Inscription of the Greek king Menander,[1045] 2nd century B. C.), the usual mode is to mention the rtu (season), then the number of the month (and not name) in the season and then divasa, e. g. vide the seven inscriptions from[1046] Mathurā and the Śarnath Inscription of Mahārāja Kaniṣka.[1047] In some inscriptions only the *rtu* (season), the number of the paksa and the day occur; vide Nāgarjunikonḍa[1048] Ins. (3rd century A. D.), the Omgudu grant of Vijayaskandavarman (E. I. 15 p. 252 'Hemantapakse trtīye trayodaśyām'), the Nāga image Ins. of Kaniska's time (E. I. 17. p. 11) in sa. (Samvat) 8, grī. 4, di (divasa) 5. Vide also Luder's list No. 922 and No. 1202 (the latter of Mādhariputa Purisadata, samvachhare 20, Vāsāpakham 8, divasam 10). Sometimes the month is mentioned but no paksa and the days are counted ccntinuously from 1 to 30, e. g. Khoh plates of Mahārāja Jayanātha (in year 177 and 22nd day of Caitra) and Khoh plate of Śarvanātha in year 193 month Caitra day 10th without the mention of the fortnight (vide Gupta Inscriptions pp 121 and 125), E. I. vol. 20 p. 59 at p. 63 (*sam* 159, apparently of the Gupta era, Māgha di. 7), E. I. 19 p. 96 (the Mathurā pedestal Ins. of Kushāṇa year 14 in Pausamāsa

divasa 10), Gupta Ins. of Gupta year 129 in Jyestha-māsa di 18 (Gupta Inscriptions p 45 at p. 46). The non-mention of the paksa and the continuous counting of days from 1 to 30 continued even in the 9th century, vide Kota Inscription of Sāmanta Devadatta (I. A. 14. p 351) of *samvat* 879 (923 A D) Māgha su. 20. It may by noted that here the month is pūrnimānta In modern times people use such abbreviations as *su di* or *va di* or *vadya*. The first is abridged from *śukla dina* (or *divasa*) or *śuddha dina* and the latter from *bahula-dina* or *divasa* (*va* and *ba* being often interchangeable). For 'bahula', vide E. I. vol. 16, p. 236 at p. 238 (inscription of Rudrasena in the year 127 held to be of the saka era), Rudradāman's Junagadh inscription in the year 72 (150 A D.) of Mārgasirsa, bahula-pratipad (Luder's list No. 965 and E I. vol. VIII p 36 at p. 40), Udayagiri cave inscription in Gupta era 106 (425-26 A. D) 'bahuladine' (Gupta inscriptions p 258). For *śukla*, vide Gupta Inscriptions pp. 95, 102, 114 and for *suddha*, vide the Nasik cave inscription in the year 42 of the reign of Usavadāta, son-in-law of Nahapāna, where we have 'Kātikasudhe' (in E I VIII at p 82) and Pardi plates of Dahrasena in Kalacuri year 207 (i. e. 455-56 A D.) in C. I. I. vol IV pp 22, 24 (Vaisākha-śuddha-trayodasyām), for *su di*, vide E. I 17 p 110 (of the Valabhi year 106, 525-26 A. D.). For '*ba di*' vide JBBRAS (New Series) vol. I. p. 66 'Bhādrapada *ba* 13' in Valabhi year 210 and E. I. 19 p. 126 plate of Dhruvasena in Valabhi year 210 Bhādrapada ba di 9). It may be noted that '*sudi*' and '*vadi*' are treated as indeclinables (*avyaya*) and included in the 'svarādigana' ('svarādmipātamavyayam' Pāṇ I.1 37) by later grammatical writers. The Kāsikā, however, does not include these two in the 'svarādi-gana' which is an *ākrtigana* and therefore liable to be added to. 'Vadya' is inexplicable except as an attempt to have some word with some assonance of sound parallel to śuddha and related to *va di*. It is not clear why the word 'paksa' is not used in many inscriptions before and after the Christian era even though the word *paksa* occurs in such ancient works as the Brāhmanas[1049] and Upanisads. The Chāndogya-Upanisad (IV. 15 5 and V. 10. 1), the Brhad-āranyaka-Upanisad VI. 2 15-16 employ the words 'āpūryamāna-paksa' (also pūrvapaksa' and 'aparapaksa' in Br Up.

[1049] तेषां पूर्वपक्षे क्षुत्या सम्पद्यते। ताण्ड्यब्राह्मणम् V 9 14. तं पूर्वपक्षे याजयेत् श्रेयानेव भवति। य कामयेत पापीयान्स्यादिति तमपरपक्षे याजयेत्। पापीयानेव भवति। तस्मात् पूर्वपक्षोऽपरपक्षात् श्रेयस्तरः॥ तै. ब्रा. III. 2, 5 11.

appears to mean 'soiled or dirty clothes'. The word 'malimluca' occurs in Vāj. S. 22. 30, Śānkhāyana-śrautasūtra VI, 12.15. The Malamāsatattva derives the word as follows: being *mali* (soiled) it passes on'. The words 'samsarpa' and 'amhasaspati' occur in Vāj. S. 22. 30 and 31[1054] respectively, and 'amhasaspati' in Vāj. S. 7. 31 after the mantras referring to the twelve *saura* months, Mādhu, Mādhava &c The Tai. S. (I. 4. 14. 1 and VI. 5 3. 4) has the formula 'samsarpebyaham-spatayе tvā'.[1055] 'Amhaspati' literally means 'the lord of sins or evil' (i. e. a condemned month). Later medieval writers make a distinction[1056] between 'samsarpa' and amhaspati'. When there are in one year two adhimāsas and a *kṣaya* māsa, the first of the two adhimāsas is called 'samsarpa' and it is not condemned for all religious matters but only for marriages, such sacrifices as Agnistoma, festivals (that are not obligatory) and auspicious rites of children (such as 'nāmakarana'). The name amhaspati is confined to *kṣayamāsa*. The intercalary month is called Purusottama-māsa (Visnu being called Purusottama) in some of the Purānas as in Padma VI 64, probably with the purpose of reducing the opprobrium that attached to an intercalary month.

In the Dharmaśāstra Literature considerable space is devoted to the intercalary month e. g. in the Agnipurāna 175 29-30, the Rājamārtanda (folios 68a-69, verses 1078-1115), Kālaviveka of Jīmūtavāhana pp. 113-168, Hemādri on Kāla pp 26-66, Kālanirnaya of Mādhava, Madanapārijāta pp. 544-550, Suddhikaumudī pp. 265-296, Malamāsatattva (Jivananda ed.) pp. 736-856, Samayaprakāśa pp 140-155 (part of Viramitrodaya), Nirnayasindhu pp. 9-17, Smṛtikaustubha (samvatsaradīdhiti) pp. 520-529, Dharmasindhu pp. 4-7, Purusārthacintāmani pp. 17-31. A brief treatment is all that can be attempted here.

1056 यस्मिन्मासे न संक्रान्तिः सक्रान्तिद्वयमेव वा। समर्यादस्पती मासावधिमासश्च निन्दितः॥ वर्हस्पत्यब्दयोर्निर्णय q. by हे on काल p 30, समयप्रकाश p. 143 असंक्रान्तोऽधिकश्चयं द्वौ चैत्रसर्पौ आदिमः। क्षयमासो द्वितीयेऽन्त्य न चाहस्पतिमज्जक ॥ का नि कारिका 19 The लक्ष्मी comments 'उत्तरस्मिन्नेवाधिमास पूर्वस्मिन्सक्रान्त्योऽपि नाधिमासः किं तु सनर्पं इति', the शुद्धिकौमुदी remarks 'अत एव कर्मणि दोषत्व नापतीति सनर्पमासापि तत्र वक्ष्यते। अथ च माम. क्षयमासाधिकरणनवत्सर एव भवति।' p 271; यद्वर्षमध्येऽधिकामासपुरस्ने तत्कार्मि- का.द्वितीयं क्षयाख्यं (v. l. क्षयाख्यम्)। मासतत्त्व स्याज्जनिद्व प्रयत्नादिवादयश्चोत्सवमङ्गलेषु॥ q. by हे (on काल) p. 34, मलमासतत्त्व p 702, समयप्रकाश p. 144 (reads क्षयाख्य), q. by हे (on काल) p. 34, मलमासतत्त्व p 702, समयप्रकाश p. 144 (reads क्षयाख्य),

The Agnipurāna provides:[1057] one should avoid in an intercalary month the performance of the following acts, viz. of consecration of Vedic fires, the establishment of images, sacrifices, religious gifts, vratas, the recitation of the Veda after undertaking it, observance of certain *niyamas* such as mahānāmnī, the letting loose of a bull (after sapindana), tonsure of a child, *upanayana*, rites such as the samskāras of nāmakarana, inauguration of a king. Long lists of what may or may not be done in an intercalary month occur in many works such as in Hemādri on Kāla pp. 36–66, Nirnayasindhu pp 10–15, Dharmasindhu pp. 5–7 It would be enough if some general provisions are stated The general[1058] rule is that one should perform obligatory acts and acts prescribed on certain occasions even in an intercalary month. For example, one must perform even in an intercalary month daily sandhyā worship, the five daily Mahāyajñas (such as Brahmayajña, Vaiśvadeva), the offering into fire (as an *agnihotra*) and must take a bath if there is an eclipse (in adhimāsa), although this is *naimittika*; so also one must perform the funerary rites after a relative's death even if the death takes place in an adhimāsa (this also is *naimittika*). But an obligatory rite should not be performed in adhimāsa if śāstra allows its postponement, e g. Soma sacrifice. The general rule is that no kāmya rite (not obligatory, but to be performed for securing some object or result) is to be performed in adhimāsa. There are exceptions to this also if a certain religious rite is begun before an adhimāsa falls (such as a Prājāpatya penance for twelve days or a cāndrāyana penance for a month) it may be continued even in adhimāsa. If there is drought and one desires to perform the *Kārīrīṣṭi* for bringing down rain, this may be done even in adhimāsa, since to wait might defeat the

1057 अग्न्याधेयं प्रतिष्ठा च यज्ञदानव्रतानि च। वेदव्रतवृषोत्सर्गचूडाकरणमेखला। माङ्गल्यमभिषेकं च मलमासे विवर्जयेत्॥ अग्नि० 175. 29–30 (reads देवव्रत) q by स्मृ कौ p. 283 (without name) This is cited by हे (on काल) p. 40 as occurring in बृद्धमनु, बृहस्पति, पैठीनसि and ज्योति पराशर and by का वि p. 129 and समय-प्रकाश p. 149 from ज्योति-पराशर

1058. बृहस्पति.। नित्यनैमित्तिके कुर्यात्क्रियते सत् मलिम्लुचे। तीर्थस्नानं गजच्छाया प्रेतश्राद्धं तथैव च॥ स्मृत्यन्तरे च। अनन्यगतिं पत्निर्त्वं कुर्यान्नैमित्तिकं तथा॥ हे. on काल pp 45–46 The first verse occurs in भुजबल p. 349 and is q by का वि p. 140, मलमासतत्त्व p. 788, समयप्रकाश p 144. For गजच्छाया vide H. of Dh. vol. IV. p. 371 n The समयप्रकाश explains that गजच्छाया here means श्राद्ध performed in the shadow of an elephant.

desired object These provisions are neatly summarised in the Kālanirnaya-kārikās quoted below [1059]

Certain matters were to be done only in malamāsa such as the gift[1060] of 33 *apūpas* (cakes) every day to brāhmanas or at least once in the intercalary month; certain acts were not to be done in adhimāsa, but only in the *śuddha*[1060a] month, such as the sinking of wells, construction of tanks, solemn sacrifices, the mahādānas and vratas Certain matters can be done in adhimāsa as well as in śuddha-māsa[1061] e.g rites on a pregnancy (such as *pumsavana*), taking interest on money lent, wages of workmen for fixed periods, monthly śrāddha (on amāvāsyā), daily gifts, bath at a holy place, *japa* (muttering mantras), homa with barley grains or rice or sesame, rites on the birth of a child, funeral rites, *nava-śrāddhas*, śrāddha on 13th tithi with Maghā-naksatra, the sixteen śrāddhas, bath and śrāddha and gifts and *japa* on lunar or solar eclipse, obligatory and *naimittika* acts; these may be done in malamāsa also A great deal of discussion is held on śrāddhas in malamāsa by Hemādri on Kāla (pp 56–63), Malamāsatattva (pp. 841–856), Nirnayasindhu

1060 a. वापीकूपतडागादिप्रतिष्ठा यज्ञकर्म च । न कुर्यान्मलमासे तु महादानव्रतादिकम् ॥ q by हे. on काल p 41 and का. वि p 130. महादानs have been enumerated and described in H of Dh vol. II pp. 869–877.

1061. यम· । गर्भे वार्द्धुषिके भृत्ये श्राद्धकर्मणि मासिके । सपिण्डीकरणे नित्ये नाधिमास विवर्जयेत् ॥ तीर्थस्नानं जपो होमो यवव्रीहितिलादिभि ॥ जातकर्मान्त्यकर्मणि नवश्राद्ध तथैव च । मघात्रयोदशीश्राद्धं श्राद्धान्यपि च षोडश । चन्द्रसूर्यग्रहे स्नान श्राद्धदानजपादिकम् । कार्याणि मलमासेपि नित्यं नैमित्तिक तथा । q. by हे (*on* काल p 52), समयप्रकाश p 145, अन्त्यकर्माणि दहनोदकपिण्डदानास्थिसञ्चयनादीनि, for नवश्राद्ध vide H of Dh vol IV. pp 262–263 and 577, 519–520, for sixteen śrāddhas, vide H. of Dh vol. IV. pp. 518–519.

(pp. 11–15), Samayaprakāśa pp. 151–155 This is passed over for reasons of space For some remarks on the śrāddha of a person dying in an intercalary month, vide H of Dh. vol. IV. pp. 546–547

Just as the 13th month was to be discarded for religious rites, in Western countries number 13 is supposed to be unlucky, particularly in the case of company at a table

One of the five angas in the Indian pañcāngas is the week-day. A brief discussion on days and week-days has therefore to be held. The interval between two sunrises was considered as the most important unit of time This is solar and is called the civil day But *tithi* is a lunar division of time (as described above) and begins and ends at various spaces in the solar day. The word 'day' has two meanings, viz (1) from sunrise to sunset and (2) from sunrise to sunrise[1062] In Ṛg. the word 'ahah' is applied to both the dark part of it (i. e 'rātri' night) and to the bright part.[1063] The word *rātri* is not so frequently used in the Ṛgveda as the word 'ahan' and the word 'dina' is very frequently used in compounds like 'sudinatva', 'sudina' 'madhyandina'; 'ahorātra' (day and night) occurs only once in the Ṛg. X. 190. 2 The word 'pūrvāhna' (first part of the day or forenoon) occurs in the Ṛgveda X. 34 11. Three parts of the day also occur in the Ṛgveda viz prātah, *sangava* and madhyandina[1064] (mid-day). These are three out of the five parts of the day, the other two being *aparāhna* and *astamaya, astagamana* or *sāyāhna*, which five are mentioned in the Śatapatha Br. II. 3 2 9 Both 'prātah' (morning) and 'sāyam' (evening) occur in Ṛg. V. 77. 2 and 'sāyam' alone in Ṛg VIII. 2 20, X. 146. 3 and 40. The day and night were also divided into eight parts by Kautilya (I. 19) and by Daksa and Kātyāyana The division of the day and night each into 15 muhūrtas has been already dealt with at some length on pp. 537–541.

Great divergence prevailed about the beginning of the day. The Jews placed the beginning of the civil day in the evening (vide Genesis I. 5 'The evening and the morning were the first day' and also I 13.) The Egyptians divided the day from sunrise to

1062 Vide H of Dh vol. II pp 644–45, vol III p 242 and vol IV. pp 376–377 for the different ways of dividing the day

1063 अहश्च कृष्णमहरर्जुनं च वि वर्तेते रजसी वेद्याभि । ऋ VI. 9. 1

1064. उता यात सङ्गवे मातरद्धो मध्यन्दिन उदिता सूर्यस्य । ऋ V 76. 3.

sunset into twelve parts and thus obtained hours whose length depended on the season, while the Babylonians[1065] began the day with sunrise and divided day and night into twelve parts, each of which corresponded to two of the equinoctial hours In Athens and in Greece generally the day commenced in historic times with the evening for the purposes of the calendar(vide Heath's 'Aristarchus of Samos', 1913, p. 284). In Rome the day began with midnight. With Indian writers the day begins with sunrise (as in Brāhmasphuta-siddhānta XI. 33), but they were not unaware of different beginnings of the day. The Pañca-siddhāntikā[1066] remarks that Āryabhata declared that the day began at midnight in Lankā and again he said that it began with sunrise and that sunrise in Lankā coincides with sunset in Siddhapura, with mid-day in Yamakoṭī and with midnight in the Romaka country.

In modern times the civil day begins at midnight.

The seven day week is an artificial man-made arrangement. It corresponds to no astronomical or celestial phenomenon. The Mexicans had a week of five days[1067] before the Spanish conquest. The seven days week prevailed among Jews, Babylonians and the Incas of South America. The Romans had a week of eight days in Republican times, while the Egyptians and ancient Athenians had a week of ten days In the Old testament God is said to have gone on with the work of creation for six days, to have rested on the seventh and to have blessed it and sanctified

---

1065. Hastings in E R.E. vol XII p. 50 says so, but Prof Neugebauer in E. S A. p 101 says that Babylonian day began in the evening and the first day of the month was made to depend upon a natural phenomenon, namely, the visible crescent of the Moon. Fotheringham in his Explanations to Nautical Almanac 1935 (at p. 769) states that the Babylonians reckoned day from midnight and mentions Pliny as saying that Hipparchus also did the same.

1066. लङ्कार्धरात्रसमये दिनमर्धरात्रं जगाद चार्यभटः। भूप स एव सूर्योदयात्सूत्र्याह लङ्कायाम्॥ उदयो यो लङ्काया सोऽस्तमयः सविद्रेव सिद्धपुरे। मध्याह्नो यमकोट्या रोमकविषयेऽर्धरात्रः स॥ पञ्चसि 15. 20 and 23 Lankā here is not Ceylon but an imaginary island to the south of India. The location of सिद्धपुर and यमकोटी is not known; रोमक seems to be Alexandria In आर्यभटीय (गोलपाद) the 13th verse is उदयो यो लङ्काया सोऽस्तमयः सविद्रेव सिद्धपुरे। मध्याह्नो यमकोट्या रोमकविषयेऽर्धरात्र स्यात्॥ This corresponds to पञ्चसि 15 23 Vide सूर्यसिद्धान्त, भूगोलाध्याय, verses 38–40 for the four cities mentioned in the आर्यभटीय being in the four directions

1067. Vide G. Schiaparelli's 'Astronomy in the Old Testament' (translated, Oxford, 1905) p. 130.

it (Genesis 2. 1–3). In Exodus 20. 8–11, 23. 12–14 and Deuteronomy 5. 12–15 God is said to have commanded the Jews to labour for six days, take rest on the seventh and to observe it as the Sabbath of the Lord God and to keep it sacred. The Jews gave no special names to the week days except the Sabbath which was the last day of the week and which they observed on Saturday (and not on Sunday).

The Old Testament contains no traces of proper names having been given to week days. It appears that even in the New Testament week days were indicated by numbers. Vide Matthew 28 1 'In the end of the sabbath as it began to dawn towards *the first day of the week* came mary Magdalen &c'; Mark 16 9 '*Now when Jesus was risen early the first day of the week* he appeared first to Mary Magdalen &c', Luke 24 1 '*Now upon the first day of the week* being early in the morning they came into the sepulchre' Each of the seven days of the week is designated as the sabbath or holy day by various nationalities and religious communities i. e Monday is the Greek Sabbath, Tuesday the Persian, Wednesday the Assyrian, Thursday the Egyptian, Friday the Moslem, Saturday the Jewish and Sunday the Christian.

On the origin and development of the seven-day cycle the leading work is F. H. Colson's 'the week' (Cambridge University Press, 1926). Some of his arguments may be briefly indicated Dion Cassius (first quarter of 3rd century A.D.) in his 37th book says that Jerusalem was captured[1067a] by Pompey in 63 B C. owing to the reverence of the Jews for Saturday (their Sabbath day) and he further makes the statements that planetary week originated in Egypt, that it was of recent growth and that it was in general use in his day; vide Dio's 'Roman History' vol. III pp 129, 131 where two traditional explanations are given as to how the week days were named after planets, the 2nd of which is based on the 24 hours of the day and night What must be emphasized is that Dio is positive that week days did not originate in Greece, but in Egypt and their introduction was recent Dio was a Roman and wrote his History between 200 to 222 A. D Therefore, the introduction of week days in Greece could not have been earlier than the first century of the

1067 a Vide Dio's 'Roman History' (Loeb Classical Library) vol III pp 126–127 where it is said that Pompey captured the Jewish defenders of Palestine on the day of Sabbath, because they did not work on that day at all

Gupta year[1070] 165 (i. e. A. D. 484), which mentions Thursday and the 12th tithi of the bright half of Āsādha. Supposing for argument that weekdays were originally borrowed from some foreign country, at least a few hundred years would be necessary before such a borrowed system could become general and could be utilized even in Indian proclamations by a great Indian imperial dynasty like the Guptas.

Let us now turn to the literary evidence. The Āryabhaṭīya (Daśagītikā, verse 3) mentions Thursday.[1071] In Bṛhatsaṃhitā[1072] occurs this 'when Pitāmaha declared that the weekday Tuesday does not lead to auspicious results or when (I declare) that the day of the son of the earth is inauspicious, what difference is there between (the śāstra) composed by a divine author and that by a human author (like myself)?' It has been seen above (p 488) that the Pañcasiddhāntikā tells us that a five year cycle started according to Pitāmaha in the second year (expired) of the Śaka era. Therefore it appears that Pitāmaha who probably wrote about 80 A D mentioned Tuesday. The Pañcasiddhāntikā (in I. 8) mentions Monday in summarising the features of the Romaka siddhānta (vide note 1004). The Bṛhatsaṃhitā in chapter 103 (verses 61–63) sets out what actions are proper to be done on the weekdays from Sunday to Saturday and Utpala quotes eighteen *Anuṣṭubh* verses in all from the ancient astronomer Garga on the same topic.[1072a] Kern

---

1070. शते षष्यधिके पर्वाणां भूपतौ च भुवस्ते। आषाढमास-शुक्ल-द्वादश्या गुरु-दिवसे॥ Gupta Inscriptions (ed by Fleet) No. 19 p. 69. Vide V. B Ketkar's 'Indian and Foreign chronology' pp. 50–51 where he establishes that this day corresponds to June 21, A. D. 484

1071. काहो ह मनुयुग इह गतास्ते च मनुयुग रूना च। कल्पादेर्युगपादा ग च शुक्र-दिवसाच्च भारतात्पूर्वम्॥ दशगीतिकापाद verse 3. The com explains राज्य चरता पृथिवीराद्दीनामन्त्यो शुक्रदिवसो भारतशुक्रदिवस। द्वापरावसानगत इत्यर्थ। तस्मिन् दिवसे युधिष्ठिरादयो राज्यमुत्सृज्य नक्षत्रमरुधान गता इति प्रसिद्धि। तस्माद्भुक्रदिवसात् पूर्वकल्पादेरस्य गता मन्वादय उक्तोक्ता। This verse means 'There are 14 Manus in a day of Brahmā and 72 yugas make up the period of a Manu, since the beginning of this *kalpa* up to the Thursday of the Bhārata battle six Manus, 27 yugas, 3 yugapādas have elapsed.' काह means कस्य ब्रह्मण अह दिवस; in the system of आर्यभट ह = 14, मनु = 72, यु = 70 and ख = 2, रूना = 27 (यु being = 7 and न or ञ = 20). ग = 3. ब्रह्मगुप्त in ब्राह्मस्फुटसिद्धान्त XI. 11–12 criticizes आर्यभट for his views mentioned in note 1066 above

1072. क्षितितनयदिवसवारे न क्षुभकृदिति पितामहप्रोक्ते। कुजदिनमविशमिति वा कोऽत्र विशेषो वृद्धिव्यक्तते' (v. l. कृते)॥ बृहत्सं० I. 4.

1072a. The भागवत X 7 5 says 'ज्योतिषामयनं साक्षात् यत्तज्ज्ञानमतीन्द्रियम्। प्रणीत भवता येन पुमान् वेद परावरम्॥' This is said of गर्ग (who is said in verse 7 to have been the आचार्य of the Yadus).

assigns Garga to the 1st Century B. C This would carry the knowledge of weekdays in India to the first century before Christ. Philostratus in his life of Apollonius of Tyana (who died in 98 A D) relates (vide note 900 above) how when Apollonius travelled in India he received from Iarchus, the chief of the brāhmanas, seven rings bearing names of seven planets, each one of which Apollonius was to wear on each of the weekdays. As Philostratus wrote in the first quarter of the 3rd century A. D., this would carry the knowledge of the planetary week in India at least to the 1st century of the Christian era. The above references furnish a *terminus ad quem* for India's knowledge of the planetary week days (viz. first century B. C. to first century A D.). The *terminus a quo* cannot be stated with certainty.

Now some other literary evidence about the dates of which there are likely to be doubts and disputes would be set out. In the Vaikhānasa-smārta-sūtra (I 4) and Baudhāyanadharmasūtra (II. 5. 23) *tarpana* (satiation with water) is offered to the Sun, the Moon, Mars, Mercury, Jupiter, Venus, Saturn and to Rāhu and Ketu and the former mentions Budhavāra (Wednesday) in II 12. It has to be conceded that other sūtras such as Āśv gr III. 4. 1–5, the Kausītaki gr (IV. 9–10), the Hir. gr. II. 19–20, Bhāradvāja gr. III. 9–11 contain no *tarpana* to the weekdays or their deities. The Atharvana-Vedāṅga Jyotisa has a section on weekdays (of eight verses) and points out what should be done on each of the seven weekdays from Sunday to Saturday (two of which are quoted below by way of sample[1073]). The Gāthāsaptaśatī of Hāla (a *prākṛt* anthology) mentions Tuesday and Visti (III. 61). The Yājñavalkya-smṛti (I. 296) enumerates the planets in the modern weekday order from Sunday to Saturday and adds Rāhu and Ketu as *grahas* and provides for a sacrifice to nine grahas (I 295–308). The Nāradapurāna (I. 51. 80) also does the same. The Matsya (chap. 93. 7 ff) provides for a more elaborate sacrifice to planets. The Visnudharmasūtra (78 1–7) refers to śrāddhas performed on the seven weekdays from Sunday to Saturday and the benefits derived from such performance (vide H of Dh vol IV. p 373–374 for details). The Purānas contain numerous references to the

1073 नृपाभिषेकं नृपतिप्रयाणं नृपस्य कार्यं नृपदर्शनं च। यज्ञाग्निकार्यं सुवि जिग्रिदुर्के तत्सर्वमादित्यदिने प्रशस्तम्॥ स्थाप्यं च कर्म क्रतुभिश्च यूपो गृहमवेशो गजबन्धनं च। ग्रामेधिवासो नगरे पुरे वा शनैश्चरे सर्वमिदं प्रशस्तम्॥ आथर्वणवेदाङ्ज्योतिष, वारप्रकरण verses 2 and 8.

weekdays. The Nāradīya provides that Monday[1074], Wednesday, Thursday and Friday are auspicious for all rites and actions, while the other weekdays yield the desired result only in cruel or violent actions The Matsya provides that all weekdays except Sunday and Tuesday are auspicious (253 7) The Kūrmapurāna (Uttarārdha 20. 16–17) provides that śrāddhas on weekdays from Sunday to Saturday respectively yield the benefits of health, happiness (or prosperity), success, all desires, desired learning, wealth and long life The Viṣnudharmottara (I. 142. 30–32) has similar provisions. The Brahmapurāna (118. 30) recommends touching an aśvattha tree on Saturday. The Vāmana (14. 49–50) forbids certain actions on weekdays (such as an oil bath on Sunday or Tuesday) The Matsya specifically refers to Sunday (in chap 55 4, 65. 5, 70. 46), to Monday (in 57. 4), to Tuesday (in 72. 27, 193 8) Though the chronology of all the above works is somewhat uncertain, yet it cannot be gainsaid that at least in the first two centuries of the Christian era planets had become objects of worship and the weekdays had been named and their order as it exists today had been settled. The Mahābhārata, in spite of its vast extent and copious descriptions of Dharmaśāstra matters, is entirely silent about the names of weekdays. The cumulative effect of all the evidence adduced above is to render it extremely probable, if not certain, that the worship of the planets and knowledge of the weekdays presided over by them was known to the Indians at least between 100 B C. to 100 A. D One further circumstance is that the names of weekdays in India are purely Sanskrit and there is hardly any reference to a weekday in Sanskrit works under any Greek or other non-Indian name, while in the case of the signs of the zodiac frequent use is made of such foreign words as *kriya* or *leya* Fotheringham (in explanations in Nautical Almanac for 1935 at p 769) states that the mean temporal hour with the length that it had at equinoxes is first found in Hipparchus (140 B. C.), that Ptolemy in the Tables in the Almagest reckoned the day from mean noon of Alexandria and divided the day into *sixty* equal parts each of which was divided sexagesimally and that Ptolemy in his manual Tables divides the whole day into equinoctial hours reckoned from noon in Alexandria and subdivided these sexagesimally. This shows that two systems

1074. द्वन्द्वज्ञजीवशुक्राणां वासरा: पूर्वकर्मसु। फलदास्त्वितरे क्रूरे कर्मण्यभिमतप्रदा:॥ नारदीय I. 56 161. Compare रत्नमाला III 15 quoted above in note 152 नाग्यङ्गमर्के न च भूमिपुत्रे क्षीरं च शुक्रे रविजे च मांसम्। बुधेषु चोपित्व समाचरेत शेषेषु सर्वाणि सदैव कुर्यात्॥ वामनपुराण 14. 49–50

of dividing the day into 60 parts and also into 24 parts were accepted by Ptolemy himself (who wrote only about 150 A D). Therefore, Indians could very well have used very early the 60 divisions system for finding out the order of the weekdays instead of 24 divisions system. The Indians did not calculate their day from noon or night but from the morning. The Āśvamedhika-parva[1075] expressly says that the day comes first and then night.

It is possible to advance several theories about the origin of the seven day week in India. The five planets (Mercury, Venus, Mars, Jupiter and Saturn) were especially regarded by the ancient Babylonians as the powers controlling the destinies of men and therefore five leading Babylonian divinities were identified with the above five planets In course of transmission Babylonian names of divinities assumed Roman forms i. e Ishtar, goddess of love, became Venus, the great god Marduk became Jupiter and so on (vide note 748 above) The five planets together with the Sun and the Moon made a group of seven heavenly bodies In Chaldean temple worship which spread to Syria, it became the custom to sing the praises of each god on a particular day. The name of the god worshipped on a particular day was transferred to the day itself. The days which were sacred to the Sun and the Moon were called Sunday and Monday. Some Norse words like Wednesday (Woden's day) and Thursday (Thor's day) were introduced in England But weekdays in Europe are ultimately derived from the Babylonian gods. It has already been shown (pp 598–600 above) that India and Babylonia had close commercial and other contacts from very ancient times. Vide the recent work on 'Hittites' by O. R. Gurney (in Pelican Books, 1958), pp 104–105 and 124 for technical Sanskrit words in horse breeding Vedic gods and royal names in Sanskrit in the 14th century B C It is possible to argue that seeing the temples of planetary gods in which worship was performed on certain days some Indians got the suggestion of a planetary week, as it has been suggested above that the ideas of the Zodiacal signs were derived from Babylonian boundary stones and similar monuments There were Sun temples in ancient India[1076]

1075. अह. पूर्वं ततो रात्रिर्मासा. शुक्लादय स्मृता । अयनादीनि ऋक्षाणि ऋतवः शिशिरादयः ॥ आश्वमेधिकपर्व 44 2

1076. Vide Gupta Inscriptions, No. 16 at p. 68 (in 146 Gupta era) and No 18 p.79 for temples of the Sun and Br S chap 57, Matsya, chap 257–263, Visnudharmottara III 60–69 and Bhavisya I 131 for temples and images, Br S 57 (verses 46–48) describes the appearance of the Sun image and Visnudharmottara III, 67–69 give directions as to how images of the Sun, the Moon and planets (Mars and others) are to be made.

such as that of Mārtanda in Kashmir, that of Moḍhera in North Gujarat and that of Konārka in Orissa. Even now in some towns and villages there are temples of Saturn and Rāhu (as at Rāhurī in the Ahmednagar District of the Bombay State, which bears that name after Rāhu). Kautilya mentions the several divisions of time from '*truta*' to *yuga* and states that two *nāḍikās* are equal to a *muhūrta* and an *ahorātra* (day and night) has 30 muhūrtas (vide note 681 above). From this it follows that Kautilya knew only the division of the day into 60 nāḍīs and that a nāḍī was the same as ghaṭī. The Āryabhaṭīya gives the following table: 60 *vināḍīs* are equal to a *nāḍī*, 60 nāḍīs are equal to a day (Kālakriyāpāda, verse 1) Another way of citing the measures of time is: Time taken for repeating ten long letters is *prāṇa*, 6 prāṇas are equal to pala, 60 palas are equal to a daṇḍa, ghaṭī or nāḍī (Sūryasiddhānta I. 11, Jyotiṣ-tattva p. 562). Pāṇini derives the word 'nāḍīndhama'[1077] from nāḍī Nāḍī is a very ancient word[1078] It occurs in the Ṛgveda and appears to mean some cylindrical instrument like a flute.[1079] It appears that the word nāḍī came to mean a period of time when a conch or a trumpet or similar instrument was blown to announce the lapse of one nāḍī (60th part of the day) as there were no clocks then. Hence division into 60 nāḍīs or ghaṭīs (both words being mentioned by Patañjali who is generally held to have flourished about 150 B. C.) was the ancient mode of dividing the day in India and if any Sanskrit work (like the Sūryasiddhānta, chap 12. 78-79) refers to 24 parts of the day, that work may be regarded as one of later times, but the whole system of time measuring by weekdays in India cannot be said to have been borrowed from a foreign source. Even Patañjali refers to the words nāḍī and ghaṭī as long in use before his time Therefore, the division of the day

---

1077. नाडीमुष्टयोश्च। पा III 2 30; on the previous sūtra there are two vārtikas and the महाभाष्य states 'अल्पहृस्वमिदमुच्यते। नासिका-नाडी-मुष्टि-घटी-खारीभिति वक्तव्यम्। नासिका। नासिकन्धम. नासिकन्धयः। नाडी। नाडिन्धमः नाडिन्धयः।" घटी। घटिन्धमः घटिन्धयः।'

1078. The word 'nāḍī' and 'nāḍikā' have several meanings, viz. flute, tube or pipe, vein or artery, one half muhūrta. 'Nāḍīndhama' means a goldsmith (because he makes the fire flame up by blowing on it from a tube) From Kāṭhakasaṃhitā 23. 4 (Saiśā vanaspatiṣu vāg-vadati yā nāḍyāṃ yā tūṇave) it appears that nāḍī was a musical instrument that produced sounds (a trumpet or the like).

1079 हृषमस्य धम्यते नाडीरयं गीर्भिः परिष्कृतः ॥ ऋ X. 135 7, the meaning is 'here is blown the *nāḍī* for him (Yama) who is decked with songs of praise.'

into nāḍīs or ghaṭīs must be held to be long anterior to 200 B. C. On the whole it would not be far from the truth to say that weekdays were not borrowed by ancient India *en bloc* from elsewhere It is arguable that usages in Babylon and Syria might have suggested the arrangement of days into weeks, but there is hardly any cogent evidence beyond similarity and prejudice to show that the origin of the nomenclature and the method of arriving at the order of the weekdays were not indigenous Vide Cunningham in I A. vol 14 pp. 1 ff. in which he shows by diagrams how the calculation by Indian ghaṭīs results in the same order of weekdays as the European division. Sham Shastri in Annals of Bhandarkar Oriental Research Institute, vol IV pp 1–31 after mentioning some rather hazy and obscure passages from the Vedic literature arrives at the conclusion that India was not indebted to the Greeks or Babylonians for week days or for the discovery of planets. It may be mentioned that Alberuni (tr by Sachau, vol. I. chap XIX pp. 214–215) illustrates how week-days received names from planets, narrates (p. 215) that it was the custom with Hindus to enumerate the planets in the order of the weekdays and that the Hindus persisted in using these in their astronomical books and declined to use any other order or method even if it was more correct.

CHAPTER XIX

Kalpa, Manvantara, Mahāyuga, Yuga

After dealing with time measures from *yuga* (of five years) down to weekdays and the day one must now briefly deal with the other measures of time such as Yuga, Mahāyuga, Manvantara and Kalpa The word Kalpa has its germ in the Ṛgveda[1080] X. 190 3, where it is said that the Creator created the Sun and the Moon, the heaven, the earth and mid-region as before ' The earliest datable reference to Kalpa is found in Aśoka's edicts e g the 4th Rock edict[1081] at Girnar and Kalsi have ' āva savata kapī ' (yāvat samvartakalpam) and ' āva kapam ' in the 5th Rock Edict at Shahabazgarhi and Mansera This establishes that the theories about the vast extent of Kalpa had been promulgated in India long before the third century B C. The Buddhists also took over the theory of Kalpas as is clear from the Mahāparinibbānasutta III. 53 ' Vouchsafe, Lord, to remain during the Kalpa Live on, O Blessed One, through the Kalpa for the good and happiness of the great multitudes &c. '.

The beliefs that in the dim past there was an ideally perfect society followed by a gradual degeneracy and decline in standards of morals, health and length of life and that the cycle of decline would be followed in the far distant future by a golden age of perfection in morals &c. have been dealt with in H. of Dh. vol. III pp. 885 ff The word '*yuga*' has been shown there as having probably several meanings, viz a short period of time (Rg III. 26 3), a cycle of five years and also a long period and a period of thousands of years Prof. Mankad in Poona Orientalist (vol. VI. pp 211–212) assigns as many as ten meanings to the

---

1080. सूर्याचन्द्रमसौ धाता यथापूर्वमकल्पयत् । दिवं च पृथिवीं चान्तरिक्षमथो स्व ॥ ऋ X. 190 3

1081. Vide Inscriptions of Aśoka In C I. I vol I pp. 6, 30 (text of 4th edict), and pp 55, 74 (text of 5th edict) In the Vanaparva 188 69 it is said that fire called Samvartaka will assail the world while the Brahmapurāṇa (232, 39) says that terrible clouds called ' Samvartaka ' will rise, when final dissolution (*pralaya*) will follow Therefore, ' āva samvata kapī ' means ' up to the end of Kalpa when destructive fire called samvartaka will arise ' (or when terrible clouds called samvartaka will arise). It may be noted that the Amara-koṣa regards संवर्त, प्रलय, कल्प, क्षय and कल्पान्त as synonyms.

word One cannot agree with him in all that he says. For example, he appears to be wrong when he says that in Śākuntala IV (yugāntaram ārūdhaḥ savitā) yuga means ¼th of a day; yuga does not, so far as I know, mean ¼th anywhere, it means 'four' in some cases In Śākuntala 'yugāntara &c' should be taken to mean that 'the sun has come up in the sky as much as the length of a yoke (from the eastern horizon)' That is the sense of 'yuga' in Ṛg X 60 8, X 101 3 and 4. In the Mahābhārata, in Manu and the Purānas the theory of *yugas*, *manvantaras* and *kalpas* has been elaborated at great length The four yugas are named Kṛta, Tretā, Dvāpara and Tiṣya or Kali and concern only Bhārata-varṣa [1081a] But it has been shown (at pp 886-890 of the H. of Dh. vol III) that originally these were the names of certain throws of dice in gambling and that from the 4th century B.C. (if not earlier) they came to be the designations of the ages of man. The early Gupta inscriptions refer to Kṛtayuga as a cycle of great virtues (as in the Bilsad stone pillar Inscription of Kumāragupta in Gupta Samvat 96 in 'Gupta Inscriptions' p 44, the Chammak copperplate of Vākāṭaka Pravarasena II in 'Gupta Inscriptions' p 237, Pattan plates of Pravarasena II. in E. I. 23 p. 81. The theory of Yugas, Manvantaras and Kalpas is elaborated among ancient works in the Mahābhārata (Vanaparva, chapters 149, 188 and Śāntiparva, chap 69 and 231–232), Manu I. 61–74, 79–86, Viṣnudharmasūtra chap. 20. 1–21, Viṣnupurāna 1 3, 6 3, Brahmapurāna 5. 229–232, Matsya 142–145, Vāyu chap 21, 22, 57, 58, 100, Kūrma I. chap 51 and 53, Brahmānda II. 6 and 31–36, III 1, Mārkaṇḍeya 58 64, 66–70, 71–97 (has the

---

1081a. चत्वारि भारते वर्षे युगानि मुनयो विदुः । कृत त्रेता द्वापर च तिष्यं चेति चतुर्युगम् ॥ वायु० 24 1, [45] 137 (reads ऋषयो for मुनयो and कलिश्चेति चतुष्टयम्), 57. 22, मत्स्य 142 17–18 'चत्वारि भारते वर्षे युगानि ऋषयोऽब्रवन्। कृतं त्रेता द्वापरं च कलिश्चैवं चतुर्युगम्॥ पूर्व कृतयुगं नाम ततस्त्रेताभिधीयते। द्वापरं च कलिश्चैव युगानि परिकल्पयेत्॥' Vide ब्रह्म 27. 64. Tradition gave slightly varying information about the end of the Dvāpara age It is said that the war between the Kaurava and Pāṇḍava hosts was fought in the period of sandhyā between Dvāpara and Kali (Ādi 2,13) Similarly, शल्य 60 25 (प्राप्तं कलियुगं विद्धि), वनपर्व 149 38 say that Kaliyuga was very near when the Bhārata war was about to be fought (एतत्कलियुगं नामाचिराद्यत्प्रवर्तते). On the other hand, many of the Purāṇas say that Kaliyuga began the very day Kṛṣṇa finished his avatāra and went to heaven; वायु 99 428–29, ब्रह्माण्ड III 74 241, मत्स्य 273 49–50, विष्णु IV. 24 110, भागवत XII 2 33, ब्रह्म 212 8 has the same idea in different words. Vide note 993 for quotations from some of these Purāṇas The Mausalaparva 1 13 and 2 20 state that Kṛṣṇa passed away 36 years after the Bhārata war In any case द्वापर came to an end immediately or a few years after the Bhārata war.

longest account of Manvantaras), and by astronomical writers and works such as Āryabhata, Sūryasiddhānta, Brahmagupta, Siddhāntaśiromani. None of these works enables us to furnish a satisfactory explanation about the rise of this system of Kalpas, Manvantaras and Yugas Pargiter (in AIHT p 175) thinks that the division into four ages had a historical basis. That may or may not be so. But what historical explanation can be offered about manvantaras and kalpas is not stated anywhere. The theory of yugas concerned only Bhāratavarsa as stated in several Purānas. All these works contain the same general features but there are many divergences in details As the Manusmrti contains one of the oldest accounts, a summary of its remarks will be first set out First, seven Manus are enumerated viz Svāyambhuva, Svārocisa, Uttama, Tāmasa, Raivata, Cāksusa and Vaivasvata. Then divisions of time from *nimeṣa* are specified (18 nimesa = Kāsthā, 30 Kāsthās = Kalā, 30 Kalās = Muhūrta, 30 Muhūrtas = ahorātra); it is then said that the human month is the day and night of *pitrs*, the human year is divine *ahorātra*. Krta-yuga extends over 4000[1082] years, *sandhyā* (twilight) before it is 400 years, *sandhyāmśa* after it is 400 years. The three other yugas Tretā, Dvāpara and Kali have respectively 3000, 2000, 1000 years and sandhyās and sandhyāmśas together of respectively 600, 400 and 200 years. The four yugas thus come to 12000 years (4800 plus 3600 plus 2400 plus 1200); this is called the yuga of gods (i e this is the *divya* measure) and 1000 of these four come to one day of Brahmā and the same is the extent of the night of Brahmā Seventy-one yugas of 12000 divine years each constitute a manvantara and Manu (I. 80) winds up by saying that manvantaras are numberless[1083] and so are creations and dissolutions It should

---

1082 Manu I 65-67 are the same as Śāntiparva 231 15-17, Manu I. 65-66 are the same as Matsya 142. 5-6 (with slight variations), Manu I. 69-70 are the same as Śānti 231 20-21, Vāyu 57. 23-24 and Matsya 142. 19-20. Manu I. 69 is same as Vanaparva 188 22 23

1083 It was said by Manu (I 81-82) that Krta was an age in which Dharma was four-footed and perfect, that in the other ages dharma declined successively by one foot, that theft, falsehood and fraud increase in proportion Then Manu further avers (I 83-86) that the length of human life in the four ages is respectively 400, 300, 200 and 100 years, that the set of duties differ in the four ages Dharma is said to be four-footed because Manu VIII 16 identifies dharma with vrsa (bull). Both Plato and Aristotle believed that every art and science had many times developed to its apogee and then deteriorated.

be noticed that the word Kalpa does not occur in this long enumeration. But in other works than the Manusmrti e g Visnupurāna (VI. 3. 11–12) fourteen Manvantaras are said to constitute a Kalpa, which is a day of Brahmā. As a day of the gods is equal to a human year, the 12000 years that constitute a divine *caturyuga* are equal to 4320000 human years[1083a] (12000 × 360) i. e. this is the human (mānusa) measure of time.

When and how these huge numbers of years for the yugas were suggested remains somewhat enigmatic. It appears that as early as the Śatapatha-brāhmana people had become familiar with huge figures The Śatapatha[1084] says that there are 10800 muhūrtas in a year (in one ahorātra 30 × 360), that Prajāpati arranged the Ṛgveda in such a way that the number of syllables it contains is equal to 12000 Brhatīs (each Brhatī having 36 syllables) i e. 432000 syllables and it is further stated that the Ṛgveda also contains 10800 panktis (each pankti having 40 syllables i e the syllables are 10800 × 40 = 432000. Prajāpati is said to have arranged the other two Vedas also and the three Vedas amounted to ten thousand eight hundred eighties (that is 80 × 10800 = 864000 syllables), that *muhūrta* by *muhūrta* he gained eighty syllables (as there are 10800 *muhūrtas* in a sacrificial year of 360 days). Dr. Jean Filliozat, Professor at the College de France, Paris, puts forward the theory in a recent article (in the Bulletin

---

1083 a. Many ancient authors in almost all countries believed that there were different ages with differing levels of virtue and that they themselves lived in the worst age. Vide Hesiod's 'Works and days' pp. 11–17 (Loeb Classical Library) where Hesiod's own age was said to be the worst of five ages. The Babylonians made out 2160000 years for the duration of the world and imagined there were three ages, viz golden, silver and copper. Vide pp. 33–34 of Maclean's 'Babylonian astrology in relation to the Old Testament' Sarton also thinks that the Sumerians originated a golden age of man and speak of huge numbers of years, viz 12,960,000 (pp 69 and 118 of 'a History of Science') Berossus gave a list of ten ante-deluvian kings reigning in all for 432000 years (see Cambridge Ancient History, 1923, vol. I page 150) Vide Heath's 'Greek astronomy' (Introduction, p. XIV) re Egyptians' claim for possessing records of observations of stars for 630,000 years and a similar claim of Babylonians for 1,444,000 years.

1084 स ऐक्षत प्रजापति । त्रय्यां वाव विद्यायां सर्वाणि भूतानि हन्त त्रयीमेव विद्यामात्मानमभिसंस्करवा इति ॥ स ऋचो व्यौहत् । द्वादश बृहतीसहस्राण्येतावत्यो हचौ या· प्रजापतिसृष्टास्त्रिंशत्तमे व्यूहे पंक्तिष्वतिष्ठन्त । ता यत्रिंशत्तमे व्यूहेऽतिष्ठन्त तस्मात्त्रिंशन्मासस्य रात्रयोऽथ यत्पंक्तिषु तस्मात्पंक्त प्रजापतिस्ता अष्टाशत शतानि पङ्क्त्योऽभवन्। अथेतरौ वेदौ व्यौहत् । ···ते सर्वे त्रयो वेदा । दश च सहस्राण्यष्टौ च शतान्यशीतीनामभवत् स मुहूर्तेन मुहूर्तेनाशीतिमाप्नोत् । शतपथ X 4 2 22, 23, 25.

of L'Ecole Francaise D'Extreme-Orient, Tome XLIV, Fas. 2, pp. 538–546) that the number of years in Kaliyuga (432000) was suggested by these figures in the Śatapatha, that the high figures in the ancient Indian literature are scientific and not astrological, and that in the opinion of Heraclitus 10800 ordinary human years were equal to one 'great year', that Berossus held that a great astronomical period was of 432000 years and that as the Śatapatha-brāhmana is far more ancient than both Heraclitus and Berossus, the borrowing, if it exists, must have been by the Greeks from India Vide 'Ancient relations between Indian and foreign astronomical systems' by Dr J Filliozat in JOR, Madras, vol. XXV (for 1957) pp 1–8; also Prof. Zinner (in 'Stars above us' p 59) for theories about the age of the world held by Plato and Berossus. One day of Brahmā is equal to a Kalpa i e 4320000 × 1000 i e 432,000,000,0 In order[1085] to find out the human years of the one hundred years of Brahmā's life we shall have to multiply 432,000,0000 by 2, then by 360 and then by 100. That is, the day and night of Brahmā come to 8640000000 human years; the year of Brahmā would then be equal to 3110400000000 human years (taking 360 days as a year); one hundred years of Brahmā thus come to 311040000000000 years Alberuni (Sachau, vol. I p 332) also mentions this colossal figure about the life of Brahmā Some said that the extent of Brahmā's life was 108 years Brahmā is said to have already lived 50 years and it is the second half of his life that is running and at present it is the Vārāha[1086] Kalpa and Vaivasvata-manvantara[1087] (7th) that

---

1085 A मन्वन्तर would mean 'अन्यः मनु ' or मनूनामन्तरमवकाशोऽधिर्वा as क्षीरस्वामी explains If 1000 महायुगs are divided by 14, each मन्वन्तर is equal to 71 महायुगs plus a little more (i e six mahāyugas divided by 14). Therefore, the विष्णुपुराण says ' चतुर्युगानां सख्याता साधिका ह्येकसप्ततिः । मन्वन्तर मनोः काल. सुरादीना च सत्तम ॥' I. 3. 18, vide also ब्रह्माण्ड II 6 19 and II 35 173 चतुर्युग-सहस्रान्त कल्पमाहुर्मनीषिण । कूर्म II 45 49, चतुर्युगसहस्रं तु कल्पते ब्रह्मणो दिनम् ॥ स कल्प-स्तत्र मनवश्चतुर्दश महाद्युते । तदन्ते चैव नैत्रेय ब्राह्मो नैमित्तिको लय ॥ विष्णुपु. VI 3 11–12

1086 एकमस्य व्यतीतं तु परार्धं ब्रह्मणोऽनघ । तस्यान्तेऽभून्महाकल्पः पाद्म इत्यभिविश्रुत ॥ द्वितीयस्य परार्धस्य वर्तमानस्य वै द्विज । वाराह इति कल्पोयं प्रथम परिकल्पित ॥ विष्णुपुराण I 3 27–28.

1087. The word 'मनु' frequently occurs in the Rgveda and other saṃhitās Manu is often spoken of as the father of humanity and of the sages and as laying down the proper path for mankind. Vide : यानि मनुरवृणीता पिता नस्ता शं च योश्च मयस्कृधि ॥ ऋ II. 33. 13; मा नः पथः पित्र्यान्मानवादधि दूर नैष्ट परावतः ॥ ऋ VIII. 30. 3, वि यो रत्ना भजति मानवेभ्य. श्रेष्ठ नो अद्य सवितर्वरेण्य यथा दधत् ॥

(*Continued on next page*)

are going on. The past six Manus are Svāyambhuva, Svārocisa, Uttama, Tāmasa, Raivata, Cāksusa and the present is Vaivasvata, the 7th Manu (Brahma 5 4–5, Kūrma I. 51. 4–5, Visnu III 1. 6–7) The remaining seven Manus are differently named in several Purānas e. g. Visnu (III 2 14 ff) and Narasimhapurāna 24 17–35 mention the future Manus as Sāvarni, Daksa Sāvarni, Brahmasāvarni, Dharmasāvarnika, Rudra-sāvarni, Ruci and Bhauma; while Brahma (5. 5–6) mentions four of the future seven as Sāvarni, Raibhya, Raucya, Merusāvarni Kūrma (I. 53 30–31) names the future four in the same way as Visnu (only substituting Savarna for Sāvarni wherever it occurs and the last two as Raucya and Bhautya) All the fourteen Manus are enumerated in Nāradapurāna I 40 20–23 Alberuni (tr by Sachau, vol I chap. XLIV p 387) gives the names of Manvantaras according to the Visnudharmottara, Visnupurāna and other sources Sāvarnya[1088] Manu as a great benefactor and leader of some territory occurs in Rg X 62 11 It is said that each Manvantara had a separate set of sages, sons of Manu, gods, kings, smrtis, Indra and guardians for the proper regulation of dharma and for the protection of the people (Brahma 5 39, Visnupurāna III chapters 1–2) In the Visnupurāna it is said that some gods remain for four yugas, some for a manvantara and some stay for a kalpa[1088a] The Visnudharmasūtra (chap. XX 1–15) has the same account of Manvantaras and Kalpas as Manu's but it adds one detail viz that the whole age of Brahmā is equal to a day of Purusa (Visnu) and the night of Purusa is also as long. It is remarkable that the same view is attributed by Alberuni (Sachau vol I. p. 332) to the Pulisasiddhānta. It is not known whether those European scholars who regard Pulisa to be Paulus Alexandrinus have shown that this detail occurs in the work of the Greek Astrologer Paulus. In the Vanaparva (188 22–29) the same account as in Manu occurs

ऋ IV 54 1, यद्वै किं च मनुरवदत्तद्भेषजम् । तै सं II 2 10 2, काठकसं. XI 5. In the शतपथब्राह्मण (I 8 1 1) occurs the famous story of Manu and the deluge Another story is that of Manu and his son Nābhānedistha in तै. सं III. 1 9. 4–6 and ऐ ब्रा 22 9. Vide H. of Dh vol III. p 543.

1088 सहस्रदा ग्रामणीर्मा रिषन्मनु: सूर्येणास्य यतमानेषु दक्षिणा । सावर्णेदेवा म तिरन्त्वायुर्यस्मिञ्जरामन्ता असनाम वाजम् ॥ ऋ. X 62 11. In ऋ. X. 62 9 the gifts made by सावर्णि are mentioned. The भागवतपुराण (XII 7. 15) says 'मन्वन्तरं मनुर्देवा मनुपुत्रा: सुरेश्वर । ऋषयोंशावतारश्च हरे: षड्विधमुच्यते ॥'

1088 a केचिद्युगचतुर्युगं यावत्केचिन्मन्वन्तरं सुरा: । तिष्ठन्ति भवतो दृष्टा मया ये कल्पसंस्थिति. ॥ विष्णुपु. I. 12. 93

except this that 12000 years are called *Yuga*[1089] simply and not caturyuga (as in Manu I 71). The Mārkandeya has a long story about Svārocisa in chapters 58–65, devotes to Uttama chap 66–70, chapter 71 to Tāmasa, chap. 72 to Raivata, chap. 73 to Cāksusa, chap. 74–76 to Vaivasvata, chap 77 to Sāvarni, chap 78–90 to Devī, chap 91–95 to Raucya or Ruci, chap 96–97 to Bhautya The word 'Vaivasvata' (son of Vivasvat, the Sun) is applied to Yama in several passages of the Rgveda (X 14 1, X. 58. 1, X 60 10, X 164 2) The Anukramanī, however, ascribes Rg. VIII. 27–31 to Vaivasvata Manu as the *rsi* and in one of the Vālakhilya hymns (Rg X 52 1) occurs the following verse 'O Indra! just as you drank the soma extracted in (the sacrifice of) Manu Vivasvat, just as you frequently accept the hymn of praise in (sacrifice of) Trita, so may you simultaneously delight in (the soma and praise) of Ayu'[1090] It may be noted that the Manusmrti names only the seven Manus (I. 61–63) and states that each Manu during his own time (which extended over thousands of years) created the movable and immovable world and protected it, that Manvantaras are numberless (Manusmrti I 80) and that the Great God (Parameshin) brought about the creation and destruction of the world during the Manvantaras. Some of the Purānas such as Matsya (9. 37–39, 142. 40, 144. 97–98), Vāyu (59. 34), Agni (150. 21), Visnu (I. 3 and VI. 3) state[1090a] that Manu and the seven sages in each Manvantara (i. e. where there is a change of Manu) who are the sistas that then exist are devoted to dharma, being ordered by Brahmā for the purpose of continuing the worlds, declare the truth and promulgate the Vedas. Some modern

1089 सहस्रयुगपर्यन्तमहर्यद्ब्रह्मणो विदुः । रात्रिं युगसहस्रान्तां तेऽहोरात्रविदो जनाः ॥ शान्ति 23. 31 and गीता VIII 17 The word युग is often used to denote the 12000 years of divine measure as in वनपर्व 188 38 'एषा द्वादशसाहस्री युगाख्या परिकीर्तिता ॥'.

1090 यथा मनौ विवस्वति सोमं शक्रापिब. सुतम्। यथा त्रिते छन्द इन्द्र जुजोपस्यायौ मादयसे सचा ॥ ऋ. VIII 52 1 (4th वालखिल्यसूक्त)

1090 a. अतीतानागताश्चैते मनवः परिकीर्तिता । ' स्वे स्वेऽन्तरे सर्वमिदमुत्पाद्य सचराचरम्। कल्पक्षये विनिवृत्ते भुज्यन्ते ब्रह्मणा सह। एते युगसहस्रान्ते विनश्यन्ति पुनः पुनः। मत्स्य 9 37–39; मन्वन्तरेषु ये शिष्टा इह तिष्ठन्ति धार्मिकाः। मह्य ससर्पयश्चैव लोकसन्तानकारणात्। धर्मार्थं ये च शिष्टा वै याथातथ्य प्रचक्षते। वायु 59 34; प्रवर्तयन्ति वेदाश्च मुनि ससर्पयो दिव.। अग्नि 150 21, the मत्स्यपुराण (142 29–32) calculates the numbers of years in a मन्वन्तर as follows 'एषा चतुर्युगाख्या तु साधिका त्वेकसप्तति । कृतत्रेतादियुक्ता सा मनोरन्तरमुच्यते ॥ मन्वन्तरस्य संख्या तु मानुषेण निबोधत। एकत्रिंशत्तथा कोट्य संख्याता संख्यया द्विजै ॥ तथा शतसहस्राणि दश चान्यानि भागशः। सहस्राणि तु द्वात्रिंशच्छतान्यष्टाधिकानि च ॥ अशीतिश्चैव वर्षाणि मासाश्चैवाधिकास्तु षट्। मन्वन्तरस्य संख्यैषा मानुषेण प्रकीर्तिता ॥; vide ब्रह्माण्ड (II. 35 164–165) which differs slightly from this.

writers (like Dr. Daftari) think[1090b] that in ancient times there was an Indian institution of public functionaries called Manu and the Saptarsis, whose function was to legislate and promulgate the Vedas. With great respect to the erudite scholar, I disagree with him. The extant Purāna passages are less than 2000 years old, while the present Vaivasvata Manvantara started several millions of years ago and even Kaliyuga in which we are deemed to live started in 3102 B C. Besides, there is a dissolution of the world at each day of Brahmā, if one is to rely on the Paurānik accounts. How could a tradition of the several Manus survive such pralaya ? A rationalistic interpretation requires that all this that is stated in the Purānas is mere conjecture and imagination and that one cannot safely build theories about the governance of society in ancient times on the accounts contained in Purānas. The Manusmrti (II. 19) appears to assign the function of the regulation of the conduct of all men in the world to the learned brāhmanas born in Brahmarsideśa (i e. Kuruksetra, the countries of Matsya, Pañcāla and Śūrasena or Mathurā) at least after his own code was promulgated

Pessimistic and dismal accounts of what will happen in Kaliyuga (which extends according to the Purānas over 432000 years and of which only about 5057 years have gone by this time in 1956) are set forth in the Vanaparva, chap 188, 190, Śāntiparva 69. 80-97, the Harivamśa (Bhavisyaparva, chap. 3-5 ff), Brahmapurāna chap 229-230, Vāyu chap. 58 and 99 verses 391-428, Matsya 144 32-47, Kūrma I. 30, Visnupurāna VI 1, Bhāgavata XII. 1-2, Brahmānḍa II. 31 and in several other purānas. The description in Vanaparva 188 is summarised in H. of Dh. vol. III pp. 893-895. The names of 33 Kalpas are given in Vāyu, chap 21-23 and Hemādri on Kāla (pp. 670-671) sets out from Nāgarakhanda the names of 33 Kalpas and the tithis on which they start; Matsya 290 enumerates thirty names of Kalpas; the Brahmānda II. 31. 119 states that there are 35 Kalpas and neither more nor less.

In the purānas *pralaya* is said to be of four sorts,[1091] viz. *nitya* (the every day deaths of those that are born), *naimittika*

1090 b Vide 'The rationalistic and realistic interpretation of the Upanishads' (pp 2 and 3) published at Nagpur in 1958.

1091 चतुर्विधस्तु प्रलयो नित्यो यः प्राणिनां लय । सदा विनाशो जातानां ब्राह्मो नैमित्तिको लयः ॥ चतुर्युगसहस्रान्ते प्राकृत प्रकृतौ लय । लय आत्यन्तिको ज्ञानादात्मन··

(*Continued on next page*)

(when a day of Brahmā ends, then there is a dissolution of the world), prākrtika (when everything dissolves itself into prakrti, primordial substance) and ātyantika pralaya is *Moksa* (liberation of the soul due to correct knowledge of Reality and absorption into the Supreme Spirit). Harrowing descriptions of the naimittika and prākrtika pralayas are given in several purāṇas. A lengthy description of the naimittika dissolution is contained in Kūrma II. 45. 11–59 of which a brief summary is given here. When the one thousand Caturyugas end, there is the absence of rain for a hundred years; the result is that living beings perish and are reduced to earth; the sun's rays become unbearable, and even the ocean is dried up; the earth is burnt by the fierce heat of the sun together with its mountains, forests and continents. As the sun's rays fall burning up everything, the whole world presents the appearance of one huge fire. Fire burns everything whether mobile or immoveable. The animals in the big seas come out and are reduced to ashes. Then the samvartaka fire growing by the force of the wind burns the whole earth and its flames rise up to a height of thousands of *yojanas* and the flames burn up *gandharvas*, goblins, *yaksas*, serpents and rāksasas and not only the earth but the worlds called 'bhuvah' and 'mahah' are burnt; then huge samvartaka clouds resembling herds of elephants, lit up by lightning, rise in the sky, some looking like blue lotuses, some yellowish, some having the colour of smoke, some like sealing wax and fill the whole sky and then extinguish the fires by sending down heavy showers. When the fires are extinguished, the clouds of destruction cover the whole world with floods, mountains are concealed and the earth is plunged in waters and all becomes one ocean of water and then god Brahmā resorts to *Yogic* sleep. Vanaparva (chap. 272 32–48) also contains a brief description of *naimittika pralaya*.

The Kūrma I. 46 and Visnu VI. 4. 12–49 furnish a description of the prākrtika *pralaya* which takes Sānkhya terminology for granted,[1092] and is briefly as follows. When all the worlds

परमात्मनि ॥ अग्नि 368. 1–2, नैमित्तिक॰ प्राकृतिकस्तथैवात्यन्तिको द्विज। नित्यश्च सर्वभूतानां मलपोष चतुर्विधः॥ ब्राह्मो नैमित्तिकस्तत्र शेतेऽप जगतीपति॰। प्रयाति प्राकृत चैव ब्रह्माण्डं प्रकृतौ लयम्॥ ज्ञानादात्यन्तिक॰ प्रोक्तो योगिन॰ परमात्मनि। नित्य सदैव भूतानां यो विनाशो दिवानिशम्। विष्णु॰ I 7. 41–43 and VI 3. 2 ff, where प्राकृतप्रलय is said to be द्विपरार्धक. vide कूर्म II. 45. 1–10 for similar explanations.

1092. For the सांख्यतत्त्व, vide सांख्यकारिका 3 'मूलप्रकृतिरविकृतिर्महदाद्या प्रकृतिविकृतयः सप्त। षोडशकश्च विकारो न प्रकृतिर्न विकृति पुरुष॥'. महत्, अहङ्कार and

(*Continued on next page*)

including all the nether regions are destroyed by absence of rains and all effects from *mahat* onwards are destroyed, waters first absorb the *gandha* (the special quality of the earth) and when *gandha-tanmātra* is destroyed, the earth is reduced to water; the special quality of waters, viz. *rasa-tanmātra* is destroyed and nothing but fire remains and the whole world is filled with flames, then Vāyu absorbs fire and *rūpa-tanmātra* vanishes; Vāyu shakes all the ten quarters; ākāśa absorbs the *sparśa-guna* of Vāyu and only ākāśa remains as a void and *śabda-tanmātra* is gone and in this way the seven prakṛtis including *mahat* and *ahaṅkāra* are absorbed in order; even Prakṛti and Puruṣa are dissolved in Paramātman (named Viṣnu). The day of Viṣnu is said to be two Parārdhas of human years.

Some works like the Harivaṁśa (Bhaviṣyaparva chap. 10. 12-68) provide that at the end of Kalpa the sage Mārkaṇḍeya alone remains and lies at the time of the pralaya (or kalpa) in the side of Lord Viṣnu and then comes out of His mouth. The Brahmapurāna (52. 1*c*–19 and 53 55) says that Mārkaṇḍeya sees a *vaṭa* tree at the end of Kalpa and a jewelled bed on which he sees a boy lying down (i. e. Viṣnu himself) and then he enters the side of that boy and later comes out Vide also Matsya 167 (14–66) for the same story in almost the same words. The Bhagavadgītā (VIII 18–19) speaks of the recurrent absorption of all beings at the advent of the night of Brahmā and reappearance of beings when the day of Brahmā starts.

The theory of yugas, manvantaras and kalpas with their fabulous numbers of years and harrowing descriptions of pralaya, appears unreal, bizarre and called up by sheer fancy. But underlying it there is the idea of the timelessness of the universe, though from time to time it evolves, gradually declines and perishes, only to reappear in perfection after a cosmic night. There is also the hankering after Reality and pursuit of different ideals. It enshrines the ideas that humanity embarks on a certain goal, pursues it with great efforts and, after achieving some success, gives up that goal and the way that was thought to lead to it and pursues some other goal for aeons in the hope that at some distant date it will be able to evolve and

(*Continued from last page*)

पञ्चतन्मात्रs are of a double nature i e. both प्रकृति and विकृति The sixteen (which are merely products and not causes) are five कर्मेन्द्रियs, five ज्ञानेन्द्रियs, five mahābhūtas (पृथिव्यसेजोवाय्वाकाश) and मनः.

construct a perfect society. These ideas are at the bottom of what Manu[1093] and others say 'Tapas was the highest goal (deemed to yield great results) in Kṛtayuga, knowledge (of the self) was the highest in Tretā, yajña (sacrifices to God) in Dvāpara, charity alone in Kali'. This further implies that there are different impelling motives in different ages and modern men should not assess the actions and ideals of past ages by the same yardstick that is applied to contemporary actions and ideals. It is implicit in the words of Manu (XI. 301) that the four ages are not water-tight specific periods of time, but that the Ruler or Government can produce conditions of Kṛta age in what is popularly called Kali by appropriate conduct or measures and Medhātithi expressly says so.[1093a] Prof. Mankad has a novel theory in a paper on the manvantaras in I. H Q. vol XVIII, pp. 208-230, where he states that the Caturyuga formula took 40 years for a ruling unit and not for one king's regnal period and that the manvantara was the regular method of calculating regnal periods of different kings in a dynasty (p. 227). Hardly any scholar has accepted this theory and for reasons of space and relevance, it is not possible to discuss it here.

In the details about the theory of yugas, manvantaras and kalpas there are some divergences. A few may be pointed out Āryabhaṭa appears to hold that the extent of each of the four yugas was the same and not in the traditional proportion of 4, 3, 2, 1, when he says that he was twenty-three years old when three *yugapādas* and 3600 years had elapsed (vide Kālakriyāpāda 10 quoted in note 995 above) Brahmagupta (I. 9) says[1094] that, though Āryabhaṭa declared that the four pādas of yugas, viz. Kṛta

1093 तपः परं कृतयुगे त्रेतायां ज्ञानमुच्यते। द्वापरे यज्ञमेवाहुर्दानमेकं कलौ युगे॥ मनु I. 86 = शान्ति 23. 28 = वायुपुराण 8. 65-66, पराशरस्मृति I 23 वायु reads ध्यानं परं कृतयुगे and दानं कलियुगे वरम् The ब्रह्माण्ड (II. 7 59) says 'ज्ञानं परं कृतयुगे त्रेतायां यज्ञ उच्यते। प्रवृत्त द्वापरे युद्धं स्तेयमेव कलौ युगे॥.'

1093 a. 'कृतं त्रेता युगं चैव द्वापरं कलिरेव च। राज्ञो वृत्तानि सर्वाणि राजा हि युगमुच्यते॥' मनु XI 301, 'न चैव मन्तव्यं राज्ञा कलिर्नाम कालविशेष इतिहासमसिद्ध. कथमह स्यामीति यतो राज्ञो वृत्तानि युगादि' मेधातिथि

1094. युगपादाचार्यभटश्चत्वारि समानि कृतयुगादीनि। यदभिहितवान् तेषा स्मृत्युक्तसमाननेकमपि॥ ब्राह्मस्फुटसि I 9 दिव्य वर्षसटस्र ग्रहसामान्यं द्विपक्कगुणम्। अष्टोत्तर सहस्रं ब्राह्मो दिवसो ग्रहयुगानाम्॥ आर्यभटीय, कालक्रियापाद 8 This means '12000 divine years make a yuga of all the *planets*, 1008 times of planetary yugas are equal to a day of Brahmā.' मनुसन्धि युगनिश्चत्यार्यभटस्तन्मद्धर्यतः इखयुग.। कल्पश्चतुर्युगाना सहस्रमाद्यिकं तस्य॥ ब्राह्मस्फुटसिद्धान्त I. 12 The words 'तन्मद्ध. इखयुग.' pointedly refer to the Gītikāpāda verse 9 above in note 1071.

and the others, were equal, not one of them was equal to what the smrtis declare them to be There is another discrepancy also Āryabhata in his Daśagītikā verse 3 states that Manu is a period of 72 yugas, while all the smrtis and purānas declare that a manvantara is equal to 71 yugas. Āryabhata appears to have held that the day of Brahmā is equal to 1008 *catur yugas* and Brahmagupta (I 12) refers to this view. The celebrated scientific astronomer Bhāskarācārya[1095] (born in śaka 1036, 1114 A D) impatiently says 'some say that half of the life of Brahmā (i. e 50 years) has passed away, while others say that half plus eight years has passed away Whatever the true tradition may be, it is of no use, since planetary positions are to be established from the days that have passed in the current day of Brahmā'

As incidental to the colossal figures of the years of Kalpas and Yugas, a few words on numerals, their antiquity and the methods of writing numerals would not be out of place, In the Rgveda numerals from 1 to 10 are frequently used. 'Sahasra' (thousand) and 'ayuta' (ten thousand) occur in Rg. IV. 26. 7, VIII. 1 5, VIII 21 18 One of these says[1096] 'O wielder of thunderbolt! O immensely rich (Indra)! I shall not give thee away even for a big price, not for a thousand, not for ten thousand, nor for hundreds'. In Rg VIII 46. 22 a poet says 'I secured 60000 and several tens of thousands of horses, 20 hundreds of camels, one thousand dark-coloured mares and ten thousands of cows bright in three parts of their bodies' In Rg I. 53 9 Indra is said to have struck down sixty thousand and 99 enemies. Vide Rg. I. 126 3 (for sixty thousand cows), VIII 4. 20 and VIII 46 29 for 60000 and VI. 63 10 for one hundred thousand horses. In some of these the larger numbers are mentioned first and the smaller ones next (as in Rg I. 53 9, VIII. 46 22); in others it is the reverse No conclusion can therefore be drawn that the smaller numbers come first in the Rgvedic times In Tai. S IV 4 11 3–4 reference is made to bricks in numbers from one, one hundred, thousand, ayuta (ten thousand), niyuta, prayuta, arbuda, nyarbuda, samudra, madhya, anta and parārdha, while in Tai S VII 2 11–19 various numbers from one to one

tions of man There is a good deal of literature on this subject which is passed over here as not material for our purpose One of the latest works on this system is 'From Zero to Infinity' by Constance Reid (Routledge and Kegan Paul, London, 1956). Zero is the first of ten symbols with which one can represent an infinitude of numbers and it is also the first of the numbers. This work says that the zero escaped even the greatest Greeks, Pythagoras, Euclid and Archimedes (p 4) The Egyptians[1102] had a decimal system of numerals but no sign for zero and therefore no positional notation, which even the Greeks did not know, ancient Babylonians also had no definite symbol for zero and there is no example of zero signs at the end of numbers even in their latest astronomical writings It is difficult to say when exactly a symbol or word for zero was employed in India But it must have been several centuries before the beginning of the Christian era Pingala's work on metres is a *vedānga* Pingala's sūtra on metres makes use of zero (śūnya) in VIII 28-31. Even the Śatapatha Br. (XI. 4 3 20) seems to be aware of Vedāngas. But it may be argued that there is nothing to show that Pingala's work was known to it It is most probably

1102. Vide 'Legacy of Egypt' (Glanville p 166), E S A by Neugebauer p. 20, Sarton in 'a History of Science' p 69, Prof Neugebauer in JAOS. vol. 61 pp 213-215 avers that strong arguments exist for the assumption that the Babylonian methods of calculation went, together with Greek Astronomy, to India, and that, sometime in the first centuries of the Christian era, the corresponding decimal place value notation in India, which through the Arabs gave rise to the modern system of Europe With great respect the author must demur to these assertions. The learned writer endeavours to show that a peculiar sign was used for zero in Mesopotamian cuneiform texts The important questions that must be answered are, who discovered the symbol for zero now used almost throughout the world, whether the so-called sign for zero which Prof Neugebauer asserts he has discovered in cuneiform texts was ever used in Europe or for that matter anywhere in the world except in Mesopotamia, what direct relation exists between the Indian zero symbol and the recently discovered zero symbol (which no one had found so far), whether the symbols for 1 to 9 in India bear any resemblance to the Mesopotamian symbols for these numbers, whether the Greeks (who admittedly borrowed many things from Mesopotamia) used the Mesopotamian zero symbol and, if so, when The 19th century was distinguished by the theories of Western Scholars claiming that science, philosophy and arts began in Greece and that other nations borrowed these from the Greeks That bubble of Greek primacy in these matters has now been pricked. The twentieth century appears to be heading for giving to Mesopotamia the place once assigned to the Greeks The Mesopotamian bubble raised by some scholars may be pricked in course of time, particularly as regards others borrowing from them.

mentioned as Chandoviciti in the Āpastamba-dharmasūtra [1103] Śabara [1104] (about 200 A. D. and not later than 400 A. D.) speaks of Pingala's work as on the same level with Pānini's sūtra. It is unnecessary to offer further proofs of the antiquity of Pingala's sūtra.

There were several methods of writing numerals. One was the place value notation, in which the same numeral has different values according to the place it occupies; for example, the figure two may have the value of only two or twenty or two hundred and so on according as it occupies the units place or tens place or hundreds place. Another way is that of employing words to denote complete numbers. This was a very reliable method when in astronomy huge figures had to be employed and works were not printed but only copied by hand. In ancient times, the writers of mss. might often omit zeros or other figures, but if words with a fixed meaning in relation to numbers were used, they would not be so easily dropped and as many works were metrical, the omission of a word, if any, might have been far more easily detected. It is difficult to say when this system was introduced. But its beginnings are ancient. For example, the word *kṛta* is used in the Taittirīya [1105] Brāhmana in the sense of 'four'. Varāhamihira (beginning of the 6th century A. D.) employs these word numerals but in the place value system (vide H. of Dh. vol. III p. 897 n. 1763.) The following is a list of some of the very usual numbers with the corresponding words employed to indicate them. It should be noted that the list is not exhaustive. Any number of synonyms [1106] may be employed to indicate the same number. Vide the lists in Alberuni (Sachau, vol. I. pp. 174–179) and Buhler's 'Indian Paleography' (I. A. vol. 33; appendix pp. 83–86).

1106 पर्यायशब्दैरपि कल्पनीया संख्याङ्कसंज्ञा सुधिया धियाम्य् ॥ मुहूर्तमाला I. 26 (MS in Bhau Daji Collection of the Bombay Asiatic Society) For example, it may be noted that the Amarakośa gives twenty-five synonyms for सर्प in one place, besides नाग and काद्रवेय mentioned elsewhere as divine beings. This work (in I 17–25) gives a list of the important word numerals as follows अङ्कानां वामतो गति ॥ 17 एकं भूनीन्दुरूपं द्वावक्षिपक्षाक्षिदोर्यमाः । त्रय क्रमयानराम-

(Continued on next page)

Zero—śūnya, kha, ambara (sky), gagana, abhra, ākāśa, bindu, pūrna.[1107]

One—eka, bhūmi (earth), indu (the moon), rūpa, ādi, Visnu.

Two—dvi, aksi or locana (eye), paksa, Aśvin, dasra, dos or dosan (arm), bhuja, yama or yamala (twins)

Three—tri, krama (from three steps of Visnu in Rg. I. 22. 18 I. 155. 5), grāma (in music), Rāma, pura (cities burnt by Rudra), loka (earth, heaven and hell), guna (sattva, rajas, tamas), agni (gārhapatya, āhavanīya and daksināgni).

Four—Catur, abdhi (ocean), krta, yuga, veda, śruti, varna (brāhmana etc.)

Five—pañcan, isu or śara (arrows of Madana), vāyu (prāna, apāna &c), bhūta (*prthvī*, waters, *teyas*, air, *ākāśa*), aksa (sense organ), indriya, Pāndava or Pāndu-suta.

Six—Sat, rasa (sweet, acid, salt &c), anga (the six auxiliary sciences of the Veda), rtu (seasons), tarka (logical categories from *dravya* to *samavāya*), darsana (six systems of philosophy)

Seven—Saptan, rsi or muni (the seven sages), svara (nisāda, rsabha &c. in music), aśva (seven horses of the Sun, who is called 'saptāśva' in Rg. V 45 9), giri, parvata (Mahendra, Malaya, Sahya &c), dhātū (elements of the body, viz skin, blood &c).

Eight—astan, vasu, sarpa (vide note 321 for eight nāgas), mangala, matangaja (elephants of eight quarters), siddhi (animā, laghimā &c in yoga).

(Continued from last page)

1107 Vide Pañcasiddhāntikā IV. 7 and 11, XVIII 35 and 45 for śūnya, and IV 8 for 'ambara', Bhāskarācārya uses 'pūrna' for zero in saying that he was born in 'rasa-guna-pūrna-mahi' śaka year *Rūpa* denoting one and *rasa* 6 occur in ancient Bakhshali ms (vide I A vol. 17 at p 35) which throughout employs the decimal system of notation *Randhra* (opening) means 'nine' because there are nine openings in the human body, viz. the mouth, the two eyes, two ears, two nostrils, organ of generation and that of excretion, compare 'नवद्वारे पुरे देही नैव कुर्वन् न कारयन्' गीता V. 13, पुण्डरीक नवद्वारं त्रिभिर्गुणेभिरावृतम्। अथर्ववेद X. 8 43.

Nine—navan, sankhyā (from 1 to 9), Nanda (nine Nanda kings), randhra or chidra, nidhi (treasure, mahāpadma, sankha, makara &c), anka (numerals one to nine), go or graha or nabhaścara (planets)

Ten—daśan, paṅkti,[1107a] āśā or diśā (directions including *ūrdhva* and *adhara*), avatāra, Rāvana-śiras.

Eleven—Ekādaśan, Maheśvara, Rudra.

Twelve—dvādasan, āditya, arka sūrya, māsa

Thirteen—trayodaśan, Viśve (viśve-devāh).

Fourteen—caturdaśan, Manu, Indra, bhuvana (worlds, bhūh &c. seven, and seven pātālas).

Fifteen—pañcadaśan, tithi

Sixteen—sodaśan, kalā (digits of the Moon), nrpa or rājan[1108] (kings), asti.

Seventeen saptadasan, atyasti.

Eighteen—astādaśan, dhrti.

Nineteen—ekonavimśati, atidhrti

Twenty—vimśati, krti, nakha (nails), anguli (fingers of the hands and feet together).

Twentyone—ekavimśati, prakrti, mūrchanā (in music)

Twentytwo—dvāvimśati, jāti, ākrti

Twentyfour—caturvimśati, Jina or siddha (24 Jain tīrthankaras).

Twentyfive—pañcavimśati, *tattva* (25 Sānkhya principles, vide note 1092)

Twentyseven—saptavimśati, bha, naksatra

Thirtytwo—dvātrimśat, dasana or dvija (both mean 'teeth').

Thirtythree—trayastrimśat, sura (gods).

Fortynine—ekonapañcāśat, tāna (notes in music)

The above method of employing particular significant words to denote certain numbers even in decimal place value system is largely employed by Varāhamihira in his Pañcasiddhāntikā (e. g I. 8 in note 1004 above, VIII. 1)

1107 a. 'पङ्क्तिर्विंशतिर्त्रिंशाच्चत्वारिंशात्पञ्चाशात्षष्टिसप्तत्यशीतिनवतिशतम्।' पा VI 1 59.

1108. There is a 'षोडशराजकीय' section in द्रोणपर्व chap 55–71 (16 ancient kings named Marutta, Suhotra, Paurava &c.). Asti is a Vedic metre, each of its four pādas having 16 letters as in Rg II 22 1; Atyasti is another Vedic metre with 68 letters in four pādas, Dhrti, Atidhrti Krti, Prakrti, and Ākrti have respectively 72, 76, 80 84, 88 letters in all pādas, The Rk-prātisākhya (16 83–90) says उत्तरादिष्वतु पंक्ति. । ततोऽष्टापंक्तिरत्यष्टिं । धृति पूर्वा द्विसप्तति । पञ्चसप्ततिस्त्वतिधृति. । कृति. प्रकृतिरा कृतिर्विकृतिः सद्भकृतिस्तथा । षष्ठी चाभिकृतिर्नाम सप्तम्युत्कृतिरुच्यते ॥ अशीतिश्चतुरशीतिरष्टाशीतिर्द्विनवति. ।. . ed by Mangal Deva Shastri, Allahabad (1931)

and in Brhat-samhitā 8. 20 and by all later astronomical writers [1109] The particular matter to be noted is that the first word in a group (denoting a number) is to be assigned to the units place, the next to its left in the tens place, so that a word like 'saptāśvi-veda-sankhyam' becomes 427 (by the rule 'ankānām vāmato gatih')

Another method for expressing numbers is elaborated by Āryabhata in his Daśagītikāpāda [1110] (verse 3) where the letters from *k* (kā also) to *m* have the values of 1 to 25, while *ya*, *ra*, *la*, *va*, *śa*, *ṣa*, *sa* and *ha* stand for 30, 40, 50, 60, 70, 80, 90 and 100 and so on towards more complicated matters

The fourth *anga* in a pancānga is called *Yoga*. There is no direct astronomical phenomena corresponding to it It is calculated from the sum of the longitudes of the Sun and the Moon (or it is the time during which the sun and the moon together accomplish 13 degrees and 20 minutes of space) When this amounts to degrees 13 20 the first Yoga called Viskambha ends; when it amounts to 26. 40 the 2nd Yoga Prīti ends and so on. The yogas are 27 (that thus make 360 degrees) as stated in the Ratnamālā IV. 1-3 and are as follows —

	Name	Deity
1.	Viskambha	Yama
2.	Prīti	Visnu
3	Āyusmat	Candra.
4	Saubhāgya	Brahmā
5	Śobhana	Brhaspati
6	Atiganda	Candra
7	Sukarman	Indra
8.	Dhrti	Āpah
9	Śūla	Sarpa
10	Ganda	Agni
11	Vrddhi	Sūrya
12	Dhruva	Prthvī
13	Vyāghāta	Pavana
14.	Harsana	Rudra
15	Vajra	Varuna
16.	Siddhi	Ganeśa
17.	Vyatīpāta	Śiva.
18.	Varīyas	Kubera
19	Parigha	Viśvakarman
20	Śiva	Mitra
21	Siddha	Kārtikeya
22.	Sādhya	Sāvitrī
23	Śubha	Kamalā
24	Śukla	Gaurī
25.	Brahman	Aśvinau
26	Aindra	Pitrs
27	Vaidhrti	Aditi

1109. How neatly huge numbers can be indicated by words may be illustrated by the सि शि I 28 गोऽग्नीन्द्रदिक्कृताङ्कवसुनगगोचन्द्रा शकाब्दान्विता सर्वे चक्रलिताः पितामहदिने स्युर्वर्तमाने गता ।' These come to 1972947179 days

1110. The Daśagītikā verse 3 has been differently interpreted by different scholars Vide Fleet in JRAS in 1911 pp 109-128 for Āryabhata's system and pp 115-125 for explanation of the verse

These are *nitya* (ever-recurring) Yogas The Ratnamālā states that they yield good or bad results in keeping with their names. The Muhūrtadarśana[1111] states that among these 27 yogas nine are condemned, viz. Parigha, Vyatīpāta, Vajra, Vyāghāta, Vaidhrti, Viskambha, Śūla, Ganda[1112] and Atiganda. The Ratnamālā provides that Vyatīpāta and Vaidhrti are wholly inauspicious, the first half of Parigha is so and only the first quarter of those Yogas the names of which are odious; and that one should avoid in all auspicious rites the first three ghatikās in Viskambha and Vajra, nine ghatis in Vyāghāta, five in Śūla, six in Ganda and Atiganda. The Agnipurāna[1113] (127. 1–2) has similar verses. The Kālanirnaya-kārikā[1114] provides that when a Yoga spreads over two days, fasts and the like are to be observed on the first of the two days provided that Yoga exists at sunset on that day, and vratas and religious gifts are to be performed on the latter (of two days) provided the Yoga exists for three *muhūrtas* (i. e. six ghatis) after sunrise and for śrāddha the day on which the Yoga extends over the time required for the śrāddha rite should be accepted.

The system of Yogas must be held to be ancient. The Yājñavalkyasmrti (I. 218) when specifying the times for the performance of śrāddhas includes Vyatīpāta among them. In the Harsacarita of Bāna it is said (Ucchvāsa IV) that Harsa was born on a day free from the taint of all defects such as Vyatīpāta (vyatīpātādi-sarvadosābhisanga-rahiteshani) There would generally be 13 vyatīpātas in a year (sometimes 14) and, among the 96 śrāddhas, śrāddhas on these thirteen vyatīpātas are

included (vide H. of Dh vol. IV pp. 382–383 and note 861). Besides these 27 Yogas, there are others that occur when there are special conjunctions of weekdays with certain tithis and naksatras or when certain planets occupy certain rāśis on certain tithis and naksatras. For Kapilāsasthīyoga and Ardhodaya, vide above pp 279 and 261. Vyatīpāta itself has two technical senses apart from being 17th out of the 27 Yogas mentioned above viz. (1) When amāvāsyā[1115] occurs on a Sunday and the moon is in the first quarter on any one of the naksatras Śravana, Aśvinī, Dhanisthā, Ārdrā and Āślesā that is Vyatīpāta; (2) When on the 12th of the bright half Jupiter and Mars are in the sign Lion, the Sun is in Ram and when that tithi has Hasta naksatra on it, it is Vyatīpāta[1116] Yoga. These two are sometimes called Mahāvyatīpāta Gifts made on those conjunctions are very much commended,[1117] 'gifts on amāvāsyā yield one hundred-fold merit, on the suppression of a tithi a thousand-fold, on Visuva day ten thousand-fold, but on Vyatīpāta endless (merit). By gifts of cows, land, gold and clothes made on this the donor becomes free from sin and secures godhead, the position of Indra, health, the rulership of men.[1118] The Sūryasiddhānta (XI. 1–2) gives an explanation of Vyatīpāta and Vaidhrta[1119] (or Vaidhrti)—when the sun and the moon are on the same side of either solstice and when the sum of their longitudes being a circle they are of equal declination it is styled Vaidhrti When the moon and the sun are on opposite sides of either solstice and their minutes of declination are the same, it is Vyatīpāta, the sum of their

1119 एकायनगतौ स्यातां सूर्याचन्द्रमसौ यदा। तद्युतौ मण्डले क्रान्त्योस्तुल्यत्वे वैधृताभिधः॥ विपरीतायनगतौ चन्द्रार्कौ क्रान्तिलिप्तिकाः। समास्तदा व्यतीपातो भगणार्धं तयोर्युतौ॥ सूर्यसिद्धान्त XI 1-2

longitudes being a half circle Why the times mentioned should be looked upon as specially inauspicious or unfortunate is not at all clear and no plausible reason has been assigned The 27th Yoga called Vaidhṛti was just like Vyatīpāta in all respects. Bharadvāja says that the merit of gifts made on Vyatīpāta and Vaidhṛti is endless.

In the pancāṅgas several Yogas (that have nothing to do with the 27 yogas) like Amṛtasiddhi, Yamaghanta, Dagdhayoga, Mṛtyuyoga, Ghabāda are mentioned; they are purely astrological and all of them except three are passed over here for reasons of space. When on Sunday there is Hasta, on Monday Mṛgaśīrsa, on Tuesday Aśvinī, on Wednesday Anurādhā, on Thursday Tisya (i. e. Puṣya), on Friday Revatī and on Saturday Rohiṇī, all these are Amṛtasiddhiyogas (fortunate ones[1120]). Avoid Anurādhā on Sunday, Uttarāsādhā on Monday, Śatatārakā on Tuesday, Asvinī on Wednesday, Mṛgaśīrsa on Thursday, Āślesā on Friday and Hasta on Saturday—these are seven Mṛtyuyogas (inauspicious). If the weekdays from Sunday to Saturday occur on the tithis, 12th, 11th, 10th, 3rd, 6th, 2nd, 7th respectively, these are Dagdhayogas (inauspicious yogas).

The fifth item in a pañcānga is Karana. Half of a tithi is Karana and thus there are two Karanas in a tithi and 60 Karanas in a lunar month. Karanas are of two kinds, viz. *cara* (moving) and *sthira* (immoveable). The seven *cara* karanas with their presiding deities according to Brhatsamhitā, chap 99. 1–2 are: 1. Bava–Indra; 2. Bālava–Brahmā; 3 Kaulava–Mitra, 4. Taitila–Aryaman, 5. Gara (or Garaja)–Earth; 6 Vanija–Śrī, 7. Visti–Yama. The four *sthira* karanas with their deities are: 1 Śakuni–Kali; 2. Catuspada–Vrsa; 3. Nāga–snake; 4. Kimstughna–Vāyu Some works transpose the two, Catuspada and Nāga This division of a tithi into two halves resembles the division of a rāśi into two *horās* (Brhajjātaka I 9) It is likely that one was suggested by the other The difficulty is to decide which was the earlier. I believe it likely that the division of tithis into two karanas is the earlier of the two. The sthira karanas occur only once in a month i e. on the latter half of

1120 हस्तो रवौ शशधरे च मृगोत्तमार्क्षं सौमेऽश्विनी बुधदिने च तथानुराधा। तिष्यो गुरौ भृगुसुतेपि च पौष्णमिष्टयं रौहिण्यथार्कतनयेऽप्युदितासिद्धियोगाः॥ रत्नमाला VIII 8 (ms). त्यज रविमनुराधा विश्वदेवं च सोमे शतभिषमपि भौमे चन्द्रजे चाश्विनी च। शशधरमपि जीवे सर्पदेवं च शुक्रे रविसुतमपि हस्ते मृत्युयोगाश्च सप्त॥ भुजबलनिबन्ध p. 31 verse 126; आदित्यरुद्रकाष्ठाग्निरसपक्षतुरङ्गमाः। अर्कादिवारयोगेन दह्यन्ते तिथयः क्रमात्॥ भुजबलनिबन्ध p. 28 verse 114

14th tithi of dark half occurs Śakuni: Catuspada and Nāga occupy the two halves of amāvāsyā and Kimstughna occurs on the first half of Pratipad i. e if the 30 tithis of an amānta month are divided into 60 halves, Śakuni, Catuspada and Nāga occupy the 58th, 59th and 60th parts and Kimstughna occupies the first half of the pratipad of the next month. Bava occupies the second half of śukla pratipad and the others follow one after another and as they are only seven they are repeated eight times in a month from the 2nd half of pratipad to the first half of the 14th tithi of a dark half, which would be 57th of the sixty halves of the tithis of the month and would be occupied by Vistı In the pañcāngas, two karanas should properly be shown under each tithi, but in pañcāngas only that Karana is shown against a tithi whose ending moment is 30 ghatikās or less from sunrise. The ending times of Karanas which are assigned to the 2nd halves of tithis coincide with those of the tithis themselves and therefore there is no need for their calculation. The ending times of the first halves of tithis which correspond to certain Karanas are got in the manner described by Pillai in his 'Indian Ephemeris', vol. I. part 1 p 37, paragraphs 106–107

The word Karana is derived from the root 'kr' (to do) and is said to have been so named because it divides a tithi in two parts.[1121] The names of most of the Karanas are somewhat strange and inexplicable. The word 'Taitila-kadrū' occurs in Pānini VI. 2. 42 (with regard to accent) but the Kāśikā explains that Taitila means 'a descendant or pupil or Titilin'. If a mere conjecture were to be offered, the Karana Taitila might have been first named after a man so called The Karanas are only of astrological use and must have been named many centuries before 400 A D. The Nāradapurāna[1122] mentions both kinds of Karanas. The Brhat-samhitā lays down what should be done or not done on the several Karanas[1123] as follows: one

1121. तिथिं द्विधा करोतीति करणमित्यर्थसंज्ञानात् तिथ्यर्धं करणमिति विज्ञायते। com. दीपिका on बृ द. I 41.

1122 शेषं भवो बालवश्च कौलवस्तैतिलो गरः। वणिजोऽथ भवेद्विष्टिः कृष्णसूतापरार्धतः। शकुनिर्नागश्च चतुष्पदं किंस्तुघ्नमेवच॥ नारदपु० I. 54 126–127

1123. कुर्याद्भवे शुभचरस्थिरपौष्टिकानि धर्मक्रियाद्विजहितानि च बालवाख्ये। सभीतिमित्रवरणानि च कौलवे स्यु सौभाग्यसत्रयगृहाणि च तैतिलाख्ये॥ कृषिबीजगृहाश्रयजानि गरे वणिजि ध्रुवकार्यवणिज्युतयः। न हि विष्टिकृत विदधाति शुभ परघातविषादिषु सिद्धिकरम्॥ कार्यं पौष्टिकमौषधादि शकुनौ मूलानि मन्त्रास्तथा गोकार्याणि चतुष्पदे द्विजपितृद्विद्य राज्यानि च। नागे स्थावरदारुणानि हरणं दौर्भाग्यकर्माण्यतः किंस्तुघ्ने शुभमिष्टिपुष्टिकरण मङ्गल्यसिद्धिक्रियाः॥ बृहत्संहिता 99 3–5.

should perform on Bava all auspicious (religious) rites, all acts that bring about physical health. on Bālava religious acts and acts beneficial to brāhmaṇas, on Kaulava acts leading to good relations and friendship and choosing a bride; on Taitila acts that lead to popularity with people, to securing the patronage (of some important person) and building a house, on Gara actions pertaining to ploughing, sowing seeds and those that arise in houses; on Vanija, acts of a permanent nature, trading, and meeting with people; whatever is done on Visti does not bring about fortunate results; but actions as regards destruction of enemies, poisoning and incendiarism become successful on it; on Śakuni one should do what leads to physical health and medication, planting roots and eating them and becoming successful in mantras, on Catuspada actions relating to cows (i. e. gifts of them and rearing them), actions regarding brāhmaṇas and one's ancestors and king's business should be done; on Nāga, acts relating to immoveable property, cruel acts, depriving (a man of his wealth or wife) and acts that lead to hatred among people; on Kimstughna, auspicious (religious) acts, Vedic sacrifices (called *iṣṭis*) and acts leading to physical prosperity and mangala acts (marriage &c.) and other acts that bring success in these matters.

One very noticeable feature is that the 7th mobile Karana called Visti appears to have inspired great terror in the minds of medieval writers on Dharmaśāstra It will be noticed that dividing the lunar month into 60 halves of tithis, and beginning Bava on the second half of the pratipad of an amānta month, the Karana Visti will occur eight times in one month as the following diagram of the sixty halves will show :

Bava	2	9	16	23	30	37	44	51
Bālava	3	10	17	24	31	38	45	52
Kaulava	4	11	18	25	32	39	46	53
Taitila	5	12	19	26	33	40	47	54
Gara	6	13	20	27	34	41	48	55
Vanija	7	14	21	28	35	42	49	56
Visti	8	15	22	29	36	43	50	57

The fixed Karanas will be Śakuni 58, 59 Catuspada, 60 Nāga, 1 (pratipad first half of next month) Kimstughna.

In the dark half,[1124] *Visti* will occur in the latter half of the third and 10th tithis and in the first half of the 7th and 14th tithis; in the bright half Visti will occur in the latter half of the 4th and 11th tithis and the first half of the 8th and 15th (i e. Paurnamāsi) tithis The Rājamārtanda[1125] states 'Some regard Visti as having the form of a cobra and as terrible; there is danger in the mouth of a snake but not in its tail. The mouth, neck, chest, navel region, waist and tail of Visti are respectively of five, one, eleven, four, six and three ghatikās Great sages declare that it (Visti) does not confer fortunate results, therefore a good man should avoid these except the tail' (on last three ghatikās of Visti auspicious acts may be performed) Visti is also euphemistically called Bhadrā or Kalyāni (it is really *abhadrā*). The terrible nature of *Visti* is described in two verses of Bhīma-parākrama quoted in Bhujabala-nibandha p 30 (vide pp. 95–96 of my paper on 'Bhoja and his works &c' in Journal of Oriental Research, Madras, vol XXIII for 1953–54) which also occur in Rājamārtanda, verses 1021–22

The whole scheme of Karanas is itself fanciful But to draw a lurid picture of one of them, *Visti* (which occurs eight times in a month), and say that it is like a cobra or an ogress is the height of imagination dominated by astrological considerations.

Having described at some length the five angas in a pañcānga, a few words must be said about Hindu calendars, though it has been already declared above that purely astronomical matters will not be elaborated in this work In the

continent of India there are numerous pañcāngas in vogue and there is something like anarchy in this sphere Hardly any two pañcāngas agree completely Many educated I ndians have been demanding that such matters as eclipses, the times of which can be noted by anyone, should be accurately predicted by the almanacs and that our ancient methods of calculating the motions of heavenly bodies should be brought in line with modern accurate calculations based upon observations This is just what scientific astronomers like Varāhamihira would have done if they were living in modern times At the end of his two works Varāha makes a very candid but solemn request[1126] 'whatever in this work comes to be unscientific while it is being used or on account of defects in the mss, or whatever may have been badly executed by me or insufficiently done or not done at all, that should be corrected by learned men, leaving aside all passion (jealousy), and after acquiring (knowledge) from the lips of well-read men' Some almanac-makers follow the Nautical Almanac tables as to eclipses and the like and set out other matters according to the old tables As already stated there are three main schools of astronomers in India, (1) the school that follows the Sūrya-siddhānta (and is called Saurapaksa), (2) the second follows the Brahma-siddhānta (and is called Brāhmapaksa), (3) the third follows the Āryasiddhānta (and is styled Āryapaksa) There are two main points of difference between these, viz (1) the length of the year, (2) the number of revolutions of the sun, the moon and the planets in a certain period such as a mahāyuga The difference in the length of the year among the siddhāntas is very small viz a few *vipalas* (a *vipala* being $\frac{1}{60}$th part of a *pala*, which again is $\frac{1}{60}$th of a *ghatikā* that is equal to 24 minutes). The length of the year according to the Sūryasiddhānta is 365 days 15 ghatis, 31 523 *palas*, while the interval in time between two successive returns of the sun to the vernal equinox (called the tropical year) is only 365 days, 14 ghaṭis and 31 972 palas and the correct sideral (nāksatra) year is 365 days, 15 ghatis, 22 palas and 53 vipalas (vide C. R C. Report p 240 in hours, minutes and seconds and Dikshit's History ed of 1931 pp. 159, 440) The result is that if one follows the Sūryasiddhānta, the starting point of Hindu astronomers is at present more than 23 degrees to the east of the correct vernal equinox point This difference is called the *ayanāmsa*.

1126 अन्यस्य यत्प्रचरतोऽस्य विनाज्ञानेति लेरुवाद् बहुश्रुतमुखाधिगनक्रमेण। यद्वा मया कृततमल्पमिहाकृतं वा कार्यं तदत्र विदुषा परिहृत्य रागम्॥ बृहत्संहिता 105 5, बृहज्जातक 28 8

As the longitudes of heavenly bodies reckoned from the equinox include these *ayanāṁśas* they are called *sāyana* (*sa* + *ayana*). The places of heavenly bodies *obtained* by the methods of the Sūryasiddhānta and mediæval Sanskrit works are distinguished by being called *nir ayana* (devoid of taking into account precession). At present according to most almanacs that employ the Sūryasiddhānta values Makarasankrānti (Sun's entrance into Capricorn) falls generally on 14th January, but according to the most accurate *modern calculations*, it should fall on 21st December, even in calendars that pride themselves on being *śuddha* the Makarasankrānti falls on 9th January i. e. our Makarasankrānti is celebrated[1127] about 23 or 18 days later than it should be and the same happens to the vernal equinox, autumnal equinox and the summer solstice and many other observances Aśvinī is still reckoned as the first naksatra (in which the vernal equinox is deemed to have occurred about *śaka* 444), although the vernal equinox point has receded to the Uttarā-bhādrapadā group of stars (which should now be treated as the first naksatra). Efforts have been made by those familiar with the modern accurate calculations (such as the late Kero L. Chatre) to introduce modrn calculations in our almanacs; but they have met with little response. The late Lokamānya Tilak (who was a great Vedic scholar and mathematician) held several conferences of Indian astronomers and other interested people at Bombay (1904), Poona (1917) and at Sangli (1919). At the last conference several resolutions were passed which without making a total break with the past were calculated to reform our calendar and to prevent furthur deterioration It is unnecessary to set out all the resolutions, but the most important were that the length of the year should be that of the Sūryasiddhānta but subject to necessary corrections, the rate of precession should be accepted at 50 2 *vikalās* a year (as determined by modern astronomical observations), that the Yogatārā[1128] of Revatī (corresponding to Zeta Piscium of modern astronomers) should be deemed to be the beginning of the

1127. Vide note 574 above, where the encyclopoedist scholar Hemādri is quoted as saying that the real Makarsankrānti takes place 12 days before the sankrānti in the almanacs and that the holy time of Makarsankrānti is really twelve days earlier than the one on which people celebrate it and religious gifts should really be made at that time.

1128 सतारागणमध्ये (स्वतारा० ?) हु या तारा दीप्तिमत्तरा । योगतारेति सा प्रोक्ता नक्षत्राणां पुरातनै. ॥ quoted by उत्पल on बृहत्संहिता 24 34 and by अद्भुतसागर p 44 (which reads हु श्वेता वा दीप्तिमत्तरा)

Zodiacal belt (*rāśicakrārambhasthāna*) and that the *ayanāṁśas* calculated from the starting point by actual observation should be accepted for the purpose of a new *Karaṇa* (astronomical manual) to be compiled according to the resolutions. Unfortunately the resolutions did not state where exactly the star Zeta Piscium was in a particular śaka year Dr. K. L. Daftari prepared a Karana-grantha called Karanakalpalatā in Sanskrit which was published in 1924. Almanacs based on its data have been published and are sometimes known as 'Tilak Pañcānga' But it must be confessed that our people in general are so much custom-ridden that the popular response to the reformed calendar is poor. People still follow the pañcāngas based on the old siddhāntas. According to the śāstras every religious festival is to be celebrated at the proper time i.e in the right *season* and on the proper tithi. The tithi depends upon the correct calculation of the movements of the moon, which are most difficult to reduce to rules that will give accurate results. Many people will not observe the *ekādaśī* fast if the eleventh tithi is mixed up with the 10th tithi even for a few ghatikās. But what guarantee is there that the 10th tithi has been accurately calculated? The ending moments of tithis do not agree with those given by the Nautical Almanac which are based on modern formula and are verified by actual observation. If tithis be calculated according to different Sanskrit astronomical treatises the moment of a particular tithi may differ by as much as five hours and the same festival (such as Krsnajanmāstamī or *Dussera*) may be celebrated on two successive days in the same city.

Besides, it must not be forgotten that a pañcānga prepared on the basis of the latitude and longitude of Poona or Bombay will be slightly wrong even at a distance of 30 or 40 miles to the west or east or north. It would be a great mistake from the religious point of view to employ a pañcānga prepared on the basis of the longitude and latitude of Poona or Bombay in a place several hundred miles away (such as in Hyderabad or Aurangabad). From the religious point of view if accuracy is to be preserved there must be a separate pañcānga for every town or every place not more than 10 or 15 miles from places like Bombay or Poona where pañcāngas are at present prepared.

In November 1952 the Government of India appointed a committee called the Calendar Reform Committee presided over by Dr. Meghanad Saha to examine all existing calendars being followed at present in India and to submit proposals for an accurate and uniform calendar for the whole of India That

committee submitted a very exhaustive and valuable report in November 1955. The final recommendations of the Committee for a civil calendar and for a religious calendar are set out on pp. 6-8 of the report. They are deserving of the most serious consideration by all who feel that religious observances must be done at the proper time and that now at least in independent India there should not only be one uniform civil calendar, but also one uniform Hindu religious calendar.[1129] It appears that unless Government makes great efforts for the introduction of a correct calendar even for religious purposes, it would be futile to assume that common people will spontaneously adopt a correct pañcāṅga.

Some of the important recommendations of the Committee may be set out here for the information of readers.

Recommendations for civil calendar

(1) The Śaka era should be used in the unified national calendar. The Śaka year 1876 corresponds to 1954-55 A D

(2) The year should start from the day following the vernal equinox day.

(3) Normal year is to consist of 365 days, while a leap year would have 366 days After adding 78 to the Śaka era year, if the sum is divisible by 4, then it would be a leap year. But when the sum becomes a multiple of 100, it would be a leap year only when it is divisible by 400; otherwise it would be a common year.

(4) Caitra (or Chaitra as often written) should be the first month of the year and the lengths of the different months should be fixed as follows :—

Caitra — 30 days (31 days in a leap year).	Āśvina — 30 days.
Vaiśākha — 31 days.	Kārtika — 30 days.
Jyestha — 31 days.	Mārgaśīrsa — 30 days.
Āsādha — 31 days	Pausa — 30 days.
Śrāvana — 31 days	Māgha — 30 days.
Bhādrapada — 31 days.	Phālguna — 30 days.

1129. Those interested in Indian Calendar Reform should read the Marathi Preface to Dr. K. L Daftari's work in Sanskrit 'Karana-kalpalatā', Mr. S M. Karamalkar's Marathi work '*Kharem pañcāṅga kasem miļel*' (1950), I. H. Q. vol. IV pp 483-511 on 'Hindu Calendar' by Sukumar Ranjan Das, Dr. Saha's papers on 'Reform of Indian calendar' in 'Science and Culture' (Calcutta, 1952), vol XVII. pp. 57-68 and 109-123 and the Report of the Calendar Reform Committee.

The dates of the reformed Indian calendar would thus have a permanent correspondence with the Gregorian[1130] calendar. The corresponding dates would be :

Hindu	Gregorian
Caitra 1	March 22 in a common year and 21 in a leap year.
Vaisākha 1	April 21.
Jyestha 1	May 22.
Āsādha 1	June 22.
Śrāvana 1	July 23.
Bhādrapada 1	August 23.
Āśvina 1	September 23.
Kārtika 1	October 23.
Mārgaśirsa 1	November 22.
Pausa 1	December 22.
Māgha 1	January 21.
Phālguna 1	February 20.

The Indian seasons would thus be permanently fixed with respect to the reformed Calendar as follows :

Seasons :

Grīsma (summer)	— Vaiśākha and Jyestha.	Hemanta (late autumn)	— Kārtika and Mārgaśirsa.
Varsā (rains)	— Āsādha and Śrāvana	Śiśira (winter)	— Pausa and Māgha.
Śarad (Autumn)	— Bhādrapada and Āśvina.	Vasanta (Spring)	— Phālguna and Caitra.

The States now having the solar calendars for civil and partly religious purposes which start the year from Vaiśākha (April 14th) will have to begin the year 23 days earlier, but the first month will be Caitra. The effect of this will be that in Bengal, Orissa and Assam solar months start approximately seven days later than now, and in Tamil-nad solar months start approximately 23 days earlier than now, for the month called Vaiśākha (14th April to 14th May) in Bengal and Orissa is called *Chittirai* (or *caitra*) in Tamil-nad. Those who use the lunar calendar beginning with Caitra also for civil purposes would experience no great difficulty in adopting this unified calendar

1130 It may be noted that under the Indian Limitation Act (Act I of 1908) section 25, all instruments shall, for the purposes of the Limitation Act, be deemed to be made with reference to the Gregorian Calendar. This rule is absolute and therefore even if a bond is made on a tithi of a lunar month in a certain śaka year and is made payable four months after the śaka date, the period of limitation applicable to a suit brought on the bond runs from the expiration of four months after the date computed according to the Gregorian Calendar.

as they have at present the beginning of their year on various dates from 15th March to 13th April and the first month is Caitra.

Recommendations for religious calendar.

(5) The calculation for *Saura* (solar) *months* necessary for determining the lunar months of the same name will start 23 degrees and 15 minutes (fixed ayanāmśa) ahead of the vernal equinox point. This tallies with the present practice of most almanac-makers.

The months would thus commence at the moments when the tropical longitude of the sun attains the following values; viz. Saura Vaiśākha commences when the sun has the longitude of 23° 15', Saura Jyestha and the other Saura months upto Caitra will commence when the sun has respectively the longitude of 53° 15', 83° 15', 113° 15', 143° 15', 173° 15', 203° 15', 233° 15', 263° 15', 293° 15', 323° 15', 353° 15'.

This recommendation is to be regarded only as a measure of compromise, so that a violent break with the established practice would be avoided. But this compromise would not make our present seasons in the several months as they were in the days of Kālidāsa and Varāhmihira. It is hoped that at not a distant date, further reforms for locating the lunar and solar festivals in the seasons in which they were originally observed will be adopted.

(6) As usual the lunar months for religious purposes would commence from the moment of new moon and would be named after the saura month in which the new moon falls. If there be two new moons during the period of a *Saura* month, the lunar month beginning from the first new moon is the *adhika* or *mala māsa* and the lunar month beginning from the moment of the second new moon is the *śuddha* or *nija māsa* as usual.

(7) The moment of the moon's exit from a naksatra division of 13° 20' each or sun's entry into it would be calculated with a variable *ayanāmśa* (i e. on the supposition that they are fixed with respect to the stars) The value of this *ayanāmśa* would amount to 23° 15' 0" on 21 March 1956. Thereafter it would gradually increases with the annual rate, the mean value of which is about 50.27".

These arrangements would ensure that the religious observances determined by the sun such as the Viśuva-sankrānti, Uttarāyana-sankrānti and Daksināyana-sankrānti would follow

astronomically correct seasons, but those determined by the lunar calendar would continue to be observed in times conforming to the present practice and the correction introduced by this report in the length of the year would prevent their further shift in relation to the seasons.

The dates of festivals have already shifted by twenty-three days from the seasons in which they were observed about 1400 years ago as a result of our almanac-makers having ignored the precession of the equinoxes. Although it might appear to some desirable that the entire amount of shifting be wiped out at once, the authors of the Report consider it expedient to maintain this as constant difference and to stop its further increase. As a result there would at present be no deviation from the prevailing custom in the observance of religious festivals.

In the calculation of *nakṣatras*, however, the Report has adopted a variable *ayanāṁśa*, so that at the time of a particular nakṣatra the moon may be seen in the sky in the star or star-group of that name. This practice has been followed in our country from Vedic times and is perfectly scientific.

(8) The day should be reckoned from midnight to midnight of the central station (82½ degrees E Longitude and 23° 11' North Latitude) for civil purposes but for religious purposes the local sunrise system may be followed.

(9) For the purpose of all calculations, the longitudes of the sun and the moon should be obtained by applying the most upto-date and complete equations of their motions, so that they may tally with their actually observed values

(10) Steps should be taken to compile an 'Indian Ephemeris and Nautical Almanac' by the Government of India, showing in advance the positions of the sun, the moon, the planets and other heavenly bodies. The Indian calendar, both civil and religious, prepared according to the above recommendations should be included in that publication every year.

One can only express the hope that the above mentioned recommendations of the Committee of distinguished astronomers and Sanskrit scholars will receive a wide and hearty response from the Hindu people and that the present confusion and anarchy in the matter of religious observances in our country will come to an end as soon as possible. The Government of India accepted the principal recommendations of the Committee

by issuing a Press Note on 23rd October 1956 which decided that the Uniform National Calendar should be adopted with effect from March 22, 1957 corresponding to (Solar) Chaitra 1, 1879, Śaka Era, for certain official purposes in conjunction with the Gregorian Calendar and laid down the steps to be taken by the Central Government and the States Governments for implementing the decision. To avoid misunderstandings and to encourage the use by the mass of the people of this Solar Calendar, Government has decided to make use of both the Gregorian Calendar and the New Indian Solar Calendar together in some Government business, such as publishing the Indian Government Gazette with both dates, the All India Radio Broadcasting news every day announcing both dates at the beginning. But Government is not going to give up as far as possible the practice of declaring public holidays on religious festivals according to the old Calendars. The Government will publish translations of the Calendar Reform Committee's Report in the principal languages of India. It must be said however that this Calendar does not remove all the defects of the Gregorian Calendar.[1131] The years will still commence on different week days and the number of days in each month still varies. It is feared that this will add only one more calendar to the existing ones.

1131 The Gregorian calendar now in general use in Europe and other parts of the world is irregular, unbalanced and inconvenient (vide pp. 643–44 above) For twenty-five years the World Calendar Association founded by Miss Elisabeth Achelis in New York has been dedicating its time and resources to the introdution of the World Calendar in many lands The outstanding features of this world calendar are: Every year is the same and begins on Sunday, 1st January and ends on Saturday each of its four quarters has 91 days, 13 weeks or three months; January, April, July and October have 31 days each and the other months have 30 days each, the Calendar is stabilized and made perpetual by ending the year with a 365th day following 30th December each year. This additional day is named W (it is a World Holiday) and equal to 31st December In a leap year a day is added at the end of the 2nd quarter, is named W, equals 31 June, called Leap year day and is another World Holiday The United Nations Organization has not yet lent its support to the World Calendar An interesting work is 'Time counts: the story of the Calendar' by Harold Watkins (London, 1954.)

HISTORY OF DHARMAŚĀSTRA

(ANCIENT AND MEDIÆVAL RELIGIOUS AND CIVIL LAW IN INDIA)

BY

Mahāmahopādhyāya PANDURANG VAMAN KANE,
M. A., LL. M., D. Litt. (All., Poona).

National Professor of Indology; Senior Advocate, Supreme Court of India and Advocate High Court, Bombay; Fellow of the Bombay Asiatic Society, of the Asiatic Society of Bengal and of the London School of Oriental and African Studies.

VOL. V
(PART II)

(Śāntis; Purāṇas and Dharmaśāstra; Tantras and Dharmaśāstra; Pūrvamīmāṁsā and Dharmaśāstra; Sāṅkhya, Yoga, Tarka and Dharmaśāstra; Cosmology, Karma and Punarjanma; Fundamental and leading characteristics of Hindu culture and civilization; Future Trends.)

Bhandarkar Oriental Research Institute, POONA 4

1962

PUBLISHER'S NOTE

It is with a sense of profound gratification that the Bhandarkar Oriental Research Institute presents to the public the second part of the fifth and last volume of the *History of Dharmaśāstra* by MM. Professor Dr. P. V. Kane, National Professor of Indology. With this part, this monumental literary project, which was conceived by the author more than thirty years ago, has been brought to a successful completion. This must, indeed, be regarded as a memorable event in the history of Indological studies and research in this country. The five volumes of the *History of Dharmaśāstra* together extend over nearly 6,500 pages and constitute an authoritative and encyclopaedic treatment of the religious and civil law of ancient and medieval India. And what is particularly remarkable is that Professor Kane has accomplished this enormous work single-handed, and that too while being fully occupied with various other literary and public activities.

For Professor Kane, the *History of Dharmaśāstra* is the crowning glory of a life of great fulfilment; and, for the Institute, it is a matter of pride and honour to be so closely associated with it.

Professor Kane is now eighty-two years of age, but his energy and enthusiasm by no means seem to be on the wane. For, he has agreed (health permitting) to prepare for the Institute a revised and enlarged edition of the first volume of the *History*, which has now almost gone out of print.

FOREWORD

Professor Pandurang Vaman Kane, by his monumental volumes on Dharmaśāstra, has placed us all under a deep debt of gratitude to him. His work is of lasting value. At a time when we are building an integrated Indian society, a dispassionate study of our *Dharmaśāstras* is essential. By his work we are helped to understand what is living and what is dead in the heritage which has come down to us.

Our heritage has always been changing with reference to new conditions and new pressures. The process of readaptation is now at work. In spite of many changes the obstacles to Indian unity require to be removed. The principles which should guide us in the reorientation of our society are well brought out in Professor Kane's volumes. They may be said to be religious and social.

True religion has three sides to it : (1) a state of mind ; (2) a relationship to Reality ; and (3) a way of life.

State of mind. Religious scriptures speak of the passionate quest for spiritual illumination. Religion is inner illumination, a renewal of spirit, an awakening, a changed condition of mind. This is the knowledge of God and not merely belief in Him. This is achieved by study, discipline, meditation and purity of heart.

Relationship to Reality. Nearness to God is the goal of religious aspirants. When they attain an insight into Reality, their words are full of rapturous delight. They make out that the Reality they encounter is ineffable, incapable of adequate expression.

It transcends the distinction of subject and object, the duality which is essential for knowledge.

The absolute of experience is not the absolute of language or of logic. The Real to which we belong is beyond description in its majesty, power and glory. Spiritual humility requires us to look upon the varied expressions and interpretations as suggestions of the Supreme. By encouraging dogmatism and the use of force to spread belief, religions have become discredited.

The seers affirm that they are one with the Supreme : *ahaṁ brahmāsmi*. Hallāj exclaims : " I am the truth " and was executed for his heterodoxy.

A well-known Sufi tradition attributes to the prophet a saying : " He who knows the self knows the Lord ". Of Abū Yazīd it is recorded that he said : " I sloughed off my self as a snake sloughs off its skin ; then I looked into my self, and lo, I was He ".[1] Religion, it is said, springs from the great ' I am ' in each ' me '. The fountains are within.

On the pathway to the goal we feel that the attainment of the goal is conditioned by the effort of the seeker and the grace of God — *tapaḥ-prabhāva* and *deva-prasāda*.

The seekers look upon the Supreme as a Person separate from us, whose commands we obey, whose will we accept with reverence. The One beyond sense-perception, speech and logic is also the Controller, the Lord of all, the Creator and Ordainer of all. " There is nothing marvellous in my love for you, O God, you are a mighty being but your love for me a poor slave is really marvellous. It is impossible to know thee and not to love thee. " The personal is not a falsification of

1. Cf. *Bṛhadāraṇyaka Upaniṣad* IV. 4. 7.

the real. It is a manifestation of the Supreme. In some of the Upaniṣads — *Śvetāśvatara* for example — as in the *Bhagavadgītā*, the Supreme is a God of love and grace. Those who adopt the view of religion as experience, communion with God, are free from the tyranny of dogmas, from the fanaticism which is a disease of the mind to which men and communities are subject.

We are vulnerable to mass hysteria. This need not be so for human nature is infinitely malleable. If we feel that anything is true or beautiful, we are persuaded that it must find acceptance from others. We cannot but communicate to others what we know to be the truth. But when claims to absolute truth are varied and conflicting, humility requires us to respect the deepest convictions of others.

Way of Life. In some systems of thought a distinction is made between two orders of being, metaphysical and empirical. It does not mean that the latter is illusory. The distinction between the two is not absolute. The metaphysical reality is immanent in the world of becoming and makes for the gradual unfolding of values. This world is consecrated ground. Our sages set forth in clear and shining words the ideal of participation in the work of the world in order to raise its quality. *Karmabhūmim imām prāpya kartavyaṁ karma yat śubham* says Rāma, according to Vālmīki. Having come into this world of action one should perform good deeds. Vālmīki continues that the great sages have attained heaven through the performance of good deeds. It does not matter whether you are a *gṛhastha* or householder, *saṁnyāsin* or mendicant. Janaka was a householder, and sage Yājñavalkya was a wandering mendicant, *parivrājaka*. If we behave well, we will make the world a paradise ; if we misbehave we will turn it into hell.

Vyavasāyātmikā buddhir eke'ha kurunandana. The trained understanding is single-minded. Integrity refers to the quality of oneness. It does not mean alienation from the world. Religion does not mean other-worldiness, separating oneself from all created things. It is denial of egoism. Turning one's back on the world is a part of ascetic discipline which is not an end in itself. Liberation from the tyranny of time is not liberation from time. When we become spiritual in outlook we do not cease to be human.

The secret of true greatness is love of fellowmen. Love of neighbour is not only a moral duty but a wise policy. The right course today is co-operation and not conflict. "What merit is there in the goodness of a man who returns good for good? A good man verily is one who returns good for evil."[1] *Rāmarājya* or the Kingdom of God is the ideal for the human community. The one hope for the peoples of the world to get together is a change in the human heart.

Ethical standards are the only criteria for the distinction between high and low among men. Purity of conduct elevates a man even as impurity degrades him. All other distinctions are irrelevant. The *Chāndogya Upaniṣad* refers to *patitas.* The Cāṇḍālas are those given to stealing, drinking, adultery and murder. These four are fallen : *etc patanti catvāraḥ.*[2] A *patita,* a fallen man, is a wicked man, a small-minded selfish man, not an untouchable.

The caste distinctions may have had their value in another context of society but we have out-grown it.

---

1. *upakāriṣu yaḥ sādhuḥ sādhutve tasya ko guṇaḥ ।*
   apakāriṣu yaḥ sādhuḥ sa sādhuḥ sadbhir ucyate ॥

2. V. 10. 9.

The *Bhagavadgītā* speaks of the four-fold classification as based on *guṇa* (character) and *karma* (work).

We are all unregenerate at birth and become regenerate by our effort.

janmanā jāyate śūdraḥ
saṁskārād dvija ucyate ।

Some are advanced ; others not. We should give equal facilities to all. The *Mahābhārata* says that there was only one *varṇa* at the beginning and the four castes arose out of later developments.

ekavarṇam idaṁ pūrvaṁ viśvam āsīd yudhiṣṭhira ।
karma-kriyā-vibhedena cāturvarṇyaṁ pratiṣṭhitam ॥

But we have come to base caste on birth though some of our leading writers have held that it is not birth or learning but conduct alone that constitutes its basis ; for *dvijatva*,

vṛttam eva tu kāraṇam ।
vedapāṭhena vipras tu brahmajñānāt tu brāhmaṇaḥ ॥

It is not the colour of the skin but the conduct of the person that counts. The only way to progress is by means of good conduct. The *Saṁvarta-Smṛti* says :

sadācāreṇa devatvaṁ ṛṣitvaṁ vai tathaiva ca ।
prāpnuvanti kuyonitvaṁ manuṣyās tadviparyaye ॥

Great achievement is possible for each one of us.

Professor Kane brings out with great learning and lucidity the frequent changes our society has passed through. When Manu (I. 85) tells us that different customs prevailed in different ages he suggests that the social code is not a fixed but a flexible one.[1] Social

---

[1]. *anye kṛtayuge dharmās tretāyāṁ dvāpare 'pare* ।
anye kaliyuge nṛṇām

customs and institutions are subject to change. Yājñavalkya tells us that "one should not practise that which, though ordained by the *Smṛti*, is condemned by the people."[1] What appeals to one's conscience, *ātmanas tuṣṭiḥ*, the conscience of the disciplined, not of the superficial, the forms which the elect praise,[2] should be our standard.

Vital changes may be introduced in the habits of the people by *pariṣads* or assemblies of the learned. When such assemblies cannot be constituted even the decision of one learned in *dharma* will be authoritative. The *Āpastamba Dharmasūtra* says : *dharmajña-samayaḥ pramāṇam.*[3] People who are learned and compassionate, who are practical-minded can decide the issues of right and wrong. They are the conscience of the community. What we are doing by legislative enactments is consistent with our tradition.

PREFACE TO VOLUME V

The fourth volume of the *History of Dharmaśāstra* was published in October 1953, i.e. more than eight years ago. This last volume was in the Press for more than five years. The delay is due to several causes This volume in two parts contains over 1700 pages. It is thus far more bulky than any of the previous volumes. Nonavailability of sufficient quantity of good printing paper was another cause. The third cause was my age (I am now 82 years old) and frequent bad health. It is gratifying to my friends and myself that at last this undertaking spread over thirty-seven years is completed.

This volume is divided into ten sections. The first section deals with Vratas and Utsavas (religious vows and festivals); the second with Kāla (time), Muhūrta (auspicious times), and calendar; the third with Śāntis (propitiatory rites for averting the wrath of a deity, a calamity or unlucky event); the fourth and fifth with Purāṇas and Dharmaśāstra and the causes of the disappearance of Buddhism from India; the sixth with Tāntrik doctrines and Dharmaśāstra; the seventh with Mīmāṁsā and Dharmaśāstra; the eighth with Sāṅkhya, Yoga, Tarka and Dharmaśāstra; the ninth with cosmology, Karma and Punarjanma; the tenth with the fundamental conceptions and characteristics of Hindu (Bhāratīya) culture and civilization, and future trends.

In the Preface to the 2nd volume I have indicated the reasons for numerous and lengthy Sanskrit quotations. In the Preface to the 4th volume I have mentioned the aim I had in view in bringing together the facts

in each branch of Dharmaśāstra with detachment and integrity and without bias. The same aim and mental attitude have been kept in view in this volume also. But it may be argued that when an author selects some of the numerous facts he passes a judgement about the importance of facts and his judgement may be biased all the same. I do not dispute this argument, but will only argue that, facts being numerous and there being limitations imposed by the space available, the author has a right to pronounce a judgement as to the importance of the facts he selects.

As regards volumes two, three and four, I could rely on a tower of strength in the person of Paramahaṁsa Svāmī Kevalānanda Sarasvatī of Wai. But, unfortunately the Svāmī passed away in March 1955 before I began to write this last volume, and I could not get the benefit of his wise counsel in this fifth volume.

In this last volume I received help from many people, either personally or by correspondence. I have to thank Mr. M. B. Arte, Dr. R. N. Dandekar, and Prof. H. D. Velankar for help in translating important passages from several French and German works. Prof. Gode, Curator of the Bhandarkar Oriental Research Institute, Poona, was always ready to render help as to manuscripts and books. He had been a close friend for nearly forty years and his sudden death has meant for me the loss of a learned, sympathetic, and ever-obliging friend. Dr. A. D. Pusalker very carefully read the chapters on Purāṇas and indicated several misprints and some inaccurate statements. Dr. Raghavan very kindly brought to my notice the calendars in use in Southern India and certain works on Vratas ; Pandit Śrījīva Nyāyatīrtha sent me in Sanskrit the Naiyāyika view on Kāla; Miss Kunda Sathe (now Mrs. Savkar)

kindly sent me from Paris information from French scholars on Babylonian, Assyrian and Greek astronomy. I am highly obliged to Dr. B. S. Joshi for sending me microfilms of certain papers (not available in India) from Cambridge and Chicago. Prof. Durgamohan Bhattacharya kindly sent me a copy of the *Kāla-siddhānta-darśinī*. I am under deep obligations to Svāmī Kuvalayānanda of Lonavla for reading my chapter on Yoga and suggesting valuable changes and amendments. Prof. Zala gave me details about the Vratas observed in Saurāṣṭra. Prof. G. H. Bhatt (Baroda) and Mr. S. L. Katre (Curator, Scindia Institute, Ujjain) very kindly showed me the manuscript-wealth of their Institutes and helped me with the contents of several relevant mss. on Vratas and Kāla. Shri Padeśāstrī of Baroda discussed with me, personally and by correspondence, several points about Ancient Hindu Astronomy. MM. Dr. Umesh Mishra brought to my notice his edition of the *Vijñānadīpikā* of Padmapāda and Dr. H. G. Narahari wrote to me about the *Prārabdha-dhvānta-vidhvaṁsana* of Acyutarāya and sent me off-prints of his papers thereon. Mr. Shankarrao Joshi of the Bhārata Itihāsa Saṁśodhaka Maṇḍala of Poona helped me by bringing to my notice hand-written calendars more than two hundred years old. To all these I offer my best thanks. I am highly obliged to Mr. S. N. Savadi B. A. (HONS.) of the Bhandarkar Oriental Research Institute for help in the correction of the proofs of this volume. I have to thank Mr. P. M. Purandare, Advocate (O. S.), Bombay High Court, Tarkatīrtha Raghunāthaśāstrī Kokje of Lonavla, and Dr. Bhabatosh Bhattacharya for reading the printed sheets and making suggestions and pointing out misprints. Mr. N. G. Chapekar, in spite of his being now over 91 years of age, read some chapters when they were only typewritten, and discussed them personally

with me for some hours. To him I owe a deep debt of gratitude for having taken so much trouble at such a very advanced age. I am highly obliged to Dr. A. Ghosh, Director-General of the Archaeological Survey of India, and to the Librarian Mr. L. G. Parab and the staff of the Archaeological Library for rendering all help to me while I had been collecting material for this volume.

I cannot find words adequate enough to express my sense of deep gratitude to Dr. Radhakrishnan, now President of India, who has favoured me with many kindnesses during the last fourteen years. As for this volume of the *History of Dharmaśāstra*, in the midst of numerous engagements and heavy work, he found time to look into its last two chapters, made vital suggestions for their improvement, and finally contributed a learned Foreword.

I am aware that, in spite of so much help rendered by so many friends and well-wishers, this large volume might contain many mistakes, for which I alone am responsible. In the process of printing, some diacritical marks have either been elided or placed in wrong places, for which I seek the indulgence of all scholars and readers.

Lastly, I thank the Manager of the Aryabhushan Press of Poona for carrying out with energy and zeal the work of printing this very large volume bristling with thousands of quotations, in the face of great difficulties caused by shortage of paper, the Poona floods, and other unforeseen happenings.

Bombay, July 1962 P. V. Kane.

CHRONOLOGICAL TABLE

of some important works and authors.

referred to in vol. V.

N. B. Some dates, particularly of ancient works, are more or less conjectural.

4000 B. C.–1000 B. C.—The period of the Vedic Saṁhitās, Brāhmaṇas and Upaniṣads; some hymns of the Ṛgveda, of the Atharvaveda and verses in the Taittirīya Saṁhitā and Brāhmaṇas may possibly go back to a period earlier than 4000 B. C. and some of the Upaniṣads (even from among those that are regarded by most scholars as the earliest ones) may be later than 1000 B. C.. Some scholars have criticized me for assigning the Vedic Saṁhitās to such an early date as 4000 B. C. Bloomfield, in 'Religion of the Veda' (New York, 1908) was willing (on p. 20) to regard 2000 B. C. for the beginnings of Vedic literary productions and to assign a much earlier date for institutions and religious concepts which the Veda derived and he denies that there is any better proof for any later date such as 1500, 1200 or 1000 B. C. rather than for one of the earlier viz. 2000 B. C. Winternitz (in 'Some problems of Indian Literature' which are his Calcutta Readership Lectures, p. 20) remarks 'it is more probable that this unknown time of the Vedic Literature was nearer 2500 B. C. or 2000 B. C. than to 1500 or 1200 B. C.' Both Bloomfield and Winternitz frankly confess that they know nothing at all about the date of the early Vedic Literature. Some Western scholars are rather too cocksure or dogmatic than the facts warrant.

They mostly rely on comparisons with other extant Indo-Aryan literatures and conjectures, which is *not* proof.

800 B. C.–500 B. C—The Nirukta of Yāska.

800 B. C.–400 B. C.—The principal Śrauta sūtras (such as those of Āśvalāyana, Āpastamba, Baudhāyana, Kātyāyana and Satyāṣāḍha) and some of the Gṛhyasūtras (such as those of Āśvalāyana and Āpastamba) and Vedāṅga Jyotiṣa.

500 B. C.–300 B. C.—The Dharmasūtras of Gautama, Āpastamba, Baudhāyana and Vasiṣṭha and the Gṛhyasūtras of Pāraskara and a few others.

500 B. C.–300 B. C.—Pāṇini.

500 B. C.–200 B. C.—The Bhagavad-gītā.

400 B. C.–200 B. C.—The Pūrvmīmāṁsā-sūtra of Jaimini.

300 B. C.–200 B. C.—The Vārtikas of Vararuci Kātyāyana on Pāṇini's Grammar.

300 B. C.–100 A. D.—The Arthaśāstra of Kauṭilya (rather nearer the former date than the latter).

200 B. C.–100 A. D.—The Manusmṛti.

150 B. C.–100 A. D.—The Mahābhāṣya of Patañjali (rather nearer the former date than the latter).

100 B. C.–100 A. D.—Upavarṣa, author of a commentary on Pūrvamīmāṁsā and Vedāntasūtra.

100 B. C.–300 A. D.—Patañjali, author of Yogasūtra.

100 A. D.–300 A. D.—Yājñavalkya-smṛti and the Viṣṇudharmasūtra.

100 A. D.–400 A. D.—Nāradasmṛti.

200 A. D.–400 A. D.—Śabara, author of bhāṣya on P. M. S. (nearer the former date than the latter).

250 A. D.–325 A. D.—Sāṅkhyakārikā of Īśvarakṛṣṇa.

300 A. D.–500 A. D.—Bṛhaspatismṛti on Vyavahāra

and other topics (not yet found); extracts on Vyavahāra are translated in S. B. E. Vol. 33 and extracts from Bṛhaspatismṛti on many topics were collected by Prof. Rangaswami Aiyangar and published in a volume in G. O. S.

300 A. D.-600 A. D.—some of the extant Purāṇas such as Vāyu, Brahmāṇḍa, Viṣṇu, Matsya, Mārkaṇḍeya.

400 A. D.-500 A. D.—Māṭharavṛtti on Sāṅkhyakārikā.

400 A. D.-500 A. D.—The Yogasūtrabhāṣya of Vyāsa.

476 A. D.-Āryabhaṭa, author of Āryabhaṭīyam, was born.

500 A. D.-575 A. D.—Varāhamihira, author of Bṛhatsaṁhitā, Bṛhajjātaka, Pañcasiddhāntikā and other works.

550 A. D.-700 A. D.—Yuktidīpikā, com. on Sāṅkhyakārikā.

600 A. D.-650 A. D.—Bāṇa, author of the Kādambarī and Harṣacarita.

650 A. D.-660 A. D.—Kāśikā of Vāmana and Jayāditya, com. on Pāṇini's grammar (was composed)

650 A. D.-700 A. D.—Kumārilabhaṭṭa, author of Ślokavārtika, Tantravārtika, Ṭupṭīkā.

600 A. D.-900 A. D.—Most of the metrical smṛtis such as those of Parāśara, Śaṅkha and Devala and some of the Purāṇas like Viṣṇudharmottara, Agni, Garuḍa.

680 A. D.-725 A. D.—Maṇḍana (vide p. 1198 of vol. V).

700 A. D.-750 A. D.—Gauḍapāda, author of a commentary on Sāṅkhyakārikā and *paramaguru* (guru's guru) of Śaṅkarācārya.

700 A. D.-750 A. D—Umbeka; vide vol. V p. 1198

710 A. D.-770 A. D.—Śālikanātha (vide vol. V p. 1198)

788 A. D.–820 A. D.—Śaṅkarācārya, author of Bhāṣyas on the Gītā, principal Upaniṣads and V. S.

780 A. D.–870 A. D.—Utpala, the encyclopedic commentator on Varāhamihira's works.

790 A. D.–850 A. D.—Viśvarūpa, the commentator of Yājñavalkyasmṛti, author of Vārtika on the Bhāṣyas of Śaṅkarācārya on Bṛhadāraṇyakopaniṣad and the Taittirīyopaniṣad and of the Naiṣkarmyasiddhi; the same as Sureśvara (after he became a Sannyāsin).

820 A. D.–900 A. D.—Vācaspati, author of bhāṣya on Yogasūtra, author of Nyāyakaṇikā, Tattvasamīkṣā, Bhāmatī (in all 7 works).

825 A. D.–900 A. D.—Medhātithi, author of bhāṣya on the Manusmṛti.

900 A. D.–1100 A. D.—Pārthasārathimiśra, author of Śāstradīpikā, Tantraratna, Nyāyaratnākara.

1005 A. D.–1055 A. D.—Dhāreśvara Bhoja, author of numerous works such as the Rājamārtaṇḍa (on astrology), Yuktikalpataru, Rājamārtaṇḍa (a commentary on Yogasūtra).

1050 A. D.–1150 A. D.—Bhavanātha or Bhavadeva, author of Nayaviveka.

1080 A. D.–1100 A. D.—Vijñāneśvara, author of Mitākṣarā, commentary on Yāj.

1100 A. D.–1130 A. D.—Lakṣmīdhara, author of a very extensive digest on Dharmaśāstra called Kalpataru or Kṛtyakalpataru.

1100 A. D.–1130 A. D.—Aparārka, a Śilāhāra king, author of an extensive commentary on Yāj.

1100 A. D.–1150 A. D.—Jīmūtavāhana, author of Dāyabhāga, Kālaviveka and Vyavahāramātṛkā.

1127 A. D.–1138 A. D.—Mānasollāsa or Abhilaṣitārthacintāmaṇi of Someśvaradeva.

1114 A. D.–1183 A. D.—Bhāskarācārya, author of Siddhāntaśiromaṇi (born in 1114 A. D.).

1150 A. D. - 1160 A. D.—Rājataraṅgiṇī of Kalhaṇa (composed between these dates).

1150 A. D.–1180 A. D.—Aniruddhabhaṭṭa, author of Hāralatā and Pitṛdayitā and *guru* of Ballālasena, king of Bengal.

1158 A. D.–1183 A. D.—Ballālasena (king of Bengal who composed five works of which two are available and printed viz. Adbhutasāgara (begun in 1168 A. D.) and the Dānasāgara composed in 1169 A. D.

1150 A. D.–1300 A. D.—Haradatta, commentator of Dharmasūtras of Gautama and Āpastamba and of some Gṛhyasūtras.

1150 A. D.–1300 A. D.—Kullūka, commentator of Manusmṛti.

1200 A. D.–1225 A. D.— Smṛticandrikā of Devaṇṇabhaṭṭa.

1260 A. D.–1270 A. D.—Caturvargacintāmaṇi of Hemādri (composed between these dates).

1275 A. D.–1310 A. D.—Śrīdatta, author of Pitṛbhakti, Samayapradīpa and other works.

1300 A. D.–1370 A. D.—Caṇḍeśvara, author of Gṛhastharatnākara, Kṛtyaratnākara, Vyavahāraratnākara and other works.

1300 A. D.–1386 A. D.—Mādhavācārya, author of Jaiminīyanyāyamālāvistāra, Parāśaramādhavīya and other works.

1300 A. D.–1386 A. D.—Sāyaṇa, author of bhāṣyas of Vedic Saṁhitās and Brāhmaṇas.

1360 A. D.–1390 A. D.—Madanapārijāta and Mahārṇavaprakāśa compiled under king Madanapāla and his son.

1360 A. D.–1448 A. D.—These are the dates of the

birth and death of Vidyāpati, author of Gaṅgāvākyāvali and other works, patronized by several kings of Mithilā.

1375 A. D.–1450 A. D.—Śūlapāṇi, author of Dīpakalikā, Tithiviveka, Ekādaśīviveka and several works on topics of Dharmaśāstra called Vivekas.

1425 A. D.–1450 A. D.—King Madanasiṁha, completed a large digest called Madanaratna.

1375 A. D.–1500 A. D.—Digest composed by Pṛthvīcandra, son of Nāgamalla, called Dharmatattvasudhānidhi.

1400 A. D.–1450 A. D.—Nyāyasudhā of Someśvara, a commentary on Tantravārtika.

1425 A. D.–1460 A. D.—Rudradhara, author of Varṣakṛtya, Śuddhiviveka and other works.

1425 A. D.–1490 A. D.—Vācaspati, author of Kṛtyacintāmaṇi and numerous works called Cintāmaṇi and some works called Nirṇaya (e. g. Tithinirṇaya).

1440 A. D.–1500 A. D.—Vardhamāna, author of Daṇḍaviveka, Gaṅgākṛtyaviveka and other works.

1513 A. D.–1580 A. D.—Nārāyaṇabhaṭṭa, author of Tristhalīsetu, Prayogaratna etc.

1520 A. D.–1575 A. D.—Raghunandana, author of many works called Tattvas, such as Tithitattva, Ekādaśītattva etc.

1554 A. D.–1626 A. D.—Appayyadīkṣita, author of Vidhirasāyana and numerous works on different śāstras and topics (vide p. 1199 above).

1560 A. D.–1620 A. D.—Śaṅkarabhaṭṭa, son of Nārāyaṇabhaṭṭa and author of Dvaitanirṇaya, Mīmāṁsābālaprakāśa and other works.

1590 A. D.–1630 A. D.—Nandapaṇḍita, author of Dvaitanirṇaya, Vaijayantī (commentary on Viṣṇudharmasūtra).

1600 A. D.–1665 A. D.—Khaṇḍadeva, author of Bhāṭṭa-kaustubha and Bhāṭṭadīpikā.

1610 A. D.–1640 A. D.—Time of literary activity of Kamalākarabhaṭṭa, author of Nirṇayasindhu, Śūdra-kamalākara and many other works.

1610 A. D.–1640 A. D.—Mitramiśra, author of a huge digest called Vīramitrodaya on tīrtha, pūjā, samaya and many other topics of Dharmaśāstra.

1615 A. D.–1645 A. D.—Time of literary activity of Nīlakaṇṭha, son of Śaṅkarabhaṭṭa, and author of a digest on topics of Ācāra, Saṁskāra, Vyavahāra etc.

1620 A. D.–1690 A. D.—Viśveśvara, alias Gāgābhaṭṭa, author of Bhāṭṭacintāmaṇi and other works.

1645 A. D.–1675 A. D.—Probable period of the literary activity of Anantadeva, author of a large digest called Smṛtikaustubha.

1700 A. D.–1740 A. D.—Smṛtimuktāphala of Vaidyanātha.

1670 A. D.–1750 A. D.—Nāgeśa or Nāgojibhaṭṭa, an encyclopædic writer on Grammar, Poetics, Dharmaśāstra, Yoga and other Śāstras (about 47 works).

1790 A. D.—date of the composition of the Dharmasindhu by Kāśīnātha Upādhyāya.

1730 A. D.–1820 A. D.—Bālambhaṭṭa, author of a commentary called Bālambhaṭṭī on the Mitākṣarā.

ABBREVIATIONS

used in vol. V for works in English and Sanskrit.

On pp. 251–252 there is a list of abbreviations meant for the list of Vratas alone. Many of them will be included in this list also.

A. B. O. R. I. = Annals of the Bhandarkar Oriental Research Institute, Poona.

AIHT = "Ancient Indian Historical Tradition" by Pargiter.

Ait. Br. = Aitareya-brāhmaṇa.

A. I. O. C. = All India Oriental Conference.

A. K. = Ahalyā-kāmadhenu (ms.)

Āp Dh. S. = Āpastambadharmasūtra.

Āp. Śr. S. = Āpastamba Śrautasūtra.

Āśv. Gṛ. = Āśvalāyana Gṛhya-sūtra.

A. S. W. I. = Archaeological Survey of Western India Reports.

B. D. C. R. I. = Bulletin of the Deccan College Research Institute, Poona.

B. E. = 'Buddhist Esoterism' by Dr. B. Bhattacharya.

B. E. F. E. O. = Bulletin de L'Ecole Francaise D' Extreme-Orient.

B. G. = Bombay Gazetteer Volumes.

B. G. S. = Bombay Government Series.

Bhav. U. = Bhaviṣyottara-purāṇa.

B. I. = Bibliotheca Indica Series.

B. O. R. I. = Bhandarkar Oriental Research Institute, Poona.

Br. = Brāhmaṇa (class of works).

Bṛ. S. = Bṛhat-saṁhitā of Varāhamihira.

Bṛ. Up. = Bṛhadāraṇyaka Upaniṣad.

B. V. = Bhāratīya Vidyā, Journal, Bombay.

C. I. I. = Corpus Inscriptionum Indicarum; Vol. I Aśoka Inscriptions; Vol. II Kharoṣṭhī Inscriptions; Vol. III Gupta Inscriptions; Vol. IV Kalacūri Inscriptions.

C. R. C. = Calendar Reform Committee (Report of).

D. C. = Deccan College.

E. I. = Epigraphia Indica (Volumes).

E. R. E. = Encyclopaedia of Religion and Ethics in 12 volumes.

E. S. A. = ' Exact Sciences in Antiquity ' by Prof. Neugebauer (1951).

Gaut. or Gautama = Gautama-dharmasūtra.

G. K. = Kālasāra of Gadādhara.

G. O. S. = Gaikwad's Oriental Series (Baroda).

H. = Prof. Hazra.

H. of Dh. or H. Dh. = History of Dharmaśāstra, Vols. I–V.

H. O. S. = Harvard Oriental Series.

H. P. or H. Y. P. = Haṭhayogapradīpikā.

H. V. = Hemādri on Vratas.

I. A = Indian Antiquary (Journal) or Law Reports, Indian Appeals (context will clearly show which is meant).

I. H. Q. = Indian Historical Quarterly (Journal).

Jai. = Jaimini or Jaimini's Pūrvamīmāṁsā-sūtra.

J. A. O. S = Journal of the American Oriental Society.

J. A. S. or J. A. S. B. = Journal of the Asiatic Society of Bengal.

J. B. A. S. = Journal of the Asiatic Society, Bombay.

J. B. B. R. A. S. = Journal of the Bombay Branch of the Royal Asiatic Society.

J. B. H. U. = Journal of the Benaras Hindu University

J. B. O. R. S. = Journal of the Bihar and Orissa Research Society.

J. B. R. S. = Journal of the Bihar Research Society.

J. G. J. R. I. = Journal of the Ganganath Jha Research Institute, Allahabad.

J. I. H. = Journal of Indian History.

Jiv. = Jivananda's edition in two volumes of Raghunandana's Tattvas.

J. N. = Jayantīnirṇaya.

J. U. P. H. S. = Journal of United Provinces Historical Society.

J. O. R. = Journal of Oriental Research, Madras.

J. R. A. S. = Journal of the Royal Asiatic Society of Great Britain.

J. V. O. T. = Journal of Venkatesvara Oriental Institute

K. N. = Kālanirṇaya of Mādhava.

K. R = Kṛtyaratnākara of Caṇḍeśvara.

K. S. S. = Kashi Sanskrit Series.

K. T. = Kṛtyatattva.

K. T. V. = Kālatattvavivecana.

K. V. = Kālaviveka.

M. B. P. = Mīmāṁsā-bāla-prakāśa.

M. C. = Muhūrta-cintāmaṇi.

M. L. J. = Madras Law Journal.

Mit. = Mitākṣarā, commentary on Yājñavalkya-smṛti.

M. M. = Mahāmahopādhyāya (title conferred on learned men).

M. M. = Muhūrtamārtaṇḍa (a work).

Nir. or. Nirṇ. = Nirṇayasāgara Press edition.

N. I. A. = New Indian Antiquary (a journal).

N. S. = Nirṇayasindhu.

Pār. Gṛ. = Pāraskara-gṛhya-sūtra.

P. C. = Puruṣārtha-cintāmaṇi.

Ph. Up. = Philosophy of the Upanishads by Paul Deussen, translated by A. S. Geden.

P. M. = Pūrvamīmāṁsā.

P. M. S. = Pūrvamīmāṁsā-śāstra or sūtra (according to context).

P. O. = Poona Orientalist (journal).

P. R. H. R. = Studies in Purāṇik Records on Hindu rites and customs (collection of 16 papers by Prof. Hazra).

Ṛg. = Ṛgveda.

R. M. = Rājamārtaṇḍa of Bhoja (Ms. in B. O. R. I.).

R. N. P. = Rājanītiprakāśa of Caṇḍeśvara.

Śāṅ. Śr. S. = Śāṅkhāyana-śrauta sūtra.

Śat. Br. = Śatapatha Brāhmaṇa (ed. by Weber).

S. B. E. = Sacred Books of the East Series (ed. by MaxMuller).

S. M. = Samayamayūkha of Nīlakaṇṭha.

Sm. C. = Smṛti-candrikā (ed. by Mr. Gharpure).

Sm. K. = Smṛtikaustubha.

Tai. Ā. or T. A. = Taittirīya Āraṇyaka.

Tai. Br. = Taittirīya Brāhmaṇa.

Tai. S. or T. S. = Taittirīya-Saṁhitā.

Tai. Up. = Taittirīya Upaniṣad.

T. S. S. = Trivandrum Sanskrit Series.

T. T. = Tithitattva of Raghunandana.

U. = Upapurāṇa.

Up. = Upaniṣad.

Vāj. S. = Vājasaneya Saṁhitā.

Var. = Varāhapurāṇa.

Varāha = Varāhamihira.

V. Dh. or Viṣṇu Dh. S. = Viṣṇudharmasūtra.

Vi. Dh. = Viṣṇu-Dharmottara-purāṇa.

V. K. K. = Varṣa-kriyā-kaumudī.

V. K. R. = Varṣakṛtya of Rudradhara.

V. S. = Vedāntasūtra of Bādarāyaṇa.

Y. S. = Yogasūtra.

Yāj. = Yājñavalkya-smṛti.

अ. का.
अ. का. धे. } = अहल्याकामधेनु (Ms. in Scindia Institute, Ujjain)

अग्नि.
अग्निपु. } = अग्निपुराण (आनन्दाश्रम ed.)

अथर्व. = अथर्ववेद (ed. by Pandit Satavalekar)

अपरार्क. = Com. of, on या. स्मृति (आनन्दाश्रम ed.)

अ. सा. = अद्भुतसागर of बल्लालसेन (Calcutta, 1905)

आप. गृ. = आपस्तम्बगृह्यसूत्र

आप. ध. सू. = आपस्तम्बधर्मसूत्र

आप. श्रौ. = आपस्तम्बश्रौतसूत्र

आश्व. गृ. = आश्वलायनगृह्यसूत्र

आश्व श्रौ.
आश्व. श्रौ. सू. } = आश्वलायनश्रौतसूत्र

ऋ. = ऋग्वेद

ए. त. = एकादशीतत्त्व

ऐ. ब्रा. = ऐतरेयब्राह्मण

कल्प.
कल्पतरु. } = कृत्यकल्पतरु of लक्ष्मीधर (separate volumes on गृहस्थ, नैयतकाल, मोक्ष, व्रत etc.) ed. in G. O. S.

का. त. वि. = कालतत्त्वविवेचन

का. नि. = कालनिर्णय of माधवाचार्य

का वि. = कालविवेक of जीमूतवाहन

कृ. त. = कृत्यतत्त्व of रघुनन्दन

कृ. र.
कृत्यर. } = कृत्यरत्नाकर of चण्डेश्वर (B. I. Series)

कौ. ब्रा. = कौषीतकिब्राह्मण

गरुड = गरुडपुराण

गौ.
गौ. ध. सू.
गौतम } = गौतमधर्मसूत्र (आनन्दाश्रम ed. with com. of हरदत्त)

छा.
छा. उ. } = छान्दोग्योपनिषद्

जै. = पूर्वमीमांसासूत्र of जैमिनि (आनन्दाश्रम ed.)

ति. त. = तिथितत्त्व of रघुनन्दन

तै. आ. = तैत्तिरीयारण्यक

तै. उ.
तै. उप. } = तैत्तिरीयोपनिषद्

तै. ब्रा. = तैत्तिरीयब्राह्मण (आनन्दाश्रम ed.)

तै. सं. = तैत्तिरीयसंहिता (ed. by Pandit Satavalekar)

दुर्गार्च॰
दुर्गार्चन॰ } = दुर्गार्चनपद्धति of रघुनन्दन

दु. भ. त. = दुर्गाभक्तितरङ्गिणी of विद्यापति (ed. at Darbhanga, 1900)

द्वै. नि. सि. सं. = द्वैतनिर्णयसिद्धान्तसंग्रह

ध. सि. = धर्मसिन्धु of काशीनाथ (ed. of 1926, with Marathi translation) Nir. ed.

नि. सि. = निर्णयसिन्धु (with Marathi translation) Nir. ed.

न्यायमञ्जरी = Kashi S. Series

पञ्चसि. = पञ्चसिद्धान्तिका of वराहमिहिर (ed. by Thibaut and Dwivedi)

पद्म॰
पद्मपु. } = पद्मपुराण (आनन्दाश्रम ed.)

परा. मा. = पराशरमाधवीय (Bombay S. Series)

पा. = पाणिनि's अष्टाध्यायी

पु. चि. = पुरुषार्थचिन्तामणि

प्राय. त. = प्रायश्चित्ततत्त्व of रघुनन्दन

प्राय. म. = प्रायश्चित्तमयूख of नीलकण्ठ

बृह. उ.
बृह. उप. } = बृहदारण्यकोपनिषद्

बृहत्सं. = बृहत्संहिता of वराहमिहिर (ed. by Kern, only text; by सुधाकर द्विवेदिन्, with com. of उत्पल. There is a difference of one chap. between the two editions).

बृहद्योगि. = बृहद्योगियाज्ञवल्क्य (ed. by स्वामी कुवलयानन्द of Lonavla)

बौ. गृ. = बौधायनगृह्यसूत्र

ब्रह्म
ब्रह्मपु. } = ब्रह्मपुराण (आनन्दाश्रम ed.)

भविष्य = भविष्यपुराण

मद. पा. = मदनपारिजात (B. I. Series)

मनु = मनुस्मृति (Nirn. ed.)

मार्क. = मार्कण्डेयपुराण (Venk. ed. and Cal. ed. differ by two or three chapters)

मिता. = मिताक्षरा (टीका on याज्ञ. स्मृति, Nirn. ed.)

मी. प. = मीमांसापरिभाषा of कृष्णयज्वन् (निर्णय. ed.)

मी. वा. प्र. = मीमांसावालप्रकाश of शङ्करभट्ट (Chowkhamba Sanskrit Series)

मु. चि. = मुहूर्तचिन्तामणि

मेधा. = मेधातिथि's commentary on मनुस्मृति

मै. सं = मैत्रायणीसंहिता (ed. by Pandit Sātavalekar)

या.
याज्ञ. } = याज्ञवल्क्यस्मृति (निर्णयसागर ed. with मिताक्षरा)

यो. सू. = योगसूत्र

रा. मा. = राजमार्तण्ड of भोज

व. क्रि. कौ. = वर्षक्रियाकौमुदी of गोविन्दानन्द (B. I. ed.)

वन. = वनपर्व (of महाभारत)

वराह. = वराहमिहिर or वराहपुराण acc. to context

वाज. सं. = वाजसनेयसंहिता (ed. by Pandit Sātavaḷekar)

वामन° = वामनपुराण

वि. दी. = विज्ञानदीपिका

वी. मि. = वीरमित्रोदय of मित्रमिश्र

वे. सू. = वेदान्तसूत्र of बादरायण with शाङ्करभाष्य (निर्णय. ed.)

व्य. म. = व्यवहारमयूख of नीलकण्ठ

व्र. का. वि. = व्रतकालविवेक

व्रत. प्र.
व्र. प्र. } = व्रतप्रकाश, part of वीरमित्रोदय

शत. ब्रा.
शतपथ } = शतपथ ब्राह्मण (ed. by Weber)

शां. ब्रा. = शाङ्खायन ब्राह्मण

शां. श्रौ. = शाङ्खायन श्रौतसूत्र

शुद्धिकौ. = शुद्धिकौमुदी of गोविन्दानन्द (B. I. ed.)

श्वे. उप. = श्वेताश्वतरोपनिषद्

सं. कौ. = संस्कारकौस्तुभ of अनन्तदेव (Baroda ed. 1914)

स. प्र. = समयप्रकाश (part of वीरमित्रोदय)

स. म. = समयमयूख (Gujarati Press ed.)

सि. कौ. = सिद्धान्तकौमुदी of भट्टोजिदीक्षित (निर्णय. ed.)

स्कन्द. = स्कन्दपुराण (Venk. Press ed.)

स्मृतिकौ. = स्मृतिकौस्तुभ of अनन्तदेव

स्मृतिच. = स्मृतिचन्द्रिका (ed. by Mr. Gharpure)

ह. यो. प्र. = हठयोगप्रदीपिका

हे. = हेमाद्रि, author of चतुर्वर्गचिन्तामणि (B. I. ed.) on व्रत, काल, श्राद्ध, दान etc.

BRIEF SYNOPSIS OF THE CONTENTS OF VOLUME V

Pages

Section I. Vratas (religious vows) and Utsavas (religious festivals) *1–462*

Chapter I. Vrata in the Ṛgveda. 1–21

Chapter II. Vrata in the Vedic Literature, Sūtras, Smṛtis, definition and importance of Vratas. 22–50

Chapter III. Persons entitled to engage in Vratas, objects desired by means of Vratas, classifications of Vratas, Literature on Vratas, times for Vratas. 51–80

Chapter IV. Individual vratas, Caitra Pratipad, Rāmanavamī, Akṣayya-tṛtīyā, Paraśurāmajayantī, Daśaharā, Sāvitrīvrata. 81–94

Chapter V. Ekādaśī. 95–121

Chapter VI. Cāturmāsya. 122–123

Chapter VII. Vratas called Nāgapañcamī, Manasāpūjā, Rakṣābandhana, Kṛṣṇajanmāṣṭamī 124–143

Chapter VIII. Vratas of Haritālikā, Gaṇeśacaturthī, Ṛṣipañcamī, Anantacaturdaśī. 144–153

Chapter IX. Navarātra or Durgotsava. 154–187

Chapter X. Vijayādaśamī and Divāḷī. 188–210

Chapter XI. Makarasaṅkrānti and Mahāśivarātri. 211–236

Chapter XII. Holikā and Grahaṇa (Eclipses) 237–250

Chapter XIII. List of other Vratas and Utsavas. 251–462

Section II. Kāla, Muhūrta, the influence of Astrology on Dharmaśāstra and Calendar 463–718

Chapter XIV. Conception of Kāla (Time) 463–485

Chapter XV. Units of Kāla. 486–536

Chapter XVI. Muhūrta. 537–603

Chapter XVII. Muhūrtas for religious rites 604–640

Chapter XVIII. Calendar, eras, various reckonings about years, months etc. 641–685

Chapter XIX. Kalpa, Manvantara, Mahāyuga, Yuga. 686–718

Section III. Śānti (propitiatory rite for averting the deity's wrath, a calamity or an unlucky event. 719–814

Chapter XX. Vedic meaning and procedure of Śāntis. 719–747

Chapter XXI. Individual Śāntis. 748–814

Section IV. Purāṇas and Dharmaśāstra. 815–912

Chapter XXII. Origin and development of Purāṇa literature. 815–886

Chapter XXIII. Brief notes on individual Purāṇas and Upapurāṇas. 887–912

Section V. Purāṇas and disappearance of Buddhism. 913–1030

Chapter XXIV. Influence of Purāṇas on Dharmaśāstra. 913–1002

Chapter XXV. Causes of the disappearance of Buddhism from India. 1003–1030

Section VI. Tāntrik doctrines and Dharmaśāstra, Nyāsa, Mudrā, Yantra, Cakra, Maṇḍala. 1031–1151

Chapter XXVI. Tāntrik doctrines and Dharmaśāstra 1031–1119

Chapter XXVII. Nyāsas, Mudrās, Yantra, Cakra, Maṇḍala and Appendix on Works on Tantra. 1120–1151

Section VII. Pūrvamīmāṁsā and Dharmaśāstra. 1152–1351

Chapter XXVIII. Mīmāṁsā and Dharmaśāstra. 1152–1201

Chapter XXIX. Some fundamental doctrines of Pūrva-mīmāṁsā. 1202–1282

Chapter XXX. On Mīmāṁsā principles and rules of interpretation in relation to Dharmaśāstra; appendix on Nyāyas. 1283–1351

Section VIII. Relation of Sāṅkhya, Yoga and Tarka to Dharmaśāstra. 1352–1482

Chapter XXXI. Dharmaśāstra and Sāṅkhya. 1352–1384

Chapter XXXII. Yoga and Dharmaśāstra. 1385–1467

Chapter XXXIII. Tarka and Dharmaśāstra. 1468–1482

Section IX. Cosmology and the doctrine of Karma and Punarjanma. 1483-1612

Chapter XXXIV. Cosmology. 1483–1529

Chapter XXXV. The doctrine of Karma and Punarjanma. 1530-1612

Section X. The fundamental conceptions and characteristics of Hindu (Bhāratīya) Culture and civilization from Vedic Times to about 1800 A.D., and future trends 1613-1711

Chapter XXXVI. Fundamental and leading characteristics and conceptions of Hindu culture and civilization. 1613-1657

Chapter XXXVII. Future trends. 1658-1711

Epilogue; Acknowledgments and Thanks. I-XXII

References to pages of important works consulted

In former volumes lists of important works consulted were set out at length. It is not necessary to do this in this volume because in each section lists of important Sanskrit works and English works and papers have been provided. Therefore, all that need be done is to bring together the pages of this volume where such lists are mostly mentioned.

Section		Works in Sanskrit pp.	Works and papers in English pp.
I.	Vrata	59, 251–52	60
II.	*Kāla* Astronomy and Mathematics. Works on Jātaka and Muhūrta.	556–559, 585, 591–594, 611–12, 616–17	483–485, 565–66, 570–71, 581–82, 585, 594–600, 644–646
III.	Śāntis	749, 752–53, 763, 779–781, 790, 805–06	735n, 782
IV.	Purāṇas	867–869	843–845, 849, 852, 864ff, 883, 886, 909, 941–42 (on Buddhism)
V.	Purāṇas pp. 913–1033	952, 957–958 (on bhakti), 998 (on Avatāras)	969, 978, 1003 and 1008–9 (on Buddhism and causes of its disappearance from India)

Section	Works in Sanskrit pp.	Works and papers in English pp.
VI. Tantra (1033–1151)	1050–51 1140–1147	1040, 1048n (Śākta doctrines) 1148–1151
VII. Mīmāṁsā and Dharmaśāstra	1188–89 1197–1200	1200–1201
VIII. Relation of Sāṅkhya, Yoga, Tarka to Dharmaśāstra (1352–1482)		
Sāṅkhya (1352–1384)		1353n
Yoga	1394	1392–1394 1455–1456
IX. Cosmology, Karma and Punarjanma		
Cosmology (1483–1529)		1485n, 1502
Karma and Punarjanma (pp. 1530–1612)	1599–1604	1604–5
X. Fundamental conceptions and characteristics of Hindu Culture and Civilization (1613–1657)	1624, 1627–31, 1642, 1646, 1649	1618, 1648n, 1650n 1653–1657
Future trends	1704–5, 1707–11	1659–1661, 1666, 1675–76, 1683, 1695–96, 1711

CORRECTIONS

Mistakes that can be easily detected and misprints due to the loss or displacement of such loose parts as *anusvāras* or *mātrās* or diacritical dots (as under ṭ) that can be easily detected have generally not been included in this list.

SECTION III

ŚĀNTI (Propitiatory rites for averting a deity's wrath, a calamity or unlucky event).

CHAPTER XX

Vedic meaning and procedure of Śāntis

The word Śānti is derived from the root 'śam', which has several meanings (such as 'to stop', 'to be appeased', 'to kill' rarely) and belongs to the 4th conjugation and also to the 9th. The word Śānti itself does not occur in the Ṛgveda, but it occurs in the Atharvaveda and the Vājasaneya Saṁhitā. The root 'śam', its several forms and derivatives and the indeclinable particle 'śam' occur hundreds of times even in the Ṛgveda. The word 'śam' is often conjoined in the Ṛgveda to 'yoḥ' either as 'śaṁyoḥ' (Ṛg. I. 93.7, I. 106.5, III 17.3, III. 18.4, IV. 12.5, V. 47.7, V. 53.14, V. 69.3, VI. 50.7, VII. 35.1, VII. 69.5, X. 9.4, X. 15.4, X. 37.11, X. 182.1–3) or as 'śam ca yośca' (as in Ṛg. I. 114.2, 189.2, II. 33.13, VIII. 39.4, VIII. 71.15). In these places the words are generally rendered as 'happiness and welfare' or 'health and wealth' (by Keith in translation of Tai. S. II. 6.10.3) and these meanings generally suit the context, e. g. in Ṛg. VI. 50.7 'dhāta tokāya tanayāya śaṁ yoḥ' (confer on our sons and progeny happiness and welfare), in Ṛg. X. 182 the words 'athā karad-yajamānāya śaṁ yoḥ' (may Bṛhaspati confer happiness and welfare on the sacrificer) occur as the last quarter of all the three verses. 'Śam' by itself occurs about 160 times in the Ṛgveda and it is somewhat remarkable that in Ṛg. VII. 35. 1–13 [1132] the word śam occurs in each verse from 4 to 7 times (68 times in all). Ṛg. I. 114. 1 [1133] 'we bring these lauds to Rudra who is powerful, who has braided hair, who rules over valiant men, so that there may result welfare to our two-footed and four-footed beings and every thing in this village may be prosperous and free from distress' will bring out the import of

---

1132. Verses 1–10 of Ṛg. VII. 35 are the same as Atharva 19.10 1–10.

1133. इमा रुद्राय तवसे कपर्दिने क्षयद्वीराय प्र भरामहे मतीः। यथा शमसद् द्विपदे चतुष्पदे विश्वं पुष्टं ग्रामे अस्मिन्ननातुरम्॥ ऋ. I. 114. 1.

'śam'. In some cases 'śam' and 'yoḥ' clearly appear to be employed like nouns in the objective case. For example, Rg. II. 33. 13[1134] "I hanker after the 'sam' and 'yoḥ' of Rudra (i. e. under the power of Rudra), Rg. I. 114.2 "O Rudra! may we secure by your guidance that 'śam' and 'yoḥ' that father Manu procured through sacrifice". Yāska (Nirukta IV. 21) while dealing with Rg. X. 15. 4 'athā naḥ śam yor-arapo dadhāta' holds 'śamyoḥ' to be ablative or genitive of śaṁyu and explains as 'śamanam ca rogāṇām yāvanam ca bhayānām' (allaying of diseases and warding off of dangers). This is an etymological explanation and is in some cases accepted by Sāyaṇa and in others he paraphrases 'śam' by 'sukha' (happiness) and 'yoḥ' as 'duḥkha-viyoga' (freedom from pain or distress). The word 'yoḥ' presents the appearance of the ablative or genitive singular of a noun from the root 'yu' which means 'to bind' or 'separate' or from 'yā' to go. 'Yoḥ' by itself occurs only three times in the Rgveda (i. e. in I. 74. 7, X. 105. 3, X. 176. 3). The meaning of 'yoḥ' in these three cases is doubtful. In the Tai. Br.[1135] we have the mantra 'we choose that happiness and welfare and success (or progress) to the sacrifice and the sacrificer; may divine fortune be ours; let there be good fortune for (our) men; may medicine (or remedy) go up; may there be happiness to our men and quadrupeds'.

In Atharvaveda 19. 9 the word śānti occurs about 17 times. In verses 3 to 5 speech (vāk), the mind (manaḥ)[1136] and the five senses are referred to and it is said that these seven usually produce what is *ghora* (terrible or inauspicious) and these same must exert themselves for producing śānti (i. e. appeasement of angered deities or averting calamities or misfortunes). Verses 6–11 pray to several gods, planets (grahāḥ), the earth, falling stars, cows, the nakṣatras, magical rites, Rāhu, Dhūmaketu (comets), the Rudras, Vasus and Ādityas, sages and Bṛhaspati to confer happiness. Verse 12 prays to Indra, Brahmā, and all

---

1134. शं च योश्च रुद्रस्य बह्मि। ऋ. II. 33. 13; यच्छं च योश्च मनुरायेजे पिता तदश्याम तव रुद्र प्रणीतिषु॥ ऋ. I. 114. 2.

1135. तच्छंयोरावृणीमहे। गातुं यज्ञाय। गातुं यज्ञपतये। दैवी स्वस्तिरस्तु नः। स्वस्तिर्मानुषेभ्यः। ऊर्ध्वं जिगातु भेषजम्। शं नो अस्तु द्विपदे शं चतुष्पदे॥ तै. ब्रा. III. 5. 11. This is partly explained in तै. सं. II. 6. 10. This is called शंयुवाक. Vide पा. I. 4. 29 on which the first वार्तिक is 'अनुवाकादयः पुंसि' and पतञ्जलि cites 'अनुवाकः शंयुवाकः सूक्तवाकः' as examples.

1136. इमानि यानि पञ्चेन्द्रियाणि मनःषष्ठानि मे हृदि ब्रह्मणा संशितानि। तैरेव सहुजे घोरं तैरेव शान्तिरस्तु नः॥ अथर्व. 19. 9. 5.

the gods for refuge to the composer of the hymn and 13 declares that 'whatever things were appeased (by śāntis) in this world—these the seven sages know. May they all be happiness for me; may happiness be mine and may freedom from fear be mine'. Verse 14 which is similar to Vāj. S. 36. 17 declares that 'the earth, mid-regions, heaven, waters, trees and plants, all gods-these have become appeased and auspicious by the śānti rites performed by the composer and that by those śāntis, by all śāntis I (we) appease (remove the evil effect of) what is here terrible, what is cruel (or inauspicious), what is evil; may all that be appeased, be beneficial and happy for us'.[1137] Atharva 19. 10 (verses 1–10) contains the word 'śam' 51 times and prays for welfare to several gods and 19. 11 is also a śānti containing the word 'śam' 18 times. The Vājasaneya-saṁhitā chapter 36 (verses 8–12) similarly contain the word 'śam' several times. One of these viz. (Vāj. S. 36. 12) occurs in many Vedic texts[1138] 'May the divine waters confer on us happiness, help and protection; may they flow towards us for our our happiness and welfare'.

In the Tai. S. the words 'śamayati' and 'śānti' are frequently used often in the same passage or context. For example, it is said "Rudra[1139] is the fierce (or harsh) one among gods...; He (the priest) does as it were a harsh thing when he recites (that passage containing the word) Rudra; 'in the path of Mitra' he says for the sake of appeasing". There is a similar passage in the Ait. Br. While prescribing the recital of a ṛk verse (Rg. II. 33. 1) in the Āgnimāruta-śastra the Ait. Br. changes the original words of the latter half of the verse in the Rgveda and also suggests another verse altogether for recital

---

1137. ताभिः शान्तिभिः सर्वशान्तिभिः शमयामोऽहं यद्विह घोरं यदिह क्रूरं यद्विह पापं तच्छान्तं तच्छिवं सर्वमेव शमस्तु नः॥ अथर्व 19. 9. 14.

1138. शं नो देवीरभिष्टय आपो भवन्तु पीतये। शं योरभि स्रवन्तु नः॥ वाज॰ सं. 36. 12, ऋ. X. 9. 4, अथर्व I. 6. 1, सामवेद 33. तै. ब्रा. I. 2. 1, 1.

1139. रुद्रस्त्वावर्तयत्वित्याह। रुद्रो वै क्रूरो देवानां...क्रूरमिव वा एतत्करोति यद्रुद्रस्य कीर्तयति मित्रस्य पथेत्याह शान्त्यै। तै. सं. VI. 1. 7. 7–8; The original ṛk is आ ते पितर्मरुतां सुम्नमेतु मा नः सूर्यस्य सन्दृशो युयोथाः। अभि नो वीरो अर्वति क्षमेत प्र जायेमहि रुद्र प्रजाभिः॥ ऋ. II. 33. 1. The ऐ. ब्रा. reads 'त्वं नो वीरो अर्वति क्षमेथाः' for अभि नो वीरो अर्वति क्षमेथा प्र जायेमहि रुद्रिय प्रजाभिः॥'. If one employed अभि नो, Rudra might have seized the progeny and the word रुद्रिय (meaning a servant of Rudra) avoids the use of the harsh name Rudra. 'प्रजायेमहि रुद्रिय प्रजाभिरिति ब्रूयाद्य रुद्रेरयेतस्यैव नाम्नः परिहृत्यै। तद्ध खलु शं नः करतीत्येव शंसेच्छमिति प्रतिपद्यते सर्वस्मा एव शान्त्यै। ···सोऽनिरुक्ता रौद्री शान्ता सर्वायुः सर्वायुत्वाय। ऐ. ब्रा. 13. 10.

(I. 43. 6 'śam naḥ karatyarvate sugam meṣāya meṣye nṛbhyo nāribhyo gave') because in the first place that verse begins with the auspicious word 'śam' and in the second place because that verse, though the *devatā* (deity) thereof is Rudra, does not expressly mention that word; the result, says the Ait. Br., is that that verse being one of appeasement (śānti) the priest secures long life and procures long life for the sacrificer.

Another example of 'śamayati in the Tai. S. is as follows: When an *agnihotrin* is going on a journey with his household he should offer *homa* to Vāstospati, but if he goes without offering a homa to Vāstospati evil consequences follow; 'Rudra is indeed Vāstospati; if he were to go out without offering homa to Vāstospati, Agni would become Rudra, would leap after him and kill him; (but) when he offers to Vāstospati, he appeases him (Rudra-Agni) with his own share and the sacrificer meets no injury (or distress)'.[1140]

Another example of 'śāmayati' and 'śānti' in the Tai. S. (VI. 3. 3. 2-3) may be set out. 'O tree! protect it; O axe! do not harm it; the axe indeed is a thunderbolt; (therefore he utters those words) for allaying (the fierce power of the axe); these worlds are afraid of the tree (of which the yūpa is made) when it moves; (therefore he recites 'with thy top do not graze the sky, with thy middle do not harm the atmospheric region'. (By these words) he appeases (removes the terrible power for evil of) this tree'.[1141]

The foregoing passages are quite sufficient for showing the significance attached to the words 'śam', 'śamayati' and 'śānti' in the Vedic saṁhitās. The word 'śantama' occurs in the Ṛgveda about two dozen times. It is applied to the great gods like Agni, Indra, Soma (I. 16. 7, I. 77. 2, IX. 104. 3), to the praises of gods (I. 76. 1, VI. 32. 1), to the worshipper or singer (VIII. 13. 22), to protection by gods (V. 76. 3, X. 15. 4) and generally means 'beneficent or conferring happiness'. Simi-

---

1140. रुद्रः खलु वै वास्तोष्पतिर्यदहुत्वा वास्तोष्पतीयं प्रयायाद् रुद्र एनं भूत्वाऽग्निरनूत्थाय हन्याद्वास्तोष्पतीयं जुहोति भागधेयेनैवैनं शमयति नार्तिमृच्छति यजमानः। तै. सं. III. 4. 10. 3. Compare कौ. ब्रा. 14. 19.

1141. ओषधे त्रायस्वैनं स्वधिते मैनं हिंसीरित्याह वज्रो वै स्वधितिः शान्त्यै।...इमे वै लोका यूपात्प्रयतो बिभ्यति दिवमग्रेण मा लेखीरन्तरिक्षं मध्येन मा हिंसीरित्याहैभ्य एवैनं लोकेभ्यः शमयति। तै. सं. VI. 3. 3. 2-3; compare वाज. सं. 5. 42-43 and शतपथ III. 6. 4. 13 for similar words.

larly, the word 'śantāti' (Rg. I. 112. 20, VIII. 18. 7) means 'beneficent'.

The causal (śamayati) of the verb 'śam' and the word 'śānti' do not occur in the Ṛgveda, but they are as said above frequently employed in the Tāittirīya and other Saṁhitās and in the Brāhmaṇas. Some further examples may be set out here. The Tai. S. relates the following legend "Agni was in the yonder world (heaven), the sun was in this world; these worlds were (then) unappeased (disturbed). The gods said 'come, let us change (transpose) these two'. They placed Agni in this world with the words 'O Agni, come here for the dainty meal' and (placed) the Sun in the yonder world with the worlds 'the great and powerful one, O Agni'; then indeed these two worlds became free from disturbance. Since he repeated those words in this way, it served for the purpose of quieting these worlds (that were once disturbed). These worlds became undisturbed (auspicious) for him who knows this".[1142] Here we have both the verbal form 'aśāmyatāma' (from 'śam' 4th conj.) and the the word 'śāntyai'.

In some passages of the Ṛgveda the word 'śami' occurs (as in I. 87. 5, II. 31. 6, III. 55. 3, VIII. 45. 27, X. 40. 1.). It is generally interpreted by Sāyaṇa in these passages as the locative singular of 'śamī', which is explained to mean 'karman' (action, sacrifice or the like). Two of these may be cited here[1143] "my desires fly in many directions; I shall brighten ancient (lauds) towards 'śamī' (for employing them in various sacrifices?); knowing the truth in Turvaśa (king) and Yadu (king) he (Indra) enveloped Ahnavāyya (their enemy) in warlike action." It is possible to take 'śami' as the locative singular of 'śam' treated as a noun. The word 'śamī' occurs in many passages of the Ṛgveda (I. 20. 2, I. 83. 4, I. 110. 4, II. 1. 9, III. 60. 3, IV. 3. 4, IV. 17. 18, IV. 22. 8, IV. 33. 4, V. 77. 4, V. 42. 10, VI. 3. 2, VI. 52. 1, VIII. 75. 14, IX. 74. 7, X. 28. 12). In all these passages

---

1142. इमौ लोकावशान्तावास्तां ते देवा अब्रुवन्नेतेमौ विपर्यूहामेत्यग्न आ याहि वीतय इत्यस्मिँल्लोकेऽग्निमवधुर्बृहदग्ने सुवीर्यमित्यमुष्मिँल्लोके आदित्यम्। ततो वा इमौ लोकावशाम्यतां यदेवमन्वाहानयोर्लोकयोः शान्त्यै। शाम्यतोऽस्मा इमौ लोकौ य एवं वेद॥ तै. सं. II. 5. 8. 2. अशान्त here means 'the evil, aspects or influences in which had not been removed or conjured away.

1143. वि मे पुरुत्रा पतयन्ति कामाः शम्यच्छा दीद्ये पूर्व्याणि। ऋ. III. 55. 3; सत्यं तत्तुर्वशे यदौ विदानो अह्नवाय्यम्। व्यानट् तुर्वणे शमि॥ ऋ. VIII. 45. 27. In the last verse Sāyaṇa takes शमि as objetcive singular of शमी (instead of loc singular as he does elsewhere).

Sāyaṇa interprets it as 'karma' and not as the 'śamī tree or branch'. But in one place at least (if not in more places) the word śamī can easily be held to mean 'the śamī wood or fuel-stick'.[1144] 'To that mortal who worships with sacrifices and appeases with 'śamīs' (śamī fuel-sticks) and gives offerings to Agni that abounds in wealth disappointment as to glory never comes nor does sin nor arrogance overtake him.'

The whole of chapter 36 of the Vājasaneya-saṃhitā is employed as śānti at the beginning and end of the Pravargya rite, according to Kāt. Śr. S. 26. 41 'śāntikaraṇam-ādyantayoḥ'; verses 9–12 of Vāj. S. 36 employ the word 'śam' 17 times and verse 9 is the same as Ṛgveda I. 90. 9.

An interesting text in connection with the root 'śam' is the *adhrigu praiṣa*, to be recited by the Hotṛ priest before the *paśu* is killed in a sacrifice. Vide H. of Dh. vol. II. p. 1121 note 2504 for the formula which is rather long. The important[1145] words for the present purpose are at the beginning and at the end 'O divine slayers and human slayers! begin (the process of killing the paśu). ...O Adhrigu! you should slay (the *paśu*) in such a way that it would be properly carried out'. Here the root (śam) certainly means to slay; this meaning is, however, apparently quite different from the one so far considered (viz. to appease, to remove evil effects). But it may be that there is a secondary meaning, viz. appease the gods by offering parts of the animal killed in the sacrifice.

The Taittirīya-brāhmaṇa closely connects the śamī tree or branch with the conjuring away or appeasing the terrible or angry aspects of deities in the following myth:[1146] "Prajāpati

---

1144. ईजे यज्ञेभिः शशमे शमीभिर्धधद्रायाग्नये ददाश। एवा चन तं यशसामजुष्टिर्नो ह्यो मर्तं नशते न प्रहृतिः॥ ऋ. VI. 3. 2; compare ऋ. VI. 1. 9 सो अग्न ईजे शशमे च मर्तो यस्ते आनट् समिधा हव्यदातिम्।.

1145. दैव्याः शमितार आरभध्वमुत मनुष्याः।'''अधिगो शमीष्वं सुशमि शमीष्वं शमीष्वमधिगाश्च अपाप। आश्व. श्रौ. III. 3. The passage occurs in तै. ब्रा. III. 6. 6. 4, ऐ. ब्रा. VI (अध्याय), 6–7 (खण्ड). The words सुशमि शमीष्वं occur in तै. सं. I. 1 5. 2, वाज. सं. I. 15. The words अधिगो &c. quoted here occur in कौशिक-सूत्र 69. 6.

1146. प्रजापतिरग्निमसृजत। सोऽग्निभेत्य मा धक्ष्यतीति। तं शम्याऽशमयत्। तच्छम्यै शमित्वम्। यच्छमीमयः सम्भारो भवति शान्त्या अप्रदाहाय। तै. ब्रा. I. 1. 3. 11. सायण explains 'शमयत्यनेनेति व्युत्पत्त्या शमीति नाम सम्पन्नम्। अतस्तत्संभारः पूर्वं विद्यमानस्य दाहस्योपशान्त्यै, इतः परमदाहाय च सम्पद्यते.'

created Agni; he (Prajāpati) became afraid 'this Agni might burn me'. He (Prajāpati) pacified (the terrible flame or glow of) Agni with śamī (branch); that is the beneficent or happy aspect of śamī in that the equipment required for Agni is full of śamī in order to appease Agni and for freedom from being burnt thereafter.' The idea is that Agni, the moment it was created had a fierce and evil aspect, that was removed by the use of the śamī and śānti means an action or rite that appeases the evil aspects of a deity and makes the deity beneficent. Similarly, the Aitareya-brāhmaṇa says:[1147] "He recites the verse 'they worship you with offerings whatever abodes you may have;...he says: O Soma! move towards houses in such a way as not to kill the sons (of the sacrificer).' Houses are indeed called 'duryā' and the house of the sacrificer is afraid of the king Soma when he approaches the sacrificer's house; when he (the priest) repeats this (verse) he thereby appeases him (king Soma) by a śānti (propitiatory rite); he (Soma) becoming beneficent (by the respetition of the mantra) does not kill the progeny or the cattle (of the sacrificer)." The idea is that king Soma might be angry with the sacrificer if there be any defect in the sacrificial rite and that when the hotṛ priest repeats the verse 'avīrahā o–' that verse is the cause of appeasement.

In the Śatapatha-brāhmaṇa there is a similar reference to the appeasing power of the śamī branch. "He (the priest) places fuel sticks on this (Agni). ... He places (on Agni) a fuel stick of śamī as the first. This (Agni) was kindled when this oblation (of śamī branch) was offered and flamed upwards. The gods became afraid of him (Agni) lest Agni might harm them. They (gods) saw this śamī branch and appeased him (Agni) with that; inasmuch as they appeased this (Agni) by means of śamī (branch) this is called śamī. In the same way this sacrificer appeases with śamī this (Agni) for procuring appeasement and not for food"[1148]. It would be noticed

---

1147. या ते धामानि हविषा यजन्तीत्यन्वाह। ...अवीरहा प्र चरा सोम दुर्यानिति। गृहा वै दुर्या बिभ्यति वै सोमाद्राज्ञ आयतो यजमानस्य गृहाः। स यदेतामन्वाह शान्त्यैवैनं तच्छमयति सोऽस्य शान्तो न प्रजां न पशून् हिनस्ति। ऐ. ब्रा. 3. 2. The verse 'या ते···दुर्यान्' is ऋ. I. 91. 19.

1148. अथास्मिन्समिध आदधाति। स वै शमीमयीं प्रथमादधाति। एतद्वा एष एतस्या-माहुत्यां हुतायां प्रादीप्यतोदज्वलत्। तस्माद्वेवा अबिभयुर्यद्वै नोऽयं न हिंस्यादिति। त एतां शमीमपश्यंस्तयैनमशमयंस्तद्यदेतं शम्या अशमयंस्तस्माच्छमी तथैवैनमयमेतच्छम्या शमयति शान्त्या एव न जगध्यै। शतपथ IX. 2. 3. 36 and 37.

that here the name 'śami' is derived from the root 'śam' and it is the means of effecting śānti (appeasement).

In the Brāhmaṇas the means of appeasement are various but simple. Often times the recitation of a Vedic verse or hymn effects śānti. For example, the Taittirīya-brāhmaṇa[1149] prescribes the singing of sāmans at the time of consecrating the sacred śrauta fires; the three *sāmans* are Rathantara, Vāmadevya and Bṛhat, each being connected with the three worlds respectively. "When Agni is being taken out, he sings the Vāmadevya sāman; Vāmadevya is the atmospheric region and thereby (i. e. by singing Vāmadevya) he makes Agni established in the atmospheric region; Vāmadevya is śānti (means of bringing about the appeasement of Agni); (on singing Vāmadevya) he takes out Agni that has become appeased (beneficent) and as bestower of cattle". The Tai. S. says[1150] "he says 'weave ye with regular measure the work of the singers'. Whatever superfluity (or flaw) is committed in the sacrifice, this (recitation) serves to eradicate its evil effects". The Ait. Br. provides "(the priest) who is about to sprinkle holy water over him[1151] (the king) should (himself first recite the mantra and) make the king repeat it (after him) 'O Waters! look on me with a beneficent eye, (and) touch my skin with (your) beneficent body. I invoke all the Agnis that dwell in waters for your sake; this should be done for the purpose that waters (the evil aspects of which have been) not appeased may not destroy the vigour of him who is being sprinkled over". The Hotṛ performs a *japa* before and after reciting the *sāmidhenī* verses. About this the Śāṅkhāyana-brāhmaṇa says[1152] that the sāmidhenīs are a thun-

---

1149. वामदेव्यमभिगायत उद्धियमाणे। अन्तरिक्षं वै वामदेव्यम्। अन्तरिक्ष एवैनं प्रतिष्ठितमाधत्ते। अथो शान्तिर्वै वामदेव्यम्। शान्तमेवैनं पशव्यमुद्धरते। तै. ब्रा. I. 1. 8. 2. The वामदेव्य is sung on the verse 'कया नश्चित्र आ भुवत्' ऋ. IV. 31. 1 which occurs also in तै. सं IV. 2. 11. 2, वाज. सं. 27. 39 and 36. 4, अथर्ववेद 20. 124. 1. The द्राह्यायणश्रौतसूत्र (XII. 1 29-31) provides 'जाते रथन्तरं गायेत्। वामदेव्यं ह्रियमाणे। बृहच्चिहिते।'

1150. अनुल्बणं वयत जोगुवामप इत्याह। यदेव यज्ञ उल्बणं क्रियते तस्यैवैषा शान्तिः। तै. सं. III. 4. 2. 6-7; 'अनुल्बणं वयत जोगुवामपः' is the 3rd quarter of ऋ. X. 53. 6.

1151. अथैनमभिषेक्ष्यन्नपां शान्तिं वाचयति। शिवेन मा चक्षुषा पश्यतापः शिवया तन्वोप स्पृशत त्वचं मे। सर्वाँ अग्नीँरप्सुषदो हुवे वो मयि वर्चो बलमोजो निधत्तेति। नैतस्याभिषिच्यमानस्याशान्ता आपो वीर्यं निर्हणन्तीति। ऐ. ब्रा. 37. 2. The मन्त्र 'शिवेन मा' occurs in तै. सं. V. 6. 1. 2 and अथर्ववेद I. 33. 4 (only the first half).

1152. अथ यत्पुरस्तात्सामिधेनीनां जपति वज्रो वै सामिधेन्यस्तमेवैतच्छमयति पुरस्ताच्चोपरिष्टाच्च। शाङ्खायनब्रा. 3. 3. Generally there are 15 सामिधेनी verses, but there are optional numbers which need not be specified here.

derbolt and that if *japa* is performed thereby he appeases (*śamayati*) Agni (i. e. Agni becomes auspicious and beneficent).

Water also is declared as a means of effecting the removal or appeasement of evil effects. The Ait. Br. remarks[1153] "they say what is the atonement (prāyaścitti) if a person's sacrificial material (milk or rice) when put on a fire for cooking spurts out or overflows? (The reply is) 'he should make it go down with water for the sake of śānti; water indeed is (a means of) śānti and then he should touch the material (that has fallen out) with his right hand and recite a mantra (that is specified) or he should recite another ṛk verse 'by whose power the worlds are made fixed', which is addressed to Viṣṇu and Varuṇa; Viṣṇu indeed is the saviour against what is badly sacrificed (i. e. the defects in it), while Varuṇa protects (i. e. prevents obstacles to securing the fruit of) what is well sacrificed; (this latter mantra is recited) for śānti in regard to both (defects as well as good points). This is the prāyaścitti in this case." It should be noticed that here śānti (rite) and prāyascitti are identified. The Śāṅkhāyana[1151] Br. also (III. 6) says "waters are (means of) śānti, (they are) an antidote and therefore after pronouncing the word 'vaṣaṭ' the priest touches water." In the Tai. Ār. (IV. 42) there are 37 mantras of śānti used in the Pravargya rite. Some of these occur in the Ṛgveda-saṁhitā e. g. the 8th (Vāta ā vātu bhesajam) is Ṛg. X. 186. 1, mantras 15–17 are equal to Ṛg. IV. 31. 1–3; mantras 22–24 are Ṛg. X. 9. 1–3. The same Āraṇyaka (IV. 26–35) and Baud. Śr. S. IX. 18 contain several mantras for śāntis, some of which are interesting and are set out here to show how the theory of śāntis was being expanded or enlarged. "If the[1155] sacrificial vessel called

1153. तदाहुर्यस्याग्निहोत्रमधिश्रितं स्कन्दति वा विष्यन्दते वा का तत्र प्रायश्चित्तिरिति तदद्भिरुपनिनयेच्छान्त्यै शान्तिर्वा आपोऽथैनद्दक्षिणेन पाणिनाभिमृश्य जपति। दिवं तृतीयं देवान् यज्ञोऽगात्ततो मा द्रविणमाट, अन्तरिक्षं तृतीयं पितॄन्यज्ञो···ष्ट. पृथिवीं तृतीयं मनुष्यान् यज्ञो···ष्ट, इति। ययोरोजसा स्कभिता रजांसीति वैष्णवारुणीमृचं जपति विष्णुर्वै यज्ञस्य दुरिष्टं पाति वरुणः स्विष्टं तयोरुभयोरेव शान्त्यै। सा तत्र प्रायश्चित्तिः॥ ऐ ब्रा. 32. 4. The मन्त्र 'ययोरोजसा' occurs in वाज. सं. 8. 60 and अथर्व VII. 25. 1 (and in several other texts). Compare मैत्रा. सं. III. 9. 4 'यूपो वै यज्ञस्य दुरिष्टमामुञ्चते यदि यूपमुपस्पृशेद्यज्ञस्य दुरिष्टमा मुञ्चेत्। तस्माद्यूपो नोपस्पृश्यः।'.

1154. वषट्कृत्याप उपस्पृशति। शान्तिर्वै भेषजमापः शान्तिरेवैषा भेषजमन्ततो यज्ञे क्रियते। शां. ब्रा. 3. 6.

1155. अथ यदि घर्मदुघं वा महावीरं वा स्तेनोऽपहरेद्गार्हपत्ये स्रुवाहुतिं जुहुयादहोरात्रे त्वोदीरयतामिति। कौ. श्रौ. IX, 18; that मन्त्र is 'अहोरात्रे त्वोदीरयताम्। अर्धमासास्त्वोदीं जयन्तु। मासास्त्वा श्रपयन्तु। ऋतवस्त्वा पचन्तु। संवत्सरस्त्वा हन्त्वसौ।' तै. आ. IV. 26. असौ refers to the name of the thief as in 'हे देवदत्त चोर त्वामहोरात्रे' &c.

mahāvīra (in Pravargya rite) of the hot milk for the Gharma offering were to be stolen by a thief, one should offer in the Gārhapatya fire an oblation of ghee with the *sruva* ladle to the accompaniment of the mantra 'May Day and Night disclose thee as thief'. 'If a wild [1156] forest dog were to bark (while the Pravargya rite is on), the priest should repeat by way of a magic formula the text 'vi gā Indra vicaran spāśayasva' (O Indra, observe the cows while you move about'), should cast a kindled firebrand on both sides with the words 'O Agni, converse with Agni, and then he worships Agni with the words 'O Agni, salutation to thee once, twice, thrice &c.' If a vulture screeches he recites the formula 'you are undistinguishable (from other birds) since you have blood in your beak', if an owl or she-owl hoots he recites the mantra 'In this way the owl approaches &c.'. Therefore it may be said that śānti is used in the early Vedic texts in several senses viz. (1) the state of being freed from evil aspects or effects, (2) means of appeasing or removing evil aspects, such as water, a Vedic verse or hymn, (3) rite for appeasement.

Apart from the simple śāntis for appeasing deities in sacrificial matters, even the Rgveda contains indications that there were other occurrences which were thought to be unlucky and against the supposed evil effects of which some remedies were employed. For example, Rg. X. 164 (1-5) is a hymn declared by the Anukramaṇī and Rgvidhāna IV. 20. 1 as counteracting the indications of bad dreams.[1157] Verse 3 of it is 'May Agni place far away from us all evil and undesirable actions which we may have done while awake or asleep whether by our desires or imprecations or want of desire'. In Rg. V. 82. 4-5 [1158] the

1156. यद्येकवृको वाश्येत तमनुमन्त्रयते वि गा इन्द्र विचरन् स्राशयस्वेत्यथास्मा उभयत आदीप्तमुल्मुकं क्षिपेदग्ने अग्निना संवदस्वेत्यथैनमुपनिष्क्रामते मकृत्ते अग्ने नमो द्विस्ते नमस्त्रिस्ते नम इति। यदि गृध्रो वाश्येत तमनुमन्त्रयते असृङ्मुखो रुधिरेणाभ्यक्त इति। ...यद्यल्लूकोलूकी वाश्येत तमनुमन्त्रयत इत्थाद्वुलूक आ पसादिति। कौ. श्रौ. IX. 18. The texts mentioned in this passage are तै. आ. IV. 28, 29, 33. Both the तै. आ. and कौ. श्रौ. refer to other phenomena which are not set out here.

1157. यदाशसा निःशमाभिशसोपारिम जाग्रतो यत्स्वपन्तः। अग्निर्विश्वान्यप दुष्कृतान्यजुष्टान्यारे अस्मद् दधातु॥ ऋ. X. 164. 3 ऋग्विधान IV. 1 is अपेहीति जपेत्सूक्तं दुश्चिद्दुःस्वप्ननाशनम्।

1158. अद्या नो देव सवितः प्रजावत् सावीः सौभगम्। परा दुःष्वप्न्यं सुव। विश्वानि देव सवितर्दुरितानि परा सुव। यद्भद्रं तन्न आ सुव॥ ऋ. V. 82. 4-5; यो मे राजन् युज्यो वा सखा वा स्वप्ने भयं भीरवे मह्यमाह। स्तेनो वा यो दिप्सति वृको वा त्वं तस्माद्वरुण पाह्यस्मान्॥ ऋ. II. 28. 10; त्रिते दुःष्वप्न्यं सर्वमाप्त्ये परि दद्मस्यनेहसो व ऊतयः सुऊतयो व ऊतयः॥ ऋ. VIII. 47. 15.

poet prays 'O God Savitṛ! today produce for us welfare endowed with progeny and frighten away the effects of bad dreams; O God Savitṛ! drive away all sins (or evils) and confer on us what is beneficent' (or auspicious). In Rg. II. 28. 10 the poet prays 'O king Varuṇa! whoever, whether a helper or a friend, declares to me who ascertained a danger (from what I saw) in a dream or whoever, a thief or a wolf, intends to harm me, from that guard us'. In Rg. VIII. 47. 15 the sage exclaims 'we deliver all our bad dreams to Trita Āptya; your kindness cannot be obstructed by any one, the protection given by you is good'. Vide also Rg. VIII. 47. 14, 16-18, X. 36. 4, X. 37, 4 for bad dreams. Similarly, the Rgveda contains verses which show that cries of birds were deemed to indicate coming good or evil and the hooting of the owl was thought to be unlucky. 'It[1159] (the bird) frequently cries and proclaims what is to come and it propels his speech as an oarsman propels a boat; O bird! May you be auspicious to us; may no overpowering (or unfavourable) phenomenon reach you from any side'. The three verses of Rg. II. 43 refer to the cries of birds. 'The birds, chirping, utter cries towards the south (of the house) like composers of songs that speak for food at various seasons; O bird! when you chirp, speak what would be to our welfare, when you are silent think of good thoughts about us; when flying up (from our house) you utter (cries) like a lute; may we be endowed with valiant sons and speak much in assemblies'. Rg. X. 165 contains several verses about a kapota bird and one about an owl. Rg. X. 165. 1 and 4 are:[1160] 'a kapota bird, messenger of ill-luck, has come to this our house, with whatever (evil) intent; we worship you, we shall perform atonement; O God! May it fare well with our men and quadrupeds. May what the owl expresses (by its

1159. कनिक्रदज्जनुषं···विदत् ॥ ऋ. II. 42 1, q. in note 755 p. 526. निरुक्त IX. 4 explains this verse. सायण holds that the bird referred to is कपिञ्जल. निरुक्त IX. 5 quotes a verse from a खिलसूक्त addressed to कपिञ्जल 'भद्रं वद दक्षिणतो···भद्रं पश्चात्कपिञ्जल,' which occurs in कौशिकसूत्र 46. 54 प्रदक्षिणिदाभि गृणन्ति कारवो वयो वदन्त ऋतुथा शकुन्तयः। ···आवदंस्त्वं शकुने भद्रमावद तूष्णीमासीनः सुमतिं चिकिद्धि नः। यदुत्पतन्वदासि कर्करिर्यथा बृहद्वदेम विदथे सुवीराः॥ ऋ. II 43. 1 and 3. The last verse is quoted in कौशिकसूत्र 46. 54 among the कपिञ्जलस्वस्ययनs. Vide ऋग्विधान I. 31. 4 for a similar provision against sounds of birds.

1160. शिवः कपोत इषितो नो अस्त्वनागा देवाः शकुनो गृहेषु। ···यदुलूको वदति मोघमेतत्यत्कपोतः पदमग्नौ कृणोति। यस्य दूतः प्रहित एष एतत्तस्मै यमाय नमोस्तु मृत्यवे॥ ऋ. X. 165. 2 and 4; अथर्व VI. 27. 1-3 are almost the same as ऋ. X. 165. 1-3, अथर्व VI. 27.1 is ऋ. X. 165. 5 and अथर्व VI. 29. 1-2 are similar to ऋ. X. 165. 4. कपोतश्चेद्गारमुपहन्यादनुपतेद्वा देवाः कपोत इति प्रत्यृचं जुहुयाज्जपेद्वा। आश्व. गृ. III. 7. 7; compare मानवगृ. II. 17 and कौशिकसूत्र 46. 7 and ऋग्विधान IV. 20.2.

hooting) turn out to be fruitless or (untrue). What the kapota bird (expresses) by placing its feet near our Agni (be untrue); here is salutation to Yama, the god of Death, whose messenger is this (bird) sent (by the god)'. The Āśvalāyana-gṛhya provides 'if a kapota (pigeon) strikes against a house (enters it) or flies along its length, the house-holder should offer into fire oblations (of ghee) with each verse of the hymn ('devāḥ kapota', Rg. X. 165) or he should recite it inaudibly'. The Kauṣītaki-gṛhya provides for the same (in V. 5. 1–2) and proceeds[1161] "if a man sees a bad dream or when the cawing of a crow is heard in the night and in the case of other *adbhutas* (untoward or unusual occurrences) he should cook rice grains in the milk of a cow that has a calf of the same colour (as itself) but in no case of a black cow and let him sacrifice with the hymn to Night (Rg. X. 127) verse by verse and having partaken of the remnants of the oblations with the *mahāvyāhṛtis* and having recited over his ears the verse 'bhadram karnebhiḥ' (Rg. I. 89.8) and over himself the verse 'satam-in-nu' (Rg. I. 89. 9) donate something to the brāhmaṇas". The Śāṅkhāyana-gṛhya (V. 6, 7, 10 and 11) provides: "if a disease befalls a person, he should offer boiled Gavedhuka grains with the hymn 'these prayers to the powerful Rudra' &c. verse by verse (Rg. I. 114). If the honey bees make honey in a man's house, he should fast and sacrifice a hundred and eight pieces of udumbara wood besmeared with curds, honey and ghee with two verses Rg. I.114. 8–9 and murmur the hymn (Rg. VII. 35) and if an ant-hill arises in his house the house should be abandoned and having fasted three nights (and days) he should perform the 'Mahāśānti'.[1162]

1161. स्वप्नदर्शने निशायां। काकशब्दकान्ते च। अन्येषु चाद्भुतेषु च। पयसा चरुं श्रपयित्वा सरूपवत्साया गोः पयसि। न त्वेव कृष्णायाः। रात्रिसूक्तेन मन्थ्यं जुहुयात्। हुतशेषं महाव्याहृतिभिः प्राश्य भद्रं कर्णेभिरिति कर्णौ प्रतिमृज्य शतमिन्नु शरदो अन्ति देवा इत्यात्मानमभिमन्त्र्य ब्राह्मणेभ्यः किञ्चिद्दद्यात्। कौषी. गृ. V. 5; compare मानवगृह्य II. 15 यदि दुःस्वप्नं पश्येद् व्याहृतिभिस्तिलान् हुत्वा दिश उपतिष्ठेत। (formulas for four quarters, lower regions, and upper regions are cited which occur in काठकसंहिता 37. 10.)

1162. महाशान्ति. The com of नारायण explains that महाशान्ति means विनायक-शान्ति and नवग्रहशान्ति. It is doubtful whether these two were known to the author of the शाङ्खायनगृह्य; the कौशिकसूत्र (39.27, 43.5 and 44.6) prescribes a महाशान्ति which is different. कौशिक 43.5 is वास्तोष्पत्यादीनि महाशान्तिमावपते and कौशिक 8. 23 prescribes 'इहैव ध्रुवामेह यातु, यमो मृत्युः, सत्यं बृहदित्यनुवाको वास्तोष्पतीयानि.' These are अथर्व III. 12. 1 (इहैव ध्रुवाम्); VI, 73.1 (एह यातु), VI. 93.1 (यमो मृत्युः), XII. 1 (सत्यं बृहत्). This last अनुवाक has 63 verses. Among later medieval works the शान्तिमयूख (pp. 106–108) describes an elaborate महाशान्ति.

The Aitareya-Āraṇyaka mentions ten dreams viz. a person sees a dark man with black teeth and such a man kills him, or a boar kills him, or an ape jumps on him, the wind carries him swiftly; having swallowed gold, he vomits it; he eats honey; he chews stalks of lotuses; he carries a single (red) lotus; he drives with a team of asses or boars; himself wearing a wreath of *nalada* flowers,[1163] he drives towards the south a black cow having a black calf. If a man sees any one of these, he should fast, cook a dish of rice in milk in a vessel, offer into fire oblations thereof with each of the verses of the hymn to Night (Rg. X 127. 1-8), feed brāhmaṇas with other food (cooked in the house) and should himself eat boiled rice'.[1164] The same Āraṇyaka mentions in the same context some unusual phenomena such as the sun appearing like the moon (pale and without heat) or the sky becoming like madder and prescribes the recital of some Ṛgvedic verses (such as IX. 67. 21–27, VIII. 6. 30, IX. 113. 6–11, I. 50. 10).

The Chāndogya Up. contains a verse saying 'if a person engaged in rites for securing a certain desired object sees a woman in a dream, one should understand on seeing such a sight that he will prosper (i. e. secure that object).'[1164a] The Chāndogya Upaniṣad (VIII. 10. 1), the Bṛhadāraṇyaka Upaniṣad (IV. 3. 7–20) and Praśna IV. 5 contain profound thoughts on the psychology of dream phenomena, but as that discussion

---

1163. In the Āśv. Śr. (quoted in H. of Dh. vol. IV p. 203 n. 481) it is provided that the corpse of an *āhitāgni* is to be decked with a wreath of *naladas*. The south is the direction of the *pitṛs*; vide Śatapatha Br. I. 2. 5. 17 (eṣā vai dik pitṛṇām'). Therefore, to see in a dream oneself wearing a wreath of naladas or driving towards the south was deemed to forebode death.

1164. अथ स्वप्नाः। पुरुषं कृष्णं कृष्णदन्तं पश्यति स एनं हन्ति वराह एनं हन्ति मर्कट एनमारुकन्दत्याशु वायुरेनं प्रवहति सुवर्णं खादित्वा प्रगिरति मध्वश्नाति बिसानि भक्षयत्येक-पुण्डरीकं धारयति खरैर्वराहैर्युक्तैर्याति कृष्णां धेनुं कृष्णवत्सां नलदमाली दक्षिणामुखो व्राजयति। स यद्येतेषां किंचित्पश्येदुपोष्य पायसं स्थालीपाकं श्रपयित्वा रात्रीसूक्तेन प्रत्यृचं हुत्वाज्येनाज्येन ब्राह्मणान् भोजयित्वा चरुं स्वयं प्राश्नीयात्। ऐ. आ. III. 2. 4; vide मार्कण्डेयपुराण 40. 1–33 for signs of approaching death (Venk. ed.) of which verses 15–20, 27, 29, 31–33 deal with dreams. Some of these verses of मार्कण्डेय have a striking similarity to the ऐ. आ. passage; for example, मार्कण्डेय 40. 27 is : उष्ट्रखरभयानेन यः स्वप्ने दक्षिणां दिशम्। प्रयाति तं च जानीयात्सद्योमृत्युं नरेश्वर॥.

1164 a. यद्वा कर्मसु काम्येषु स्त्रियं स्वप्नेषु पश्यति। समृद्धिं तत्र जानीयात्तस्मिन् स्वप्न-निदर्शने॥ छान्दोग्य V. 2. 9 q. by शङ्कराचार्य on वेदान्तसूत्र II. 1. 6.

would not be relevant in the section on śānti nothing can be said here beyond quoting three striking passages.[1165]

The Atharvaveda also has several verses on dreams and on birds like *kapota* (pigeon). The Kauśikasūtra prescribes several verses of the Atharvaveda as śāntis in the case of dreams : 'on seeing a dream a man washes his face with the verses (Atharva VI. 45. 1 and 46. 1); if he sees a very terrible dream he offers into fire a cake of mixed grains[1166] or in another direction (in his enemy's field); he changes the side on which he sleeps with Atharva VII. 100. 1 : on seeing himself eating in a dream he recites the mantra (Atharva VII. 101. 1) and he looks on; with the verse 'vidma te' (Atharva VI. 46. 2) all (dreams) vanish.' Two of these verses may be set out here : 'O dream ! we know the place of thy birth : thou art the son of gods' sisters ; thou art the helper of Yama ; thou art the destroyer ; thou art death ; O dream ! we know thee to be so ; O dream ! do thou save us from evil dreams ' ; ' I turn round (and lie on my other side) from evil dreaming, from bad dreaming, from ill-luck ; I make *brahman* (vedic prayer) my defence ; I put away the sorrows that come through dreams '.[1167] The Kātyāyana-śrauta-sūtra prescribes a similar verse for japa when a *dīkṣita* sees a disagreeable dream.[1168]

1165. य एष स्वप्ने महीयमानश्चरत्येष आत्मेति होवाचैतदमृतमभयं ब्रह्मेति स ह शान्तहृदयः प्रव्रव्राज''' । छा. उप. VIII. 10. 1; अत्रैष देवः स्वप्ने महिमानमनुभवति यद्दृष्टं दृष्टमनुपश्यति श्रुतं श्रुतमेवार्थमनुशृणोति देशदिगन्तरैश्च प्रत्यनुभूतं पुनःपुनः प्रत्यनुभवति दृष्टं चादृष्टं च श्रुतं चाश्रुतं चानुभूतं चाननुभूतं च सच्चासच्च सर्वं पश्यति सर्वः पश्यति । प्रश्न IV. 5; कतम आत्मेति योऽयं विज्ञानमयः प्राणेषु हृद्यन्तर्ज्योतिः पुरुषः स समानः सन्नुभौ लोकावनुसञ्चरति ध्यायतीव लेलायतीव स हि स्वप्नो भूत्वेमं लोकमतिक्रामति मृत्योः रूपाणि। ···स यत्र प्रस्वपित्यस्य लोकस्य सर्वावतो मात्रामुपादाय स्वयं विहत्य स्वयं निर्माय स्वेन भासा स्वेन ज्योतिषा प्रस्वपित्यत्रायं पुरुषः स्वयं ज्योतिर्भवति । बृह. उप. IV. 3. 7 and 9. Some of these passages on dreams are relied upon and discussed by Śaṅkarācārya on Vedāntasūtra I. 3. 42, II. 1. 28, III. 2. 1–4.

1166. The कौशिक s. 23 enumerates मिश्रधान्यानि as 'व्रीहियवगोधूमोपवाकतिलमियङ्गुश्यामाका इति मिश्रधान्यानि'. The com. explains 'उपवाक इति अभियवाः । सुराष्ट्राणां प्रसिद्धाः ।'. श्यामाक is called सांवे in Marāṭhi and उपवाक is झुन्नजव (in Marāṭhi).

1167. विश्वं ते स्वप्न जनित्रं देवजामीनां पुत्रोऽसि यमस्य करणः । अन्तकोऽसि मृत्युरसि तं त्वा स्वप्न तथा सं विद्म स नः स्वप्न दुःष्वप्न्यात् पाहि ॥ अथर्व VI. 46. 2 and XVI. 5. 6; पर्यावर्ते दुःष्वप्न्यात्पापात्स्वप्नाद्भूत्याः । ब्रह्माहमन्तरं कृण्वे परा स्वप्नमुखाः शुचः ॥ अथर्व VII. 100. 1.

1168. दीक्षितोऽमनोज्ञं स्वप्नं दृष्ट्वा जपेत्-पर्यावर्ते दुःस्वप्न्यात्पापात् स्वप्नाद्भूत्यै । ब्रह्माहमन्तरं करवे परः स्वप्नमुखा कृधीति । कात्या. श्रौ. सू. 25. 11. 20. The verse as printed is somewhat corrupt.

The Āpastamba-gṛhya (8. 23. 9) lumps together several unusual appearances and provides the same śānti in the case of all, 'If the post of a man's house puts forth shoots, or if honey is made in his house by bees or if the footprint of a pigeon is seen on the hearth or if disease arises in his family, or in the case of other miracles and prodigies, let him perform on the newmoon night, at dead of night, at a place where he does not hear the sound of water, the rites from the putting of wood on the fire to the *Ajyabhāga* oblations indicated in the next (Āpastambīyamantrapāṭha II. 22. 14–23), and then perform Jaya and following oblations.' Very similar provisions are found in Jaiminīya-gṛhya II. 7.[1169] The Sāmavidhānabrāhmaṇa contains several prāyaścittas (really śāntis) on the happening of numerous incidents. A few examples are set out here; when bad dreams[1170] are seen, the person should make repetition of Rg. V. 82. 4 twice (i. e. in all at least six times); in the case of any other prognosticatory occurrence not known from any work the person should repeat twice the verse Rg. IV. 31. 1. On seeing one's enemies with weapons raised to strike, the person

1169. स्थूणाविरोहणे मधुन उपवेशने कृत्वा कयेतयददर्शनेऽमात्यानां शरीरक्षेणेऽन्येषु चाद्भुतोत्पातेष्वमावास्यां निशायां यत्रापां न शृण्वन्तदग्नेरुपसमाधानाद्याज्यभागान्त उत्तरा आहुतीर्हुत्वा जयादि प्रतिपद्यते। आप. गृ. 8. 23. 9 अथातोऽद्भुतशान्तिं व्याख्यास्यामः। अथ यद्यगारे स्थूणा विरोहेत्। कपोतो वागारं गच्छेद्वौर्वा गां धयेदनड्वान्वा विवमुल्लिखेत्। अनग्नौ वा धूमो जायेतानग्नौ वा दीप्येत। मधु वा जायेत। वल्मीकं वोपजायेत मण्डूके बाम्भृणे वाश्येत् श्वानो गृहे पर्यटेयुरित्येतान्यांश्च। यत्त इन्द्र भयामहे। सदस्पतिमद्भुतम्। अधायासुते सुमुदस्य (?)। सनादग्ने। यद्वा उ विश्पतिः शितः। प्रत्यग्ने। यं रक्षन्ति। प्राजापत्ययर्चा पुरस्ताच्चोपरिष्टाच्च महाव्याहृतिभिर्जुहोति। एतानि ऋक्सामानि गायेत्। जैमिनीयगृह्य II. 7 (Punjab S. Series). Pratikas (except the third अधा'''स्य which is corrupt) are: ऋ. VIII. 61. 13, I. 18. 6, X. 87. 19, VIII. 23. 13, X. 87. 24, I. 41. 1, X. 121. 10 (प्रजापते न त्वेदेतान्यन्यो). All these (except X. 87. 24 and X. 121. 10) occur in the सामवेद and some also in other संहिताs. बौ. गृ. III. 6 is very similar to जै. गृह्य.

1170. दुःस्वप्नेष्वद्य नो देव सवितरिति द्वितीयम्। अन्यस्मिंस्त्वनाज्ञाते कयानीयाद्वितीयमावर्तयेत्। सामवि. ब्रा. I. 8. 7–8. अद्य नोः is ऋ. V. 82. 4, सामवेद No. 141 (ed. by Satavalekar); कयानीया is कया नश्चित्र॰ (Rg. IV. 31. 1, Sāma No. 169). The com. notes that the lowest number of the repetition (आवृत्ति) of a mantra is three; the repetition may be recited several times more according to the gravity or otherwise of the 'adbhuta' and one's ability. आवृत्तिर्विशिष्यते ऽपवरमिति। त्रिरावृत्तिर्जघन्या तत्तद्दोषगौरवलाघवानुगुण्येन ततोऽधिकं यथाशक्त्या वर्तयेत्। इत्यर्थः। उद्यतशस्त्राञ्छत्रून्दृष्ट्वा देवव्रतानि मनसा ध्यायेच्चैनं हिंसन्ति। II. 44; देवव्रत is सामवेद I. 350 'एतो न्विन्द्रं स्तवाम शुद्धं शुद्धेन साम्ना। शुद्धैरुक्थैर्वावृध्वांसं शुद्धैराशीर्वान् ममत्तु॥', It is also ऋ. VIII. 95. 7. It is one of the sacred texts by murmurring which or by homas with which a person is purified. Vide Vasiṣṭha-dharmasūtra 28. 10–15; देवव्रत is in verse 28. 13 of वसिष्ठ.

should revolve in his mind the Devavrata verse, then (the enemies) would not kill him. If one's house were to be burnt[1171] (accidentally) one should offer oblations anointed with ghee with the mantra 'born with the highest Dharman' (Sāmaveda no 90) and with words 'svāhā to Agni'. In II. 2. 2 The Sāmavidhāna Br. prescribes a śānti for one seized or posessed by an evil spirit. A portion of Ṣaḍvimśabrāhmaṇa (viz. V. 1-10) is styled Adbhuta-brāhmaṇa and contains śāntis for several kinds of utpātas. Some parts of it (such as V. 2-3) correspond with Āśvalāyana-gṛhya -pariśiṣṭa, 4. 11-15. The Ṣaḍvimśa-brāhmaṇa V. 7. 2. provides for earthquakes and cracks in palaces, which are similar to Yoga-yātrā 3. 13. The Atharvaveda 19. 9. 9 refers to showers of falling stars (naksatramulkābhihatam śam-astu naḥ) and Ṣaḍ-vimśa V. 9. 2. refers to falling meteors and V. 10. 2. to images laughing, weeping &c.

Reasons of space forbid further description of śāntis from the gṛhya-sūtras.

The preceding discussion with regard to śāntis is enough to show that śāntis were prescribed in the Vedic literature, the śrautasūtras, Sāmavidhāna-brāhmana and Ṛgvidhāna, not only for appeasing the angry divinities or powers of evil, but also for occurrences like bad dreams or of portentous phenomena like the sun's or moon's appearance, the cries of unlucky birds &c.

This subject about śāntis against all sorts of omens and portents was very much elaborated in the post-Vedic literature. An extensive literature on śāntis exists in the Gṛhyasūtras, the Kauśika-sūtra, the Atharvaveda Pariśiṣṭas (particularly Nos. V, XXXI on Koṭihoma, XXXIII on Ghṛtakambala, XXXVII on 'samuccayaprāyaścittam', resembling 13th chapter of Kauśika, LVIII to LXVII on utpātas, adbhutaśāntis and dreams, LXXI and LXXII, the Purāṇas (like Matsya 92-93 and 228-238, Viṣṇu-dharmottara I. 90-105, II. 124-127, II. 159-164. Mārkaṇḍeya chap. 40, Agni 149, 164, 167, 259-268, 290-91, 320-324, Bhaviṣya IV. 141-145, Brahmāṇḍa III. 38. 30-34, the Bṛhatsaṁhitā chap. 45, the Śāntika-pauṣṭika-kāṇḍa of the Kṛtyakalpataru (Ms. in Baroda Oriental Institute), the Adbhutasāgara of Ballālasena and his son Lakṣmaṇasena (commenced to be written in śaka 1089 i. e. 1167 A.D.), the Śānti section of the Madanaratna (ms. in the Anup Sanskrit Library, Bikaner), Jyotistattva of Raghunandana

1171. अग्निवन्धे घृताक्तान्यवाङ्कुंहुयाज्जातः परेण धर्मणेत्येतेनाग्नये स्वाहेति च। 1. 8. 9.

(pp. 704 ff), the Śāntikamalākara of Kamalākarabhaṭṭa (ms. in Bhau Daji collection of the Bombay Asiatic Society), Śāntimayūkha of Nīlakaṇṭha. Of these the Adbhutasāgara is a very extensive work of 751 pages, edited by Pandit Murlidhar Jha and published by Prabhakari &c, Banares, in 1905 A. D. The Kṛtyakalpataru on Śāntis has not yet been edited and published in the Gaikwad Oriental Series. As compared with some other *kāṇḍas*, the section on śānti is meagre. It deals only with the following; Kūrmavibhāga (the distribution of the countries in Bhārata in 9 groups); Graha-makha or Grahayāga quoting Yāj. I. 295-308, Matsya, Narasiṁha and Bhaviṣya and Devīpurāṇa; Ayutahoma, Koṭihoma; Puṣyasnāna; Grahaśānti; Mātṛśānti; Liṅgaśānti; Vināyakaśānti (quoting Yāj. I. 271-294 and Matsya); Grahaṇasnāna; Saṅkrāntisnāna; mṛtavatsābhiseka; śāntis for variouas utpātas; Gāyatrīhoma; Rudrajapavidhi; ābhicārikakarma (magic rites). It is neither possible nor necessary to deal with this vast mass on śānti in this work in detail. Many of the śāntis described therein and in older śrauta and other works have been almost obsolete for a long time. Therefore, only a few śāntis now in vogue or very interesting from several viewpoints will be dealt with in this section.[1172]

The Kauśikasūtra (chapter 13, kaṇḍikās 93-136) is concerned with *adbhutas*, their descriptions and the śāntis therefor. Kaṇḍikā 93 brings together 42 portentous phenomena and the kaṇḍikās that follow deal with the description of the omen or portent and śāntis for each of these. In these śāntis, Atharvaveda mantras play a secondary role and the majority of the

---

1172. A recently published work by D. J. Hoens (pp. 1-197, S. Gravenhage, 1951) on 'Śānti' deals at some length only with śāntis in the Saṁhitās, Brāhmaṇas and Śrautasūtras. According to Keśava's Paddhati on Kauśika-sūtra (I 8; Bloomfield's ed. p. 307) and Sāyaṇa in his Intro. to Atharvaveda there were five Kalpas of the Atharvaveda mentioned by (an ancient commentator) Upavarṣa in his commentary on Jaimini I. 3. 11-14 called Kalpasūtrādhikaraṇa viz. नक्षत्रकल्प, वितानकल्प, संहिताकल्प, आङ्गिरसकल्प and शान्तिकल्प. सायण says (Muradabad edition of saṁvat 1986) 'शान्तिकल्पेपि प्रथमं वैनायकग्रहगृहीतलक्षणानि तच्छान्तये सम्भाराहरणम्, अभिषेकवैनायकहोमाः, तत्पूजाविधानम्, आदित्यादिनवग्रहयज्ञादिकमिति। (p 81, and p. 28 of Pandit's ed.), अथर्व. परिशिष्ट XLIX (चरणव्यूह p. 337, l. 7). Vide JAOS vol. XI. p. 376-378 for the Kalpas of the Atharvaveda. The ब्रह्माण्डपुराण II. 35. 61-62 states 'नक्षत्रकल्पो वैतानस्तृतीयो संहिताविधिः। चतुर्थोऽङ्गिरसः कल्पः शान्तिकल्पश्च पञ्चमः। श्रेष्ठा स्त्वथर्वणामेते संहितानां विकल्पकाः॥'. The same verses occur in वायुपुराण 61. 54; compare also विष्णुपु० III. 6. 13-14.

mantras form an independent mantra material. It should be noted that at the end all these śāntis are spoken of as 'prāyaścitta'.

The subjects treated of in the Madanaratna (about 1425 to 1450 A. D.) on Śāntika-pauṣṭika would indicate how extensive was the cult of śāntis recommended in medieval times. The Anukramaṇikā at the beginning of the Ms. mentions the following: Vināyakasnāna; śāntis to placate the nine planets from the Sun to Ketu: Śanaiścarvrata; śāntis to placate Saturn extracted from Skanda (Nāgarakhaṇḍa and Prabhāsakhaṇḍa); worship of Jupiter and Venus; Śāntis based on the Yāmalas [1172a] on the conjunction of five or more planets; Grahasnānas from Viṣṇudharmottara; śāntis of the tithi and weekday when fever and other diseases seize a man; Nakṣatraśānti; śāntis for the nine nakṣatras called Janma and the rest (vide note 772 for these nine nakṣatras); śāntis for birth on Amāvāsyā, or on Mūla, Āśleṣā or Jyeṣṭhā nakṣatra; śānti for birth on the same nakṣatra as that of the father or (elder) brother; śāntis for birth on Gaṇḍa, Vaidhṛti, Vyatīpātayoga, Saṅkrānti, Viṣanāḍī, eclipses; śānti called Gomukhaprasava; śāntis declared for the protection of the foetus from the first and following months from conception; *bali* offerings; medicine for removing pains of the foetus; measures for easy delivery; for protection of the child after birth; bali on first day with mantras &c.; nīrājana &c., description of sprinkling the infant with holy water, satiating gods and pitṛs with water, homas, *yantras* (mystical diagrams);

1172a. The *Yāmalas* are works of Tantra class, the numbers of which are variously given. But they are often said to be eight. Vide note 1598 below on *tantras*. The Rudrayāmala tantra was published by Jivananda containing over 6000 verses in 66 chapters in 1892. There are works called Gaṇeśayāmala, Brahmayāmala, Rudra-yamala, Viṣṇuyāmala, Śakti-yāmala, and several others. Certain *ghaṭīs* (or nāḍīs) of certain tithis, weekdays and nakṣatras are said by the Smṛti-kaustubha to be *viṣanāḍīs or viṣaghaṭīs* (producing very disastrous results), but in astrological works certain ghaṭīs of nakṣatras only have that appellation and a person born on those ghaṭīs forebodes the death and loss of the father, the mother, wealth and himself by poisoning, arms and missiles (according to Dharmasindhu p. 184). The Madanaratna on Śāntika (folios 15b to 20b) sets out numerous details about all the 27 nakṣatras from the work of Ātreya, one (detail) being the viṣaghaṭī of each nakṣatra e. g. as to Aśvinī three nāḍikās after 50th ghaṭikā constitute viṣanāḍī, as to Bharaṇī one ghaṭī after 24, as to Punarvasu and Puṣya one ghaṭī after 30 and 20 ghaṭīs respectively and so on.

general rules about the rites on the 1st to the 12th day after birth and in the first and following months of the first year after birth; applying ointments, fumigation, baths with mantras when a child is seized (or possessed) by an evil spirit; *homa* with *dūrvās* and homa for long life; śānti for *adbhutas* and śāntis for strange occurrences about images, Agni, trees, rainfall, reservoirs of water, for strange births, for birth of twins, for strange happenings about implements, beasts, collapse of temples and houses; śāntis for various *utpātas* and *adbhutas;* śāntis about kapota bird and on seeing the *coitus* of crows; śāntis relating to fall on one's body of the house lizard and chameleon; śāntis on impurity due to births and deaths; śāntis relating to horses and elephants; śāntis on weekdays; mahāśānti; Navagrahamakha; rules about Ayutahoma and its procedure, and about Lakṣahoma and Koṭihoma from Narasiṁhapurāṇa, Devīpurāṇa and Bhaviṣyapurāṇa;[1172b] Vasor-dhārā from Devīpurāṇa. The adbhutas mentioned in *kāṇḍikā* 93 (of the Kauśika-sūtra) are: showers (of ghee, honey, meat, gold, blood and other terrible showers); yakṣas (supernatural apparitions like apes, beasts, crows appearing in the form of human beings); croaking of two frogs; wrangling of family members; earth-quake; eclipse of the sun; eclipse of the moon; auṣasī (day-break, morning?) does not go up; when *samā* (year?) becomes terrible; when there is fear of inundations; when brāhmaṇas are armed; when images of gods dance, fall down, laugh, sing or present other forms; where two ploughshares get entangled; where two ropes or two threads (become entangled); where one Agni comes in contact with another; when a cow gives birth to twins; when a

---

1172 b. *Vasordhārā* (literally a stream of wealth). Vide H. of Dh. vol. II. p. 1253 n 2696 for it. It is described at great length in Rājanīti-prakāśa pp. 447–457, quoting Devīpurāṇa, and in Kṛtyakalpataru (Rājadharmakāṇḍa p. 201–212) quoting Bhaviṣya. It is an ancient idea, as Tai. S. V. 4. 8 mentions it 'वसोर्धारां जुहोति वसोर्मे धाराऽसदिति &c.'. The शान्तिमयूख p. 43 prescribes the following mantras in Vasordhārā, viz. 9 mantras of the hymn beginning with 'Agnim-īḷe' (Ṛg. I. 1. 1–9), the six mantras in Ṛg. I. 154, 1–6 (Vi ṇor-nu kam), the 15 mantras of Ṛg. II. 33, the nine mantras of Ṛg. IX. 1 (svādiṣṭhayā madiṣṭhayā), the Mahāvaiśvānarasāma and Jyeṣṭhasāma. On p. 210–11 of the कृत्यकल्प० (राजधर्म) the following verses occur 'वसुर्द्रव्यं घृतं वाज्यममृतं हविष्कामिकम्। तत्रधारा सदा देया वसोर्धारा हि सा मता। देया धारा सदा वत्स रिपुनाशाय विद्धि ताम्। विच्छेदो नित्यहोमस्य न कार्यस्तु कदाचन॥' अनुशासनपर्व.

mare, or a she-ass or a woman[1173] (gives birth to twins); when cows yield bloody[1174] milk; when a bull sucks the udder of a cow; where a cow sucks the udder of another cow; where (a cow, horse, mule or a person) smells at *ākāśapheṇa* (white scuttle fish bone supposed to be sea-foam); when ants behave in an unusual way; when blue[1175] bees act in an unusual way; where the honey bees act in an unusual way; when an *adbhuta* happens not known before (or that surpasses all previous records); when anything is torn (or shattered in pieces) in a village, residence, shed for sacred fires or meeting hall; when water spurts up in a waterless place; where sesame yield equal oil (?); where sacrificial offerings are polluted by being touched by birds, two-footed animals and quadrupeds; when the locks of hair (of a boy or girl) turn towards the left; when the sacrificial post strikes shoots; when a meteor is seen falling by day; when a comet darkens the Great Bear; when the nakṣatras fall frequently (from the sky);[1175a] when a bird alights (on one's house) with flesh in its beak; when a light flashes without there being any fire; where Agni seems to breathe (or hiss) as it were; where clarified butter, oil or honey trickles; where village fire burns down a house; where accidental fire burns one's house; where a bamboo splits open with a sound; where a jar splits in a reservoir of water or a pan (when put on fire) splits or a vessel in which barley is put splits.[1176]

1173. Compare कात्यायनश्रौतसूत्र 'भार्यागोषु यमजनने मारुतं त्रयोदशकपालं निर्वपेत्' 25. 4. 35 with कौशिक 93. 17-18 यमवत्सायां गवि। वडवागर्दभ्योर्मानुष्यां च'.

1174. Compare कौशिक 43. 19 'यत्र धेनवो लोहितं दुहते' with शतपथ XII. 4. 2. 1 'तदाहुर्यस्याग्निहोत्री लोहितं दुहीत किं तत्र कर्म का प्रायश्चित्तिरिति' &c.

1175. 'Nīlamakṣānācāre' Kauśika 93. 24; makṣā (as a collector of honey) occurs in Ṛg. X. 40. 6 'Yuvor ha makṣā paryaśvinā madhvāsā bharata niṣkṛtam na yoṣaṇā'.

1175 a. नक्षत्रेषु पतापतेषु। कौशिक 93. 35; वार्तिक 6 on पा. VI. 1. 12 is चरिचलिपतिवदीनामभ्याक्रु चाभ्यासस्य and पतञ्जलि gives the instances as चराचर, चलाचल, पतापत, वदावद.

1176. Many gṛhyasūtras have passages resembling those in कौशिक For example, मानवगृह्य II. 15. 6 has यद्यर्चा दह्येद्वा नश्येद्वा प्रपतेद्वा प्रभज्येद्वा प्रहसेद्वा प्रचलेद्वा द्वारवंशो वा स्फुटेत्। गौर्वा गां धयेत्। स्त्री वा स्त्रियमाहन्यात्। कर्तसंसर्गे हलसंसर्गे मुसलसंसर्गे मुसलप्रपतने मुसले वाव शीर्यैतान्यस्मिंचाद्भुत एताभिर्जुहुयात्। Then ten आहुतिs with ten मन्त्रs are prescribed viz. Ṛg. I. 89. 6, V. 51. 11, V. 51. 12, V. 51.13, X. 63. 15, VI. 47. 11, VII. 19. 7, X. 152. 4, X. 180. 2, and Tai. Br. III. 5.11. Some of these like Ṛg. X. 152. 4 and X. 180. 2 occur in all Saṃhitās.

(*Continued on next page*)

It would be impossible for reasons of space and also of usefulness to set out the śāntis prescribed for the above *adbhutas* in Kauśika, but a few may be described by way of illustration. When there is an earthquake[1177] one should offer (oblations of ghee) with five verses, three of which are addressed to Jiṣṇu (Viṣṇu). Three of the verses are: "Just as the sun shines brightly in the heaven, Vāyu dwells in the sky and Agni enters the earth, so may this Jiṣṇu be firm and unmoving. As the rivers day and night pour their sediment (clay or mud carried by them) in the sea without fail, similarly may all tribes (of gods?) with one mind approach my invocation (or sacrifice) without fail; may the Goddess (Earth) along with all deities be firm and unmoving for me and may (the Goddess) drive away from us all evil and pierce my enemies that hate me." After having offered oblations with the words '*svāhā* to the earth' he should offer oblations with the verses Atharva VI. 87. 1, VI. 88. 1 and with the verses of the *anuvāka* beginning with Atharva XII. 1. 1. This is the prāyaścitti there (in case of an earthquake).

Where darkness seizes the sun, one should offer oblations with the verses 'arranging according to the season divine wonders, (the sun) rises up revolving (driving away) the fierce (aspects) of the several seasons; may the sun passing over these on all sides come; may the Waters move along in all these worlds. May Indra and Agni, knowing well, protect thee with herbs (remedies); destroy all darkness according to the cosmic order and by true speech.' Having offered oblations with the words 'svāhā to the sun', he should again make oblations (in Agni) with the hymn Atharva XVII. 1. He worships with the Rohita hymns (Atharva XIII. 1-4). This is the *prāyaścitti* in this case.

(*Continued from last page*)

कौशिक 93. 26 is 'अनाज्ञाते'. The शान्ति for all अद्भुतs not specified in the well-known works is contained in कौशिक, Kaṇḍikā 119. 'यद् ग्रन्थे न पठ्यते तत्सर्वमनाज्ञातमित्युच्यते'. The शान्ति is 'यदनाज्ञातमनाम्नातमर्थस्य कर्मणो मिथः। अग्ने त्वं नस्तस्मात्पाहि स हि वेत्थ यथायथम्। अग्नये स्वाहा। वायो सूर्य चन्द्रेति च। पुरुषसंमितोऽर्थः कर्मार्थः पुरुषसंमितः। वायुर्मा तस्मात्पातु स हि वेत्थ यथायथम्॥ वायवे स्वाहा। अग्निर्मा सूर्यो मा चन्द्रो मेति च।'. Compare 'यदनाज्ञातं यदाज्ञातं यज्ञस्य क्रियते मिथु। अग्ने तदस्य कल्पय त्वं हि वेत्थ यथायथम्। पुरुषसंमितो यज्ञः यज्ञः पुरुषसंमितः। अग्ने तदस्य···यथम्॥' तै. ब्रा. III. 7. 11. 26-27.

1177. Vide कौशिकसूत्र chap. 98 for भूमिचलशान्ति, chap. 99 and 100 for śāntis in the case of solar eclipse and lunar eclipse respectively. ऋग्वेद X. 173 contains mantras similar to those in कौशिक 98.

When the (darkness) floods the moon one should offer oblation into fire with the verse[1178] "Rāhu creeps over the shining king (the moon), the former (Rāhu) strikes him (the moon) here (i. e. before us); a thousand of his (Rāhu's) bodies are to be destroyed; may (his) one hundred bodies perish!". Having offered oblations with the words 'svāhā to the Moon', he should offer oblations with the hymn 'Śakadhūmam nakṣatrāṇi yadrājānam-akurvata' (Atharva VI. 128. 1). This is the prāyaścitta in this case.[1179]

In connection with śāntis three words require to be carefully understood viz. *adbhuta*, *utpāta* and *nimitta*. Adbhuta is an ancient word. It occurs several times in the Ṛgveda and is generally applied to some gods in the sense of 'wonderful'. In some passages, however, it means 'future' and possibly also 'portentous'. For example, according to Nirukta I. 5[1180] the sage Agastya first promised to offer an offering to Indra, but later he desired to offer the same to the Maruts, that then Indra came to Agastya and complained to him as in Ṛg. I. 170. 1 (what was promised today) even that does not exist, nor will it (the *havis*) be there (for me) tomorrow; who knows (for certain)

1178. There is difference of opinion about शकधूम in 'शकधूमं नक्षत्राणीत्येतेन सूक्तेन जुहुयात्' कौशिक 100. 3 Literally it may mean 'the smoke from dried cowdung' (शकन् = शकृत् + धूम). It occurs also in कौशिक 8. 17 and 50. 65, which latter is 'उपोत्तमेन सुहृदो ब्राह्मणस्य शकृत्पिण्डान् पर्वस्वाधाय किमद्याहरिति पृच्छति।'. This shows that here at least the meaning is 'a ब्राह्मण on whose joints dried cowdung cakes were placed.' Charpentier has an interesting paper on शकधूम in Bulletin of the School of Oriental Studies (London) for 1935 pp. 449-450 where he states that various scholars have given different meanings, viz. constellation, dung smoke, weather prophet (Bloomfield), Agni (Caland), milky way and himself that it means 'Kṛttikā.'. It does not clearly appear how, conceding that शकधूम stands for कृत्तिका, a ब्राह्मण could be called शकधूम in कौशिक 50. 15 and on what grounds. According to Pāṇini IV. 3. 34 a man born on Bahulā nakṣatra was called Bahula; so one born on Śakadhūma (Kṛttikā) may be called by the same name by analogy. सोम is called the lord of plants in शतपथ VII. 2. 4. 26 and पारस्करगृह्य I. 5, and the king of brāhmaṇas (सोमोऽस्माकं ब्राह्मणानां राजा) in शतपथ V. 3. 4. 12 and V. 4. 2. 3.

1179. For a śānti on eclipse from a late medieval work, vide पुरुषार्थचिन्तामणि (pp. 355-361) quoting from मत्स्य.

1180. निरुक्त I. 5 says 'अगस्त्य इन्द्राय हविर्निरुप्य मरुद्भ्यः संप्रदित्सांचकार स इन्द्र एत्य परिदेवयांचक्रे। न नूनमस्ति नो श्वः कस्तद्वेद यदद्भुतम्। अन्यस्य चित्तमभिसंचरेण्यमुताधीतं वि नश्यति॥ (ऋ. १. १७०. १)। न नूनमस्त्यद्यतनं नो एव श्वस्तनम्। ...कः तद् वेद यद् अद्भुतम्। इदमपि इतरत् अद्भुतम् अभूतमिव। निरुक्त I. 6. Ṛgveda I. 170 has five verses which contain an interesting dialogue between Indra and Agastya.

what will happen in future'. Yāska paraphrases 'adbhuta' by the word '*abhūta*' (that has not taken place) and remarks that the word 'adbhuta' in popular speech also means 'something that has not happened before'. Ṛg. I. 25. 11[1181] says 'the intelligent man expects from this (Varuṇa) all wonders (or portentous happenings), whether already performed or to be performed'. Ṛg. X. 105. 7 is perhaps a little clearer than the preceding. '(May Indra reduce our sins) Indra who is golden-bearded, who has tawny horses, whose jaw is never broken and who made against the *dasyu* for easily killing him a thunderbolt like the sky that is wonderful (or full of portents)'. The word usually employed in the Gṛhyasūtras is *adbhuta* and the śāntis are called 'adbhutaśāntis'. Adbhuta is a word of very general import. It includes not only such serious phenomena as earth-quakes, eclipses, comets, falling stars but such comparatively minor yet unexpected or unusual happenings as a cow yielding blood-red milk or a cow sucking the udder of another cow. The ancient writer Vṛddha-Garga defines 'adbhuta' as any occurrence that had not occurred before or a total change coming over what has occurred before.[1182] The 67th Ātharvaṇa-pariśiṣṭa is called Adbhutaśānti (pp. 432–435). It distributes 'adbhutas' into seven groups relating to Indra, Varuṇa, Yama, Agni, Kubera, Viṣṇu and Vāyu and names some adbhutas under each such as a rainbow at night (relating to Indra), a vulture or owl alighting on a man's house or a kapota entering it (relating to Yama), smoke without fire (relating to Agni), eclipse on the nakṣatra of a man's birth (relating to Viṣṇu) and prescribes as śānti the *japa* of Atharvaśiras, making brāhmaṇas say 'svasti,' honouring and feeding brāhmaṇas. That pariśiṣṭa is based on the Adbhutabrāhmaṇa of the Sāmaveda.

The word 'utpāta' is rare in the Śrauta or Gṛhya sūtras. The Gautamadharma-sūtra, after enjoining upon the king to

1181. अतो विश्वान्यद्भुता चिकित्वाँ अभि पश्यति। कृतानि या च कर्त्वा॥ ऋ. I. 25. 11; यज्ञो यश्चके सुहनाय दस्यवे हिरीमिशो हिरीमान्। अरुतहन्वरद्भुतं न रजः॥ ऋ. X. 105. 7.

1182. तत्र वृद्धगर्गः। अभूतपूर्वं यत्पूर्वं यत्पूर्वं जायतेन्यथा। तदद्भुतमिति प्रोक्तं नैमित्तं त्र्यात्रिमित्तजम्॥ q. by अद्भुतसागर p. 4. अथर्वपरिशिष्ट (p. 344ff) provides how certain portents indicated evil and death to the kings of certain countries. Vide the 'Reports of the Magicians and astrologers of Nineveh and Babylon' referred to above in note 839. Prof. Neugebauer refers to Babylonian tablets containing thousands of omens and observes that from about 700 B. C. systematic observational reports were made by astronomers to the royal court, in which no clear line of demarcation was drawn between astronomical and meteorological phenomena. Vide E. S. A. p. 96.

select a learned, well-conducted brāhmaṇa as his *purohita*, provides that the king should give heed to what astrologers and interpreters of omens tell (him) and that the purohita should perform śānti rites, rites for prosperity (such as vāstu-homa) and magic rites (on behalf of the king[1183]). But in the Purāṇas and the medieval Sanskrit works it is far more frequent than the word adbhuta; sometimes *adbhūta* and *utpāta* are used as synonyms. Garga says[1184] 'deities become unfavourable owing to the wrong doings of men and create extraordinary happenings in the sky, atmospheric region and on the earth. These are the utpātas for all worlds created by gods; these utpātas sally forth for the destruction (of people) and they by their (terrific) appearances rouse people (to do what is proper.)'. Here the words 'adbhuta' and 'utpāta' are used as synonyms. Similarly, Matsya (228. 1-2) appears to regard the two words as synonyms.[1185] Generally, however, the word utpāta denotes occurrences that portend evil to all. Amarakośa treats 'ajanya', 'utpāta' and 'upasarga' as synonyms. Utpāta is defined by Garga, Varāhamihira[1186] and Atharva-pariśiṣṭa LXIV as the

---

1183. Vide p. 543 note 799 above for the passage from गौ. ध. सू. where the word उत्पात occurs.

1184. ततोऽपचारे मर्त्यानामपरज्यन्ति देवताः। ते सृजन्त्यद्भुतान् भावान्दिव्यभूम्यन्तरिक्षगान्॥ त एव सर्वलोकानामुत्पाता देवनिर्मिताः। विचरन्ति विनाशाय रूपैः सम्बोधयन्ति च॥ गर्ग q. by उत्पल on बृहत्सं. 45. 3; very similar verses are quoted from गर्गसंहिता and बार्हस्पत्य in अद्भु. सा. p. 5. मत्स्य chap. 229 summarises what वृद्धगर्ग told अत्रि and verse 5 is just like the first verse above; it is पुरुषापचाराक्षियतमपरज्यन्ति देवताः। ततोपरागाद्देवानामुपसर्गः प्रवर्तते॥; the बृहत्संहिता 45. 2-3 'अपचारेण नराणामुपसर्गः पापसञ्चयाद्भवति। संसूचयन्ति दिव्यान्तरिक्षभौमास्त उत्पाताः॥ मनुजानामपचारादपरक्ता देवताः सृजन्त्येतान्।. It would be noticed that Varāha repeats almost the very words of वृद्धगर्ग. The शल्यपर्व (37. 14-15) speaks of a तीर्थ called गर्गस्रोतस् visited by बलराम on the Sarasvatī and credits him with proficiency in the movements of luminaries and अनुशासन 18. 38 speaks of him as proficient in कालज्ञान with its 64 aṅgas. Garga was a famous gotra name. Vide Pāṇ. IV. 1. 105 (Gargādibhyo yañ).

1185. दिव्यान्तरिक्षभौमेषु या शान्तिरभिधीयते। तामहं श्रोतुमिच्छामि महोत्पातेषु केशव॥ अथातः संप्रवक्ष्यामि त्रिविधामद्भुतादिषु। विशेषेण तु भौमेषु शान्तिः कार्या तथा भवेत्॥ मत्स्य 228. 1-2.

1186. यानत्रेरुत्पातान्गर्गः प्रोवाच तानहं वक्ष्ये। तेषां संक्षेपोयं प्रकृतेरन्यत्वमुत्पातः॥ बृहत्सं. 45. 1; यः प्रकृतिविपर्यासः सर्वः संक्षेपतः स उत्पातः। क्षितिगगनदिव्यजातो यथोत्तरं गुरुतरो भवति॥ समाससंहिता of वराह q. by उत्पल on बृहत्सं. 45. 1. This verse is quoted in the अ. सा. p. 5 as taken from a work called वटकणिका; and the अ. स. ascribes the verse to वराह himself on the same page lines 3-4 'अत एव यः प्रकृति-

(*Continued on next page*)

reverse of the usual natural order. *Nimitta* means, according to Amarakośa (nimittam hetulakṣmaṇoḥ) 'cause or prognostic sign'. Nimitta may be auspicious or inauspicious. This is one distinction between utpāta (which generally denotes an unlucky portent) and nimitta. There is another distinction. Nimitta is often restricted to the throbbing of a person's limbs (as in Matsya chap. 241), though here and there it is used in a wider sense as in Gītā (I. 31) ('nimittāni ca paśyāmi viparītāni Keśava' O Kesava! I see adverse omens), Rāmāyaṇa, Ayodhyā-kāṇḍa. 4. 17–19, Bhīṣma-parva 2. 16–17, Virāṭa 46. 30, Atharva-pariśiṣṭa LXIV (Utpāta-laksaṇa) 10. 9–10.[1187] It may be noted that Manu VI. 50 mentions 'utpāta' and 'nimitta' separately (p. 527 note 758).

Examples of unfavourable happenings (nimittas or utpātas) occur plentifully in the Mahābhārata, Sabhāparva 80. 28–31, 81. 22–25, Vanaparva 179. 41, 224. 17–18, Virāṭa .39. 4–6, 46. 24–32, Udyoga 84. 4–9, 156. 28–30, Bhīṣma 2. 17–33, 3. 65–74, 19. 36–38, 99. 21–28, 112. 6–12, Droṇa 7. 34–41, 77. 3–7, Śalya 23. 21–24, 56. 8–14, 192. 17–21, Mausala 1. 1–5, 2. 1–17 and the Rāmāyaṇa, Ayodhyā 4. 17–19, Araṇyakāṇḍa 23. 1–7 and 10–25, Yuddhakāṇḍa 10. 14–20, 23. 4–11, 35. 25–35, 41. 13–20, 53. 32, 65. 47–51, 95. 43, 96. 40–44. The chief *utpātas* and *adbhutas*, are: terrible dreams, roar of contending winds i. e. hurricanes

---

(*Continued from last page*)

विपर्यासः प्रायः संक्षेपतः', 'इह वटकणिकायां वराहेण प्रायः शब्दः प्रयुक्त इति.' This indicates that वराहमिहिर wrote a work called वटकणिका which is the same as the समाससंहिता of वराह quoted by उत्पल. This important point will be elaborated elsewhere. प्रकृतेरन्यथाभावो यत्र यत्रोपजायते। तत्र तत्रापि जानीयात् सर्वमुत्पातलक्षणम्॥ अथर्वपरिशिष्ट (chap. LXIV. I. 2 p. 409); प्रकृतेरन्यथोत्पातः संक्षेपस्तावदीदृशः। गर्ग q. by अद्भुतसागर p. 5. The निमित्त of भद्रबाहु states very similarly 'प्रकृतेर्योन्यभावो विकारः सर्व उच्यते।' (II. 2) and 'प्रकृतेर्यो विपर्यासः स उत्पातः प्रकीर्तितः। दिव्यान्तरिक्षभौमाश्च व्यासमेषां निबोधत॥' (XIV. 2) The विष्णुपु० II. 5. 26 speaks of गर्ग as an ancient sage and as having known all the consequences of nimittas 'यमाराध्य पुराणर्षिर्गर्गो ज्योतींषि तत्त्वतः। ज्ञातवान् सकलं चैव निमित्तपठितं फलम्॥.'

1187. निमित्तानि समालोक्य कृत्वा पावनमादितः। महाशान्तिं प्रयुञ्जीत सर्वोपद्रवनाशिनीम्॥ सर्वरोगप्रशमनीमुत्पातफलनाशिनीम्। रौद्रीं कुर्यान्महाशान्तिं श्रद्धया बहुदक्षिणाम्॥ अथर्वपरिशिष्ट LXIV (उत्पातलक्षण) 10. 9–10. In भीष्मपर्व 2. 16–17, we read इह युद्धे महाराज भविष्यति महान् क्षयः। तथेह च निमित्तानि भयदान्युपलक्षये॥ इयेना गृध्राश्च काकाश्च कङ्काश्च सहिता बकैः। सम्पतन्ति नगाग्रेषु समवायांश्च कुर्वते॥; in वनपर्व 155. 2–5 sveral portents such as fall of meteors, sun becoming pale, earthquake, rain of dust are described and in verse 6 they are referred to as उत्पात and अद्भुत 'अन्ये च बहवो भीमा उत्पातास्तत्र जज्ञिरे। तदद्भुतमभिप्रेक्ष्य धर्मयुद्धे युधिष्ठिरः॥'.

(*nirghāta*), meteors, she-jackals howling towards the south, fierce and dry wind with shower of sand; earth-quakes; sun eclipse at an unusual time (Rāmāyaṇa III. 23. 12, Sabhā 80. 29, 81. 23 Śalya 56. 10, Bhīṣma 3. 28); flashes of lightning without clouds; carnivorous birds like vultures and crows on temples; fort-walls and bastions; spontaneous fire; rent banners; halo of the sun and moon; river-flowing with bloody waters; rain without clouds, rain of blood or mud; trumpeting of elephants; sky filled with darkness; horses shedding tears; peals of thunder in a clear sky, rivers flowing in reverse direction; throbbing of the left arm and eye (in men); croaking of frogs; sea lashed into fury; images of gods trembling, dancing, laughing or weeping (Bhīṣma 113. 11); pale sun, birds like pigeons and *mainas* and deer weeping with face towards the sun; appearance of a headless trunk near the sun; strange births such as ass born of a cow, mouse born of an ichneumon (Yuddhakāṇḍa 35. 30). The auspicious signs described in the epics, are comparatively few as in Bālakāṇḍa 22.4, Udyoga 83. 23–26, 84. 117, Bhīṣma 3. 65–74, Śānti 52. 25, Āśvamedhika 53. 5–6. The principal auspicious signs are: clear sky without clouds, wind blowing[1188] cool and pleasant to the skin, no dust raised, birds and animals proceeding to a man's right side, fire without being enveloped in smoke and with flames turned towards the right, shower of flowers, auspicious birds like *cāṣa*, *krauñca*, peacock sending up chirpings to the right (Karṇa 72. 12–13).

The omens and portents mentioned in the two epics are generally described as occurring at certain important times and events, e. g. on the eve of battles or when Daśaratha proposed that Rāma be crowned as *yuvarāja*, or when Pāṇḍavas startad on their exile into the forest or when Bhīṣma was anointed as commander-in-chief of the Kaurava hosts or when Arjuna vowed that he would kill Jayadratha before sunset. There is no gradation or order in mentioning the omens and portents in these two works, but they are set out pell-mell. Untimely rain, thunder without clouds, croaking of frogs are on the same level and

---

1188. ववौ शिवः सुखो वायुः सर्वगन्धवहः शुचिः। शान्तिपर्व 52. 25; शिवश्चानुववुर्वायुः प्रशान्तमभवद्रजः। प्रदक्षिणानुलोमाश्च मङ्गल्या मृगपक्षिणः। प्रयाणे वासुदेवस्य बभूवुरनुयायिनः॥ उद्योग. 83. 23–24 and 26 मन्त्राहुतिमहाहोमैर्हूयमानश्च पावकः। प्रदक्षिणसुखो भूत्वा विधूमः समपद्यत॥; रघुवंश III. 14 (दिशः प्रसेदुर्मरुतो ववुः सुखाः प्रदक्षिणार्चिर्हविराददे। बभूव सर्वं शुभशंसि तत्क्षणं भवो हि लोकाभ्युदयाय तादृशाम्॥) seems to be an echo of the above verses; compare also रघु० IV. 25, X. 72–74.

uttered in the same breath with eclipses. But Garga,[1189] Parāśara, Sabhā-parva, Bṛhatsaṁhitā 45. 2, Matsyapurāṇa 229.5, Atharva-pariśiṣṭa LXIX (1. 2) and other works divide *utpātas* into three classes, viz. *divya* (arising from heavenly bodies), *āntarikṣa* (springing in the sky or atmospheric region) and *bhauma* (that appear on the earth). This classification is ancient enough. The Atharvaveda[1190] expressly refers to the three classes of utpātas 'May the earthly and atmospheric utpātas and the planets moving in heaven confer welfare on us'. The Bṛhatsaṁhitā[1191] says that it is the king's business to arrange for śāntis in his kingdom for counteracting (the consequences of portents). Garga[1192] declared that those who, when advised by brāhmaṇas for performing śāntis, perform auspicious rites with faith do not suffer defeat, but that those who having no faith or because of atheism or resentment do not perform rites for counteracting (omens) perish in a short time. Garga, the Bṛhatsaṁhitā, Matsya 229. 6–9, Agni 263. 12–13 furnish examples of the three kinds of utpātas,[1193] viz. the *divya* ones are concerned with the abnormal conditions of planets and nakṣatras, eclipses, comets; those of atmospheric regions are hurricanes, unusual clouds, fall of meteors, twilights, preternatural reddish appearances of the quarters, halo, Fata Morgana (appearance of illusory town in the air), rainbow and strange rainfall (such as

1193. स्वर्भानु-केतु-नक्षत्र-ग्रहतारार्कचन्द्रजम्। दिवि चोत्पद्यते यच्च तद्दिव्यमिति कीर्तयेत्॥ वाय्वभ्रसन्ध्यादिग्दाहपरिवेषतमांसि च। खपुरं चेन्द्रचापं च तद्विद्यादन्तरिक्षजम्। भूमावुत्पद्यते यच्च स्थावरं वाथ जङ्गमम्। तदेकदेशिकं भौमं भूमिचालाम्बुविक्रिया। गर्गसंहिता q. by उत्पल on बृहत्सं. 45. 4–5, अ. सा. p. 6; दिव्यं ग्रहर्क्षवैकृतमुल्कानिर्घातपवनपरिवेषाः। गन्धर्वपुर-पुरन्दरचापादि यदान्तरिक्षं तत्। भौमं चरस्थिरभवं तच्छान्तिभिराहतं शममुपैति। नाभसमुपैति मृदुतां शाम्यति नो दिव्यमित्येके॥ दिव्यमपि शममुपैति प्रभूतकनकान्नगोमहीदानैः। रुद्रायतने भूमौ गोदोहात्कोटिहोमाच्च॥ बृहत्सं. 45. 4–6; मत्स्य 229. 6–9 ग्रहर्क्षवैकृतं दिव्यमान्तरिक्षं निबोध मे। उल्कापातो दिशां दाहः परिवेषस्तथैव च॥ गन्धर्वनगरं चैव वृष्टिश्च विकृता च या। एवमादीनि लोकेऽस्मिन्नान्तरिक्षं विनिर्दिशेत्॥ चरस्थिरभवो भौमो भूकम्पश्चापि भूमिजः। जलाशयानां वैकृत्यं भौमं तदपि कीर्त्यते॥ q. by हेमाद्रि on व्रत vol. II p. 1076; अग्नि (263. 12–13) has same verses as मत्स्य.

of blood-red water, or fall of rain with fishes, tortoises &c.); those of the earth are earth-quake and unusual states of water reservoirs. The Bṛhatsaṁhitā remarks that the evil consequences of earthly (*bhauma*) utpātas when counteracted with śāntis are removed, the evil consequences of utpātas from the atmospheric regions are reduced to a mild form (by śāntis), while, according to some (ācāryas like Kāśyapa, says Utpala) *divya* utpātas are not counteracted by śāntis at all; the opinion of Varāhamihira himself appears to be that the consequences of even *divya* utpātas are conjured away by the gifts of plenty of gold, food, cows and land and by spilling the milk of cows on the ground or in a Rudra temple and by performing *Kaṭihoma*. Varāhamihira and Matsya further provide that daiva utpāta has evil effects (lit. bears fruit) in eight ways, viz. on the king himself, his son, his treasury, his conveyances (horses, elephants &c,), his capital, his queen, purohita and his people.[1194]

Numerous śāntis bearing different names are prescribed in Matsya, by Varāhamihira and others. The 18 śāntis prescribed in Matsya (228)[1194a] and bearing the names of several gods will be briefly mentioned here. Abhaya-śānti is prescribed when a king desires to be a conqueror or when he is attacked by enemies or when he fears that witchcraft has been practised against him or when he desires to uproot his enemies or when a great danger threatens. The *Saumya* śānti is prescribed when a man is attacked by Tuberculosis or is weak owing to wounds or when a man desires to perform a sacrifice. When there is an earthquake or when there is a famine of food or there is excessive rain or drought or there is danger of locusts or when thieves are operating the *Vaiṣṇavī* śānti is prescribed; *Raudrī* śānti is employed against an epidemic among cattle or human beings or when ghosts appear or when a coronation is to take place or when there is fear of an invasion or there is treachery in one's kingdom, or when enemies are to be killed; *Brāhmī* śānti is performed when it is feared that Veda study would

1194. आत्मसुनकोशवाहनपुरदारपुरोहितेषु लोके च। पाकमुपैति दैवं परिकल्पितमष्टधा नृपतेः॥ बृहत्सं. 45. 7. Compare मत्स्य 229. 12-13 राज्ञः शरीरे लोके च पुरद्वारे (v. l. पुरे दारे) पुरोहिते। पाकमायाति पुत्रेषु तथा वै कोषवाहने। q. by अ. सा. p. 9, हेमाद्रि on व्रत vol. II. p. 1076. There is close correspondence between the two here and elsewhere because both expressly say that they will draw upon what Garga declared to Atri.

1194a. The whole of Matsya 228 is quoted by Hemādri on Vrata vol II. pp. 1073-1075 and by अ. सा. pp. 733-736.

perish or when atheism prevails or where honour is paid to persons unworthy of it; if strong winds blow for more than three days and disease spreads due to *vāta*, then *Vāyavī* śānti should be performed; *Vāruṇī* when there is fear of drought or there is abnormal rain (of blood &c.); *Bhārgavī* when there is danger of false accusation; *Prājāpatyā* when abnormal births take place; *Tvāṣṭrī* when there are abnormal conditions of implements; *Kaumārī* when śānti is to be performed for children; *Āgneyī* when fire shows portentous appearances; *Gāndharvī* when a person is disobeyed or his wife and servants perish, or he desires to perform śānti for horses; *Āṅgirasī* when elephants are affected; *Nairṛtī* when danger arises from goblins; *Yāmyā* when there is fear of an accident leading to death or a bad dream; *Kauberī* when wealth is lost; *Pārthivī* when trees are affected by abnormal conditions; *Aindrī* when portents happen on Jyeṣṭhā nakṣatra or on Anurādhā.

The Agnipurāṇa (263. 7–8) refers to these 18 śāntis and says that the best śāntis are Amṛtā, Abhayā and Saumyā. Varāhamihira mentions numerous śāntis on the happenings of several abnormal incidents. For reasons of space nothing can be said here about them. But one śānti deserves to be set out.[1195] 'If a man perceives Yakṣas, the astrologer should declare that an epidemic is very near; for counteracting them Garga performed a propitiatory rite, viz. Mahāśāntis, offerings, plentiful food, worship of Indra and Indrāṇī.' The Bṛhatsaṁhitā sets out (45. 82–95) certain happenings as not portentous when they happen in certain seasons and quotes several verses of Ṛṣiputra which also occur in Matsya 229. 14–25 with some variations; e. g. in Caitra and Vaiśākha the following are auspicious (and not portents requiring śānti) lightning, meteors, earthquake, blazing twilight, noisy storms, halo, dust in sky, smoke in forests, red sunrise and sunset.

1195. दृष्टेषु यातुधानेषु निर्दिशेन्मरकमाशु सम्प्राप्तम्। प्रतीघाताय चैषां गर्गः शान्तिं चकारेमाम्॥ महाशान्त्योऽथ बलयो भोज्यानि सुमहान्ति च। कारयेत महेन्द्रं च माहेन्द्रीं च समर्चयेत्॥ बृहत्सं. 45. 79–80.

CHAPTER XXI

Individual Śāntis

It is now time to turn to individual śāntis, mostly post-vedic. The first is Vināyaka-śānti or Gaṇapatipūjā. This is performed at the commencement of all saṁskāras such as *upanayana* and marriage in order that the fruit thereof may be had without obstacles or for averting the evil effects of portents or in order to mitigate the adverse effects of the death of a sapiṇḍa or the like. When it is performed for its own sake it should be performed on the 4th tithi of the bright half, on Thursday and the auspicious nakṣatras Puṣya, Śravaṇa, Uttarā, Rohiṇi, Hasta, Aśvinī, Mṛgaśīrṣa, but when performed at the commencement of Upanayana or the like, one may perform it at a time suited to the time of the principal rite. The *saṅkalpa* is given below.[1196] In H. of Dh. vol. II pp. 213-216 it has been shown how in the earliest stages represented by the Mānava-gṛhya and Baijavāpa-gṛhya which speak of four Vināyakas, all were evil spirits, how in the next stage represented by the Yājñavalkyasmṛti (I. 271–294). Vināyaka is not only represented as causing obstacles (Vighnakṛt) but also as bringing success in all actions and rites (Vighnahṛt) and how later on it was prescribed that Gaṇapatipūjā must be done first in all rites (Gobhila I. 13). Yāj. I. 293 provides[1197] that by worshipping Vināyaka in the way prescribed and also the planets, a person secures success in his undertakings and the highest prosperity. The Viṣṇudharmottara II. 105. 2–24 borrows the verses of Yāj. I. 271–292, though not in the same order and adds a few. The Brahmāṇḍa provides[1198]

1196. अथोपनयनविवाहादौ निर्विघ्नफलप्राप्त्यर्थमुपसर्गनिरासाय वा सपिण्डमरणादिनिमित्तकप्रतिकूलनिवृत्त्यर्थं वा विनायकशान्तिः कार्या। तत्र कालः शुक्लपक्षचतुर्थी गुरुवारः पुष्यश्रवणोत्तरारोहिणीहस्ताश्विनीमृगनक्षत्राणि शस्तानि। उपनयनादौ तु प्रधानकालानुरोधेन यथासम्भवकालो ग्राह्यः। तत्रामुककर्मणो निर्विघ्नफलसिद्ध्यर्थमिति वा उपसर्गनिवृत्त्यर्थमिति वा, अमुकसपिण्डमरणनिमित्तकाशुचित्वप्रातिकूल्यनिरासार्थमिति वा सङ्कल्प ऊह्यः। धर्मसिन्धु p. 205; प्रतिकूल has a special meaning, for which vide H. of Dh. vol. II p. 516.

1197. एवं विनायकं पूज्य ग्रहांश्चैव विधानतः। कर्मणां फलमाप्नोति श्रियं चाप्नोत्यनुत्तमाम्॥ याज्ञ. I. 293, भविष्य, ब्राह्मपर्व 23. 30.

1198. जातकर्मादिसंस्कारे गर्भाधानादिकेपि च। यात्रायां वणिज्यादौ युद्धे देवार्चने शुभे। संकटे काम्यसिद्ध्यर्थं पूजयेद्यो गजाननम्। तस्य सर्वाणि कार्याणि सिध्यन्त्येव न संशयः॥ ब्रह्माण्ड III. 42. 42–44; ब्रह्माण्ड (IV. 44. 65–70) gives 51 names of गणेश.

that Gajānana must be worshipped for success in all desires, in all *saṃskāras* such as Garbhādhāna and Jātakarma, when starting on a journey or engaging in a commercial undertaking, at the time of battle, in the worship of gods, in troublous times. The Bhaviṣyottara chap. 144 has a śānti called Gaṇanāthaśānti which resembles the Vināyakaśānti of Yāj.

In the Yājñavalkya-smṛti (I. 294-308), the Vaikhānasa-smārta-sūtra (IV. 13-14), the Baudhāyana-gṛhyaśeṣasūtra, the Matsya-purāṇa (93. 1-105), the Viṣṇudharmottara I. 93-105 and other purāṇas, in the Bṛhad-Yogayātrā (chap. 18. 1-24), and in the medieval digests provision is made for a śānti rite to the nine *grahas*, viz. the Sun, the Moon, Mars, Mercury, Jupiter, Venus, Saturn (mentioned in the order of the week-days), Rāhu and Ketu. This *navagrahaśānti* is the model (*prakṛti*) of all śāntihomas in all medieval digests. The Vaikhānasa-smārtasūtra[1199] provides that all religious rites should be preceded by this navagraha-śānti. Yājñavalkya[1200] says 'one desirous of prosperity, of removing evil or calamities, of rainfall (for crops), long life, bodily health and one desirous of performing magic rites against enemies and others should perform a sacrifice to planets.' The Matsya (93. 5-6) states that the *navagrahamakha* is of three kinds, viz *Ayutahoma* (in which 10000 oblations are made), Lakṣahoma and Koṭihoma. The first is described at length in Matsya 93. 7-84, Lakṣahoma in 93. 85-118, Koṭihoma in 93. 119-139. The Matsya further provides[1201] that Ayutahoma should be performed in marriages, festivals, sacrifices, establishment of images and other rites, in order that no obstacles should arise therein and on occasions when the mind is perturbed or when some evil omen or unusual event happens.

1199. ग्रहपूजां पुरस्कृत्य सर्वकर्मसमारंभेदिति विज्ञायते। वै. स्मा. सू. IV. 14; the शान्तिकमलाकर says, 'अथ सर्वशान्तिप्रकृतिस्तु ग्रहयज्ञ उच्यते। तत्र स्कान्दयाज्ञवल्क्यौ श्रीकामः शान्तिकामो वा०' (folio 11a).

1200. श्रीकामः शान्तिकामो वा ग्रहयज्ञं समाचरेत्। वृष्ट्यायुःपुष्टिकामो वा तथैवाभिचरन्नपि॥ याज्ञ. I. 294, मत्स्य 93. 2 (reads वृद्ध्यायुः ० and चरन्पुनः). The मिताक्षरा explains: शान्तिकामः आपदुपशान्तिकामः सस्यादिवृद्ध्यर्थं प्रवर्षणं वृष्टिः ··· पुष्टिरनवद्यशरीरत्वम्; while अपरार्क says 'शान्तिः फलदानोन्मुखदुरितनिवारणं···पुष्टिः शरीराद्युपचयः'.

1201. विवाहोत्सवयज्ञेषु प्रतिष्ठादिषु कर्मसु। निर्विघ्नार्थं मुनिश्रेष्ठ तथोद्वेगाद्भुतेषु च। कथितोऽयुतहोमोऽयं लक्षहोममतः शृणु॥ मत्स्य 93. 84, भविष्य IV. 141. 86-87. The notes will show that several verses are common to both Yāj. and Matsya and the latter is far more elaborate than याज्ञ. or वै. स्मा. सू. It is probable that Yāj. is the earliest of the three, that वै. स्मा. सू. comes next and मत्स्य is the latest of the three.

The procedure in Yāj. being concise and probably the earliest among the extant works on *grahayajña* is set out here, with a few additions from Matsya and Vaikhānasa. The images of the nine planets should respectively be made of copper, crystal, red sandalwood, gold (for both Mercury and Jupiter), silver, iron, lead, bronze or (if all these be not available) they should be drawn on a piece of cloth with powders having colours appropriate to each planet or should be drawn on circles with fragrant substances (such as sandalwood paste). The Matsya[1202] (93. 11–12) prescribes that in drawing the images the Sun should be in the middle, that Mars, Jupiter, Mercury, Venus, Moon, Saturn, Rāhu and Ketu should be established with grains of rice respectively in the south, north, north-east, east, south-east, west, south-west and north-west. Yāj. (I. 298) proceeds garments, flowers and fragrant substances

Planet	Mantra in Yāj I. 299-301	Mantra in Matsya 93. 33-37.	Mantra in Vaikhānasa-smārta-sūtra IV. 14.
Sun	Ā kṛṣṇena, Ṛg. I. 35 2	Same.	Ā satyena (Tai. S. III. 4. 11. 2)
Moon	Imam devā, Vāj. S. IX 40, X. 18.	Āpyāyasva Ṛg. I. 91. 16 or IX. 31. 4.	Somo dhenum (Ṛg. I. 91. 20, Vāj. S. 31. 21)
Mars	Agnir-mūrdhā divaḥ kakut, Ṛg. VIII. 44. 16,	same	same
Mercury	Udbudhyasva, Vāj. S. 15.54, Tai. S. IV. 7.13.5	Agne Vivasvad-uṣasaḥ, Ṛg. I. 41. 1	Same as in Yāj.
Jupiter	Bṛhaspate ati yad-aryaḥ Ṛg. II. 23. 15.	Bṛahaspate pari diyā rathena, Ṛg. X. 103. 4	Same as in Yāj.
Venus	Annāt pari-srutaḥ, Vāj. S. 19.75, Maitrā. S. III. 116.	Śukram te anyat, Ṛg. VI. 58. 1.	Same as in Matsya
Saturn	San-no devīr, Ṛg. X. 9. 4	same	same
Rāhu	Kāndāt, Vāj. S. 13. 20, Tai. S. IV. 2. 9. 2,	Kayā naś-citra, Ṛg. IV. 31. 1.	Same as in Matsya
Ketu	Ketum kṛṇvan, Ṛg. I.6.3.	same	same

1202. मत्स्य 93. 11-12 are quoted by the मिताक्षरा on या. I. 297 and वै. स्मा. सू. (IV. 13) specifies the same as 'मध्याग्नेयदक्षिणेशान्योत्तरपूर्वपश्चिमनैर्ऋतवायव्याश्रिताः' in the order of the seven week days, राहु and केतु.

of the colour [1203] appropriate to each should be offered to the planets, also offerings should be made, *guggulu* is to be the incense for all planets and oblations of boiled rice accompanied with the mantras (specified below) should be offered respectively to the nine planets.

The Viṣṇudharmottara (I. 102. 7–10) gives the same mantras as Yāj. does, Bhaviṣya (IV. 141. 34–36) gives the same except for Rāhu, for which it gives 'Kayā naścitra,' as in Matsya. Padma (V. 82. 30–32) is same as Matsya. Yāj. then proceeds (I. 301–302) that in homa for each of the planets the fuel sticks (*samidh*)[1204] were to be 108 or 28 anointed with honey or clarified butter or with curds or with milk and they were respectively to be of the arka plant, palāśa, khadira, apāmārga, pippala, audumbara, śamī, dūrvā and kuśas for the sun, the moon and so on in order. A man [1205] of the three varṇas should honour brāhmaṇas according to the prescribed procedure (washing their feet &c.) and should feed them respectively (Yāj.I. 304) with boiled rice mixed with jaggery, or cooked in milk and sugar, sacrificial food (*haviṣya*), boiled rice from paddy becoming ripe in 60 days from sowing mixed with milk, boiled rice with curds, boiled rice with ghee, boiled rice with pounded sesame, rice mixed with meat, rice of various colours, for the sun, the moon and so on in order or with food that is available and according to his ability. The *dakṣiṇā* (fee) to the brāhmaṇas should be a milch cow, conch, draught bull, gold, garment (vāsas), a horse (white), dark cow, iron weapon, a lamb, in honour

---

1203. The colours appropriate to the nine planets and their presiding deities are stated by वै. स्मा. सू. as follows: रक्तसितातिरक्तश्यामपीतासितासितकृष्ण-धूम्रवर्णाः । अनलाप्पतिगुहहरीन्द्रशचीप्रजापतिशेषयमाधिदेवत्याः ॥. The मत्स्य slightly differs on both these; chap. 93. 16–17 provide that the colours are: red for the Sun and Mars, white for the Moon and Venus, yellowish for Mercury and Jupiter, dark for Saturn and Rāhu and smoky for Ketu. The presiding deities of nine planets according to Matsya (93. 13–14) are Śiva, Umā, Skanda, Hari, Brahmā, Indra, Yama, Kāla and Citragupta for the planets, Sun, Moon and so on respectively.

1204. कर्तव्या मन्त्रवन्तश्च चरवः प्रतिदेवतम् । अर्कः पलाशः खदिरस्त्वपामार्गोऽथ पिप्पलः । औदुम्बरः शमी दूर्वा कुशाश्च समिधः क्रमात् ॥ एकैकस्य त्वष्टशतमष्टाविंशतिरेव वा । होतव्या मधुसर्पिर्भ्यां दध्ना क्षीरेण वा युताः ॥ याज्ञ. I. 298, 301–302, मत्स्य 93, 32. 24–28. विष्णुधर्मोत्तर I. 101. 2–4 are very similar.

1205. शुद्धोदन-पायस-गुडौदन-दध्योदन-गौडिक-चित्रौदन-कृसरमाषौदन-कणौदनानि क्रमेण निवेदयेत् । वै. स्मा. सू. IV. 13; मत्स्य (93. 19–20) slightly differs from this and also from Yāj. मत्स्य (93. 38–41) prescribes Vedic mantras for the presiding deities of planets, which are mostly different from those in वै.स्मा.सू.

respectively of the sun, moon and so on. The Viṣṇudharmottara (I. 103. 1-6) contains the same fees.[1206] He should offer special worship to that planet that may be unfavourably situated (as regards his nakṣatra or horoscope) at a particular time. Yāj. winds up by saying that the rise and fall of kings depend on planets (vide note 800 for this verse). Viṣṇudharmottara (I. 106. 9-10) also has the same verse. Kṛtyakalpataru (on Śāntika, folio 5 b) quotes Bhaviṣya to the effect that planets are always favourable to him who abstains from injury to others, who is self-restrained, who acquires wealth by righteous means, and who always observes the *niyamas* (restrictive rules of conduct as in Yāj. III. 313). The Śāntimayūkha (p. 21) also quotes this verse.

The Vaikhānasasmārtasūtra (IV. 13) provides slightly different kinds of *naivedya* food for the nine planets (as in note 1205) and prescribes separate Vedic mantras for the presiding deities (of the planets) to whom oblations of ghee were to be offered. The Matsya remarks at the end of the description of Ayutahoma: 'just as armour is a protection against the wounds by arrows, so śānti (graha-yajña) is protection against the strokes of Fate.'[1207]

The Matsya (93.92) declares[1208] that Lakṣahoma is ten times of the Ayutahoma and Koṭihoma is one hundred times of Lakṣahoma in the matter of oblations, fees and rewards, that the procedure of invoking and bidding goodbye to the planets and presiding deities, the mantras for homa, bath and gifts are the same in Lakṣahoma and Koṭihoma. The Matsya gives[1209] the warning

---

1206. The दक्षिणा in वै. स्मा. सू. (IV. 14) is : रक्तधेनुमादित्याय शङ्खं सोमाय ताम्रमङ्गारकाय हिरण्यं बुधाय शुक्लं वासो बृहस्पतये हयं शुक्राय कृष्णां गां शनैश्चराय राहोश्छागं केतोरायसदण्डमिति। मत्स्य (93. 60-62) slightly differs from both याज्ञ. and वै. स्मा. सू. as to दक्षिणा and prescribes Paurāṇika mantras that are to accompany these gifts (verses 64-72).

1207. यथा बाणप्रहाराणां कवचं भवति वारणम्। तद्वद् दैवोपघातानां शान्तिर्भवति वारणम्। मत्स्य 93. 81, विष्णुधर्मोत्तर I. 105. 14. मत्स्य 228. 29 is a similar verse 'बाणप्रहारा न भवन्ति यद्वत् राजन्नृणां संनहनैर्युतानाम्। दैवोपघाता न भवन्ति तद्वद्धर्मात्मनां शान्तिपरायणानाम्॥'.

1208. अस्माच्छतगुणः प्रोक्तः कोटिहोमः स्वयंभुवा। आहुतीभिः प्रयत्नेन दक्षिणाभिः फलेन च॥ पूर्ववद् ग्रहदेवानामावाहनविसर्जने। होममन्त्रास्त एवोक्ताः स्नाने दाने तथैव च। मत्स्य 93. 119-120.

1209. अन्नहीनो दहेद्राष्ट्रं मन्त्रहीनस्तु ऋत्विजः। यष्टारं दक्षिणाहीनं नास्ति यज्ञसमो रिपुः। न वाप्यल्पधनः कुर्यात्क्षुद्रहोमं नरः क्वचित्। यस्मात्पीडाकरो नित्यं यज्ञे भवति विग्रहः॥ मत्स्य 93. 111-112 q. by कृत्यकल्प० (on शान्तिक) folio 10a.

that a sacrifice devoid of distribution of food burns (i. e. brings disasters on) the country, devoid of (proper) mantras burns the officiating priests, devoid of (proper) fees burns the sacrificer; there is no enemy as (disastrous as) a sacrifice and that a poor man should not start on a Lakṣahoma, since wrangling (about food or fees) in a sacrifice always causes trouble or misfortune (to the sacrificer). The Bṛhadyogayātrā of Varāha (chap. 18 verses 1–24) deals with *grahayajña* and closely follows Yāj. though some details are added here and there. Verses about the sun are quoted below (n 1213). The Yogayātrā also (chap. 6) deals with the same matter. The Agnipurāṇa (chap. 164) is a wholesale copy of Yāj. (I. 295–308). The Matsya (in chapter 239?) again deals with Koṭi-homa which continues for a year. The Matsyapurāṇa (chap. 94) contains nine verses on the manner in which the figures of the nine planets were to be drawn or painted and these are quoted by the Mitākṣarā on Yāj. I. 297–298 and by Kṛtyakalpataru (on śānti) folio 5a. Vide Koṭihoma in list of vratas (p. 290).

The Grahayajña in Yāj. is short and simple, but in some purāṇas such as the Bhaviṣyottara (141. 6–85) and medieval and modern works it has become an elaborate affair by the addition of numerous details. One or two details may be pointed out. Each planet was supposed to have a gotra and was[1210] deemed to have been born in a certain country (vide note 875 p. 588 for the countries of the birth of planets). Therefore, in invoking the presence of each planet these two details have to be added (as specified below in the note for the sun by way of illustration). The gotras of the grahas from the Sun to Ketu are respectively Kāśyapa, Ātreya, Bhāradvāja, Ātreya, Āngirasa, Bhārgava, Kāśyapa, Paithīnasa, Jaimini. The Saṁskāra-tattva of Raghunandana (p. 946) sets out from Skanda the gotras and countries of birth of the nine grahas and provides that if worship is offered to them without mentioning the gotras and countries that would be disrespectful to them. The Grahayajña

1210. ग्रहपीठस्य मध्ये वर्तुले द्वादशाङ्गुले प्राङ्मुखं सूर्यं रक्तपुष्पाक्षतैः, आ कृष्णेन (ऋ. १. ३५. २) हिरण्यस्तूपः सविता त्रिष्टुप् सूर्यावाहने विनियोगः। ओम्। आ कृष्णेन॰। ओं भूर्भुवः स्वः कलिङ्गदेशोद्भव काश्यपसगोत्र सूर्येहागच्छेह तिष्ठ सूर्याय नमः सूर्यमावाहयामीति सूर्यं स्थापयेत्। ऋग्वेदिनां ब्रह्मकर्म p. 145; it must be pointed out that Yāj. does not lay down a procedure for अयुतहोम, लक्षहोम, कोटिहोम nor does he even refer to them, as stated by शान्तिमयूख (p. 22) 'किं च याज्ञवल्क्यादिस्मृतिषु न तावदयुतहोमादीनां विधिर्नाप्यनुवादः।'.

may be simple (*kevala*) as in Yāj. or Ayutahoma or Lakṣahoma or Koṭihoma. A few further remarks are added here from the Agnipuarāṇa (chap. 149), Narasiṁha-purāṇa (chap. 35), Matsya (chap. 93 and 239), Bhaviṣyottara (chap. 141 and 142), Atharva-pariśiṣṭa XXXI (for Koṭihoma) and other works. The Kṛtyakalpataru[1211] (Rājdharma) quotes the Brahma-purāṇa as follows: The king should perform two Lakṣahomas every year and one Koṭihoma which confers freedom from the fear of all calamities and he should at once perform a Mahāśānti that removes all evil consequences when there are eclipses of the Sun and the Moon and an earthquake. The Agni (149.12) says 'Ayutahoma confers slight success, Laksahoma drives away all distress, while Koṭihoma tends to destroy all kinds of trouble and confers all desired objects.' The Viṣṇudharmottara (II. 36. 3–4) states that Aśvapati, father of the famous *pativratā* Sāvitri performed a Laksahoma with the Sāvitrī (Gāyatrī) mantras for securing a son. 'There is no *utpāta* in the world that is not conjured away by Lakṣahoma; there is no more auspicious thing that surpasses Lakṣahoma. In the case of the king who gets a Koṭihoma performed by brāhmaṇas the enemies cannot stand up against him in battle: excessive rainfall, drought, mice, locusts, parrots, evil spirits and the like and all enemies on the battle-field are conjured away from him.'[1212] The Bhaviṣyottara (142. 11–12) calls koṭihoma a śānti rite, which yields all desired objects, by which even grave sins like brāhmaṇa-murder are removed at once, all utpātas are conjured away and great happiness follows. Bhaviṣyottara (chap. 142. 7–54) contains an elaborate procedure of Koṭihoma and also a briefer one (in chap. 142. 56–80). Atharva-pariśiṣṭa (No. 31) describes the procedure of Koṭihoma; it was to be begun on an auspicious tithi in the bright half, on the *muhūrta* called Vijaya and on one of the nakṣatras viz. Rohiṇī, Puṣya, Anurādhā, the three Uttarās, Abhijit, Mṛgaśiras, Śravaṇa, Citrā, Revatī. The firepit was to be of eight cubits (for Laksahoma half of this), the brāhmaṇas may be 20, 100, 1000 or even one crore, who

1211. ब्रह्मपुराणे। द्वौ लक्षहोमौ कुर्वीत तथा संवत्सरं प्रति। एकं च कोटिहोमं च यत्नात्सर्वाभयप्रदम्। ...ग्रहणे सूर्यशशिनोर्भूकम्पोत्पातदर्शने। तत्क्षणे च महाशान्तिः कर्तव्यानिष्टनाशिनी। राजधर्मकाण्ड of कृत्यकल्पतरु p. 166.

1212. नास्ति लोके स उत्पातो यो ह्यनेन न शाम्यति। मङ्गल्यं परमं नास्ति यदस्मादतिरिच्यते। कोटिहोमं तु यो राजा कारयेत्पूर्ववद् द्विजैः। न तस्य शत्रवः संख्ये जातु तिष्ठन्ति कर्हिचित्। अतिवृष्टिरनावृष्टिर्मूषकाः शलभाः शुकाः। राक्षसाद्याश्च शाम्यन्ति सर्वे च रिपवो रणे॥ अग्नि 149.5–8.

should offer fuel sticks anointed with ghee. The Bṛhadyogayātrā [1213] verses are quoted below.

Some of the medieval works like the Śāntimayūkha (p. 12) quote verses from the Skandapurāṇa that state how the unfavourable aspect of Saturn led Saudāsa to eat human flesh, that of Rāhu made Nala wander over the earth, that of Mars led to Rāma's banishment to forest, that of the Moon led to the death of Hiraṇyakaśipu, that of the Sun brought about the fall of Rāvaṇa, that of Jupiter led to the death of Duryodhana, that of Mercury made the Pāṇḍavas do work not fit for them, that of Venus led to the death of Hiraṇyākṣa in battle.

Some of the medieval digests (*nibandhas*) such as the Dharmasindhu lay down that certain special gifts should be made when any one of the planets is unfavourable to a person. They are set out here from the Dharmasindhu (p. 135). For the Sun—Ruby, wheat, cow, red garment, jaggery, gold, copper, red sandalwood, lotuses; for the Moon—rice grains in vessel made from bamboo, camphor, pearl, white garment, jar full of ghee, a bull; for Mars—coral, wheat, *masūra* pulse, red bull, jaggery, gold, red garment, copper; for Mercury—blue garment, gold, bronze vessel, *mudga* pulse, emerald, slave girl, ivory, flowers; for Jupiter—topaz, turmeric, sugar, horse, yellow corn and yellow garment, salt, gold; for Venus—garment of various colours, white horse, cow, diamond, gold, silver, unguents, rice grains; for Saturn—sapphire, māṣa beans, sesame and sesame oil, *kulittha* (pulse), she-buffalo, iron, dark cow; for Rāhu—*gomeda* (a kind of gem of four varieties), horse, blue garment, blanket, sesame and sesame oil, iron; for Ketu—cat's eye gem, sesame and sesame oil, blanket, musk, lamb, garments. In the author's youth these directions about dānas (gifts) were followed by many people and even now they are being followed to some extent. The Madanaratna (on Śāntika-pauṣṭika, folios 5 a to 7 a) gives separate śānti procedure for each of the *grahas* from the Sun to Ketu from the Bhaviṣyottara.

1213. तत्रार्चा ताम्रमयी सवितुः पालाशिकाः स्रुचः समिधः। आ कृष्णेनेति मन्त्रो रक्ता गन्धाः सहागुरुणा॥ माषातसीतिलाश्वकसमुद्गचणकान् विहाय भोज्यविधिः। बकुलार्कागस्त्य-पलाशशाल्मलीकुसुमपूजा च॥ अष्टशतमितेभ्यो विप्रेभ्यो दक्षिणाहिताग्निभ्यः। देया वृषकनकमयी सहस्रकिरणमुद्दिश्य॥ बृहद्योग० 18.3-5 (ms). It may be mentioned that the mantras for the nine grahas in बृहद्योग० do not agree completely either with Yāj. or with Matsya. They are आ कृष्णेन, आप्यायस्व, अग्निर्मूर्धा, उद्बुध्यस्व, बृहस्पते अति, अक्षा-त्परिस्रतः, शन्नो देवीः, कया नश्चित्र, केतुं कृण्वन्नकेतवे. Compare table above on p. 750.

Another śānti refers to the placating of Saturn when that planet occupies the 12th, 1st and 2nd rāśis from the rāśi of a man's birth. This is roughly a period of seven years and a half and is called '*sārdha-saptavārṣika-pīḍā*' in Sanskrit and '*sāḍe-sāti*' in Marāthi. The śānti consists in worshipping an image of Saturn made of iron placed in a vessel of iron or clay, covered with two dark garments or a blanket and offering to it dark and fragrant flowers, food or rice mixed with sesame. That food and the image are to be donated to a dark brāhmaṇa or to some brāhmaṇa with the mantra 'śan no devīr' (Rg. X. 9. 4). If the worshipper be a śūdra he is to repeat a paurāṇika[1214] mantra (noted below) which refers to Nala getting back his kingdom by placating Saturn. This should be done every Saturday for a year or one should every day repeat the mantra containing ten names of Saturn (in note 1214) and should also repeat a Śanistotra (eulogy of Saturn) every morning. By doing so the trouble that Saturn causes for seven and half years is averted.

Some of the medieval digests try to furnish an accurate definition of Śānti. Only one may be cited here. The Śāntimayūkha[1215] of Nīlakaṇṭha (first half of 17th century A. D.) defines it as a rite prescribed by the śastra, which (rite) has its motive or urge sinfulness that is not clear (i.e. that is only inferred or presumed), that removes evil effects relating only to this world, and the performance of which does not lead on to sin The first clauses excludes gifts made to remove diseases like tuberculosis;[1216] the 2nd clause distinguishes śāntis from sacri-

---

1214. The Paurāṇika mantra is: यः पुनर्नष्टराज्याय नलाय परितोषितः। स्वमे ददौ निजं राज्यं स मे सौरिः प्रसीदतु॥ नमोऽर्कपुत्राय शनैश्चराय नीहारवर्णाञ्जनमेचकाय। श्रुत्वा रहस्यं भव कामदस्त्वं फलप्रदो मे भव सूर्यपुत्र॥ धर्मसिन्धु p 135; the ten names of Saturn are कोणस्थः पिङ्गलो बभ्रुः कृष्णो रौद्रान्तको यमः। सौरिः शनैश्चरो मन्दः पिप्पलादेन संस्तुतः॥' q. by मदनरत्न on शान्तिकपौष्टिक folio 8a.

1216. It was believed in ancient India that diseases and bodily defects were due to sins committed in past lives. Vide II. of Dh. Vol. IV pp.174-175. Yāj. (III. 207 and 209) remarks that the murderer of a brāhmaṇa suffers from tuberculosis after passing through the births of deer, dog, hog, and camel. मृगश्वसूकरोष्ट्राणां ब्रह्महा योनिमृच्छति। ...ब्रह्महा क्षयरोगी स्यात्सुरापः श्यावदन्तकः॥

fices (intended to secure other worldly rewards) and *prāyaścittas* (that yield consequences in this world as well as in the next) and the last clause distinguishes śāntis from rites of black magic (for destroying one's enemies or securing a married woman's love &c.) which is sinful.

The number of śāntis is legion. They are prescribed for conjuring away the effects of rare natural phenomena such as eclipses, earth-quakes, rainfall (of peculiar kinds, of blood &c.) hurricanes, fall of meteors, comets, halos, Fata Morgana; for protection against the evil effects of the positions and movements of planets and stars for the world and for individuals; for strange births among human beings and animals; for the good of horses and elephants; for certain untoward happenings about Indra's banner and about images of gods falling or weeping, the cries of birds and beasts, the fall of lizards and the like on a person's limbs and on certain stated periods or on solemn occasions.

All rites of Śānti, Pauṣṭika rites and the Mahādānas were to be performed in ordinary fire, since there is no authority to prove that they are to be performed in śrauta fires or in smārta fire. Manu 3. 67 and Yāj. I. 97 refer only to ceremonies laid down in the Gṛhyasūtras. On Yāj. I. 285-86 the Mitākṣarā prescribes ordinary fire for offerings in Vināyaka-śānti. Vide also Śāntimayūkha p. 4.

Both Manu [1217] and the Viṣṇudharmasūtra prescribe that homas in which the Sun is the deity worshipped and Śāntihomas should be performed by a householder on the *parvans* (i. e. on Paurṇamāsī and Amāvāsyā). These were śāntis at fixed periods. Similarly, when a person, male or female, of any caste completed sixty years, there was the possibility that he may die soon, or that he may lose his mother or father or his wife or sons or that various diseases may affect him; for removing this danger a śānti is prescribed (and is often performed even now) in order that he may enjoy a long life, be free from all calamities and for his complete prosperity. This is called *Ṣaṣṭyabdapūrti* (completion of sixty years) or Ugrarathaśānti.[1217a]

1217. सावित्राञ् शान्तिहोमांश्च कुर्यात्पर्वसु नित्यशः। मनु IV. 150; पर्वसु शान्तिहोमं कुर्यात्। वि. ध. सू. 71. 86.

1217a. Vide Mitra's Notices vol. IX No. 3234 for a ms. of Ugrarathaśānti and F. W. Thomas Presentation volume pp. 43-45 for 'ṣaṣṭyabdapūrti.'

One of the oldest available descriptions of the Ugrarathaśānti is found in the Baudhāyanagṛhyaśeṣa-sūtra (V. 8.). It is brief and the main items in it are set out here. It should be performed in the month of one's birth and on the nakṣatra of birth. A *vedi* as large as a bull's hide should be made, a jar full of water should be placed thereon and on the jar an image of Mṛtyu (Death) manufactured with two *niṣkas* (i. e. gold probably weighing as much) should be placed in the south-east corner; worship should be offered to the image and a *japa* of each of the mantras 'apaitu mṛtyuḥ' ('may Death go away', Tai. Br. III. 7. 14. 4), 'param Mṛtyo' (O Death! follow the path beyond &c.', Tai. Br. II. 7. 14. 5 and Ṛg. X. 18. 1), 'mā nas-toke' (O Rudra! do not injure our progeny' &c., Tai. S. III. 4. 11. 2 and Ṛg. I. 114. 8), and 'Tryambakam' ('we offer sacrifice to Rudra', Tai. S. I. 8. 6. 2 and Ṛg. VII. 59. 12) be made 108 times; he offers oblations of cooked food with the *puronuvākyā* (invitatory prayer) 'mā no mahāntam' (O Rudra! do not destroy our grown up ones &c.', Tai. S. IV. 5. 10. 2 and Ṛg. I. 114. 7) and the *Yājyā* (offering prayer) 'Mā nas-toke' (Tai. S. III. 4. 11. 2 and Ṛg. I 114. 8). Then he makes subsidiary offerings of ghee with each verse of the Ghṛtasūkta.[1218] Then he sprinkles himself with water from the jar to the accompaniment of mantras from the Mṛtyusūkta, from the Āyuṣyasūkta and with Paurāṇika mantras, honours the officiating priest, gives dakṣiṇā to the brāhmaṇas and a dinner.

There is a Ms. (of only three folios in D. C. No. 609 of the year 1882–83, now in the Bhandarkar Oriental Institute at Poona) which deals with this śānti attributed to Śaunaka and is called Ugrarathaśānti at the end. The śānti is to be performed on the day or nakṣatra of one's birth. On that day the person of 60 years should take an auspicious bath, perform his daily religious duties, should invite brāhmaṇas and choose one to officiate who is learned in the Vedas and Vedāṅgas and is well conducted. First Gaṇeśa worship should be performed, then

---

1218 It is difficult to say what hymn is intended here by the word 'ghṛtasūktena'. It is probably Ṛg. VI. 70. 1-6 (ghṛtavatī bhuvanānām &c.). The Mṛtyusūkta is probably the same as Ṛg. X. 18. The Āyuṣya hymn is a *Khila* hymn after Ṛg. X. 128 and begins 'āyuṣyam varcasyam rāyaspoṣam audbhidam.' The Karmapradipa of Gobhila (I. 17) prescribes that Āyuṣya hymns should be recited in śrāddha for śānti. The Smṛtikaumudī (śrāddha p. 503) quotes Gobhila I. 17 and explains that they are hymns like the one beginning 'ā no bhadrāḥ' Ṛg. I. 89. 1.

puṇyāhavācana, worship of Mother goddesses, then nāndīśrāddha. He should bring together *sarvausadhis*,[1219] twigs and leaves of five trees, five jewels, *pañcagavya*, and pañcāmṛta; then worship of nine planets should be performed; an image of Mārkaṇḍeya was to be made from one *pala* or ½ pala or ¼ pala and the image was placed in a jar full of water surrounded by two garments; he should offer the 16 *upacāras* and offer to Mārkaṇḍeya 1008, or 108 or 28 or eight offerings of fuel sticks, boiled rice, ghee, dūrvā, superior dishes with the mantra (quoted below[1220]). Then he should make a *homa* in honour of Mṛtyuñjaya (Śiva) with oblations of dūrvā grass and sesame 10000, or 5000, or 3000 or one thousand in number and then he should sacrifice separately to the secondary objects of worship, viz. Aśvatthāman, Bali, Vyāsa, Hanumat, Bibhīṣaṇa, Kṛpa and Paraśurāma. Then he should perform a homa with fried grams according to his ability and should recite Śrīsūkta,[1221] Rudra, the Āyuṣya-mantras, the Puruṣasūkta and specially the complete recitation of the Veda; he should finish the *homa* and offer pūrṇāhuti; then water from the jar should be sprinkled over the *yajamāna* (i. e. person who has completed 60 years), his wife and his near relatives; then there should be a *japa* of śānti hymn, the Puruṣasūkta, the mantra Ṛg. X. 18. 1, the Āyusya hymn, Pāvamāna hymn (hymn to Soma from Ṛg. IX.), the six verses of Śivasaṅkalpa (Vāj. S. 32. 1-6), and Mahāśānti. Then the jar should be donated and the garments rendered wet by the *abhiṣeka* and a decked cow with calf should be donated to the officiating priest; ten *dānas* [1222] to brāhmaṇas and gold weighing one hundred *mānas*; he should perform ājyāvekṣaṇa and offer '*bali*' (to all beings, crows &c.); he should then receive the blessings of the brāhmaṇas and put on a new garment; then he should have *nīrājana* performed and bow to deities and feed a thousand or a hundred brāhmaṇas and then himself partake of food along with his relatives. Whoever performs this śānti, according to the rules prescribed for grahaśānti, would certainly

live for a hundred years, all misfortunes will vanish and all prosperity will be his. The *prayoga* (procedure of this śānti) is given below[1223] since it is often performed even now.

It is difficult to say why this śānti was called Ugraratha. Another śānti on the completion of 70 years or on the 7th night of the 7th month of the 77th year is called Bhaimarathi-śānti, according to the Śabdakalpadruma, which quotes some verses from *Vaidyaka* without stating what work is meant.[1223a] Baud. gṛhyaśesasūtra I. 24 prescribes a śānti for one who has lived up to 100 years or one who has seen 1000 amāvāsyās.

The general rule about the time for śāntis is that no definite time can be fixed for them, since śānti rites are performed with the object of removing the evil consequences of men's lapses suggested by such indications (or omens) as dreams, the evil aspects of planets and the like i. e. they are to be performed as and when omens or portents occur or are observed and one should not wait for such times as the northward passage of the Sun, bright fortnight and that one may perform śāntis even in the southward passage of the Sun or even in an intercalary

month.[1224] If there is no hurry, then a śānti was to be performed on an auspicious week-day, an auspicious tithi and on certain nakṣatras, viz. the three Uttarās, Rohiṇī, Śravaṇa, Dhaniṣṭhā, Śatatārakā, Punarvasu, Svātī, Maghā, Aśvinī, Hasta, Puṣya, Anurādhā and Revatī.[1225] As regards the Lakṣahoma the Matsya (93. 86) prescribes that it should be performed after securing favourable planets and *Tārās* (stars). Vide also p. 290 above about Koṭihoma prescribed by the Atharva-pariśiṣṭa (XXXI pp. 187–191). The Matsya prescribes that a Koṭihoma should be begun in Caitra or Kārtika (239. 20–21); the invisibility of Jupiter and Venus and similar matters need not be considered when a śānti has to be performed immediately on the occurrence of an omen (or portent) or when the śānti is meant for alleviating the disease from which a person may be suffering.

As against several *adbhutas* and *utpātas*, texts prescribe a rite called Mahāśānti. The Śānkhāyana Gṛ. (V. 11) speaks of a Mahāśānti, when an ant-hill grows in one's house, which has been referred to above on p. 730 note 1162. The details of a Mahāśānti differ in different texts and on different occasions. The Adbhuta-sāgara provides that where no specific details about śāntis against certain utpātas like a fall of meteors are prescribed one should have recourse to a sānti consisting in homa offerings to the accompaniment of one million repetitions of the sacred Gāyatrī verse ('tat-savitur' &c. Rg. III. 62. 10) or to the Mahāśānti called Abhayā according to the nature (grave or light) of the omen or portent.[1226] In the Marāṭhi commentary on the

1226. अत्रानुक्तविशेषशान्तिपूल्कापातेषु सावित्रीमन्त्रकदशलक्षहोमादिका शान्तिरभयाख्या वा महाशान्तिरौत्पातिकफलगुरुलाघवमवगम्य कर्तव्या। अ. सं. p. 341; the शान्तिरत्न of कमलाकर (folios 208–211 a) prescribes a mahāśānti put in the Bhaviṣyapurāṇa in the name of Kṛṣṇa to be performed at the coronation of a king or before starting on an invasion, or when a person has a bad dream or the planets are unfavourable, or when there is an earthquake &c. Vide also शान्तिमयूख pp. 106–108 for महाशान्ति.

Nirṇayasindhu (p. 233) about the question of a rite on the first appearance of a woman's monthly illness a *japa* of Mahāśānti is prescribed after an elaborate homa and worship and the Mahāśānti is explained as consisting of the recitation of Ṛg. I. 89. 1-10 (beginning with 'ā no bhadrā'), Ṛg. V. 51. 11-15 (beginning with 'svasti no mimītām &c.') and Ṛg. VII. 35. 1-15 (beginning with 'śan-na Indrāgnī'). The Bhaviṣyottara (143. 2-46) describes a Mahāśānti to be performed at a king's coronation, on his marching out on an invasion, when one has bad dreams or inauspicious omens (*nimittas*), when the planets are unfavourable or when there is lightning and the fall of meteors, when a Ketu appears, in a hurricane, earthquake, birth on a Mūla nakṣatra or Gaṇḍānta, on birth of twins, when parasols and banners fall on the ground, when a crow, owl or pigeon enters a house, when malefic planets are retrograde (especially in the naksatra or rāsi of birth), when Jupiter, Saturn, Mars and the Sun are in the 1st, 4th, 8th or 12th houses (in a person's horoscope), when there is *graha-yuddha*; when garments, weapons, horses and cows, or jewels and hair are lost, or when rainbow is seen at night in front, when the beam on a house pillar is smashed, when a she—mule conceives, on eclipses of the Sun and the Moon—on these a Mahāśānti is commended. The procedure is briefly as follows: Five learned and well-conducted brāhmaṇas should officiate in a *maṇḍapa* ten or twelve cubits on each side, in the midst of which there should be a raised platform four cubits on each side and in the south-east corner of that platform there should be a *kuṇḍa* (receptacle for fire). Five jars should be placed, four in the four intermediate quarters (south-east &c.) and the fifth in the middle of the platform and numerous things such as twigs and leaves of some plants, jewels, sandalwood, mustard grains, *śamī* and *dūrvā*. *kuśas* and grains of rice should be collected thereon; Vedic mantras such as 'āśuḥ śiśāno' (Ṛg. X. 103. 1) on north-west, 'Iśā vāsya' (Vāj. S. 40. 1) on north-east, were to be recited over the jars, worship is to be offered with *gandha*, flowers, lamps, fruits like cocoanut to the jars and fire should be placed in the *kuṇḍa* with 'agnim dūtam' (Ṛg. I. 12. 1), seat (*āsana*) should be offerred with the mantra 'hiraṇya-garbhaḥ' (Ṛg. X. 121. 1), then *pāyasa* should be cooked to the accompaniment of Puruṣa-sūkta (Ṛg. X. 90), eighteen fuel sticks of śamī and seven palāśa ones should be cast into Agni, seven *āhutis* of clarified ghee and seven of rice boiled in milk should be offered to Agni with a mantra 'Jātavedase' (Ṛg. I. 99. 1), four more with the hymn

'tārat sa mandi' (Rg. IX. 58), seven with 'yamāya' (Rg. X. 14 13) and again seven with 'idam Viṣṇur' (Rg. I. 22. 17) and 27 āhutis to the 27 nakṣatras, then performance of 'sviṣṭakṛt' homa, grahahoma with sesame covered with ghee, then prāyaścitta; thus ends the homa; then the *yajamāna* sitting on a throne of kāśmarya wood should have sprinkled over him to the accompaniment of drum-beating and conch-blowing water from the five jars with five different mantras, then an offering to all the directions (*digbali*) with the mantra 'salutation to all bhūtas'. After the bath, brāhmaṇas recite a śānti over him after letting fall a stream of śānti water all round; then *puṇyāhavācana* and then close of the śānti rite, then gifts of land, gold, beds, seats according to the person's ability to brāhmaṇas; he should treat to a sumptuous meal the poor and helpless and men learned in the Veda. On doing this he secures long life, quick victory over enemies, even difficult undertakings succeed.

The huge work Adbhutasāgara is mostly concerned with rare natural phenomena such as halo, rainbows, hurricanes, glowing horizon (*digdāha*), meteors, comets, earthquakes, rain without clouds, red rain, shower of fish, Fata Morgama &c.

A few words must be said about some striking ones out of these. First comes earthquake. The Br. S. (32. 1-2) puts forth four theories of his predecessors about the cause of an earthquake viz. it was caused by huge animals dwelling inside the seas (view of Kāśyapa) or according to others (Garga) it was caused by the heavy breaths emitted by the elephants of the quarters when tired by carrying the weight of the earth; others (like Vasiṣṭha) said that earthquake noise is caused by the winds striking against each other (in the sky) and falling on the earth; other ācāryas (like Vṛddhagarga) held that an earthquake was caused by *adṛṣṭa* (i. e. by the sins of the people on the earth[1227]). In verses 3-7 of Br. S. (chap. 32) Varāha narrates the myth that mountains had in the dim past wings and the earth being much shaken by their movements approached Pitāmaha (Brahmā) and Brahmā seeing her sad plight asked Indra to discharge his thunderbolt for clipping the wings of mountains and for removing the anger (or sorrow) of the earth; Indra did so, but he told the earth that Vāyu, Agni, Indra (himself) and

---

1227. The ब्रह्मपुराण sets out a novel cause of earthquake 'यदा विजृम्भतेऽनन्तो मदाघूर्णितलोचनः। तदा चलति भूरेषा सादितोयाधिकानना॥ 21. 23-24; अ. सा. p. 383 quotes this verse from विष्णुपुराण with slight variations.

Varuṇa would (each) at different parts of the day and night make the earth shake in order to indicate (to mortals) the fruits of their good and bad deeds. In Bṛ. S. 32. 8–22 Varāha describes the spheres and premonitory signs of Vāyu, Agni, Indra and Varuṇa with the nakṣatras and the countries they affect. The Adbhutasāgara (pp. 383–409) quotes most of the verses of Varāha and prescribes śāntis for each of the four deities that are deemed to be connected with earthquakes. The Adbhutasāgara refers to earthquakes that happened when angry Arjuna got no sleep after he made a vow that he would kill Jayadratha before the next day's sunset (Droṇaparva 77. 4) and when Duryodhana challenged Bhīma for a mace fight (Śalyaparva 56. 10 and 58. 49).

It should not be a matter for surprise that ancient and medieval Indians regarded earthquakes as punishments sent by God for the sins of men. The English poet Cowper gives vent to this belief in his poem 'Timepeace'.[1228] The most distinguished Indian of modern times viz. Mahātmā Gāndhi, regarded the earthquake in Bihar that occurred on January 15, 1934, and affected an area of about 30000 square miles and a population of about 15 millions and that killed thousands and made millions homeless, as God's punishment for the prevalence of the evil system of untouchability in Hindu[1229] society. To the natural and usual query why God should punish a small country or a small community with frightful earthquakes and overwhelming waves when other countries and millions of other people are guilty of the same misdeeds, Cowper endeavours to give a reply

1228. What then: Were they the wicked above all,
And we the righteous, whose fast-anchored isle
Moved not, while theirs was rocked like a light skiff,
The sport of every wave. No! none are clear,
And none than we more guilty. But where all
Stand chargeable with guilt, and to the shafts
Of wrath obnoxious, God may choose his mark;
May punish, if he please, the less, to warn
The more malignant.

'Timepiece' lines 150–158.

1229. Vide the eight volume life of Mahātmā Gāndhi by D. G. Tendulkar, vol. 3 pp. 304–308 and vol. 4 pp. 41–42. The characteristic sentences are 'A man of prayer regards what are known as physical calamities as divine chastisement alike for individuals and nations'; 'A man like me cannot but believe that this earthquake is a divine chastisement sent by God for our sins' (vol. 3 p. 303); 'I share the belief with the whole world, civilized and uncivilized, that calamities such as the Bihar one come to mankind as chastisement for their sins' (*ibid*, p. 305).

in the lines quoted above. It appears that, in spite of the beliefs now discredited, Vṛddha Garga and Varāha appear to have also believed that comets had orbits like planets and were visible in the firmament at certain long intervals of time.

The rules to be observed about eclipses have already been stated above (pp. 243–250). Though the real causes of lunar and solar eclipses were known long before the time of Varāhamihira as shown above (p. 242, n 622) this knowledge was not accepted by the masses for centuries and even now many people in India still entertain the old beliefs about eclipses.[1230] Varāha criticises ancient writers like Vṛddha Garga and Parāśara who prophesied an eclipse when five planets including Mercury came together or there were such *nimittas* as halo of the Sun, dim rays [1231] (Br. S. V. 16–17). Here the Śānti for it will be briefly described. One view was that an eclipse was auspicious [1232] to a person, if the eclipse occurs when the Sun or the Moon is in the 3rd, 6th, 10th or 11th rāśi (zodiacal sign) from the rāśi of the birth of a person, it is neither auspicious nor inauspicious when any one of the two is in 2nd, 5th, 7th or 9th rāśi from that of birth and it is inauspicious when the eclipsed sun or moon is in the 1st, 4th, 8th and 12th rāśi from the rāśi of birth. The view of Garga was that if an eclipse occurs when the sun or moon is in the rāśi of the birth of a person or if any of them is in the 1st, 7th, 8th, 9th, 10th or 12th rāśi from that of birth or if any of them occupies the nakṣatra of the birth of a person or the 9th nakṣatra from that of birth, it leads to calamities for that person. If an eclipse occurred when the Sun or Moon occupied the nakṣatra of the day of the coronation of the king, that portends the ruin of the kingdom, the loss of friends and

1231. न कथंचिदपि निमित्तैर्ग्रहणं विज्ञायते निमित्तानि । अन्यस्मिन्नपि काले भवन्त्यधोत्पातरूपाणि ॥ पञ्चग्रहसंयोगाश्च किल ग्रहणस्य सम्भवो भवति । तैले च जलेऽभ्रे वा न विचिन्त्यमिदं विपश्चिद्भिः ॥ बृहत्संहिता V. 16–17. Vide उत्पल's quotations on these from पराशर and वृद्धगर्ग.

1232. जन्मसप्ताष्टरिःफाङ्कदशमस्थे निशाकरे (v. l. दिवाकरे) । दुष्टोरिष्टपदो राहुर्जन्मर्क्षे निधनेपि च । मदनरत्ने गर्गः q. by नि. सि. p. 68 which explains: रिःफं द्वादशं, अङ्क नव, निधनं सप्तमतारा; पुराणान्तरे । सूर्यस्य संक्रमो वापि ग्रहणं चन्द्रसूर्ययोः । यस्य त्रिजन्मनक्षत्रे तस्य रोगोथवा मृतिः । तस्य दानं च होमं च देवार्चनजपौ तथा । उपरागाभिषेकं च कुर्याच्छान्तिर्भविष्यति । स्वर्णेन वाथ पिष्टेन कृत्वा सर्पस्य चाकृतिम् । ब्राह्मणाय ददेत्तस्य न रोगादिश्च तत्कृतः । जन्मनक्षत्रं तत्पूर्वोत्तरे च त्रिजन्मनक्षत्रमुच्यते, जन्मदशमैकोनविंशतितारा इति केचित् । नि. सि. p. 68.

the death of the king.[1233] Atri said that when the eclipse of the Sun or Moon occurs in the nakṣatra of a person's birth, disease, journeys and death are portended, and great danger for the king (whose nakṣatra is so affected). The averting of evil would follow if the man makes gifts and is engaged (that day) in worship of gods and *japa*.[1234] Several modes of śānti are prescribed, particularly for him whose rāśi or nakṣatra of birth or one of three nakṣatras (viz. that of birth, the one preceding and the one following the nakṣatra of birth) is occupied by the eclipsed Sun or Moon. One way is to make the figure of a serpent (that represents the demon Rāhu) with gold or flour and to donate it to a brāhmaṇa. Another was to make a serpent out of gold weighing a *pala* (i.e. 320 *guñjas*) or one half, one fourth or one eighth *pala* and to fix a jewel on its hood and place the serpent figure in a vessel of copper, bronze or cast iron full of ghee and donate it with a dakṣiṇā and also donate a silver disc of the moon and a golden serpent when it is a lunar eclipse and a golden disc of the Sun and a golden serpent when it is a solar eclipse. Further gifts of a horse, chariot, cows, land, sesame, ghee and gold also are recommended. The mantra accompanying the gifts addressed to Rāhu is quoted below.[1235] The Nirṇayasindhu also sets out a far more elaborate śānti from the Matsyapurāṇa, which is passed over for reasons of space.

The fall of meteors (*ulkā*) required a śānti. There were several beliefs about them. Garga held that they were missiles discharged by the Lokapālas [1236] who send down flaming meteors as missiles for indicating (coming) auspicious or calamitous events. Another view was that they were really souls that fell

1233. यस्य राज्यस्य नक्षत्रे स्वर्भानुरुपरज्यते। राज्यभङ्गं सुहृन्नाशं मरणं चात्र निर्दिशेत्। भार्गव q. by अ. सा. (q. in नि. सि. p. 68).

1234. आह चात्रिः। यस्य स्वजन्मनक्षत्रे ग्रस्येते शशिभास्करौ। व्याधिं प्रवासं मृत्युं च राज्ञश्चैव महद्भयम्॥ तस्माद्दानं च दातव्यं देवार्चनजपस्तथा। कुर्याच्चास्मिन्दिने मुक्तस्तस्य शान्तिर्भविष्यति॥ q. by कालविवेक p. 543.

1235. The दानमन्त्र is: तमोमय महाभीम सोमसूर्यविमर्दन। हेमतारप्रदानेन मम शान्तिप्रदो भव॥ विधन्तुद नमस्तुभ्यं सिंहिकानन्दनाच्युत। दानेनानेन नागस्य रक्ष मां वेधजाद्भयात्॥ नि. सि. p. 68, धर्मसिन्धु p. 35. Vide ब्रह्मपुराण chap. 106 and Matsya 251 for the story of Rāhu at the time of the churning of the ocean and I. A. vol. 16 p. 288 (for the same) and I. A. vol. 21 p. 123 about the customs connected with eclipses.

1236. Lokapālas are guardians of the world or of the four cardinal directions and four intermediate ones from the east onwards in order viz. Indra, Agni, Yama, Sūrya, Varuṇa, Vāyu, Kubera, Soma. Some substitute Nirṛti for Sūrya. Vide Manu V. 96.

down to the earth (for fresh births) after enjoying in heaven the favourable results of their actions.[1237] Meteors are often referred to in the epics as falling on serious occasions e. g. the Śalya-parva mentions [1238] the fall of a flaming meteor accompanied by a great noise and whirlwind when Duryodhana fell in the macefight with Bhīma. In Droṇaparva a flaming meteor is referred to as indicative of the coming death of the great ācārya and warrior Droṇa. The Adbhutasāgara (pp. 342–344) quotes a long passage (of 23½ verses) from Ātharvaṇādbhuta about the fall of meteors [1239] by day. It is said therein that such a fall of meteors by day portends the destruction of the country and its king and therefore a Mahāśānti called Amṛtā should be performed. There is an Ātharvaṇa-pariśiṣṭa LVIII b on *ulkā*, but the Adbhutasāgara verses do not appear to have been extracted from that.

Certain natural phenomena, though they may be called utpātas if they occur at certain times, are not to be regarded as such at certain other times. In Bṛ. S. 45. 82 Varāha says that certain occurrences natural to certain seasons do not lead to any unfavourable consequences; one should know them from the verses composed by Ṛṣiputra that are concise. Then he proceeds: in Madhu and Mādhava (Caitra and Vaiśākha) the following occurrences lead to good viz. lightning, meteors, earthquake, glowing twilight, noisy whirl-winds, halo (of Sun and Moon), dust in the sky, vapour (in forest), red sunrise and sunset; possibility of getting from trees food, rasas (sweet &c.), oily substances, numerous flowers and fruits; and amorous activities among cows and birds. The following are beneficial (auspicious) in summer (Jyeṣṭha and Āṣāḍha) viz. sky rendered dusky by the fall of stars and meteors, or in which the appearance of the Sun and the Moon is dark-brown, which is full of fiery glow without a flaring fire, loud noises, vapour, dust and

1237. उल्कास्वरूपमाह गर्गः। अग्नाणि विद्युज्जन्त्येते शुभाशुभनिवेदकाः। लोकपाला महात्मानो लोकानां ज्वलितानि तु॥ उत्पल on बृहत्सं. 33. 1 and अ. सा. p. 321: दिवि शुक्लशुभफलानां पततां रूपाणि यानि तान्युल्काः। बृहत्सं. 33. 1.

1238. तस्मिन्निपतिते वीरे परयौ सर्वमहीक्षिताम्। महास्वना पुनर्दीप्ता सनिर्घाता भयङ्करी॥ पपात चोल्का महती पतिते पृथिवीपतौ। शल्यपर्व 58. 50–51; अपतद्दीप्यमाना च सनिर्घाता सकम्पना। उल्का ज्वलन्ती संग्रामे शुच्छेनादृश्य सर्वशः॥ द्रोणपर्व 7.38–39; मत्स्य 163. 43 has: अपतन्गगनादुल्का विद्युद्रूपा महास्वनाः। (among the numerous portents in the fight of हिरण्यकशिपु with नृसिंह).

1239. . अथर्वणाद्भुते। दिवा पतति योल्का सा हन्याद्देशं सभूपतिम्। महाशान्तिं तत्र कुर्याद्भृतां विश्वभेषजीम्॥ अ. सा. p. 342,

winds, in which evenings are like red lotus and which look like a stormy sea, and when rivers are dried up. In the rains (Śrāvaṇa and Bhādrapada) the following portend no danger viz. rainbow, halo (of Sun and Moon), lightning, dried trees giving out fresh sprouts, the earth quaking or rolling or showing other than its usual appearance, noises in the earth or gaps therein, or when lakes increase in expanse of water or rivers rise up (in floods), or when wells are full or when houses on hills roll down. In Śarad (Āśvina and Kārtika) the following are not of evil import viz. the sight of divine damsels, ghosts, gandharvas, air conveyances and other *adbhutas;* the planets, nakṣatras and other stars becoming visible by day in the sky; noises of song and music in forests and on mountain peaks; abundance of crops and reduction of waters. In Hemanta (Mārgaśīrṣa and Pauṣa) the following are auspicious viz. the presence of cool winds and frost, loud cries of birds and beasts, the sight of rakṣas (evil spirits), *Yakṣas* and other (usually invisible) beings, non-human voices, directions darkened by vapour together with the sky, forests and mountains, the appearance of the rise and setting of the Sun at a higher point than usual. The following appearances are auspicious in Śiśira (Māgha and Phālguna) viz. the fall of snow, portentous winds, sight of terrible beings and *adbhutas*, sky resembling dark collyrium and rendered reddish-yellow by the fall of meteors and stars, the birth of various strange issue from women, cows, sheep, mares, beasts, and birds, strange appearances of leaves, sprouts and creepers. These when seen in the proper seasons are auspicious in those respective seasons, but when seen at other than the proper seasons they are very terrible portents. Two verses [1240]

1240. ये च न दोषाजनयन्त्युत्पातास्तानृतुस्वभावकृतान्। ऋषिपुत्रकृतैः श्लोकैर्विंशद्भेतैः समासोक्तैः॥ वज्राशनिमहीकम्पसन्ध्यानिर्घातनिःस्वनाः। परिवेषरजोधूमरक्तार्कास्तमनोदयाः॥ द्रुमेभ्योऽक्षरसस्नेहबहुपुष्पफलोद्गमाः। गोपक्षिमृदवृद्धिश्च शिवाय मधुमाधवे॥ ...ऋतुस्वभावजा ह्येते दृष्टाः स्वर्गे शुभप्रदाः। ऋतोरन्यत्र चोत्पाता दृष्टास्ते चातिदारुणाः॥ बृहत्सं. 45. 82–84 and 95. The occurrence of these twelve verses (45. 83–94) both in Bṛ. S. and Viṣṇudharmottara raises the important question of the chronological relation of the two works. Varāhamihira expressly tells us that he took the twelve verses (45. 83–94) from Ṛṣiputra or shortened them. Therefore, he did not borrow from the Viṣṇudharmottara. Ṛṣiputra has been often quoted by Varāha in his works (vide above p. 593 and my paper in JBBRAS for 1948–49, vol 24–25, p. 15). The अ. सा. pp. 743–744 quotes the verses from चाईस्पत्य, मत्स्यपुराण, विष्णुधर्मोत्तर and वराहसंहिता. The twelve verses occur in मत्स्य 229, 14–25, विष्णुधर्मोत्तर II, 134. 15–26. It must be stated that अ. सा.

(Continued on next page)

about Madhu-Mādhava and the last one (Bṛ. S. 45. 84–85 and 95) are quoted below. The Bṛ. S. further provides[1241] that whatever Gāthās (*prakrit* verses or simply verses) are recited by persons of distracted intellect, the utterances of children and what women speak out does not turn out to be wrong and that a person that understands utpātas, even though he may be devoid of mathematics (about planets), becomes famous and a favourite of the king, and by knowing the secret (or esoteric) words of the sage (Ṛṣiputra) which are stated (by me), a person sees the past, the present and the future.

Another very curious portent mentioned in the Mahābhārata, Kauśikasūtra[1242] (kaṇḍikā 105), Matsya (243), Viṣṇudharmottara, Bṛhatsaṁhitā and the Adbhutasāgara (pp. 425–436), Hemādri on Vrata vol. II. (pp. 1078–79) and Madanaratna (on śānti, folio 54b) is the trembling, dancing, laughing and weeping of the images of gods. The Bhīṣmaparva[1243] refers to the images in the temples of the Kaurava king doing these acts. In the encounter of Hiraṇyakaśipu with the Man-lion form of

---

(Continued from last page)

agrees most closely with बृहत्सं., while in the मत्स्य the readings and the order of verses differ a good deal from the अ. सा. In my 'History of Sanskrit Poetics' (1951) pp. 64–70 I arrived for the Viṣṇudharmottara at a date between 500–600 A. D. on other evidence. In my opinion it is probable that the Viṣṇudharmottara borrows the verses from the Bṛhat-saṁhitā. If that be accepted, the Viṣṇudharmottara (at least the 2nd section of it) must be later than 600 A. D. It is possible to argue that the Purāṇa might have taken them from Ṛṣiputra. But the Purāṇa does not say so and in keeping with the assumed character of the Purāṇas as composed by the semi-divine Vyāsa at the beginning of Kali-yuga, the Purāṇas generally take care not to admit any borrowing from a merely human author. It should be noted that three of the verses quoted only from Yogayātrā of Varāha by अ. सा. p. 494 occur in विष्णुधर्मोत्तर II. 176. 9-11.

1241. उन्मत्तानां च या गाथाः शिशूनां यच्च भाषितम्। स्त्रियो यच्च प्रभाषन्ते तस्य नास्ति व्यतिक्रमः॥ ...उत्पातान् गणितविवर्जितोऽपि बुद्ध्वा विख्यातो भवति नरेन्द्रवल्लभश्च॥ एतत्तन्मुनिवचनं रहस्यमुक्तं यज्ज्ञात्वा भवति नरश्चिकालदर्शी॥ बृहत्सं. 45. 96 and 98.

1242. अथ यत्रैतद्देवतानि चृत्यन्ति ष्योतन्ति हसन्ति गायन्ति वाऽन्यानि वा रूपाणि कुर्वन्ति य आसुरा मनुष्या मा नो विदन्नमो देववधेभ्य इत्यभयैर्जुहुयात्। सा तत्र प्रायश्चित्तिः। कौशिकसूत्र 105. य आसुरा मनुष्या० is a मन्त्र in कौशिकसूत्र 104.2; मा नो विदन्० is अथर्व. I. 19. 1 and नमो देववधेभ्यः is अथर्व. VI. 13. 1. This prescribes a शान्ति viz. the offering of āhutis (of ghee) with these mantras called *Abhaya*.

1243. देवतायतनस्थाश्च कौरवेन्द्रस्य देवताः। कम्पन्ते च हसन्ते च चृत्यन्ति च रुदन्ति च॥ भीष्म 112. 11.

Viṣṇu the Matsyapurāṇa[1244] states 'the images of all gods shut and open their eyes, laugh, weep, scream, emit smoke, blaze, and these signs indicate that great danger impends.' In the Ātharvaṇa-pariśiṣṭa[1245] LXXII this matter is treated (in prose). It says 'there are portents called *divya* which occur in temples; they (images) laugh, sing, weep, shriek, perspire, cause smoke to issue out of them, they blaze, they tremble, open their eyes and shut them, blood oozes from them, they move to and fro.' These strange phenomena are said to forebode drought, danger from weapons, famine, epidemic in the country and destruction of the king and his ministers (or relatives). The śānti prescribed in the same Ātharvaṇa-pariśiṣṭa (4. 7) is as follows: one should boil *pāyasa* in the milk of 108 *kapilā* cows; if such cows are not available one should cook *pāyasa* with the milk of one hundred milch cows; he should put on the fire fuel-sticks with ends towards the east, should spread round the fire darbha grass and should offer oblations (of rice) in fire to the accompaniment of the mantras addressed to Rudra[1246] and called Raudra-gaṇa and also offer clarified butter (in fire). He should present white flowers, he should treat brāhmaṇas with boiled rice and should donate the same cows (the milk of which was used for cooking pāyasa) or donate the kingdom for a limited period for the satisfaction of a brāhmaṇa; he should give to the officiating priest a thousand cows and donate a good village.

Now śāntis on the birth of human beings should be referred to. There are several śāntis concerning the birth of a human being, such as a child's birth on Mūla, Āśleṣā, Jyeṣṭhā nakṣatras, on *gaṇḍānta*, on the 14th tithi of the dark fortnight or on

---

1244. उन्मीलन्ति निमीलन्ति हसन्ति च रुदन्ति च। विक्रोशन्ति च गम्भीरा धूमयन्ति ज्वलन्ति च। प्रतिमाः सर्वदेवानां वेदयन्ति (v. l. वेदयन्त्यो) महद्भयम्। मत्स्य 163. 45-46 = पद्म V. 42. 137-138.

1245. दिव्यानीत्याचक्षते देवगृहेषु। अथ हसन्ति गायन्ति रुदन्ति क्रोशन्ति परिधावन्ति धूमयन्ति प्रज्वलन्ति प्रकम्पन्त्युन्मीलयन्ति निमीलयन्ति लोहितं स्रवन्ति परिवर्तयन्ति। आथर्वण-परिशिष्ट LXXII (महाद्भुतानि) p. 525. It may be noticed that three of these actions occur in the भीष्मपर्व and six in मत्स्य.

1246. The रौद्रगण (the string of mantras addressed to Rudra in a śānti) specified in आथर्वणपरिशिष्ट XXXII. 17 is as follows: रुद्रजलाशभेषज. येऽस्याम्. प्राची दिक्, उदितस्थयो अक्रमन्, भवा शर्वौ मन्वे वाम्, ब्रह्म जज्ञानम्, अनाशा ये, सहस्रधार एव, ग्रीष्मो हेमन्तो, अनड्वुह्यस्त्वम्, महामापो, वैश्वानरो, यमो सूत्युः, यां ते रुद्र. योऽग्नौ रुद्रो, भवाशर्वौ सृष्टतम्, भवाशर्वाविदं ब्रूमो, यस्ते सर्पो वृश्चिकः, तस्मै प्राच्या दिशो अन्तर्देशादिति रौद्रगणः। Vide note 1 on p. 146 in Bloomfield's edition of the कौशिकसूत्र 50. 13 for identification of these *pratīkas* from the Atharvaveda.

amāvāsyā, on Vyatīpāta-yoga or on Vaidhṛti or in an eclipse, or on the birth of twins, or when a girl is born to a person after three successive births of sons or a son is born after three successive births of girls. Some of these śāntis are performed even now. Therefore two of them which are still in vogue, though gradually becoming infrequent, are briefly described here. The consequences of birth on Mūla, Jyeṣṭhā and Āśleṣā are more or less similar. Here the *śānti for birth on Āśleṣā is briefly* set out.

The Āśleṣā nakṣatra has a mean measure of 60 ghaṭīs. It is to be divided into ten parts in order[1246a] viz. 5, 7, 2, 3, 4, 8, 11, 6, 9 and 5; birth of a son in these parts indicates in order the loss of kingdom, death of father, death of mother, addiction to lovemaking, he has devotion to father, has strength, loses property, has proneness to charity, pleasures, wealth. If the nakṣatra be divided into four parts, birth in the first part is auspicious but in the other three parts indicates loss of wealth, death of father, death of mother. If the child is a girl born on the last three quarters of Āśleṣā indicates the death of the future mother-in-law of the girl; if the child be a boy and is born in the last three quarters of Āśleṣā, that indicates death of his future mother-in-law. One should perform a śānti for birth on any quarter of Āśleṣā, either on the 12th day from birth, or if that be not possible, on the next Āśleṣā or on any auspicious day. On that day he (the father or other performer) should make a saṅkalpa[1247] as noted below

---

1246 a. अथाश्लेषाफलम्। मूर्धास्यनेत्रगलकांसयुगं च बाहू हृज्जाठ्युग्मपदमित्यहिदेहभागः। बाणाद्रिनेत्रहुतभुक्-श्रुतिनागरुद्र-षण्नन्द-पक्ष शिरसः क्रमशस्तु नाड्यः। राज्यं पितृक्षयो मातृनाशः कामक्रिया रतिः। पितृभक्तो बली स्वघ्नस्त्यागी भोगी धनी क्रमात्। नि. सि. p. 244; शान्तिरत्नाकर folio 88 b. The presiding deity of Āśleṣā is serpent. The first half of the first verse mentions the head, mouth and other parts of a serpent's body (in all ten). Separate as गलक plus अंसयुगम्.

1247. अस्य शिशोराश्लेषाजननसूचितसर्वारिष्टपरिहारार्थं सग्रहमखां शान्तिं करिष्ये, इति सङ्कल्पयेत्. The गोमुखप्रसवशान्ति is described in the मदनरत्न (on शान्तिक-पौष्टिक, folios 35 b and 36 a) and in शान्तिमयूख pp. 59–60. On a new *śūrpa* (winnowing basket) a red piece of cloth is spread, the new born child is placed thereon, and is covered with cotton thread from head to the soles of the feet and is put on a heap of sesame, then the child is brought near a cow's mouth. Then (pretending that) the infant is born from a cow's mouth, the child is bathed with cow's milk with the hymn 'Viṣṇur-yonim kalpayatu' (Ṛg. X.184. 1, अथर्व. V. 25. 5 and बृह. उप. VI. 4.21). The infant should receive the touch of the cow's limbs at the hands of the priest with the mantra of Viṣṇu (Ṛg. X. 184. 1). The officiating priest should take the child that is (now imagined as) born from (the mouth of) the cow and

(*Continued on next page*)

after performing the Gomukhaprasava-śānti. He should worship Rudra and Varuṇa on two jars, should invoke the serpents, the lords of Āśleṣā, on an image placed on a jar established on the figure of a lotus with twentyfour petals and invoke Bṛhaspati, the lord of Puṣya nakṣatra, to the south of the jar (for serpents) and the *pitṛs* (the lords of Maghā) to the north of Āśleṣā jar and invoke on the twentyfour petals, beginning from the petal which is due east and proceeding to the right therefrom, twentyfour deities beginning with Bhaga, the lord of Pūrvā Phalgunī up to Aditi, lord of Punarvasu; then he should invoke the *lokapālas* (eight); then worship all the deities invoked, establish fire (for homa) and the planets and perform *ajyādhāna* (putting fuel on the sacred Agni). After the *ajyādhāna* of the Sun and other planets he should offer to the principal deities, viz. the serpents, 108 or 28 of each of the materials viz. pāyasa mixed with ghee, fuel sticks, clarified butter and boiled rice, to Bṛhaspati and pitṛs 28 or 8 offerings of the same materials and to the 24 deities (of nakṣatras) viz Bhaga and the rest eight *āhutis* of pāyasa to each with the verse 'rak-ohasam' (Rg. X. 87. 1). The other deities are to be worshipped as in śānti for birth on Mūla nakṣatra and the offerings and mantras are to be the same as in that śānti. A śānti for the birth of a child on the 14th tithi of the dark half is still in vogue and the author knows about it personally; it is described at length in the Madanaratna (folio 24 from Gārgya) and in Śānti-kamalākara. The śānti on the birth of a child on Mūla nakṣatra is described in Madanaratna from Garga (folio 27b to 28b,) one peculiarity of which is that the father had to collect one hundred roots of trees and plants (mūla means 'root'). Vide also Śānti-kamalākara (folio 77a).

(*Continued from last page*)

hand it over to the mother who should pass it on to the father who should then return it to the mother The child should be placed on a piece of cloth and the father should look at the face of the infant Then the priest should sprinkle the infant with drops from the mixture of cow's urine, dung, milk, curds and ghee with the mantras beginning with 'Āpo hi ṣṭhā' (Rg. X. 9. 1). The father then smells thrice parts of the child's head with the mantra 'thou art born from each limbs of the father &c.' (अङ्गादङ्गात्सम्भवसि हृदयादधिजायसे। आत्मा वै पुत्रनामासि स जीव शरदः शतम्॥) and places it with the mother. This mantra is quoted in Nirukta III. 4 and in the Bṛ. Up. VI. 4. 8. It would be noticed that there is a symbolic simulation of the child (that was born on an unlucky nakṣatra &c.) as having been born from the mouth of a cow (a very sacred animal from Vedic times). Vide धर्मसिन्धु pp. 171-172 for details of गोमुखप्रसवशान्ति. The mantra 'Viṣṇur yonim kalpayatu' is employed in the Garbhādhāna rite.

The birth of a girl after three successive births of boys or of a boy after three successive births of girls was supposed to indicate unfavourable consequences to the parents and the family and death of the eldest, loss of wealth and great sorrow. Therefore a śānti was recommended on the 11th or 12th day from the birth of a girl or boy (as the case may be) or on an auspicious day. He (the father) should choose ācārys (chief officiating priest) and other priests, then perform a sacrifice to planets and offer worship to the golden images of Brahmā, Viṣṇu, Śiva and Indra on a jar placed on a heap of grains. On a fifth jar he should worship Rudra and one brāhmaṇa should recite four hymns to Rudra eleven times and all śāntisuktas when homa is being performed. The ācārya should cast into the fire fuel-sticks, ghee, sesame and boiled rice 100, 108 or 300 times to four deities viz. Brahmā, Viṣṇu, Maheśa and Indra respectively with the mantras 'Brahma jajñānam' (Tai. S. IV. 2. 8. 2, Vāj. S. 13. 3), 'idam Viṣṇur' (Rg. I. 22. 17), 'Tryambakam yajāmahe' (Rg. VII. 59. 12), 'Yata Indra bhayāmahe' (Rg. VIII. 61. 13). Then he should perform 'Sviṣṭakṛt' homa,[1248] then offer bali and *pūrṇāhuti*. The family members should be sprinkled with the sacred water. The performer should honour the ācārya and donate some gold and a cow to him and give *dakṣiṇā* to the other priests, should look into a vessel full of ghee and should make the brāhmaṇas recite śānti verses. The images with the additions or decorations thereof should be donated to the guru, brāhmaṇas, poor and helpless people should be fed according to his ability. By doing this śānti all misfortunes are destroyed. (Nirṇayasindhu p. 248 and Śāntiratnākara, folio 109).

The Kauśikasutra (kaṇḍikās 110 and 111), Bṛhatsaṃhitā[1249] (chap. 45. 51–54) and the Adbhutasāgara pp. 559–569 deal at length with the portents of births to women, cows, mares, she asses &c. A few passages only are set out here. Varāhamihira [1249] says 'when women give birth to monstrosities, or to two, three, four or more children at the same time or they are delivered much before or after the proper time, then results

1248. For 'Sviṣṭakṛt,' vide H. of Dh. vol. II. pp. 208, 1257 (2nd note). Vide Nirṇayasindhu p. 248 and Dharmasindhu p. 186 for this śānti called 'Trikaprasavaśānti' i. e. śānti on the successive births of a group of three (sons only or daughters only). The शान्तिमयूख (p. 20) prescribes that the 'pūrṇāhuti' is to be cast into fire with the mantra 'Mūrdhānam divo' Rg. VI. 7. 1, Vāj. S. VII. 24, Tai. S. I. 4. 13.

1249. प्रसवविकारे स्त्रीणां द्वित्रिचतुःप्रभृतिसंप्रसूतौ वा। हीनातिरिक्तकाले च देशकुलसंक्षयो भवति॥ बृहत्सं. 45. 52.

destruction of the country or family'. The Matsyapurāṇa 235. 1–3 and Viṣṇudharmottara II. 140. 1–3 have identical verses similar to the above. The Bhīsmaparva[1250] (chap. 3. 2–7) refers to portentous births such as the following; 'pregnant women and women who had never before given birth to sons produce monstrosities; so also even wives of men who are Vedic scholars are giving birth to eagles and peacocks, mares give birth to calves, dogs to jackals; some women have given birth to four or five girls (at the same time) &c.'. The Br. S. proceeds[1251] 'If mares, camels, she-buffaloes and cow-elephants give birth to twins, that portends death to them. The effect of such births will come to pass about six months later; Garga has declared two ślokas as to the śānti in such cases. The women that give birth (to twins or monstrosities) should be removed to another place (or country) by one that desires his own happiness, he should gratify brāhmaṇas by gifts of things desired by them and should cause a śānti (propitiatory rite) to be performed; as to quadrupeds, they should be removed from their flocks or herds and be abandoned in other countries; otherwise there would be ruin of the town, the owner and the flock or herd.'

Various modes were employed to divine the future, viz. (1) the position of planets and stars, (2) individual horoscopes, (3) flight and cries of birds like khañjana and crow, (4) natural phenomena (eclipses, meteors &c.), (5) dreams, (6) voices suddenly heard, (7) the physical and mental conditions of men, animals &c. The first four have already been briefly dealt with. Now dreams will be taken up for discussion.

It has already been seen (p. 728, notes 1157 and 1158) how in the Vedic literature dreams had been associated with good luck or ill-luck. The two epics, the Svapnādhyāya (of Ātharvaṇa-pariśiṣṭa LXVIII pp. 438–449), the Bṛhad-yoga-yātrā of Vārāha (chap. 16. 1–31), Purāṇas such as Vāyu (chap. 19. 13–18), Matsya (chap. 242), Viṣṇudharmottara (II. 176), Bhaviṣya I. 194, Brahmavaivarta-purāṇa (Gaṇeśa-khaṇḍa 34. 10–40), describe good or bad dreams; Agni (229, many verses of which are the same

1250. गर्भिण्योजातपुत्राश्च जनयन्ति विभीषणान्। ...तथैवान्याश्च दृश्यन्ते स्त्रियो वै ब्रह्मवादिनाम्। वैनतेयान्मयूरांश्च जनयन्ति पुरे तव॥ गोवत्सं वडवा सूते श्वा शृगालं महीपते॥ ...स्त्रियः काश्चित्प्रजायन्ते चतस्रः पञ्च कन्यकाः॥ भीष्म chap. 3. 2, 5–7; अ. सा. pp 562–63 quote these.

1251. वडवोष्ट्रमहिषगोहस्तिनीषु यमलोद्भवे मरणमेषाम्। षण्मासात् सूतिफलं शान्तौ श्लोकौ च गर्गोक्तौ॥ नार्यः परस्य विषये त्यक्तव्यास्ता हितार्थिना। तर्पयेच्च द्विजान्कामैः शान्तिं चैवात्र कारयेत्॥ चतुष्पदाः स्वयूथेभ्यस्त्यक्तव्याः परभूमिषु। नगरं स्वामिनं यूथमन्यथा तु विनाशयेत्॥ बृहत्सं. 45. 53–54, q. by अ. सा. p. 563.

as those of Matsya chap. 242), Bhujabala of Bhoja (pp. 298–304 verses 1347–1378), the Adbhutasāgara pp. 493–515 deal at length with the matters relating to dreams and śāntis therefor. Śaṅkarācārya in his commentary on Vedāntasūtra[1252] remarks that those who have studied the Svapnādhyāya declare that to see oneself riding on an elephant or the like is auspicious and to see oneself sitting in a conveyance drawn by asses is inauspicious (or unlucky). It appears that rarely an ancient writer like Aṅgiras[1253] said 'the movements of planets, dreams, nimittas (like throbbing), utpātas (portents) produce some consequences by chance; wise men are not afraid of them'. Numerous dreams are mentioned in the Rāmāyaṇa on several occasions. Some examples may be given. In the Sundarakāṇḍa (chap. 27, 23 ff) Trijaṭā (a *rākṣasī*) details several dreams that she saw and that indicated the destruction of rākṣasas and that were favourable to Rāma. Among the evil omens that she saw in her dream about Rāvaṇa were; he had his head shaved, he drank oil with which he was drenched, he was dressed in red garments, was intoxicated, wore wreaths of Karavīra flowers, he fell on the earth from his puṣpaka balloon, he was carried in a chariot drawn by asses, he was wearing red flowers and was anointed with red unguents &c. (verses 19–27). Similar dreams occur as seen by Trijaṭā in the story of Rāma contained in the Vanaparva chap. 280. verses 64–66. In the Ayodhyākāṇḍa (chap. 69. 8. ff) Bharata who was with his maternal uncle saw in a dream his father (Daśaratha) dirty and with dishevelled hair, falling from a mountain peak in a turbid lake full of cowdung, drinking that dirty water and oil; he also saw the ocean dried up and the moon fallen on the earth, he saw his father seated on a dark seat of iron and wearing black garments and beaten by women dark and tawny in colour, he saw him going to the south in a chariot drawn by asses &c. Bharata says that these dreams indicated the death of the king (Daśaratha) or of Rāma or Lakṣmaṇa. In the Mausalaparva of the Mahābhārata (chap. 3. 1–4) the Yādavas saw in dreams a black woman with whitish teeth running to Dvārakā with a laugh and kidnapping their women and terrible vultures were seen to be devouring the Vṛṣṇis and Andhakas in their own houses in which sacred fires had been established &c.

1252. आचक्षते च स्वमाध्यायविदः। कुञ्जरारोहणादीनि स्वप्ने धन्यानि खरयानादीन्यधन्यानीति। शङ्कराचार्य on वेदान्तसूत्र III. 2. 4.

1253. गीतश्चायमर्थोऽङ्गिरसा । ग्रहाणां चरितं स्वप्नो निमित्तौत्पातिकं तथा। फलन्ति काकतालीयं तेभ्यः प्राज्ञा न विभ्यति॥ वेणीसंहार II. 15.

It is impossible to point out the unlucky and lucky dreams as their number mentioned in Adbhutasāgara (pp. 502–513), quoting the Purāṇas, Parāśara, the works of Varāha and others is extremely large. One passage from the Matsyapurāṇa (242 verses 2–14, quoted in Adbhutasāgara pp. 502–503) is cited here by way of illustration; 'the springing of grass and plants from one's body (except from the navel); bronze vessels dashed against one's head and pulverized; shaving of the head; nakedness; wearing dirty garments; bath with oil; being smeared with mud; fall from a high spot (hill &c.); sitting in a swing, collecting mud and iron; killing horses; ascending trees that have flowers and over circles and riding boars, bears, asses and camels; eating of (the flesh of) birds and fishes and oil and rice mixed with *mudga* or *māṣa*; dancing, laughing, marriage and singing; playing on musical instruments other than stringed ones; going for a dip in a river; bath with water mixed with cowdung or mud or with water fallen on bare earth; entering the womb of one's mother; ascending a funeral pyre; the fall of Indra's banner; the fall of the Sun and the Moon; seeing portents of the three kinds (heavenly, those in atmospheric regions and earthly); anger of gods, brāhmaṇas, kings and one's *gurus*; embracing maidens; sodomy; loss of one's limbs; vomiting and purging; going to the southern direction; being overwhelmed by a disease; fall of fruits and of flowers; fall of houses; sweeping of houses with a broom; playing with goblins, birds or animals that subsist on putrid flesh, monkeys, bears and men; humiliation by strangers (or enemies); arising of calamity brought on by another person (or enemy); wearing ochre-coloured garments; playing with women; plunging into oil or drinks; wearing red flowers and applying red unguents; these and others are inauspicious dreams.

In the Bṛhadyogayātrā[1254] Varāha prescribes that the king wearing silken garments, pearls and jewels and accompanied by

1254. यज्जाग्रतो दूरमुदैति दैवमाश्चर्यं मन्त्रान् प्रयतश्चिरेतान्। लब्धेकमुग्दक्षिणपार्श्वशायी स्वप्नं परीक्षेत यथोपदेशम्॥ नमः शम्भो त्रिनेत्राय रुद्राय वरदाय च। वामनाय विरूपाय स्वप्नाधिपतये नमः। भगवन् देवदेवेश शूलभृद्वृषवाहन। इष्टानिष्टे समाचक्ष्व स्वप्ने सुप्तस्य शाश्वतम्॥ बृहद्योगयात्रा q. by अ. सा. p. 494; the two verses नमः शम्भो occur in विष्णुधर्मोत्तर II. 176. 9–10 and also the reference to 'yajjāgrato' (occurs in verse 11). That first mantra is यज्जाग्रतो दूरमुदैति दैवं तदु सुप्तस्य तथैवैति। दूरङ्गमं ज्योतिषां ज्योतिरेकं तन्मे मनः शिवसङ्कल्पमस्तु॥ (वाज. सं. 34. 1). This hymn is called शिवसङ्कल्प (vide मनु XI. 250).

astrologers and *purohita* should enter the temple of his favourite deity, should place the images of the *dikpālas* therein, worship them with mantras, place four jars full of water in the four directions, should thrice repeat the mantras beginning with 'Yajjāgrato dūram' (Vāj. S. 34. 1), should eat only once that day, sleep on his right side and pray to Rudra (as noted in *n* 1254) and examine the dream, auspicious or inauspicious, seen towards the close of night.

The Matsya (242. 21–35) sets out[1255] lucky dreams as follows: ascending (or riding on) mountains, palaces, elephants, horses and bulls; going among trees having white flowers; the shooting of trees and grass from the navel and seeing (the sleeper) endowed with many hands or heads; wearing garlands of very white flowers and very white garments; eclipse of the Sun, Moon and nakṣatras; sprinkling water (on one's body) all over; embracing or raising the banner of Indra; seizure of the earth and seas; slaughter of enemies; victory in disputes, in gambling and in battle; eating of wet (fresh) meat, of fish and of pāyasa (rice boiled in milk and sugar); seeing blood or being bathed with it; drinking liquor, blood, intoxicants and milk; being surrounded on the earth with intestines; sight of bright sky; sucking the udders (the milk) of cows and she-buffaloes and of lionesses, cow-elephants and mares; receiving favours from (images of) gods, *gurus* and brāhmaṇas; bath with water flowing from the horns of cows or falling from the Moon (this prognosticates the acquisition of a kingdom); being crowned as a king; the cutting of one's head; one's death; being burnt by fire; one's house and the like being burnt down by fire; securing the insignia of royalty; playing on the lute; swimming beyond waters; crossing difficult places; the delivery in one's own house of cows, mares and cow-elephants; being mounted on horses; weeping; obtaining of handsome women or embracing them; being bound with fetters; being smeared with excreta; seeing living kings and friends; seeing images of gods and pure (or pellucid) waters. On seeing such auspicious dreams a man easily secures permanent wealth and he who is suffering from a disease becomes free from it.

In the Jain Kalpasūtra of Bhadrabāhu (S. B. E. vol. XXII. p. 129) fourteen very auspicious dreams seen by the brāhmaṇī Devānandā are enumerated, viz. an elephant, a bull, a lion,

1255. This long passage from Matsya about auspicious dreams is quoted as from Viṣṇupurāṇa and Viṣṇudharmottara by अ. चि. pp. 499–500.

anointing of the goddess Śrī, a garland, the Moon, the Sun, a flag, a vase, a lotus lake, the ocean, celestial abode, a heap of jewels, a flame and on pp. 231–238 elaborate details of these dreams are given.

Matsya (chap. 243. 2–12) sets out the sights that are unlucky when they come before a king who is going on an invasion (such as improper drugs, corn with dark exterior, cotton, grass, dry cowdung and many others) and prescribes that on seeing these for the first time he should worship Keśava with a laud and that if he sees it a second time he should enter his palace. Yogayātrā (chap. 13. 4 ff) provides what the king starting on an expedition should hear viz. such recitations as that of the Veda, Vedāṅgas, Dharmaśāstras, Arthaśāstra, Mahābhārata, Rāmāyaṇa, Purāṇa passages. Matsya (chap. 243. 15–25) prescribes the sights that are auspicious (such as white flowers, jars full of water, aquatic birds, meat and fish, flaming fire, courtezans, Dūrvā grass, fresh cowdung, gold, silver, copper and all jewels besides several others and winds up with a fine sentiment,[1256] viz. the ease (or satisfaction) of one's mind is the highest sign of success; on one side are all prognostications and on the other is the mind's ease. The Bṛhad-yogayātrā of Varaha has a similar verse. Vide H. of Dh. vol, II pp. 511, 876 and notes 1192 and 2048 therein for two sets of auspicious sights. The Jyotistattva (pp. 729–730) quotes several verses on the objects that are auspicious or inauspicious when seen by a person starting on a journey or expedition and remarks that the same objects when seen in a dream are of the same (auspicious or inauspicious) quality. The Vasantarāja-śākuna (V. 2–6) sets out fifty objects that are auspicious when starting on a journey or entering a home such as curds, sandal wood, ghee, dūrvā, a jar full of water &c. and (V. 10–11) specifies the thirty objects that are inauspicious.

The Matsya provides[1257]: "dreams seen in the first watch of the night bear fruit in a year, those seen in the 2nd watch after

(*Continued on next page*)

six months, those seen in the third watch after three months and those seen in the last watch in a month. If on the same night one sees both auspicious and inauspicious dreams, one (the astrologer) should declare that the last dream (alone) will yield consequences. Therefore, when a person sees an auspicious dream he should not go to sleep thereafter. Declaring a bad dream to another is commended as also sleeping after seeing it; bath with water mixed with the viscous sediment of oily substances, *homa* of sesame, honouring brāhmaṇas, hymn of praise to Vāsudeva and worship of him and listening to the story of the liberation of Gajendra—these remove the evil effects of bad dreams." In connection with the vrata called 'Siddhārthakādi-saptamī' performed for gaining the favour of the Sun the Bhaviṣya (Brāhma-parva, 194. 1–25) sets out the dreams which are auspicious or favourable to the person performing the vrata. Those verses are similar to those in the Matsya and are quoted by Kṛtyakalpataru (on vrata pp. 176–179). One verse says 'on seeing a favourable dream one should not sleep again, but declare in the morning the dream as seen to Bhojakas and brāhmaṇas (or to Bhojaka brāhmaṇas).' The Bṛhadyoga-yātrā contains similar verses as quoted by Adbhutasāgara p. 501.

The Jyotistattva quotes[1258] a verse 'I shall declare what matters seen in dreams tend to bring knowledge (of impending consequences) to men who do not understand the true nature

(*Continued from last page*)

स्वप्नास्तु प्रथमे यामे संवत्सरविपाकिनः। षड्भिर्मासैर्द्वितीये तु त्रिभिर्मासैस्तृतीयके। चतुर्थे मास-मात्रेण पञ्चमे नात्र संशयः। "'एकस्यां यदि वा रात्रौ शुभं वा यदि वाशुभम्। पश्चाद् दृष्ट्वा तु यस्तत्र तस्य पाकं विनिर्दिशेत्। तस्माच्छोभनके स्वप्ने पश्चात्स्वप्नो न शस्यते। मत्स्य 242. 15–20; all these are q. by अ. सा. on pp. 501, 502 and 514 and the first four also from विष्णुधर्मोत्तर by अ. सा. p. 514. For नागेन्द्रमोक्ष (i. e. more familiarly गजेन्द्रमोक्ष), vide वामनपुराण 85, विष्णुधर्मोत्तर I. 194, पद्म VI. 112. 18–20. The अथर्वपरिशिष्ट LXVIII (2. 56 at p. 445) says: 'शुभं वाप्यशुभं वापि यत्पश्चात्तत्फलं लभेत्। स्वप्नास्तु प्रथमे यामे संवत्सरविपाकिनः॥ द्वितीयेऽहनु मासेषु तृतीये तु तदर्धभाक्। मासिके गोविसर्गे तु सद्यः पाकः प्रभातिके॥'; दृष्ट्वा तु शोभनं स्वप्नं न भूयः शयनं व्रजेत्। प्रातश्च कीर्तयेत्स्वप्नं यथा दृष्टं खगाधिप। प्राज्ञो भोजकविप्रेभ्यः सुहृदां देवतासु च। भविष्य q. in कृत्यकल्प० on व्रत pp. 178–179. For मत्स्य and भोजकs vide H. of Dh. vol. II. p. 722 note 1727. In वेणीसंहार II (between verses 2 and 3) the चेटी says 'अकुशलदर्शना अपि स्वप्नाः ग्रहांसपा कुशलपरिणामा भवन्तीति श्रूयते।'

1258. अविज्ञातस्वरूपाणां नराणां ज्ञानहेतवे। स्वप्ने दृष्टानि वक्ष्यामि पुण्यपापोद्भवानि च॥ एवं चैषां सूचकत्वं न कारकत्वम्। ज्योतिस्तत्त्व p. 730; सूचकश्च हि श्रुतेराचक्षते च तद्विदः। वेदान्तसूत्र III. 2. 4, on which the शाङ्करभाष्य is "सूचकश्च हि स्वप्नो भवति भविष्यतोः साध्वसाधुनोः। तथाहि श्रूयते 'यदा कर्मसु''निदर्शने'॥" This last verse is छा. उप. V. 2. 9.

(significance) of objects seen in dreams that arise from their meritorious or sinful actions (in previous lives)' and remarks that from this verse it follows that dreams are purely indicative and do not *produce* consequences (by themselves). The higher thought in India held that dreams were only indicative or suggestive of future auspicious or inauspicious events, as affirmed by the Vedāntasūtra (III. 2.4) and by Śaṅkarācārya's commentary thereon. On the other hand Bhujabala provides[1259] 'to sleep again (after a dream), not to declare it to another, bath in the Ganges, *japa* (of holy texts), śānti, *svastyayana* (asking brāhmaṇas to say 'it would be auspicious'), to resort in the morning to cows and an Aśvattha tree, honouring brāhmaṇas with food mixed with sesame, with gold and flowers according to one's means, merit-giving recital of the Mahābhārata—these tend to destroy (the effects of) bad dreams.' Bhujabala further says that all white objects except cotton, ashes, bones, buttermilk are auspicious (in dreams) and all dark objects except cows, images of gods, elephants, horses and brāhmaṇas are inauspicious.

The Ātharvaṇa-pariśiṣṭa[1260] LXVIII (pp. 438–449) states that persons have different dreams according as their constitutions (*prakṛti*) are choleric or windy or phlegmatic (*pitta*, *vāta* and *kapha*) and long lists of dreams and their interpretations are given and it prescribes the same remedies against bad dreams as Varāha does.

1259. भूयः प्रस्वपनं न चास्य (तथास्य ?) कथनं गङ्गाभिषेको जपः शान्तिः स्वस्त्ययनं निवेदणमपि प्रातर्गवाश्वत्थयोः। विप्रेभ्यश्च तिलान्नहेमकुसुमैः पूजा यथाशक्तितः पुण्यं भारतकीर्तनं च कथितं दुःस्वमविच्छित्तये॥ सर्वाणि शुक्लानि सुशोभनानि कार्पासभस्मास्थि च तक्रवर्जम्। सर्वाणि कृष्णानि न शोभनानि गोदेवहस्तिद्विजवाजिवर्जम्॥ भुजबल p. 304 (first verse) and p. 310 (2nd verse). अ. सा. p. 514 quotes the verse भूयः प्रस्वपनं० from वराह. On अथ स्वस्त्ययनं वाचयीत (आश्व. गृ. I. 8. 15), नारायण explains 'ओं स्वस्ति भवन्तो ब्रुवन्त्विति ते च ओं स्वस्तीति प्रत्यूचुः।'.

1260. विप्रेभ्यः शक्तितो दानं शान्तिः स्वस्त्ययनादयः। विनाशयन्ति दुःस्वप्नं प्रातश्चाश्वत्थसेवनम्॥ अश्वत्थसेवा तिलपात्रदानं गोस्पर्शनं ब्राह्मणतर्पणं च। शान्तिक्रिया स्वस्त्ययनक्रिया च दुःस्वप्नमेतानि विनाशयन्ति॥ आथर्वणपरिशिष्ट LXVIII (स्वप्नाध्याय) 2.60 (p. 445); 'अथ दुःस्वप्नदर्शने कृत्यम्। यो मे राजन्नित्यृचा सूर्योपस्थाने दुःस्वप्ननाशः। अथ स्वप्नेयेति जपाद्वा क्वचिद्दर्शवच्छ्राद्धेन दुःस्वप्ननाशः, चण्डीसप्तशतीपाठेन वा। यद्वा श्रीविष्णुसहस्रनामस्तोत्रजपः कार्यः। अथवा श्रीभारतस्थस्य श्रीमद्भागवतस्थस्य वा गजेन्द्रमोक्षस्य श्रवणं पाठो वा। धर्मसिन्धु p. 361. ऋ. II. 28.10 is यो मे राजन्युज्यो वा सखा वा स्वप्ने भयं भीरवे मह्यमाह। स्तेनो वा यो दिप्सति नो वृको वा त्वं तस्माद्वरुण पाह्यस्मान्॥. This is obviously addressed to वरुण and it is strange that it is recommended for the worship of सूर्य by the धर्मसिन्धु. For Saptaśatī, vide above p. 155 n 396. For the thousand names of Viṣṇu, vide Anuśāsanaparva 149. 14–120 and for गजेन्द्रमोक्ष. भागवत VIII. 2.

The Dharmasindhu (pp. 359-360) collects in one place numerous dreams that are lucky or auspicious and that are unlucky or inauspicious and then prescribes (p. 361) the remedies to avert the consequences of unlucky dreams viz. worship of the Sun with the mantra (Rg. II. 28. 10, Tai. S. IV. 14-123) 'O king Varuṇa! protect us from the danger which my helper or friend declares to me (from what I saw) in a dream or from the thief or wolf who desires or is about to injure us'; or one may recite inaudibly the verse 'Adha svapnasya' (Rg. I. 120.12) or perform a śrāddha like the one on Amāvāsyā, or should recite the Saptaśatī in honour of Caṇḍī or the thousand names of Viṣṇu or recite or listen to the recitation of the liberation of Gajendra in the Bhārata or Bhāgavata.

All ancient countries and peoples believed in dreams and satisfied their curiosity to know the future by interpreting them. The Chaldean astrologers and dream-interpreters were in high favour at Babylonian and Assyrian courts. The Book of Daniel (chap. 2) tells us how Nebuchadnezzar, a great king of Babylon, asked the Chaldeans not only to interpret dreams but commanded them on threat of death to make known to him the dream which he had forgotten and then to interpret it. Plato, the greatest of the Greek philosophers, regards dreams as important physical and psychic symptoms while certain dreams are conceded as of supernatural origin and explains in his Timaeus (chap. 46 and 47) that dreams are prophetic visions received by the lower appetitive soul (through the liver). In JRAS (old series) vol. 16 pp. 118-171 N. Bland contributes a long and interesting article on 'the Mahomedan science of Tābir or interpretation of dreams.' There are striking parallels between the rules to be observed by the dreamer and by the interpreter and the principles of interpretation (of dreams) by contraries and by dependence upon the religion, country and bodily conditions (such as total fast or full stomach) of the dreamer. On p. 141 of JRAS there is an interesting account of a dream of Nushirwan, a Sassanian king (531-579 A. D.), who saw a dream that he drank from a golden goblet and that a black hog put its head in the goblet and drank from it. Then we are told 'Buzurmihr, his minister, whom he consulted, told him it signified that his favourite princess had a black slave who was her lover and suggested that the women of his harem should be ordered to dance undressed in the presence of the king. One of them showing some hesitation in complying and being protected by the others was discovered to be a Hindu male slave and the

Vazir's interpretation was verified.' The name of the Vazir remarkably agrees in sound with the name Varāhamihira and it is not very fantastic to suppose that Varāhamihira, probably the most famous astrologer and astronomer of early times in India, had been patronized by Nushirvan and held a high position in his court. Chronology is quite in favour of this identification since Varāhamihira takes *śaka* 427 (505 A. D.) as the starting point for finding out the *ahargaṇa*.

In modern[1261] times many educated people think dreams as of no consequence whatever, while there are others who regard dreams as almost infallible indicators of coming events; there is also a third class of people who are willing to listen to the arguments advanced on behalf of the interpreters of dreams and also of those who regard thoughts on the use and value of dreams as frivolous. To those who want to hear arguments on both sides and to form a judgment of their own about dreams, I would recommend the 'Fabric of Dreams' by Catherine Taylor Craig (Kegan Paul, Trench, Trubner, London, 1918); Freud's 'Interpretation of dreams' is the most important of his works, in which he develops his psycho-analytic technique. Then there is the work 'Second sight in daily life' by W. H. W. Sabine who has a theory of his own. His work deals with precognition (or foreknowledge) which according to him is a subdivision of Extra-sensory perception. He propounds the theory that the mind comprises of not only normal memory appearing to derive from physical perception but also 'anticipatory memory' deriving from the Basic Experience which from time to time passes to some degree into conscious awareness. Time is one and does not exist except as a verbal convenience and that what we call 'future' has already happened but it is not indicated in what form it has happened. Considerations of space and relevance preclude further discussion of this subject here.

Certain other interesting śāntis will now be described. When a great-grandson (prapautra i. e. a son's son's son)[1262]

1261. Dr. R. G. Harshe contributes to the 'Shri K. M. Munshi Jubilee volume' (Bharatiya Vidya Bhavan, Bombay 1948) an interesting paper (pp. 241-268) on 'two illustrated manuscripts on dreams', the contents of which do not attempt any elaborate theory about dreams but record empirical observations on dreams for the guidance of people in general.

1262. For the importance of the great-grandson, vide the verse पुत्रेण लोकाञ् जयति पौत्रेणानन्त्यमश्नुते। अथ पुत्रस्य पौत्रेण ब्रध्नस्याप्नोति विष्टपम् ॥ मनु. IX, 137 = वसिष्ठ 17. 5 = विष्णुधर्मसूत्र 15. 46.

is born to a person a śānti has to be performed when he sees the face of the great-grandson. The saṅkalpa [1263] is given below. He should perform the rites beginning with the worship of Gaṇeśa and ending with Mātṛpūjā, then establish a jar full of water and worship (the image of) Varuṇa therein, perform the rite of *nīrājana* [1264] to the accompaniment of the sound of drums, sit on a seat of udumbara tree covered with a blanket and should request brāhmaṇas to sprinkle sacred water on his person. The brāhmaṇas should sprinkle water on him to the accompaniment of a hymn to Varuṇa and a hymn to the Ganges. At the end of the *abhiṣeka* the performer should give up old garments and wear new ones and should worship the Ganges. Melted ghee should be put in a vessel of bronze and the performer should see the reflection of his face therein and then should see the face of his great-grandson in the light of a lamp placed in a golden vessel. Then he should sprinkle drops of water on the great-grandson with one hundred flowers of gold. Then he should sprinkle the great-grandson with water from the jar used for *abhiṣeka*. For completing the ceremony of seeing the face of the grandson, he should donate a cow and feed brāhmaṇas according to his means. Then he should worship an image of Viṣṇu, offer *pāyasa* to it and address the following prayer [1265] 'O Viṣṇu! by your favour I have seen the face of my great-grandson. Therefore, O Lord! in all ways and always do what I desire'. Then the image should be donated with the mantra 'by the donation of the image (of Viṣṇu) may all evil influences of planets be always conjured away in the case of the child, O enemy of Kaṃsa and the Lord of the worlds,' and he should donate to the brāhmaṇas the ghee in which he saw his face.

One of the śāntis that is frequently performed even in these days is 'Udakaśānti'. It is performed for averting the consequences of many happenings and for securing certain benefits

1263. मम ब्रह्मलोकावाप्तिसर्वतीर्थयात्रासकलदानजन्यपुण्यजातावाप्तिद्वारा श्रीपरमेश्वरप्रीत्यर्थं प्रपौत्रमुखदर्शनं करिष्ये। तदङ्गं गणेशपूजनं स्वस्तिपुण्याहवाचनं मातृकापूजनं नान्दीश्राद्धं च करिष्ये इति सङ्कल्प्य।

1264. For Nīrājana 'waving of lights before men, horses', vide H. of Dh. vol. III. pp. 230-231. The Bṛ. S. 43.2 regards नीराजन as a Śānti 'द्वादश्यामष्टम्यां कार्तिकशुक्लस्य पञ्चदश्यां वा। आश्वयुजे वा कुर्यान्नीराजनसंज्ञितां शान्तिम्॥.'

1265. The प्रार्थनामन्त्र is: 'भो विष्णो त्वत्प्रसादेन सुखमालोकितं मया। तस्मात्कुरु ममाभीष्टं सर्वदा सर्वथा प्रभो॥, the दानमन्त्र is: प्रतिमायाः प्रदानेन बालकस्य सदा ग्रहाः। क्षेमं यान्तु देवेश कंसारे जगतां पते॥.

such as good health, the removal of the diseases due to the three constituent elements of the human body, viz. bile, phlegm and *vāta* (wind), that may have already arisen or are likely to arise, or for mitigating all the trouble that is caused by planets occupying unfavourable positions from the *lagna* in a person's horoscope or from the *rāśi* of his birth, for removing the impurity on birth or death in one's house or family, for securing a happy life. Therefore, the saṅkalpa may assume various forms that are noted below.[1266] In modern times this is a very elaborate rite in which a very large number of Vedic verses are repeated and which takes up about three hours for its performance. Therefore, even a brief resume of the modern procedure is not attempted here. But one of the oldest available descriptions of this rite contained in the Baudhāyana-gṛhya-śeṣasūtra (I. 14) is set out here in order to convey an idea of this śānti. As the Baudhāyana-sūtras are closely connected with the Taittirīya-saṃhitā and Brāhmaṇa the references to mantras and texts are cited as far as possible from that Saṃhitā and Brāhmaṇa. Many of the mantras occur also in the Ṛgveda and other saṃhitās. Here are the texts; waters indeed are faith; (when a priest takes water) he begins (the rite with) faith itself; waters are indeed the sacrifice, he begins sacrifice itself; water is indeed thunderbolt, he strikes the thunderbolt against enemies; waters are destroyers of malignant spirits (and it is taken) for destroying evil spirits; waters are the favourite abode (or seat) of the gods; waters are indeed nectar; therefore people sprinkle with water him who faints; waters are indeed all gods; he begins with gods. Waters indeed are well disposed; he (priest) removes with the kindly (waters) the pain of this person (the sacrificer); this is (what) the Brāhmaṇa (text) says.

Therefore (the priest) prepares propitiatory[1267] water with two *kuśas* dipped therein. One should commence a śānti on the nakṣatra of (a person's birth) or on an auspicious nakṣatra or when auspicious rites are to be performed, viz. marriage, a (child's) tonsure, *upanayana*, Vedic student's return home, hairparting (of a pregnant woman), establishment of the Vedic fires and other

1266. मम शरीरे उत्पन्नोत्पद्यमानकफवातपित्तोद्भूतसमस्तामयानां जीवच्छरीराविरोधेन समूलनिवृत्तिपूर्वकक्षिप्रारोग्यावाप्त्यर्थं मम जन्मलग्नजन्मराशिभ्यां सकाशादनिष्टस्थानस्थित-रव्यादिग्रहजनित-जनिष्यमाण-सकलपीडापरिहारार्थं मम गृहे अशुचित्वादिदोषपरिहारार्थं वा क्षेमायुःसिद्ध्यर्थं वा उदकशान्तिं करिष्ये।

1267. The words 'vajro vā āpaḥ' (water is indeed thunderbolt) occur frequently in the Sat. Br. I. 1. 1. 17, I. 2. 5. 20, I. 7. 1. 20 &c.

rites, or when a planet is eclipsed, or when a planet indicates a portent, or when danger comes (to a person) from bipeds or quadruped animals.[1268] He should make an even number of brāhmaṇas wash well their hands and feet and make them sip water, seat them on seats in each of the directions, should smear with cow-dung a four-cornered altar of the extent of a bull's hide, should himself sit on *darbhas* with face towards the east, should hold darbhas and dūrvā grass, have two kuśas in his hand, should sprinkle with water the altar made by him, should draw lines thereon and sprinkle water over them and should spread over it dūrvā grass and darbhas and sprinkle it with water scented with sandalwood paste and cover it with flowers, should wrap with (cotton) threads the sacred vessel[1268a] of palāśa leaves and place it on them (darbhas and dūrvā) with the mantra 'brahma jajñānam' (Tai. S. IV. 2. 8. 2). Then he pours water across the two blades of darbha grass and mutters 'tat-savitur-vareṇyam' (Rg. III. 62. 10) and throws in (the water) whole grains of rice and yavas with the formula 'bhūr-bhuvaḥ-suvarom' (Tai. Ā. X. 2.1). Then he spreads around flowers, dūrvā grass and fruits, covers it (jar) with dūrvās and darbhas and touches with the verse 'śan-no devīr' (Rg. X. 9. 4). When the brāhmaṇas have placed themselves besides the officiating priest, he mutters the verse 'tat-savitur-vareṇyam' (Rg. X. 62. 10) separately by each foot and by half verse in one breath and mutters the first words of (all) the Vedas. Then he recites the following[1269] viz. the *anuvāka* beginning with 'kṛṇuṣva pājaḥ' (Tai. S. I. 2. 14) but omitting the half verse 'made cid-asya' (Tai. S. I. 2. 14. 7), the anuvāka beginning with 'indram vo' (Tai. S. I. 6. 12), with the two verses 'yata indra' (Rg. VIII. 61. 13, Tai. Ā. X. 1. 9), and 'svastidā' (Rg. X. 152. 2, Tai. Ā. X. 1. 9), with the two verses 'Mahān Indro' (Tai. S. I. 4. 41) and 'sajoṣā Indra' (Tai. S. I. 4. 42), with 'Ye devāḥ purassado' (Tai S. I. 8. 7. 1) repeated

---

1268. Compare कौशिकसूत्र IX. 8 'अहतवासाः कंसे शान्त्युदकं करोति।'.

1268 a. Vide पैठीनसि quoted by स्मृतिच. I. p. 222 'ब्रह्मपात्रे तु यो भुंक्ते मासमेकं निरन्तरम्। त्रिंशद्वाजपेयैस्तुल्यं महापातकनाशनम्॥ सौवर्णे राजते पात्रे ताम्रे पद्मपलाशयोः॥ भोजने भोजने चैव त्रिरात्रफलमश्नुते॥ ब्रह्मपात्रं पलाशपात्रम्। पुराणेऽपि। पालाशेषु च पत्रेषु मध्यमेषु च भारत। यः करोत्यशनं तस्य प्राजापत्यं दिने दिने॥. Compare लघुशातातप verse 162.

1269. It may be noticed that most of the verses to be recited speak of destroying evil spirits (rakṣas) or enemies, pray for welfare and happiness (*svasti* and *śarma*), for freedom from danger, for protection, for long life &c.

five times, with the five formulas 'Agnaye rakṣoghne' (Tai. S. I. 8. 7. 2), with the five formulas 'Agnir-āyuṣmān' (Tai. S. II. 3. 10. 3), with four clauses 'yā vām-indrāvaruṇā' (Tai. S. II. 3. 13. 1), with the eight clauses 'Yo vām-Indrāvaruṇau' (Tai. S. II. 3. 13. 3), with the four verses 'Agne yaśasvin' (Tai. S. V. 7. 4. 3), the Rāṣṭrabhṛt anuvāka beginning with 'ṛtāṣād-ṛtadhāmā' (Tai. S. III. 4. 7. 1), with the three mantras 'namo astu sarpebhyaḥ'[1270] (Tai. S. IV. 2. 8. 3), with 'ayam puro harikeśaḥ' (Tai. S. IV. 4. 3. 1) repeated five times, with the Apratiratha[1271] anuvāka beginning with 'āśuḥ śiśānaḥ' (Tai. S. IV. 6. 4. 1), the anuvāka beginning with 'śam ca me mayaśca me' (Tai. S. IV. 7. 3. 1), the anuvāka called 'vihavya' beginning with 'mamāgne varco vihaveṣvastu' (Tai. S. IV. 7.14. 1), the Mṛgāra anuvāka[1272] beginning with 'Agner-manve' (Tai. S. IV. 4. 15. 1–11), the offering mantras to serpents beginning with 'samīcī nāmāsi prācī dik' six times repeated, the offering prayers to Gandharvas in the six clauses beginning with 'hetayo nāma stha' (Tai. S. V. 5, 10. 3-4); the five 'ajyāni (bricks) offerings with 'śatāyudhāya' (Tai. S. V. 7. 2. 3), the anuvāka beginning with 'bhūtam bhavyam bhaviṣyat' (Tai. S. VII. 3. 12. 1), the Atharva-śiras,[1273] the anuvāka beginning with 'Indro Dadhīco asthabhiḥ' (Tai. Br. I. 5. 8. 1, Ṛg. I. 84. 13), the Pratyaṅgirasa beginning with 'cakṣuṣo hete' up to 'bhrātṛvyam pādayāmasi' (Tai. Br. II. 4. 2. 1–4), the anuvāka beginning with 'prāṇo rakṣati viśvam-ejat' (Tai. Br. II. 5. 1. 1), the anuvāka beginning with 'siṁhe vyāghra uta yā pṛdākau' (Tai. Br. II. 7. 7. 1); the anuvāka beginning with 'aham-asmi' (Tai.

1270. It is difficult to construe the printed text here. It runs: 'नमो अस्तु सर्पेभ्यः' इति तिसृभिरनु च च्छन्दसं पञ्चचोडा 'अयं पुरो हरिकेशः' इति पञ्चभिः पर्यायैः &c. 'पञ्चचोडा means a brick with five protuberances. The तै. सं. V. 3. 7. 2 has पञ्चचोडा उपदधात्यप्सरस एवैनमेता भूता अमुष्मिँल्लोक उप शेरे' which means 'He puts down the bricks with five crests (protuberances), indeed these becoming Apsarases lie down near him in the yonder world'. But there is no mantra here. Besides अनु च च्छन्दसं is not clear. Is it अनुच्छन्दसम् with च inserted between अनु and छन्दसम् or is it a printer's mistake?

1271. Kātyāyana in his Srāddhasūtra prescribes that among the holy texts to be recited when the brāhmaṇas are eating the śrāddha dinner are the Rākṣoghnī verses and the Apratiratha hymn. Ṛg. X. 103 has most of the verses called Apratiratha in Tai. S. IV. 6. 4.

1272. The printed text reads 'sṛgāram'. Vide Kauśikasūtra IX. 1 for Mṛgāra-sūktāni.

1273. The Atharvaśiras is an Upaniṣad beginning with 'Devā vai svargam lokam-āyan'. Vide H. of Dh. vol. IV, pp. 45-46 note.

Br. II. 8. 8. 1), the anuvāka 'tā sūryācandramasā' (Tai. Br. II. 8. 9. 1), the three anuvākas beginning with 'agnir naḥ pātu' (Vāj. S. 4. 15), the anuvāka 'ṛdhyāsma' (Tai. Br. III. 1.2.1), the anuvāka 'navo navo' (Tai. S. II. 3. 5. 3), with (the mantras of) supplementary sacrifices, with a verse containing the word 'surabhi' (Tai. S. I. 5. 11. 4 or VII. 4. 19. 4), with verses addressed to waters (Ṛg. X. 9. 1-3 = Tai. S. V. 6. 1. 4 ff), with verses addressed to Varuṇa, with the verses beginning with 'Hiraṇya-varṇāḥ' (Tai. S. V. 6. 1), verses addressed to (Soma) Pavamāna (from Ṛg. IX. 1. 1 'svādiṣṭhayā' to end of Ṛg. IX), with the Vyāhṛtis (seven mystic words, bhūḥ, bhuvaḥ, svaḥ, mahaḥ, janaḥ, tapaḥ, satyam), the anuvāka beginning with 'tac-chaṁyor' (Tai. B. III. 5. 11). He repeats thrice the concluding passage 'namo brahmaṇe'.[1273a]

The (officiating priest) makes the performer rise from his seat and sprinkles water on him to the accompaniment of the Vyāhṛtis (bhūḥ &c.). (The performer) makes gifts (to the officiating priest). Then the officiating priest sprinkles sacred water on those that are possessed by an evil spirit or attacked by fever or troubled by ghosts, that are the friends, relatives, agents of the king's and of the royal priests, and the young and old members (of the performer's family), pregnant women, persons suffering from bad diseases, persons suffering from diseases for a long time, persons that are emaciated and are sick; also sprinkles sacred water on the elephants, horses, camels, cows, buffaloes, goats, sheep and servants of the performer; in this way the rite is performed for one day, three or five or seven days. Thus doing he wards off death; so says the blessed Baudhāyana."

When a person's nakṣatra of birth is afflicted by an evil planet or aspect Parāśara provided a śānti as follows:[1274] after putting in a jar full of water the dung and urine of a white bull and the milk of a white cow and *kuśas* the person should be

---

1273 a. The तै. आ. II. 13. 4 has the very words 'नमो ब्रह्मण इति परिधानीयां त्रिरन्वाह' that occur in बौ. गृ. झे. सू. The verse is 'नमो ब्रह्मणे नमोस्त्वग्नये नमः पृथिव्यै नम ओषधीभ्यः। नमो वाचे नमो वाचस्पतये नमो विष्णवे बृहते करोमि॥' (तै. आ. II. 12). The verse occurs in आश्व. गृ. (III. 5. 4), which reads महते for बृहते.

1274. अथ शान्तिमाह पराशरः। तत्र जन्मर्क्षोपतापे श्वेतवृषभस्य शकृन्मूत्रं तद्वर्णायाश्च गोः पयः कुशांश्चोदकुम्भे निधायाभिषेचनं कुर्यात्। अ. सा. p. 271. The विष्णुधर्मोत्तर is quoted by मदनरत्न (on शान्तिक folio 20b) 'शकृन्मूत्रे तु संगृह्य श्वेतस्य वृषभस्य तु। श्वेतगोपयसा सार्धं स्नातव्यं कुशवारिणा। जन्मनक्षत्रपीडायां तस्माद् क्लेशाद्विमुच्यते॥'.

sprinkled with the mixture. Similarly, the Matsya [1275] prescribes for one in whose birth rāśi an eclipse takes place a sacred bath with water from four jars full of water in which earth from the stables of horses, elephants, from an ant-hill, from a confluence, a deep reservoir of water, from a cowpen and from entrance of a palace is cast, and also *pañcagavya*, five jewels, *rocanā*, lotuses, sandalwood, saffron, *uśīra*, *guggulu*; mantras also are to accompany the bath; Indra, Varuṇa, Kubera and other gods are invoked for removing the evil results of eclipses.

If a person suffers from fever the Madanaratna (folio 11) provides for śāntis for the tithis (from the first onwards) on which the fever started, derived from Baudhāyana in which the presiding deity of each tithi is to be offered worship (pūjā) and homa, for each of which the mantra (of which *japa* is to be made) is different, and the incense, flowers, naivedya also are different. There are also śāntis, when a person suffers from fever, about the weekday on which the fever started and images of the presiding deity of the weekday made of different metals according to the name of the day are to be worshipped with different mantras (Madanaratna, folio 12a). For example, if fever started on a Sunday or on a Monday, then the images of Rudra (for Sunday) and Pārvatī (for Monday) were to be made of gold or silver and the mantras to be recited were respectively 'yā te Rudra' (Tai. S. IV. 5. 1. 1), 'gaurīr-mimāya' (Rg. I. 164. 41). The *gandha*, flowers, incense, lamp and *naivedya* were different in each case. If the fever starts on any one of the 27 nakṣatras, the Madanaratna (folios 12b–15b) prescribes śāntis for all the 27 nakṣatras, specifying the deity of each nakṣatra, the figure of the deity, its colour, mantra, the five upacāras from *gandha*, the kinds of fuel-sticks to be employed, the *āhutis*, the gifts &c. If the mantra [1276] be not known, the

---

1275. यस्य राशिं समासाद्य भवेद्ग्रहणसम्भवः। तस्य स्नानं प्रवक्ष्यामि मन्त्रौषधि-समन्वितम्॥ मत्स्य q. by कृत्यकल्प० (on शान्ति folio 21b), हे. (on व्रत, vol. II. p. 1021), नि. सि. p. 69 and शान्तिकमलाकर folio 157 b. अ. सा. pp. 87–90 and नि. सि. p. 69 quote this and about 25 verses more from मत्स्य on this.

1276. The mantras prescribed for religious worship and rites have a certain pattern, that is, they either refer to the rite to be performed and the deity or to the benefit prayed for or there is some word therein that indicates an application of it to the deity. For example, the mantra 'जातवेदसे सुनवाम' (Rg I. 99. 1) is employed for invoking the presence of Durgā, because therein occurs the word 'durgāṇi' (स नः पर्षदति दुर्गाणि विश्वा) or the verse 'Gaurīr-

(Continued on next page)

Gāyatrī mantra (Ṛg. III. 62. 10) was to be employed and the āhutis were to be 1008 or 108 according to the nature of the disease. The Madanratna (folios 15b–20b) quotes from Ātreya further details about the 27 nakṣatras, viz. the number of stars in each nakṣatra, whether a nakṣatra is masculine, feminine or neuter, its figure, colour, deity, tree, its *gaṇa*[1276a] (whether *devagaṇa* or rākṣasagaṇa or manuṣyagaṇa), what actions should be done on each, the Viṣanāḍī of each.

The Dharmasindhu provides a śānti for the extremely rare occurrence of a person coming to life after people thinking him to be dead take his body for cremation to a cemetery. The person in whose house such a person enters meets death. Therefore, a *homa* should be performed wherein eight thousand udumbara fuel-sticks anointed with milk and ghee are to be offered to the accompaniment of the Gāyatrī mantra (Ṛg. III. 62. 10). At the end of the homa a *kapilā* cow and a bronze vessel full of sesame should be donated to a brāhmaṇa; the bronze vessel should weigh 81 *palas* or 40½ or 20¼ or 9, 6 or at least three palas according[1277] to one's means.

Some works prescribe a śānti on the delivery of a cow in the month of Bhādrapada, of a she-buffalo in Pauṣa and of a mare by day. The śānti is to be performed with 108 *āhutis* of ghee and sesame, the Asyavāmīya hymn (Ṛg. I. 164) and the mantra 'tad-Viṣṇoḥ' (Ṛg. I. 22. 20) are to be recited. It was supposed that if a she-buffalo was delivered in Māgha and on a Wednesday, or a mare in Śrāvaṇa by day or a cow while the

---

(*Continued from last page*)

mimāya' (Ṛg. I. 164. 41) is said to be mantra for Pārvatī, the presiding deity of Monday, because the word 'Gaurīr' suggests Gaurī, which is a name of पार्वती. The requirement is stated in the following Brāhmaṇa passage 'एतद्वै यज्ञस्य सयूचं यदूपसयूचं यत्कर्म क्रियमाणमृग्यजुर्वोभिवदति' (quoted in निरुक्त I. 16). It occurs in ऐतरेयब्राह्मण several times (e. g. ऐ. ब्रा. I. 4, which reads merely ऋगभिवदति).

1276a. For the gaṇas of the 27 nakṣatras, vide H. of Dh. vol. II. pp. 514–515.

1277. A pala = 4 karṣas, a karṣa = 16 māṣas and 80 ratis. Hence a pala was equal to 320 raktikās. Vide Manu VIII. 134 and 136 and Yāj. I. 363–365.

Sun is in the Lion sign, that portends death of the[1278] owner in six months. It may be stated that in the author's boyhood such śāntis, particularly in the case of she-buffaloes, were performed. The Adbhutasāgara provides that the śānti should be performed on the 4th, 9th, 12th or 14th tithi, as these are declared to be auspicious tithis for adbhuta-śānti.[1279]

In modern times the entrance into a newly built house is preceded on the same day or on a previous day by a śānti called Vāstuśānti[1280] or Vāstu-śamana (in Matsya 268. 3). It has been described at some length in H. of Dh. vol. II. pp. 834–836. The description[1280a] there is based on Matsya, chapters 256 and 268. Vāstuśamana is also described in the Āśvalāyana gṛhya II. 9. 6–9, Pār. gṛ. III. 4. 5–18, Baud gṛ. III. 5 (which are certainly older than Matsya by several centuries), in Baudhāyana-gṛhyaśeṣa-sūtra I. 18, the Sāmavidhāna-brāhmaṇa III. 3. 5 and several medieval works. The Baud. Gṛ. S. S. calls it Gṛhaśānti and recommends that it be performed every month, every season or every year in the bright fortnight on an auspicious nakṣatra by one who desires prosperity in his house. It is therefore passed over here. The Āśv. gṛ is very brief. It says[1281]: Then

---

1278. गर्ग उवाच। विवा प्रसूता वडवा श्रावणे च विशेषतः। माघमासे बुधे चैव प्रसवेन्महिषी यदि। शान्तिकमलाकर folio 180; भानौ सिंहगते चैव यस्य गौः संप्रसूयते। मरणं तस्य निर्दिष्टं बहुभिर्मासैर्न संशयः॥ तस्य शान्तिं प्रवक्ष्यामि येन सम्पद्यते शुभम्। नारद q. by अ. सा. p. 568.

1279. चतुर्थी चाष्टमी चैव द्वादशी च चतुर्दशी। एता वै तिथयः पुण्याः स्मृता अद्भुतशान्तये। नारद q. by अ. सा. p. 568.

1280. Vāstu (n. in the Ṛgveda) means a house. Compare 'tā vām vāstūnyuśmasi gamadhyai' (Ṛg. I. 154. 6). It is derived from 'vas' (to reside). Vide Nirukta X. 17, where Ṛg. VII. 55. 1 is explained. There is a deity in the Ṛgveda called 'Vāstospati' (lord of the house). वास्तोष्पति is either (as in Ṛg. VIII. 17. 14) Indra or Rudra (as Durga says). The śānti is performed for averting all evil after entering a newly built house.

1280 a. The सङ्कल्प in modern Vāstuśānti would be somewhat like the following: अमुकगोत्रस्यामुकशर्मणो मम सपरिवारस्यास्मिन्वास्तौ चिरकालसुखनिवासपूर्वमखिलरोगविघ्नादिशान्ति-सम्पदारोग्यपुत्रपौत्रधनधान्यादिसमृद्धि-चिरजीवन-स्वनिवाससिद्धिद्वारा श्रीपरमेश्वरप्रीत्यर्थमस्य वास्तोः शुभतासिद्ध्यर्थं सग्रहमखां वास्तुशान्तिं करिष्ये। तदङ्गतया गणेशपूजा-स्वस्तिवाचनमातृकापूजाभ्युदयिकश्राद्धाचार्य-ऋत्विग्वरणानि च करिष्ये।

1281. अथैनच्छमयति। व्रीहियवमतीभिरद्भिर्हिरण्यमवधाय शान्तातीयेन त्रिः प्रदक्षिणं परिव्रजन् मोक्षति। अविच्छिन्नया चोदकधारया आपो हि ष्ठा मयोभुव इति तृचेन। मध्येऽगारस्य स्थालीपाकं श्रपयित्वा वास्तोष्पते प्रतिजानीह्यस्मानिति चतसृभिः मन्थुचं हुत्वाज्यं संस्कृत्य ब्राह्मणान्भोजयित्वा शिवं वास्तु वास्त्विति वाचयीत। आश्व. गृ. II. 9. 6–9. ऋ. VII. 35 (1–15) is called शान्तातीय because the word शं occurs in each of the first thirteen verses several times.

he makes the house śānta (as follows). He deposits gold in water that has rice and barley thrown into it, he sprinkles the house three times going round it with his right side turned towards it with the śantātīya hymn (Ṛg. VII. 35) and he does so again three times pouring out an unbroken stream of water with the three verses 'O waters! you are wholesome' (Ṛg. X. 9. 1–3). In the middle of the house he cooks boiled rice, offers from it four oblations with each of the four verses 'Vāstoṣpate pratijānīhyasmān' (Ṛg. VII. 54. 1–3 and VII. 55. 1), should then prepare food, should feed the brāhmaṇas with it and make them say 'lucky is the house, lucky is the house.' Some details from Baud. Gṛ. (III. 5) may be mentioned here. It provides that oblations are offered from cooked food with the invitatory prayer (Puronuvākyā) 'Vāstoṣpate pratijānīhi' ('O Lord of houses! accept us as your devotees,' (Ṛg. VII. 54. 1, Tai. S. III. 4. 10. 1) and the offering prayer (Yājyā) with 'Vāstoṣpate śagmayā' (O Lord of houses, may we be endowed with fellowship with thee &c.' Ṛg. VII. 54. 3, Tai. S. III. 4. 10. 1). Then he offers *āhutis* of clarified butter with the mantras viz. 'Vāstoṣpate dhruvā sthūṇā' (Ṛg. VIII. 17, 14), 'gṛhyam bhayam yac-ced',[1282] 'akṣispande-aṅgacale,' 'duḥ-svapne pāpasvapne', 'Vāstoṣpate prataraṇo' (O Vāstoṣpati! mayst thou be our saviour', Ṛg. VII. 54. 2), 'amīvahā Vāstoṣpate' (O Vāstoṣpati! Mayst thou be our friend destroying diseases' Ṛg. VII. 55. 1). Then he places the remainder of the food from which offerings were made on bunches of darbhas in front of the Fire with the words 'salutation to Rudra Vāstoṣpati! I offer (oblations to him) who protects when we approach, or run, walk out, depart, turn round or return.' Having brought together in a plate the water for cleansing the cooking vessel, the remainder of the clarified butter and the water (used in the rite) he sprinkles water therefrom on all sides with a twig of udumbara or palāśa or śamī tree or with a handful of darbhas, he goes round the house thrice with his right side towards it with the verse 'tvam viprah' (Ṛg. IX. 18. 2). He prepares food, honours the brāhmaṇas (with food and fees), makes them recite blessings in the words 'lucky is the house, lucky is the house'.

In the later digests the Vāstuśānti is a very elaborate affair which is passed over here for reasons of space.

1282. I was not able to trace the three verses cited in the Baud. Gṛ. III, 5 viz. 'शुभं भयं यच्चेद् द्विपात्सु यदु चेच्चतुष्पात्सु &c.', 'अक्षिस्पन्देऽङ्गचले च यच्चयं यद्वाक्षिते यदु चेदङ्गकेऽ', 'दुःस्वप्ने पापस्वप्ने च यच्चयं &c.'.

Various prognostications were based on the sounds produced by the house lizard (called *pallī*, *pallikā*, *kuḍyamatsya* or *gṛhagodhikā*), by its movements and by its fall on the several limbs of a person by Vasantarāja śākuna, chap. 17 (32 verses), the Adbhutasāgara pp. 666–668 (quoting 28 verses of Vasantarāja), Jyotistattva pp. 706–707, Śāntiratna or Śānti-kamalākara (folio 198), the Dharmasindhu (pp. 347–348). A few words based on the last two are set out here. A fall of the lizard on the right side of a male and on his head (except the chin), chest, navel and stomach is auspicious, while in the case of a woman such a fall would be auspicious on the left side. The same applies to a chameleon. If a lizard or chameleon falls on a limb or creeps up a person's limb the person should take a bath with clothes on and perform a śānti for removal of the inauspiciousness or for increase of auspiciousness. If a person has a mere contact with a house lizard or chameleon he should bathe, drink *pañcagavya*, look into clarified butter, should pay honour to (a golden image of) the lizard or chameleon clothed in a red piece of cloth, offer to the image *gandha* and flowers, worship Rudra in a jar full of water, offer into fire 108 fuel sticks of *khadira* tree to the accompaniment of the Mṛtyuñjaya[1282a] mantra and offer 1008 or 108 *āhutis* of sesame into fire with the *vyāhṛtis* and perform the rites from *sviṣṭakṛt* to sprinkling with drops of water and then donate gold, clothes and sesame.[1282b]

The Yogayātrā chap. 7 (verses 1–12) and Hemādri on Vrata (vol. II. pp. 894–897) mention ceremonial baths on and worship of nakṣatras from Aśvinī to Revatī and their presiding deities as yielding various benefits. The Ātharvaṇa-pariśiṣṭa I (called nakṣatrakalpa) sections 37–50 deal with *nakṣatrasnāna* from Kṛttikā to Bharaṇī. Sections 37–41 contain the mantras employed in worshipping and placating the presiding deities of the nakṣatras beginning with Kṛttikā. Section 42 describes the general procedure of nakṣatrasnāna; sections 43–45 set out

---

1282a. Mṛtyuñjaya mantra is the Tryambaka mantra, according to Vidyākara quoted in Jyotistattva (p. 707). The Tryambaka mantra is 'Tryambakaṁ yajāmahe' (Ṛg. VII. 59. 12, Tai. S. I. 8. 6. 2, Vāj. S. III, 60).

1282b. It is somewhat remarkable that Vasantarāja is entirely silent about the fall of the house lizard on a person's body and devotes thirty-two verses merely to the interpretation of the sounds of the lizard in different directions and at different times of the day and to the prognostications derived from its movements on the walls. It is not unlikely that prognostication from the fall of the lizard on a man's limb was a later development.

the substances to be added to the water for each nakṣatrasnāna and the benefit to be derived from so doing. Sections 47–50 contain special rules in relation to each nakṣatra from Kṛttikā to Bharaṇī, about the distribution of food to brāhmaṇas and gifts to be made on each nakṣatra together with the rewards to be expected therefrom. But the Bṛhatsaṁhitā chap. 47 (1–87), the Ātharvaṇa-pariśiṣṭa V pp. 66–68, Viṣṇudharmottara II. 103, Yogayātrā (VII. 13–21), the Kālikāpurāṇa chap. 89, and Hemādri (on Vrata vol. II. pp. 600–628) speak of a śānti called Puṣyasnāna or Puṣyābhiṣeka. It is said that Bṛhaspati performed this śānti for Indra, then Vṛddha-Garga got it and he imparted it to Bhāguri. Most of the above works confine it to the king, since the king is the very root of the tree—the subjects—and since any harm to or welfare of that root (the king) results in misfortune or welfare of the people; therefore care must be taken for the increase of the king's welfare.[1283] As the treatment in the Bṛhatsaṁhitā is the fullest and is among the most ancient descriptions, it is briefly set out here. The royal astrologer and family priest should perform the rite of Puṣyasnāna for the king, than which there is nothing more holy and nothing more destructive of all evil portents. This may be performed on puṣya-nakṣatra every time, but the Śānti on this day when the Full Moon is in Puṣya-nakṣatra is the highest and if such a *snāna* is performed without there being Puṣya nakṣatra on that day, then it yields only half the fruit. There is no utpāta which is not averted or mitigated by this śānti and there is no other auspicious rite which surpasses this. About Puṣya the Ratnamālā[1284] states 'Just as the lion is the strongest among

1283. मूलं मञ्जजाधिपतिः मजातरोस्तदुपघातसंस्कारात्। अशुभं शुभं च लोके भवति यतोऽतो नृपतिचिन्ता॥ या व्याकृपाता शान्तिः स्वयम्भुवा शुक्रगुरोमेदेन्द्रार्थे। तां माह्य बृहद्गर्गः प्राह यथा भागुरेः शृणुत॥ पुष्यस्नानं नृपतेः कर्तव्यं देवचित्पुरोधान्याम्। नातः परं पवित्रं सर्वोत्पातान्तकरमस्ति॥ ...एतत्प्रयुज्यमानं पतिपुष्यं शुक्रयशोवीर्यबुद्धिकरम्। पुष्याह्निनार्वफलदा पौर्णी शान्तिः परा मोक्षा॥ नास्ति लोके स उत्पातो यो ह्यनेन न शाम्यति। मङ्गलं चापरं नास्ति यदस्मादतिरिच्यते॥ बृहत्सं. 47. 1–3 and 82, 84; vide विष्णुधर्मोत्तर II. 103. 31–32 for the story about Indra and Bṛhaspati. मत्स्य says 'मजातरोर्मूलमिहाननीतस्तद्रक्षणाद्राज्ञमुपैति वृद्धिम्। (219. 34) q. by कल्पतरु (on राजधर्मकाण्ड).

1284. सिंहो यथा सर्वचतुष्पदानां तथैव पुष्यो बलवाद्ग्रहाणाम्। चन्द्रे विबद्धेऽपि च गोचरे वा सिध्यन्ति कार्याणि कृतानि पुष्ये॥ रत्नमाला VI. 70. According to बृहत्संहिता 103. 2 if the moon is in the 1st, 3rd, 6th, 7th, 10th or 11th rāśi from the rāśi of birth it is auspicious and it is inauspicious in the other rāśis from birth. 'सूर्यः पद्मत्रिदशपतिविदशपद्मसायकगन्धवन्धुनाः ...सर्वेऽप्युपान्ते शुभाः &c.' Vide note 876a and p. 589 above for गोचरचन्द्र and other ग्रह and बृहत्सं. 103. 8–10 for the *phalas* of the moon being in the rāśi of birth or in the rāśis from the 1st to the 12th.

all quadrupeds, so is Puṣya the most powerful among nakṣatras; undertakings begun on Puṣya succeed even if the Moon be unfavourable or be *gocara*. Then Varāhamihira states in very poetic verses (47. 4–15) that the Puṣyasnāna of the king should be performed in a sylvan spot abounding in young and beautiful trees emitting fragrance and free from trees having thorns or trees like marking nut or from owls, vultures and the like or on rivers or on lakes or near lotus pools or near a cow-house or seashore or hermitages of sages, grand mansions resounding with the sweet cries of cuckoos and the like or near a holy shrine or tīrtha or a spot beautified by parks. Then the astrologer, the councillors and officiating priests should go out from the capital at night and make an offering (*bali*) in the East, North or North-east and the royal family priest, being himself pure and bowing down, should invoke with fried grains, akṣata, barley, curds and flowers and with a mantra[1285] the gods, the (guardians of) quarters, the *nāgas* and brāhmaṇas to be present at the spot and then say 'tomorrow you will receive worship and depart after conferring welfare on the king'. The family priest and the others should stay in order to find the auspicious nature or otherwise of the dreams (of the king). On the next day in the morning they should collect materials (for the Puṣyasnāna) on the spot chosen the previous day. He should draw a maṇḍala (a diagram) there and should place thereon various jewels and should assign places to nāgas, yakṣas, gods, pitṛs, gandharvas, apsarases, sages, siddhas, planets, nakṣatras, Rudras, the mātṛs, Skanda, Viṣṇu, Viśākha, Lokapālas, goddesses (such as Lakṣmī, Gaurī, Indrāṇī), which should all be drawn with charming coloured powders or chalk &c, should offer them worship with sandal wood paste, flowers &c., with various edibles, fruits and meat, with drinks viz. wine, milk and decoctions; he should follow the procedure of Grahayajña and worship the various deities invited with appropriate foods, incense, clarified butter, flowers, with lauds and salutations &c. (verses 30–33). Then he should set up Agni on an altar to the west or south of the maṇḍala drawn by him, should kindle it into flames and bring near it the materials and darbhas. He should offer worship on the altar to the west with fried grams, ghee, curds, honey, white mustard, fragrant substances, flowers, incense, fruits, and should donate plates full of *pāyasa* and ghee. Then in the four inter-

1285. The mantra for invoking the gods is आगच्छन्तु सुराः सर्वे येऽत्र पूजाभिलाषिणः। दिशो नागा द्विजाश्चैव ये चान्यत्रेऽशभागिनः॥ बृहत्सं. 47. 20.

mediate quarters of the altar he should establish four jars the necks of which are surrounded with white thread and that are covered with leaves, twigs and fruits of trees having milky sap and filled with water mixed with herbs and materials for puṣya-snāna and jewels. In verses 39-42 Varāhamihira names about 15 plants the leaves[1286] of which are to be cast in the jars and also seeds and *sarvauṣadhis*, sarvagandhas, bilva fruit &c. He should spread an old bull's hide with its neck to the east on the altar and thereon he should spread the reddish hide of a bull trained for fighting, the hides of a lion and a tiger one over the other, when the Moon is in Puṣya-nakṣatra and there is an auspicious *muhūrta* Over the hides a throne made of gold, silver, copper or of a tree with a milky sap should be placed. The king should occupy the throne after placing thereon a piece of gold, surrounded by his ministers, men of his confidence, the family priest, the astrologer, the citizens that have auspicious names (such or Jayarāja, Simharāja &c.).

There should be loud noises (for drowning inauspicious sounds) made by the bards and citizens and of the tabors and drums and of Vedic recitations. The king should wear linen and the *purohita* should cover the king with a blanket, drops should be sprinkled over the king from jars, 3, 28 or 108 in number, containing clarified butter, with two mantras[1287] praising its power to remove evil and then the priest removes the blanket and sprinkles on the king drops of water from water containing the substances collected for puṣyasnāna with sixteen mantras[1288]

1286. Several of the 15 plants mentioned in the Bṛ. S. occur also in आथर्वणपरिशिष्ट V. 1-5. 2. 2. In the मत्स्यपुराण eight plants are mentioned as महौषध्यष्टक (viz. सहदेवी, वचा, श्यामा, बला, अतिबला, शङ्खपुष्पी, सिंही, सुवर्चला) that are to be employed in general for the *snapana* of all gods (chap. 267.14-15).

1287. आज्यं तेजः सहोद्दिष्टमाज्यं पापहरं वरम् । आज्यं सुराणामाहार आज्ये लोकाः प्रतिष्ठिताः ॥ भौमान्तरिक्षं दिव्यं वा यत्ते कल्मषमागतम् । सर्वं तदाज्यसंस्पर्शात् प्रणाशमुपगच्छतु ॥ बृहत्सं. 47. 52-53. These are quoted by हेमाद्रि (on व्रत vol. II. p. 615), but it is not clear from what work.

1288. It may be noted that Hemādri (on व्रत vol. II. p. 615) has the mantras of बृहत्सं. 47. 55-60 in the same order and (p. 616) has also the mantras (verses 67-70 first-half). Varāha first gives a long list (55-70) of Paurāṇika mantras and then (in verse 71) only mentions names of groups of mantras. इत्येतैरन्यैश्चाथर्वकल्पाहितैः सकृद्गणैः । कौष्माण्डमहारौद्रिणकुबेरहृषैः सहृद्वचा च ॥ बृहत्सं. 47.71. The मत्स्यपुराण has verses (93. 51-56) similar to those of वराह's पौराणिक mantras.

(set out by Varāha in verses 55–70) in which gods, goddesses, sages are invited to join in the rite, besides mantras from the Atharvakalpa,[1289] the Rudragaṇa mantras, Kūṣmāṇḍa mantras, the Mahārauhiṇa, Kubera-hṛdaya and *Samṛddhi* verse. Then the king should take a bath and wear two cotton garments over which the three verses 'Āpo hi ṣṭhā' (Ṛg. X 9. 1–3, Tai. S. IV. 1. 5. 1) and the four verses 'Hiraṇyavarṇāḥ' (Tai. S. V. 6. 1. 1–2, or Atharva I. 33. 1–4) have been inaudibly recited. He should sip water to the accompaniment of words like 'this is a lucky day' and to the sound of conches, should worship gods, gurus, brāhmaṇas, his parasol, banner, and weapons and then worship his special (or favourite) deity. Then he should put on new decorations that lead to victory, that confer long life and vigour and over which the Rāyaspoṣa[1290] (bestowing increase of wealth) ṛk verses have been recited. To the south of the maṇḍala an altar should be prepared and hides of bull, cat, *ruru* deer, spotted antelope, lion and tiger should be arranged one over the other (tiger's being last) and the king should sit down on the hides. The purohita should offer in the fire in the principal place (to the south) offerings of fuel-sticks, sesame, ghee and the like to the accompaniment of ṛk verses addressed to Rudra, Indra, Bṛhaspati, Viṣṇu and Vāyu. The astrologer should observe and

---

1289. The Atharvaṇa-pariśiṣṭa V. 3. 4–5 prescribes (p. 67) the opening passage of each Veda, the mahāvyāhṛtis (bhūḥ, bhuvaḥ, svaḥ) and five gaṇas as accompanying the offerings into fire, viz. 'शर्मवर्मागणश्चैव तथा स्याद्-पराजितः। आयुष्यश्चाभयश्चैव तथा स्वस्त्ययनो गणः॥ एतान् पञ्च गणान् हुत्वा वाचयेत द्विजोत्तमान्।'. For शर्मवर्मागण vide आथर्वणपरि. XXXII 14 p. 196 containing 22 verses, the first of which is शर्मवर्मा, that is अथर्व. 14. 2. 21. The अपराजितगण contains 15 verses beginning with 'aparājito' (vide आथर्वणपरिशिष्ट 32. 13); the आयुष्यगण has 14 verses of the अथर्ववेद (in आ. परि. XXXII 9. p. 195); for two अभयगणs, vide आ. परि. XXXII. 12 and 29; for स्वस्त्ययनगण vide आ. परि. XXXII. 11. रुद्रगण is आ. परि. XXXII. 16 or it may be Rudras in Tai. S. IV. 5. 1–11. The कूष्माण्ड mantras are Vāj. S. 20 14–16 and Tai. Ā. II. 3. 1, II. 4. 1 (beginning with 'yad-devā devaheḍanam'). Vide H. of Dh. vol. IV. p. 43 for Kuṣmāṇḍahoma. For Rauhiṇa-sāman vide H. of Dh. IV. p. 46 n. The Kubera-hṛdaya is probably the mantra in Tai. Ā. I. 31. 6 (Rājādhirājāya...mahārājāya namaḥ). It is not known which ṛk is called Samṛddhi.

1290. There are many verses of the Ṛgveda cited in the Taittirīya-saṁhitā which contain the word 'rāyaspoṣa', but as Utpala in his commentary says that the verses are six, it is probable that the verses meant are (Ṛg. X. 17. 9–14), the first of which ends with the words 'rāyaspoṣaṁ yajamāneṣu dhehi'.

declare the prognostications derived[1290a] from the flames of the sacred Agni as laid down in the chapter on the festival of Indra's banner (Bṛ. S. 42. 31–36). Then the purohita with folded hands should pray[1291] 'May all the groups of gods receive the worship from the king and depart after conferring (on him) abundant prosperity and returning (when again invoked)'. Then the king should honour the astrologer and the purohita with plenty of wealth and (honour) according to their deserts also others, viz. men learned in the Veda and the like who are well worthy of receiving gifts. Then the king should assure safety to all subjects, (order the) release of all animals taken to slaughter houses and release all persons put in jail except those guilty of offences against the king's person or his harem. Varāhamihira adds (47. 85) that this procedure of Puṣyasnāna is commended for a king who aspires after imperial dignity or who ardently desires a son or when he is first crowned king. He further states that this very procedure of ceremonial bath should be employed in the case of the king's elephants and horses that then become free from diseases (verse 87).

A few remarks from other works may be added here. The Yoga-yātrā (chap. VII. 13–14) lays down[1292] that in the ceremonial bath clay should be collected from a mountain top, ant-hill, a river mouth, the two banks of a river, the foot of the Indra figure (in the Indradhvaja festival), (clay) dug up by the tusk of an elephant and by a bull's horn, (clay) from the royal palace-door and from the door of the house of a dancing girl (patronized by the king) and the king's head should be purified by rubbing on it the clay from a mountain top, his ears with

---

1290 a. One verse from chap. 42 about the auspicious indications conveyed by Agni flaming up by itself (i. e. without being fanned etc.) at the end of the shout 'svāhā' (when pūrṇāhuti is offerred) and having its flames turned towards the right is cited here : स्वाहावसानसमये स्वयमुज्ज्वलार्चिः स्निग्धः प्रदक्षिणशिखो हुतभुक् नृपस्य। गङ्गादिवाकरसुताजलचारुहारां धात्रीं सहुद्भरसनां वसनां करोति॥ बृहत्सं. 42. 32; compare तस्मै सम्यग्हुतो वह्निर्वाजिनीराजनाविधौ। प्रदक्षिणार्चिर्व्याजेन हस्तेनेव जयं ददौ॥ रघुवंश IV.25. In the योगयात्रा (chapter 8) fifteen verses are devoted to अग्निनिमित्त of which verses 11–15 are the same as बृहत्सं. 42.32–36.

1291. The prayer is well-known : यान्तु देवगणाः सर्वे पूजामादाय पार्थिवात्। सिद्धिं दत्त्वा तु विपुलां पुनरागमनाय च॥ बृहत्सं. 47. 79.

1292. गिरिवल्मीकनदीमुखकूलह्रदपद्मकरिपादमृद्भिरतः। द्विपवृषभविषाणपार्थिवगणिका-द्वारादृताभिश्च॥ गिरिशिखरमृदा मूर्धानं वल्मीकमृदा च शौचयेत्कर्णौ। नद्युभयकूलसङ्गमभृद्भिः प्रक्षालयेत्पार्श्वे॥ इन्द्रस्थानाद् ग्रीवा बाहू करिवृषभयोर्विषाणाग्रात्। हृदयं च नृपद्वारात्कटिमपि देवयागृहद्वारात्॥ योगयात्रा VII. 13–15.

clay from an ant-hill, his sides with clay from the two banks of a river and from its confluence with the sea, his neck with clay from the foot of the Indra figure, his arms with earth on the tip of the elephant's tusk and the bull's horns, his chest with earth from the door of the palace and his waist with clay from a royal courtezan's door. It will be noticed that there is a suggestive symbolism in all this. The king is to hold his head high and to attain eminence; therefore his head is to be rubbed with clay from a mountain peak.

It appears that nakṣatrasnāna was meant for all. For example, the Atharvaṇa-pariśiṣṭa[1293] on nakṣatrakalpa (sec. 43 p. 22) states that a Vaiśya should undergo ceremonial bath on Rohiṇī, being decked with all seeds, while verse 6 of the same section maintains that a brāhmaṇa who undergoes Puṣyasnāna thrice with a thousand grains of red paddy and with a thousand mustard grains and with (twigs and leaves) of Sahasravīryā, Anantī plants and with Madayantī and Priyaṅgu plants acquires as much fame as a king.

From the Matsya-purāṇa it is clear[1294] that Puṣyasnāna was an item in Lakṣahoma, undertaken by the king to counteract the evil effects of planets. That Purāṇa has a chapter (267. verses 3-4) on Devatāsnāna[1295] where also provision is made for casting clay into the jar, clay being collected from the tusk of an elephant, from a horse (stable), public road, ant-hill, (clay) dug up by a boar (with its tusk), from the shed where sacred fire is kept, from a tīrtha (holy spot), cowpen and from the place where cows crowd.

The Viṣṇudharmottara (II. 103. 1-10) provides that Bārhaspatyasnāna (i. e. Puṣyasnāna, Bṛhaspati being the presiding deity of Puṣya) should be performed in the bright half, in the

1293. रोहिण्यां स्नापयेद्वैश्यं सर्वबीजैरलङ्कृतम् । ...रक्तशान्तिसहस्रेण तावद्भिर्मीरसर्षपैः । सहस्रवीर्यानन्त्या च मदयन्ती-प्रियङ्गुभिः । त्रीन् पुण्यान् ब्राह्मणः स्नातः पार्थिवं लभते यशः ॥ आ. परि. (नक्षत्रकल्प, sec 42 verses 3 and 6, p. 22).

1294. हुत्वा शतसहस्रं तु पुष्यस्नानं समाचरेत् । कुम्भैः षोडशसंख्यैश्च सहिरण्यैः सुमङ्गलैः ॥ स्नापयेद्यजमानं तु ततः शान्तिर्भविष्यति । एवं कृते तु यत्किंचिद् ग्रहपीडासमुद्भवम् ॥ तत्सर्वं नाशमायाति दृष्ट्वा वै दक्षिणां नृप ॥ मत्स्य 239. 12-14 cf. by कृत्यकल्प० (on शान्तिक) folio 12a.

1295. गजाश्वरथवल्मीकवराहोत्खातमण्डलात् । अग्न्यगारात्तथा तीर्थाद् व्रजाद्गोमण्डलादपि । कुम्भे तु मृत्तिकां दद्याद् उद्धृतासीति मन्त्रवित् । मत्स्य 267. 3-4. The मन्त्र is : उद्धृतासि वराहेण कृष्णेन शतबाहुना । भूमिर्धेनुर्धरणी लोकधारिणी ॥. It occurs in तैत्तिरीयारण्यक X. 1. 8.

northern passage of the sun, on an auspicious day, nakṣatra and muhūrta or when the moon is in Puṣya or Rohiṇī nakṣatra or in Hasta or Śravaṇa; two square maṇḍalas of eight cubits on each of four sides should be made, one for offering *bali* and the other for an altar on which a fire is to be established, both being decked with various things. Four jars with waters of springs should be placed in each of the two maṇḍalas, and also seven jars filled with seeds, corn and precious stones, one for being decked with leaves of trees and the other with flowers and fruits. It appears (verses 12–13) that the Viṣṇudharmottara contemplates Puṣyasnāna for the three higher varṇas,[1296] since it provides that a brāhmaṇa should sit on the hide of a bull as his seat, a kṣatriya may employ the hides of a lion and tiger and a vaiśya on the hides of a tiger and leopard. It provides mantras other than those mentioned by Varāhamihira. It provides that this rite of Puṣyasnāna should go on for seven days and that the person undergoing it should give up during those days wine, meat, honey and sexual intercourse (verse 29). This Puṣyasnāna drives away all ill-luck, destroys evil spirits, brightens the intellect, confers health, brilliance and fame, kills enemies, is auspicious, destroys sins and the evil effects of strife and bad dreams (verses 30–31).

It should be borne in mind that a rite on Puṣya for prosperity called Puṣya-vrata is mentioned by so early a work as the Āpastambadharma-sūtra (for which p. 346 above may be referred to).

In Bṛhadyogayātrā (chap. XIII. 1–10), Matsyapurāṇa (chap. 241. 1–14) and in Vasantarāja (chap. VI. 4. 1–14 pp. 87–92) a good deal is said about prognostications derived from the throbbing (*spandana* or *sphuraṇa*) of the several parts of a man's body. All the three often closely agree in words and ideas as the notes below will clearly show. There is hardly any doubt that Vasantarāja's treatment is based on the other two works. It is difficult to decide whether Varāhamihira borrows from the Matsya or *vice versa* or whether both borrow from a common source. It is not unlikely that Varāhamihira might

1296. विप्रस्य स्नातुकामस्य सौरमार्षभकं शुभम्। क्षत्रियस्य तथा सैंहं वैयाघ्रं च तथा विशः॥ द्वीपिचर्मं च वैश्यस्य स्नाप्यस्तत्रोपवेशयत्। प्रशस्तलक्षणां भार्यां वामभागे तथैव च॥ विष्णुधर्मोत्तर II. 103. 12–13. I am not sure what सौर means here; probably it means (dedicated to the Sun or to gods).

have followed the Matsya. They all agree that throbbing[1297] of the right side of the body is auspicious and of the left inauspicious in the case of males, while the reverse is true in the case of women. They all set out the consequences indicated by the throbbing of the several parts and limbs of the body from the top of the head to the soles of the feet. To set out all these in detail would occupy much space. A few are mentioned by way of illustration. The fruit indicated by the throbbing of the top of the[1298] head is the acquisition of land (or earth); of the forehead, the prosperity of the position already occupied; of the region between the eyebrows and nose, union with persons dear to one; of the region of the eye, death; of the portion near the eye the acquisition ot wealth; of the upper arm, union with friends; of the hand, the acquisition of wealth; of the back, defeat; of the chest, success; of the upper part of the foot, the securing of a position; of the soles, journey with gain therein. The Matsya-purāṇa[1299] prescribes that when inauspicious indications (by throbbing) occur, brāhmaṇas should be placated with the gift of gold.

From ancient times the throbbing of the limbs, particularly of the arm and eye, have been regarded in India as the harbingers of coming events, auspicious or inauspicious. Manu prohibits a *sannyāsin* (*parivrājake*) from obtaining alms by means of declaring prognostications from utpātas or nimittas, from nakṣatras and from Aṅgavidyā etc. In the Śākuntala

1299. अनिष्टचिह्नोपगमे द्विजानां कार्यं सुवर्णेन तु तर्पणं स्यात्। मत्स्य 241. 14.

Kālidāsa twice mentions the throbbing of the arm of the hero as indicative of good fortune and the throbbing of the right eye of Śakuntalā as presaging[1300] misfortune. Shakespeare in "Othello" makes Desdemona speak about the itching of her eyes as a bad omen. The Bṛhad-yogayātrā (XIII. 10), Bṛ. S. (51.10) and Vasantarāja declare that the throbbing of moles, boils, marks, eruptions (on limbs) are to be deemed to indicate consequences similar to the limbs on which they exist.[1301]

The Bṛhatsaṃhitā (chap 93 verses 1–14), Bṛhadyogayātrā (chap. 21 verses[1302] 1–21) and Yogayātrā (chap. 10 verses 1–75) dwell at length on the prognostications to be drawn from the arrangement of the tusks of elephants, from the marks seen when the tusks are cut, from the tired appearance and movements of elephants, particularly when the king is to march on an invasion, since as the Yogayātrā says the king's victory depends on elephants.[1303] These, however, do not describe any śānti and are hence passed over here as not relevant to the subject of śāntis. But the Agnipurāṇa (chap. 291 verses 1–24), Viṣṇudharmottara (II. 50. 1–93), Baud. gṛhyaśeṣasūtra I. 20 and Hemādri (on Vrata, vol. II. pp. 1036–1051) prescribe śāntis for removing diseases of elephants and therefore a brief note is added here from Baud. gṛhyaśesa-sūtra, which is probably the earliest and simplest description of a Gajaśānti.

"On the 8th or 11th or 14th tithi of the bright half of a month or on Śravaṇa nakṣatra, the owner should feed brāhmaṇas,

1300. Vide मनु VI. 50 न चोत्पातनिमित्ताभ्यां न नक्षत्राङ्गविद्यया। नाङ्गुप्रासनवादाभ्यां भिक्षां लिप्सेत कर्हिचित्॥. The commentators give different explanations of अङ्गविद्या. Probably it means सामुद्रिक or lore about the indications from the throbbing of the several limbs. A work Called Aṅgavijjā edited by Muni Puṇyavijayaji is published by the Prakrit Text Society at Banaras. It speaks of eight kinds of निमित्त viz. अङ्ग, स्वप्न, लक्षण, व्यञ्जन, स्वर, छिन्न, भौम and आन्तरिक्ष. For कालिदास, vide शान्तमिदमाश्रमपदं स्फुरति च बाहुः कुतः फलमिहास्य। शाकुन्तल I. 11; मनोरथाय नाशंसे किं बाहो स्पन्दसे वृथा। शाकुन्तल VII. 13; शाकुन्तल।—अहो किं मे वामेतरच्चक्षुः विस्फुरति। शाकुन्तल Act V after verse 11.

1301. इति पिटकविभागः प्रोक्त आ मूर्धतोयं व्रणतिलकविभागोप्येवमेव प्रकल्प्यः। भवति मशकलक्षमावर्तजन्मापि तद्वज्जिगदितफलकारि प्राणिनां देहसंस्थम्। बृहत्सं. 51. 10; मशकं तिलकं पिटकं वापि व्रणमथ चिह्नं किमपि कदापि। स्फुरति पदान्यधितिष्ठति यावत्त्वात् पूर्वोक्तं फलमपि तावत्॥ वसन्तराज VI. 4. 11, p. 91.

1302. Verses 8–13 of the Bṛ. S. 93 are the same as the verses of Bṛhadyogayātrā 21. 9–14.

1303. आरिताधिविधुर्नराधिपं वारणाभितनिदं शुभाशुभम्। ज्ञेयमादरवतो विपश्चिता वारणेषु नृपतेर्जयः स्थितः॥ योगयात्रा X. 1.

make them declare 'it is an auspicious day, let there be welfare, let there be prosperity,' should first (or 'towards the east') take out for offering *havis* sesame and rice grains, bring water after repeating the Gāyatrī verse (Ṛg. III. 62. 10), should cover two jars with a new piece of cloth with the Gāyatrī, should close the mouths of the jars with some fruit (a cocoanut or the like) and keep the boiled food towards the west and place (the two jars) on a bunch of five dūrvās. Then after the elephant stable is decked with wreaths of darbhas the elephant inhales the smell of the food offered in fire. He then makes ready a spoon of Aśvattha wood and fuel and darbha grass. Then he goes through the items of ordinary *homa* [1304] from drawing lines onwards and offers oblations of the boiled food with ghee to the accompaniment of the Ghṛtasūkta [1305] (Ṛg. VIII. 81. 1–9). Then (the priest) offers 1008 additional *āhutis* with clarified butter with the five mantras beginning with 'namas-te Rudra manyave' (O Rudra! adoration to you that are fury incarnate' Tai. S. IV. 5. 1. 1–5). Then the procedure from Sviṣṭakṛt offering to the gift of the cow (should be gone through). He puts down on bunches of *dūrvā* grass the remaining portion of the food from which offerings were made in front of the sacred Agni with the words 'svāhā to the *bhūtas*' (spirits). Then he (priest) makes (the elephant) eat what remains of the food cooked in the *sthālī* (pan or cooking vessel) and the bunch of five dūrvās (on which the jars had been placed) to the accompaniment of the Āyuṣya-sūkta; [1306] he sprinkles drops from the praṇītā [1307] water with the

---

1304. Vide H. of Dh. vol. II. pp. 207–211 for the description of a model *homa*.

1305. It may be noted that the first verse of the Ghṛtasūkta is 'आ घृ ण इन्द्र बृहन्तं चित्रं यामं सं गृभाय। महाहस्ती दक्षिणेन॥'. Here the word महाहस्ती means 'great elephant' and also 'having long or big arms' (as applied to Indra) and therefore is employed in the Gajaśānti, following the principle mentioned in note 1276 above. Vide n. 1218 above about घृतसूक्त.

1306. The आयुष्यसूक्त is the खिलसूक्त 'आयुष्यं वर्चस्यं' occurring after Ṛg. X. 128. The आथर्वणपरिशिष्ट 32. 9 p. 195 declares what the आयुष्यगण contains (from Atharvaveda). The कौशिकसूत्र 52. 18 says that Atharva I. 30. 1–4 are आयुष्याणि (conferring long life). Vide तात्पर्यदर्शन on आप. गृ. V. 12. 9 which regards the (first) eight verses of the खिलसूक्त 'आयुष्यं वर्चस्यं' as constituting आयुष्यसूक्त. The com. of Nārāyaṇa on आश्व. गृ. III. 8. 16 (आयुष्यमिति सूक्तेन मणिं कण्ठे प्रतिमुच्य &c.) says that आयुष्यसूक्त here is the खिलसूक्त (of three verses) beginning with नेजमेष after Ṛg. X. 184.

1307. मणीता is water kept in a vessel to the north of the fire after repeating a mantra over it.

three verses beginning with 'āpo hi ṣṭhā' (Rg. X. 9. 1–3, Tai. S. IV. 1. 3. 1–3) and the four verses beginning with 'Hiraṇyavarṇāḥ' (Tai. S. V. 6. 1. 1–4), purifies (the elephant with water) to the accompaniment of the anuvāka beginning with 'pavamānaḥ suvarjanaḥ' (Tai. Br. I. 4. 8. 1); he then leads the elephant to its place (stable); the elephant becomes long-lived; so says the adorable Baudhāyana."

The Gajaśānti in Agnipurāṇa (chap. 291) is entirely different from the above. One should worship on the 5th tithi of the bright half Viṣṇu, Lakṣmī, the Airāvata[1308] elephant and the other elephants (in all eight) and Brahmā, Śaṅkara, Indra, Kubera, Yama, the Sun and the Moon, Varuṇa, Vāyu, Agni, the Earth and Ākāśa. The elephants should be sprinkled with *śāntyudaka* (propitiatory water). The Agnipurāṇa proposes an elaborate worship, on a lotus-shaped diagram drawn on an altar, of several gods, several weapons, sages, rivers and mountains &c., elephants &c. and provides that an astrologer should ride the principal elephant of the king and say into its ear 'you are made the chief of elephants, the king will honour you with *gandha*, flowers, best food and people at the order of the king will honour you; you should protect the king in battle, in his journey and in his palace. You should forget that you are a mere beast and revolve in your mind that you are divine!' &c. The king should then ride such an elephant and armed warriors should follow and various gifts should be made to the elephant keeper, the astrologer, the ācārya &c.

The Viṣṇudharmottara (II. 50. 1–93) is far more elaborate than even the Agnipurāṇa. Its verses about the words to be muttered in the ear of the elephant (II. 50. 59–64) are the same as those in the Agni (291, 15–20). The Viṣṇudharmottara adds (II. 50. 68–70) that this śānti should not be performed on the 4th, 9th or 14th tithi nor on Tuesday nor on Saturday and the commended nakṣatras are Jyeṣṭhā, Citrā and Śravaṇa and that this *śānti* rite for elephants destroys all danger to elephants.

Hemādri (on Vrata vol. II. pp. 1036–1051) contains a long Gajaśānti said to have been declared by Pālakāpya. Many of

1308. According to the Amarakośa, the eight elephants of the quarters are Airāvata, Puṇḍarīka, Vāmana, Kumuda, Añjana, Puṣpadanta, Sārvabhauma and Supratīka. Vide Udyogaparva 103. 9–16 and Droṇaparva 121. 25–26 for the numerous progeny of these semi-divine elephants. The Viṣṇudharmottara (II. 50. 10–11) names eight *diggajas*, but drops Sārvabhauma from the Amarakośa list and substitutes Nīla.

those verses occur in the Hastyāyurveda (Ānandāśrama ed.) chapters 35 and 36. Considerations of space and of importance prevent any description of that śānti derived from the Hastyāyurveda.

The Bṛhatsaṁhitā (chap. 92. 1-14), the Bṛhadyogayātra (22. 1-21) and the Yogayātrā (XI. 1-14) deal with the movements, neighing, prancing, striking the ground with hoofs, postures of horses from which lucky or unlucky consequences are to be inferred. But they do not describe any śānti and therefore are passed over. The Agnipurāṇa (chap. 290, 1-8), the Viṣṇudharmottara (II. 47. 1-42), Baud. gṛhyśeṣasūtra I. 19 and Hemādri (on vrata, vol. II. pp. 1031-36 taken from Śālihotra) describe a śānti which averts all dangers to horses and removes their diseases.

The śānti from Baudhāyana is as follows:— "having carried out the usual details of an ordinary *homa* from drawing the lines onwards (the priest) offers into Agni oblations from the cooked food after reciting the puronuvākyā (invitatory prayer) 'tadaśvināśvayujopayātām' (May the Aśvins that yoke horses come near, Tai. Br. III. 1. 2. 10) and the yājyā (offering prayer) 'yau devānām bhiṣajau' ('that are physicians of the gods', Tai. Br. III. 1. 2. 11). Then he makes additional offerings with clarified butter '*svāhā* to Aśvins, *svāhā* to the two that yoke horses, *svāhā* to the ear, svāhā to hearing' (Tai. Br. III. 1. 6. 13). Then he performs all details from sviṣṭakṛt offering to the gift of a cow. Then he puts down on Aśvattha leaves in front of Agni the food remaining after the offering of cooked food with the mantra 'yo aśvatthaḥ ... ketubhiḥ saha' (Tai. Br. I. 2. 1. 8-9). He brings together in a plate the water with which the sthālī is washed, the remainder of the clarified butter and of the water, sprinkles drops from it with an Aśvattha twig and goes round the horses thrice with his right towards the horses with the anuvāka beginning with 'yo vā aśvasya medhyasya lomāni veda' (he who knows the hair of the holy horse). So said the adorable Baudhāyana."

Śāntis are connected with *śakunas* also. The word śakuna means 'a bird' in the Ṛgveda (IV. 26. 6, IX. 86. 13, IX. 96. 19 and 23, IX. 107. 20, IX. 112. 2, X. 68. 7, X. 123. 6, X. 165. 2) and is a synonym of *Śakuni* (Ṛg. II. 42. 1, II. 43. 2 and 3) and *śakunti* (Ṛg. II. 42. 3, II. 43. 1). In Ṛg. X. 16. 6 (yat te kṛṣṇaḥ śakuna ātutoda) the crow is referred to as 'the dark bird'. It has been seen above that birds like *kapota* were regarded even

in the Ṛgveda as harbingers of impending evil and misfortune. Hence the word śakuna gradually came to mean premonition of evil conveyed by cries, movements, positions of birds and then any prognosticatory sign (not necessarily connected with birds). There is an extensive literature on śakunas. Some of it is mentioned here, viz. the Matsyapurāṇa (chap. 237, 241, 243), Agnipurāṇa (chap. 230–232), Viṣṇudharmottarapurāṇa II. 163–164, Padmapurāṇa (IV. 100. 65–126), Bṛhat-saṁhitā (chap. 85–95), Bṛhad-yogayātrā (chap. 23–27), Yogayātrā (chap. 14), the Nimitta of Bhadrabāhu (ms. in Bhau Daji collection of BBRAS No. 385 in Prof. Velankar's Catalogue pp. 126–127), Vasantarāja-śākuna,[1309] Mānasollāsa of king Someśvara Cālukya (1126–1138

1309. Vāsantarāja's work on 'śakunas' was published by the Veṅkaṭeśvara Press, Bombay (1906 A. D.), with the Sanskrit commentary of Bhānucandragaṇi, who was patronized by Emperor Akbar (in the latter half of the 16th century A.D.) and a Hindi translation by Sridhar Jatasankara Bhatta. As Vasantarāja is quoted by Adbhuta-sāgara which was begun in śaka 1089 (1167 A. D.), it follows that Vasantarāja would have to be placed before 1100 A. D. He is probably not much earlier than 700 A. D. as he does not appear to have been mentioned by Utpala in his extensive commentaries on Varāhamihira's works. Vasantarāja tells us (in the Introductory verses 3–5) that he was the son of Vijayarājabhaṭṭa and Sarasvatī and the younger brother of Śivarāja, that he was honoured by king Candradeva (king of Mithilā, acc. to the Com.) and composed the work on śakuna at the request of that king. He mentions (I. 10) Cūḍāmaṇi, jyotiṣa-śāstra, horā-śāstra and Svarodaya and (in I. 27) informs us that Atri, Garga, Guru, Śukra, Vasiṣṭha, Vyāsa, Kautsa, Bhṛgu and Gautama were the principal ancient sages that declared the knowledge of śakunas for the benefit (of human beings). Cūḍāmaṇi is rather an early work quoted in the Sārāvalī (5. 20 and 39. 8) of Kalyāṇavarman in the same breath with Varāhamihira.

The Nimitta attributed to Bhadrabāhu is an extensive work containing 26 chapters and about 1460 verses. It is described in the colophon at the end as 'naigranthe (nairgranthe?) Bhadrabāhuke Nimitte svapnādhyāyaḥ'. The first chapter states that in the time of king Senajit at Rājagṛha in Magadha pupils asked Bhadrabāhu to expound to them the *nimittas* and he did so. He is styled (in chap. II. 1) a *digambara* and the best of *śramaṇas*. The contents of chapters 2 to 26 are: Ulkā (meteors), halo, lightning, evening glow, clouds, winds and hurricanes, rain-fall, gandharvanagara (Fata Morgana), march of kings on invasion, portents affecting the king and the country due to the ripening of actions in former lives (chap. XIV has 177 verses on this), grahacāra as declared by Jina (chap. XV, 227 verses), the prognosticatory movements of Venus, Saturn, Jupiter, Mercury, Mars, Rāhu, Ketu, the Sun and the Moon; grahayuddha; conjunctions of planets; dreams. It appears that the work is later than Varāhamihira. As it is not within the pale of Dharmaśāstra Literature and hardly ever describes a śānti in the way in which the Purāṇas and medieval dharmaśāstra works provide it has been referred to in this work only rarely.

A. D.) II. 13 pp. 102-112, Adbhutasāgara (which profusely quotes Vasantarāja's work), Rājanītiprakāśa (pp. 345-347). Among these Vasantarāja-śākuna is the most comprehensive work on the subject of śakunas and has been quoted by the Adbhutasāgara and other later works. A brief account of the work would not be out of place and is given here. It is divided into twenty *vargas*[1310] (sections) and contains in different metres 1525 verses (as stated in *varga* II. 12). It states: it would declare the śakunas[1311] indicated in this world by groups of beings viz. bipeds (men and birds), quadrupeds (elephants, horses &c.), six-footed (bees), eight-footed (the mythical animal śarabha), beings having many feet (such as a scorpion) and having no feet (such as snakes); that is called *śakuna* which is the means of arriving at definite knowledge about auspicious or inauspicious consequences viz. movement (to the left, to the right &c.), the sounds or cries (of birds and beasts), their glances and activities. A person who is an expert in śakuna-śāstra, knowing that a certain object of his would involve difficulties or would be without difficulties, abandons it or begins it respectively. The work boasts that if it be well studied it requires no expounder, no mathematics and that by merely studying it, the reader acquires pleasant knowledge that yields rewards. The work repeats the view of Varāhamihira (in Bṛhat-saṃhitā 85.5 and on p. 558 above in n. 827) that śakunas indicate to men, whether going on a journey or residing in their houses, how the consequences of actions done in past lives will certainly bear fruit. He answers the objection that, if no man can escape his fate and has to reap the rewards of his past actions, this śāstra is of no use, by saying that the actions of former lives bear fruit only at certain times and places and a man can avoid the results of past actions just as he avoids snakes, fire, poison,

The अद्भुतसागर (p. 569) quotes शुभाशुभ० and other verses.

thorns and other (dangerous) things and that if fate alone be the deciding factor what is the use of the science of politics and government by following which wise kings protect the world with great effort? Learned men declare that *daiva* (fate) is only the *karma* produced (accumulated) in past lives; the *karma* in past lives was acquired by human effort; how can one then say that daiva does not depend on human effort? The subjects in the 20 *vargas* and the verses allotted to each by Vasantarāja may be briefly set down at one place: 1. Śāstrapratiṣṭhā (establishment of the śakunaśāstra by reasoning, verses 31); 2. Śāstrasaṅgraha, 13 verses (the statement of the contents of chapters and verses); 3. abhyarcana, verses 31 (how to honour the guru who expounds the śakunaśāstra and to offer worship to the birds and the eight lokapālas according to the procedure laid down by sages); 4. miśraka, verses 72 (general directions such as that the person out of several with reference to whom a śakuna may be examined up to what distance a śakuna operates, if many beings exhibit prognostications which should be followed, what birds and animals are powerful in what directions as to śakunas; *śānta*, *dagdha* and other directions); 5. śubhāśubha (auspicious and inauspicious things and sights) verses 16; 6. *nareṅgita*, verses 50 (the appearance, dress, gestures, speech, throbbing of the limbs of men and women that are auspicious or inauspicious); 7. śyāmāruta (chirpings of the bird called śyāmā, female cuckoo) 400 verses (worship of two images of the bird practically as a deity, the auspicious or inauspicious sounds, activities, motions with reference to invasion, coronation, peace and war, victory, marriage, rainfall, crops); 8. Pakṣiviceṣṭa, verses 57 (prognostications from the cries, sight, glances, movements of several birds such as swan, crane, *cakravāka*, parrot, *mainā*, peacock, kapiñjala, vulture, hawk, owl, pigeon, cock); 9. Cāśa (the blue jay) verses 5; 10. khañjana (wagtail), verses 27; 11. karāpikā (a kind of crane), verses 11; 12. kākaruta (the cawing of crows) verses 181; 13. Piṅgalikāruta (cries of an owl-like bird), verses 200; 14. catuṣpada (four-footed animals like elephant, horse, ass, bull, buffalo, cow and she-buffalo, goat and sheep, camel, musk-rat, rat, monkey, cat, jackal), verses 50; 15. six-footed, many footed and snakes (verses 13); 16. Pipilikā (ants), verses 15; 17. Palli-vicāra (lizard also called kuḍyamatsya and gṛhagodhikā), verses 32; 18. Śvaceṣṭita (barking and other actions of dogs), verses 222; 19. Śivāruta (howling of female jackals), verses 90; 20. Śāstra-prabhāva (the importance of this śakunaśāstra), verses 24.

A noticeable feature of Vasantarāja's work is that more than half of it (781 verses) is devoted to the sounds[1312] made by three birds viz. Śyāmā (400 verses), crow (187) Piṅgalikā (200) and that 312 verses are devoted to the barking, movements and howling of dogs (verses 222) and female jackals (verses 90). It is remarkable that among the Śāktas it is believed that a female jackal is a messenger of Kālī and is auspicious and on hearing its howl in the early morning a person should offer salutation and then success is in the hands of the sādhaka. The brief contents set out above will show that he extends the meaning of śakuna so as to include prognostications based on the actions of men and beasts. He himself says at the end that[1313] is śakuna, which in this world is remembered, heard, touched or seen or which is declared in dreams, since they all yield results. He claims that the system of śakunas is as authoritative as the Vedas, smṛtis and purāṇas, since it never fails to convey correct knowledge.[1314] Some of his interesting statements may be briefly set out. If an owl hoot at night on the top of a house that portends[1315] sorrow and the death of the owner's son (VIII. 40). This is in line with modern popular belief in India. The cawing of crows is at the head of all prognosticatory sounds. 'The barking of dogs is the essence among all śakunas.' The Bṛhad-yogayātrā[1316] provides that certain animals and birds are useless for prognostications at certain seasons viz. the *rohita* (red) deer, horse, goat, ass, deer, camel, hare, are useless in winter (śiśira); crow and cuckoo are

1312. लाभदश्चिलिचिलीतिनिनादः शूलिशूलिनिनदोपि तथैव। ···स्यान्नयाय नियमेन चिचीति निःस्वनश्चिलिकुनाद इहार्थः। कष्टदश्चिरिचिरीति विरावश्चीकुचीकु इति दैन्यविधायी। वसन्त० 7.52–54 pp. 119–120. How an ordinary man could distinguish between the sound 'cilicili' (portending gains), cici (portending danger), ciriciri (portending trouble) and cīkucīku (portending a wretched state) is difficult to say. Similarly, the Piṅgalā bird is supposed to make five sounds viz. किच्, किचि, किचिचि, किचिकिचि, किचिकिचिचि (वसन्तराज 13. 27–28) with different consequences.

1313. यदस्ति किंचिज्जगतीह वस्तु स्मृतं श्रुतं स्पृष्टमथापि दृष्टम्। स्वमान्तराद्यत्प्रतिपादितं तत्फलप्रदत्वाच्छकुनं वदन्ति॥ वसन्त० 20. 2 p. 513.

1315. रात्रौ गृहस्योपरि भाषमाणो दुःखाय घूकः श्रुतसूत्यवे च। वसन्त० 8. 40. p. 246.

1316. रोहिताश्वाजबालेयकुरङ्गोष्ट्रसुगाः शशाः। निष्फलाः शिशिरे ज्ञेया वसन्ते काककोकिलौ॥ न तु भाद्रपदे ग्राह्या सूकरश्वशृकादयः। शरद्यजादिगोक्रौञ्चाः श्रावणे हस्तिचातकौ॥ व्याघ्रर्क्षवानरद्वीपिमहिषाः सविलेशयाः। हेमन्ते निष्फला ज्ञेया बालाः सर्वे विमानुषाः॥ बृहद्योगयात्रा (ms.) chap. 23. 22–24.

useless in spring; boar, dog, wolf and the like should not be relied upon in Bhādrapada; in Śarad (autumn) lotuses (or conch), bull and birds like krauñca are useless; in Śrāvaṇa month, the elephant and *cātaka* bird; in Hemanta (early winter), tiger, bear, monkey, leopard, buffalo and all animals resorting to holes (like snakes) are useless and so are all young ones except of human beings. Vasantarāja in IV. 47–48 pp. 56–57 has the same provisions almost word for word. Vasantarāja's work appears to have been based mainly on Varāhamihira's Bṛhat-saṁhitā section on śakuna, chapters 85 to 95 (321 verses) in which Varāhamihira devotes 47 verses in chap. 85 to the cries of birds in general, deals with the movements and barking of dogs (88. 1–20) and female jackals (89. 1–15), the cries of crows (62 verses in chap. 94), to horses (92. 1–15), elephants (94. 1–14) and cows (90. 1–3).

Vasantarāja states[1317] that there are five excellent ones in the matter of śakunas viz. the Podakī bird, dog, crow, piṅgalā bird and the female jackal. Sarasvatī is the presiding deity of podakī, Yakṣa (Kubera) of dog, eagle of crow, Caṇḍī of piṅgalikā and the friend of Pārvatī of the female jackal. He further says that all animals and birds are presided over by deities; therefore a person who interprets śakunas should not kill them, as deities presiding over them might become angry. His statements about 'upaśruti' (oracular voices or words) are worth citing. 'At the time of *pradoṣa* or about the morning twilight when people are hardly speaking anything, a person that is ready to undertake any matter (business) should consider everywhere oracular voices. What a child says without being prompted to do so would not turn out to be untrue even at the end of a *Yuga*. No such easily understood and true śakuna exists for men other than upaśruti.' Both Mānasollāsa (II. 13, verses 920–926 pp. 112–113) and Vasantarāja (VI. pp. 78–80 verses 5–12) describe a curious mode of divining the future called 'upaśruti'.[1318] 'When all people are asleep and the public

1317. पोदकी भषणकाकपिङ्गला जम्बुकाप्रियतमा च पञ्चमी। एतदत्र मुनिसत्तमैः सदा कीर्त्यते शकुनरत्नपञ्चकम्॥ सरस्वती पाण्डविकाप्रधानां यक्षोपि यक्षं गरुडश्च काकम्। चण्डी पुनः पिङ्गलिकां सदैव शिवां शिवादूत्यधितिष्ठतीह। वसन्तराज III. 3–4, pp. 22–23; कालिकापुराणम्। यः शिवाविकृतं श्रुत्वा शिवदूतीं शुभप्रदाम्। प्रणमेत्साधको भूत्वा तस्य कामाः करे स्थिताः॥ आह्निकतत्त्व (Jiv. (*Continued on next page*)

road is empty of people three married women accompanied by a maiden should worship Gaṇeśa (with gandha and flowers &c.); then, after making an obeisance to Caṇḍikā they should fill a measure of corn like *kudava* with *akṣata* grains on which sacred mantras have been recited seven times; they should then place the image of Gaṇeśa in that measure surrounded by the grass blades of a broom. They should take with them the *kudava* measure with Gaṇeśa image inside and repair to the house of a washerman. In front of that house they should cast white *akṣata* grains after (silently) revolving in their mind their thoughts (the matter they are intent on). Then they should with concentrated mind listen. When they hear any words coming from inside of the house talked by a man, a woman or a child or any one else uttered at pleasure (or without restraint of any kind), auspicious, or inauspicious, they should consider the sense of the words heard and the conclusion drawn as to the future project from the words would not turn out to be untrue. The same method may be followed by approaching the house of a cāṇḍāla.

(*Continued from last page*)

उपश्रुति occurs in the Rg. I. 10. 3 and appears to mean simply 'coming near to listen.' Vide also Rg. VIII. 8. 5 and VIII. 34. 11. अर्चयित्वा गणाधीशं सर्वविघ्नविनाशनम्। कुमार्या सहिता नार्यस्तिस्रः सुते जनेऽखिले। अक्षतैः पूरयेयुस्ता यत्किञ्चित् कुडवादिकम्। चण्डिकायै नमः कृत्वा सप्तकृत्वोऽभिमन्त्रितम् ॥ संमार्जनीकृतावेष्टे स्थापयेयुर्गणाधिपम्। व्रजेयुस्तं समादाय रजकस्य निकेतनम्। तद्देहस्य पुरोभागे निक्षिपेयुः सिताक्षतान्। मनोगतं समुद्दिश्य शृण्युः सुसमाहिताः॥ श्रूयते वचनं किंचिद् रजकालयमध्यगम्। नार्या नरेण बालेन प्रोक्तमन्येन केनचित्॥ स्वैरसंलापनोक्तं शुभं वा यदि वाशुभम्। शृण्वन्तीभिः फलं ज्ञेयं तद्वाक्यार्थविचारतः॥ चण्डालनिलयेऽप्येवं श्रवणे बोधने क्रमः। यद् ब्रूयुर्वचनं तत्र तत्तथा न तदन्यथ॥ मानसोल्लास II. 13, verses 920-926. वसन्तराज employs almost the same words It is difficult to say whether one borrows from the other. Probably both draw on the same source. कुडव is a measure of grain, equal to ¼ of a *prastha*. Acc. to भविष्य q. by हेमाद्रि (on व्रत vol. I. p. 57 and परा. मा. II. 1. p. 141), 2 पल्स = प्रसृति, 2 प्रसृतिs = कुडव, 4 कुडवs = प्रस्थ, 4 प्रस्थs = आढक, 4 आढकs = द्रोण, 16 द्रोणs = खारी. शबर on जै. X. 3. 45 mentions कुडव, आढक, द्रोण and खारी. पाणिनि mentions आढक and खारी in V. 1. 53 and V. 4. 101. According to ancient smṛtis, a washerman was one of the seven antyajas; vide रजकश्चर्मकारश्च नटो बुरुड एव च। कैवर्तमेदभिल्लाश्च सप्तैते चान्त्यजाः स्मृताः॥ अत्रि. 199, अङ्गिरस् (Jiv. I. p. 554), यम 33 (Ānand. ed. of smṛtis). While these pages were passing through the press, the author got a copy of a recent work 'The interpretation of dreams in the ancient Near East' with translation of an 'Assyrian Dream book' by A. Leo Oppenheim (as vol. 46 part 3, 1956, of the Transactions of the American Philosophical Society, New Series). He could not refer to the interesting parallels from the book as regards dreams, but on p. 211 the writer states that the use of chance utterances made by unconcerned persons was known in the ancient Near East not only in Palestine but also in Mesopotamia.

A peculiar mode akin to 'upaśruti' is described in the Padmapurāṇa, Pātālakhaṇḍa, chap. 100 verses 65–166. It is narrated in that chapter that Bibhīṣaṇa was put in chains by Draviḍas when the former saw Śiva-linga established by Rāma at Rāmeśvara and when no one could explain how it happened, Rāma questioned Śambhu himself who explained that the Purāṇas (mentioned in verses 51–53) may be employed as containing prognosticatory words. The procedure is that a maiden more than five years of age and less than ten years or any girl who has not attained puberty may be honoured with *gandha*, flowers, incense and other upacāras, she should be made to recite the words 'speak the truth, speak what is agreeable, O blessed Sarasvatī! salutation to you, salutation to you!' She should be given three pairs of dūrvā grass and she should be asked to cast them between two leaves of the book. The verse between two leaves would be indicative of success in the undertaking. The verse should be carefully considered and its meaning settled and applied to the matter in hand. This is like *sortes sanctorum* or sortes Vergilianae i. e. divination by opening at random the Scriptures or a book of Virgil or by pricking the text with a pin. Then directions are given as to what should be done if the leaves are half burnt or indistinct &c. and it is said that one should look upon the verse as sent by fate like the words in the upaśruti method.[1319] It is further stated that this method should not be resorted to every day, but rarely and that then one should worship the Purāṇa the previous night and in the morning should consult the Purāṇa for śakuna (verses 114–116). The Skanda is the best among all Purāṇas for this purpose of śakuna; some hold that the Viṣṇupurāṇa and the Rāmāyaṇa also may be consulted, but the author of the Padma says that Viṣṇupurāṇa may not be used for this purpose, since if a man devoid of proper conduct honours it for consultation, then inauspicious indications come out (verses 122–125). Śambhu himself worshipped Skanda-purāṇa, asked the question why Bibhīṣaṇa, devotee of Śiva, had fetters put on him (verses 131–132). Then three verses were seen that gave indications (verses 133–135), two of which[1320] are cited below. At the end the

1319. दैवागतो हि स श्लोको दैवं हि बलवत्तरम्। उपश्रुतिषु चक्रुश्च नागराधो द्विजस्य तु। विस्मयो न च कर्तव्यो दैवस्य कुटिला गतिः। पद्म, पाताल, 100. 77–78.

(*Continued on next page*)

Purāṇa says that the Ādiparva of the Mahābhārata or all its *parvans* may be employed for this purpose of śakuna (verses 163–164).

A similar method of finding out omens and of divination from the two works of the great Hindi poet and saint Tulasīdās (born in *saṁvat* 1589 i.e. 1532 A.D.) viz. Rāmājñā (or Rāmaśakunāvalī containing 343 *doha* verses) and Rāmaśalākā is described at some length by G. A. Grierson in I. A. vol. XXII pp. 204 ff and in Festgabe H. Jacobi pp. 449–455.

It is worthy of note that even scientific works like the Carakasaṁhitā ask the physician to notice the condition of the patient, of the messenger, and the actions of the physician and inauspicious omens. They are described in Indriyasthāna chap. 12. A few notable verses may be cited here. 'That patient would only live for a month on whose head arises only powder (dandruff or the like) resembling the powder of dry cowdung and that slides down (from the head); that patient will not live even for a fortnight whose chest dries up when he takes a bath and anoints his body with sandalwood paste while all other limbs are yet wet' (verse 12). 'Those messengers from a patient who come to a physician when the latter is offering oblations into fire or is offering piṇḍas to his pitṛs, will kill the patient (i.e. indicate the approaching death of the patient, verse 16); a woman who is in a pitiable state, terrified, hurried, troubled, dirty and unchaste, three persons (coming together), deformed persons, impotent persons—these are messengers of those who are about to die' (verses 21–22); 'a physician should not go (to see a patient) on being called by a messenger when the physician sees, while the messenger is describing the condition of the patient, an inauspicious omen or a sorrowing man or a corpse or the decoration meant for the dead'; verses 67–70 dilate on the signs of an auspicious messenger and verses 71–79 set out auspicious omens such as the sight of curds, whole grains, brāhmaṇas, bulls, king, jewels, jar full of water, white horse &c. The physician is however advised not to declare an inauspicious omen even when he sees it that would give a shock or cause pain to the patient or even to anyone else (verse 63).

(*Continued from last page*)

केशशूलिन्यो भविष्यन्ति कलौ युगे ॥ पद्म, पाताल 100. 133–134. The second verse is enigmatic and occurs in कलिस्वरूपवर्णन. Vide Vanaparva, chap. 188. 42 where it occurs and H. of Dh. vol. III. p. 893 (for explanation) and p. 1012 for quotation from Vanaparva.

It would be of use to students of śāntis if the śānti-sūktas of the Ṛgveda are mentioned in one place. They are:

(1) Ā no bhadrāḥ (Ṛg. I. 89. 1–10)
(2) Svasti na Indro (Ṛg. I. 89. 6–10)
(3) Śam na Indrāgnī (Ṛg. VII. 35. 1–11)[1321]
(4) Yata Indra bhayāmahe (Ṛg. VIII. 61. 13–18)
(5) Bhadram no api vātaya manaḥ (Ṛg. X. 20. 1)
(6) Āśuḥ śiśāno (Ṛg. X. 103. 1–13)
(7) Muñcāmi tvā (Ṛg. X. 161. 1–5)
(8) Tyam-ū ṣu (Ṛg. X. 178. 1–3)
(9) Mahi trīṇām (Ṛg. X. 185. 1–3)
(10) Rātrī vyakhyat (Ṛg. X. 127. 1–8)

Most of the above hymns occur wholly or partly in the Atharvaveda, the Tai. S. and other Vedic works.

Then there are certain hymns that are called Rakṣoghna[1322] (destroying evil spirits) such as 'Kṛṇuṣva pājaḥ' (Ṛg. IV. 4. 1–15), 'Rakṣohaṇam' (Ṛg. X. 87. 1–25), 'Indrāsomā tapatam' (Ṛg. VII. 104. 1–25), 'Agne haṁsi nyatriṇam' (Ṛg. X. 118. 1–9), 'Brahmaṇāgniḥ' (Ṛg. X. 162. 1–6). Some of these also occur wholly or partly in the Tai. S., Atharvaveda and other Vedic works.

The eleven anuvākas of the Taittirīya Saṁhitā IV. 5 beginning with the words 'namas-te Rudra manyava' are styled Rudrādhyāya or simply Rudra. Reciting them once is styled 'āvartana', but the recitation of these eleven times is called 'Ekādaśinī'. Recitation of the Ekādaśinī eleven times is called in popular parlance Laghurudra, eleven repetitions[1323] of this

---

1321. In the description of the dāna called Tulāpuruṣa contained in the Matsyapurāṇa chap. 274 occurs the half verse 'जपेयुः शान्तिकाध्यायं चत्वारः सर्वतोदिशम्' (274.56) which Aparārka quotes (on p 317) and remarks 'शान्तिकाध्यायं सं न इन्द्राग्नी इति सूक्तम्।'

1322. कौशिकसूत्र 126. 9 mentions 'रक्षोघ्नैश्च सूक्तैः' but does not state what they are.

1323. So eminent a writer as कमलाकरभट्ट in his शान्तिरत्न states that एकादशिनी and लघुरुद्र mean the same thing. 'एकादशरुद्रै रुद्रीत्युच्यते। सैव लघुरुद्रः रुद्रैकादशनीति चोच्यते। तामिरेकादशभिर्निर्वृत्तः। तैरेकादशावृत्तैरिति हेतौ। ...रुद्रं महातिरुद्रं च जपेत्कार्यस्य गौरवात्।' folio 255 a. Similarly, in the Mahānyāsa-vidhibhāṣya (ms. in the collection of the Bombay Asiatic Society, described in Prof. Velankar's catalogue at No. 794) no Laghurudra is mentioned, but only Rudra, Rudraikādaśinī, Mahārudra and Atirudra.

last are designated Mahārudra and eleven Mahārudras are called Atirudra. The Rudra may take three forms viz. *japa* (muttering), *homa* (offering into Agni oblations to the accompaniment of the mantras), or *abhiṣeka* (sprinkling a person with the holy water over which the mantras have been recited) For reciting Rudrādhyāya the yajamāna, if he cannot himself recite it, may employ one brāhmaṇa and also for Ekādaśinī; but for Laghurudra and Mahārudra eleven brāhmaṇas are generally employed and for Atirudra eleven or 121. Ekadaśinī and Laghurudra are very much in vogue even now in Mahārāṣṭra. Rudrābhiṣeka is described in Baud. gṛhyaśeṣasūtra II. 18. 11–16.

The mantra 'Tryambakam yajāmahe' (Ṛg. VII. 59. 12, Tai. S. I. 8. 6. 2, Vāj. S. III. 60) is called Mṛtyuñjaya. Japa of it is prescribed for relief against premature death. The Baudhāyana-gṛhyaśeṣasūtra (III. 11) prescribes a somewhat more elaborate rite and provides that the mantras to be recited are 'apaitu mṛtyuḥ' (Tai. Br. III. 7. 14. 4), 'param mṛtyo' (Tai. Br. III. 7. 14. 5), 'mā no mahāntam' (Ṛg. I. 114. 7), 'mā nas-toke' (Tai. S. III. 4. 11. 2), 'Tryambakam yajāmahe' (Tai. S. I. 8. 6. 2), 'Ye te sahasram' (Tai. Br. III. 10. 8. 2).

It is unnecessary for the author to say what should be done in these days as to śāntis. Most of the śāntis except a few, as pointed out above in various places, are no longer performed. Even the few that are yet performed may cease altogether in the near future, if one is to judge from modern trends.

SECTION IV

THE PURĀṆAS AND DHARMAŚĀSTRA

CHAPTER XXII

Origin and development of Purāṇa literature

The History of Dharmaśāstra (vol. I pp. 160–167) has a brief chapter on the Purāṇas. It has been shown therein how the Taittirīya Āraṇyaka, the Chāndogya and Bṛhadāraṇyaka Upaniṣads mention Itihāsa and Purāṇa (sometimes collectively as 'Itihāsapurāṇam' and sometimes separately as 'Itihāsaḥ Purāṇam') and how some of the extant Purāṇas are much earlier than the 6th century A.D. It is further pointed out there that the number of the principal Purāṇas has been traditionally handed down as eighteen,[1324] that some purāṇas such as the Matsya, the Viṣṇu, the Vāyu and Bhaviṣya contain much Dharmaśāstra material, that the Garuḍa-purāṇa and the Agnipurāṇa contain several hundred verses each that are identical with verses of the Yājñavalkya smṛti, that there is great divergence as to the extent of almost all Purāṇas, that some of the Purāṇas themselves enumerate minor works called Upapurāṇas, that the Purāṇas are divided into three groups, viz. *sāttvika*, *rājasa* and *tāmasa* (as done by Garuḍa I. 223. 17–20, and Padma VI. 263. 81–84). Details were also furnished as to the chapters of the Purāṇas in which the several topics of Dharmaśāstra (such as *ācāra*, *āhnika*, *dāna*, *rājadharma*, *śrāddha*, *tīrtha*) were dealt with.

In the present section it is proposed to trace the great transformation that took place in the ideas, ideals and practices of the ancient Indian people owing to the influence of the Purāṇas in the first few centuries of the Christian era.

Before proceeding further several preliminary matters have to be dealt with. The mention of Purāṇas as a class of literature

---

1324. The Matsya (53. 18–19), Agni (272. 4–5) and Nārada (I. 92. 26) enumerate Vāyu among the eighteen Mahāpurāṇas, while the Viṣṇu (III. 6.19), Mārkaṇḍeya (134.8), Kūrma (I. 1.13), Padma (I. 62.2), Liṅga (I. 39.61), Bhāgavata (XII. 7.23), Brahmavaivarta (III. 133.14) substitute Śaiva for Vāyu and omit Vāyu altogether from the list of the eighteen Mahāpurāṇas.

goes back much farther than was pointed out in the H. of DH. vol. I. p. 160. The Atharvaveda[1325] mentions Purāṇa (in the singular) in XI. 7. 24 and XV. 6. 10–11. 'The ṛk and sāman verses, the chandas, the Purāṇa along with the Yajus formulæ, all sprang from the remainder of sacrificial food, (as also) the gods that resort to heaven. He changed his place and went over to great direction; and Itihāsa and Purāṇa, gāthās, verses in praise of heroes followed in going over.' The Śatapatha brāhmaṇa also (XI. 5. 6. 8) mentions 'Itihāsapurāṇam' (as one compound word) and states that on the 9th day of the Pāriplava the *hotṛ* priest instructs among other matters as follows: 'The Purāṇa is the Veda; this it is; thus saying let him narrate some Purāṇa' (XIII. 4. 3. 13.).[1326] The Śāṅkhāyana[1327] Śrautasūtra (XVI. 2. 27) and the Āśvalāyana Śrauta (X. 7) remark that on two days of the Pāriplava the Itihāsaveda and Purāṇaveda were to be recited. But the two sūtras (though affiliated to the Ṛgveda) differ as to the day on which they were to be recited. It is difficult to say whether the Atharvaveda, the Śatapatha Brāhmaṇa and the Upaniṣads knew several works called Purāṇa or whether there was only a single work called

---

1325. ऋचः सामानि छन्दांसि पुराणं यजुषा सह। उच्छिष्टाज्जज्ञिरे सर्वे दिवि देवा दिविश्रितः॥ अथर्व XI. 7. 24; स बृहतीं दिशमनुव्यचलत्। तामितिहासश्च पुराणं च गाथाश्च नाराशंसीश्चानुव्यचलन्। अथर्व XV. 6. 10–11. Vide Prof. Hazra's interpretation of the first verse in ABORI. vol. 36, 1955, pp. 190–203 and criticism thereof below.

1326. मध्वाहुतयो ह वा एता देवानां यदनुशासनानि विद्या वाकोवाक्यमितिहासपुराणं गाथा नाराशंसीरित्यहरहः स्वाध्यायमधीते। शतपथ XI. 5. 6. 8; अथाष्टमेऽह्नि। ...मत्स्याश्च मत्स्यहनश्चोपसमेता भवन्ति। तानुपदिशतीतिहासो वेदः सोयमिति किंचिदितिहासमाचक्षीत। अथ नवमेऽह्नि। ...तानुपदिशति पुराणं वेदः सोयमिति किंचित्पुराणमाचक्षीत। शतपथ XIII. 4. 3. 12–13. According to the commentary Itihāsa means such cosmological myths as 'in the beginning there was nothing but water' and Purāṇa means stories such as that of Purūravas and Urvaśī. Compare गोपथब्राह्मण (ed. by Gaastra) I. 1. 21.

1327. समासासु समासासु दक्षिणत आहवनीयस्य हिरण्यकशिपावासीनोऽभिविक्षाय पुत्रामात्यपरिवृताय राज्ञे पारिप्लवमाचक्षीत। ...प्रथमेऽहनि मनुर्वैवस्वतस्तस्य मनुष्या विशस्त इम आसत इति गृहमेधिन उपसमानीताः स्युस्तानुपदिशति। ऋचो वेदः सोऽयमिति सूक्तं निगदेत्॥ आश्व. श्रौ. X. 6. 10–X. 7. 1. समासासु refers to the three iṣṭis to Savitṛ offered every day in the morning, mid-day and evening; the com. of गार्ग्यनारायण explains: समासास्विति दीप्सावचनात् पारिप्लवाख्यानमपि संवत्सरमहरहः कर्तव्यमिति गम्यते॥ The आश्व. श्रौ. connects Itihāsa with the 9th day and Purāṇavidyā with the eighth, while the शां. श्रौ. reverses this order. The आश्व. श्रौ. winds up 'एवमेतत्पर्यायज्ञः संवत्सरमाचक्षीत। दशमीं दशमीं समापयन्। संवत्सरान्ते दीक्षेत।' X. 7. 9–11; the शाङ्खायनश्रौत derives पारिप्लव 'तद्यत्पुनः पुनः परिप्लवते तस्मात्पारिप्लवम्' (XVI. 2. 36).

Purāṇa known to them. But from the fact that the Tai. Ār. (II. 10) speaks of Itihāsas and Purāṇas (*in the plural*) it would not be unreasonable to suppose that in the later Vedic period at least some works (three or more) called Purāṇas existed and were studied and recited by those that were engaged in solemn sacrifices like the Aśvamedha. It is not unlikely that, where the singular 'Purāṇam' was employed in the Vedic texts, a class of works was meant. The facts that 'Itihāsa-Purāṇa' is called the fifth Veda in the Upaniṣads and that the Śatapatha employs 'Itihāsa-Purāṇam' as one compound word lead to the inference that the two categories 'Itihāsa' and 'Purāṇa' were similar in contents at least in several respects. The Āpastambadharmasūtra[1328] quotes two verses each in two places from a Purāṇa (in the singular), once cites the view of the Bhaviṣyatpurāṇa and in another place gives the summary of a Purāṇa passage or verse which says that, when a person attacks another

---

1328. अथ पुराणे श्लोकावुदाहरन्ति। उत्तमामहतं भित्वा दुरुक्तवचसेदितम्। मोक्षां मेने प्रजापतिरपि दुष्कृतकारिणः॥ न तस्य पितरोऽश्नन्ति दूत्र वर्षाणि पञ्च च। न च हव्यं वहत्यग्निर्यस्तामभ्यधिमन्यते। आप. ध. सू. I. 6. 19. 13; these two are the same as Manu IV. 248–249 with slight variations; अष्टाशीतिसहस्राणि ये यज्ञावीनिरेऽनः। दक्षिणेनार्यम्णः पन्थानं ते श्मशानानि मेनिरे॥ अष्टाशीतिसहस्राणि ये वयां मेनिरेऽनः। उत्तरेणार्यम्णः पन्थानं तेऽमृतत्वं हि कल्पन्ते॥ इत्यूर्ध्वरेतसां दर्शनम्। आप. ध. सू. II. 9. 23. 3–6. These two verses respectively say that those who lead the life of a householder performing sacrifices and desiring progeny have to undergo deaths (lit. cemeteries, śmaśānāni) and births (i.e. they only reach heaven and are born again and again), while those that do not desire progeny but remain celebate throughout life become immortal (*i. e. are not born again*). शङ्कराचार्य in his भाष्य on बृह. उप. VI. 2. 15 quotes a स्मृति verse as follows: 'अष्टाशीतिसहस्राण्यूर्ध्वरेतसाम्। उत्तरेणार्यम्णः पन्थास्तेऽमृतत्वं हि मेनिरे॥'. Compare: अष्टाशीतिसहस्राणि यतीनामूर्ध्वरेतसाम्। उदक् पन्थानमर्यम्णः सिद्धा ह्यारूढसंज्ञकम्। विष्णुपुराण II. 8. 93, वायु 50. 213, 218, मत्स्य 124. 102–3 and 107, ब्रह्माण्ड II. 7. 180 (first half). The third passage of Āp. is पुनःसर्गे बीजार्थं यज्ञवीति ब्राह्मणम्। पुराणे। आप. ध. II. 9. 24. 6. This means that those who perform what is laid down in the Veda serve as the seed (*i e. they become Prajāpatis*) of the new creation after *pralaya* (dissolution). Compare मनु. III. 184–186, one of which is तत्राष्टाशीतिसाहस्रा मुनयो गृहमेधिनः। पुनश्चान्वीनो बीजभूता वंशकराः॥ The 4th passage of आप. ध. सू. is यो हिंसार्थमभिक्रान्तं हन्ति मन्युरेव मन्युं शमयति न तस्मिन्दोष इति पुराणे। I. 10. 29. 7. On killing a brāhmaṇa there was a difference of opinion; Āp. probably paraphrases some verses such as Manu VIII. 350–351, the latter of which is: यस्यात्विषये दोषो हन्तुर्भवति कश्चन। प्रकाशं वाप्रकाशं वा मन्युस्तं मन्युरृच्छति॥. Both verses of Manu occur in मत्स्य 227. 115–117, विष्णुधर्मसूत्र V. 189–190, बृहद्धारीत IX 349–350; पद्म V. 45. 45–46 are very similar. Vide Bühler in I. A. vol. 25 pp. 323 ff.

with the object of harming him and the person attacked kills the attacker, no sin is incurred. From these passages it is clear that Āpastamba had before him a Purāṇa called Bhaviṣyat and also that the Purāṇa or Purāṇas which he knew contained rules about the food to be accepted for eating, about the stages of householder and the perpetual student, about resisting an ātatāyin even unto death and about creation and re-creation after dissolution. These matters fall within the province of Smṛtis and Purāṇas. As the word 'purāṇa' means 'ancient', the word Bhaviṣyat-purāṇa is a contradiction in terms. Long before Āpastamba the word Purāṇa had come to mean a work dealing with ancient tales &c; several such works must have been composed and they probably began to incorporate contemporary events and wrote about such events in a prophetic vein. Hence arose the name Bhaviṣyat-purāṇa.[1329] As Āpastamba mentions a Bhaviṣyat-purāṇa and also Purāṇa, it follows that before 500 B. C. several Purāṇas existed one of which was called the Bhaviṣyat and the Purāṇas then known contained the topics of *sarga*, *pratisarga* and smṛti matters.

This conclusion is strongly corroborated by other facts. The Gautama-dharmasūtra provides that a learned (*bahuśruta*) brāhmaṇa is one who knows peoples' usages, the Veda, the aṅgas (auxiliary lores), Vākovākya (dialogues), Itihāsa and Purāṇa and that the king in administering the affairs of his kingdom and justice has to depend upon the Veda, Dharmaśāstra, the (six) *aṅgas* of the Veda, the (four) Upavedas and Purāṇa.[1330]

From the above discussion it appears that, though we are not in a position to make definite statements about the contents of the Purāṇa or Purāṇas referred to in the Atharva, Śat. Br., Tai. Ār. and the Upaniṣads, by the time of Āp. and Gautama, Purāṇas approaching in contents to some extent at least some of the extant Purāṇas had come into existence. The

---

1329. It may be noted that the Varāhapurāṇa (chap. 177. 34) expressly mentions the Bhaviṣyat purāṇa. The reference shows that (in 177. 54–57) Sāmba, son of Kṛṣṇa, renovated the Purāṇa called Bhaviṣyat and established images of the Sun-god in four places viz. (1) to the south of the Yamunā, (2) between Yamunā and Multan, called Kālapriya, (3) at Mūlasthāna (modern Multan), (4) in Mathurā; vide Bhaviṣya (Venk. ed.) I. 72. 4–7 for three centres of the Sun image. The Matsya 53. 62 also mentions the Bhaviṣyat.

1330. तस्य च व्यवहारो वेदो धर्मशास्त्राण्यङ्गान्युपवेदाः पुराणम् । गौ. ध. सू. XI. 19.

Arthaśāstra of Kauṭilya states that[1331] 'trayī' means the three Vedas, viz. Sāmaveda, Rgveda, Yajurveda and that the Atharvaveda and Itihāsaveda are (also) vedas'. It follows that in Kauṭilya's time Itihāsa was a definite work like the three vedas. In another place Kauṭilya provides 'a minister proficient in Arthaśāstras and bent on the good of the king should, by means of itivṛtta (history or historical occurrences) and Purāṇas, admonish (and bring to the right path) a king led astray by other guides.' In laying down a time-table for the king's daily routine of work,[1332] Kauṭilya provides that in the latter part of the day the king should listen to Itihāsa and defines the latter as comprehending Purāṇa, *itivṛtta*, ākhyāyikā (narrations), udāharaṇa (heroic examples), Dharmaśāstra and Arthaśāstra (science of government and statecraft). It appears that Kauṭilya meant by 'Itihāsa' a Mahābhārata more or less very like the extant one, which describes[1333] itself as the best of itihāsas, as a Dharmaśāstra, Arthaśāstra, Kāmaśāstra and as Kārṣṇaveda. Among the officials[1334] to be maintained by the king with salaries are mentioned astrologers, persons conversant with portents and auspicious times, Paurāṇika, Sūta and Māgadha, who were to be paid 1000 (paṇas) as salary. The Dakṣasmṛti,[1335] which is comparatively an early smṛti prescribes the reading of Itihāsa and Purāṇa for all *dvija* house-holders in the 6th and 7th parts of the day (divided into eight parts). The Aṅgirasa-smṛti prescribes that the Vedāṅgas and Purāṇas should be studied in the dark half of the months after Utsarjana (vide Jīv. part I p. 515). When the

1333. अर्थशास्त्रमिदं प्रोक्तं धर्मशास्त्रमिदं महत्। कामशास्त्रमिदं प्रोक्तं व्यासेनामितबुद्धिना। ...इतिहासोत्तमादस्मान्नान्यत्रे कविबुद्धयः। ...अत्यद्भुतानत्र विषये पुराणं पठते द्विजः। आदिपर्व 2. 83, 85-86. In आदिपर्व 62. 23 the महाभारत is called धर्मशास्त्र, अर्थशास्त्र and मोक्षशास्त्र. The मार्कण्डेयपुराण (1. 6-7) describes the Mahābhārata as the śāstra of all the four *puruṣārthas* and as the means of knowing the proper actions for all four varṇas.

1334. सार्वत्रिक-वैमेत्रिक-पौराणिक-चौरणिक-सूतमागधाः इतिहासपुराणाः सर्वव्याख्याश्च सहस्राः। अर्थशास्त्र V. 3 (सूत्रपाठसहितम्) p. 247. चौरणिक means one who studies or knows the purāṇas, acc. to the sūtra 'अधीते वेद' पा. IV. 2. 59.

1335. इतिहासपुराणाभ्यां वेदमभ्यसेत्तु वै। अथ्ये तोषयेत्पित्रं तु पर्वण्यन्यानि सर्वदा॥ कूर्म II. 69; the मत्स्यपुराण I. 213. 158 has the first half.

Manusmṛti[1336] provides that in a śrāddha rite the brāhmaṇas invited for dinner should recite the Vedas, the Dharmaśāstras, stories, Itihāsas, Purāṇas and khila hymns (such as Śrīsūkta), it should be taken as referring to Purāṇa works closely resembling the extant ones. The Yājñavalkya[1337] smṛti enumerates the fourteen Vidyāsthānas (branches of knowledge) and sources of *dharma* as Purāṇa, Nyāya (logic), Mīmāṁsā (rules of Vedic interpretation), Dharmaśāstras, the aṅgas of the Veda and the (four) Vedas. These fourteen are probably arranged in the order of importance and authoritativeness at the time of the Yājñavalkya-smṛti. Yāj. refers to sages that expounded or promulgated the Vedas, Purāṇas, the vidyās (six aṅgas), the Upaniṣads, the ślokas (itihāsa?), aphoristic works (like those of Jaimini or on nyāya), the *bhāṣyas* and whatever other literature exists. In another place Yāj. recommends that a householder after a bath in the morning and worship of gods and pitṛs should engage in japa-yajña, in which he should mutter according to his ability parts of the Veda, of Atharvaveda, Itihāsa and Purāṇas and philosophical texts. These passages from Yājñavalkya establish that Itihāsa and Purāṇa went together, that both were works distinct from Vedic Literature and that both had attained a status of sacredness and authoritativeness in matters of dharma in the time of the Yājñavalkya-smṛti not later than 3rd century (A. D.). A Vārtika mentioned by the Mahābhāṣya on Pāṇ IV. 2. 59-60 provides for the formation of words with the affix 'ṭhak' (*ika*) in the case of ākhyāna (such as Yāvakrītika, Yāyātika), ākhyāyikā (such as Vāsavadattika, Saumanottarika), itihāsa (aitihāsika), Purāṇa (paurāṇika) in the sense of one who studies or knows that.[1338] In numerous passages the Mahābhārata mentions Purāṇa in the singular

1336. स्वाध्यायं श्रावयेत्पित्र्ये धर्मशास्त्राणि चैव हि। आख्यानानीतिहासांश्च पुराणानि खिलानि च॥ मनु III. 232.

1337. पुराणन्यायमीमांसाधर्मशास्त्राङ्गमिश्रिताः। वेदाः स्थानानि विद्यानां धर्मस्य च चतुर्दश॥ याज्ञ० I. 3; यतो वेदाः पुराणानि विद्योपनिषदस्तथा। श्लोकाः सूत्राणि भाष्याणि यच्च किंचन वाङ्मयम्॥ याज्ञ० III. 189; वेदार्थवपुराणानि सेतिहासानि शक्तितः। जपयज्ञप्रसिद्ध्यर्थं विद्यां चाध्यात्मिकीं जपेत्॥ याज्ञ० I. 101. Compare विष्णुपुराण V. 1. 37-38 with याज्ञ० I. 3. Sometimes the branches of knowledge are said to be 18 by adding the four upavedas, viz. आयुर्वेद, धनुर्वेद, गान्धर्ववेद and अर्थशास्त्र, to the 14 mentioned by Yāj. Vide विष्णु० III. 6. 25-26 (about 14 विद्याs and उपवेद) q. by अपरार्क p. 6 and कल्पतरु (ब्रह्मचारि०) p. 22.

1338. आख्यानाख्यायिकेतिहासपुराणेभ्यश्च ठञ्वक्तव्यः। महाभाष्य on 'तदधीते तद्वेद। क्रतूक्थादिसूत्रान्ताड्ढक्'। पा. IV. 2. 59-60. The महाभाष्य gives the examples cited above in brackets.

(as in Ādi 5. 2, 31. 3–4, 51. 6, 65. 52, Udyoga 178. 47–48, Karṇa 34. 44, Śānti 208. 5, Anuśāsana 22. 12, 102. 21) and sometimes Purāṇas in the plural (as in Ādi 109. 20, Virāṭa 51.10, Strīparva 13. 2, Śānti 339. 106, Svargārohaṇa 5. 46–47 (which refers to Purāṇas as 18).[1339] Further, the Matsya-purāṇa and a Purāṇa proclaimed by Vāyu are mentioned in the Vanaparva.[1340] It is impossible to hold that all the numerous references to Purāṇas are later interpolations, though a few may be so. It is not correct to say that no Purāṇa resembling the extant ones existed before the time when Purāṇa stories were collected in the Mahābhārata. There is hardly any evidence to support any such view.

Early Sanskrit authors like Bāṇa (first half of 7th century A. D.) and commentators like Śabara (not later than between 200–400 A. D.), Kumārila (7th century A. D.), Śaṅkarācārya (between 650–800 A. D.) and Viśvarūpa (800–850 A. D.) leave us in no doubt that in their times Purāṇas existed, the contents of which were just like those of the extant Purāṇas. Śabara in his bhāṣya[1341] on Jaimini X. 4. 23, while discussing the question as to what is meant by 'devatā' in relation to sacrifices, states that one view was that they are Agni and others, that are described in the Itihāsa and Purāṇas as dwelling in heaven. Bāṇa in his Kādambarī and Harṣacarita frequently refers to the Mahābhārata and Purāṇas, but two passages from the Kādambarī and one from the Harṣacarita are very interesting. While describing the hermitage of the sage Jābāli Bāṇa employs a *śleṣa* 'there was Vāyupralapita (proclaiming by god Vāyu; babbling due to the windy humour) in Purāṇa (but no babbling in the hermitage)[1342]. Similarly, in the des-

(*Continued on next page*)

cription of the palace of Tārāpīḍa Bāṇa employs a śleṣa (*double extendre*) comparing it with Purāṇa (the two meanings being 'where the accumulated wealth of the world was arranged in appropriate groups', 'in which there is a description of the whole sphere of worlds each part of which was assigned a proper division'). In the Uttarabhāga (by the son of Bāṇa) of the Kādambarī it is stated that in all āgamas (sacred works traditionally handed down) such as Purāṇas, Rāmāyaṇa and Bhārata there are many stories about curses. The placing of Purāṇas first shows that they were probably more honoured or popular than the Rāmāyaṇa and the Bhārata. In the Harṣacarita[1343] it is stated that the book-reader Sudṛṣṭi treated Bāṇa and his relatives and friends to a musical recitation of the Purāṇa promulgated by Vāyu, that was sung by the sage (Vyāsa), that is very extensive, that is world-wide (i.e. known everywhere), that is holy and that is not different from the career of Harṣa (to which also all the adjectives applied to the Purāṇa are applicable). Here it appears that the Vāyu is expressly mentioned (as *Pavamānaprokta* and *Pāvana*) and it is further stated that the Purāṇas contained a description of the several divisions of the world. This description applies to such Purāṇas as the Vāyu, Matsya (chapters 114–128), Brahmāṇḍa (II. 15 ff). It may be argued that the Purāṇa mentioned by Bāṇa may be the Brahmāṇḍa since that Purāṇa says[1343a] in the beginning as well as at the end (IV. 4. 58ff) that Brahmā imparted it to Vāyu, from whom it passed on to several divine and semi-divine personages and ultimately sūta received it from Vyāsa. This latter argument is not acceptable, since there was nothing to prevent Bāṇa from expressly saying that the Brahmāṇḍa was the Purāṇa recited by Sudṛṣṭi.

(Continued from last page)

promulgated by Vāyu (I. 47–48 पुराणं संप्रवक्ष्यामि यदुक्तं मातरिश्वना। पृष्टेन मुनिभिः पूर्वं नैमिषीयैर्महात्मभिः॥). Chapters 34–49 of the वायुपुराण contain भुवनविन्यास; आगमेषु सर्वेष्वेव पुराणरामायणभारतादिषु सम्यगनेकप्रकाराः शापवार्ताः। कादम्बरी, उत्तरभाग (शुकनास's consoling speech to king Tārāpīḍa on hearing of the heart-break of Candrāpīḍa).

1343. पुस्तकवाचकः सुदृष्टिः…"गीत्या पवमानप्रोक्तं पुराणं पपाठ। हर्षचरित III, 4th para; the आर्या verse applicable to both is 'तदपि मुनिगीतमतिपृथु तदपि जगद्व्यापि पावनं तदपि। हर्षचरितादभिन्नं प्रतिभाति हि मे पुराणमिदम्॥ हर्ष॰ III, 5th para. पवन means वायु and so पावन may stand for वायवीय.

1343 a. पुराणं संप्रवक्ष्यामि यदुक्तं मातरिश्वना। पृष्टेन मुनिभिः पूर्वं नैमिषीयैर्महात्मभिः॥ ब्रह्माण्ड I. 1. 36–37.

Kumārilabhaṭṭa in his Tantravārtika refers in several places to the Purāṇas and their contents. A few interesting passages are set out here: On Jaimini I. 3. 1 Kumārila says [1344] 'Therefore the authoritativeness of all smṛtis is established by the purpose which they serve; whatever therein (in smṛtis) is connected with *dharma* and *mokṣa* (is authoritative), because it springs from (is based on) the Veda; whatever concerns wealth (artha) and pleasures is based on the usages of the people. In this way a distinction is to be made. This very reasoning applies to hortatory passages in the Itihāsa and Purāṇas. The Upākhyānas may be explained by the reasoning applicable to arthavādas (i. e. they have a purpose and authoritativeness just like the commendatory passages of the Veda). Narration of the divisions of the earth serves the purpose of distinguishing the regions for undergoing the consequences of the (actions that are the) means of dharma and adharma and are partly based on personal experience and partly on the Veda. The orderly presentation of vaṁśas (dynasties) in the Purāṇas is intended to facilitate the knowledge of the brāhmaṇa and kṣatriya castes and their gotras and is based on actual experience and traditional knowledge; countries and measures of time are intended to facilitate worldly transactions and astronomical needs and are based on actual perception, mathematics, tradition and inference. The narration of what will happen in the future is based on the Veda, since it conveys knowledge of the variety of the ripening of the consequences of (complying with) *dharma* and of *adharma* and knowledge of the characteristics of *yugas* that have been in operation from time immemorial.' It is clear from this passage that the Itihāsa and the Purāṇas that Kumārila knew contained stories, geography of the earth, dynastic lists, measures of time and description of what will happen in the future. These are matters dealt with in the extant Purāṇas. On Jaimini I. 3. 7 Kumārila observes: 'In the

1344. तेन सर्वस्मृतीनां प्रयोजनवती प्रामाण्यसिद्धिः। तत्र यत्तद्धर्मोपकरणवत्तेन तद्धेतुप्रमाण्यम्। यत्पुरुषोपभोगविषयं तल्लोकव्यवहारपूर्वकमिति विवेक्तव्यम्। एवमितिहासपुराणधर्मोपदेशवाक्यानां गतिः। उपाख्यानानि त्वर्थवादेषु व्याख्यातानि। यत्तु भूविभागविभावनं तद्धर्मधर्मसाधनफलोपभोगप्रदेशविवेकाय किंचिद्दर्शनपूर्वकं किंचिद्वेदमूलम्। वंशानुक्रमणमपि ब्राह्मणक्षत्रियजातिगोत्रज्ञानार्थं दर्शनस्मरणमूलम्। देशकालपरिमाणमपि लोकव्यवहारसिद्ध्यर्थं दर्शनस्मृतिसंव्यवहारानुमानपूर्वकम्। भाविकल्पनमपि स्वभावविकल्पवैचित्र्यधर्माधर्मानुष्ठानफलविपाकवैचित्र्यज्ञानहेतोः वेदमूलम्। तन्त्रवार्तिक on जै. I. 3. 1 (सर्वस्य शब्दमूलत्वाद्वस्त्वन्तरेषां स्यात्).

Purāṇas [1345] it is narrated that in the Kali age there will arise Śākya (Gautama Buddha) and others that will cause confusion about *dharma*; who would listen to their words?' This shows that before the 7th century A. D. the Purāṇas contained descriptions of the nature of Kaliyuga and that the Purāṇas Kumārila knew did not regard Buddha as an *avatāra* of Viṣṇu, but rather condemned him. From the facts that Kṣemendra composed his Daśāvatāracarita in 1066 A. D., that Aparārka (on p. 338) quotes a long passage from the Matsya chapter 285, verse seven of which enumerates the ten avatāras of Viṣṇu (including Buddha), and that the Gītagovinda of Jayadeva regards Buddha as an avatāra, it follows that before 1000 A. D. Buddha had come to be regarded as an avatāra of Viṣṇu, though before the 7th century some Purāṇas at least had condemned him. In the discussion of the meaning of the word 'svarga' [1346] Kumārila asks: does it mean the region of the stars or does it mean the top of the Meru (mountain) in conformity with Itihāsa and Purāṇas or does it mean only a state of happiness? This indicates that in Kumārila's day Purāṇas contained descriptions of the top of Meru as 'heaven.'

Śaṅkarācārya in his bhāṣya on the Vedāntasūtra frequently mentions the contents and characteristic features of Purāṇas that are the same as those of the extant ones, though he actually names none of them. For example, on V. S. II. 1. 36 he remarks that it has been established in the Purāṇa that there is no limit to the number of past and future [1347] *kalpas*. On V. S. I. 3.30.

1345. स्मर्यन्ते च पुराणेषु धर्मविप्लुतिहेतवः। कलौ शाक्यादयस्तेषां को वाक्यं श्रोतुमर्हति॥ तन्त्रवार्तिक p. 203 on जै. I. 3.7; some of the Purāṇas such as Varāha 113. 27-28, Brahma 122. 68-70, Padma VI. 31. 13-15 mention the ten avatāras of Viṣṇu (including Buddha). But these Purāṇas have been swollen by late interpolations and it is impossible to give a positive date for these passages.

1346. तथा स्वर्गशब्देनापि नक्षत्रदेशो वा वैदिकप्रवादपौराणिकयाज्ञिकदर्शनेनोच्यते ...यदि वेतिहासपुराणोपपन्नं मेरुपृष्ठम्, अथवा अन्वयव्यतिरेकाभ्यां विभक्तं केवलमेव सुखम् ...। तन्त्रवार्तिक p. 299 on जै. I. 3. 30. That gods and semi-divine beings dwell on the top of Meru is stated in many Purāṇas. Vide मत्स्य 11. 37-38, पद्म V. 8. 72-73.

1347. पुराणे चातीतानागतानां कल्पानां न परिमाणमस्तीति स्थापितम्। last line of भाष्य on वे. सू. II. 1. 36; vide ब्रह्माण्ड I. 4. 30-32 for कल्पs being endless; स्मृतिश्च भवति। तेषां ये यानि कर्माणि प्राक्सृष्ट्यां प्रतिपेदिरे। तान्येव ते प्रपद्यन्ते सृज्यमानाः पुनः पुनः। हिंस्राहिंस्रे मृदुक्रूरे धर्माधर्मावृतानृते। तद्भाविताः प्रपद्यन्ते तस्मात्तत्तस्य रोचते॥ भाष्य on I. 3. 30; these are विष्णुपु० I. 6. 59-60 and वायु 8. 32-33 and repeated in 9.

(*Continued on next page*)

the Ācārya quotes two verses that he designates as smṛti, that are Viṣṇupurāṇa I. 5. 59–60, but are not found in ancient smṛtis like those of Manu or Yāj. On V. S. III. 1. 15 (api ca sapta) the bhāṣya remarks that those who have studied or who know the Purāṇas declare that there are seven hells, Raurava and others, that are regarded as places reached for undergoing the consequences of evil deeds committed by sinners. The Viṣṇupurāṇa enumerates seven hells viz. Tāmisra, Raurava and others, as the places for those who abuse the Veda, who cause obstacles to sacrifices and who give up their proper dharma. Even Manu (IV. 87–90), Yāj. (III. 222–224), Viṣṇu Dh. S. 43. 2-22 enumerate 21 hells and almost all Purāṇas mention 21 or more hells. Vide H. of Dh. vol. IV. pp. 162–164. On V. S. I. 3. 26 and 33 the bhāṣya says that one can see from Vedic mantras, arthavāda passages, Itihāsa and Purāṇa and popular belief that gods have bodies. On V. S. II. 1. 1. Śaṅkarācārya quotes a verse which is the same in Vāyupurāṇa and on I. 3. 30 quotes in all five verses as smṛti, four of which are the same as Vāyu 9. 57–58 and 64-65. Viśvarūpa in his commentary on the Yājñavalkya-smṛti has two interesting notes on Purāṇas. On Yāj. III. 170 which describes the Sāṅkhya theory of the evolution of the world, Viśvarūpa[1348]

(*Continued from last page*)

57–58. Only the half verse हिंसाहिंसे- is found in मनु I. 29; these verses are also found in शान्ति 232. 16–17; अपि च सप्त नरका रौरवप्रमुखा दुष्कृतक्षयोपभोगभूमित्वेन स्मर्यन्ते पौराणिकैः। तानिष्टादिकारिणः प्राप्नुवन्ति। भाष्य on वे. सू. III. 1. 15; तथा सामर्थ्यमपि (देवादीनां) सम्भवति मन्त्रार्थवादेतिहासपुराणेभ्यो विग्रहवत्त्वावगमात्। भाष्य on I. 3. 26; इतिहासपुराणमपि व्याकरणेन मार्गेण सम्बन्धमन्त्रार्थवादमूलत्वात्प्रभवति देवताविग्रहादि साधयितुम्। ...तथा च व्यासादयो देवादिभिः प्रत्यक्षं व्यवहरन्तीति स्मर्यते। भाष्य I. 3. 33; अतश्च सङ्क्षेपमिमं शृणुध्वं नारायणः सर्वमिदं पुराणः। स सर्गकाले च करोति सर्गं संहारकाले च तदत्ति भूयः॥ इति पुराणे। भाष्य on II. 1. 1. This is वायु I. 205 which reads महेश्वरः for नारायणः. On वे. सू. I. 3. 30 the भाष्य quotes three verses as स्मृति, the first two of which are the same as वायु. 9. 64–65 (viz. ऋषीणां नामधेयानि and यथर्तावृतुलिङ्गानि). It appears probable that शङ्कराचार्य quotes from the वायु most of these verses, as he expressly says about one of them (viz. अतश्च &c.) that it is from a पुराण.

1348. एषा प्रक्रिया सृष्टिप्रलयवर्णनादौ सर्वत्र पुराणादिष्वपि &c.। निश्चल's बालक्रीडा on या. III. 170; पुराणे हि भगवतः सवितुर्वह्नौ पीत्वो दिनि पद्मवः श्रूयन्ते तत्रागस्त्यस्थानन्तरा अजवीथी। बालक्रीडा on या. III. 175. III. 175 is पितृणामेऽजवीथ्याश्च यद्यत्स्थानं चान्तरम्। तेनाग्निहोत्रिणो यान्ति स्वर्गकामा दिवं प्रति॥ Compare for a striking resemblance विष्णुपु० II. 8. 85–86 उत्तरं यद्यत्स्थानं अजवीथ्याश्च दक्षिणम्। पितृणाम् स

(*Continued on next page*)

remarks that this theory concerning the creation and dissolution of the world is found everywhere in the Purāṇas. On Yāj. III. 175 which states that the path to the world of the pitṛs lies between the star Agastya (Canopus) and the Ajavīthi, Viśvarūpa remarks that in the Purāṇa several *vīthis* (i. e. courses) of the Sun in the sky are found and that Ajavīthi is immediately contiguous to Agastya.

From the foregoing discussion about the references to Purāṇas contained in writers from Śabara to Viśvarūpa it follows that between about the 2nd century AD. and the 6th or 7th century AD. the Purāṇas exhibited the same contents and characteristics as many of the extant Purāṇas do.

Before proceeding further, it is necessary to say here something about the Yuga-purāṇa, a part of the Gārgī-Saṁhitā, and one of the earliest extant works bearing the title Purāṇas. Kern in his Introduction to the Bṛhatsaṁhitā (pp. 32–40) brought this rare Purāṇa containing valuable historical data to the notice of scholars from a fragmentary ms. Later on K. P. Jayaswal[1348a] published a text of the purely historical material of the Yugapurāṇa in 115 half lines in Anuṣṭubh metre based on the fragment that Kern had got and two more mss. that were secured by him and added a translation and notes. Later on Jayaswal obtained a copy made by Prof. Levi from a ms. (in Bengali script) in the Bibliotheque Nationale of Paris and published in JBORS. (vol. XV pp. 129–133) a table comparing the readings of that ms. with the text he published in JBORS. vol. XIV. Prof. K. H. Dhruva contributed a paper on the text of the Yugapurāṇa to the JBORS. vol. XVI. pp. 18-66, wherein he altered the proper names and gave free scope to his conjectures and inferences with the result that succeeding scholars have not attached any weight to his emendations and remarks. Prof. D. K. Mankad[1348b] published a monograph in which he gave the text of the historical portion based on the mss. utilized

(*Continued from last page*)

वै पन्था वैश्वानरपथाद्बहिः ॥ तत्रासते महात्मान ऋषयो येऽग्निहोत्रिणः ।. विश्वरूप obviously refers to this passage of the विष्णुपुराण or a similar passage in some other Purāṇa such as मत्स्य 124. 53–60, वायु 50. 130. अजवीथि is one of the three divisions of the southern path in the sky in which the Sun, the Moon and planets move, comprehending मूल, पूर्वाषाढा and उत्तराषाढा नक्षत्रs.

1348 a. Vide JBORS vol. XIV. pp. 397–421 on 'Historical data in the Gargasaṁhitā and the Brahmin Empire'.

1348 b. Charutar Prakashan, Vallabhavidyā-nagar, 1951.

by Jayaswal and a fresh ms. that he obtained in Saurāṣṭra, corrects some of the readings accepted by Jayaswal and considerably differs from some of Jayaswal's interpretations and added a few notes.

The Yugapurāṇa is the 113th chapter of Gārgīsaṁhitā and is called Skandapurāṇa in the ms. secured by Prof. Mankad, probably because the Purāṇa starts with a question by Skanda to Śiva about the characteristics of the different *yugas*. The characteristics of Kṛta, Tretā and Dvāpara are respectively described in lines 11–28, 29–45 and 46–74 of Prof. Mankad's text; and lines 75–235 (of Prof. Mankad's text) and lines 1–115 of Jayaswal's text (in JBORS. vol. XIV. pp. 400–408) describe the characteristics of the Kaliyuga, and the political, social and economic history of a few centuries before the work was composed. The characteristics of the Kaliyuga in the Yugapurāṇa bear a very close resemblance to the description of Kaliyuga in the Vanaparva (chap. 188. 30–64), one half verse being the same in both.[1348c]

The important points that emerge are briefly these:—I omit the discussion of different interpretations of Jayaswal, Prof. Mankad and Prof. Narain. Kaliyuga started after Draupadī died. In the beginning of Kaliyuga Janamejaya, son of Parikṣit, would be a famous king but will come in conflict[1348d] with brāhmaṇas. In Kaliyuga, Udāyi son of Śiśunāga, will found the city of Pāṭaliputra on the south bank of the Ganges, which will come to be called Puṣpapura and which will last for five thousand, five hundred and five years, five months, five days and five muhūrtas. In that Puṣpapura there will be a deluded and wicked king called Śāliśūka who will establish at Sāketa his virtuous elder brother named Vijaya. Then the valiant Yavanas,

---

1348c. The passage from Vanaparva 188. 30–64 is quoted in the 3rd vol. of H. of Dh. pp. 1012–13. The half verse is मोघदिनत्वञ्च मुहूर्ता मासपक्षार्धवादिनः । वनपर्व 188.39, line 38 of Jayaswal's text and 110 of Prof. Mankad's text (reads मासपक्षार्धवादिनः, which does not appear correct and yields hardly any sense). Compare Yugapurāṇa (lines 111–115 of Jayaswal and ll. 182–186 of Prof. Mankad's text with Vanaparva 188. 65–66.

1348d. For the story of this quarrel, vide Matsya-purāṇa 50. 56–65. One half line is variously read 'dharma-mitatamā vṛddhā janam bhokṣyanti nirbhayāḥ' (Jayaswal l. 40); Prof. Mankad reads 'dharmabhūtatalāḍhā vṛddhā janam mokṣyanti nirbhayāḥ'. Jayaswal thinks that 'dharmamitā' refers to the Greek king Demetrius. Prof. Mankad does not agree.

Pañcalas and Māthuras will attack Sāketa and will conquer Kusumapura which had a mud fortification. All countries will be disturbed (by this onslaught of the Yavanas). Then non-Aryans will follow the practices of the Aryas. At the end of Kali age brāhmaṇas, kṣatriyas, vaiśyas will dress alike and have the same practices. People will join heretical sects and will make friends for (seducing their) wives. Śūdras will offer oblations into fire with the syllable 'om' and they will address (others) with the word 'bhoḥ' and brāhmaṇas will address others with the words 'O āryas'. The Yavanas will establish five kings in the city (of Puṣpapura). The Yavanas will not stay long in Madhyadeśa. When the Yavanas will vanish there will be seven powerful kings at Sāketa; in Madhyadeśa there would be bloody wars. All the Āgniveśya kings will perish by war and so will the people.

Thereafter the greedy Śaka king will undergo destruction against Sāta, the king of Kaliṅga, and the earth will be devastated and Puṣpapura will be a wilderness. Amlāta called 'red-eyed' will secure Puṣpapura. The Mleccha king Amlāta will destroy the helpless people and the four varṇas. Amlāta with his relatives will perish and then there will be a king called Gopāla who will rule one year and then die. There will then be the just king called Puṣyaka who will rule only one year. After two more kings, Agnimitra will be king who will wage a terrible battle with brāhmaṇas for a girl. After him his son will rule for 20 years. The condition of the people will be very bad because of his fight with Śabaras. Then Sātu king will rule. Then there will be depredations of Śakas who will destroy one-fourth of the population and make the people demoralised. In this way the Yugapurāṇa ends on a dismal note.[1348e]

As the Purāṇa stops with the Śakas and does not dilate on the dynasties of the Andhras, Ābhīras and Guptas, it must be placed earlier than all the known Purāṇas which deal with these dynasties. Jayaswal places the Yugapurāṇa in the latter half of the first century B. C. In the opinion of the present author he is right.

1348 e. देवो द्वादश वर्षाणि अनावृष्टिं करिष्यति। प्रजा नाशं गमिष्यन्ति दुर्भिक्षभयपीडिताः। ततः पापक्षते लोके दुर्भिक्षे रोमहर्षणे। भविष्यति युगस्यान्ते सर्वप्राणिविनाशनम्। जनमारस्ततो घोरो भविष्यति न संशयः॥ युगपुराण; तस्मिन्युगसहस्रान्ते संप्राप्ते चायुषः क्षये। अनावृष्टिर्महाराज जायते बहुवार्षिकी॥ ततस्ताग्यल्पसाराणि सत्त्वानि क्षुधितानि वै। प्रलयं यान्ति भूयिष्ठं पृथिव्यां पृथिवीपते॥ वनपर्व 188. 65-66.

A very recent work 'The Indo-Greeks' by Prof. A. K. Narain (Oxford, 1957) has an illuminating note (pp. 174–179) on several difficult passages of the Yugapurāṇa[1348 f].

Several Purāṇas such as Matsya 53. 3–11, Vāyu I. 60–61, Brahmāṇḍa I. 1.40–41, Liṅga I. 2.2, Nāradīya I. 92. 22–26, Padma V. 1. 45–52 state that Purāṇa[1349] was originally only one, that Brahmā thought of it first, that after that the Vedas proceeded from Brahmā's lips, that originally it had the extent of one hundred crores of ślokas and that the essence thereof to the extent of four lakhs of verses was declared in each Dvāpara age by Vyāsa. It is impossible to say whether the writers of the extant Purāṇas had any ancient tradition about this before them or whether all this about the original existence of a single Purāṇa was purely imaginary. The author holds that the latter view is more likely to be the correct one. It has been shown above that as early as the Taittirīya Āraṇyaka Purāṇas are mentioned in the plural. Therefore, the extant Purāṇas are only the successors of the ancient Purāṇas, about which, it must be admitted, we know very little.

The number of Purāṇas (in later times and by some of the Purāṇas distinguished as Mahāpurāṇas) has been traditionally handed down as eighteen. They are enumerated in several Purāṇas, such as Viṣṇu III. 6. 21–23, Varāha 112. 69–72 (verses 74–77 in Venk. ed.), Liṅga I. 39. 61–63, Matsya 53. 11 ff, Padma IV. 100. 51–54, Bhaviṣya I. 1. 61–64, Mārkaṇḍeya 134. 7–11,

---

1348 f. Vide Appendix I on 'yavana' and 'yona' (pp. 165–169) in Prof. Narain's 'Indo-Greeks.' He points out that in Karṇaparva (45.36) Yavanas are described as all-knowing (sarvajña), valiant and different from mlecchas.

1349. पुराणं सर्वशास्त्राणां प्रथमं ब्रह्मणा स्मृतम् । अनन्तरं च वक्त्रेभ्यो वेदास्तस्य विनिर्गताः । पुराणमेकमेवासीत्तदा कल्पान्तरेऽनघ । त्रिवर्गसाधनं पुण्यं शतकोटिप्रविस्तरम् । प्रवृत्तिः सर्वशास्त्राणां पुराणस्यास्मृतेः । कालेनाग्रहणं दृष्ट्वा पुराणस्य ततो मुनेः । व्यस्यतेऽस्मिन् कृतं संहरामि युगे युगे । चतुर्लक्षप्रमाणेन द्वापरे द्वापरे सदा । तदष्टादशधा कृत्वा मर्त्येऽस्मिन् प्रकाश्यते । अद्यापि देवलोकेऽस्मिन् शतकोटिप्रविस्तरम् । तदर्धेन चतुर्लक्षं संक्षेपेण निवेशितम् । पुराणानि ब्रह्मादौ च सांप्रतं वदिहोच्यते । मत्स्य 53. 3–11; पद्म (V. 1. 45–52) contains almost all the above verses of मत्स्य. The first verse occurs in वायु I. 60–61 and ब्रह्माण्ड I. 1. 40–41. The ब्रह्मपुराण 245. 4 says 'अयं ब्रह्मनिधानं च सर्वशास्त्रफलप्रदम्'. The विष्णुपुराण III. 6. 20 states 'अयं सर्वपुराणानां पुराणं ब्रह्मसम्मितः.' The देवीभागवत I. 3. 3 put मत्स्य as the first.

Agni 272, Bhāgavata [1350] XII. 13. 4–8, Vāyu [1351] 104. 2–10, Skanda (Prabhāsakhaṇḍa 2. 5–7). There is some difference about the 18 names and great difference as to their extent and contents. The Matsya (53. 18–19), Agni 272. 4–5, Nāradīya I. 92. 26–28 enumerate the Vāyu as the 4th among the 18 Purāṇas, while most of the others substitute Śivapurāṇa as the 4th in place of the Vāyu. The Skanda (in Prabhāsakhaṇḍa 2. 5 and 7) puts Śaiva as the 4th in place of Vāyu and Vāyavīya as the last (probably meaning Brahmāṇḍa thereby). The Devībhāgavata[1352] contains a verse naming the 18 Purāṇas by their first letters in which the Śivapurāṇa is omitted. The Saurapurāṇa (chap. 9. 5–12) enumerates the 18 Purāṇas, places Vāyu as the 4th (and not Śiva) and Brahmāṇḍa as the last. The Sūtasaṃhitā (I. 1. 7–11) names the 18 Purāṇas omitting Vāyu and putting Śivapurāṇa in its place. The Dānasāgara in its Introductory verses (11–12 on pp. 2–3) mentions both Vāyavīya and Śaiva separately. In the verses of the Kālikā-purāṇa quoted by Hemādri on dāna I. p. 531, Śiva, Kālikā, Saura and Vahnija (Āgneya, the genuine one) are included among eighteen principal Purāṇas. On the whole I agree with Dr. A. D. Pusalkar [1353] that it is the Vāyu that is entitled to be regarded as one of the 18 principal Purāṇas and not the Śivapurāṇa. Al-beruni in his work on India (com-

1350. The भागवत says 'सुनयोऽष्टादश प्राहुः क्षुल्लकानि महान्ति च ।' XII, 7. 220. The late ब्रह्मवैवर्त (IV. 131. 7–10) states that the five characteristics mentioned in note 1365 distinguish the Upapurāṇas, while the ten characteristics quoted in note 1366 distinguish the महापुराण. विष्णु० III. 6. 13 uses the word महापुराणानि.

1351. Vāyu 104 is a chapter of doubtful authority. Several mss. of Vāyu do not contain it. chap. 104. 7 mentions Vāyu as Anilapurāṇa. Vāyu (104. 2–10) furnishes a list of 18 Purāṇas in which Brahma and Ādika are both included, but no names of Upapurāṇas are given therein.

1352. मद्वयं भद्वयं चैव ब्रत्रयं वचतुष्टयम् । अनापलिंगकूस्कानि पुराणानि पृथक् पृथक् ॥ देवीभागवत I 3. 2. मद्वय = मत्स्य, मार्कण्डेय; भद्वय = भविष्य, भागवत; ब्रत्रय = ब्रह्म, ब्रह्मवैवर्त, ब्रह्माण्ड; वचतुष्टय = वराह, वामन, वायु, विष्णु; अ, ना, प, लिं, ग respectively stand for अग्नि, नारदीय, पद्म, लिङ्ग, गरुड; कू = कूर्म; स्क = स्कन्द. Wilson in Preface to tr. of Viṣṇu at p. XXIV states that his ms. of Varāha omits the Garuḍa and Brahmāṇḍa from the list of 18 Purāṇas and inserts Vāyu and Narasiṃha. The ms. is singular in this respect. The printed Varāha (chap. 112. 69 in the B. I. and verse 74 in Venk. ed.) only puts Śaiva for Vāyu; that is all.

1353. Vide 'Studies in the Epics and Purāṇas of India' by Dr. A. D. Pusalkar (Vidya Bhavan Series, Bombay, 1955) chap. 2, pp. 31–41. The Matsya (53. 18–19) mentions what the Vāyupurāṇa contained.

posed in 1030 A. D.) sets out one list of Purāṇas as read out to him from Viṣṇupurāṇa, which is the same as set out below, except this that the Śaiva-purāṇa is put in the 4th place instead of Vāyu (Sachau's tr. vol. I. p. 131, ed. of 1888). It is clear, therefore, that the list of 18 principal Purāṇas had been completed long before 1000 A. D. and was introduced in the Viṣṇupurāṇa many years before that date. Al-beruni furnishes (*ibid* p. 130) another list of the names of 18 Purāṇas which he had heard, viz. Ādi, Matsya, Kūrma, Varāha, Narasiṁha, Vāmana, Vāyu, Nanda, Skanda, Āditya, Soma, Sāmba, Brahmāṇḍa, Mārkaṇḍeya, Tārkṣya (i. e. Garuḍa), Viṣṇu, Brahma, Bhaviṣya. It should be noticed that in this list Vāyu is included (and not Śaiva), that some purāṇas described in other works as Upapurāṇas are included (viz. Ādi, Narasiṁha, Nanda, Āditya, Soma and Sāmba) and some works almost unanimously declared to be Mahāpurāṇas (such as Padma, Bhāgavata, Nārada, Agni, Liṅga and Brahmavaivarta) are omitted. It follows that some upapurāṇas such as Ādi, Narasiṁha, Āditya, Sāmba, Nanda (Nandī?) had been composed at least some time before 1000 A. D. Bālambhaṭṭa (latter half of 18th century A. D.) states in his commentary on the Mitākṣarā (on Yāj. I. 3) that the Vāyavīya-purāṇa is also called Śaiva.

The following is a table of the 18 principal Purāṇas together with information about the number of ślokas in each.

Order	Name of Purāṇa	Number of verses acc. to Matsya, Vāyu 104 and some others	Number of verses acc. to some other Purāṇas and remarks
1	Brahma	10000 (acc. to Nārada 92.31 and Bhāgavata XII. 13. 4)	25000 acc. to Agni 272. 1
2	Padma	55,000	
3	Viṣṇu	23,000	The number of verses is given from 6 to 24 thousand in various works.
4	Vāyu	24,000	14000 acc. to Agni (272. 4–5), 24600 acc. to Devibhāgavata I. 3. 7.
5	Bhāgavata	18,000	

Order	Name of Purāṇa	Number of verses acc. to Matsya, Vāyu 104 and some others	Number of verses acc. to some other Purāṇas and remarks
6	Nāradīya	25,000	
7	Mārkaṇḍeya	9,000	6900 acc. to Mārkaṇḍeya itself (134. 39), 9000 acc. to Nārada I. 98.2, Vāyu 104. 4
8	Agni	16,000	15400 acc. to Bhāgavata XII. 13.5, 12000 acc. to Agni (272. 10–11).
9	Bhaviṣya	14,500	14000 acc. to Agni (272. 12)
10	Brahma-vaivarta	18,000	
11	Liṅga	11,000	
12	Varāha	24,000	
13	Skanda	81,100	84000 acc. to Agni (272. 17), vide below under Sknda.
14	Vāmana	10,000	
15	Kūrma	18,000	17000 acc. to Nārada I. 106. 3 and Bhāgavata XII. 13. 8; 8000 acc. to Agni. 272. 19,
16	Matsya	14,000	13000 acc. to Agni 272. 20-21
17	Garuḍa	18,000	19000 acc. to Bhāgavata XII. 13.8 and Devībhāgavata I. 3; 8000 acc. to Agni 272.21
18	Brahmāṇḍa	12,200 acc. to Matsya 53. 54	12000 acc. to Bhāgavata (XII. 13-8 and Agni 272.23)

It will be noticed from the table that the total number of verses in the 18 Purāṇas according to the figures furnished by most Purāṇas comes to 400600 ślokas. This closely agrees with the total of four lakhs assigned to the eighteen Purāṇas in some of the Purāṇas (vide note 1349 above). But several of the extant Purāṇas contain much smaller numbers of ślokas than are assigned to them. For example, it appears from the commentaries called Viṣṇucitti[1354] and Vaiṣṇavākūtācandrikā on

1354. विष्णुपुराणं च क्वचिद्दशसाहस्रं क्वचिद्दष्टसाहस्रमित्यादिविकल्पेऽप्यत्र षट्साहस्रमेव व्याख्यायते। वैष्णवाकूतचन्द्रिका of रत्नगर्भभट्ट on विष्णुपु० III. 6. 23; the दान-

(*Continued on next page*)

Viṣṇupurāṇa III. 6. 23 that the estimates of the extent of the Viṣṇupurāṇa varied from 6, 8, 9, 10, 22, 23 to 24 thousand ślokas and that both the commentaries comment on a text of the Viṣṇupurāṇa that has only 6000 ślokas. Similarly, the extent of the Kūrma is said to be 17000 or 18000 ślokas by most of the Purāṇas that furnish the extent of Purāṇas, but the extant Kūrma has hardly 6000 ślokas. The Brahma contains 10000 ślokas according to the Nāradīya and 25000 according to the Agni, but the printed Brahma (of the Anandāśrama ed.) contains about 14000 verses. On the other hand, the Skanda (that has two recensions at present) is said to contain 81000 ślokas, but the Skanda printed by the Venk. Press contains several thousands more. The Bhaviṣya (Brāhmaparva)[1355] states that all Purāṇas had originally 12000 verses each, but their extent increased by the addition of tales, so that the Skanda was inflated to the extent of one lakh of ślokas and the Bhaviṣya to 50000 ślokas. The order in which the Purāṇas are enumerated is not quite uniform. Most Purāṇas put the Brāhma in[1356] the first place and set out the order as in the table above, yet the Vāyu (104. 3) and the Devībhāgavata (I. 3. 3) begin the list of Purāṇas with Matsya. The Skanda (Prabhāsa-khaṇḍa 2. 8–9) puts the Brahmāṇḍa in the first place. The Bhāgavata (XII. 7. 23–24) enumerates the eighteen Purāṇas in a somewhat different order. The Vāmana[1357] regards the

(*Continued from last page*)

सागर (p. 7, verse 63) notes that there was a ब्रह्मपुराण of 23000 ślokas and a लिङ्गपुराण of 6000. The विष्णुचित्तीया says 'वैष्णवं तु षड्भेदं तेन पुराणान्तरेषु वैष्णवस्य दशसाहस्राष्टसाहस्राद्युक्तं संहिताभेदमानविषया कल्प्याः। यथा लैङ्गे। ···शैवमात्स्ययोस्तु वैष्णवं चाष्टसाहस्रमिति। क्वचिदेकेन नवसाहस्रं दृश्यते क्वचिच्चतुर्विंशतिसहस्रं क्वचिद् द्वात्रिंशतिसहस्रम्। इदं तु षट्सहस्रमस्माभिर्व्याख्यायमानम्॥. The दानसागर passage is (p. 7 verses 63–64) 'तार्क्ष्यं पुराणमपरं ब्राह्ममाग्नेयमेव च। त्रयोविंशतिसाहस्रं पुराणमपि वैष्णवम्॥ षट्सहस्रमितं लैङ्गं पुराणमपरं तथा। ···लोकवञ्चनमालोक्य सर्वमेवावधीरितम्॥'

1355. सर्वाण्येव पुराणानि संज्ञेयानि नरर्षभ। द्वादशैव सहस्राणि मोक्षानीह मनीषिभिः॥ पुनर्वृद्धिं गतानीह आख्यानैर्विविधैरुप। यथा स्कान्दं तथा चेदं भविष्यं कुरुनन्दन॥ स्कान्दं शतसहस्रं तु लोकानां ज्ञातमेव हि। भविष्यमेतद्विप्रेण लक्षार्धं संक्षयेण कृतम्॥ भविष्य (ब्राह्मपर्व) I. 103–105.

1356. The विष्णु says for example: 'आद्यं सर्वपुराणानां पुराणं ब्राह्ममुच्यते। अष्टादश पुराणानि पुराणज्ञाः प्रचक्षते॥ विष्णु III. 6. 18; तेपि श्रुत्वा मुनिश्रेष्ठाः पुराणं वेदसंमितम्। आद्यं ब्राह्माभिधानं च सर्वयज्ञफलप्रदम्॥ ब्रह्म 245. 4.

1357. सुरूपं पुराणेषु यथैव मात्स्यं स्वायम्भुवोक्तिस्तथ संहितासु। मनुः स्मृतीनां प्रवरो यथैव तिथीषु वर्षा विबुधेषु वासवः॥ वामनपुराण 12. 48. It may be noted that the Matsyapurāṇa chapter (53 verses 3–4 and 11–57) describing the extent and summaries of the 18 Purāṇas are quoted by Aparārka pp. 392–396 and the Dānasāgara pp. 463–469.

Matsya as the foremost among Purāṇas. Notices of the contents of all the 18 Purāṇas occur in Matsya (chap. 53), Agni (chap. 272), Skanda (Prabhāsakhaṇḍa 2. 28–76), Nāradīya (which devotes 18 chapters from I. 92. 30–43 to I. 109 to the contents of 18 Purāṇas from Brahma to Brahmāṇḍa). There is almost complete agreement among the Purāṇas as to the names of the 18 principal Purāṇas, except as to the Vāyupurāṇa.

The question about the Purāṇas is further complicated by the fact that some of the Purāṇas themselves mention the names of a number of Upapurāṇas, though others ignore them. For example, the Matsya (53. 59–62) names the Nārasiṁha, the Nandi, the Āditya and Sāmba as Upapurāṇas and appears to say that the Nārasiṁha extended to 18000 ślokas and elaborated the description of the Man-Lion *avatāra* declared in the Padmapurāṇa. The Kūrma (I. 1. 16–20), Padma (IV. 111. 95–98), the Devībhāgavata (I. 3. 13–16) set out the names of eighteen Upapurāṇas. Some of the Upapurāṇas bear the same names as those of the principal purāṇas, viz. Skanda, Vāmana, Brahmāṇḍa and Nāradīya. Prof. Hazra[1358] states that the number of Upapurāṇas is 100. Only a few of the Upapurāṇas have been published and those published do not differ much in the matter of subjects from some of the principal purāṇas and almost all belie the definition of Purāṇa as 'pañcalakṣaṇa'. It has been seen above (note 1349) that the number of ślokas in the 18 principal Purāṇas is said to be four lakhs. It must be remembered that this total *does not include* the number of the ślokas assigned to the Upapurāṇas, and no Purāṇa includes the verses of the Upapurāṇas in the total of four lakhs. Further, no one should forget or ignore the significance of the remarks of the

---

1358. Vide Prof. Hazra's paper on Upapurāṇas in ABORI. vol. XXI. pp. 38–62 at p. 49 note. His studies in 'Upapurāṇas, vol. I.' was read by me while this section was in the Press. I have, therefore, been compelled to add only a few matters from this work, mostly in the footnotes. In note 24 p. 13 of his 'Studies' he reiterates that he has collected the names of more than one hundred Upapurāṇas. On pp. 4–13 he sets out 23 sources (six being quotations from Kūrma in different nibandhas) of the lists of Upapurāṇas that exhibit great divergences and chaos. Wilson in his Preface to tr. of the Viṣṇu pp. LXXXVI-XCI mentions the varying lists of Upapurāṇas and offers remarks on some of them. The H. of. DH. vol. I. p. 163 gives the names of the 18 Upapurāṇas as contained in the Garuḍa I. 223. 17–20. Hemādri on Vrata (part 1. p. 21) sets out the names of the 18 Upapurāṇas from the Kūrma I. 1. 16–20 (with readings different from those of the printed Kūrma, some of which are rather serious).

Matsya and Kūrma about the Upapurāṇas. The Matsya[1359] speaks of the Upapurāṇas as sub-sections (upabhedas) of the principal eighteen Purāṇas and emphatically asserts 'know that whatever is declared as distinct from the eighteen Purāṇas came forth (or issued from) these (18)'. The Kūrma is no less clear. It states that[1360] the Upapurāṇas are the summaries or abridgments of the 18 (principal) Purāṇas made by sages after studying them. The lists of Upapurāṇas given by several works, most of which are set out by Prof. Hazra in his paper on Upapurāṇas (in ABORI vol. XXI. at pp. 40–48) and in his Studies (pp. 4–13) diverge a good deal from each other. As the Matsya mentions by name only four Upapurāṇas it is not unreasonable to hold that more than four were not in existence at the time when this passage of the Matsya was inserted in it or at least that more than four had not been accepted as Upapurāṇas at that time. A good many of the Upapurāṇas are of late date. Only a few of the rest such as the Narasiṁha, the Viṣṇu-

1359. उपभेदान् प्रवक्ष्यामि लोके ये संप्रतिष्ठिताः। पाद्मे पुराणे यच्चोक्तं नरसिंहोपवर्णनम्। तच्चाष्टादशसाहस्रं नारसिंहमिहोच्यते। ...अष्टादशभ्यस्तु पृथक् पुराणं यत्प्रदिश्यते। विजानीध्वं द्विजश्रेष्ठास्तदेतेभ्यो विनिर्गतम्॥ मत्स्य 53. 58–59 and 63 q. by हेमाद्रि on व्रत part I pp. 21–22. These verses occur in स्कन्द (प्रभासखण्ड 2. 79–83) also; कु. र. p. 32 explains 'विनिर्गतमुद्भूतम्। यथा कालिकापुराणाद्'. Prof. Hazra in 'Studies &.' vol. I. p. 16 note 33 quotes परिभाषाप्रकाश p. 15 'एतान्युपपुराणानि पुराणेभ्य एव निर्गतानीति याज्ञवल्क्येन पुराणत्वेन सङ्गृहीतानि' and remarks that this implies that the Upapurāṇas were known to Yājñyavalkya. Prof. Hazra is wrong here. All that this passage means is that the Vīramitrodaya in the beginning of the 17th century A.D. (about 1500 years or more after Yāj.) thought that Yāj. included upapurāṇas in the word Purāṇa in Yāj. I. 3. That is Mitramiśra's view, We are not bound by it and should not draw any inference from it, Yāj. mentions only Purāṇa as a source of dharma but he is entirely silent as to how many Purāṇas had been composed in his time. There is nothing to show that they were more than three in his day and it is impossible for us to hold that he included upapurāṇas under the word Purāṇa, simply because some upapurāṇas were composed before 1000 A. D.

1360. अन्यान्युपपुराणानि मुनिभिः कथितानि तु। अष्टादशपुराणानि दृष्ट्वा संक्षेपतो द्विजाः॥ कूर्म I. 1. 16. This verse and the following verses enumerating the 18 Upapurāṇas are quoted by हेमाद्रि on व्रत part I p. 21 (seven), by रघुनन्दन in the मलमासतत्त्व (Jiv. pp. 792–793) and by मित्रमिश्र in the परिभाषाप्रकाश (part of वीरमित्रोदय) pp. 13–14 and other late medieval works of the centuries from the 15th onwards, except हेमाद्रि who belongs to the latter half of the 13th century A. D. One cannot be sure that they are not interpolations in Hemādri. It should be noted that Raghunandana first expressly names only four Upapurāṇas, viz. Nārasiṁha, Nandi, Āditya and Kālikā and then quotes the names of the 18 Upapurāṇas from the Kūrma.

dharmottara, the Devi, can possibly be held to be as old as the 7th or 8th century A.D. I do not accept the view of Prof. Hazra, who places the period of the formation of the group of *eighteen* Upapurāṇas between 650-800 A. D. (in ABORI. vol. XXI. at p. 50 and also in 'Studies in Upapurāṇas' vol. I. by Dr. Hazra), where while admitting (p. 14) that in the Upapurāṇa litarature there are works of comparatively late dates, he boldly states that the age of the Upapurāṇas began approximately from the Gupta period (p. 16). For this last statement there is absolutely no evidence whatever. A detailed discussion of the dates of all the Upapurāṇas would demand a large space and would be somewhat irrelevant in this section. We must hold fast by the facts that even when the 18 principal purāṇas assumed their present form, the number of Upapurāṇas was small, that they were looked upon as no more than abridgments or summaries of the principal Purāṇas, that the Purāṇas that mention upapurāṇas do not state that they were composed by the divinely inspired Vyāsa (but only by some sages as the Kūrma says) and that originally they had not the status or authority of the 18 purāṇas. The Saura, an Upapurāṇa itself, speaks of Upapurāṇas as *khilas* (9. 5). It is only the late medieval digests like the Smṛtitattva (1520–1570 A. D.) or the Vīramitrodaya (first half of 17th century) that were separated by several centuries from the Mahāpurāṇas as well as the Upapurāṇas and the writers of which had practically lost all sense of the distance in time between the two sets of Purāṇas, that say that the mention of Purāṇas[1361] as a source of dharma in Yāj. must be deemed to include Upapurāṇas also. This last may be the opinion of such late writers as Mitramiśra, but no scholar is bound to accept it. It is doubtful whether by the word Purāṇa, Yāj. refers to the Mahāpurāṇas now extant and whether he knows that there were eighteen of them. If some Upapurāṇas glorify themselves as of equal authority with the Mahāpurāṇas, that is of a piece with what the principal Purāṇas state about themselves viz. that Brahmā first thought of the Purāṇas and then the Vedas issued from his lips. Modern scholars should discount all these attempts at self-glorification. Upapurāṇas are due to sages. Upapurāṇas are distinguished from Purāṇas in several important respects. Firstly, the 18 purāṇas are attributed to the semi-divine Vyāsa; secondly, according to both Matsya and Kūrma, they were summaries of the Purāṇas; thirdly, the ślokas in the

1361. एतान्युपपुराणानि पुराणेभ्यो निर्गतानीति याज्ञवल्क्येन पुराणत्वेन सङ्गृहीतानि। परिभाषाप्रकाश (of वीरमित्रोदय) p. 14.

Upapurāṇas are not included in the 4 lakhs of verses of all the Purānas together; fourthly, early commentators and nibandha writers like the Mitākṣarā and the Kṛtyakalpataru either do not mention any of the Upapurāṇas or at the most only about half a dozen or so and that too rather sparingly; and lastly, as Prof. Hazra himself asserts ('Studies', vol. I. p. 23) adherents of various sects such as Śāktas, Sauras, Pāñcarātras interpolated chapters in the Purāṇas of the established group and in some cases wrote new and independent works to propagate their own ideas and styled them Purāṇas.

Early commentaries and digests of Dharmaśāstra very rarely refer to any of the well-known Upapurāṇas. The Mitākṣarā, though it names the Brāhma (on Yāj. I. 3 and 45), quotes passages from the Matsya (profusely), Viṣṇu (on Yāj. III. 6), Skanda (on Yāj. III. 290), Bhaviṣya (on Yāj. III. 6), Mārkaṇḍeya (on Yāj. I. 236, 254, III. 19, 287, 289) and Brahmāṇḍa (on Yāj. III. 30), hardly refers, so far as I know, to any Upapurāṇa. The Kṛtyakalpataru of Lakṣmīdhara (composed about 1110–1130 A. D.), twelve parts of which published in the G. O. S cover several thousand pages, profusely quotes many of the Mahāpurāṇas, and only six of the Upapurāṇas by name, viz. Ādi (only twice on śuddhi), Nandi (profusely only on dāna and niyatakālika), Āditya, Kālikā, Devī, Narasiṁha (all four profusely on several topics). Aparārka (first half of 12th century A. D.) who quotes profusely from Brahma, Brahmāṇḍa, Bhaviṣyat, Mārkaṇḍeya, Vāyu, Viṣṇu and Matsya quotes by name only the following Upapurāṇas and only sparingly viz. Ādi, Āditya, Kālikā, Devī, Nandi, Nṛsiṁha, Viṣṇudharmottara (seven times), Viṣṇurahasya (once), and Śivadharmottara (once). The Dānasāgara[1.62] (written in 1169) states 'Upapurāṇas have been promulgated, which clearly set out the procedure of gifts' and it expressly mentions as Upapurāṇas dealing with gifts the Ādya (Ādi or Brahma?), Āditya, Kālikā, Nandi, Narasiṁha, Mārkaṇḍeya, Viṣṇudharmottara and Sāmba and remarks that the Viṣṇurahasya and Śivarahasya are merely compilations (saṅgraharūpa). It is not necessary to refer to writers later than about 1170 A. D. in the matter of Upapurāṇas.

The references to eighteen Purāṇas in about a dozen principal purāṇas and the description of their contents in some of

1362. उक्तान्युपपुराणानि व्यक्तदानविधीनि च। आद्यं पुराणं साम्बं (सान्वं?) च कालिकाह्वयमेव च॥ भान्दमादित्यसंज्ञं च नारसिंहं तथैव च। मार्कण्डेयकृतं तद्वद्विष्णुधर्मोत्तराह्वयम्॥ शाम्बं च विष्णुधर्माख्यं गोपथब्राह्मणश्रुतिम्॥ दानसागर p. 3-verses 13–15.

them naturally lead to the inference that these passages were added some time after all the eighteen Purāṇas assumed a complete form. It is not possible to hold that all the main purāṇas were composed at the same time by one individual author or even by several contemporary writers. Besides, most of the editions of Purāṇas are based either on a single ms. or on a few mss. collected at random and are not critically edited as is the case with the critical edition of the Mahābhārata published in Poona by the B. O. R. I. Many conclusions therefore, drawn from the current printed editions of the Purāṇas or from mss. of the Purāṇas, must be regarded as merely tentative and as likely to turn out to be wrong. What Winternitz said in his History of Indian Literature (English translation, Calcutta, vol. I. p. 469) viz. 'that the date of each section, nay, sometimes of each single verse in the Mahābhārata must be determined separately' applies with equal (or perhaps greater) force to the Purāṇas, perticularly when one wants to use the section or stanza for historical or comparative purposes.[1363]

It may be conceded that the Purāṇas and some of the available Upapurāṇas also contain many ancient legends and traditions; but these have been so much tampered with and inflated by additions intended to bolster up particular forms of worship and particular tenets that great caution is required before one can recognize them as genuine and reliable representatives for ascertaining the *general state* of Indian society and *beliefs* in ancient and medieval times.

In the opinion of the present writer there is no positive objective evidence for placing any of the upapurāṇas except the Viṣṇudharmottara before the 8th or 9th century A. D. Even in the case of Purāṇas, there have been large interpolations such as verses about the 18 purāṇas, their number and contents. But they contain much ancient material and are far more reliable than most of the Upapurāṇas, having been quoted by writers from 8th and 9th centuries A. D. or even earlier.

The Amarakośa[1364] defines 'Itihāsa' as 'what happened in the past' and 'Purāṇa' as 'what has five signs or characteristics'. It is no doubt true that some purāṇas speak of Purāṇa as

---

1363. Vide Dr. V. S. Sukthankar in Kane Festschrift pp. 472–487 (about the Rāma episode in the Mahābhārata and the Rāmāyaṇa) at p. 474.

1364. इतिहासः पुरावृत्तं ... पुराणं पञ्चलक्षणम्। अमरकोश, शब्दादिवर्ग 4–5.

'pañcalakṣaṇa' and set out the five characteristics[1365] as *sarga* (creation), *pratisarga* (re-creation after dissolution of the world), *vaṁśa* (dynasties of gods, the Sun and the Moon, and the patriarchs), *manvantara* (the vast periods of time that are so called), *vaṁśānucarita* or *vaṁśyānucarita* (deeds and history of the descendants of the solar, lunar and other dynasties). The Bhāgavata[1366] states that ten topics are dealt with by Purāṇas and that some say that they are only five. The ten topics of the Bhāgavata are *sarga, visarga* (dissolution or creation after destruction), vṛtti (modes of subsistence, natural or prescribed for all men by śāstra), *rakṣā* (protection i. e. *avatāras* destroying those that hate the Vedas), *antarāṇi* (i. e. manvataras), vaṁśa, vaṁśyānucarita, *saṁsthā* (four kinds of *laya*), *hetu* (the cause of creation viz. the soul that is subject to avidyā and collects *karma*), *apāśraya* (the refuge of individual souls, viz. *brahman*). The Matsyapurāṇa also mentions other characteristics of Purāṇas viz. in all Purāṇas the four goals of man (puruṣārthas) are described, also the consequences of doing what is opposed to dharma, division of Purāṇas into *sāttvika, rājasa, tāmasa*, the sāttvika and rājasa purāṇas respectively extolling the greatness of Hari and Brahmā, tāmasa Purāṇas extolling Agni and Śiva, the mixed ones extolling the greatness of Sarasvatī and *pitṛs*. The questions addressed by Manu to Keśava (in Matsya 2. 22–24) indicate the subjects that would be dealt with by that Purāṇa viz. creation and dissolution, the *vaṁśas*,

1365. सर्गश्च प्रतिसर्गश्च वंशो मन्वन्तराणि च । वंश्यानुचरितं (v. l. वंशानु°) चैव पुराणं पञ्चलक्षणम् ॥ वायु 4. 10–11, वराह 2. 4, कूर्म I. 1. 12, भविष्य I. 2. 4, मार्कण्डेय 134. 13–14; मत्स्य has पञ्चाङ्गानि पुराणेषु आख्यानकमिति स्मृतम् । सर्गश्च···लक्षणम् ॥ 53. 65; विष्णु reads सर्गश्च··· वंशमन्वन्तराणि च । सर्वेष्वेतेषु कथ्यन्ते वंशानुचरितं च यत् ॥ III. 6 24; अग्नि reads सर्गस्य प्रतिसर्गस्य वंशमन्वन्तरस्य च । वंशानुचरितादेश्च मत्स्यकूर्मो-दिरूपधृक् ॥; वराह observes 'पुराणानां हि सर्वेषामयं साधारणः स्मृतः । श्लोकं चरमि निश्चित्य निःश्रेयं स्वमतः शृणु ॥ सर्गश्च···लक्षणम् ॥ 2. 3–4. सर्ग is dealt with in ब्रह्म chap. 1–3, ब्रह्माण्ड II. 8–13, वायु 4–6, कूर्म I. 2, 4, 7, 8, अग्नि 17 and 20 &c. For प्रतिसर्ग vide ब्रह्म 2. 32–37, ब्रह्माण्ड II. 7, विष्णु I. 2 ff, कूर्म II. 45, वायु 7; वंशs are dealt with in several पुराणs as in वायु 99, विष्णु IV, ब्रह्म 8, ब्रह्माण्ड II.14, कूर्म I.20–25, भागवत IX and XII, अग्नि 18, 273–75, 277–78; for मन्वन्तरs vide विष्णु III. 1–2, ब्रह्म 4–6, वायु 100, ब्रह्माण्ड II. chap. 6. 35–38, कूर्म I. 51, भागवत III and VIII.

1366. पुराणलक्षणं ब्रह्मन् ब्रह्मर्षिभिर्निरूपितम् । शृणुष्व बुद्धिमाश्रित्य वेदशास्त्रानुसारतः ॥ सर्गोऽस्याथ विसर्गश्च वृत्तिरक्षान्तराणि च । वंशो वंश्यानुचरितं संस्था हेतुरपाश्रयः । दशभिर्लक्षणैर्युक्तं पुराणं तद्विदो विदुः । केचित्पञ्चविधं ब्रह्मन् महदल्पव्यवस्थया ॥ भागवत XII. 7. 8–10, verses 11–19 explain the ten lakṣaṇas. हेतुर्जीवोऽस्य सर्गादेरविद्याकर्मकारकः । ये चानुशयिनं प्राहुरव्याकृतमुतापरे । व्यतिरेकान्वयो यस्य आभात्यसदपुष्टिषु । तद्भावभावेषु तद्ब्रह्म जीववृत्तिष्वपाश्रयः ॥ भागवत XII. 7. 18–19.

manvantaras, vaṁśyācarita, the expanse of the world, rules about dānas, śrāddha, varṇas and āśramas, *iṣṭa* and *pūrta*, establishment of images of gods, and everything else.

It is not quite clear why the Amarakośa seized upon the above mentioned five topics as characteristics of Purāṇas, Amarakośa[1367] cannot be placed later than the 5th century A. D. It is likely that before that time the number of Purāṇas was not large, that they had not become very inflated, and that, as Itihāsa and Purāṇa were often lumped together as the 5th Veda in the Upaniṣads, they both had certain matters in common. Itihāsa did not probably deal with creation, dissolution and manvantaras, but contented itself with the dynasties of kings and with the deeds and legends about the heroes of the past. Rarely, Itihāsa (Mahābhārata) is called Purāṇa and some extant Purāṇas describe themselves as Itihāsa. For example, the Vāyu[1368] calls itself in the same context both itihāsa and purāṇa. The Brahmapurāṇa calls itself Purāṇa as well as ākhyāna (245. 27 and 30). The Mahābhārata[1369], though generally called itihāsa by itself (as in Ādi. 1. 19, 26, 54) or the best of itihāsas, still applies to itself the words. 'ākhyāna[1370] (as in Ādi 2. 388–89), Kāvya (Ādi 2. 390), Kārṣṇaveda (Ādi 1. 264) and Purāṇa (Ādi 1. 17). From this it appears that originally the line of demarcation between the two was rather thin. In defining Purāṇa as 'pañcalakṣaṇa' the Amarakośa and some of the Purāṇas seized upon such topics as distinguished Purāṇas from Itihāsa and other branches of Sanskrit literature. It has been

---

1367. In 'India, what can it teach us' (1882) p. 328 Max Muller points out that the Amarakośa was translated into Chinese about 561–566 A.D. Mr. Oak, editor of the Amarakośa with the commentary of Kṣirasvāmin, assigns it to the 4th century A. D. and Hoernle (in J.R.A.S. for 1906 pp. 940–941) on rather slender and far-fetched evidence puts it between 625 A. D. and 950 A. D.

1368. इमं यो ब्राह्मणो विद्यानितिहासं पुरातनम्। शृणुयाच्छ्रावयेद्वापि तथाध्यापयतेऽपि च॥ ... धन्यं यशस्यमायुष्यं पुण्यं वेदैश्च संमतम्। कृष्णद्वैपायनेनोक्तं पुराणं ब्रह्मवादिना। वायु 103. 48, 51; vide also वायु 103. 56 (इतिहास) and 58 (पुराण), ब्रह्माण्ड IV. 4. 47, 50 (which are the same as वायु 103. 48 and 51).

1369. जयो नामेतिहासोऽयं श्रोतव्यो विजिगीषुणा। उद्योग 136.18; जयो नामेतिहासोयं श्रोतव्यो मोक्षमिच्छता। स्वर्गारोहणिक 5. 51; इतिहासोत्तमादस्माज्जायन्ते कविबुद्धयः॥ आदि 2. 385.

1370. अनाश्रित्येदमाख्यानं कथा भुवि न विद्यते। आदि 2. 37 and 388; इदं कविवरैः सर्वैराख्यानमुपजीव्यते॥ आदि 2. 389.

shown above that the Purāṇa and Bhaviṣyatpurāṇa that existed before Āpastamba contained not only sarga and pratisarga but also some smṛti materials as well. From the definition given in the Purāṇas and the Amarakośa it does not at all follow that those five topics alone were the constituent parts of the very ancient *Purāṇas*, as Kirfel holds;[1371] What could be said at the most is that five were the distinctive topics that differentiated the Purāṇa class of works from other branches of literature and probably cognate works called Itihāsa or it may be that the five are generalized as an ideal for Purāṇas and that the very early representatives of this class (that existed before Āp. Dh. S.) had not these five as characteristics.

The extant Purāṇas contain far more subjects than the five. Some Purāṇas barely touch these five and deal at great length with altogether different topics. Only a few of the extant Purāṇas can be said to deal with all the five topics at some length. The five characteristic topics occupy less than three percent of the extent of the extant Mahāpurāṇas. Of all Purāṇas the extant Viṣṇu alone closely agrees with the definition of Purāṇa as 'pañcalakṣaṇa,' though it also contains a good many other topics. On a modest calculation the four subjects of vrata, śrāddha, tīrtha and dāna cover at least one hundred thousand ślokas in the extant eighteen main Purāṇas. Several of them have identical chapters on several topics (e. g. Matsya[1372] and Padma, Vāyu and Brahmāṇḍa contain long passages that agree *verbatim* with one another in many matters and details). It is probable, therefore, that the extant principal Purāṇas are partial and gradually inflated representatives of an earlier group of Purāṇas (not necessarily 18 in number) that

1371. Vide Kirfel's Einleitung p. XX of 'Purāṇa pañcalakṣaṇa'; J. of Veṅkateśvara O. I. vol. VII and at p. 94 for Kirfel's view.

1372. For example, Matsya chapters 55 and 57–60 are the same as Padma V. 24. 64–278, Matsya 62–64 = Padma V. 22. 61–164, Matsya 69–70 = Padma V. 23. 2–146, Matsya 71–72 = Padma V. 24. 1–64, Matsya 74–80 = Padma V. 21. 215–321, Matsya 83–92 = Padma V. 21. 81–213 &c.; Kirfel in 'Purāṇa Pañcalakṣaṇa' (and vol. VII. pp. 84–86 of JVOI) gives a chapter concordance of Brahmāṇḍa and Vāyu and remarks that Brahmāṇḍa I. 27 (of 129 verses) and II. 21–58 (of 2141 ślokas) have nothing corresponding in Vāyu, while Vāyu has 2704 ślokas that do not correspond to anything in Brahmāṇḍa (vide 'Purāṇa Pañcalakṣaṇa' p. XIII and J. V O. I. vol. VII, 1946, p. 87). Kirfel also furnishes a table of chapters that are common to both Brahmāṇḍa and Vāyu (pp. XV–XVI) and vol. VII. pp. 88–90 of JVOI).

existed before Yājñavalkya. In the present state of our knowledge it is almost an insoluble problem to find out what these Purāṇas were or contained. The number 18 was probably due to the fact that the number is prominent in several connections as regards the Mahābhārata. The Bhārata war was fought for 18 days, the total of the vast armies engaged in the conflict came to 18 akṣauhiṇīs, the epic has 18 *parvans*, the Gītā also has 18 chapters.[1373]

The Purāṇas may be classified into several categories, viz. (1) encyclopaedic like the Agni, Garuḍa and Nāradīya, (2) those mainly dealing with tīrthas such as Padma, Skanda and Bhaviṣya, (3) sectarian, such as Liṅga, Vāmana, Mārkaṇḍeya, (4) Historical such as Vāyu and Brahmāṇḍa. The Vāyu, Brahmāṇḍa, Matsya and Viṣṇu are probably the oldest among extant Purāṇas, though they too have received substantial additions from time to time.

There are seven Purāṇas that contain historical material, viz. the ancient dynasties down to the time of the Bhārata war and from the Bhārata war to the downfall of the Andhras and the rise of the Guptas,[1374] viz. Vāyu 99. 250–435, Viṣṇu IV. 20. 12 to IV. 24. 44, Brahmāṇḍa III. 74. 104–248, Bhāgavata IX. 12. 9–16, IX. 22. 34–49 and XII. 17, Garuḍa 140 and 141. 1–12, Bhaviṣya III. 3 and 4 (this account is practically worthless). Matsya contains the fullest list of Āndhra kings and states (273. 16–17) that 29 Āndhra kings will rule for 460 years, while the Vāyu (99. 357–358) states that 30 Andhra kings will rule[1374a] for 456 (406?) years. Both Vāyu (99. 355) and Matsya (373. 16) ('Pulovā' in Vāyu) make Puloma as the last king of the Āndhras. Ptolemy who published his 'Geography of India' about

1373. Vide Otto Stein's paper on the number 18 in 'Poona Orientalist' Vol. I. pp. 1–37.

1374. अनुगङ्गं प्रयागं च साकेतं (तं?) मगधांस्तथा। एताञ्जनपदान्सर्वान् भोक्ष्यन्ते गुप्तवंशजाः॥ वायु 99. 383, ब्रह्माण्ड III.74 195 (reads अनुगङ्गाप्रयागं च and सप्तवंशजाः); भागवत (XII. 1. 37) reads अनुगङ्गामाप्रयागं गुप्ता भोक्ष्यति मेदिनीम्।; विष्णु IV. 24.63 reads उत्साद्याखिलक्षत्रजातिं नव नागाः पद्मावत्यां नाम पुर्यामनुगङ्गाप्रयागं गयादूर्वांश्च मागधा भोक्ष्यन्ति। Vide Pargiter's 'Purāṇa text &c.' p 53 where the passage is set out and variant readings are noted. Vide I. H. Q. vol. XXI pp. 141–143 on 'Purāṇas on the Imperial Guptas' by D. C. Ganguly who criticizes Pargiter's view (pp. XII–XIII in Intro. to Purāṇa texts) and does not agree that the Purāṇa accounts refer to 320–335 A. D.

1374a. 'History of Deccan' by Dr. R. G. Bhandarkar for list of सात वाहन kings (in Bombay Gazetter vol. I, part 2, p. 168).

150 A.D. states that Ptolemaios was king of Baithana (Paiṭhaṇa) in his days (vide J.I.H. vol. 22, 1943, at p. 84 in an article on 'Apostles of Kalyan'. So that these historical references to Āndhras must be a good deal later than 150 A.D. Only four Purāṇas viz. Vāyu, Brahmāṇḍa, Bhāgavata and Viṣṇu mention in a general way that kings of the Gupta dynasty will rule along the Ganges up to Prayāga, Sāketa (Ayodhyā) and Magadha, but no names of Gupta kings are specified. The passages referring to the Guptas are rather corrupt.[1374b] It is argued by Pargiter (in 'Dynasties of the Kali age' p. XII.) and others that Samudragupta was a great conqueror as his Allahabad Praśasti shows (Fleet's 'Gupta Inscriptions' No. 1). Most scholars are agreed that the Gupta dynasty began to rule about 320 A.D. It is argued that, if the reviser or revisers of the Purāṇas had known the brilliant campaigns of Samudragupta they would have named him at least and that therefore the revision of the Vāyu took place between 320-335 A.D.

There is a large mass of Literature dealing with several questions relating to Purāṇas. For those who desire to make a close study of them and wish to be acquainted with the controversies relating to Purāṇas, some of the more important works and papers on the Purāṇas may be mentioned here: H. H. Wilson's Introduction to the English tr. of the Viṣṇupurāṇa, vol. 1. (1864); F. E. Pargiter's 'Purāṇa texts of the dynasties of the Kali age' (1913), 'Ancient Indian genealogies' in Sir R. G. Bhandarkar Presentation volume pp. 107–113, 'Ancient Indian Historical Tradition' (Oxford, 1922); W. Kirfel's 'das Purāṇa Pañcalakṣaṇa' (Bonn, 1927), 'die Cosmographie der Inder' (1920), 'Bharatavarṣa' (Stuttgart, 1931); Vries on 'Purāṇa studies' in Pavry commemoration vol. pp. 482–487 (applies Kirfel's method to the subject of śrāddha in the Brahmāṇḍa, Harivaṁśa, Matsya, Padma and Vāyu); Haraprasad Shastri's descriptive cat. of Mss. at the Asiatic Society of Bengal, vol. V. Preface pp. LXXIII–CCXXV and his paper on 'Mahāpurāṇas" in J. B. O. R. S. vol. XV. p. 323–340; Prof. B. C. Majumdar's paper in Sir Asutosh Mookerji Silver Jubilee vol. III, Orientalia, part 2 pp. 9–30; Dr. A. Banerji Śāstri's paper on

S., Calcutta, vol. 20 pp. 15–38; and many other papers on individual Purāṇas specified at the end of this part; Das-Gupta's Indian Philosophy, vol. III. pp. 496–511 on 'Philosophical speculations of some Purāṇas'; Dr. D. R. Patil's paper on 'Gupta Inscriptions and Purāṇic tradition' (in Bulletin of D. C. R. I., vol. II. pp 2–58, comparing passages from Gupta Inscriptions and Purāṇas); Prof. V. R. Ramchandra Dikṣitar's 'The Purāṇas, a study' (in I. H. Q. vol. VIII. pp. 717–67) and 'Purāṇa Index' in three volumes; Dr. A. D. Pusalkar's paper in 'Progress of Indic Studies' (1917–1942) in Silver Jubilee Volume of BORI. pp. 139–152 and 'Studies in Epics and Purāṇas of India' (B. V. Bombay, 1953); Prof. D. R. Mankad's[1375] papers on 'Yugas' (in P. O.

1375. Prof. Mankad's theories are sometimes extraordinary and advanced without any proper or objective evidence. For example, in his paper in the B. V, vol. VI. he boldly asserts that Śuṅga is a Chinese family name, that Puṣyamitra's ancestors were originally Chinese, that Bhāradvāja is a family of Sāmavedins and that he *believes* that the origin of Sāmaveda is Chinese, as its peculiar total music suggests. When it is a mere matter of *belief* without any evidence being adduced, no arguments can convince such a believer that he is wrong. One of his astounding theories is that each of the kings mentioned in the Purāṇik texts is not a real king, but represents a time unit of forty years.

vol. VI. part 3–4 pp. 6–10), on 'Manvantaras' (IHQ. vol. XVIII. pp. 208–230) and in B. V. vol. VI. pp. 6–10; Dr. Ghurye's Presidential Address in the section on Ethnology and Folklore in Pro. of 9th A. I. O. C. (1937) pp. 911–954; Dr. A. S. Altekar's paper 'Can we re-construct pre-Bhārata-war history?' in J.B.H.U. vol. IV. pp. 183–223 (holding that the various pre-Bhārata-war dynasties mentioned in the Purāṇas are as historical and real as the dynasties of Mauryas and Āndhras and the Paurāṇic genealogies really refer to kings who figure in the Vedic Literature also); Dr. Jadunath Sinha's 'A History of Indian Philosophy' vol. 1 pp. 125–177 on the philosophy of the Purāṇas' (1956); two papers 'on the ancient chronology of India' by R. Martin Smith in J. A. O. S. vol. 77 No. 2 (April–June 1957) and No. 4 Dec. 1957 (He follows Pargiter in his texts).

Some remarks on the important conclusions of Pargiter and Kirfel are necessary. Pargiter tries to construct history from the earliest times to the Bhārata war which he holds to have taken place about 950 B. C. (AIHT, chap. 15 p. 182). He holds that there were two traditions in ancient India, viz. the Kṣatriya tradition and the Brāhmaṇa tradition (AIHT, chap. 5 pp. 58–77). He harps dozens of times on the utter lack of the historic sense among the brāhmaṇas in his work (AIHT), holds that the Purāṇas represent the kṣatriya tradition, that there were three racial stocks, viz. the Mānavas (or Mānvas as he styles them), the Ailas and the Saudyumnas, that respectively represent the Dravidian, the Aryan and Munda (AIHT chap. 25 pp. 289–302), that the Purāṇas are Sanskritizations of works in Prakrit (pp. X–XI) of 'Dynasties of the Kali age'. His date for the Mahābhārata war has not been accepted by later scholars, since his handling of that subject is not judicial, objective or straightforward, but relies too much on his own prejudices and on averages. In his 'Purāṇa texts of the dynasties of the Kali age (pp. 58, 74) he appears to favour the view that the Bhārata war was fought 1050 years before the Nandas i. e. about 1475 B. C. The mss. and the printed Purāṇas give four different periods between the birth of Parikṣit[1376] and

1376. यावत्परीक्षितो जन्म यावन्नन्दाभिषेचनम्। एतद्वर्षसहस्रं तु ज्ञेयं पञ्चदशोत्तरम्॥ विष्णु IV. 24. 32; भागवत XII. 2. 26 reads (आरभ्य भवतो जन्म···सहस्रं तु शतं पञ्चदशोत्तरम्); महापद्माभिषेकात्तु यावज्जन्म परीक्षितः। एतद्वर्षसहस्रं तु ज्ञेयं पञ्चाशदुत्तरम्॥ मत्स्य 273. 35 (reads एवं वर्षं॰), वायु 99. 415 (reads महादेवाभिषेकात्तु), ब्रह्माण्ड III. 74. 227 (reads महानन्दाभिषेकान्तं). श्रीधर commenting on Bhāgavata XII.2.26

(*Continued on next page*)

the crowning of Nanda, viz. 1015 years (Viṣṇu), 1050 years (Vāyu, Brahmāṇḍa and mss. of Matsya), 1115 years (Bhāgavata), 1500 years (some mss. of Viṣṇu and of Matsya). Pargiter himself argues forcefully for the trustworthiness of tradition and Paurāṇika genealogies in R.G. Bhandarkar Presentation volume pp. 107–113 and in AIHT chap. X. p. 119–125. Besides, there is the common experience that the total number of years between one well-known event and another can be easily remembered and handed down even orally for hundreds of years, while handing down hundreds of royal names is a difficult matter and some names may easily drop out. Moreover, the Matsya, Brahmāṇḍa and Vāyu themselves say that they [1377] mention only the *prominent* kings of the Ikṣvāku line and the Bṛhadratha line [1378] and even as to the Paurava [1379] line it is clear that that dynasty had many names not all of which are enumerated. There is therefore every possibility that some kings dropped out even in later genealogies also (as for example Matsya 213. 16, saying that Āndhras were 29 and Vāyu 99. 357 saying they were 30). Merely counting the total of the kings actually named in the Purāṇas would not convey a quite accurate idea of the total length of years during which that dynasty ruled. Bearing in mind the two matters (viz. trustworthiness of tradition and Paurāṇika genealogies and the ease of remembering the time distance between too well-known events) he should have endeavoured to find out the age of the Bhārata War. He brushes aside the statement of the period between Parīkṣit and Nanda as unreli-

---

(*Continued from last page*)

states that in the 9th Skandha the Bhāgavata assigns 1000 years to 20 kings from Mārjāri of the Māgadha line (a contemporary of Parīkṣit), then 5 Pradyotana kings ruled for 138 years, then the Śiśunāgas ruled for 360 years; thus 1498 years passed between Parīkṣit and the crowning of Nanda and therefore he supports the reading of the interval as 1500 years.

1377. एते वैवस्वते वंशे राजानो भूरिदक्षिणाः। इक्ष्वाकुवंशप्रभवाः प्राधान्येन प्रकीर्तिताः॥ मत्स्य 12. 57; एते हीक्ष्वाकुदायादा राजानः शतशः स्मृताः। वंशे प्रधाना एतस्मिन् प्राधान्येन तु कीर्तिताः। ब्रह्माण्ड III. 64. 213–214; एते इक्ष्वाकुदायादा राजानः प्रायशः स्मृताः। वंशे··· कीर्तिताः॥ वायु 88. 213 (as in ब्रह्माण्ड).

1378. अत ऊर्ध्वं प्रवक्ष्यामि मागधेयान् बृहद्रथान्। जरासन्धस्य ये वंशे सहदेवान्वये नृपाः॥ अतीता वर्तमानाश्च भविष्याश्च तथा पुनः। प्राधान्यतः प्रवक्ष्यामि गदतो मे निबोधत॥ वायु 99. 294–295, ब्रह्माण्ड III. 74. 107–109, मत्स्य 271. 17–18.

1379. आसीत्सुधर्मतनयः सार्वभौमः प्रतापवान्। सार्वभौमेति विख्यातः पृथिव्यामेकराड्-बभौ॥ तस्यान्ववाये महति महापौरवनन्दनः। महापौरव पुत्रस्तु राजा रुक्मरथः स्मृतः॥ मत्स्य 49. 71–73, वायु 99. 186–187 (with very insignificant variations).

able simply on the ground (which appears to me flimsy) that the figures (1015, 1050) are discrepant (A. I. H. T. p. 180). In almost all passages of the Purāṇas there is some discrepancy or other. Therefore, he should have made an endeavour to find out which one of the three periods (1015, 1050, 1500) is supported by the best and oldest mss. and should have stuck to them, particularly when the Sanskrit equivalents of the three periods (*pañcadaśa*, *pañcāśat* and *pañcaśata*) are so much alike that scribes might easily have been confused and made their own readings. Even taking the least period of (1015) years, the Mahābhārata War would have to be placed at about 1440 B. C. (adding 1015 to the date of Nanda's enthronement, viz. about 425 B. C.). Most Western writers and Prof. S. N. Pradhan (in 'Chronology of ancient India', Calcutta 1927, pp. 249ff) find fault with Paurāṇika statements and brush them aside as practically worthless. Prof. Pradhan takes the kings actually named in the three lines, holds that 28 years are the average reign period of each and multiplying the number of kings by 28 arrives at the conclusion that the Mahābhārata war was fought about 1150 B.C. It is not possible to deal at length with his arguments. But he ignores the express words of the Purāṇas that they enumerate only the *principal* or *important* kings. Besides, there are scholars like Pargiter who regard 17 or 18 years as the average reign of a king in other countries (and in India also). The author cannot accept Prof. Pradhan's reasoning. Most Western writers are loth to assign old dates to matters Indian. Pargiter is no exception. Instead of straightforwardly accepting one of the three periods that was strongly supported by mss. he indulges in some devices that appear like tricks of jugglery (A. I. H. T. pp. 180–183). His method requires some explanation and examination.

Vyāsa is said to have been alive when the Bhārata battle was fought at the end of the Dvāpara age and he is also held to be the author of the 18 Purāṇas. The kings before the Bhārata war, the Pāṇḍava heroes and a few descendants of them and of some contemporaries of them are treated by the Matsya, Vāyu, Brahmāṇḍa and others as past (*atīta*). Adhisomakṛṣṇa or Adhisīmakṛṣṇa, who[1380] was 6th in direct descent from Arjuna

1380. The genealogy of अधिसीमकृष्ण is as follows: अर्जुन-son अभिमन्यु-son परीक्षित्-son जनमेजय-son शतानीक, then अश्वमेधदत्त, then अधिसीमकृष्ण. Vide वायु 99, 249–258, the last verse being, अधिसीमकृष्णो धर्मात्मा सांप्रतोर्वं महायशाः। यस्मिन् प्रशासति महीं युष्माभिरिदमाहृतम्॥; मत्स्य 50. 55–67 has almost the same words as Vāyu, but states that अधिसीमकृष्ण was son of शतानीक.

(excluding Arjuna) is said to have been alive when the Purāṇas were narrated to the sages at the *sattra*. Both Vāyu (99. 282) and Matsya (271. 5) state that in the Ikṣvāku line king Divākara, 6th (or 5th in Matsya) in descent from Bṛhadbala, was alive at the time when the Purāṇas were narrated. Then the same Purāṇas (Vāyu 99. 30, Matsya 271. 23 and Brahmāṇḍa III. 74. 113) state that in the line of Jarāsandha (ruler of Magadha), who was a contemporary of the Pāṇḍavas and whose son Sahadeva was killed in the Bhārata war, there was Senājit who was a contemporary of Adhisīma-kṛṣṇa and Divākara and who was 7th in descent from Sahadeva. These three are described as *vartamāna* kings in the Purāṇas and all those that came after these three are described as *bhaviṣya*. Pargiter first (AIHT p. 180) takes the total of the kings of the three dynasties, Aikṣvāka, Paurava and Māgadha that are actually named (ignoring what the Purāṇas say viz. that only the principal or important kings are named and *not all*) and the total of the reigns of all these (1408 years), finds that the average of the reign of each king in the three lines works out at such large figures as 47, 50, 31, which he regards as impossible when tested by real historical averages. But he forgets that the Purāṇas say that in the Aikṣvāka, Magadha and Paurava lines and also generally only the prominent kings are mentioned and also that the extant Purāṇas are only fragments left of the originals, since in the Brahmāṇḍa (III. 74) all Paurava and Aikṣvāka kings are altogether lost. Then he takes the total number of kings in ten kingdoms up to Mahāpadma and arrives at the average of 26 kings for each kingdom (AIHT p. 181). Then he says that the average of fourteen series of kings in Eastern and Western countries which he examined comes to 19 years for each reign and, holding that the average in eastern countries is less than in western countries, he arrives at the average of 18 years for each reign (pp. 181–182), which he regards as fair and rather liberal. He then multiplies the average 18 (of length of reigns) by 26 (the average number of kings in ten countries which he supposes to be the only kings in those ten) and arrives at the figure 468 years. He adds these to the date which he assigns to Mahāpadma Nanda 382 B. C. and thus arrives at 850 B. C. as the mean date of the beginning of the reign of Adhisīmakṛṣṇa, Divākara and Senājit, who were *vartamāna* kings. Then he takes five as the average of the kings between the *vartamāna* kings and Yudhiṣṭhira and assigning about 100 years to these 5 kings, arrives at the date 950 B. C. for the Bhārata war. He

discards (AIHT p. 180 n 3) the astronomical evidence contained in the Purāṇas (and the Mahābhārata) about Bhārata war in a single sentence viz. that astronomical statements can have no scientific precision and can only have been formed by estimate at the close. The probable date of the Mahābhārata war has been discussed by the author at some length on materials supplied by the Mahābhārata, the Purāṇas, Varāhamihira, Āryabhaṭa and Inscriptions in vol. III. pp. 895–923 and therefore he does not go into that question here. But he strongly disapproves of the methods of Pargiter and the date he deduces. Later scholars like Kirfel have not accepted the conclusions of Pargiter about two separate traditions and about the Purāṇas being Sanskritizations of originals written in Prakrit and Kharoṣṭhī script (p. XVI. of Intro. to 'Purāṇa Texts &c.'). The importance of another independent source has not been taken proper notice of by Pargiter and even by Kirfel. It appears that about 300 B. C. Megasthenes was supplied with a list of kings from Bacchus to Alexander's time (153 or 154 in number) covering by their reigns a period of 6451 years and three months. Vide 'Ancient India as described by Megasthenes and Arrian' by McCrindle (1877) p. 115 and Cambridge History of Ancient India, vol. I. (1922, p. 409). Even supposing for argument that the account of kings is not trustworthy the fact remains that about 300 B. C. Indians claimed that they had lists of kings that reigned before that date for thousands of years (and not for a few hundred years as Pargiter would have us believe).

It has been shown above that Āpastamba mentions a Bhaviṣyatpurāṇa and quotes four verses from a Purāṇa (p. 817, note 1328). That Bhaviṣyat-purāṇa was probably so called because it contained in a prophetic vein the names and other details of kings that flourished after the Bhārata heroes and after a few generations of descendants of them and their contemporaries and probably purported to have been composed by some sage or by Vyāsa. As the Kali age is said to have started after the Bhārata war, as Parāśara, his son Vyāsa and Vyāsa's son Śuka were regarded as more or less contemporaries of the Pāṇḍavas that lived in the Dvāpara age and as all the 18 Purāṇas are deemed to have been composed by Vyāsa[1381] in the Dvāpara age, the history of the kings of the Kali age from the descendants

1381. अष्टादश पुराणानि कृत्वा सत्यवतीसुतः। भारताख्यानमखिलं चक्रे तदुपबृंहितम्॥ मत्स्य 53. 70.

of Adhisīmakṛṣṇa and his contemporaries downwards has been furnished by the Purāṇas in the form of a prophetic style. It has not been clearly noticed by both Pargiter and Kirfel that the so-called future kings are divided into two groups, viz. the kings of the Aila, Aikṣvāka and Māgadha lines from Adhisīmakṛṣṇa, Divākara and Senājit to the last scions of these lines (such[1382] as Sumitra in the Aikṣvāka line, Kṣemaka in the Aila line) form one group and later kings in the lines of Pradyotas, Śuṅgas, Āndhras, Śakas and others form another group and further that the first group was most probably dealt with in the ancient Bhaviṣya-purāṇa or some other Purāṇa if we rely on Āpastamba, but the other group not having been in existence when the Bhaviṣyat was composed (before 500–400 B. C.) was dealt with by the extant Purāṇas from information received by them apart from the ancient Bhaviṣyat. This is clear from the passages of the Matsya and Vāyu quoted[1383] below. The Matsya says 'After this I shall proclaim those *future* kings in the Aiḍa (Aila), Aikṣvāka and Paurava lines and those with whom those three benign (or virtuous) families will come to an end and I shall enumerate all of these kings that are narrated in the Bhaviṣya. *Other kings different* from the preceding that will arise, such as Kṣatras (? of the

1382. अत्रानुवंशश्लोकोयं भविष्यज्ञैरुदाहृतः। इक्ष्वाकूणामयं वंशः सुमित्रान्तो भविष्यति। सुमित्रं प्राप्य राजानं संस्थां प्राप्स्यति वै कलौ॥ वायु 99.292, मत्स्य 271. 15–16, ब्रह्माण्ड III. 74. 106; अत्रानुवंशश्लोकोऽयं गीतो विप्रैः पुराविदैः। ब्रह्मक्षत्रस्य यो योनिर्वैशो देवर्षिसत्कृतः। क्षेमकं प्राप्य राजानं संस्थां प्राप्स्यति वै कलौ॥ वायु 99. 278, ब्रह्माण्ड III. 74. 265, मत्स्य 51. 88. There is no अनुवंशश्लोक about the last scion of the third line.

1383. अत ऊर्ध्वं प्रवक्ष्यामि भविष्या ये नृपास्तथा। ऐडेक्ष्वाकान्वये चैव पौरवे चान्वये तथा। येषु संस्थास्यते तच्च ऐडेक्ष्वाकुकुलं शुभम्॥ तान्सर्वान् कीर्तयिष्यामि भविष्ये कथितान्नृपान्॥ तेभ्योऽपरेऽपि ये त्वन्ये क्षुत्स्थास्यन्ते नृपाः पुनः। क्षत्राः पारशवाः शूद्रास्तथान्ये ये बहिश्चराः। अन्धाः (अन्ध्राः?) शकाः पुलिन्दाश्च चूलिका यवनास्तथा। कैवर्ताभीरशबरा ये चान्ये म्लेच्छसम्भवाः। पर्यायतः प्रवक्ष्यामि नामतश्चैव तान्नृपान्। अधिसोम(सीम?)कृष्णश्चैतेषां प्रथमं वर्तते नृपः। तस्यान्ववाये वक्ष्यामि भविष्ये कथितान् नृपान्॥ मत्स्य 50. 73–77. Compare वायु 99.266–270 (the only important variants being भविष्ये पठितान्. वर्षायतः for पर्यायतः and भविष्ये तावतो नृपान्). पारशवाः (पार्शवः or पर्शवः) probably stands for a warlike tribe called Parśus. Vide 'पर्श्वादियौधेयादिग्यामणञौ' पा.V. 3 117, from which it appears that Parśu was an आयुधजीविसङ्घ like यौधेय in the times of Pāṇini. Parśus were ancient Persians, as appears from the Behustun Inscription of Darius (522–486 B. C.). Vide 'Select Inscriptions' vol. I. pp. 1–6 ed. by Dr. D. C. Sircar where Pars occurs as the name of a country. The other sense given above does not suit the context. Pulindas were in the Vindhya region and are associated with Andhra in the 13th Rock edict of Aśoka. The अमरकोश says: 'भेदाः किरातशबरपुलिन्दा म्लेच्छजातयः।'.

Kṣatriya class), Pāraśavas (the Parśi tribe or persons born of a śūdra father and brāhmaṇa mother?), Śūdras (as kings) and others that are foreigners, the Andhras, Śakas, Pulindas, Cūlikas, Yavanas, fishermen, Ābhīras and Śabaras and others born of Mleccha (tribes)—these kings I shall proclaim one after another in order and by name. Out of these (two groups) the first is Adhisīmakṛṣṇa who is now alive and I shall speak of the kings of his line that are narrated in the Bhaviṣya'. This passage makes it perfectly clear that in the ancient Bhaviṣyat kings of the three lines of Aila, Aikṣvāka and Paurava to the last of them were enumerated (vide note 1382), but that the later kings like the Āndhras and Śakas were not enumerated therein. I agree with Pargiter (p. VIII. in Intro. to 'Purāṇa Texts' &c.) that the words 'Bhaviṣye kathitān' in Matsya (50. 77) or 'Bhaviṣye paṭhitān' in Vāyu (in 99.292) refer to the descendants mentioned in the Bhaviṣya and that they do not simply mean 'mentioned in future.' I fail to understand, however, why he regards 'Bhaviṣyat' as a perversion of 'Bhaviṣya'. Bhaviṣyat is as good a word as Bhaviṣya, being employed in several passages such as Varāha (177. 34), Matsya (53. 62).

Pargiter probably wants to identify the Bhaviṣyat of Āpastamba with the Bhaviṣya of later times. There is no evidence except the name to identify the two. It, therefore, appears that the extant Purāṇas base their narrative as to the three lines of Aila, Aikṣvāka and Paurava kings on the materials contained in the ancient Bhaviṣya and as to other lines and comparatively later kings they relied on other materials or oral traditions that they could collect. This inference receives support from other circumstances. The extant Purāṇas quote verses called Anuvaṁśa ślokas or gāthās about ancient kings, such as Kārtavīrya (in Vāyu 94. 20, Matsya 43. 24, Brahmāṇḍa III. 68-20, Brahma 13. 17) and also about the last scions of the Aila and Aikṣvāka lines, viz. Sumitra and Kṣemaka. But so far as kings of comparatively later dynasties such as those of the Āndhras, Śuṅgas and others are concerned, no such gāthās or ślokas are quoted in the Purāṇas. There is absolutely no evidence to hold, as Pargiter does (p. XIII of 'Purāṇa Texts' &c.), that the ancient Bhaviṣya contained a reference to the Guptas. The ancient Bhaviṣya was composed before Āpastamba (i. e. before the 4th or 5th B. C.) and hence originally could have contained no reference to the Guptas (whose rule began about 320 A. D.). The Matsya does not refer to the Guptas and mentions only the

downfall of the Āndhras. Therefore, the Matsya should be regarded as composed or revised about the middle (or end) of the 3rd century A. D., though the possibilities of some chapters or verses being added after that date cannot be ruled out. When the Vāyu (99. 383), Brahmāṇḍa (III. 74. 195), Viṣṇu (IV. 24. 18) and Bhāgavata (XII. 1. 37) mentioned the Guptas as rulers the first two probably added these passages just about the time when Gupta rule began and the Viṣṇu and Bhāgavata (which present a corrupt text) might have borrowed the information from mss. of Vāyu or Brahmāṇḍa. It is clear, however, that the first two (out of the four) Purāṇas were composed or revised about 320-335 A. D. and the other two later still.

Kirfel's work 'Purāṇa Pañcalakṣaṇa' is one of fundamental importance so far as the Purāṇas are concerned, since it adopts a new method for the treatment of Paurāṇika material. The German Introduction of this work has been reproduced in English in the Journal of the Shri Veṅkaṭeśa Institute at Tirupati, in vol. VII. pp. 81-121 and vol. VIII. pp. 9-33. Kirfel disagrees with many of the views of Pargiter. His main conclusions are: Apart from the abridgement in Agni and Garuḍa as well as the prose paraphrase in Viṣṇu, there are only three complete groups of Purāṇa texts viz. Brahma and Harivaṁśa, Brahmāṇḍa and Vāyu, and that of Matsya, all other Purāṇas containing only smaller or larger parts of the same. Of the three groups, Brahmāṇḍa and Harivaṁśa are the oldest (and not Brahmāṇḍa and Vāyu as Pargiter in A.I.H.T. p. 78 says). Kirfel holds that the Brahmāṇḍa and Vāyu must have originally been a single Purāṇa, particularly because the largest parts of both agree with each other, that Pargiter is not right in thinking that the additions in Vāyu and Brahmāṇḍa were borrowed from the ancient Bhaviṣya (Kirfel p. 18, vol. VII. of J. V. O. I. p. 92), but that the borrowed material goes back to an independent text. Kirfel does not accept Pargiter's theory that the Purāṇas were Sanskritizations of Prakrit texts, that the Viṣṇu in its existing form is a younger Purāṇa than the Vāyu or Brahmāṇḍa in spite of the fact that it most faithfully observes the basic arrangement of the five characteristics of Purāṇas. The division of Purāṇas into 18 and the distribution of Purāṇas into *sāttvika*, *rājasa* and *tāmasa* are not original items but are applicable only to the last definitive texts of the Purāṇas. Pargiter thought that there existed an Ur-Purāṇa which had treated of the five topics (of sarga &c.) in ideal completeness and clear disposition. Kirfel

says that this is scarcely more than an arbitrary assumption (p. XLVIII of Kirfel's Intro. and J. V. O. I. vol. VIII, p. 31).

The present author may tentatively accept most of the conclusions of Kirfel, but he differs as stated above from Kirfel's view that the five characteristic topics (*sarga &c.*) are the oldest constituent parts of the whole Purāṇa Literature.

A lengthy discussion of the age of the Purāṇas is not very relevant to the subject of this section. But it would not be entirely out of place if the author said a few words thereon.

The author's position about the Purāṇas is as follows: We know hardly anything about the Purāṇa mentioned in Atharvaveda, the Śatapatha and the ancient Upaniṣads; but this much is clear that Purāṇa had attained a status of sacredness like the Vedas and was closely associated with Itihāsa even in Vedic times. This is the first stage in the evolution of Purāṇa Literature, but we know nothing about the contents of the Purāṇa in those ancient times. The Tai. Ā. mentions *Purāṇāni*; therefore in its time there must have been three Purāṇas at least. As Āp. Dh. S. quotes four verses from a Purāṇa and expressly names Bhaviṣyatpurāṇa, it follows that by the 5th or 4th century B. C. at the latest there was in existence a Bhaviṣyat-purāṇa and other Purāṇas or a Purāṇa, that contained sarga and pratisarga and some Smṛti material. This we may regard as the 2nd definite stage of Purāṇa Literature, of the contents of which we have some traces at least.

The Mahābhārata quotes hundreds of verses (called *ślokas, gāthās, anuvaṁśa* ślokas), some of which have a bearing upon Paurāṇika subjects and have a Paurāṇika ring. Some examples may be cited. The Vanaparva[1384] quotes two verses about the spiritual prowess of Viśvāmitra and about his assertion that he was a brāhmaṇa. The Anuśāsanaparva[1385] quotes certain

---

1384. यत्रानुवंशं भगवान् जामदग्न्यस्तथा जगौ। विश्वामित्रस्य तां दृष्ट्वा विभूतिमति-मानुषीम्॥ कान्यकुब्जेऽपिबत्सोममिन्द्रेण सह कौशिकः। ततः क्षत्रादपाक्रामद् ब्राह्मणोस्मीति चाब्रवीत्॥ वनपर्व 87. 17–18. Brāhmaṇas alone were entitled to drink soma in a Vedic sacrifice and not Kṣatriyas. Vide H. of Dh. vol. II, p. 1179.

1385. गाथाश्चाप्यत्र गायन्ति पितृगीता युधिष्ठिर। सनत्कुमारो भगवान्पुरा मह्यमभाषत॥ अपि नः स कुले जायाद्यो नो दद्यात्त्रयोदशीम्। मघासु सर्पिःसंयुक्तं पायसं दक्षिणायने। आजेन वापि लौहेन मघास्वेव यतव्रतः। हस्तिच्छायासु विधिवत्कर्णव्यजनवीजितम्॥ एतस्या बहवः पुत्रा यद्येकोऽपि गयां व्रजेत्। अनुशासन 88. 11–14. Compare विष्णुपु० III. 16. 17–20, ब्रह्माण्ड III. 19. 10–11, वायु 83. 10–12, all of which have the half verse अपि नः··· शीम् as in अनुशासन. विष्णु and ब्रह्माण्ड add one half verse 'गौरीं वाप्युद्वहेत्कन्यां नीलं वा वृषमुत्सृजेत्'.

gāthās said to have been sung by the pitṛs about the importance of a son or sons, which agree in letter and spirit with verses on the same subject in the Purāṇas. In the Udyoga-parva[1386] Bhīṣma is said to have addressed a verse to Paraśurāma that was sung by Marutta and declared in a Purāṇa. In the Purāṇas also there are frequent quotations of ślokas,[1387] gāthās and anuvaṁśaślokas sung by people described as *Paurāṇika* (in Vāyu 70. 76, 88. 114–116, 88. 168–169, Brahmāṇḍa III. 63. 69–70) or as *purāvidāḥ* or *purāṇajñāḥ* in Vāyu, 88. 171 and 95. 19, Brahmāṇḍa III. 63. 171). Vāyu (93. 94–101) mentions several gāthās as sung by Yayāti, most of which occur in the Ādiparva 75. 50–53 and 85. 12–15, Brahmāṇḍa III. 68. 96–103 and in other purāṇas also. It is quite possible that these gāthās and ślokas said to have been declared by those who knew Purāṇas were taken from the Purāṇa or Purāṇas known to Āpastamba. As Yāj. I. 3 regards Purāṇa as one of the sources of dharma, it follows that some Purāṇas containing smṛti material must have been composed a good deal before that smṛti i. e. before the 2nd or 3rd century A. D. at the latest. This is the third stage in the evolution of Purāṇas. It is difficult to say when the extant Matsya was originally composed but it was revised about the middle (or close) of the 3rd century A D., since it speaks of the downfall of the Āndhra dynasty, but does not refer to the Guptas. But it is possible that the original kernel of the Matsya may be earlier than this by a few centuries. The same applies to Vāyu and Brahmāṇḍa. The Vāyu and Brahmāṇḍa also were compiled or added to about 320–335 A. D., since they refer to the Guptas but do not name any Gupta king. These two in their present form may also be referred to this third stage. Most of the Mahāpurāṇas were composed or completed in the period from the 5th

---

1386. अयं चापि विशुद्धात्मन् पुराणे श्रूयते विभो । मरुत्तेन महाबुद्धे गीतः श्लोको महात्मना ॥ गुरोरप्यवलिप्तस्य कार्याकार्यमजानतः । उत्पथप्रतिपन्नस्य परित्यागो विधीयते ॥ उद्योग 178. 47–48. The cr. ed. has a wavy line below पुराणे and reads 'कार्यं भवति शासनम्' with a wavy line for परि···यते. This verse 'गुरो &c.' is शान्तिपर्व 140. 48 and is also शान्ति 57. 6–7, where it is said that it occurred in बृहस्पतिमत. आदिपर्व 140. 54 has this verse but reads the last पाद as न्याय्यं भवति शासनम् ।.

1387. भविष्यं कीर्तयिष्यामि शन्तनोस्तु निबोधत । ···इदं चोदाहरन्त्यत्र श्लोकं प्रति महाभिषक् (भिषम्) । यं यं कराभ्यां स्पृशति जीर्णं रोगिणमेव वा । पुनर्युवा च भवति तस्मात्तं शन्तनुं विदुः ॥ मत्स्य 50. 41–43, वायु 99. 238. The verse यं यं contains a popular etymology of the word शन्तनु. The word भविष्यं should mean only भविष्य-पुराण, since it is the सूत who says this and शन्तनु was a king anterior to सूत by some generations.

or 6th century A. D. to the 9th century A. D. This represents the 4th stage in the evolution of Purāṇa literature. The Upapurāṇas began to be compiled from about the 7th or 8th century A. D. and their numbers went on increasing till about the 13th century A. D. or even later. This is the last phase. Thus there is enough evidence to hold that the Purāṇas began to influence Hindu society a few centuries before Christ, that their influence continued in full force till the 17th or 18th century A. D. and that it continues to some extent even now. After the 9th century no further Mahāpurāṇas appear, but additional matter appears to have been unscrupulously inserted in several Purāṇas, the worst example of the kind being the third part of the Bhaviṣya, which contains stories of Adam and Eve, of Pṛthvīrāj and Jaicandra, Taimur, Akbar, Caitanya, Bhaṭṭoji, Nadirshah and so on.

The word 'purāṇa' occurs over a dozen times in the Ṛgveda, is an adjective and means 'ancient, old'. The Nighaṇṭu (III. 27) mentions six Vedic words as having the sense of 'purāṇa' viz. *pratnam, pradivaḥ, pravayāḥ, sanemi, pūrvyam, ahnāya.* Yāska (Nirukta III. 19) derives the word 'purāṇa' as 'purā navam bhavati' (what was new in former times). The Ṛgveda does not contain the word 'purātana' (ancient). Purāṇa may be a very old form of 'purātana' through the intermediate form 'purāaṇa.' From meaning ancient the word 'purāṇa' came to mean a work dealing with ancient tales; it became a noun and was applied in the times of the Atharvaveda, the Śatapatha and the Upaniṣads to a class of works containing ancient tales. When purāṇa came to mean a work dealing with ancient tales, to speak of a Bhaviṣyat-purāṇa was apparently a contradiction in terms. That contradiction was probably not minded or was ignored by the thought that works that narrated old tales gradually came to include comparatively recent ones and had therefore to adopt a prophetic style of composition with reference to the latter.

The Vāyu[1388] derives the word 'Purāṇa' from 'purā' (in ancient times, formerly) and the root 'an' (to breathe or live), and therefore according to it the word literally means 'that which lives in the past' or 'that which breathes ancient times'.

1388. यस्मात्पुरा ह्यनतीदं पुराणं तेन तत्स्मृतम्। निरुक्तमस्य यो वेद सर्वपापैः प्रमुच्यते। वायु I. 203; पुरा परम्परां वष्टि पुराणं तेन वै स्मृतम्। पद्म V. 2. 53; the ब्रह्माण्ड I. 1. 173 has यस्मात्पुरा ह्यभूच्चैतत्पुराणं तेन तत्स्मृतम्। निरुक्त...मुच्यते॥

The Padmapurāṇa propounds a slightly different etymology, viz. "it is called Purāṇa because it desires or likes the past" from 'purā' and the root 'vaś' (to desire or to like).

The question why the extant Purāṇas do not narrate the traditions about the dynasties of the Guptas and their successors cannot be satisfactorily answered. One reason may be that the original kernel of some Purāṇas like the extant Matsya were compiled before the Guptas rose to power, while others like the Vāyu and Brahmāṇḍa were compiled while the Gupta rule was in its infancy. Another reason may have been that in the 5th and following centuries when many of the extant Purāṇas were compiled northern India was very much disturbed by the invasions of foreigners like the Hūṇas, [1389] Toramāṇa and Mihirakula, numerous sects and schisms had arisen, Buddhism had become powerful and therefore the first task of the intelligent and devout followers of the Veda was held to be to wean the common people away from schisms like that of Buddha, to lay down the foundations of a new ideology among the masses and to emphasize and assimilate as many of the doctrines of the sects and schisms as possible with their ancient traditions and practices. The intelligent classes, therefore, emphasized the importance of such virtues as ahiṁsā, satya, bhakti and of vratas, pilgrimages, śrāddhas and dānas and were probably not in a mood to record the names of foreign conquerors or of small chieftains fighting with each other and unable to repel the cruel invaders. For the absence of references to the dynasties of the Guptas and their successors, Pargiter blames the brāhmaṇas in the following characteristic passage (AIHT chap. 4 p. 57) 'the absolute dearth of traditional history after that stage is quite intelligible, both because the compilation of the Purāṇa had set a seal of tradition and because the Purāṇa soon passed into the hands of brāhmaṇas who preserved what they had received, but with the brahmanic lack of the historic sense, added nothing about the later kings'. Supposing for argument that brāhmaṇas lacked the historic sense, Pargiter's opinion appears to be entirely one-sided. He assigns no reason why the sūtas, whose business was to record and preserve historic tradition (as he himself says on p. 58 of AIHT), did not stick to their business and did not continue to compose genealogies of

1389. For the history of the ruthless Hūṇa invader Mihirakula, vide Gupta Inscriptions pp. 143–148 and 149 ff (Mandasor Inscription of Yaśodharman) and pp. 924–25 note 1788 a, of vol. III. of H. of Dh.

later kings and to add further items of history to already existing recorded tradition, nor does he explain how the sūtas could be ousted or allowed themselves to be ousted from their age-old avocation by the brāhmaṇas. It is probable that foreign dynasties like that of Kaniṣka and the Hūṇas did not encourage the sūtas who had sunk low in the social scale and the sūtas probably became Buddhists, as Buddhism with its Jātaka stories gave to all persons following a bardic profession sufficient scope for earning their livelihood.

The legends about Vyāsa and Sūta may be briefly considered. The Purāṇas declare that Vyāsa was the son of Parāśara, was also called Kṛṣṇa Dvaipāyana and was an incarnation of Viṣṇu (of Brahmā also in Vāyu 77. 74–75 and of Śiva in the Kūrma II. 11. 136). He was called Dvaipāyana[1390] because he was born on an island (dvīpa) in the Yamunā river and Kṛṣṇa because he was of dark complexion. His mother was Satyavatī and son was Śuka. He was called Vyāsa because he is supposed to have divided or arranged the one Veda into four parts (from the root 'as' 4th conjugation 'to throw' with the upasarga 'vi'). He instructed four disciples in the four Vedas, viz. Paila, Vaiśampāyana, Jaimini and Sumantu respectively in Ṛgveda, Yajurveda, Sāmaveda and Atharvaveda. His 5th disciple was Sūta Romaharṣaṇa to whom was imparted Itihāsa-Purāṇa. The son of Sūta was Sauti who narrated the Mahābhārata to Śaunaka and other sages in the Naimiṣa forest. It was believed that whenever *dharma* and Veda declined Vyāsas were born for the benefit of men (Brahma 158. 34). The Kūrma (I. 52. 1–9) sets out 27 names of different Vyāsas, while Vāyu (23. 115–219), Brahmāṇḍa (II. 35. 116–125), Viṣṇu[1391] (III. 3. 11–19)

1390. अस्मिन्युगे कृतो व्यासः पाराशर्यः परन्तपः (परन्तप?)। द्वैपायन इति ख्यातो विष्णोरंशः प्रकीर्तितः॥ ब्रह्मणा चोदितः सोऽस्मिन्वेदं व्यस्तुं प्रचक्रमे। अथ शिष्यान् स जग्राह चतुरो वेदकारणात्॥ ...ऋग्वेदग्राहकं पैलं जग्राह विधिवद् द्विजम्। यजुर्वेदप्रवक्तारं वैशम्पायनमेव च। जैमिनिं सामवेदार्थं ग्राहकं सोऽप्यपद्यत। तथैवाथर्ववेदस्य सुमन्तुमृषिसत्तमम्। इतिहासपुराणस्य वक्तारं सम्यगेव हि। मां चैव प्रतिजग्राह भगवानीश्वरः प्रभुः॥ वायु 60.11–16, ब्रह्माण्ड II. 34. 11–16 (almost in the same words). Compare विष्णु III. 4. 7–10, कूर्म I. 52. 12-15, विष्णुधर्मोत्तर I. 74. Kūrma I. 51. 48, Padma V. 1. 43, Bhāgavata I. 4. 14–25 and XII. 6. 49–80 and Nāradīya I. 1. 18 identify him with Nārāyaṇa. The आदिपर्व corroborates the Purāṇa statements: विभ्यासैकं चतुर्धा यो वेदं वेदविदां वरः। आदि 60. 2 and 5; यो व्यस्य वेदांश्चतुरस्तपसा भगवानृषिः। लोके व्यासत्वमापेदे काण्ण्यात्कृष्णत्वमेव च। आदि 105. 15.

1391. द्वापरे द्वापरे विष्णुर्व्यासरूपी महामुने। वेदमेकं सुबहुधा कुरुते जगतो हितः॥ वीर्यं तेजो बलं चाल्पं मनुष्याणामवेक्ष्य च। हिताय सर्वभूतानां वेदभेदान् करोति सः॥ विष्णु III. 3. 5–6.

enumerate the names of the 28 Vyāsas of the 28 Dvāpara ages of the Vaivasvata Manvantara (which is the current one). How Vyāsa put together the Purāṇas is described in several Purāṇas 'He who was an adept in the meaning of Purāṇa composed a Purāṇa-saṁhitā from (the material supplied by) tales, episodes, gāthās (stanzas) and correct ascertainment or descriptions of Kalpas'.[1392] This shows that, while the Vedic texts were preserved with unparalleled care by the brāhamaṇas, the very ancient Itihāsa-purāṇa, though called the 5th Veda, was not kept intact with care similar to that bestowed on the four Vedas and that this fifth Veda was allowed to be inflated by fresh additions from time to time.

In connection with Vyāsa's legendary role as an arranger of the Veda, Pargiter has a theory of his own which must be briefly noticed and examined. He develops that theory on pp. 9–10 of A. I. H. T. He refers to the Ṛgveda as the greatest brahmanical book, says that it is a compilation of hymns composed by many authors and is arranged according to certain principles. His words are 'It (Ṛgveda) must manifestly have been compiled and arranged by some one or more persons, yet Vedic Literature says absolutely nothing about this. The brāhmaṇas cannot have been ignorant about it, for they preserved it and its text with unparalleled care. ...Vedic Literature professes to know and declares the names of the authors of nearly all the hymns and even of single verses, yet it ignores all knowledge of the person or persons who afterwards compiled and arranged these hymns. To suppose that when it preserved the earlier information it was ignorant of the later work in so vital a matter is ridiculous.' From this silence in the Vedic Literature about the persons that compiled and arranged the Ṛgveda, Pargiter at once jumps to the positive and emphatic conclusion, as is usual with many western writers on Sanskrit Literature and Indology to argue from silence, that 'Vedic Literature has deliberately suppressed all information on these matters' (AIHT p. 9). He refers to the fact that the Mahābhārata and Purāṇas are full of Vyāsa and repeatedly declare that the Veda was arranged by Vyāsa and points out that Vedic Literature is

---

1392. आख्यानैश्चाप्युपाख्यानैर्गाथाभिः कल्पशुद्धिभिः। पुराणसंहितां चक्रे पुराणार्थविशारदः॥ विष्णु III. 6. 15, ब्रह्माण्ड II. 34. 21 (reads कल्पजोक्तिभिः), वायु 60. 21 (reads कुलकर्मभिः). कल्पजोक्तिभिः would mean 'words or descriptions relating to Kalpas (vast periods of time)'. The com. on विष्णुपुराण explains 'स्वयं दृष्टार्थकथनं प्राहुराख्यानकं बुधाः। श्रुतस्यार्थस्य कथनमुपाख्यानं प्रचक्षते॥'

remarkably reticent about Vyāsa Pārāśarya (who is mentioned as a pupil of Viṣvaksena in the Vaṁśa list at the end of the Sāmavidhāna Brāhmaṇa and in the Taittirīya Āraṇyaka) and then he reiterates his charge of the conspirary of silence about Vyāsa (AIHT. p. 10). Pargiter is ready with a reason for the supposed conspiracy of silence viz. 'the brāhmaṇas put forward the doctrine that the Veda existed from everlasting; hence to admit that any one had compiled or even arranged it struck at the root of their doctrine and was in common parlance to give their whole case away' (*ibid.* p. 10).

Several objections can be raised against the positive assertion of deliberate and fraudulent suppression inferred from mere silence. In the first place, Pargiter is very loose in his statement of facts. Pargiter totally ignores that even in the Ṛgveda itself, ṛk verses, yajus texts and sāman chants are differentiated. To give only a few references, vide for Ṛks (Ṛg. II. 35. 12, V. 6. 5, V. 27. 4, V. 44. 14–15), in both verses of the last ṛk and sāmans being separately mentioned; for *yajus vide* Ṛg. V. 62. 5, X. 181. 3); for sāman chants *vide* Ṛg. II. 43. 2 (*udgāteva śakune sāma gāyasi*), VIII. 81. 5 (*śravat sāma gīyamānam*), VIII. 95. 7 (śuddhena *sāmnā*).

The epic and purānic texts indicate that Veda was thought to be originally one, but was arranged into four groups, that the four groups of texts were entrusted for preservation and propagation to four different disciples of Vyāsa. The Ṛgveda has two arrangements, one into *maṇḍalas* and *sūktas* and the other into *aṣṭakas*, *adhyāyas* and *vargas*. The Taittirīyasaṁhitā and Atharvaveda are arranged into kāṇḍas. Not a word is said in any of these accounts to which Pargiter refers about picking up hymns already existing or their being arranged in maṇḍalas or adhyāyas or kāṇḍas by Vyāsa. Further, the reason assigned for the supposed deliberate suppression of the name of the arranger of the Veda is quite flimsy, not to say ridiculous. Every hymn of the Ṛgveda or every mantra has a ṛṣi who by the ancient Indian tradition was not the *author* (as Pargiter puts it) but only the *seer*. It is clear from Brāḥmaṇa texts, Upaniṣads and smṛtis that from very[1393] ancient times it was a very strict principle

1393. ऋष्यादिज्ञानाभावे प्रत्यवायः स्मर्यते। अविदित्वा ऋषिं छन्दो दैवतं योगमेव च। योऽध्यापयेज्जपेद्वापि पापीयाञ्जायते तु सः॥ सायण in his Introduction to the भाष्य on ऋग्वेद edited by the Poona Vaidika-saṁśodhana Maṇḍala. योग in the verse means विनियोग. 'आर्षं छन्दश्च दैवत्यं विनियोगस्तथैव च। वेदितव्यं प्रयत्नेन ब्राह्मणेन विशेषतः॥'.

(*Continued on next page*)

that no one should teach or repeat in japa or employ a mantra in a sacrifice without knowing the ṛṣi, the metre, the deity and the use (viniyoga) of it and dire consequences were declared to follow for him who was remiss in these matters. Hymns and mantras were arranged in different groups for different religious rites and solemn sacrifices or for other purposes (such as śāntis). It is not necessary to remember who arranged the required mantras for rites, sacrifices and other purposes. The Brāhmaṇa texts and śrauta sūtras prescribe the manner of the employment of the same mantras for various purposes and the Anukramaṇīs contain the names of the seers, metres and the deities of hymns and individual mantras also. As every mantra of the Veda was supposed to be only *seen* by a sage and as eternal, the mere compilation of them in one or more series or the mere arrangement of mantras or hymns in different groups for different purposes did not at all affect or interfere with the eternality of mantras or hymns. Pargiter's so-called reason for suppressing the name of the arranger of the Veda is simply no reason at all.

Pargiter did not stop to consider possible explanations. One of the most plausible is now put forth. The Mahābhārata and the Purāṇas (a very extensive literature) were attributed to Vyāsa, who, as shown above in n. 1390, had come to be looked upon as Viṣṇu or as an *avatāra* of Viṣṇu. The four Vedas and the several different śākhās (recensions) of each Veda were well known. By a sort of *post facto* explanation, the distribution of the Veda into four main groups was claimed to have been brought about by the divinely inspired Vyāsa, whose Purāṇas are, as will be apparent from note 1349 above and as will be shown in more detail later, glorified as even anterior and superior to the Veda. The eternality of the Veda had to be maintained and at the same time Vyāsa was to be glorified.

(*Continued from last page*)

This is बृहद्योगियाज्ञवल्क्य I. 27 quoted also by हेमाद्रि on व्रत vol. I p. 247. शङ्कराचार्य in his भाष्य on ब्रह्मसूत्र I. 3. 30 quotes the following as a Vedic text which occurs several times in the Ait. Br. 'यो ह वा अविदितार्षेयच्छन्दोदैवतब्राह्मणेन मन्त्रेण याजयति याध्यापयति वा स्थाणुं वर्च्छति गर्तं वा प्रतिपद्यते···तस्मादेतानि मन्त्रे मन्त्रे विद्यात्'. Vide also छान्दोग्योपनिषद् I. 3. 8-10 'येन साम्ना स्तोष्यन्स्यात्तत्सामोपधावेत्। यस्यासूचि तामूचं यदार्षेयं तदृषिं वा देवतामभिष्टोष्यन्स्यात्तां देवतामुपधावेत्। येन छन्दसा स्तोष्यन्स्यात्तच्छन्द उपधावेत्'. Vide note 1276 for the ऐ. ब्रा. passage which requires that the mantra employed should refer to the rite that is being performed.

The easiest way was to proclaim that Vyāsa, the author of the great Epic and of the distribution of Purāṇas into eighteen, was also responsible for the division or arrangement of the Veda. If all this glorification of Vyāsa occurred in the centuries immediately preceding and following Christ, how could the supposed arranger of the Veda be mentioned in the early Vedic Literature, which, most scholars agree, was closed some centuries before Buddha (i.e. before the 6th century B. C.)? No body claims that the arrangement into maṇḍalas or aṣṭakas or kāṇḍas is eternal. It is only the hymns or mantras that are claimed to be eternal. Even the *padapāṭha* of the Ṛgveda is declared to be non-eternal and is ascribed to Śākalya whom the Nirukta criticises in VI. 28. Viśvarūpa on Yāj. III. 242 expressly states that the *pada* and *krama* arrangements of the Veda are due to human authors.[1394] This theory explains all matters and has far better claims to be accepted than Pargiter's bold ascription of fraudulent suppression inferred from (a supposed) silence.

The Purāṇas do not speak with one voice about their own origin and transmission. After declaring that Vyāsa entrusted the preservation and propagation of the Purāṇas to Sūta, the Vāyu and other Purāṇas contain a somewhat different version. The Vāyu narrates (61. 55–61): Sūta had six disciples, viz. Sunīti Ātreya, Akṛtavraṇa Kāśyapa, Agnivarcas Bhārdvāja, Mitrayu Vasiṣṭha, Sāvarṇi Saumadatti, Suśarman Śāṁśapāyana. Three of these, viz. Kāśyapa, Sāvarṇi and Śāṁśapāyana prepared new Purāṇa-saṁhitās and Sūta's own was the 4th and the original one. All were divided into four *kāṇḍas*, contained the same sense (matter), but differed in their readings as the *śākhās* of the Veda differ. All had four thousand verses except the saṁhitā of Śaṁśapāyana. These four are said to be the basic saṁhitās (in Brahmāṇḍa II. 35. 66) or original saṁhitās (in Vāyu 61. 58 pūrvasaṁhitās). The Brahmāṇḍa (II. 35. 63–70) has the same account in almost in the same words. Viṣṇu (III. 6. 16–17), Agni 271 (11–12) are briefer but agree in the main with Vāyu. The Bhāgavāta (XII. 7. 4–7) differs from all these to some extent. That there is some substance in this story appears from stray passages in several chapters of the Vāyu (56. 1, 60. 33–34, 62. 1, 89. 16) and the Brahmāṇḍa (II. 34. 34,

1394. पदक्रमादीनां तु पुरुषकृतत्वादेव व्याडुत्तेर्न तन्निबन्धार्थं संहितावचनम्। वाल्मीकेश्च on या. III. 242 'अरण्ये नियतो जप्त्वा त्रिष्कुत्वो वेदसंहिताम्.' शान्ति 343. 103 (=cr. ed. 330.37) states the क्रमपाठ was due to याज्ञवल्क्य.

II. 36. 1 &c.), where Śaṁśampāyana is the inquirer and Sūta replies.

The personality of Sūta is somewhat of an enigma in the Mahābhārata and the Purāṇas. Sūta is called Romaharṣaṇa[1395] or Lomaharṣaṇa because he made the hair (*roman* or *loman*) of his audience bristle or stand erect by his touching and eloquent speech. In the Skanda it is stated that he was so called because his own hair stood on end when he was being instructed by Dvaipāyana. One meaning of the word *sūta* is 'chrioteer' and another meaning is 'a person of a mixed *pratiloma* caste born of the union of a brāhmaṇa woman with a kṣatriya male' and the cognate word 'Māgadha' means 'one who is born of a pratiloma union between a vaiśya male and a kṣatriya female' (vide Manu X. 71. Yāj. I. 93–94). The Arthaśāstra of Kauṭilya says[1396] the same thing about sūta and māgadha, but adds that 'the sūta and māgadha mentioned in the Purāṇas are different from these, because he (the sūta) is distinguished from (ordinary) brāhmaṇas and kṣatriyas'. Kauṭilya means that in his days sūta and māgadha were *pratiloma* castes, but the sūta and māgadha mentioned as the first reciters of the Purāṇas are a category apart, that they do not belong to the pratiloma castes and are both distinguished from brāhmaṇas and kṣatriyas (i. e. sūta of the Purāṇās is treated more or less as a great sage or semi-divine person). The Vāyu (1. 26–33 and 62–147 ff), Padma (II. 27. 65–87, V. 1. 29–32), Brahmāṇḍa (II. 36. 158–173), the Skanda (Prabhāsakhaṇḍa 1. 8) say[1397] that in the sacrifice of Pitāmaha (i. e. Brahmā) Sūta sprang up as a partial *avātara* of Viṣṇu on

1395. लोमानि हर्षयांचक्रे श्रोतृणां यत्सुभाषितैः। कर्मणा प्रथितस्तेन लोकेऽस्मिंल्लोमहर्षणः। वायु 1. 16; तस्य ते सर्वरोमाणि वचसा हर्षितानि यत्। द्वैपायनस्यानुभावात्ततोऽभूल्लोमहर्षणः॥ स्कन्द (प्रभासखण्ड) 1. 6.

1396. वैश्यान्मागधवैदेहकौ। क्षत्रियात्सूतः। पौराणिकस्त्वन्यः सूतो मागधश्च ब्रह्मक्षत्राद्विशेषतः॥ अर्थशास्त्र III. 7. p. 165; Pargiter translates (AIHT p. 17) 'but the sūta who is mentioned in the Purāṇas is different and so also is the Māgadha *who is mentioned there* from brāhmaṇa-kṣatriya offspring by a *real* distinction.' This is not accurate. There are no words in the Arthaśāstra corresponding to 'who is mentioned there' and for 'offspring'. This idea about the origin of सूत and मागध is very old. Vide गौ. धर्मसूत्र IV. 15–16 'प्रतिलोमास्तु सूतमागधायोगवकृत-वैदेहकचण्डालाः। ब्राह्मण्यजीजनत्पुत्रान् वर्णेन्य आनुपूर्व्याद् ब्राह्मण-सूत-मागध-चण्डालान्।

1397. एतस्मिन्नेव काले च यज्ञे पैतामहे शुभे। सूतो सुत्यां समुत्पन्नो सौत्येऽहनि महामतिः॥ तस्मिन्नेव महायज्ञे जज्ञे प्राज्ञोथ मागधः। वायु 62. 135–136, ब्रह्म 4. 60–61. It is popular etymology to derive the word सूत from the root 'su' 5th conj. to extract.

the day when soma juice was extracted and māgadha also thus arose. It is further stated in the same Purāṇas that the *havis* (offering) meant for Indra (symbol of the kṣatriya class) got mixed with that meant for Bṛhaspati (symbol of brāhmaṇa class and learning) and that the sūta was born just at the time when the mixed-up offering was presented to the gods. From this the sūta (in later times) had duties similar to those of the original sūta and it was said that the sūta is offspring of the mixed union of brāhmaṇa (woman) with kṣatriya (male). Then another story is grafted on to this (in Vāyu 62. 147 ff, Brahmāṇḍa II. 36. 170–173 and in others) that the original[1398] Sūta and Māgadha sang the praises of king Pṛthu, son of Vena, who being pleased, made a present of the country of Anūpa to Sūta and the country of Magadha to Māgadha and since that time sūtas and māgadhas sing the praises of kings and awaken them in the morning with blessings. The Vāyu itself,[1399] however, says (1. 33–34) that sūta was born at the time of the extracting of soma juice in the sacrifice of Pṛthu Vainya.

The authors of the extant Vāyu and other Purāṇas are conscious that the sūta and māgadha in their times had no adhikāra for Veda, that the business of the sūta was to note the dynasties of gods, sages and kings that are found in the Itihāsa and Purāṇas. They felt scandalized by the fact that great sages like Śaunaka were said to have learnt Purāṇas from the sūta who in their times belonged to a pratiloma caste, about which Gautama, Viṣṇudharmasūtra and Kauṭilya himself lay down that pratilomas are like śūdras, are condemned by āryas and are

---

1398. ततः स्तवान्ते सुप्रीतः पृथुः प्रादात्प्रजेश्वरः। अनूपदेशं सूताय मगधं मागधाय च॥ तदा वै पृथिवीपालाः स्तूयन्ते सूतमागधैः। आशीर्वादैः प्रबोध्यन्ते सूतमागधवन्दिभिः॥ वायु 62. 147–148, ब्रह्माण्ड II. 36. 171–173. The आदिपर्व (59. 112–113) refers to the gift of अनूप and मगध to सूत and मागध; ब्रह्मपु॰ 4. 67 also does so. The Padma V. 1. 31 says that Pṛthu made a present of the Sūta country to सूत. It is popular etymology to derive the name मागध from मगध. अनूप means a watery or marsh country. Padma (II. 27. 86–87) mentions other countries as gifts to सूत &c.

1399. सूत उवाच। ···स्वधर्म एष सूतस्य सद्भिर्दृष्टः पुरातनैः। देवतानामृषीणां च राज्ञां चामिततेजसाम्॥ वंशानां धारणं कार्यं श्रुतानां च महात्मनाम्। इतिहासपुराणेषु विद्वा ये ब्रह्मवादिभिः॥ न हि वेदेष्वधीकारः कश्चित्सूतस्य दृश्यते। वैन्यस्य हि पृथोर्यज्ञे वर्तमाने महात्मनः। सुत्यायामभवत्सूतः प्रथमं वर्णवेकृतः। वायु 1. 31–34, पद्म V. 1. 27; vide ब्रह्माण्ड II. 36. 158–173 for the birth of सूत and gift of अनूपदेश to सूत and of मगध to मागध by पृथुवैन्य. प्रतिलोमास्तु धर्महीनाः। गौतमधर्मसूत्र (IV. 20); त एते प्रतिलोमाः स्वधर्मातिक्रमाद्ब्राह्मः सम्भवन्ति। ···शूद्रसधर्माणो वा अन्यत्र चण्डालेभ्यः। अर्थशास्त्र III. 7 p. 165; प्रतिलोमास्त्वार्यविगर्हिताः। विष्णुधर्मसूत्र 16. 3.

beyond the pale of the usual duties of brāhmaṇas and kṣatriyas (such as *upanayana*, Veda study, teaching &c.). Learning by a brāhmaṇa from a kṣatriya was considered even in Upaniṣad times as contrary to the natural order of things. Vide the words of king Ajātaśatru to Gārgya Bālāki[1400] quoted below. Therefore, to account for the position of Sūta as instructor in Itihāsa and Purāṇa of great sages like Śaunaka, the story of Sūta's birth was invented and he was placed in a separate category by himself. This must have occurred some centuries before Kauṭilya who was aware of the low position of sūta and māgadha and differentiates the Paurāṇika sūta from the pratiloma sūta and māgadha. One need not accept the divine character of Sūta, one has only to understand that in very ancient times brāhmaṇas could, without any qualms and without loss of prestige, learn about legends from a sūta, but that in the times when the extant purāṇas were compiled the position had entirely changed.

Next to Pargiter and Kirfel, one must mention the name of Prof. R. C. Hazra who has bestowed much labour and thought on the purāṇas in general and on individual purāṇas. One cannot but feel high admiration for Prof. Hazra's industry, patience and enthusiasm. One regrets, however, to find that he has developed a tendency to assign rather more ancient dates to the extant Purāṇas and Upapurāṇas than the available evidence would warrant. Besides, he has been so much engrossed in the study of Purāṇas that he sometimes scents a reference to Purāṇas where none in fact exists. For example, in 'Puranic records on Hindu rites and customs' (p. 6) Prof. Hazra observes that Vijñāneśvara tells us of Hārīta's reference to the opinion of Purāṇas in prescribing penance in normal circumstances to those who eat the food dedicated to the patriarchs. The words of the Mitākṣarā[1401] of Vijñāneśvara are quoted in the note

1400. सहोवाचाजातशत्रुः प्रतिलोमं चैतद्यद् ब्राह्मणः क्षत्रियमुपेयाद् ब्रह्म मे वक्ष्यतीति। बृह. उ. II. 1. 15. Vide कौषीतकिना. उ. IV. 18 for almost the same words.

1401. The मिताक्षरा has a long discussion on Yāj. III. 289 about the expiations for eating food tainted by various defects. About eating food in śrāddhas of various kinds it quotes several authorities as follows: हारीतेनाप्युक्तम्। एकादशाहे भुक्त्वान्नं भुक्त्वा सञ्चयने तथा। उपोष्य विधिवत्स्नात्वा कूष्माण्डैर्जुहुयाद्घृतम्॥ इति। विष्णुनाप्युक्तम्। प्राजापत्यं नवश्राद्धे...पञ्चगव्यं द्विमासिके॥ इदं चापद्विषयम्। अनापदि तु—'चान्द्रायणं नवश्राद्धे प्राजापत्यं तु मिश्रके। एकाहस्तु पुराणेषु प्राजापत्यं विधीयते॥ इति हारीतोक्तं द्रष्टव्यम्। प्राजापत्यं तु मिश्रके इत्येतदाधमासिकविषयं द्रष्टव्यम्।

(*Continued on next page*)

below and clearly show that there the word '*purāṇeṣu*' means 'Śrāddhas called purāṇa' and has nothing to do with Purāṇa works. Another defect noticed in Prof. Hazra's writings is that he sees too much meaning in simple words and phrases and is not cautious in his conclusions as a scholar of his standing and experience should be. In a recent paper on 'the Aśvamedha, the common source of origin of the Purāṇa Pañcalakṣaṇa and the Mahābhārata' in ABORI, vol. 36 (1956) pp. 190–203, he cites the Atharvaveda verse quoted above (p. 816, n 1325) in which ṛk and sāma verses are mentioned separately and 'purāṇa' (purāṇaṁ yajuṣā saha) is associated with *yajus*, and says this collocation seemed to him highly significant and that he felt *fully convinced* that the Purāṇa pañcalakṣaṇa and the Mahābhārata owe their origin to the Aśvamedha sacrifice and especially to its Pāriplava ākhyānas. Reasons of available space preclude a detailed examination of this paper. But a few fundamental objections and matters must be mentioned. The words 'purāṇaṁ yajuṣā saha' should ordinarily mean (as in passages like Devadattaḥ saputra āgataḥ) no more than 'Purāṇa and Yajus'. Yāj. 1. 101 provides[1402] that after the daily bath, a vedic householder should undertake every day the japa of portions of the (three) Vedas, the Atharvaveda, Purāṇas together with Itihāsa and of ādhyātmikī-vidyā (Upaniṣads). There is no special meaning here in the association 'purāṇāni setihāsāni' beyond 'Purāṇas and Itihāsa'. One, therefore, fails to understand how the words 'purāṇam yajuṣā saha' are highly significant for arriving at the *conviction* that Aśvamedha is the origin of Purāṇa and Mahābhārata. Then on p. 202 of the paper

---

(Continued from last page)

Srāddhas are of three kinds, नवश्राद्ध (up to ten days after death), मिश्र or नवमिश्र (performed after ten days up to one year) and पुराण (those performed after a year from a person's death). The word पुराणेषु means पुराणेषु श्राद्धेषु. हारीत provides प्रायश्चित्त for eating the food in the three kinds of श्राद्ध, नव, मिश्र and पुराण. The word पुराणेषु in that verse of हारीत has nothing to do with Purāṇa works. Vide H. of Dh. vol. IV. p. 262 notes 591a and 593 for more details about the three kinds of śrāddhas.

1402. वेदाथर्वपुराणानि सेतिहासानि शक्तितः। जपयज्ञप्रसिद्ध्यर्थं विद्यां चाध्यात्मिकीं जपेत्॥ याज्ञ. I. 101. Compare also कूर्म II. 46. 129 एकतस्तु पुराणानि सेतिहासानि कृत्स्नशः। एकत्र परमं वेदमेतदेवातिरिच्यते॥.

in question Prof. Hazra quotes a passage from[1403] Śaṅkarācārya's bhāṣya on Chāndogya III. 4. 1–2 and completely misunderstands the great ācārya when he observes "Śaṅkara's use of the word 'rātri' in the plural (in 'rātriṣu') shows that in his opinion the *Itihāsa and Purāṇa were employed every night during the Pāriplava and not merely on the 8th and 9th nights respectively*, as the Śatapatha Br. and Śāṅkhāyanaśrautasūtra say" (Italics author's). The Aśvamedha sacrifice lasted for a year and listening to the Pāriplava went on for a year, each Pāriplava being a cycle of ten days (or rather nights, as the recitation by the hotṛ priest was to take place after the morning, mid-day and evening iṣṭis to Savitṛ were finished). The texts to be recited and the nature of the legends to be narrated on each of the cycle of ten days are fixed and Itihāsa and Purāṇa are to be recited only on the 8th and 9th nights. As each cycle was of ten days, there would be 36 cycles of Pāriplava in a year and Itihāsa would be recited on 36 nights in the year and Purāṇa also would be recited on 36 nights in the year. It is for this reason that Śaṅkarācārya speaks of 'Pāriplavāsu rātriṣu' in the plural, but he does not say that Itihāsa and Purāṇa were to be recited on 'all' nights (*sarvāsu* rātriṣu), while Prof. Hazra represents him as so saying. There is absolutely no warrant in the ancient texts for saying that on each day (or night) of the Pāriplava Itihāsa or Purāṇa was to be recited or that Śaṅkarācārya said anything of the kind. The testimony of the Vedāntasūtra[1404] is completely against this view of Prof. Hazra. Vedāntasūtra III. 4. 23 refers to certain stories mentioned in the Upaniṣads such as 'Yājñavalkya had two wives, Maitreyī and Kātyāyanī' (Bṛ. Up. IV. 5. 1), 'Pratardana, son of Divodāsa, went to Indra's abode' (Kauṣītaki Up. III. 1), 'Jānaśruti Pautrāyaṇa was a pious donor giving much wealth to the people and keeping an open house for distributing food' (Chān. Up. IV. 1. 1), and remarks that such stories were not to be recited in Pāriplava, since the stories to be recited therein are expressly specified beginning with the story

---

1403. The भाष्य passage quoted is 'इतिहासपुराणं पुष्पम्। तयोश्चेतिहासपुराणयोरश्वमेधे पारिप्लवासु रात्रिषु कर्माङ्गत्वेन विनियोगः सिद्धः'.

1404. पारिप्लवमाचक्षीत-इति हि प्रकृत्य 'मनुर्वैवस्वतो राजा' इत्येवमादीनि कानिचिदेवाख्यानानि तत्र विशेष्यन्ते। आख्यानसामान्याच्चेत्सर्वगृहीतिः स्यादनर्थकमेवेदं विशेषणं भवेत्। तस्माच्च पारिप्लवार्था एता आख्यानश्रुतयः। भाष्य on वे. सू. III. 4. 23 (पारिप्लवार्था इति चेन्न विशेषितत्वात्).

of king Manu Vaivasvata (which was to be recited on the first night of the Pāriplava).

Prof. Hazra has recently published (in 1958) 'Studies in the Upapurāṇas' vol. I. pp. 1–400 on Saura and Vaiṣṇava Upapurāṇas (in the Calcutta Sanskrit College Research Series 1958). This would be briefly dealt with a little later.

Prof. Ramchandra Dikshitar also has written a good deal on the Purāṇas. His writings are beset by the same infirmity that attaches to Prof. Hazra's work to some extent. For example, in a paper published in the Proceedings of the 13th Indian History Congress (pp. 46–50) on the Viṣṇupurāṇa he first states (p. 46) that he is more concerned with the extant Viṣṇupurāṇa and after pointing out that the topics of vratas, of fasts, of tīrtha, are absent from the extant Viṣṇupurāṇa he concludes that the extant Viṣṇupurāṇa can safely be placed *in the 6th or 7th century B. C.* Hardly any modern and critical scholar would accept such a date for the extant Viṣṇupurāṇa. Instead of relying on the absence of certain topics he should rather have relied on what it actually contains to find out the probable date of the extant Viṣṇupurāṇa.

In connection with the Purāṇas the author must refer at some length to the Introductory remarks of Ballālasena, king of Bengal, in his Dānasāgara, edited in the B. I. series (1953–1956) by Mr. Bhabatosh Bhattācārya (three parts of text pp. 1–722 and 4th part an Introduction in English with Indices). Those remarks evince a bold critical faculty rare in our medieval Sanskrit writers. He mentions, besides the Gopathabrāhmaṇa, the Rāmāyaṇa, the Mahābhārata, the smṛtis and dharmaśāstras of Gautama, Manu, Yājñavalkya, (counting Śaṅkha Likhita as two), Dāna-Bṛhaspati and Bṛhaspati (as separate), Vasiṣṭha and others (in all 28), the Chandoga-pariśiṣta of Kātyāyana, thirteen principal Purāṇas viz. Brāhma, Vārāha, Āgneya, Bhaviṣya, Mātsya, Vāmana, *Vāyaviya*, Mārkaṇḍeya, Vaiṣṇava, *Śaiva*, Skānda, Pādma and Kaurma and the Upapurāṇas named in Kūrma and Ādi Purāṇas as containing the procedure of (various) dānas, viz. Ādya, Sāmba, Kālikā, Nānda (v. l. Nandin), Āditya, Nārasiṁha, Viṣṇudharmottara (declared by Mārkaṇḍeya) and the śāstra called Viṣṇudharma (eight in all). He mentions that he drew upon all these for the production of his work on dānas, 1375 in number (verses 11–20

pp. 2–3). Then he mentions certain Purāṇas and Upapurāṇas which he discarded in his work on dānas for various reasons.

Some of these remarks are very important and the original verses are set out in the note below.[1405] He states that he did not draw upon the Bhāgavata, the Brahmāṇḍa and the Nāradīya as dānas are absent therefrom. He did not rely in his work upon the Liṅgapurāṇa, though it is a large work, because its essence, he decides, is the same as the treatment of Mahādānas declared in the Matsyapurāṇa; the Bhaviṣyapurāṇa has been assiduously utilised by him only up to the (vratavidhis of) 7th tithi, but he discards the procedures of the 8th and 9th tithis (of the Bhaviṣyapurāṇa), since they are overwhelmed (tainted) with (the doctrines of)[1406] heretical sects (Tāntrikas,

---

1405. बृहदपि लिङ्गपुराणं मत्स्यपुराणोदितैर्महादानैः । अवधार्य तुल्यसारं दाननिबन्धेऽत्र न निबद्धम् ॥ 58 सप्तम्यैव पुराणं भविष्यमपि सङ्गृहीतमतियत्नात् । त्यक्त्वाष्टमीनवम्यौ कल्पौ पाषण्डिभिर्ग्रस्तौ ॥ लोकप्रसिद्धमेतद्विष्णुरहस्यं च शिवरहस्यं च । द्वयमिह न परिगृहीतं संग्रहरूपत्वमवधार्य ॥ भविष्योत्तरमाचारप्रसिद्धमविरोधि च । प्रामाण्यज्ञापकाङ्गदेर्ग्रन्थाद्वस्मात् पृथक् कृतम् ॥ प्रचरद्रूपतः स्कन्दपुराणैकांशतोधिकम् । यत्खण्डत्रितयं पौण्ड्रेरवान्तिकथाश्रयम् ॥ तार्क्ष्यं पुराणमपरं वाह्मप्राग्नेयमेव च । त्रयोविंशतिसाहस्रं पुराणमपि वैष्णवम् ॥ षट्सहस्रमितं लैङ्गं पुराणमपरं तथा । दीक्षाप्रतिष्ठापाषण्डयुक्तिरत्नपरीक्षणैः ॥ मृषावंशानुचरितैः कोषव्याकरणादिभिः । असङ्गतकथाबन्धपरस्परविरोधतः ॥ तन्मीनकेतनादीनां भण्डपाषण्डलिङ्गिनाम् । लोकवञ्चनमालोक्य सर्वमेवावधीरितम् ॥ एतत्पुराणोपपुराणसंख्याबहिष्कृतं कश्मलकर्मयोगात् । पाषण्डशास्त्रानुमतं निरूप्य देवीपुराणं न निबद्धमत्र ॥ 67 p 7. The com. विष्णुचित्ती on विष्णुपुराण remarks that the विष्णुपुराण has six recensions viz. of 6000 verses, 8000, 9000, 10000, 22000, 24000, while the दानसागर speaks of a विष्णुपुराण of 23000 verses which it discards. मेधातिथि on मनु IV. 200 remarks that each āśrama has some peculiar signs of its own such as the girdle, deer skin, (palāśa) staff of a Vedic student, the householder has a bamboo stick, ear-rings &c., a forest hermit has tattered garments and matted hair while a sannyāsin wears kaṣāya (reddish) garment &c. Those who maintain themselves by wearing these peculiar signs though they do not belong to that order incur sin, परा. मा. I. 2 p. 386 explains लिङ्गिनः as पाशुपतादयः.

1406. Both the कल्पतरु on व्रत pp. 274–308 and हेमाद्रि on व्रत vol. I pp. 921–956 contain several vratas on the 9th tithi from Bhaviṣyapurāṇa in honour of Durgā (under various names such as Caṇḍikā, Nandā) which have a *śākta* flavour. For example, as regards the Ubhayanavamīvrata (Kalpataru on vrata pp. 274–282) it is provided that the eight-armed Durgā called Tryambikā is to be honoured with red flowers and the naivedya of buffalo flesh (p. 275). Similarly, as regards Nāmanavamī vrata (*ibid.* p. 283–288) provision is made for a naivedya of fish and flesh and in the Mahānavamī vrata pp. 296–298 a naivedya of pāyasa and flesh for Maṅgalā is provided. In the Nandānavamī Durgā is called Nandā and the mantra

(*Continued on next page*)

Bauddhas, &c.); both the Viṣṇurahasya and Śivarahasya, though well-known among people, have not been accepted in this work, since they are considered to be mere compilations; the Bhaviṣyottara (Purāṇa) which is followed in peoples' practices and is not in conflict (with orthodox views) has been excluded from this work, since no indications (evidence) of its authoritativeness could be found; the following are ignored in the Dānasāgara for reasons stated: three khaṇḍas, viz. those concerned with the tales of Pauṇḍra, Revā and Avanti of the Skanda apart from a part of it that is prevalent (among people), the Tārkṣya (i. e. Garuḍa) purāṇa, another Brahmapurāṇa, another Āgneya (i. e. Agnipurāṇa), a Viṣṇupurāṇa containing 23000 verses, another Liṅgapurāṇa containing six thousand verses; all these have been discarded for various reasons such as the procedure of dīkṣā (initiation of a disciple by a guru in a cult like the Tāntrika or Pāñcarātra or Pāśupata) or of the establishment of an image, heretical reasoning, testing of jewels, stories of the doings of (persons of) false genealogies, treating of such matters as dictionaries and grammar, containing incoherent tales and contradictions, because they lead to the misleading of people by the description of or reference to Love affairs, to those who are buffoons, or are heretics or make their livelihood by displaying some sign (such as matted hair); the Devīpurāṇa has not been utilized in this work, because it is not included in the enumeration of the number of Purāṇas and Upapurāṇas (in various works), because it contains delusive acts[1406a] and because it approves of heretic śāstras.

(*Continued from last page*)

is 'om Nandāyai namaḥ' (p. 304) and in the Mahānavamīvrata (on Āśvina-śukla 9) worship is commended (p. 308) with plenty of wine and flesh and with the heads of buffaloes, rams and goats. All these Navamīvratas provide a dinner to maidens which is a peculiarity of śākta worship. Tāntrik practices must have affected people in Northern India long before the 11th century as the Kalpataru mentions the Sun's mantra 'Khakholkāya namaḥ'; vide भविष्य I. 215. 1-6 for the basic mantra (Mūla-mantra) and its adjuncts, some of which are 'ओं विडिविडि शिरः, ओं ज्वालिने इति शिखा, ओं सहस्ररश्मये फट् कवचम्, ओं सर्वतेजोधिपतये फट् अस्त्रम् । ओं सहस्रकिरणोज्ज्वलाय फट् ऊर्ध्वबन्धः ।' (कल्प० on व्रत p. 199). It may be noted that the Agnipurāṇa (272. 3) speaks of the gift of the Viṣṇupurāṇa containing 23000 verses.

1406a. कश्मल means मूर्च्छा or मोह acc. to अमरकोश 'मूर्च्छा तु कश्मलं मोहोऽप्यधर्मेषु पीडनम्'. In the भगवद्गीता II. 2 we have 'कुतस्त्वा कश्मलमिदं विषमे समुपस्थितम्' where it should mean मोह. If we prefer the variant reading कल्मष, then the meaning would be मलिन (dark) or मलीमस.

Some important conclussions can be drawn from the above mentioned remarks of Ballālasena in his Dānasāgara. Next to the Mitākṣarā, the Kṛtyakalpataru and Aparārka's commentary, the Dānasāgara is among the earliest extant nibandha works the dates of which are nearly certain.[1407] If does not mention the Mitākṣarā, nor Kṛtyakalpataru nor Aparārka. Mr. Bhabatosh Bhattāchārya is right in his contention that the words 'Kalpadrumo jaṅgamaḥ' in the 3rd opening verse have nothing to do with Kalpataru of Lakṣmīdhara and that Prof. Rangaswamy Aiyangar is wrong in thinking that the verse refers to the Kalpataru (vide Mr. Bhattāchārya's Introduction to Dānasāgara p. XVIII and note 1).

The principal points that emerge from Ballālasena's remarks on Purāṇas are that he included both Vāyu and Śiva among the principal Purāṇas (sometimes called Mahāpurāṇas), that there were two Purāṇas called Linga, Brāhma, Āgneya and Viṣṇu, that the four counterparts bearing these names were not treated as authoritative (one pseudo-Liṅgapurāṇa having 6000 verses and one Viṣṇu having also 23000 verses being unauthoritative), that he abhorred Tāntrik rites and therefore totally discarded the Devīpurāṇa and parts of Bhaviṣya, that he did not utilize three named sections of the Skanda, that he did not regard the Garuḍa as authoritative. It may be stated here that acc. to the (printed) Kūrma I. 1. 17-20 some Upapurāṇas such as Skanda, Vāmana, Brahmāṇḍa and Nāradīya bear the same names as the Mahāpurāṇas. Prof. Hazra relies upon a passage quoted from the Bhaviṣyapurāṇa[1408] by Kalpataru (Brahmacāri-

1407. The pedigree of बल्लालसेन gathered from अ सा. and दानसागर is: हेमन्तसेन (in सोमवंश) – his son विजयसेन – his son बल्लालसेन – his son लक्ष्मणसेन. The अद्भुतसागर was begun in śaka 1089 (1167 A. D.) and was finished by his son लक्ष्मणसेन (p. 4 अ. सा.). The दानसागर was composed by बल्लालसेन in śaka 1091 (1169 A. D.); vide Mr. B. Bhattachārya's Introduction to दानसागर pp. XXV–XXVI. He composed three more works before the दानसागर viz. the व्रतसागर (mentioned on pp. 52 and 59 of the दानसागर), प्रतिष्ठासागर and आचारसागर (in verses 55-56 p. 6 of दानसागर). So बल्लालसेन's literary activity should be placed between 1155 to 1180 A.D. He mentions अनिरुद्धभट्ट, author of हारलता and पितृदयिता, as his *guru* to whom he shows great reverence for his learning, high character and attainments in the दानसागर (p. 2 verse 6) and states that he learnt the essence of all Purāṇas and smṛtis from him (verse 7). Vide H. of Dh. vol. I. (1930) pp. 340-341 for Ballālasena.

1408. भविष्यपुराणे। अष्टादश पुराणानि रामस्य चरितं तथा। विष्णुधर्मादिशास्त्राणि शिवधर्मास्तथ भारत॥ काण्वी च पञ्चमी वेदो धन्महाभारतं स्मृतम्। सौराश्च धर्मा राजेन्द्र मान-

(Continued on next page)

kāṇḍa p. 25) wherein it is said that the appellation Jaya is applied to 18 Purāṇas, Rāmāyaṇa, Viṣṇudharmādiśāstras, Śivadharma, Mahābhārata, Sauradharmas and Mānavadharmas (Manusmṛti?). I shall discuss the question of Viṣṇudharmapurāṇa later. But I have serious objections against the antiquity and authenticity of this passage. Being quoted in the Kalpataru it may be earlier than 1050 A. D. That is all. In order to glorify the 18 Purāṇas the meaning of Jaya is extended. Jaya is applied only to the Mahābhārata in the latter e. g. Udyogaparva 136. 18–19 and Svargārohaṇika 5. 49 and 51 quoted in note 1369 above. Hence this passage was inserted very late after all 18 Purāṇas had been composed i. e. after the 9th century A. D. Besides the plural 'Viṣṇudharmādiśāstrāṇi' shows that many works are meant and *not one*, i. e. the meaning is that all śāstras dealing with Viṣṇudharmas and the like. If a single work were meant, one expects 'Viṣṇudharmādiśāstram ca' and that would have not spoilt the metre. Besides, the Kalpataru itself indicates that this verse about 'Jaya' was cited by some authorities as 'Smṛti'. Therefore, it is doubtful if it is a genuine Bhaviṣya passage. Ballālasena mentions only eight Upapurāṇas on dānas by name (including the four mentioned by the Matsya).

In spite of the very admirable and praiseworthy efforts of Dr. Hazra in the matter of the place of the Upapurāṇas, their contents, the search among numerous mss. to find out what the text of the several upapurāṇas has been, the present writer must say here once for all that he does not at all agree with most of the dates that he assign to the Sāmba, the Viṣṇudharma, the Viṣṇudharmottara, the Narasiṁhapurāṇa, which are the principal Upapurāṇas he has dealt with in the first volume of 'Studies in Upapurāṇas'. His dates for the four Upapurāṇas are;

(*Continued from last page*)

वोक्ता महीपते। जयेति नाम चैतेषां प्रवदन्ति मनीषिणः। यदत्र श्लोके 'स्मृतिः' इति कृत्वा म (मा?) णिकानां वचनं (लिखनं in कृ. र.) तदपि महाजनपरिगृहीतत्वेन प्रमाणत्वात्। तथा 'स्मृत्यन्तरेषु च' इत्येनैव सङ्गृहीतं वेदितव्यम्। कल्पतरु (ब्रह्मचारि° p. 25–26). The कृत्यरत्नाकर reads 'तदविज्ञायमानवक्तृकमपि' before महाजन° and thereby clearly shows that the propounder of this passage (cited as from Bhaviṣya) was unknown, acc. to the कृत्यरत्नाकर and also कल्पतरु, but, as some authorities had accepted it, it was regarded as प्रमाण and even if cited as smṛti it would be included in the words 'अष्टादशपुराणेषु यानि वाक्यानि पुत्रक। तान्यालोक्य महाबाहो तथा स्मृत्यन्तरेषु च॥' occurring as a quotation from भविष्य on p. 24 (of ब्रह्मचारिकाण्ड). The above verses are quoted by कृ. र. p. 30.

Sāmba between 500 and 800 A. D. (p. 91), the Viṣṇudharmapurāṇa between 200–300 A. D. (p. 143), the Viṣṇudharmottarapurāṇa between 400 to 500 A. D. (p. 212) and the present Narasiṁha-purāṇa between 400 to 500 A. D. To examine all his reasons the present writer would have to write another book. Therefore, he proposes to give only a few illustrations of the way in which Dr. Hazra arrives at his dates. But before this is done it is better to mention some of his own findings on the Purāṇas and the four Upapurāṇas mentioned above. On p. 27 he observes that the text of the extant Mahāpurāṇas which are the results of innumerable changes, modifications and interpolations made at different times and by different sects is *scarcely reliable* and can be used with great caution and careful discrimination. I agree with him. But the same or perhaps worse is the case with the Upapurāṇas. Prof. Hazra himself says ('Studies' vol. I. p. 23) that after the group of 18 principal Purāṇas had been compiled many sub-systems and sects like the Śāktas and Sauras came into prominence and their adherents interpolated chapters in the 18 established Purāṇas and wrote new and independent works styled Purāṇas in order to propagate their own ideas and that some of these latter came to be called Upapurāṇas. The result is that, unless we have critical editions of the Purāṇas and the principal Upapurāṇas on the model of the critical edition of the Mahābhārata at the BORI in Poona, all chapters and often single verses are suspect. But the task of preparing critical editions of even the principal Purāṇas and *some of the Upapurāṇas based upon ancient and medieval mss.* collected from all parts of India would be far more colossal and costly than even the critical edition of the Mahābhārata. Therefore, most chronological conclusions about the dates of Purāṇas and Upapurāṇas and about the borrowings of one Purāṇa from another are just tentative at the most and likely to be set aside by new evidence as long as critical editions of Purāṇas and Upapurāṇas are not available.

Let us now turn to the four Upapurāṇas dealt with at length by Prof. Hazra. About the Sāmba (which is one of the four Upapurāṇas expressly named in the Matsyapurāṇa 53. 60–63) Prof. Hazra observes ('Studies' vol. I. p. 68) that the present Sāmba-purāṇa consists of different units mostly belonging to different countries and ages and after analysing in his own way the several chapters of the Sāmba he arrives at the conclusion (on p. 93) that chapters 17, 22 and 23 of the printed

edition were added later than 950 A. D., that chap. 44–45 were inserted between 950 and 1050 A. D. and chap. 39–43 and 47–83 were added between 1250 and 1500 A. D. There is at present only one printed ed. of the Sāmba viz. that of the Veṅk. Press in 84 chapters based probably only on one ms. Out of these 84 chapters Prof. Hazra himself finds that 47 chapters are later than 950 A. D., of which 42 were added between 1250-1500 A. D. Prof. Hazra has himself examined several mss of the Sāmba, but they do not come from all over India, many being from Bengal and almost all seem to be late ones (p. 33 last line), being copied in śaka 1764 i. e. 1842 A. D. When more than half of this Purāṇa ranges between 950 to 1500 A. D. according to Prof. Hazra, how can it be usefully employed for chronological purposes? Nobody can say when the verses about the four Upapurāṇas were inserted in the Matsya, but one can affirm that it was done about the 9th century A. D. or even later. Two dates about Upapurāṇas are certain, viz. that Sāmba is mentioned by Alberuni (Sachau, I. p. 130) who wrote in 1030 A. D. and that the Dānasāgara (verses 13–15 on p. 3), composed in 1069 A.D. mentions eight Upapurāṇas on dānas of which four viz. Sāmba, Nārasiṁha, Nandi and Āditya are the same as are mentioned in the Matsya. Therefore, an Upapurāṇa called Sāmba must have been composed a century or two earlier than 1000 A. D. On p. 91 he holds that the Sāmba cannot be dated later than 800 A. D. It is difficult to fall in line with all the assumptions on pp. 90–91 for arriving at this date. What the Sāmba named by Matsya contained beyond the words 'story of Sāmba' is not at all known. Prof. Hazra himself has given up at least half of the printed Sāmba as later than 950 A. D. and there is absolutely no reliable evidence to hold that the remaining portion of the Sāmba is earlier than 800 A. D. or even earlier than 950 A. D.

The next Upapurāṇa is Viṣṇudharma dealt with by Prof. Hazra in 'Studies' vol. I. pp. 118–155. There is no printed edition. Prof. Hazra (p. 119) refers to six mss. but he has chiefly used only one ms. viz. Bengal Asiatic Society's ms. No. 1670. This Purāṇa has 105 chapters and over 4000 verses. Prof. Hazra admits (p. 119) that it has very little of the principal characteristics of a Purāṇa and deals exclusively with the religious rites and duties of Vaiṣṇavas. Alberuni names Viṣṇudharma but the verses that he quotes therefrom are found in the Viṣṇudharmottara as Bühler pointed out long ago (I. A. vol. XIX. pp. 381–410 and vide table given by Prof. Hazra on p. 208 comparing the two). Prof. Hazra holds (p. 116) relying on two verses quot-

ed below from Viṣṇudharmottara[1408a] that the Viṣṇudharmottara is only the latter part of Viṣṇudharma and that, as he holds that the former was composed between 400–500 A. D., the date of the Viṣṇudharma falls between 200 and 300 A. D. (p. 143). The other arguments that he advances are practically worthless. In the present author's opinion those verses can be interpreted in two other but different ways, viz. that the first section of the present Viṣṇudharmottara is called Viṣṇudharma or that the Viṣṇudharmottara is so called because it was composed after the Viṣṇupurāṇa, which contains the greatness of Viṣṇu and the dharmas of Vaiṣṇavas. He often trots out the theory that, if a work is free from Tantric elements, it must be an early work belonging to the 3rd or 4th century A.D. (see p. 142). The Sarvadarśanasaṅgraha of Mādhavācārya (which was composed in the 14th century) makes no reference to the cult of Śakti or the system of Tantra, though it devotes a good deal of space to the views of even Cārvāka (a thorough-going atheist), Bauddhas and Jainas. The Sarvasiddhāntasaṅgraha also does not refer to the Śāktas or the Tantras. But no one can argue that Mādhava is earlier than 4th or 5th century A.D. There may be various reasons for silence. One may abhor a thing and may not refer to it or use it at all as the Dānasāgara says about the Devīpurāṇa. The argument from silence is a slippery one. I challenge the whole basis of Prof. Hazra's date for Viṣṇudharma, viz. the date of the Viṣṇudharmottara. This last is a vast work in three sections. It would be proved later that portions of the latter Purāṇa dealing

---

1408a. अधीते सोत्तरं यश्च विष्णुधर्ममिमं शुभम् । विष्णुधर्मोत्तर I.143.16 ; संसारक्षयहेत्वर्थं भावोपकरणेषु च । सोत्तरा वैष्णवा धर्माः सारमेतत्प्रकीर्तितम् ॥ विष्णुधर्मोत्तर I. 74. 35. These verses are not clear enough for holding that the present विष्णुधर्मोत्तर is only the latter part of another work called विष्णुधर्म. That verse uses the word इमं which refers to the first section of the present विष्णुधर्मोत्तर and refers only to one who studies the first section and also the following sections. The word इमं cannot be proved to refer to विष्णुधर्मशास्त्र, which is nowhere expressly mentioned as a पुराण in the विष्णुधर्मोत्तर. To take इमं as referring to विष्णुधर्म, a separate work, would be equal to assuming what has to be proved. Alberuni mentions Viṣṇudharma as a short form of विष्णुधर्मोत्तर and nothing more. Similarly, in the 2nd passage it is expressly stated that in the first section the essence of Vaiṣṇava duties is given along with the following two sections. The Matsya (53. 16) speaks of the Viṣṇupurāṇa as one in which Parāśara proclaimed all the dharmas with reference to Vārāhakalpa; वाराहकल्पवृत्तान्तमधिकृत्य पराशरः । यत्प्राह धर्मानखिलांस्तद्युक्तं वैष्णवं विदुः ॥ मत्स्य 53.16 The word धर्मान् is used in the मत्स्य with reference to four Purāṇas, Vāyu, Viṣṇu, Nāradīya and Skanda, out of 18. The Viṣṇu is full of the characteristic qualities of Vaiṣṇavas e. g. vide III. 7. 20–33, III. 8. 9–19 &c.

with prognostications from dreams cannot be placed earlier than about 600 to 650 A. D. For the Viṣṇudharma we have to rely on what Prof. Hazra quotes. Chap. 66 quotes the famous words of the Gītā 'whenever there is decline of dharma &c.' (p. 143 n. 94) and then the same chap. mentions the incarnations of Viṣṇu including Buddha (p. 125). Therefore, the mention of the ten avatāras in the context of the words of the Gītā is natural and should not be regarded as spurious simply because it comes in the way of one's pet theories. On p. 144 he quotes ten verses from chapter 66 in which Buddha is described as son of Śuddhodana and his doctrines are stated. Prof. Hazra (on pp 145–146) gives four reasons which are quite unconvincing. The Purāṇas mention the avatāras of Viṣṇu in several places. The Bhāgavata in I. 3 names 22 avatāras. On p. 150 Prof. Hazra himself quotes a long passage about the evils of the Kali age from the Viṣṇudharma in which occurs a significant half verse 'utkocāḥ saugatāś-caiva Mahāyānaratās-tathā'. Here not only are the followers of Buddha mentioned but also those who are of the Mahāyāna persuasion. On p. 124 Prof. Hazra states that the Viṣṇudharma (p. 124 n. 45) mentions by name 33 authors of Dharmaśāstras, besides the Saptarṣis and others. Yāj. (I. 4–5) mentions only 19 promulgators of Dharmaśāstra (including himself and holding Śaṅkha-likhita as one). Both the Viṣṇudharma and the Viṣṇudharmottara are not mentioned by the Matsya. Therefore, it must be held that they were not recognized as Upapurāṇas at the time when the verses about Upapurāṇas were interpolated in the Matsya and were not so recognized till at least the 8th or 9th century A. D. The Viṣṇudharma is opposed to what is stated by all writers from the Gṛhya and Dharmasūtras, by Manu (III. 128–186), by Matsya, Kūrma and other Purāṇas about the qualifications of the brāhmaṇas to be invited at a śrāddha dinner (vide H. of Dh. vol. IV pp. 384–387). It expressly says that squint-eyed, hunch-backed, impotent, poor and diseased brāhmaṇas should be mixed up at a śrāddha along with those who are deeply versed in the Veda.[1409] This does not bespeak an early date. On p. 138 Prof. Hazra refers to several nibandhakāras as quoting from Viṣṇudharma such as Gadādhara up to Ballālasena, Aparārka and Kṛtyakalpataru. These do not carry the date beyond 1000 A. D. and besides an examination of quotations in only one work (Aparārka) will show that the

1409. काणाः कुब्जाश्च वन्ध्राश्च दरिद्रा व्याधितास्तथा। सर्वे श्राद्धे निमोक्तव्या निखिला वेदपारगैः॥ (Hazra p. 153 n 117).

Viṣṇudharma was an hotch-potch bringing together passages from several sources (vide note).[1410] Prof. Hazra himself holds that the original Viṣṇudharma was appropriated and recast by Bhāgavatas and that many verses quoted from Viṣṇudharma by Raghunandana, Govindānanda and the Madanapārijāta do not occur in the present work (pp. 154-155).

Then we come to the Viṣṇudharmottara. The only printed edition is that of the Venk. Press. It is a vast work divided into three sections. The first deals with geography, solar and lunar dynasties, astronomy and astrology, gotra and pravara, śrāddhas, Manvantaras, Bharata's fight with Gandharvas and Śatrughna's with Lavaṇa. The 2nd section deals with various aspects of Rājadharma and the third section of the Purāṇa deals with Citrasūtravidhāna and contains several topics such as painting, dancing, music, song, rasas, riddles, dramaturgy, metrics, figures of speech, construction of images, building of temples, symptoms of approaching death, gifts of various kinds, law and justice, hermits and sannyāsins. On p. 212 Dr. Hazra places this Purāṇa between 400-500 A. D. Reasons of limitations of space preclude any detailed criticism of Prof. Hazra's treatment. In III. 351.54 Buddha is mentioned as an avatāra which Prof. Hazra says is 'most probably spurious' (p. 212) and advances no reasons for this summary judgment. He puts in his usual argument of its non-Tantric[1411] character and frequent use of the word prādurbhāva

---

1410. अपरार्क on pp. 368-370 quotes about 20 verses from विष्णुधर्म, some of which may be examined here : षष्टिं वर्षसहस्राणि स्वर्गे वसति भूमिदः। आच्छेत्ता चानुमन्ता च तान्येव नरके वसेत् ॥. This very verse is q. by अपरार्क on p. 370 from आदित्यपुराण. This verse is stated to be derived from व्यास and मनु in E. I. vol. 12 p. 135. The गृहस्थरत्नाकर p. 517 quotes it from बृहस्पति, while बृहस्पतिस्मृति (Ānan. collection) verse 29 has the latter half of it. On p. 369 the verse यत्किञ्चित्कुरुते पापं is quoted from विष्णुधर्म but the same is quoted by अपरार्क himself on p. 370 from मत्स्य and it is verse 7 of बृहस्पतिस्मृति and is also अनुशासन 62. 19 and वसिष्ठधर्मसूत्र 29. 16. Then at the end of that long passage is verse आस्फोटयन्ति पितरः (अपरार्क p. 370), which is बृहस्पतिस्मृति 17 and पद्मपुराण VI. 33. 17.

1411. I fail to understand what Prof. Hazra definitely means by non-Tantrik character. He admits (on p 218) that *bījas* and *kavacas* are found in Viṣṇudharmottara of which section I. chap. 226 names over 100 मातृs, some of whose names are काली, महाकाली, अपराजिता, कालजूती, दुर्भगा, कराला, कपाली, पिशाची &c.; chap. 237 of विष्णुधर्मोत्तर (verse 20) refers to वैष्णवकवच and at the end we have purely Tāntrik formulas, some of which quoted as specimens are : 'ओं सुकारे प्रकटोत्कट विकट-

(Continued on next page)

and not 'avatāra' which latter, he says, occurs in two places only. Prof. Hazra often attaches undue importance to insignificant details. Whether the word 'prādurbhāva' is used or 'avatāra' is used matters little. The same Purāṇa uses both words promiscuously e. g. Narasiṁha (36. 1, 'avatārānahaṁ vakṣye') begins with the word 'avatāra' and in 39. 1 employs the word 'prādurbhāva' (ataḥ paraṁ Hareḥ puṇyaṁ prādurbhāvam) and in the colophons of all chapters from 36 to 53 the word 'prādurbhāva' is used. The Matsya 247. 1 starts with 'prādurbhāvān purāṇeṣu Viṣṇoramitatejasaḥ'. In 247. 19–21 the Matsya employs the word 'avatīrṇaḥ' with regard to Vāmana and Nṛsiṁha and in 246. 4 'avatīrṇo jagadyoniḥ·····Vāmananeneha rūpeṇa &c.'. Padma V. 13. 182 speaks of twelve avatāras; Viṣṇu V. 16 also uses the word 'avatāra'. On p. 199 he gives a table of passages that are common to Manu, Yāj., Nārada and Viṣṇudharmottara, on p. 200 another table of passages common to Bharata's Nāṭyaśāstra and Viṣṇudharmottara, and on page 202 a table of passages common to Matsya and Viṣṇudharmottara and holds that the Matsya borrows. This is a most astounding proposition. The Matsya does not even mention the Viṣṇudharmottara as an Upapurāṇa; the only sure and earliest date is that the latter is mentioned by Alberuni. That does not carry the matter beyond 900–1000 A. D. The Matsyapurāṇa might have been tampered with. The reasons assigned for his opinion by Prof. Hazra are, to say the least, flimsy and unconvincing. It is further to be noted that there are twelve verses that state that some phenomena are not to be held to be utpātas, that are common to Matsya 229. 14–25, Viṣṇudharmottara (II. 134. 15–26) and the Bṛhatsaṁhitā (45. 83–94), which are quoted by the Adbhutasāgara pp. 743–744 as occurring in all these three and in Bārhaspatya. I have dealt with this matter above on p. 768 n 1240. Varāha states that these

इंद्र पूर्वतो रक्ष। ओं हैं हैं हैं हैं दिनकरसहस्रकान्तसमोग्रतेज पश्चिमतो रक्ष रक्ष। ओं निरिनिरि प्रदीप्तज्वलनज्वालाकालमहाकपिलजटिल उत्तरतो रक्ष। ओं चिलिचिलि मिलिमिलि चेकडि गौरि गान्धारि विषोदनि विषं मोहयतु स्वाहा दक्षिणतो रक्ष।'. If this is not tantricism I should like to know what it is. In विष्णुधर्मोत्तर II. 165 there is great eulogy of the Gāyatrī (or Sāvitrī) mantra. Therein verses 55 ff of the same Purāṇa prescribe how Gāyatrī can be used against one's bad enemy. A few verses are quoted: अभिचारेषु तां देवीं विपरीतां प्रयोजयेत्। कार्यो व्याहृतयश्चात्र विपरीताक्षरास्तथा। विपरीताक्षरं कार्यं शिरश्च मनुजेश्वर। आदौ शिरः प्रयोक्तव्यं प्रणवान्ते च यादव। स्वाहास्थाने च कट्कारे साध्यनामसमन्वितम्। ···अभिचारे च होतव्या राजिका विषमिश्रिताः। स्वरक्तमिश्रं होतव्यं कटुतैलमथापि वा। ···महापराधं बलिनं देवब्राह्मणकण्टकम्। अभिचारेण यो हन्याच्च स दोषेण लिप्यते।' 65.

verses are the summaries (ṛṣiputrakṛtaiḥ ślokair-vidyād-etat *samāsoktaiḥ*) of the ślokas of Ṛṣiputra. Therefore, the view that they are borrowed by Varāha from the Matsya or Viṣṇudharmottara would be out of question. The two Purāṇas do not say whence they have taken them. Therefore, it would not be unjustifiable to hold that in both Purāṇas the verses of the Bṛhat-saṁhitā were inserted. There is another circumstance that strengthens this last view. The Adbhutasāgara on pp. 493-494 quotes seven verses from the Bṛhad-yātrā of Varāha alone. These verses are quoted by Utpala on Br. S. 47. 22 (where Varāha says 'sadasat-svapnanimittam yātrāyām svapnavidhir-uktaḥ) from 'Yātrā'. These verses (8 in all) are Varāha's own (as he says) and not taken from any other source. Three of these verses on dreams occur in the Viṣṇudharmottara (II. 176. 9-11). They are quoted above on p. 776 note 1254. Prof. Hazra does not appear to have carefully gone into the several works of Varāhamihira and is not right when he says (on pp. 201 and 211) that 'the Viṣṇudharmottara does not refer to or utilize the works of Varāhamihira'. The Viṣṇudharmottara is an encyclopaedia, while Varāhamihira was a great astronomer and astrologer. He would turn to his predecessors in his own subject if he wanted to borrow and he expressly mentions numerous predecessors (vide pp. 591-594 above) and not to an Upapurāṇa (which in my view did not exist or at least was not recognised as an authority when Varāha wrote in the first half of the 6th century A. D.) Besides, the presumption to be drawn from the nature of the Upapurāṇa is in favour of holding that it borrows.

Prof. Hazra deals with the Narasiṁha-purāṇa on pp. 219-266 of his 'Studies' vol. I. The only printed edition is that published in 1911 by Gopal Narayan and Co. (Bombay) in 68 chapters based on three mss. about which no information is given. This Purāṇa appears to have been composed solely for the glorification of Narasiṁha identified with Nārāyaṇa. Prof. Hazra has used several mss., two, the oldest, being dated in śaka 1567 (i.e. 1645 A. D.), some of the others are not dated and a few are dated so late as 1798 A. D. and 1810 A. D.; and some are written in Bengali script. On p. 322 Prof. Hazra says about one ms. in Eggeling's cat. of India Office mss. that it was copied about 1500-1600 A.D. and its last five folios were supplied in 1789 A. D. No reasons are given why this ms. should be regarded as being copied between 1500-1600. This is probably a guess, so all the mss. consulted are not earlier than the 17th and following centuries. Most mss. do not

agree with the printed edition in the number of chapters and also lack certain chapters of the printed edition. Prof. Hazra holds (p. 242) on various grounds, all of which cannot be examined here, that the '*present* Narasiṁhapurāṇa is to be placed between 400–500 A. D.' One or two of his characteristic arguments will be noticed here. In chap. 36. 9 (kalau prāpte yathā Buddho bhaven-Nārāyaṇaḥ prabhuḥ) Buddha is mentioned; Mārkaṇḍeya promises in chap. 36 to narrate stories about eleven avatāras (among whom Balarāma, Kṛṣṇa and Buddha are included) and in chapters 37–54, the stories of all avatāras except Buddha are given and it is added[1412] in chap. 54 that 'I have spoken of the ten incarnations of Viṣṇu. The devotee of Nṛsiṁha who always listens to these attains Viṣṇu'. It may be noted that Balabhadra is mentioned in a half verse (36. 8) which is found only in ms. 'ga' of the three mss. of the printed edition. In chap. 53 a few exploits of Balarāma and Kṛṣṇa are narrated in the same chapter and so the half line was inserted later. As the story of Buddha is not given Prof. Hazra holds that the verse in 36. 9 is undoubtedly spurious (pp. 230 and 249). It never occurred to Prof. Hazra that the sectarian zeal of a bigoted Vaiṣṇava might have never cared to give the life of Buddha who was not concerned with (but was antagonistic to) the varṇa system and the Vedas or might have omitted the story of the life of Buddha even if it occurred in the ms. from which he copied. The present author thinks that 36.9 is a genuine verse and enumerates Buddha as an avatāra following the universal belief held in India at least from the 9th or 10th century A. D. that Buddha was an avatāra, but probably bigotry led to the omission of the details of Buddha's life. Besides, the verse is capable of another interpretation. It is only the stories of ten avatāras (excluding Buddha) that lead a devotee to Viṣṇu. A devotee may worship any one of Nṛsiṁha, Rāma or Kṛṣṇa, and reach Viṣṇu, but hardly any orthodox work has ever stated that worship of Buddha alone (an avatāra) will lead to attainment of Viṣṇu. Therefore, it is proper to hold that the story of Buddha's life might not have been given at all or was purposely omitted. On p. 239 Prof. Hazra puts forward a peculiar argument. According to the Narasiṁha-purāṇa chap. 53. 31, says Prof. Hazra, Kṛṣṇa embodies only a part of Viṣṇu's śakti[1413] and therefore 'the Narasiṁha is to be dated

1412. दशावतारः कथितास्तवैव हरेर्मया पार्थिव पापहन्तुः। इमं सदा यस्तु शृणोतिभक्तः शृणोति नित्यं स तु याति विष्णुम्। नरसिंहपु० 54. 6.

1413. सितकृष्णे च मच्छक्ती कंसादीन् घातयिष्यतः। ...तयोः सिता च गौरिष्यां वसुदेवाद्भविष्यति॥ सच्चकृष्णा च देवक्यां वसुदेवाद्भविष्यति॥ नरसिंहपु० 53. 31, 33-34.

earlier than the present Bhāgavata in which Kṛṣṇa is called *bhagavān* himself (Bhāgavata I. 3. 28). As the present Bhāgavata is to be dated in the 6th century A. D. the Narasiṁha is to be placed not later than 500 A D.' Great controversies have raged over the date of the Bhāgavata. The present author holds that the Bhāgavata-purāṇa does not belong to the 6th century A. D. It will be shown below that while Rāmānuja quotes more than a hundred verses from the Viṣṇupurāṇa, which he regarded as one of supreme authority over other Purāṇas (in Vedārthasaṅgraha pp. 141–142 of D. C. edition) he does not quote the Bhāgavata at all in his bhāṣya on the Vedāntasūtra. A bigoted devotee of Narasiṁha may say that Narasiṁha avatāra is the perfect avatāra of Viṣṇu, while Kṛṣṇa is only a partial one. But surely that cannot determine the dates of the respective purāṇas. What bigoted devotees are capable of saying may be seen from Brahmāṇḍa III. 36. 18–20 quoted later in this section, where it is asserted that the reward of repeating thrice the thousand names of Viṣṇu is yielded by repeating one name of Kṛṣṇa once. The strongest argument against the authenticity and early date of the present Narasiṁhapurāṇa has not been properly and adequately emphasized or appreciated by Prof. Hazra. The Matsya (53. 60–63) gives meagre details about the four Upapurāṇas expressly named by it, but about the Narasiṁha it makes one definite statement that it contained 18000 verses (53. 60). The present Narasiṁha contains only about 3400 verses.[1414] Therefore, the old Narasiṁhapurāṇa exists no more and in its place a new one has been substituted, probably containing some of the topics and chapters contained in the old one. We do not know the extent of the Narasiṁha mentioned by Alberuni. For ought we know he might have referred to the old extensive purāṇa or the new stripling substituted in its place. Even some of the mss. copied in comparatively recent times drop several chapters of the printed purāṇa; on p. 249 Prof. Hazra holds that chapters 34 verses 43–55, and chapters 61, 65 (on 68 holy places for Vaiṣṇavas), 66, 67 are genuine parts, though dropped in

1414. Even a late writer like नरसिंहराजपेयिन् patronized by the Gajapati king Mukundadeva (1559–1568 A. D.) says in his नित्याचारप्रदीप (B. I, ed.) vol. I. p. 18 'प्रसिद्धनारसिंहस्य अष्टादशसाहस्रसंख्या यद्यपि नोपलभ्यते किञ्चित् काल-क्रमाल्लुप्तमिति प्रतिभाति।'. It further says that the Nandi or Nanda purāṇa is a part of Skanda and that, since Lakṣmīdhara says that the Kālikā is an Upapurāṇa, those that say that by the word Bhāgavata the Kālikā is meant are wrong and then enumerates the 18 उपपुराणs.

some mss. Prof. Hazra's judgments on various matters are most liable to be challenged; but considerations of space prevent any detailed treatment. On p. 252 he holds that in chap. 6 the story of the birth of Vasiṣṭha and Agastya as the sons of Mitra and Varuṇa, the story of Yama and Yamī are comparatively late additions. The story of the birth of Vasistha from Urvaśī and Mitra and Varuṇa is alluded to even in the Ṛgveda (VII. 33. 11) and in the previous verse (10) of the same hymn Vasiṣṭha, Agastya and Mitrāvarunau are brought together. The story of Yama and Yamī occurs in Ṛg. X. 10. The Narasiṁha itself states (in chap. 14 1) that the story of Yama and Yamī is Vaidikī. The Purāna may have added some fringes and embellishments, but the main theme is the same in both. On p. 254–255 and note 330 Prof. Hazra was constrained to admit that the Narasiṁhapurāṇa had been revised more than once, remarks that Hemādri had a more extensive purāna before him than the printed one and that a comparison of the verses quoted from the Narasimhapurāṇa by the Madanapārijāta pp. 301–302, Smṛtitattva on āhnika (vol. I. p. 411) and Nityācārapradīpa (vol. I p. 617) show that the text of the Narasiṁha used by Raghunandana and Narasimha-vājapeyin agrees more with the printed text than the text used by Madanapāla (about 1375 A. D.), less than 200 years before Raghunandana.

The extant Narasiṁhapurāṇa is an insignificant one as compared with the principal Purāṇas like Vāyu, Matsya, Viṣṇu; the Sāmba is not quoted at all by Aparārka, the Viṣṇudharma only twice and even the Viṣṇudharmottara is quoted by Aparārka only 7 times for about 25 verses in all. The very extensive digest Kalpataru (first half of 12th century A. D.) contains hardly any quotation from Viṣṇudharmottara on vratas (though the latter devotes about 1600 verses to vratas), nor is it quoted in the sections on brahmacāri and other kāṇḍas, while hundreds of verses are quoted from Matsya, Brahma, Bhaviṣyā, Mārkaṇḍeya and other Purāṇas. Aparārka in his huge digest of 1252 printed pages quotes the Narasiṁhapurāṇa only 9 times and in all about 30 verses only, of which about half are in respect of *sannyāsa*, while the Brahmapurāṇa is quoted 68 times for hundreds of verses, the Matsya is quoted over 50 times for several hundred verses. The Tulasī plant is now sacred to the devotees of Viṣṇu, but it does not figure in early Paurāṇika or other literature. It is mentioned in chapters

31. 87 (in a prose passage) and 34 (19 and 23) of the printed Narasiṁhapurāṇa. As usual Prof. Hazra holds these references are due to later revisions and should not be held to suggest a late date for the extant Narasiṁhapurāṇa (p. 255). Tulasī-māhātmya is very much in evidence in the Padma e. g. in IV. 94. 4–10, V. 58. 109ff and V. 59, VI. 24. 2–43. The very late part of Padma VI (chap. 98–107) contains the story of Jālandhara, whose wife Vṛndā is said to have become Tulasī. Prof. Hazra fails to realize the full force of his own admission that the Narasiṁha was revised several times and that writers of the 16th century had a version before them different from that before the writers of the 13th or 14th century. In the author's opinion the whole Purāṇa becomes suspect and that by mere diplomatic criticism one would not be able to support beyond doubt any chronological conclusion derived from the present truncated and garbled version of the original Narasiṁha.

So much space had to be devoted to an examination of Prof. Hazra's work on the Upapurāṇas for cogent reasons. His is the latest and most elaborate treatment of Purāṇas and particularly of Upapurāṇas, on which he has bestowed immense labour. His opinions, particularly about the dates of the Upapurāṇas, are likely to be taken as the last word on the subject and even his unfounded surmises are likely to be taken as well-established conclusions. Modern Sanskrit scholars have sad experience about such matters. Max Muller, working back from the date of Buddha and assigning arbitrarily two hundred years each for three periods viz. the Upaniṣad period, the Brāhmaṇa period and the Saṁhitā period, inferred that the composition of the Vedas was to be assigned to a period about 1200 B. C. He no doubt said that his periods were the minimum and that his was a pure surmise. Yet most writers who have not themselves made a deep study of the Veda assign the Vedas to about 1200 to 1400 B. C. even after the lapse of about one hundred years from the time when Max Muller launched his surmises. For example, Prof. Toynbee in the table of the time spans of the growth phases of civilizations on p. 758 of volume IX (1954) gives the dates of Epiphany and of breakdown of the Indic civilization as 1375 B. C. and 725 B. C. respectively. The present author does not at all agree with the dates assigned to the Upapurāṇas by Prof. Hazra and with the methods and reasoning adopted for arriving at those dates. He had to perform this painful duty even in spite of his regard for Prof. Hazra.

There are numerous works, translations and papers on Purāṇas. A few alone are mentioned here. Eugene Burnouf translated the Bhāgavata Purāṇa in French in five volumes in 1840 and later years. The translations of Viṣṇu and Mārkaṇḍeya were made respectively by H. H. Wilson and Pargiter; Prof. Kirfel's Introduction to 'Purāṇa pañcalakṣaṇa' (1927, Bonn) was translated in the Journal of the Shri Veṅkaṭeśa Institute, vol. VII pp. 81–121 and vol. VIII. pp. 9–33; Kirfel in Festschrift Jacobi pp. 298–316; K. P. Jayaswal on 'Chronological tables in Puranic chronicles' in J. B. O. R. S. vol. III pp. 246–262; 'Purāṇas and Indus Aryas' and 'Study of ancient Geography in Agnipurāṇa' in I. H. Q. (1933), vol. 18 pp. 461 and 470; Prof. Ramchandra Dikshitar's studies on Vāyu and Matsya and Index to (five) Purāṇas in three volumes; J. R. A. S. 1941 pp. 247–256 and pp. 337–350 by W. Ruben for 'Puranic line of heroes'; J. A. S. B. for 1938, vol. IV. Article 15 pp. 393 ff; 'Purāṇas on Guptas' in I. H. Q. vol. 21 pp. 141 ff and 'Gupta Inscriptions and Purāṇas' by Dr. D. R. Patil in B.D.C.R.I. vol. II. pp. 148–165; H. C Raychaudhuri in a paper in the Pro. of the 10th Oriental Conference, pp. 390 ff for discrepancies of Puranic accounts with epigraphic records; paper by Mr. B. C. Majmudar on 'Origin and character of Purāṇa literature' in Sir Asutosh Mukharji Silver Jubilee vol. III, Orientalia, part 2 pp. 9–30; a verse from p. 30 of 'Inscriptiones Sanskrites de Champa et du Cambodge' refers to the provision made by a king of the 6th century A. D. for the daily reading of the Bhārata, Rāmāyaṇa and Purāṇas;[1414a] the Penukonda plates of the early Gaṅga king Mādhava II, (E. I. vol. 14 p. 338) speaks of him as knowing 'the essence of many śāstras, Itihāsa and Purāṇas' (probably in 6th century A. D.); Purāṇas are mentioned as studied in 578 A. D. (in E. I. vol. 28 p. 59).

In the following notes on individual Purāṇas and Upapurāṇas the author adds a few notes based on his own study of the Purāṇas and (printed) *digests* (*nibandhas*) of an early age. He desires to emphasize that the earliest works that can be called digests and are available in print cannot be placed earlier than about 1100 A. D. Though there is difference of views among scholars about the exact dates of composition, the Mitākṣarā, the Kṛtyakalpataru (which is a regular Digest of various kinds of materials on Dharmaśāstra) and Aparārka's work (though in

---

1414 a The verse is रामायणपुराणान्यामशेषं भारतं वदत्। अक्षुण्णाध्वमखेषां स च ब्रह्मणस्थितिद्द, vide I. H. Q. vol. 22 pp. 221–223.

form a commentary on Yājñavalkya-smṛti is still in the nature of a Digest) are three printed works more or less contemporary and composed between about 1100 to 1140 A. D. The Kṛtya-kalpataru on Vyavahāra mentions by name Prakāśa, Halā-yudha, Kāmadhenu and Pārijāta. Besides, Kṛityakalpataru (Niyata p. 280) cites the explanation of Parārika (in Āp. Dh. S. I. 17. 26) by the Smṛtimañjarī (of Govindarāja) and also on śrāddha (pp. 46 and 259). It has been shown in H. of Dh. vol. I. that Prakāśa (pp. 306–308), Pārijāta (pp. 308–309), Smṛtimañjarī (pp. 312–314) were works of the digest *genre*. The Kāmadhenu of Gopāla also appears to have been a digest (H. of Dh. vol. I. pp. 293 ff.). The author Gopāla was a friend of Laksmīdhara (vide Introd. to Dānakāṇḍa p. 49), but, since the latter employs the past tense (*cakre*) with reference to Gopāla's work and the present tense (*tanyate kalpavṛkṣaḥ*) as regards his own work it follows that the Kāmadhenu was composed at least a few years before the Kalpa-taru. As no mss. of the Prakāsa, Pārijāta and Kāmadhenu are available it is impossible to say anything about their exhaus-tiveness or otherwise. But from the summary at the end of the ms. on the Prāyaścitta section of the Smṛtimañjarī (H. of Dh. vol. I. p. 312 note 714) it appears that it must have been fairly large and was composed on the same lines as the later Kṛtya-kalpataru, since it began with Paribhāṣākāṇḍa and Brahmacāri-section, then dealt with Gṛhasthadharmas, Dāna, Śuddhi and Āśauca, Śrāddha, then with Vānaprastha and Pravrajyā (corresponding to the mokṣakāṇḍa of Kalpataru) and ended with Prāyaścittas. These predecessors of the Kalpataru were superseded by the extensive work of Lakṣmīdhara, who himself receded into the background when the works of Hemādrī, Caṇḍeśvara, Madanaratna, the Vīramitrodaya, the Mayūkhas of Nīlakaṇṭha became popular. Even before the Kāmadhenu and probably the Smṛtimañjarī also, Bhoja (about 2nd quarter of 11th century A. D.) composed (or patronised the composition of) several works such as the Bhujabala and Rājamārtaṇḍa which exhaustively dealt with the astrological requirements of *saṁskāras* from *puṁsavana* to marriage and also of vratas, yātrā, śāntis, pratiṣṭhā (vide the author's paper on 'King Bhoja and his works on Dharmaśāstra and astrology' in JOR, (Madras), vol. XXIII for 1953–54 pp. 94–127 for five works of Bhoja). So there was nothing very novel in the Kṛtyakalpataru except its exhaustive and logical treatment of all topics and profuse quotations from the Epics and Purāṇas. The Mitākṣarā does

not quote much from the Purāṇas, but Aparārka and Kalpataru quote them profusely. The Kalpataru quotes about 600 verses from Devīpurāṇa, over 200 verses each from Kālikā, Ādityapurāṇa, Nandipurāṇa and Narasiṁhapurāṇa (all Upapurāṇas) while it quotes none at all from Viṣṇudharmottara. The Kalpataru did not probably regard it as authoritative, though Aparārka and the Dānasāgara utilized it to some extent. The learned editor of the extensive Kalpataru, Prof. Aiyangar, has made great efforts to identify the quotations therein from the Purāṇas, and laid all workers and scholars under great obligations. But many quotations have eluded him as will be shown later on. He has been assiduous in pointing out how Hemādri, Caṇḍeśvara and Mitramiśra have copied wholesale from the Kalpataru. It is not impossible that even the Kalpataru might have done the same to some extent as regards its predecessors such as the Pārijāta, Prakāśa, Smṛtimañjarī, and Kāmadhenu. But as those works are not yet available, no positive conclusion can be drawn about its borrowing for the present

The present author edited 286 verses from the Rājamārtaṇḍa (containing 1462 verses) on tithis, vratas and utsavas in ABORI vol. 36, parts III–IV, 1956, pp. 306–339,). It describes several vratas and utsavas like Indradhvajotthāpana and the work is about 75 years older than the Kalpataru. The Kalpataru is studiously silent as regards Bhoja, though it mentions Kāmadhenu, Govindarāja, Prakāśa and Halāyudha and it hardly anywhere mentions the vratas described by the Rājamārtaṇḍa. The Mitākṣarā does mention Dhāreśvara Bhoja. Probably Lakṣmīdhara did not like that a comparison should be instituted between his treatment of vratas and Bhoja's.

Alberuni's work on India translated by Sachau furnishes us with some data about the chronology of Purāṇas. On p. 130 (of Sachau's tr.) he says he heard the following as the Purāṇas viz. Ādi, Matsya, Kūrma, Varāha, Nārasiṁha, Vāmana, Vāyu, Nanda, Skanda, Āditya, Soma, Sāmba, Brahmāṇḍa, Mārkaṇḍeya, Tārkṣya (i. e Garuḍa), Viṣṇu, Brahma, Bhaviṣya. It will be noted that he mixes in this list Purāṇas and Upapurāṇas. He further states that he had seen only portions of Matsya, Āditya and Vāyu. Then on p. 131 (of Sachau's tr.) there is another list which was read to him from the Viṣṇu (viz. the 18 principal Purāṇas, Śaiva being substituted for Vāyu). Then, on p. 229 (of Sachau's tr.) he sets out from Āditya some details about the regions below the earth and shows how Vāyu differs from it and

on p. 248 he sets out details about Meru from Viṣṇu, Vāyu and Āditya. As he wrote his work in 1030 A. D. one has to conclude that Purāṇas having the names cited by him existed some time before 1000 A. D. at the latest.

Some of the papers of Prof. Hazra and others on the principal Purāṇas and on some of the Upapurāṇas are brought together in one place by Dr. Pusalkar in his work 'Studies in Epics and Purāṇas' pp. 218–225; a few of them are mentioned here. About sixteen papers of Prof. Hazra contributed to various Journals from time to time were included in his work 'Studies in Purāṇik Records of Hindu Rites and customs', which is referred to as PRHR here and H. stands for Prof. Hazra and U. for Upapurāṇa.

CHAPTER XXIII

Brief Notes on individual Purāṇas and Upapurāṇas

Agnipurāṇa—'Present Agni' (by H.) in I. H. Q. vol. XII pp. 683–691: 'Studies in genuine Āgneya alias Vahnipurāṇa' by H. in 'Our Heritage' vol. I part 2 pp. 209–245 and vol. II part 1 pp. 76–109; 'Discovery of genuine Āgneyapurāṇa' by H. in J. O. I. (Baroda) vol. V (1956) pp. 411–416 (shows that present Agni published by Ānan. Press is not the original Purāṇa, that this was compiled late, while the original Āgneya or Vahni is not yet printed); the Dānasāgara p. 7. verse 63 speaks of an Āgneya which it has discarded apart from one which it has utilized (p. 2 verse 11). As usual with most Purāṇas, the printed Āgneya glorifies itself by saying (in chap. 272. 13 and 17) that in that Mahāpurāṇa Hari resides in the form of different lores and the Āgneya is a great purāṇa full of Veda and all *vidyās*.

Ādipurāṇa (U.)—B. V. vol. VI (1945) pp. 60–73 (H. postulates an earlier and a later version). Vāyu 104.7 mentions an Ādika among the 18 principal purāṇas (including the Brāhma). Alberuni's list (which mixes up Purāṇas and Upapurāṇas) mentions an Ādipurāṇa; an Ādipurāṇa is published by the Veṅk. Press in 29 chapters. H. in 'Studies &c.' vol. I. pp. 279-303 deals at length with this and tries to establish that there was an earlier Ādi Purāṇa of which no mss. are yet available (p. 211) and holds that it is to be dated between 1203 to 1525 A.D. ('Studies' p. 288). Ādi and Ādya mean the same thing. But Kullūka on Manu II. 54 quotes some verses from Ādi which are ascribed to Brāhma by G. R. p. 314. The digests make a confusion between Ādi and Ādityapurāṇa. Vide H. in 'Studies' vol. I. pp. 302–303. The printed one is a late compilation and none of the verses quoted by Lakṣmīdhara and Aparārka occur therein (vide 'Studies' vol. I pp. 286–289).

Ādityapurāṇa—Mentioned by Matsya 53.62 as U. and Alberuni (Sachau I. p. 130, 229, 248); quoted by Kṛtyakalpataru on Rājadharma (about 2 verses), Dāna (about 125), Śrāddha (about 20), Vrata (about 22); the Sm. C. quotes many verses on Āhnika and Śrāddha from both Ādi and Āditya and quotes both

separately on 'śauca' on the same page (I p. 94). Aparārka also quotes many verses from both Ādi and Āditya. The Dānasāgara quotes about forty verses from both the Ādi and Āditya purāṇas.

Ekāmra (a work of Orissa):—H in P. O. vol. 16 pp. 70–76 and 'Studies &c.' vol. I. p. 341 (assigns it to 10th or 11th century A. D.)

Kālikā:—(an U. in 93 chapters pr. by Veṅk. Press, Bombay); vide H. in A.B.O.R.I. vol. XXII. pp. 1-23; Sharma in I. H. Q. vol. 23 pp. 322–326 (holding that Kālikā was completed during the reign of king Dharmapāla of Kāmarūpa); H. in B. V. vol. 16 (1956) pp. 35–40 questions the view of Sharma; 'Date of Kālikā' by Prof. Gode in J. O. R. (Madras) vol. X. pp. 289–294; Dr. Raghavan in J. O. R. (Madras) vol. XII. pp. 331–360 (shows that there are three separate recensions of the Purāṇa). H. distinguishes between an earlier version and the extant one and places the latter in the 10th or 11th century; on the words of Matsya 53. 60–64 'tad-etebhyo vinirgatam', the Kalpataru explains 'vinirgatam' as 'udbhūtam' (sprung from) and gives the Kālikā as an illustration (Brahmacāri p. 30) of an Upapurāṇa sprung from Mahāpurāṇas; the Kalpataru quotes from it about 100 verses on vrata, on dāna, 14 on gṛhastha, 12 on vyavahāra (about witnesses and ordeals), 5 each on niyatakāla and tīrtha and 2 on brahmacārin; Aparārka quotes it on pp. 15, 226, 377 (15 verses on marriage and house settlements for brāhmaṇas), 924; the Sm. C. II. p. 442 quotes one verse from it on śrāddha. The Dānasāgara quotes many verses from it. The Veṅk. ed. mentions Viṣṇudharmottara in chap. 91. 70 and 92. 2[1414b]; the extant Kālikā would have to be placed before 1000 A. D. Vide p. 809 n 1317 above for the Kālikā saying that the howl of a female jackal is auspicious.

Kalkipurāṇa—Vide H. in 'Studies &c.' vol I. pp. 303–303. There are three editions, all from Calcutta; H. remarks that it is a late work not quoted by any writer (p. 308) and that it is not to be placed later than the 18th century A. D.

Kūrma—(Veṅk. Press ed.); is divided into Pūrvārdha (53 chapters) and Uttarārdha (46 chapters); vide H. in 'Purāṇas

---

1414 b. कालिका 192. 2 says विष्णुधर्मोत्तरे तन्त्रे बाहुल्यं सर्वतः पुनः। द्रष्टव्यस्तु सदाचारो द्रष्टव्यास्ते प्रसादतः॥ and then narrates the story of वेताल and भैरव who required a son.

in history of Smṛti' I. C. vol. I. pp. 587–614 and in 'Smṛti chapters of Kūrma' in I. H. Q. vol. XI. pp. 265–286 and P.R.H.R. pp. 57–75; H. holds that it was originally a Pāñcarātra work, but was altered to make it a Pāśupata one. In several passages the Kūrma speaks of God as one (II. 11. 112–115), but divided into two, Nārāyaṇa and Brahmā (in I. 9. 40) or as Viṣṇu and Śiva (in I. 2. 95) or in three (as in I. 10. 77). The Sm. C. I. p. 199 quotes verses from I. 2. 94, 95, 97–99 which allow a person to worship either Viṣṇu with the mantra (Ṛg. I. 22. 20 or X. 90) or Śiva with Rudragāyatrī, Rudras (Tai. S. IV. 5. 1–11) or 'Tryambakam' (Ṛg. VII. 59. 12, Tai. S. I. 8. 6. 2.) or with 'Om namaḥ Śivāya'. The Sm. C. quotes from Kūrma about 94 verses on āhnika and 19 on śrāddha. In I. 1. 21–22 it states that there were four saṁhitās of the Purāṇa viz. Brāhmī, Bhāgavatī, Saurī and Vaiṣṇavī and that the present one is the Brāhmī in 6000 verses; the Nāradīya (I. 106. 1–22) furnishes a summary of the other three saṁhitās. Padma (Pātālakhaṇḍa 102. 41–42)[1414c] expressly names the Kūrma and quotes a verse from it. Kalpataru (on śrāddha p. 119) quotes two verses from it. Aparārka (pp. 201, 204, 207) quotes three verses from Kūrma (all in relation to fast).

Gaṇeśapurāṇa — Vide H. in JGJRI. vol. 9 pp. 79–99.

Garuḍa — Vide p. 769 above for Ballālasena discarding it; H. in ABORI. vol. 19 pp. 69–79, PRHR pp. 141–145; A. P. Karmarkar on 'Bṛhaspatinītisāra' in Siddha-bhāratī vol. I. pp. 239–240; Dr. L. S. Sternbach in ABORI. vol. 37 pp. 63–110 on 'Cāṇakyarājanītiśāstra and Bṛhaspati-saṁhitā of Garuḍa-purāṇa'; the Garuḍa is quoted by the Sm. C. II. p. 357 (on Ekādaśī); vide H. of Dh. vol. I. pp. 173–175 which show how the Garuḍa either reproduces or summarizes verses from Yāj. I. and III.; chap. 107 of the present Garuḍa gives a summary of the Parāśarasmṛti in 39 verses (vide H. of Dh. vol. I. p. 191). The extant Garuḍa will have to be placed not later than 950 A. D. and not earlier than the 6th century A. D.

Devīpurāṇa—(U.) Vide H. in NIA vol. V. pp. 2–20 (assigning it to the latter half of the 7th century A. D.). Vide p. 769 above

---

1414 c. कौर्मं समस्तपापानां नाशनं शिवभक्तिदम्। इदं पद्मं च सुभाषं पुराणज्ञेन भाषितम्। ब्रह्महा मद्यपः स्तेनस्तथैव गुरुतल्पगः। कौर्मं पुराणं श्रुत्वैव शुध्यते पातकात्ततः॥ पद्म (पातालखण्ड 102. 41–42).

for the reasons for which the Dānasāgara refused to utilize[1415] it; it is quoted by Bhujabala-nibandha (about 1040–50 A. D.) on how Saṅkrānti when occurring at different parts of the day affects different people.[1416] Kalpataru quotes Devī-purāṇa in several *kāṇḍas* viz. about 210 verses in Rājadharma (88 verses on fortified capital); 37 verses on worship of Devī on Āśvina śukla 9 with the *bali* of goats and buffaloes, 52 on raising a banner in honour of Devī, 10 verses on gavotsarga on Kārtika-amāvāsyā &c; in Vrata-kāṇḍa about 80 verses (on Durgāṣṭamī, 25 verses on Nandāvrata, 44 verses with a prose passage); 245 verses on *dāna* (such as 28 on Tiladhenu and Ghṛtadhenu pp. 147–151, 56 verses on Vidyādāna pp. 201–207, 98 verses on the construction of *kūpa, vāpī, dīrghikā* &c. pp. 289–299, 27 verses on laying out a park and planting trees pp. 300–303, 10 verses on building a rest-house for ascetics &c. pp. 312–313); in Tīrthakāṇḍa 103 verses (20 verses on śrāddha at a tīrtha without examining character and learning of brāhmaṇas); Niyatakālakāṇḍa quotes 30 verses; Brahmacāri-kāṇḍa quotes only a few; Gṛhasthakāṇḍa quotes 6 verses; Śrāddhakāṇḍa p. 21 quotes only one verse on Maghāśrāddha. Aparārka quotes about 34 verses (3 of which on qualifications of a sthāpaka are interesting, p. 16), as they require that he should possess a knowledge of the Vāma and Dakṣiṇa paths, of the Mātṛ cult, of Pāñcarātra and Śaiva śāstras.

Devībhāgavata (pr. by Venk. Press in 12 skandhas)—Vide H. in JOR (Madras) vol. 21 pp. 49–79 (tries to prove that it is younger than the Bhāgavata); 'Devi-bhāgavata and Bhāgavata' by Mr. Tadpatrikar in ABORI vol. 23 pp. 559–562; IHQ vol. 27 pp. 191–196 (Mr. Ramchandran says that the relief in Deogarh of Nara-Nārāyaṇa is based on Devībhāgavata IV. 5–10); H. in IHQ vol. 29 pp. 387–392 does not agree with Mr. Ramchandran.

Nandipurāṇa (U). Vide H. on 'Bṛhan-nandikeśvara and Nandikeśvara' in Dr. B. C. Law Presentation vol. part II, pp. 415-419 and in JGJRI vol. II pp. 305–320; Prof. Rangaswami Aiyangar in NIA vol. IV. pp. 157–161 on Nandipurāṇa (holds that the original Purāṇa is probably lost, that verses quoted from it by Lakṣmīdhara are almost all on gifts of various kinds).

1415. Vide above p. 328 for Nandāvrata for the mūlamantra and p. 425 of the Vratakāṇḍa (of Kalpataru) for other Śākta mantras.

1416. पूर्वाह्णे पीड्यते राजा मध्याह्ने च द्विजोत्तमाः। अपराह्णे यथा वैश्याः शूद्रास्त्वास्तमिते रवौ॥ हलायुध p. 337 quoting देवीपुराण.

Kalpataru on dāna quotes over 200 verses from it on dāna (of which 140 are on Vidyādāna pp. 207–222, 12 verses on Ārogyadāna, which provide for the establishment of an hospital with a physician knowing the eight aṅgas of āyurveda and provided with drugs &c); Aparārka (pp. 396–403) quotes about 100 verses on vidyadāna agreeing with those in Kalpataru and also quotes (pp 365–366) the same verses on Ārogyadāna; Kalpataru on Niyatakāla quotes 13 verses from this purāṇa advocating total abstention from flesh-eating (p. 323) and abstaining from flesh at least on the 4th, 8th, 12th 14th and 15th tithis, on Ṣaḍaśīti and sun's passage from one rāśi to another &c. (pp. 353–360). As this is one of the four upapurāṇas expressly named by the Matsya, as Alberuni mentions a Nanda-purāṇa which (appears to be the same as Nandi) and as it is largely quoted by Lakṣmīdhara, Aparārka and Dānasāgara it is one of the earliest Upapurāṇas and may have been composed in the 8th or 9th century A.D.

Narasiṁhapurāṇa (or Nṛsiṁha). This U. has been dealt with above on pp. 878–882. Kalpataru on vrata quotes 29 verses from it (22 on Gaṇeśacaturthī pp. 84–87 almost all of which are found in the current work, chap. 26. 2–20); Kalpataru on Tīrtha quotes 66 verses from it, almost all of which are in chap. 65. 2–31, 66. 1–9, 20–45 of the current work; Kalpataru on Niyatakāla quotes 65 verses almost all of which are found in chap. 58; Kalpataru on Mokṣa quotes 57 verses, which can be traced in chapters 17, 58, 59, 60, 61; the Dānakāṇḍa of Kalpataru quotes 13 verses (found in chap. 30. 27 ff.), and Brahmacārikāṇḍa quotes four verses; Aparārka quotes about 40 verses from Nṛsiṁha, of which 16 concern *yati* (pp. 951, 965 from chap. 60. 12 ff.), 17 verses deal (p. 140) with *arghya* to the Sun (from 58. 91–93) by the employment of the 16 verses of the Puruṣasūkta for nyāsa on the different parts of the body and also the sixteen (from chap. 62. 5–14) upacāras from āvāhana (invoking to come) to visarjana (bidding adieu) in worship, 5 verses on Narasiṁha-pūjā with the mantra 'Om namo Nārāyaṇāya' (63. 3 and 6). Out of 3½ verses on p. 125 dealing with evening *sandhyā* and homa attributed to this Purāṇa two are the same as Dakṣa-smṛti (II. 28–29). Sm. C. quotes 27 verses on Āhnika from Narasiṁha. It appears that both Kalpataru and Aparārka had a much longer version before them than the present purāṇa. It may be noted that Kṣemaka, who was the last king of the Aila-vaṁśa (acc. to Vāyu 99. 432 and others), is described in the Narasiṁha-purāṇa (chap. 23) as the son of Naravāhana and grand-son of the famous ancient couple

Udayana and Vāsavadattā. The extant purāṇa may be assigned to about 9th century A. D.

Nāradapurāṇā—(Veṅk. Press). Vide H. in I. C. vol. III, p. 477-488, PRHR. pp. 127-133 on 'Bṛhan-nāradīya and Nāradīya' and 'Studies &c.' vol. I pp. 309-345. The Bṛhan-nāradīya was published by the Calcutta Asiatic Society and by the Vaṅgavāsi Press in 38 chapters and about 3600 verses. H. holds that the Bṛhan-nāradīya is a purely sectarian Vaiṣṇava work, is wanting in the characteristics of a purāṇa, that the Nāradīya noticed by the Matsya (53. 23 as containing 23000 verses and in which Nārada proclaimed the dharmas of Bṛhatkalpa) and by the Agni (272. 8) is different from the present Nāradīya and that the extant Nāradīya borrows from the Bṛhan-nāradīya (pp. 336-341 of 'Studies &c.' vol. I). The Nāradīya (Veṅk. Press) is divided into two parts, the first in 125 chapters and the 2nd in 82 chapters (and about 5513 verses in all). Out of the 5513 verses of the 2nd part 3400 deal with various tīrthas and most of the remaining are concerned with the story of Rukmāṅgada and Mohinī. The first part deals with several matters such as praise of Viṣṇu and bhakti, Geography of India, story of Sagara, Bhagīratha and Gaṅgā-māhātmya, a few vratas, Varṇa-dharma, Āśramadharma, pātakas, *sadācāra* and śrāddha. Nāradīya I. 9.40 has a verse which echoes a Kirātārjunīya verse[1417] and proclaims that a brāhmaṇa who enters a Bauddha temple even in a great calamity cannot get rid of the sin by hundreds of expiations, since the Bauddhas are heretics and revilers of[1418] Veda. The first part speaks of Vaiṣṇavāgama (37, 4) and Pañcarātra procedure (53. 9). The Sm. C. quotes many verses from the extant Nāradīya on Ekādaśī and the story of Mohinī. One characteristic passage may be quoted here.[1419] Rukmāngada proclaimed that any person more than eight years of age and below 80 years who would eat food on the day of Viṣṇu in his kingdom would be liable to corporal punishment, fine or banishment. Aparārka also (p. 205) quotes two verses about fast on

1417. अविवेको हि सर्वेषामापदां परमं पदम् । नारदीय I. 9. 50; compare 'सहसा विदधीत न क्रियामविवेकः परमापदां पदम्।' किराता० II. 30.

1418. बौद्धालयं विशेत्यस्तु महापद्यपि वै द्विजः। न तस्य निष्कृतिर्दृष्टा प्रायश्चित्तशतैरपि ...बौद्धाः पाखण्डिनः प्रोक्ता यतो वेदविनिन्दकाः॥ नारदीय 1. 15. 50-52.

1419. अष्टवर्षाधिको मर्त्य अशीतिं नाहपूर्यते (?)। यो भुंक्ते नामके राष्ट्रे विष्णोरहनि पापकृत्। स मे वध्यश्च दण्ड्यश्च निर्वास्यो विषयाद्वहिः॥ नारदीयपु० q. in स्मृतिच. II. p. 355; in the printed नारद (उत्तरखण्ड) chap. 23. 41 the words are 'यो न कुर्याद्व्रतो मेत्थ धर्म्यं विष्णुगतिप्रदम्। स मे दण्ड्यश्च वध्यश्च निर्वास्यो विषयाद् ध्रुवम्॥'

Ekādaśī. The above circumstances lead to the conclusion that the present Nāradīya was compiled between 700 and 1000 A. D.

Padmapurāṇa—H. in I. C. vol. IV. pp. 73-95, Mr. M. V. Vaidya in Kane presentation vol. pp. 530-537 (holds that the tīrthayātrā section of Padma is older than the tīrthayātrā section in the Mahābhārata), Dr. Belvalkar in F. W. Thomas Festschrift (pp. 19-28) holds that Padma is based on the Mahābhārata; Prof. Lüders tried to prove that the Ṛṣyaśṛṅga legend in Padma is older than the same legend in the Mahābhārata (vide I. H. Q., vol. XX. p. 209 for Lüder's view); H. in PRHR. (pp. 107-129) states that there are two recensions of the Padma the North Indian and the South Indian, that the former is in five kāṇḍas and the latter in six, that the South Indian recension alone is published in the Ānandāśrama and Veṅk. Press editions, though the arrangement differs in the two editions. H. in PRHR (p. 126) states that the Uttara-kāṇḍa (of the Padma) is later than 900 A. D. and earlier than 1500 A. D. One remarkable fact is that hundreds of verses are common to Matsya and Padma and some writers like Hemādri quote long extracts from the Padma, which others quote from the Matsya. In view of the vast smṛti material in the Matsya and the fact that thousands of verses therefrom are quoted in the medieval nibandhas the present writer is inclined to hold that it is the Padma that is the borrower. There are no materials to assign a definite date for the borrowing, but it is likely that it was before 1000 A. D. Padma (IV. 102. 40-41 and IV. 110. 483) mentions the Kūrma (and a verse is quoted from it) and IV. 5. 32-43 contain such alaṅkāras as Śleṣa and Parisaṅkhyā. The Kalpataru quotes from Padma about 55 verses on vrata, 50 on niyatakāla, 50 on dāna, 12 on tīrtha, only a verse here and there on other kāṇḍas. Aparārka quotes only about 12 verses from it, the Smṛticandrikā only about 25. In the Ānandāśrama edition of Padma there are 48452 verses and 628 chapters. It speaks of the Aśvattha as Bodhisattva (Sṛṣṭikhaṇḍa 55. 16) and mentions a place called Vanasthala in Gurjaradeśa (II. 51. 36-37).

Brahmapurāṇa—The one printed at the Ānandāśrama appears to be a late compilation. Vide H. on 'Apocryphal Brahmapurāṇa' in I. C. II. pp. 235-245 and PRHR pp. 145-157. H. states that numerous quotations from the Brahma occurring in the works of Jīmūtavāhana, Aparārka, Ballālasena, Devaṇṇabhaṭṭa and Haradatta are not found in the printed Brahma, that the current Brahma borrows chapters from the Mahābhārata, Viṣṇu, Vāyu and Mārkaṇḍeya and that the present Brahma

was composed between 10th century and 12th century A. D. H. Otto Schrader states that chapters 236–244 of the present Brahma dealing with Sāṅkhya and Yoga are borrowed from the Mahābhārata (I. C. vol. II. pp. 592–93). The Dānasāgara refers to two Brahmapurāṇas one of which it did not utilize (p. 7 verse 63). The Kalpataru quotes at least about 1500 verses from the Brahmapurāṇa (600 in *niyatakāla* section, 66 on tīrtha, 60 on mokṣa, 78 on rājadharma, 21 on gṛhastha, 20 on vyavahāra, verses 15 on vrata, 15 on brahmacārin of which the editor has traced only 9 in the printed text). The Kalpataru on śrāddha quotes several hundred verses from the Brahma, the number of quotations being larger than the quotations from any other Purāṇa, the next being Vāyu and Matsya. On p. 388 of the śrāddha section the Kalpataru quotes from Brahma-purāṇa a few verses about showing honour to Buddha and Bauddha monks on a certain tithi. The printed Brahma contains 245 chapters and 13783 verses. Chapters 70–175 deal with various tīrthas in 4640 verses, chapters 28 to 69 dilate upon several tirthas such as Koṇāditya, Ekāmra, Avanti, Puruṣottama-tīrtha. The whole purāṇa or at least a section seems to come to an end with chapter 175 and from chapter 176 it is Vāsudevamāhātmya that is set forth up to chap. 213 and the narrator is Vyāsa and not Brahmā as in the chapters up to 175. Many of the verses from chapters 42 onwards are quoted by the Tīrthacintāmaṇi (e. g. chap. 43. 1–13 in T. C. p. 58–59, chap. 45. 52–89 in T. C. pp. 61–64, chap. 49 in T. C. pp. 65–72). As Vācaspati flourished in the latter half of the 15th century A. D. (vide H of Dh. vol. I. p 405), the first part of the present Brahmapurāṇa cannot be placed later than the 13th century A. D. The present Brahma has several verses in common with Brahmāṇḍa and Vāyu (vide H. of Dh. vol. IV. p. 388 n 870). It is not unlikely that the other Brahmapurāṇa which Ballālasena discarded is the present Brahmapurāṇa and that both Kalpataru and Ballālasena had an older work of the same name before them. The present Brahma was probably compiled in some part through which the Godāvarī (Gautamī) flows in Daṇḍakāraṇya; chap. 88. 18. 123. 117 and 129. 55 state that Daṇḍakāraṇya is the holiest country and that the river Godāvarī flows through it (chap. 129. 62, 66); chap. 88. 22–24 derive Janasthāna on the Gautamī as the sacrificial ground of the kings of the Janaka race.

Brahmavaivarta—A huge work printed by the Ānandāśrama, Poona, in four khaṇḍas (parts) viz. Brahma, Prakṛti,

Gaṇapati and Kṛṣṇajanma. It has some chapters on Dharmaśāstra topics, such as on castes, gifts, vratas, hells, duties of varṇas and āśramas, women. Many of the verses quoted from this Purāṇa in the Sm. C., Hemādri and other writers are not found in the current Purāṇa. Wilson, in the Introduction to the Viṣṇu, says (pp. LXV–LXVII) that it has not the slightest title to be called a Purāṇa. Vide H. in ABORI vol. XIX pp. 75–76 and PRHR pp. 166–167.

Brahmāṇḍa (pub. by Veṅk. Press). It is divided into four pādas (I. 1. 38–39) viz. Prakriyā (5 chapters), Anuṣaṅga (33 chap.), Upodghāta (74 chap.), Upasaṁhāra (4 chap) followed by Lalitopākhyāna in 40 chapters. The Kūrma expressly[1420] states that the Brahmāṇḍa was narrated to the sages engaged in a sattra in the Naimiṣa forest and the Skanda (Prabhāsa-khaṇḍa 2. 8-9) states there was formerly only one Purāṇa called Brahmāṇḍa containing one hundred crores of verses and that later it was distributed into 18 parts. It was probably composed near the rise of the Godāvarī, since it says that that part of the country towards the northern ranges of the Sahya mountain where the Godāvarī rises is the most charming in the whole world and that there a city called Govardhana was founded by Rāma.[1421] In the first two parts it deals with the subjects of creation, the geography of the earth and of Bhāratavarṣa, and the manvantaras, pupils of Vyāsa, the distribution of the Veda Śakhās &c. The third section is the longest and after mentioning Vaivasvata Manvantara and, after dilating upon the creation of gods, asuras, gandharvas, sages and their progeny, it deals at length with all aspects of śrāddha (in chap. 9–20 and 879 verses), describes Paraśurāmā's austerities, his securing of weapons, his slaughter of Kārtavīrya and kṣatriyas, filling five lakes with their blood (in chap. 21–47 and over 1550 verses); then follow in chapters 48–57 the story of Sagara and the bringing down of the Ganges by Bhagīratha, the protection of Gokarṇa from the sea, and the story of Śūrpāraka (chap. 57 and 58), the dynasties of the solar and lunar race (chap. 59ff); then it speaks of Dhanvantari receiving from Bhāradvāja Āyurveda in eight aṅgas; in part IV. it refers to Manus, jñāna, karma, mokṣa &c.

1420. अत्र पूर्वं स भगवानृषीणां सत्रमासताम्। स वै प्रोवाच ब्रह्माण्डं पुराणं ब्रह्मभाषितम्॥ कूर्म II. 43. 14.

1421. सह्यस्य चोत्तरान्तेषु यत्र गोदावरी नदी। पृथिव्यामपि कृत्स्नायां स प्रदेशो मनोरमः। तत्र गोवर्धनं नाम पुरं रामेण निर्मितम्। ब्रह्माण्ड II. 16. 43–44. For गोवर्धन vide H. of Dh. vol. IV. p. 710 n 1618.

The Brahmāṇḍa is one of the oldest of the 18 Purāṇas and has hundreds of verses in common with the Vāyu. Vide above p. 852. The Mit. on Yāj. quotes a verse from the Brahmāṇḍa[1422] stating that a person, on touching Śaivas, Pāśupatas, Lokāyatikas and atheists, persons of the three varṇas following forbidden paths and śūdras, should bathe with the clothes on. Aparārka quotes about 75 verses from it of which 43 are concerned with śrāddha. The Sm. C. quotes about 50 verses on Āhnika and Śrāddha, of which ten occur also in Aparārka The Kalpataru does not quote a single verse from it in the sections on vrata, gṛhastha, tirtha, rājadharma, but quotes 16 verses from it on śrāddha, and 16 on mokṣa, none from Niyata. and from Vyavahāra. If we may judge from some of the matters noted here it cannot be placed as early as the Matsya. In III. 48. 8 and 20 it employs long compounds,[1423] mentions Bhīmasena and Nārada[1424] as writers on music (III. 61. 42–43), contains a chapter (III. 62) on Gāndharva, refers to the opinions of former ācāryas, to 30 alaṅkāras of nāṭya and four purposes of such alaṅkāras (chap. 62, verse 22). It may be placed between the 4th and 6th century A. D. For discussion on Brahmāṇḍa, vide Pargiter in AIHT pp. 23, 77 and H. in PRHR (pp. 17–19). The Brahmāṇḍa is very fond of etymologies; vide for example, those of vaiśya and śūdra (II. 7. 157–158), of deva, manuṣya-prajā, rakṣas and yakṣa (II. 8. 9–10, 20, 34), of Tryambaka and Rudra (II. 9. 3–4 and 78), of rājan (in II. 29. 64), of Vasudhā, Medinī and Pṛthivī (II. 37. 1–3), of Atri, Vasiṣṭha, Pulaha and Pulastya (III. 1. 44–46), of Kubera (III. 8. 44–45).

Bṛhad-dharma-purāṇa (U.)—Vide H. in J. of University of Gauhati and 'Studies &c.' vol. I. pp. 115 and 277. It is a work of Bengal of the 13th or 14th century A. D.

Bhaviṣyapurāṇa—Accounts of the contents of the Bhaviṣya in Matsya 53. 30–31, Agni 272. 12 and Nāradīya I. 100 do not tally with the printed Bhaviṣya (Veṅk. ed.). It is divided into four *parvans* viz. Brāhma, Madhyama, Pratisarga and Uttara. It is only the Brāhmaparva that can claim an early date. The Pratisarga-parva is a modern fabrication containing stories of

Adam and Eve, Pṛthvīrāja, and Saṁyogitā, the mlecchas of Dehali, Rāmānuja, Kabīr, Naraśrī (Narsi?), Nānak, Caitanya, Nityānanda, Raidās, Madhvācārya, Bhaṭṭoji &c. The Bhaviṣyottara is discarded by Ballālasena as unauthoritative, though it was popular in his day (vide. p. 869 above). Aparārka quotes 160 verses from Bhavisyottara on dānas of various kinds. The Sm. C. (I. p. 203) quotes a single verse from the same. Hence the Bhavisyottara cannot be later than 1000 A.D. The Kalpataru quotes hundreds of verses from Bhaviṣya on vratas and many verses in other kāṇḍas, e. g. 55 in brahmacāri, 110 on niyatakāla, 101 on gṛhastha, 100 on rājadharma, 15 on śrāddha. The Mit. quotes[1425] a single verse from Bhaviṣya about donating a golden image of a snake when a man is bitten by a snake. Aparārka quotes about 125 verses from Bhavisya, of which about 90 relate to prāyaścittas.

One remarkable feature of the extracts from Bhaviṣya in Aparārka is that they quote the views of Aṅgiras, Gautama, Parāśara, Manu, Vasiṣṭha and Śaṅkha. There are several passages quoted by Aparārka from the Bhaviṣya which approximately indicate the age of the current Bhaviṣya.[1426] It also refers to eight Vyākaraṇas in I. 1. 59–61 viz. Brāhma, Aindra, Yāmya, Raudra, Vāyavya, Vāruṇa, Sāvitra and Vaiṣṇava. But these are different from the well-known eight grammars (except Aindra). It mentions the foreign words Āra (Mars) and Koṇa (Saturn)[1427] and states these planets are to be worshipped along with Śiva, Pārvatī, Gaṇeśa, the Sun &c. In prescribing a prāyaścitta for killing a person who is merely a brāhmaṇa by caste the Bhaviṣya prescribes (as one of the alternatives) the prāyaścitta prescribed by Parāśara.[1428] Therefore, the extant Bhaviṣya

XII pp. 50–51 of Jivananda's ed.

cannot be placed earlier than about the 6th or 7th century A. D. Vide H. in I. C. vol. III. pp. 223–229 and PRHR pp. 167–173 for Bhaviṣya and JOI (Baroda) vol. III. pp. 8–27 for Bhaviṣyottara. The Bhaviṣya mentioned in Vāyu (99. 267 tān sarvān kīrtayiṣyāmi· Bhaviṣye paṭhitān nṛpān । tebhyaḥ pare ca ye cānye utpatsyante mahīkṣitaḥ ॥) is not the present one but the ancient Bhaviṣyat mentioned by Āp. Dh. S. (vide p. 817 and n 1328 above). The Varāhapurāṇa expressly mentions Bhaviṣyat-purāṇa twice (177. 34 and 51).[1429] The second reference is quite interesting. It appears to say[1429a] that the Purāṇa well-known as Bhaviṣya was revised by Sāmba who then established an image of the Sun.

Bhāgavatapurāṇa. None of the early works such as the Mit., Aparārka, Kalpataru, the Smṛticandrikā draw upon this. The Dānasāgara knew it, but, as the Bhāgavata did not contain a disquisition on dānas, the author passed it over. Its date is very controversial, ranging from the 5th century A.D. to the 10th. Dr. Pusalkar (in 'Studies in Epics and Purāṇas' 1953, pp. 214–216) brings together most of the papers on this subject; Shri S. S. Sastri in ABORI vol 14 pp. 241–249 on 'the two Bhāgavatas' claims that the Devībhāgavatapurāṇa is earlier than the Bhāgavata, while H. in JOR (Madras) vol. 21 (pp. 48–79) takes the opposite view, viz. that the Devībhāgavata is much younger than the Bhāgavata. In 'Date of the Bhāgavata-purāṇa' by B. N. Krishnamūrti Sharma in ABORI. vol. 14 pp. 182–218 it is argued that the Bhāgavata is as old as the 5th century A. D. and he cites in support certain passages from the Mokṣadharma of the Mahābhārata (Kumbhakonam edition), but the critical edition from Poona treats those passages as apocryphal. Prof. Das-Gupta in the 4th volume of his 'Indian Philosophy' deals with this Purāṇa, but his views are criticized in JBRS vol. 36 pp. 9–50. Vide H. in NIA vol. I. pp. 522–528. The Padma part VI. (chapter 189–194) contains a *Māhātmya* of Bhāgavatapurāṇa in 518

1429. 'भविष्यत्पुराणमिति ख्यातं कृत्वा पुनर्नवम् । साम्बः सूर्यप्रतिष्ठां च कारयामास तत्त्ववित् ॥ वराह 177. 51. The Venk. ed. reads (177. 55) 'भविष्यमिति विख्यातं ख्यातं etc.'.

1429 a. The Varāha mentions (178. 5–7) three temples of the Sun, one to the south of the Yamunā, the 2nd in the middle called Kālapriya and the third to the west at Mūlasthāna (modern Multān). The Bhaviṣya mentions three important places of sun-worship (viz Muṇḍīra, Kālapriya and Mitravaṇa). I agree with Mr. Dilipkumar Biswas that Muṇḍīra is modern Modhera in North Gujerat (vide p. 30 of summary of Proceedings of 15th Indian History Congress) where there has been a sun temple for about a thousand years.

verses. The author of the Purāṇa is said to be a native of the Tamil country by Mr. M. R. Majumdar in IHQ vol. 8. pp. 49–53. The present writer thinks that it is a late Purāṇa, since even in the Mokṣakāṇḍa (of Kalpataru) it is not cited, while about 300 verses are cited from the Viṣṇupurāṇa in that kāṇḍa alone. Vide note 1604 below. No reliable and cogent evidence has been adduced to prove that the current Bhāgavata can be placed earlier than the 9th century A. D.

Matsyapurāṇa (Ānandāśrama ed.). It has 291 chapters and 14062 verses. It is one of the ancient Purāṇas and has perhaps the largest number of smṛti chapters among Purāṇas. Many verses of the Manusmṛti and the Mahābhārata occur in it. Some verses of Yāj. also occur in Matsya e. g. Yāj. I. 295 is Matsya 93. 2, Yāj. II. 279. 295–6 and 303 are the same as Matsya 227. 200, 202–203 and 204. It appears that the Matsya holds the balance between Śiva and Viṣṇu. It glorifies not only Viṣṇu in the Matsya avatāra but devotes 1570 verses to the slaughter of Tārakāsura and 623 to the destruction of Tripura, both by Śiva. The Vāmanapurāṇa (12. 48) speaks of it as the principal among Purāṇas.

The Mit. on Yāj. I. 297 expressly quotes all the nine verses of chap. 94 of the Matsya (about the form of the images of the planets) and two verses from chap. 93 (11–12) about the position to be assigned to each with white grains of rice in a maṇḍala. The Kalpataru quotes hundreds of verses from Matsya on vrata, quotes about 750 on dāna from Matsya (all of which except 20 are identified in the present Matsya by the editor); about 410 on Rājadharmakāṇḍa, 157 verses on tīrtha (of which 100 are identified by the editor in the Matsya), 115 verses in Gṛhastha-kāṇḍa, 112 verses on śrāddha, about 67 on niyatakāla (all except 12 identified), 18 in vyavahārakāṇḍa, 6 in brahmacāri and 2 in mokṣa, in all about 2000 verses. Aparārka quotes about 400 verses from Matsya (about 250 being on dāna). It is not necessary after the preceding statement to go into the large number of verses quoted in Dānasāgara, Smṛti-candrikā and Hemādri. It may be said without fear of contradiction that long before 1000 A. D. the Matsya-purāṇa had the same arrangement and presented almost the same appearance as at present. This is more than what can be said about the other Purāṇas except Viṣṇu, Vāyu, probably Bhaviṣya (I), Mārkaṇḍeya.

In the present author's opinion the Matsya is among the best preserved and the earliest of the 18 Purāṇas. It may be

dated between 200 A. D. to 400 A. D. The author does not wish to deny that a few verses here and there might have been interpolated at a later date.

Vide H. on the dates of the smṛti chapters of Matsya in ABORI vol. 17 pp. 1–36 and PRHR pp. 26–52 and Prof. Ramchandra Dikshitar on 'Matsyapurāṇa, a study' (Madras, 1935, pp. 1–140). Four verses from a Svalpa-matsya-purāṇa are quoted in the Pitṛdayitā (p. 92) of Aniruddha (about 1160 A. D.) and there is a paper thereon by Shri Manoranjana Shastri in J. G. J. R. I. vol. IX pp. 183–188. Matsya and Padma (as stated before) agree verbatim in many chapters on tīrthas and vratas. Śaṅkarācārya quotes a verse from Paurāṇikas which is Matsya.[1430] Among the sages to whom water is offered in *tarpaṇa* are included (by Matsya) Kapila, Āsuri, Voḍhu and Pañcaśikha. The first two and the last are mentioned in the Śāṅkhyakārikā as the three great founders of the Śāṅkhya system. Vararuci is said to be a profound scholar of Nāṭya-veda. In chap. 24 the Purāṇa refers to the fact that the Apsaras Urvaśī and her friend Citralekhā were kidnapped by a demon called Keśin, who was vanquished by Purūravas and Urvaśī was released and was given by Indra to Purūravas. While she was acting the part of Lakṣmī in a drama called Lakṣmī-svayaṁvara composed by Bharata, she, being engrossed in her passion for Purūravas, forgot the proper *abhinaya* taught by Bharata and was cursed by Bharata to be a creeper. It is difficult to say whether the Matsya got its inspiration for this story from the Vikramorvaśīya or whether the great poet Kālidāsa was influenced by the story in the Matsya. The story in Matsya and in Kālidāsa's drama agree very closely as regards names and incidents. The Matsya says (24. 24) that for vanquishing Keśin Purūravas employed Vāyavya-astra. The drama also mentions it (I.).

1430. तथा चाहुः पौराणिकाः । अचिन्त्याः खलु ये भावा न तांस्तर्केण योजयेत् । प्रकृतिभ्यः परं यच्च तदचिन्त्यस्य लक्षणम् ॥ शङ्कराचार्य on वे. सू. II. 1. 27. This is मत्स्य 113. 6. This verse occurs also in भीष्मपर्व 5. 12 but there the reading is साधयेत् for योजयेत्. Besides, the word पौराणिक (पुराणमधीते इति पौराणिकः acc. to पाणिनि IV. 2. 59) suggests that the ācārya refers to a पुराण and not to the महाभारत. कपिलश्चासुरिश्चैव वोढुः पञ्चशिखस्तथा । सर्वे ते तृप्तिमायान्तु मद्दत्तेनाम्बुनाखिलाः ॥ मत्स्य 102 18 quoted in स्मृतिच. I, 193. The सांख्यकारिका says at the end 'एतत्पवित्रमग्र्यं मुनिरासुरयेऽनुकम्पया प्रददौ । आसुरिरपि पञ्चशिखाय तेन च बहुधा कृतं तन्त्रम् ॥'. दोग्धा वररुचिश्चैव नाट्यवेदस्य पारगः । मत्स्य 10. 25; लक्ष्मीस्वयंवरं नाम भरतेन प्रवर्तितम् । मत्स्य 24. 28.

The only points of difference are : in the drama Lakṣmī-svayaṁvara is said to have been composed by Sarasvatī, while Matsya does not say so. Besides, the Purāṇa says that Urvaśī was cursed by Bharata to be a creeper, while Kālidāsa says nothing of the kind and shows that her being reduced to the condition of a creeper was due to Kumāra (Kārtikeya). The decision depends on the exact dating of the Matsya from other evidence. I am inclined to believe that Kālidāsa was familiar with the episode related in the Matsya. There are scholars who believe that Kālidāsa flourished under Vikramāditya about 57 B. C. The present writer does not subscribe to this belief. There is hardly any reliable or positive evidence to show that a powerful ruler called Vikramāditya ruled Northern and Central India about 57 B. C. The tradition of the nine jewels is of no use and if relied upon would make Vikramāditya rule about the 5th or 6th century A.D., since Amarasiṁha, Varāhamihira and Kālidāsa would be contemporaries. A coin of the Gupta Emperor Candragupta II (Allen's Catalogue of coins, pp. 35 ff.) has क्षितिमवजित्य सुचरितैर्दिवं जयति विक्रमादित्यः. The present writer believes that the most probable date for Kālidāsa is between 350 to 450 A. D.

Mārkaṇḍeya-purāṇa—There are two editions, viz. B. J. edition (of 1862) and the Veṅk. Press ed. The present author has mainly used the latter for quotations. The two differ slightly as to the number of verses in almost each chapter e. g. there are 270 verses in chap. 8 of B.J. edition and 287 in Veṅk. ed.; chapter 16 of the Veṅk. edition corresponds to chapters 16–18 of the other edition. There are 134 chapters in the Veṅk. edition and 137 in B. J. edition. Pargiter translated into English the Mārkaṇḍeya. In the first 42 chapters (B. J. ed.) Mārkaṇḍeya takes hardly any part, but in the remaining chapters he is the principal speaker. This is a peculiar Purāṇa. The first chapter opens with four questions put by Jaimini to Mārkaṇḍeya about Mahābhārata saga, viz. (1) why nirguṇa Vāsudeva assumed a human form, (2) how Draupadī became the wife of five brothers, (3) Balarāma performed expiation of brahmahatyā by pilgrimage (and not by his own death), (4) how the five unmarried sons of Draupadī, themselves great warriors, met death helplessly although they had the great Pāṇḍava heroes to protect them. Mārkaṇḍeya directs him to go to wise birds in the Vindhya mountain and the answers are given in chapters 4 to 7. One wonders why Jaiminī said to be a pupil of Vyāsa in the Purāṇas did not go to Vyāsa but to Mārkaṇḍeya. A portion of this Purāṇa is called

Devīmāhātmya or Saptaśatī[1431] (chapters 78–90 of Veṅk. ed. and 81–93 of B. J. edition) and is deemed by modern Sanskrit scholars to be an interpolation. But even if it is an interpolation it must have been made before the 10th century, as the oldest known ms. of it is dated 998 A.D. and probably before 600 A. D. The Mārkaṇḍeya has practically no verses on vrata, pilgrimages or śānti, but dilates on the duties of āśramas, on rājadharma, śrāddha, hells, karmavipāka, sadācāra, yoga, (explained by Dattātreya to Alarka), stories of Kārtavīrya, his grandson Kuvalayāśva and of Madālasā, creation, manvantaras, geography &c. It has hardly any sectarian bias; prayers and invocations are few except in the Devīmāhātmya. The present Purāṇa has, as indicated above, three different and disconnected sections viz. chapters 1–42 (Veṅk. ed.), where the wise birds figure as speakers, chapters 43 to end where Mārkaṇḍeya and Kroṣṭuki, a disciple, carry on the discourse, except in Devīmāhātmya, which is the third and an independent section.

The Kalpataru on mokṣa quotes about 120 verses from Mārkaṇḍeya on yoga, almost all of which are found in the printed text. It quotes on brahmacārikāṇḍa 9 verses, 12 on śrāddha, 17 on niyatakāla, 19 on gṛhastha, 3 on rājadharma and one on vyavahāra. Aparārka quotes about 85 verses from the Mārkaṇḍeya of which 42 are on yoga and the rest on śrāddha, giving alms, hospitality, śuddhi &c. The Sm. C. quotes 15 verses from Mārkaṇḍeya on āhnika, 40 verses on śrāddha. Mārkaṇḍeya quotes several verses from Manu and Mahābhārata. Mārkaṇḍeya contains some long drawn out rūpakas as in 3.59–70 (where prajñā is said to be a fort-wall and the soul as king therein) and 35. 8–13 (ahamityaṅkurotpannaḥ &c.). It contains the popular idea that for married women long stay with their relatives (in the family of birth) does not conduce to good reputation and that the desire of her relatives (by blood) is that a married woman should stay in her husband's house.[1432] The Mārkaṇḍeya says that the root of all

1431. Vide above p. 155 note 396 about the Saptaśatī for a description of the Devīmāhātmya, which has only 589 verses (and not 700 as the name implies) in Veṅk. ed. and 573 in B. I. ed. The verse सर्वमङ्गलमाङ्गल्ये cited above on p. 176 n. 454a (from देवीमाहात्म्य) is quoted in the Dadhimatī-mātā inscription (found in the Jodhpur State) dated 289 of the Gupta era (E. I. vol. XI p. 299 at 303). The inscription being of 608 A. D., it follows that the verse taken from the Devīmāhātmya, is earlier than 600 A.D.

1432. बान्धवेषु चिरं वासो नारीणां न यशस्करः। मनोरथो बान्धवानां नार्या भर्तृगृहे स्थितिः॥ मार्क॰ 74. 19; compare शाकुन्तल V 'सतीमपि ज्ञातिकुलैकसंश्रयां जनोऽन्यथा भर्तृमतीं विशङ्कते।'

unhappiness is the idea that one is the owner, (of this and that) and that bliss comes with the idea 'nothing is mine'.[1433] In chap. 160. 39 it refers to *lagna* and *horā*. It puts forward the doctrine of the Gītā that actions done without any desire for their reward do not tend to become chains binding down a man to saṁsāra. On the other hand, this Purāṇa narrates the story of Datta[1434] or Dattātreye who imparted instruction on yoga to Alarka (from chap. 16 ff), but who is represented as an avatāra of Viṣṇu given to drinking intoxicants, as fond of the company of women, as staying near a water reservoir constructed with wood and stones on the Sahya (16. 132) and is called Avadhūta (17. 3). In chap. 54 it is said (just as in Brahmāṇḍa cited above p. 895) that the country in the north ranges of Sahya and near the Godāvarī is the most charming in the world.

On the whole this is one of the early purāṇas and may be assigned to a date between the 4th to 6th century A. D.

Liṅgapurāṇa (Veṅk. ed.). It has 11000 verses as stated in chap. II. 5. The Kalpataru on tīrtha quotes about one thousand verses from it on Avimuktaka (Banaras) and the sub-tīrthas therein. Aparārka quotes six verses from it on Śivapūjā on the 8th and 14th tithis and bath and śrāddha in eclipses. The Sm. C. quotes a few verses from it on bath in eclipses, Veda study &c. According to the Dānasāgara (p. 7 verse 64) there was another Liṅgapurāṇa of 6000 verses which it had not utilised. Vide H. in I. C. vol. IV. pp. 415–421 and in PRHR pp. 92–96.

Varāhapurāṇa (B. I. edition). It has 217 chapters and 9654 verses, besides a few chapters entirely in prose (such as 81–83, 86–87 and 74 on *bhuvanakośa*) and a few in mixed prose and verse (such as 80, 84, 85, 88, 89). It is a Vaiṣṇava Purāṇa and begins with the well-known verse 'Nārāyaṇam namaskṛtya' and is supposed to have been narrated to the Earth by Viṣṇu in the

---

1433. ममेति मूलं दुःखस्य न ममेति च निर्वृतिः। मार्क० 35. 6; न च बन्धाय तत्कर्म भवत्यनभिसन्धितम्। मार्क० 92. 15.

1434. The story of दत्तात्रेय and of his boons (वर) to कार्तवीर्य occurs in several Purāṇas. Vide मत्स्य 43. 15 ff, ब्रह्म 13. 160 ff. The ब्रह्माण्ड III. 8. 84 quotes a पौराणिकश्लोक 'अत्रेः पुत्रं महात्मानं शान्तात्मानमकल्मषम्। दत्तात्रेयं तनुं विष्णोः पुराणज्ञाः प्रचक्षते ॥'. In the भागवत (I. 3. 52 ff) twenty-two avatāras of विष्णु are mentioned out of which Dattātreya is the 6th who propounded ānvīkṣikī (Adhyātmavidyā) to Alarka and Prahlāda. In the मार्कण्डेय (Veṅk.) 17. 10–13 दत्तात्रेय says 'ये च मां पूजयिष्यन्ति गन्धमाल्यादिभिर्नराः। मांसमद्योपहारैश्च मिश्रान्नैश्चात्मसंमतैः। ...तेषामहं परां तुष्टिं पुत्रदारधनादिकीम्। प्रदास्याम्यवधूतश्च हनिष्यामि यमस्यताम् ॥'.

Boar incarnation. It is remarkable that Vyāsa does not appear in the Purāṇa, though the Sūta figures at the beginning of several chapters (e. g. chap. 1, 2, 39, 50, 127, 137–138, 148, 151, 181, 213). It deals with most of the general topics of Dharmaśāstra such as vrata, tīrtha, dāna, images and their worship, āśauca, śrāddha, karmavipāka, narakas, cosmology and geography, prāyaścitta &c. The Kalpataru quotes 150 verses from it on vrata (most of which are traced by the editor), 40 verses on śrāddha (none of which is traced), 250 verses on tīrtha (many of which are traced), 17 on niyatakāla (half traced), five on dāna (all traced), 4 in gṛhasthakāṇḍa (not traced). One peculiarity is that it mentions some tīrthas like Lohārgala and Stutasvāmī which are not described in other Purāṇas. Aparārka quotes about 55 verses from it on several topics.

The Brahmapurāṇa[1435] refers to a Vārāha text laying down a śrāddha for pitṛs on the Full Moon when the sun is in Virgo. The Bhaviṣyottara also (32. 12) refers to Varāhavacana. For the priority of the Bhaviṣya to Varāha vide above p. 898. Varāha refers to a śaka prince called Nandavardhana (in chap. 122. 34) and verse 56 refers to a śaka king.

Vide H. in ABORI vol. 18 pp. 321–337. It is difficult to assign a date to the Varāhapurāṇa. It is not one of the early Purāṇas. In any event it is earlier than the 10th century A. D.

Vāmanapurāṇa (Veṅk. ed.). It is a short purāṇa as compared with Matsya, Vāyu, Varāha &c. It has 5451 verses in the Veṅk. ed. There is prose in chapters 26, 44 and 93. For its size it contains many legends, such as Śaṅkara cutting off a head of Brahmā, the story of Prahlāda and his grandson Bali and the latter's downfall, the greatness of Devī and her exploits, marriage of Śiva and Umā at the request of gods, the birth of Kārtikeya and explanation of his various names, the story of Daṇḍa who was cursed by Śukra for rape, enmity between Vasiṣṭha and Viśvāmitra, Gajendramokṣa &c. It briefly deals with many of the usual dharmaśāstra subjects viz. tīrtha, sadācāra, āśramadharma, sāmānyadharma, vrata, karmavipāka &c. The Kalpataru quotes from Vāmana about 88 verses on tīrtha (only some of which have been traced), about 80 verses

---

1435. नान्दीमुखानां कर्तव्यं कन्याराशिगते रवौ। पौर्णमास्यां तु कर्तव्यं वाराहवचनं यथा। ...पिण्डमिच्छन्ति पितरः कन्याराशिगते रवौ। कन्यां गते सवितरि यान्यहानि तु षोडश। ऋक्षभिस्तानि तुल्यानि देवो नारायणोऽब्रवीत्॥ ब्रह्म 220. 44–47 (Ānan. ed.).

on vrata, 14 verses on dāna (which are also quoted by Aparārka p. 364) and 11 verses on niyatakāla.[1436]

The Vāmana-purāṇa mentions Kāmaśāstras in 91. 73 and Maṅgalavāra (Tuesday) in 41. 24. It has been stated above p. 899 that it expressly mentions Matsya as the best among Purāṇas. The story of king Daṇḍa (in 63. 19 ff.) who perished along with the kingdom because he tried to violate Śukra's daughter appears to be an echo from Kauṭilya's Arthaśāstra (I. 6 p. 11 'Dāṇḍakyonāma Bhojaḥ kāmāt brāhmaṇakanyām abhimanyamānaḥ sabandhurāṣṭro vinanāśa.'). It states that the king is called *rājan* because he keeps the subjects contented, just as Kālidāsa says.[1437] It says that Umā was so called because[1438] she was forbidden to practise 'tapas' in the words 'u mā' and that Śiva assumed the form of a Vedic student carrying a staff of Āṣāḍha (Palāśa) and wearing a girdle of Muñja grass. This also appears like an echo of Kumārasambhava V.

The Sm.C. I. p. 168 quotes the two verses in which the Vāmana prescribes that a man after a bath and homa should leave his house (for business &c.) after touching certain objects deemed to be auspicious (noted below).

Taking all these matters into consideration the Vāmana purāṇa would have to be placed between 600 to 900 A. D. Vide H. in IHQ XI. pp. 115–130 and PRHR pp. 76–92.

1436. On p. 358 of the Kalpataru on Niyatakāla three verses are quoted as from Vāmana-purāṇa which the editor was not able to trace. They are three verses from Vāmana 14. 48–51 quoted above on p. 71 note 178. The first of those three verses is quoted from the Vāmana-purāṇa by Bhujabalanibandha p. 343. The last two of the three verses are quoted from Vāmana by Sm. C. p. 125

1437. ततो राजेति शब्दोऽस्य पृथिव्यां रञ्जनाद्गतः। वामन 47. 24; compare 'राजा प्रकृतिरञ्जनात्।' रघु. IV. 12; राजा प्रजारञ्जनलब्धवर्णः परन्तपो नाम यथार्थनामा। रघु. VI. 21.

1438. तपसो वारयामास उ मेत्येवाब्रवीच्च सा। वामन 51. 21; compare उ मेति मात्रा तपसो निषिद्धा पश्चादुमाख्यां सुमुखी जगाम। कुमार० 1. 26; बहुरूपं समाधाय (समास्थाय?) आषाढी मुञ्जमेखली। वामन 51. 45; compare अथाजिनाषाढधरः प्रगल्भवाक्...शरीरबद्धः प्रथनाश्रमो यथा॥ कुमार० V. 30; दूर्वां दधिं सर्पिरथोदकुम्भं वेडुं सवत्सां वृषभं सुवर्णम्। सुवोमयं स्रस्तिकमक्षतानि लाजा मधु ब्राह्मणकन्यकाश्च॥ श्वेतानि पुष्पाणि च शोभनानि हुताशनं चन्दनमर्कबिम्बम्। अश्वत्थवृक्षं च समालभेत ततस्तु कार्यो निजजातिधर्मः॥ वामन 14, 36–37 q. in स्मृतिच. I. p. 168.

Vāyupurāṇa (Ānandāśrama ed.). This has 112 chapters and 10991 verses. It appears to have been divided like the Brahmāṇḍa into four pādas, Prakriyā (chap. 1–6), Anuṣaṅga (chap. 7–64), Upodghāta (65–99) and Upasaṁhāra (100–112). In the first chap., the first verse is the famous one 'Nārāyaṇam namaskṛtya' and the 2nd eulogises Vyāsa (both these are not found in several mss.). The third verse refers to *bhakti* for Śiva. Chap. 104 is not found in many mss. and the chapters at the end on Gayāmāhātmya are deemed to be later additions by some scholars. There is Śaiva bias in several chapters such as chap. 20. 31–35 (with a prose passage containing Vedic texts), 24. 91–165 (called Śarvastotra), chap. 55 (Śivastuti put in the mouth of Viṣṇu), chap. 101. 215–330. Probably to counterbalance this the chapters on Gayā were added and also the praise of Viṣṇu in chap. 98 where Dattātreya, Vyāsa, Kalkin are said to be avatāras of Viṣṇu, but Buddha is not mentioned. Chapter 99 is the longest one in the Purāṇa, contains 464 verses and is full of legendary material and historical references. There are several verses in the Purāṇa that appear also in the Mahābhārata, Manu and Matsya. For its relation to Brahmāṇḍa vide pp. 852, 896 above. This Purāṇa, like the Matsya, contains much Dharmaśāstra material. It is one of the oldest and most authoritative Purāṇas, though it contains some later additions.

The Vāyu is not quoted in the vrata and niyatakāla sections of the Kalpataru, but it is largely quoted in several other sections. From the Vāyupurāṇa Kalpataru quotes about 160 verses on śrāddha[1439] (of which the editor identified only about 21), about 35 on mokṣa (most traced), 22 on tīrtha, 7 on *dāna*, 5 in brahmacāri and 5 in gṛhastha. Aparārka quotes about 75 verses from Vāyu out of which 60 concern śrāddha and the rest deal with fast, dravyaśuddhi, dāna, sannyāsa and yoga. The Sm. C. quotes only about 24 verses from Vāyu on śrāddha, on atithi, on Agnihotra and fuel-sticks.

The Vāyu makes a passing reference to the Gupta dynasty (vide p. 852 above), it knows the yuga of five years (50. 183),

1439. In spite of great efforts the learned editor of Kalpataru has failed to notice in the Kalpataru several verses on śrāddha, tīrtha and mokṣa. I have succeeded in identifying a few more, viz. Vāyu 75. 24–25 and 45–46 occur in Kalpataru on śrāddha (pp. 216–217). In Kalpataru on śrāddha (p. 168 on Gayā) there are eleven verses quoted from Vāyu left untraced by the editor, which are found in Vāyu 77. 98–103 and 105–109. On p. 300 of gṛhasthakāṇḍa two verses not traced are Vāyu 62. 161–162.

and Meṣa, Tulā (50. 196), Makara and Simha (Jupiter therein) in 82. 41–42. Chapter 87 describes Gītālaṅkāras basing its treatment on the doctrines of pūrvācāryas. Brahmāṇḍa III. 62 is a similar chapter on the same subject and has almost the same verses.

As it refers to the kings of the Gupta dynasty and as Bāṇa refers to it in the Kādambarī and the Harṣacarita, it must be placed between 350 A. D. and 550 A. D. This date is corroborated in several ways. Śaṅkarācarya in his Bhāṣya on Vedāntasūtrā II. 1. 1 quotes a verse as from a Purāṇa, which is Vāyu except[1440] for one word. In another place Śaṅkara quotes a verse as smṛti which is found in Vāyu with slight variations. Another verse which is cited as smṛti by Śaṅkarācārya occurs in Vāyu. The Tattvavaiśāradī of Vācaspati on Yogasūtra I. 25 expressly quotes from Vāyu 12. 33 and 10. 65–66.

Vide Prof. Dikshitar on 'Some aspects of the Vāyupurāṇa' (1933, 52 pages, University of Madras); H. in IHQ. vol. 14 pp. 131–139 and PRHR pp. 13–17; Shri D. R. Patil's 'Cultural History from the Vāyupurāṇa' (1946, Poona, a Ph. D. thesis).

Viṣṇupurāṇa—(Veṅk. Press edition and another published by Messrs. Gopal Narayan and Co. in śaka 1824 with two commentaries, one called Vaiṣṇavakūtacandrikā of Ratnagarbha Bhaṭṭācārya and the other called Viṣṇucitti). The present text is divided into six *aṁśas*, 126 chapters and about 6000 verses. There are many chapters in prose alone such as in 4th aṁśa chapters 7, 8, 9 and many in mixed prose and verse as in aṁśa 4 chap. 1, 2, 6, 11, 12 &c. As stated above this purāṇa agrees with the definition of purāṇa as *pañca-lakṣaṇa* far more than any other purāṇa. This purāṇa is declared to Maitreya by

---

1440. अतश्च संक्षेपमिमं ···तवन्ति भूयः ॥ इति पुराणे। शंकराचार्य on वे. सू. II. 1. 1; वायु I. 205 is the same, except that for नारायणः, वायु reads महेश्वरः. Vide p. 825 note 1347 for this verse. This change was probably made by some later redactor on account of the obvious Śaiva bias of the Purāṇa. The previous verse (वायु I. 204) states that महेश्वर is the creator of नारायण. "अथवा-मनो महान् मतिर्ब्रह्मा पूर्वबुद्धिः ख्यातिरीश्वरः। प्रज्ञा संविच्चितिश्चैव स्मृतिश्च परिपठ्यते ॥ इति स्मृतेः। शङ्कराचार्य on वे. सू. I. 4. 1. Vide वायु 4. 27–28 मनो महान्मतिर्ब्रह्मा पूर्वबुद्धिः ख्यातिरीश्वरः। प्रज्ञा चितिः स्मृतिः संविद्विपुरं चोच्यते बुधैः ॥. One ms. of वायु does read पूर्वबुद्धिः, द्यौर्मूर्धानं यस्य विप्रा वदन्ति खं वै नाभिं चन्द्रसूर्यौ च नेत्रे। दिशः श्रोत्रे विद्धि पादौ क्षितिं च सोऽचिन्त्यात्मा सर्वभूतप्रणेता ॥ इत्येवंजातीयका स्मृतिरिहोदाहर्तव्या। शङ्कराचार्य on वे. सू. I. 2. 25; compare वायु 9. 120 द्यौर्मूर्धानं···वदन्ति···नेत्रे। दिशः श्रोत्रे चरणौ चास्य भूमिः सोऽ···भूतमूर्तिः ॥

Parāśara (son of Vasiṣṭha), which he received from Sārasvata, who received it from king Purukutsa on the Narmadā, who heard it from Dakṣa and others who learnt it from Brahmā.

Five out of the seven verses of Brahmāṇḍa III. 68. 97–103 are the same as Viṣṇu IV. 10. 23–27 (about what Yayāti said about tṛṣṇā). The same occur in Brahma-purāṇa 12. 40–46. It is likely that all borrow from the Mahābhārata, Ādiparva 75. 44 ff., 85. 9 ff. and Anuśāsana 7. 21 ff. The Mit. on Yājñavalkya III. 6 quotes on Nārāyaṇabali about 14 verses of the Viṣṇu-purāṇa. The Kalpataru on Mokṣa quotes 250 verses from the Viṣṇu (most of which have been identified), 70 on niyatakāla (almost all traced), 21 on brahmacāri, 28 on śrāddha (only one not traced), 21 on tīrtha (all traced), about 45 on gṛhastha-kāṇḍa.[1441] Aparārka cites about 75 verses from the Viṣṇupurāṇa and the Smṛticandrikā about 100. The Kāvyaprakāśa[1441a] (IV.) quotes two verses from this (V. 13. 21–22 about a gopakanyā attaining final release by her thorough unswerving devotion to Lord Kṛṣṇa). The Viṣṇupurāṇa teaches in some places the sublime philosophy of *advaita*;[1442] for example, it says 'He who seeks mokṣa should strive for treating all as equal, gods, men, beasts, birds, trees and creeping life are all the form of the Infinite Viṣṇu, though appearing as distinct from each other; one who realizes this should look upon the world as his own self &c.' In another place the Viṣṇupurāṇa[1443] states 'The mind alone is the cause of the bondage of men and their release; mind that is attached to the objects of the senses tends to bondage, but when it is beyond attachment to them, it tends to mokṣa'. It teaches the central doctrine of the Gītā that actions done without an eye to the reward or fruit thereof do not lead to bondage,[1444]

1441. The editor has traced several verses from गृहस्थकाण्ड, but he did not notice that the three verses on pp. 272–273 (about brāhmaṇas having to undergo far more trouble than the śūdra) are Viṣṇu VI. 2. 22–24.

1441 a. The two verses begin 'तदप्राप्ति०' and 'चिन्तयन्ती…'; and are quoted as examples of रसध्वनि based on अतिशयोक्ति by the काव्यप्रकाश.

1442. यतितव्यं समत्वे च निर्वाणमपि चेच्छता। देवा मनुष्याः पशवः पक्षिवृक्षसरीसृपाः। रूपमेतदनन्तस्य विष्णोर्भिन्नमिव स्थितम्॥ एतद्विजानता सर्वं जगत्स्थावरजङ्गमम्। द्रष्टव्यमात्मवद्विष्णुर्यतोऽयं विश्वरूपधृक्॥ विष्णु० I. 19. 46–48.

1443. मन एव मनुष्याणां कारणं बन्धमोक्षयोः। बन्धाय विषयासङ्गि मुक्त्यै निर्विषयं मनः॥ विष्णु० VI. 7. 28.

1444. मुमुक्षुणा विषयान्कर्म चक्रे चानभिसंहितम्। विष्णु VI. 7. 105; 'तत्कर्म यन्न बन्धाय सा विद्या या विमुक्तये।' विष्णु० I. 19. 41.

The date of the Viṣṇupurāṇa is a difficult question. There is no doubt that it is one of the early Purāṇas and that its text is not very much inflated. Hundreds of verses quoted in the three early digests viz. Kalpataru, Aparārka and Smṛticandrikā can be traced in the current text and this leads to the inference that the text has remained fixed for at least a thousand years. One important fact is that in this Purāṇa Vyāsa and the Sūta do not play a prominent part as in many other Purāṇas. It states as some other Purāṇas do, that Vyāsa had four pupils to whom he imparted the four Vedas and a fifth pupil the Sūta Romaharṣaṇa (III. chapters 3–7). But the sūta does not appear anywhere as the narrator of this Purāṇa. In the 4th aṁśa one remarkable matter is the mention of Śākya, Śuddhodana and Rāhula and it is stated that Śuddhodana was 23rd in descent from Bṛhad-bala of the Ikṣvāku line (chap. 22). The possibility of interpolations, particularly in the prose passages, would have to be admitted. Rāśis are referred to in III. 14. 5 (rāśiṣvarke ca gacchati) and the words lagna and horā also appear (in a prose passage). Vācaspati in his commentary on the Yogabhāṣya 2. 32 quotes it by name on *yamas* and *niyamas* (Viṣṇu VI. 7. 36–38) and a half verse 'evam bhadrāsanādīnām' etc., Viṣṇu VI. 7. 49 in com. on Yogabhāṣya III. 49. Vācaspati wrote his Nyāyasūcinibandha in *vatsara* 888 which should be taken as Vikrama year as he was a northerner and as the word 'vatsara' is used (and not śaka) i. e. 841 A. D.

The following may be read on this question. Wilson's Intro. to the translation of the Viṣṇu, vol. I. pp. LIX–LXXIII; H. 'date of Viṣṇupurāṇa' in ABORI vol. 18 pp. 265–275 and PRHR pp. 19–26 (puts if between 100–350 A. D.); Prof. Dikshitar in Pro. of the 13th Indian History Congress pp. 46–50; Jos. Abs in Festgabe Jacobi pp. 386–396 (on heterodox systems mentioned in different Purāṇas including the Viṣṇu). Vide above p. 869 for a Viṣṇupurāṇa of 23000 verses not utilized by the Dānasāgara. It would not be far from the truth to hold that the present Viṣṇu was composed between 300 to 500 A. D.

Viṣṇudharma-purāṇa— Vide pp. 873-876 above for discussion of the date assigned to it by Prof. Hazra. Shri Aśoka Chattarjee read a paper at the A.I.O.Con. at Delhi which has been published in ABORI vol. 38. 305–308, wherein he gives the date of composition of this Purāṇa as between 1250–1325A.D. H. P. Sastri' Cat of Nepal Palm-leaf mss p. LIII says that a ms. of it was copied in

1047 A.D. Bühler in I. A. vol. 19 at p. 407 holds that this Purāṇa as well as the next were canonical acc. to Alberuni's pandits.

Viṣṇudharmottara (U. pub. by Veṅk. Press). It is a huge work and has been dealt with above (pp. 876-878). In spite of its huge size it is not quoted by the Kalpataru on vrata, tīrtha, brahmacāri, gṛhastha, rājadharma, mokṣa and other kāṇḍas. Aparārka quotes only 30 verses from it, of which 24 are on dāna: the Smṛticandrikā quotes about 30 in all and that Dānasāgara quotes profusely from it on dāna. It cannot be earlier than 600 A. D., and cannot be placed later than the 10th century, though parts of it may be later additions. Chapters 52-65 of the first section are called Śaṅkaragītā. The Kālikā Purāṇa expressly refers (in chap. 91. 70 and 92. 2) to the Viṣṇudharmottara as having been concerned with Rājanīti and Sadācāra.

Sāmbapurāṇa (U. pub. by Veṅk. Press). Vide H. in 'Sāmbapurāṇa through the ages' in JASB vol. 18 (1952) pp. 91-111, 'on Sāmba-purāṇa' a śaiva work in ABORI vol. 36 (1955) pp. 62-84 and 'Studies &c.' vol. I. pp. 32-108. This purāṇa is hardly ever quoted by early digests such as the Kalpataru, Aparārka or Smṛticandrikā. Only four verses from it are quoted by the Dānasāgara. Prof. Hazra's propositions that the Bhaviṣya (pp. 68-82) and Brahmapurāṇa (present) borrow from the Sāmba are not at all acceptable to the present author, particularly in view of his own admission (in 'Studies &c.' vol. I. p. 68) that the present Sāmbapurāṇa consists of different units belonging to different climes and ages. All that can be said positively is that a purāṇa called Sāmba is mentioned by Alberuni in 1030 A. D. (Sachau I. p. 130).

Śivapurāṇa (a Mahāpurāṇa according to some Purāṇas); Printed by Veṅk. Press in two volumes. Vide H. on 'Problems relating to Śivapurāṇa' in 'Our Heritage' (Calcutta 1953) vol. I. part 1 pp. 46-48. Dr. Pusalkar in 'Studies in Epics and Purāṇas pp. 31-41 (holds that the printed Vāyu is a genuine Mahāpurāṇa, that the Śivapurāṇa is a late work and is only an Upapurāṇa); the oldest datable reference to it is in Alberuni's work (vide Sachau, vol. 1. p. 131). It is quoted in the Dānasāgara several times, but is not quoted in Kalpataru, Aparārka and Sm. C. It is divided into seven saṁhitās called Vidyeśvara, Rudrasaṁhitā (in five parts called Sṛṣṭi, Satī, Pārvatī,[1444a] Kumāra, Yuddha),

1444 a. उमेति मात्रा तपसे निषिद्धा कालिका च सा। पश्चादुमाख्यां सुमुखी जगाम तुषने तुने ॥ शिवपु० रुद्रसं० पार्वतीखण्ड 8. 17; compare 'उमेति···जगाम' कुमारसम्भव I. 26;

(*Continued on next page*)

Śatarudra, Koṭirudra, Umā, Kailāsa, Vāyavīya (in two parts). It contains about 23000 verses. In Śatarudrasaṁ., chap. 42, the twelve jyotirliṅgas are mentioned, are spoken of as avatāras of Rudra and described; in Koṭirudrasaṁ., chap. 35 one thousand names of Śiva are set out; in Kailāsasaṁ., chap. 5 maṇḍala in pūjā is described; in chap. 7 verses 5–26 various Mudrās and Nyāsas are provided for; in the Rudrasaṁ. section, Pārvati, there is a close resemblance between this purāṇa and the Kumārasaṁbhava as noted below.

Śivadharma. Vide H. in JGJRI vol. X. pp. 1–20; Aparārka p. 274 on Yāj. I. 193 quotes one verse from it which is a paraphrase of Yāj.

Śaura (U.)—Vide H. in N. I. A. vol. VI. pp. 103–111 and 121–129, in B. V. vol. IV. pp. 212–216 and 'Studies &c.' vol. I. p. 348.

Skanda—This is the most extensive of Purāṇas and poses perplexing problems. It is found in two forms, one being divided into seven khaṇḍas, viz. Maheśvara, Vaiṣṇava, Brāhma, Kāśī, Āvantya, Nāgara and Prabhāsa, the other being divided into six saṁhitās, viz. Sanatkumāra, Sūta, Sāṅkarī, Vaiṣṇavī, Brāhmī and Saura. The Skanda in seven khaṇḍas has been published by the Veṅk. Press and the Sūtāsaṁhitā with the commentary of Mādhavācārya has been published by the Anan. Press, Poona. The extent of the Skanda is variously given as 81000 ślokas, at 100000 ślokas (vide PRHR p. 158), at 86000 (in PRHR p. 159). The god Skanda does not figure prominently in this Purāṇa named after him. The Skanda is named in the Padma V. 59. 2. Skanda I. 2. 6. 79 is almost in the same words as Kirātārjunīya[1445] (II. 30 'sahasā vidadhīta na kriyām'). Skanda, Kāśīkhaṇḍa 24 (8 ff) is full of Śleṣa and Parisaṅkhyā in the style of Bāṇa as in 'yatra kṣa-

(*Continued from last page*)

वरेषु ये गुणाः प्रोक्ता नारीणां सुखदायकाः। तन्मध्ये हि विरूपाक्षे एकोऽपि न गुणः स्मृतः॥ पार्वतीखण्ड 27. 32. Compare वरेषु यद्बालसुभाषितं···तवास्ति किं व्यस्तमपि त्रिलोचने॥ कुमार० V. 72; न केवलं भवेत्पापं निन्दां कर्तुं शिवस्य हि। यो वै शृणोति तन्निन्दां पापभाक् स भवेद्धि॥ पार्वतीखण्ड 28. 37; compare न केवलं यो महतो···स पापभाक्॥ कुमार० V. 83; अद्यप्रभृति ते दासस्तपोभिः क्रीत एव ते। पार्वतीखण्ड 28. 44; compare कुमार० V. 86. There are several other close parallels, which are not set out for reasons of space.

1445. सहसा न क्रियां कुर्यात्पदमेतन्महापदाम्। विमृश्यकारिणं धीरं वृणते सर्वसम्पदः॥ स्कन्द I. 2. 6. 79.

paṇakā eva dṛśyante maladhāriṇaḥ' (verse 21) or 'vibhramo yatra nārīṣu na vidvatsu ca karhicit' (verse 9). Nāṭyaveda and Arthaśāstras are mentioned in Kāśīkhaṇḍa (Pūrvārdha 7. 4–5), Dhanvantari and Caraka on medicine are mentioned in Kāśīkhaṇḍa (Pūrvārdha 1.71); the word Jhoṭiṅga occurs in Kāśīkhaṇḍa 72. 74 (Jhoṭiṅgā rākṣasāḥ krūrāḥ). Skanda is quoted on topics of Dharmaśāstra in early commentaries and digests. The Mit. on Yāj. II. 290 mentions it in connection with the status of veśyās (courtezans). Kalpataru on vrata quotes only 15 verses from it, Kalpataru on tīrtha (pp. 36–39, 32, 46, 130–135) quotes 92 verses from it, on dāna only 44, on niyatakāla 63 verses, 18 verses on Rājadharma (on Kaumudīmahotsava), only 4 in śrāddhakāṇḍa and 3 in gṛhasthakāṇḍa. Aparārka[1446] quotes only 19 verses from it; one quotation indicates Tāntrik influence (vide note). The Dānasāgara cites 48 verses on dāna from it and the Sm. C. only 23 in all. Considering the colossal figure of ślokas in the Skanda it must be said that it is rather sparingly quoted in the Dharmaśāstra works. A verse in it seems to echo the very words of Kālidāsa and quotes the view of Devala.[1446a] In such a huge work interpolations could easily be made. So it is difficult to assign a definite date to it. A ms. of the Skanda in the Nepal Durbar Library is written in characters which belong to the 7th century A. D. according to Haraprasad Shastri (vide Cat. of Nepal Palm-leaf mss. p. LII.)

It would be not far from the truth to say that the Skanda cannot be placed earlier than the 7th century A. D. and not later than 9th century A. D. on the evidence so far available.

1446. स्कन्दपुराण is quoted by अपरार्क p. 295 on या. I. 204 on the gift of a cow. After citing five verses and a half a prose mantra is quoted as follows: ओं ह्रीं नमो भगवति ब्रह्ममातर्विष्णुभगिनि रुद्रदेवते सर्वपापविमोचिनि स्वरूपं स्मर इडे इडाम्ते इल्ये चाम्ब्रे धृतिमति सरस्वति सुश्रुते एह्येहि हुंकर हुंकुरु सर्वलोकमये एह्यागच्छागच्छ स्वाहा। इति वेतुकर्णजपः।'.

1446 a. मरणं प्रकृतिश्चैव जीवितं विकृतिर्यदा। स्कन्द I. 2. 10. 27; compare मरणं प्रकृतिः शरीरिणां विकृतिर्जीवितमुच्यते बुधैः॥ रघुवंश VIII. 87; त्रीणि ज्योतींषि पुरुष इति वै देवलोऽब्रवीत्। भार्या कर्म च विद्या च संसाराय यतस्तत्रयम्। स्कन्द I. 2. 15. 10.

SECTION V

CHAPTER XXIV

Influence of Purāṇas on Dharmaśāstra

Literary works and society act and re-act on each other. The state of Indian society a few centuries before and after Christ, riven as it was by the growing strength and onslaught of Buddhism, Jainism and other dissenting sects and disturbed by invasions of the Greeks, Śakas, Pahlavas, Hūṇas and other foreign tribes, gave much food for thought to those who were devoted to the Vedic religion and induced them to write works setting forth new ideologies and practices and effecting a re-statement of the ancient Vedic and Smṛti religion. When these works attained a position of authority and eminence, the endeavour of the followers of the Veda was to follow them as far as possible and to adapt their practices and religious rites to the requirements of the Purāṇas. We have to see how the Purāṇas set about their task of re-orientation. We must note that current Hindu religious practices, judging from the *saṅkalpa* made at the beginning of every rite, are meant to confer upon the performer the rewards declared by Śruti (Veda), Smṛti and Purāṇas (Śruti-smṛti-purāṇokta-phalaprāptyartham). The task was two-fold, viz. (1) to undermine the power and prestige of Buddhism and Jainism and the influence of the numerous philosophical[1447] schools that had sprung up and (2) to wean away large sections of the masses from the attractive features of Buddhism and to convince them that they could secure in the re-orientated Hindu faith the same benefits, social and spiritual, as Buddhism promised and that the religious principles of the followers of Veda coincided with many of the teachings of Buddhism and were borrowed by Buddhism from Vedic practices. Ultimately Buddhism vanished from the land of its origin. The main causes of this disappearance of Buddhism from Bhārata will be stated at the end of this section, but this much may be said here at once that the Purāṇas played a substantial role in bring-

1447. It is stated in the Mahāvagga (part of Suttanipāta) that there were 63 philosophical schools at the time of Buddha (vide SBE vol. X, part 2 p. 92).

ing about the decline and disappearance of Buddhism by emphasizing and assimilating some of the principles and doctrines of Buddha[1448] such as ahiṁsā, by accepting Buddha himself as an avatāra of Viṣṇu, by adopting vegetarianism as a high form of austerity, by making use of monasteries and asceticism as stated in such smṛtis as those of Manu and Yāj.

The Purāṇas set about their task by saying that for the proper understanding of the Veda, knowledge of Itihāsa and Purāṇa was essential. A famous verse says[1449] 'one should strengthen the Veda by (the study and application of) Itihāsa and Purāṇa; the Veda is afraid of the person of little learning (with the thought) that he (the man of small learning) may harm it'. Manu states[1450] that those brāhmaṇas that have learnt according to the rules (of Veda study) the Veda together with the works that strengthen it are to be understood as *śiṣṭas* and are instrumental in making (the meaning of) the Veda clearly perceptible. The Vāyu[1451] emphasizes in this connection that that brāhmaṇa who knows the four Vedas together with (the six) ancillary lores and the Upaniṣads would not be a wise man if he did not know Purāṇas. The Upaniṣads drop brief hints about the creation of *ākāśa* from the one *brahma* (in Tai. Up. II. 1), of *tejas* (Chān. Up. VI. 2. 3), of waters (Chān. Up. VI. 2. 4). The Purāṇas explain at great length the creation and dissolution of the elements (in the order reverse of that of creation) e g. Vāyu 4. 17 ff, Brahma 1-3, Agni 17, Brahmāṇḍa II. 3 ff, Kūrma I. 2, 4, 7, 8 &c. The stories of Hariścandra and

---

1448. Pargiter (in 'Puarāṇa texts of the Dynasties of the Kali age' p. XVIII footnote) thinks that it was largely through the Paurāṇika Literature that Hinduism secured its revival and the downfall of Buddhism.

1449. इतिहासपुराणाभ्यां वेदं समुपबृंहयेत्। बिभेत्यल्पश्रुताद्वेदो मामयं प्रहरिष्यति॥ आदिपर्व I. 267-268, वायु 1. 201, पद्म V. 2. 51-52, ब्रह्माण्ड I. 1. 171, वसिष्ठधर्मसूत्र 27. 6, लघुव्यासस्मृति II. 86, बृद्धात्रि chap. 3 p. 50 in Jivananda's edition (reads प्रतरिष्यति). The स्मृतिच. (I. p. 3) ascribes this verse to बृहस्पति. The प्रायश्चित्ततत्त्व p. 511 quotes it from वसिष्ठ. The कूर्म I. 2. 19 reads 'इतिहास-पुराणाभ्यां वेदार्थान्नुपबृंहयेत्'. रामानुज in his भाष्य on ब्रह्मसूत्र (p. 72 B. S. S.) quotes this verse and reads प्रतरिष्यति.

1450. धर्मेणाधिगतो यैस्तु वेदः सपरिबृंहणः। ते शिष्टा ब्राह्मणा ज्ञेयाः श्रुतिप्रत्यक्षहेतवः॥ मनु XII. 109.

1451. यो विद्याच्चतुरो वेदान्साङ्गोपनिषदो द्विजः। न चेत्पुराणं संविद्याज्जैव स स्याद्विचक्षणः॥ वायु I. 200, स्कन्द, प्रभासखण्ड 2. 93, पद्म V. 2. 50-51 (reads the second half as 'पुराणं च विजानाति यः स तस्माद्विचक्षणः।'. ब्रह्माण्ड I. 1. 170 has the first half.

Naciketas that occur in the Ait. Br. and the Kaṭhopaniṣad are explained at length in Brahmapurāṇa (chap. 104 and 150 about Hariścandra), in Sabhāparva chap. 12 (for Hariścandra) and in Anuśāsana chap. 91 (for Naciketas). The famous dialogue of Yama and Yamī (Ṛg. X. 10) is expanded in the Narasiṁha-purāṇa (chap. 13. 6–36). The Viṣṇupurāṇa[1452] (IV. 6. 34 ff) sets out the story of Purūravas and Urvaśī, refers to the hymn in the Ṛg. X. 95 for that story and quotes the first verse of the hymn in a somewhat corrupt form.

But the claims of the extant Purāṇas go far beyond the above viz. as strengtheners of the Veda. The Kūrma[1453] states: '(put) on one side all the Purāṇas together with Itihāsa (Mahā-bhārata) and on another the highest Veda; it is this (Purāṇas) that surpasses (the other viz. Veda)'. The Mahābhārata also makes a similar claim. The Purāṇas appear to claim priority (and even equality) with the Veda. In note 1349 passages from the Matsya and other Purāṇas have been cited, stating that Brahmā first thought of the Purāṇas before all other śāstras and then the Vedas sprang forth from his lips. Several Purāṇas are spoken of as equal to the Veda (Vedasammita) as in[1454] Vāyu I. 11, 4. 12, Brahma 1. 29, 245. 4 and 21, Viṣṇu I. 1. 13, VI. 8. 12, Padma VI. 282. 116. Further, several Purāṇas claim to have been delivered by some God such as Brahmā (Brahmapurāṇa I. 30) or by the Wind-god (Vāyu I. 196)[1455] or by the avatāras of Viṣṇu as in the case of Matsya-purāṇa (I. 26) or Varāha (2. 1–3). The japa of Vedic texts was deemed to destroy all sins as shown in H. of Dh. vol. IV. pp. 45–50. The Purāṇas also say that reading the Purāṇas or listening to a recitation of them

---

1452. विष्णुपुराण IV. 6. 64 in prose runs: ततश्चोन्मत्तरूपो जाये हे तिष्ठ मनसि घोरे तिष्ठ वचसि कपटिके तिष्ठेत्येवमनेकप्रकारं सूक्तमवोचत्। Compare ऋग्वेद X. 95. 1 'हये जाये मनसा तिष्ठ घोरे वचांसि मिश्रा कृणवावहै नु'.

1453. एकतस्तु पुराणानि सेतिहासानि ... रिच्यते ॥ कूर्म II. 46.129 (q. in note 1402 above). एकतश्चतुरो वेदा भारतं चैतदेकतः। पुरा किल सुरैः सर्वैः समेत्य तुलया धृतम्। चतुर्भ्यः सरहस्येभ्यो वेदेभ्यो ह्यधिकं यदा। तदाप्रभृति लोकेस्मिन्महाभारतमुच्यते। आदिपर्व 1. 271–273.

1454. पुराणं संप्रवक्ष्यामि ब्रह्मोक्तं वेदसंमितम्। वायु 1. 11; गुरुं प्रणम्य वक्ष्यामि पुराणं वेदसंमितम्। ब्रह्म 1. 29; पुराणं नारदोपाख्यमेतद्वेदार्थसंमितम्। नारदीय I. 1. 36.

1455. Vāyu (103. 58–66) narrates how from Brahmā the purāṇa came to Vāyu and how through a succession of about 30 teachers it came down to Dvaipāyana and lastly to Sūta.

would destroy all sins.[1456] Vide Vāyu 103. 58, Brahma 175. 89–90, Matsya 290. 20, 291. 29 and 31, Viṣṇu VI. 8. 3, 12. Some of the Purāṇas indulge in extravagant praise of themselves, e. g. the Varāha-purāṇa (217. 12–13, 217. 15–16) states that reading ten chapters of that Purāṇa confers the merit secured by the performance of Agniṣṭoma and Atirātra sacrifices. Vide Brahma 254. 34–35, Agni 384. 13–30, Devī-Bhāgavata XII. 13. 11–17 in a similar strain. Moreover, the Purāṇas dwell upon the superior value and efficacy, as compared with the Vedic sacrifices, of some of the institutions on which they lay emphasis, such as pilgrimages,[1457] vratas, *bhakti*. The Padma states (I. 38. 2 and 18) that by merely going to Gayā or by taking a bath in the Phalgu river one secures the reward that the performance of Aśvamedha confers. The Skanda proclaims[1458] 'I have no use for sacrificial rites that are declared by the Veda, that have no life in them, that are within the domain of ignorance and that entail injury (to animals). If (a sacrifice) is performed with such inanimate things as fuel-sticks, flowers and kuśa grass, the result must be similar (inanimate), since the effect is like the cause'. Vide Śāntiparva 337 for a story on the discussion between sages and gods about offering in sacrifices merely products of grains or goat-flesh. Offerings of flesh in sacrifices to gods were made in the Ṛgvedic period. But even in the Ṛgveda there are a few verses that indicate that offerings of ghee and fuel-sticks were declared to be able to win the favour of gods as much as animal sacrifices might do. 'Whoever[1459] offers to (or worships) Agni with a fuel-stick or with an oblation of ghee or

---

1456. सर्वपापहरं पुण्यं पवित्रं च यशस्वि च। ब्रह्मा ददौ शास्त्रमिदं पुराणं मातरिश्वने॥ वायु 103. 58; पुराणसंहिता चेयं तव भूप मयोदिता। सर्वपापहरा नित्यमारोग्यश्रीफलप्रदा॥ मत्स्य 290. 20; पुराणं वैष्णवं चैतत्सर्वकिल्बिषनाशनम्। विशिष्टं सर्वशास्त्रेभ्यः पुरुषार्थोपपादकम्॥ एतत्ते यन्मयाख्यातं पुराणं वेदसंमतम् (संमितम्?)। श्रुतेऽस्मिन् सर्वदोषोत्थाः पापराशीः प्रणश्यति॥ विष्णु. VI. 1. 8. 3 and 12.

1457. Vide H. of Dh. vol. IV. pp. 561–564 for superiority of tīrthas to solemn Vedic sacrifices and pp. 43–45 above for the eulogy of *vratas*. The efficacy of *bhakti* (loving faith in God) will be dealt with later on in this section.

1458. अविद्यान्तर्गतैर्यज्ञकर्मभिर्न प्रयोजनम्। मम हिंसात्मकैरस्ति निगमोक्तैरचेतनैः॥ समित्पुष्पकुशाद्यैः साधनैर्यश्चेतनैः। क्रियते तत्तथा भावि कार्यं कारणवन्मृणाम्॥ स्कन्द I. 2. 13. 59–60.

1459. यः समिधा य आहुती यो वेदेन ददाश मर्तो अग्नये। यो नमसा स्वध्वरः॥ तस्येदर्वन्तो रंहयन्त आशवस्तस्य घृष्णितमं यशः। न तमंहो देवकृतं कुतश्चन न मर्त्यकृतं नशत्॥ ऋ. VIII. 19. 5–6.

with (the study of) the Veda or who performs a good sacrifice with prostrations, for him alone run fleet horses and his is most brilliant fame; and no evil whether brought about by gods or by men might reach him from any side'. Another mantra[1460] says 'O Agni! we bring to you an offering accompanied by a ṛkmantra fashioned (or produced) by our heart. May those mantras be oxen, bulls and cows from you'.

The Purāṇas only pursue an attitude to Veda and sacrifices that is found in some of the Upaniṣads. The Muṇḍakopaniṣad[1461] says: 'one should know two vidyās (lores), *parā* (the higher) and *aparā* (the lower); the latter comprehends the four Vedas and Phonetics, aphorisms about solemn sacrifices, grammar, Nirukta (derivation of words), metres, astronomy; while the highest lore is that whereby the Imperishable (Reality) is known'. The same Upaniṣad condemns aparā-vidyā when it says 'These sacrifices are infirm (leaky) boats constituted by eighteen (persons) depending on which are declared actions that are inferior; those foolish people who welcome these actions as the highest good become subject again to old age and death'. The Kaṭhopaniṣad[1462] states that what are known as *avidyā* and *vidyā* are far apart from each other, are contradictory and lead to different results. When Nārada approached Sanatkumāra and requested the latter to teach him, the latter said to him 'tell me what you know and then I shall tell you what is beyond that.' Then Nārada stated that he knew all the four Vedas, Itihāsa-purāṇa the fifth Veda and several other lores, whereupon Sanat-kumāra told him that the four Vedas and the other lores he had learned were merely a name and then he led Nārada gradually to the understanding of the Highest Self. The Bṛ. Up. I. 4. 10 condemns him, who worships a deity thinking he is different from the *devatā*, that he does not know the truth, that he is like a (sacrificial) animal to the gods. Similarly, in

---

1460. आ ते अग्न ऋचा हविर्हृदा तष्टं भरामसि । ते ते भवन्त्वुक्षण ऋषभासो वशा उत ॥ ऋ. VI. 16. 47.

1461. द्वे विद्ये वेदितव्ये इति ह स्म यद् ब्रह्मविदो वदन्ति परा चैवापरा च । तत्रापरा ऋग्वेदो यजुर्वेदः सामवेदोऽथर्ववेदः शिक्षा कल्पो व्याकरणं निरुक्तं छन्दो ज्योतिषमिति । अथ परा यया तदक्षरमधिगम्यते ॥ मुण्डकोप० I. 1. 4–5; प्लवा ह्येते अदृढा यज्ञरूपा अष्टादशोक्तमवरं येषु कर्म । एतच्छ्रेयो येऽभिनन्दन्ति मूढा जरामृत्युं ते पुनरेवापियन्ति ॥ मुण्डकोप० I. 2. 7. The 18 are the 16 priests, the sacrificer and his wife. In his भाष्य on Vedāntasūtra I. 2. 21 Śaṅkarācārya holds that this verse is part of the condemnation of *aparā vidyā*.

1462. दूरमेते विपरीते विषूची अविद्या या च विद्येति ज्ञाता । कठोप. I. 2. 4.

several passages of the Upaniṣads austerities, liberality, straightforwardness, ahiṁsā and truthfulness are put forward as equal to or superior to the actual performance of the ceremonial of sacrifice (*yajna*); vide Chāndogya III. 17. 4, Praśna I. 15, Muṇḍaka I. 2. 11.

Though in a few passages of the Upaniṣads the knowledge of the Highest Self is put higher than the four Vedas, the Upaniṣads generally treat the Vedas as authoritative and quote Vedic verses in support of their statements. For example, the Ait. Up. II. 5 quotes Ṛgveda IV. 27. 1 (taduktam-ṛṣiṇā-Garbhe nu &c.), Praśnop. I. 11 quotes Ṛg. I. 164. 12 (pañcapādam pitaram), Bṛ. Up. II. 5. 15, 17 and 19 quote respectively Ṛg. I. 116. 12, I. 117. 22, VI. 47. 18 (rūpam rūpam pratirūpo). The Upaniṣads further emphasize[1463] that brahmavidyā is to be imparted only to those who are *śrotriya* (who have studied the Veda), who engage in their duties and who have properly performed Śirovrata. The Bṛ.[1464] Up. shows that Veda study, sacrifices, charity &c. are preparations for the knowledge of *brahma*: 'Brāhmaṇas (and others) desire to know this (great Self) by study of the Veda, by sacrifices, gifts, *tapas*, fasting'. These passages make it clear that study of the Veda and performance of sacrifices enjoined by it are accepted by the Upaniṣads as preparatory and as cleansing the mind of its lower passions and as making a person worthy of receiving the knowledge of the highest truth about the One Supreme Spirit and that the Upaniṣads do not altogether condemn and give up the Vedas and sacrifices.

The Purāṇas adopt, in spite of the claims made by them here and there about their priority to the Vedas, about their own value and efficacy, the same attitude towards the Veda as the Upaniṣads do. They treat the Vedas as authoritative and enjoin

---

1463. तदेतदृचाभ्युक्तम् । क्रियावन्तः श्रोत्रिया ब्रह्मनिष्ठाः स्वयं जुह्वत एकर्षिं श्रद्धयन्तः । तेषामेवैतां ब्रह्मविद्यां वदेत शिरोव्रतं विधिवद्यैस्तु चीर्णम् ॥ मुण्डकोप० III 2. 10. शिरोव्रत is carrying fire on the head (according to Ātharvaṇa rules). The देवीभागवत (XI. 9. 12-13) remarks 'अग्निरित्यादिभिर्मन्त्रैः षड्भिः शुद्धेन भस्मना । सर्वाङ्गोद्धूलनं कुर्यात् शिरोव्रतसमाह्वयम् ॥ ...यावद्विद्योदयस्तावत्तस्य विद्या खलूत्तमा ॥'. The six अथर्वशिरस् mantras are : अग्निरिति भस्म, वायुरिति भस्म, जलमिति भस्म, स्थलमिति भस्म, व्योमेति भस्म, सर्वं ह वा इदं भस्म'.

1464. तमेतं वेदानुवचनेन ब्राह्मणा विविदिषन्ति यज्ञेन दानेन तपसाऽनाशकेन । बृह. उप. IV. 4. 22; vide गीता 18. 5 यज्ञदानतपःकर्म न त्याज्यं कार्यमेव तत् । यज्ञो दानं तपश्चैव पावनानि मनीषिणाम् ॥.

the employment of Vedic mantras in many rites. The author contributed a paper to the Dr. Kunhan Raja Presentation volume pp. 5–8 on the 'Vedic mantras and legends employed in Purāṇas' citing illustrations from the Brahmapurāṇa. A few illustrations from other Purāṇas may be set out here. The Matsyapurāṇa (chap. 93) when describing the procedure of the *homa* to the nine planets prescribes nine Vedic mantras, five of which are different from those provided by Yāj. (I. 300–301). Vide p. 750 above for a comparative table of the two sets of mantras. In the Udvāhatattva[1465] Raghunandana remarks that the mantras 'ā kṛṣṇena' and others are common to persons following the four Vedas and that Bhavadevabhaṭṭa held the same view. Matsya prescribes that when inauspicious birds (like an owl) or animals cry near a house or enter it, a homa should be performed, or five brāhmaṇas should engage in a *japa*[1466] of the hymn beginning with 'Devāḥ kapota' (Ṛg. X. 165. 1–5). In describing the whole procedure of the establishment of images of gods or the *liṅga* (of Śiva), the Matsya (chapter 265) prescribes numerous Vedic verses and hymns for the different parts of the ceremony. For example, for bringing about the purification of the image four mantras are prescribed viz. Ṛg. VII. 49. 1-3 and X. 9.1; in providing for the placing of a jar full of water near the head of the bed on which the image is to be placed, two mantras 'Āpo devī' (Vāj. S. 12. 35, Tai. S. IV. 2. 32) and 'āpo asmān mātaraḥ' (Ṛg. X. 17. 10) are to be recited. Matsya (265. 24–29) prescribes for the japa of several *sūktas* (hymns) by four door-keepers learned in the Vedas that are to stand in the four main directions. The Agnipurāṇa (41. 6–8) providing for the laying down of baked bricks or stones in building a temple prescribes the recital of many Vedic mantras, viz. Ṛg. X. 9. 1–3, Ṛg. X. 9. 4, Ṛg. IX. 58. 1–4, Pāvamānī verses (either Ṛg. IX. 1. 1–10 or verses from Ṛg. IX), Ṛg. I. 24. 15, Ṛg. IV. 31. 1, Vāj. S. IV. 36 (Varuṇasya), Ṛg. IV. 40. 5 and the Śrīsūkta (of 29 verses

---

1465. गृहहोमे तु आ कृष्णेनेत्यादिमन्त्राः सर्ववेदसाधारणाः पुराणोक्तत्वात्। तथा च मत्स्यपुराणम्। आ कृष्णेनेति सूर्याय होमः कार्यो द्विजन्मना। ...केतुं कृण्वन्निति कुर्यात् केतूनामुपशान्तये॥ अत एव भवदेवभट्टेनापि तथा लिखितम्॥ उद्वाहतत्त्व (Jiv. II. p. 126). The मत्स्यपुराण verses quoted are 93, 33–37. The mantras are taken from the Ṛgveda, Tai. S., Vāj. S. What रघुनन्दन emphasizes is that whatever Veda may be studied by a man and his family, he has to employ the mantras specified by Matsya when he performs a *grahahoma*.

1466. सूनपक्षिविकारेषु कुर्याद्धोमं सदक्षिणम्। देवाः कपोत इति वा जप्तव्याः पञ्चभिर्द्विजैः॥ मत्स्य 237. 13.

beginning with 'Hiraṇyavarṇām hariṇīm'). The Nāradīya-purāṇa (II. 73. 83-90) contains at end of each of the verses parts of vedic prayer, which occur in Ṛg. VII. 66. 16, Tai. Ār. IV. 4. 2-5 and Vāj. S. 36. 24; Bhāgavata I. 2. 21 (*bhidyate* &c.) is taken from Muṇḍaka Up. II. 2. 8.

The Purāṇas not only prescribe Vedic mantras for various purposes, but suggest the employment of numerous Paurāṇika mantras. It appears that Paurāṇika mantras came to be employed along with Vedic mantras in religious rites even of Brāhmaṇas at the beginning of the Christian era or within a few centuries after Christ. Yāj. I. 229 prescribes that the Viśve Devas should be invited to come to a śrāddha with the ṛk, 'O Viśve-Devas! Come, listen to this my call, sit down on these *kuśas*' (Ṛg. II. 41. 13). On this the Mitākṣarā (about 1100 A. D.) remarks that along with the Vedic *mantra* mentioned by Yāj. a smārta mantra should also be employed viz. the mantra[1467] 'āgacchantu mahābhāgā,' which occurs in Skanda and Garuḍa-purāṇa. Vide H. of Dh. vol. IV. p. 440 note 984 for the ascription of this verse to various authorities. The Vāyupurāṇa[1468] prescribes that the mantra 'adoration to the *devatās*, to *pitṛs*, to the great Yogins, to *svadhā* and *svāhā*; they are always present' should be recited thrice at the beginning and at the end of śrāddha and at the time of offering *piṇḍas*; the pitṛs quickly come when the mantra is repeated and goblins run away; this mantra protects the pitṛs in all three worlds'. This mantra is styled 'Saptārcis' (having seven flames) in Vāyu 74. 20, Brahmāṇḍa III. 11. 30 and in Viṣṇudharmottara I. 140. 68 and by Hemādri on śrāddha pp. 1079 and 1208, who notes that it occurs in seven Purāṇas. In chap. 206 of the Agni in the procedure of offering *arghya* to the star Agastya (Canopus) Ṛg. I. 179. 6 has been adopted as verse 13.

1467. The मन्त्र is: आगच्छन्तु महाभागा विश्वेदेवा महाबलाः। ये यत्र विहिताः श्राद्धे सावधाना भवन्तु ते॥. This is गरुडपुराण I. 218. 7, but q. by अपरार्क on p. 478 from बृहस्पति and on p. 481 from ब्रह्मपुराण.

1468. The mantra is: देवताभ्यः पितृभ्यश्च महायोगिभ्य एव च। नमः स्वधायै स्वाहायै नित्यमेव भवन्त्युत॥ वायु 74. 15-16. Vide H. of Dh. vol. IV. pp. 458-459 note 1020 for all the verses in relation to this mantra and the purāṇas where they occur. In the printed ब्रह्माण्ड III. 11. 17-18 the मन्त्र is देवताभ्यः...एव च। नमः स्वाहायै स्वधायै नित्यमेव भवत्युत. Some read नित्यमेव नमो नमः. The मिता. on या. I. 121 says that this mantra should be employed by śūdras in all the five daily sacrifices according to some, while others said that the śūdra was only to utter the word नमः.

Not only are mantras from Vedic Saṁhitās prescribed by the Purāṇas for certain rites, but Upaniṣad passages also sometimes with slight variance are bodily transferred into some of the Purāṇas. For example, Kūrma II. 9.12, 13 and 18 embody Tai. Up. II. 4 (yato vāco nivartante), Śvetāśvataropa. III. 8 (vedāham-etam puruṣam) and VI. 11 'eko devaḥ'. The Viṣṇupurāṇa VI. 5. 65 is 'dve vidye veditavye iti cātharvaṇī śrutiḥ' and contains a passage of the Muṇḍaka Up. I.1.4 (vide note 1461 above). The Vāyu 20. 5 (praṇavo dhanuḥ) and 20. 28 (Ajāmekām) are respectively Muṇḍakopa. II, 2. 4 and Śvetāśvatara-up. IV. 5. Vāyu 14. 13 (sarvataḥ pāṇipādāntam) is almost the same as Śvetāśvatara Up. III. 16 and Vāmana 47. 64–65 has the same verse. Vāmana 47. 67 is almost the same as Ṛg. I. 10. 1.

This gives rise to interesting questions. The śūdras had no right to study the Veda. But as a matter of fact the Purāṇas contain as exemplified above a good many Vedic mantras. It is stated in the Bhāgavata[1468a] 'women, śūdras and brāhmaṇas in name only are beyond the pale of the three Vedas; therefore the sage (Vyāsa) composed through compassion for them the Bhārata tale'. The Devībhāgavata states 'study of the Veda

---

1468 a. स्त्रीशूद्रद्विजबन्धूनां त्रयी न श्रुतिगोचरा। ...तस्माद्भारतमाख्यानं कृपया मुनिना कृतम्॥ भागवत I. 4. 25 q. by परिभाषाप्रकाश p. 37, which remarks 'वेदकार्यकारित्वावगमाद्भारतस्य वेदकार्यात्मज्ञानकारित्वसिद्धिः'. स्त्रीशूद्रद्विजबन्धूनां न वेदश्रवणं मतम्। तेषामेव हितार्थाय पुराणानि कृतानि च। देवीभागवत I. 3. 21. शङ्कराचार्य is careful to point out on Vedāntasūtra I. 3. 38 that śūdras have no *adhikāra* for brahmavidyā based on the study of the Veda. But he does not deny to the śūdras the knowledge of the Self altogether. He refers to the instances of Vidura and Dharmavyādha that were possessed of the knowledge of *brahma* due to the effects of their former lives, states that they would secure the result of brahmajñāna (viz. mokṣa, final liberation from *saṁsāra*), that śūdras have the right to learn from the Mahābhārata and Purāṇas as stated in 'he should read to the four varṇas' and that in that way they might secure knowledge of brahma and mokṣa. "येषां पुनः पूर्वकृतसंस्कारवशाद्विदुरधर्मव्याधप्रभृतीनां ज्ञानोत्पत्तिस्तेषां न शक्यते फलप्राप्तिः प्रतिषेद्धुं ज्ञानस्यैकान्तिकफलत्वात्। 'श्रावयेच्चतुरो वर्णान्' इति चेतिहासपुराणाधिगमे चातुर्वर्ण्यस्याधिकारस्मरणात्। वेदपूर्वकस्तु नास्त्यधिकारः शूद्राणामिति स्थितम्॥ भाष्य on वे. सू. I. 3. 38. On वे. सू. III, 4. 36 शङ्कराचार्य refers to the woman वाचक्नवी as one who had the knowledge of brahma 'ऐक-वाचक्नवी-प्रभृतीनामेवंभूतानामपि ब्रह्मविज्ञानश्रुत्युपलब्धेः'. गार्गी वाचक्नवी figures as a great seeker after *brahma* in the Bṛ. Up. III. 6. 1, III. 8. 1 and 12. The महाभारत says that what it dilates upon as to the पुरुषार्थs, धर्म, अर्थ, काम and मोक्ष, is found elsewhere and that what it does not contain on those subjects can be found nowhere else and that the Mahābhārata should be listened to by him who desires mokṣa, by brāhmaṇas, kings and pregnant women (Svargārohaṇaparva 5. 50–51).

is not accepted for women, śūdras and brāhmaṇas in name only and Purāṇas are compiled for the purpose of benefitting them'. From this it follows that in the case of śūdras the listening to the Bhārata was deemed to bring about the same results that the Veda does for *dvijas* and that even the śūdra may acquire the knowledge of the Self (and mokṣa) from the Bhārata.

Though the brāhmaṇas in the 5th and following centuries A. D. wanted to placate the śūdras who were probably a majority of the whole people and to wean them away from Buddhism, they still kept a distinction between *dvijas* and *śūdras* and the only concessions made were that the śūdras could worship in the same way as dvijas did and that they could have mantras (Paurāṇika) in their rites and ceremonies. For example, in allowing *bhasma-snāna* (smearing ashes on the body) the Padma (IV. 110. 236–289) provides Vedic mantras for men of the three varṇas but Paurāṇika mantras only (Padma IV. 110. 290–293) for śūdras. The Padma[1469] further provides that śūdras could not perform prāṇāyāma or utter the sacred syllable 'om' but that they should substitute *dhyāna* in place of prāṇāyāma and 'Śiva' in place of 'om'.

Gradually in some matters the procedure provided in the Purāṇas came to supersede the ancient Vedic procedure prescribed for them. Aparārka states (on p. 14) that in Devapūjā one should follow the procedure prescribed in the Narasiṁhapurāṇa[1470] and the like and not the procedure of the Pāśupatas or Pāñcarātras and (on p. 15) he says the same about the consecration of temples,[1471] images and the like.

The Narasiṁhapurāṇa (chap. 63. 5–6) says that the mantra 'om namo Nārāyaṇāya' enables one to secure all objects and *japa* of it frees a man from all sins and leads him to absorption into Viṣṇu.[1472]

1469. प्राणायामश्च प्रणवः स्त्रीशूद्रेषु न विधीयते। प्राणायामपदे ध्यानं शिवेत्योङ्कारवर्णनम्॥ पद्म IV. 110. 316.

1470. नरसिंहपु० chap. 62 deals with the procedure of विष्णुपूजा.

1471. एवं प्रतिष्ठायामपि पुराणाद्युक्तैवेतिकर्तव्यता ग्राह्या नान्या। तेषामेव स्मार्ताधर्म-प्रमाणत्वेन भविष्यपुराणे परिज्ञातत्वात्। अपरार्क p. 15.

1472. किं तस्य बहुभिर्मन्त्रैः किं तस्य बहुभिर्व्रतैः। ओं नमो नारायणेति मन्त्रः सर्वार्थ-साधकः॥ इमं मन्त्रं जपेद्यस्तु शुचिर्भूत्वा समाहितः। सर्वपापविनिर्मुक्तो विष्णुसायुज्यमाप्नुयात्॥ नरसिंहपु० 63. 6–7; किं तस्य बहुभिर्मन्त्रैर्भक्तिर्यस्य जनार्दने। नमो नारायणायेति मन्त्रः सर्वार्थ-साधकः। विष्णुर्येषां जयस्तेषां कुतस्तेषां पराजयः। येषामिन्दीवरश्यामो हृदयस्थो जनार्दनः॥ वामनपु० 94. 58–59; the मत्स्य says 'ओं नमो नारायणेति मूलमन्त्र उदाहृतः।'.

The Agnipurāṇa (chap. 218) describes the procedure of the king's coronation and (chapter 219) sets out the Paurāṇika mantras (about 70) employed at the coronation. Similarly, the Viṣṇudharmottara (II. 21) describes the procedure of coronation with Vedic mantras and (in II. 22) with 184 Paurāṇika verses invoking various gods, minor deities, sages, rivers &c. Medieval digests like the Rājanītiprakāśa (pp. 49–83), Nītimayūkha (pp. 1–4), Rājadharmakaustubha (pp. 318-363) describe the combined coronation procedure of Vedic and Paurāṇika mantras from the Visnu-dharmottara (vide pp. 78–79 of the H. of Dh. vol. III. for details). The Rājanītiprakāśa (pp. 430–433) prescribes numerous mantras derived from the Viṣṇudharmottara as prayers and as blessings.

The Padmapurāṇa[1473] narrates the interesting story of a person called Dhanaśarmā whose father followed only the Vedic path (śrauta-mārga), who did not engage in such Paurāṇika prescriptions as Vaiśākhasnāna and who therefore became a horrible and distressed *preta*. Some of the verses are very interesting. 'I performed in my ignorance only Vedic rites and I never observed *Vaiśākhasnāna* in honour of God Mādhava (Visnu), nor observed a single Vaiśākha *Full Moon* vrata which is like an axe for cutting the tree of sins that afflicts one like a conflagration fed by the fuel of sinful deeds &c.; to one who studies many śāstras and several Vedas with their extensive ancillary Literature, learning does not come, if he has not studied Purāṇas'. This shows what importance came to be attached to Purāṇas not only for śūdras but even for brāhmaṇas who performed the Vedic rites prescribed for them.

The influence of the Purāṇas went on increasing gradually. At first it was said[1474] that the dharma understood from the Veda was the highest, while the dharma declared in the Purāṇas

---

1473. मया केवलमेवैकश्रौतमार्गानुसारिणा । उद्दिश्य माधवं देवं न स्नातं मासि माधवे ॥ वैदिकं केवलं कर्म कृतमज्ञानतो मया । पापेन्धनदवज्वालापापद्रुमकुठारिका ॥ कृता नैकापि वैशाखी विधिना वत्स पूर्णिमा । अव्रता यस्य वैशाखी सोऽवैशाखो भवेन्नरः । दश जन्मानि च स तत्तिर्यग्योनिषु जायते ॥ पद्म IV. 94. 68. 88–90; बहुशास्त्रं समभ्यस्य बहून्वेदान् सविस्तरान् । पुंसोऽश्रुतपुराणस्य न सम्यग्याति दर्शनम् ॥ पद्म IV. 105. 13.

1474. अतः स परमो धर्मो यो वेदादधिगम्यते । अवरः स तु विज्ञेयो यः पुराणादिषु स्मृतः ॥ व्यास q. by अपरार्क p. 9, हे. on व्रत I. p. 22, परिभाषाप्रकाश p. 29. The कृ. र. p. 39 reads 'अपरः स तु विज्ञेयो'. It may be noted that while अपरार्क read अवरः (inferior), the कृ. र. (about two centuries later than अपरार्क) reads अपरः (another).

and the like was *inferior*. | This gradually changed and dharma was said to be of three kinds, Vaidika, Tāntrika and Miśra and it was said in the Bhāgavata[1475] and the Padma that one may worship god Viṣṇu in any one of the three ways that one desired. The Padma adds that the Vaidika and Miśraka methods are declared to be proper for brāhmaṇas and the like, while the Tāntrika method of worship is meant for a devotee of Viṣṇu and also for śūdras. The Devībhāgavata (XI. 1. 21–23) states that Śruti (Veda) and Smṛti are the eyes of dharma and Purāṇa its heart, and that that is dharma which is declared by these three and that *dharma* can be found nowhere else than in these, that in Purāṇas sometimes what is found in Tantras is put forward as dharma, but one should not accept that.

The Bhavisya (Brāhmaparva I. 43–47) in a dialogue between Śatānīka and Sumantu) first enumerates the 18 dharma-śāstras from Manu to Atri, states that the Vedas, the śāstras of Manu and others and the aṅgas are promulgated for the three varṇas and not for the benefit of śūdras, that śūdras appear to be very much helpless; how can they be able to secure the four *puruṣārthas?* They are devoid of āgama (traditional lore); what traditional lore was declared for them by the wise among the brāhmaṇas for enabling them to secure the three viz. dharma, artha and kāma? Sumantu replies:[1476] listen to the Dharma-śāstras that were declared by wise men for the benefit of all four varṇas and specially for śūdras viz. the 18 Purāṇas, the life of Rāma of the Raghu race (i. e. the Rāmāyaṇa) and the Bhārata

1475. वैदिकस्तान्त्रिको मिश्र इति मे त्रिविधो मखः। त्रयाणामीप्सितेनैव विधिना मां समर्चयेत् ॥ भागवत XI. 27. 7, q. by नित्याचारपद्धति p. 510; पद्म (IV. 90. 3–4) reads वैदिक···श्रीविष्णोस्त्रिविधो मखः। त्रयाणामुदितेनैव विधिना हरिमर्चयेत् ॥ वैदिको मिश्रको वापि विप्रादीनामुदाहृतः। तान्त्रिको विष्णुभक्तस्य शूद्रस्यापि प्रकीर्तितः ॥. Vide अग्निपु० 372. 34 for almost the same words as in भागवत. Compare बृद्धहारीतस्मृति 11. 77 'श्रौत-स्मार्तागमैर्विष्णोस्त्रिविधं पूजनं स्मृतम्। एतच्छ्रौतं ततः स्मार्तं पौरुषेण च यत्स्मृतम् ॥'.

1476. चतुर्णामपि वर्णानां यानि प्रोक्तानि श्रेयसे। धर्मशास्त्राणि राजेन्द्र शृणु तानि नृपोत्तम ॥ विशेषतश्च शूद्राणां पावनानि मनीषिभिः ॥ अष्टादश पुराणानि चरितं राघवस्य च। रामस्य कुरुशार्दूल धर्मकामार्थसिद्धये। तथोक्तं भारतं वीर पाराशर्येण धीमता। वेदार्थं सकलं योज्य धर्मशास्त्राणि च प्रभो। कृपालुना कृतं शास्त्रं चतुर्णामिह श्रेयसे। वर्णानां भवमग्नानां कृतं पोतो ह्यनुत्तमम्। भविष्य, ब्राह्मपर्व 1. 53–57; आ. त्रि. की. p. 66 quotes the verses अष्टादश···धीमता. The भागवत also says that the whole meaning of the Veda was put forward under the name Bhārata, in which even women and śūdras find what *dharma* is: 'भारतव्यपदेशेन ह्याम्नायार्थश्च दर्शितः। दृश्यते यत्र धर्मादि स्त्रीशूद्रादिभिरप्युत ॥ भागवत I. 4. 29. Vide above p. 870 and note 1408 about the lack of antiquity in the case of this passage from Bhavisya (Brāhmaparva).

declared by Parāśara's son (Vyāsa); the compassionate Vyāsa composed a śāstra for the benefit of all four varṇas in which he comprehended the entire meaning of the Veda and the Dharmaśāstras; it is an unparalleled boat for all that are engulfed in *saṁsāra*. This makes it clear that the Purāṇas, the Mahābhārata and the Rāmāyaṇa embody pristine traditions and thoughts and were deemed to have been composed as the instruments of the education and enlightenment of the common people. As a matter of fact we find that some Purāṇas like Agni, Matsya, Viṣṇudharmottara are encyclopaedic and include treatises on politics and government, on law, medicine, astronomy, astrology, poetry, music, sculpture &c. They illustrate India's life and character as a country and exemplify Bhārata's achievements, weaknesses and shortcomings. Two questions that arise are: (1) could the Purāṇas including the Vedic mantras quoted therein be read by the śūdras themselves; (2) supposing that Vedic mantras could not be read by the śūdras, could they, if they were able to do so, by themselves read the purāṇas without a brāhmaṇa's help. All writers of digests and commentaries were agreed that śūdras could not read or listen to the Vedic mantras contained in the Purāṇas (which being meant for the benefit of all varṇas contained Vedic mantras also), but only those that belonged to the three upper classes. Some writers, however, were agreeable to śūdras reciting Paurāṇika mantras in religious rites, relying on a passage of the Padmapurāṇa. But others like Kamalākarabhaṭṭa, author of the Nirṇayasindhu and Śūdrakamalākara, held relying on verses of the Bhaviṣya that Paurāṇika mantras alone were to be used by a brāhmaṇa in a religious rite for a śūdra, that the śūdra was only to listen to the reading of a purāṇa by a brāhmaṇa reader. There was a third view held by Śrīdatta and others that a śūdra could recite a paurāṇika mantra, but he should not himself read the Purāṇas and should only listen to the reading of Purāṇas by a brāhmaṇa. In the times of the Dharmasūtras the only mantras employed were mostly Vedic and therefore in the case of śūdras Gautama[1477] provided that the śūdras were allowed the alternative of saying 'namaḥ' in place of a Vedic mantra. In the centuries preceding Christ the śūdras would naturally have been attracted to Buddha's teaching as it was addressed to all including śūdras. Comparatively early orthodox writers like

1477. अनुज्ञातोऽस्य नमस्कारो मन्त्रः । गौ. X. 66; compare the quotation from the Padma in note 1469 p. 922.

Kumārila knew that the śūdras formed the largest number of professed Buddhists when he says[1478] 'the dicta of Śākya and others were all opposed, except a few relating to self-restraint, charity and the like, to all the fourteen sources of learning, were promulgated by Buddha and others that had strayed from the path of the three Vedas and did acts contrary (to the Veda) and that those dicta were presented by them to those who were deluded, who were outside the pale of the three Vedas, who mostly comprised the 4th varṇa (i. e. śūdra) and those that had lost caste'. Therefore, the learned brāhmaṇas who wanted to wean sections of the masses (including śūdras) away from Buddhist teachings composed new Paurāṇika mantras by the thousand and employed them in all religious rites like śrāddhas, vratas &c. It was, therefore, that earlier *nibandha* writers like Śrīdatta were prepared to allow śūdras to recite Paurāṇika[1479] mantras. But when centuries had elapsed after Buddhism had disappeared from India, orthodox brāhmaṇa writers like Kamalākara[1480] (who wrote his N. S. in 1612 A. D.) showed a stiffer attitude by confining śūdras merely to the listening to Purāṇas read by a brāhmaṇa and by not allowing them even to recite a Paurāṇika mantra. It may be noted that the Narasiṁhapurāṇa in laying down the duties of śūdras provides that they should listen to the reading of purāṇas by a brāhmaṇa

(reader) and should worship Narasiṁha (*avatāra* of Viṣṇu). The relation of Śruti, Smṛti and Purāṇas and their spheres of application are summed up in the Nāradīyapurāṇa as follows:— "The Veda exists in different forms; there is the Veda which has the performance of sacrificial rites (as its sphere); smṛtis are the Veda for the householder's stage; both those are centered in (or supported by) the Purāṇas. Just as this wonderful world sprang from the ancient Being (God), there is no doubt that all this literature arose from the Purāṇas. I hold that the meaning (or purpose) of the Purāṇas is more extensive (or superior to) than the meaning (or purpose) of the Veda. All the Vedas always rest on the Purāṇas; the Veda is afraid of the man of little learning (with the thought that) that man may harm it. The Veda does not deal with the movements of the planets, nor does it contain correct calculations about the proper times (for religious acts), nor does it deal with the *tithivṛddhi* or *tithikṣaya*, nor with the determination of the *parvans* (amāvāsyā, pūrṇimā &c.) or eclipses. Determinations about these were formerly made in Itihāsa and Purāṇas. What is not seen in the Vedas is all noticed in the Smṛtis; what is not seen in both is declared in the Purāṇas. What is declared by the Vedas and what is declared by the auxiliary lores—it is Veda that is declared by Smṛtis and Purāṇas. The person who looks upon Purāṇas in any other light would be born as a lower animal'.[1481] The Nāradīyapurāṇa[1482] further states 'the merit acquired by those wicked men who speak about Purāṇas as *arthavādas* (mere laudatory[1483] or condemnatory statements) are destroyed and

1481. शृणु मोहिनि महाक्यं वेदोयं बहुधा स्थितः। यज्ञकर्मक्रिया वेदः स्मृतिर्वेदो गृहाश्रमे॥ स्मृतिर्वेदः क्रियावेदः पुराणेषु प्रतिष्ठितः। पुराणपुरुषाज्जातं यथेदं जगदद्भुतम्॥ तथेदं वाङ्मयं जातं पुराणेभ्यो न संशयः। वेदार्थादधिकं मन्ये पुराणार्थं धराजने॥ वेदाः प्रतिष्ठिताः सर्वे पुराणेष्वेव सर्वदा। विभेत्यल्पश्रुताद्वेदो मामयं प्रहरिष्यति॥ न वेदे ग्रहसञ्चारो न सृष्टिः कालबोधिनी। तिथिवृद्धिः क्षयो वापि पर्वग्रहविनिर्णयः॥ इतिहासपुराणेषु निश्चयोयं कृतः पुरा। यच्च दृष्टं हि वेदेषु तत्सर्वं लक्ष्यते स्मृतौ॥ उभयोर्यत्र दृष्टं हि तत्पुराणैः प्रणीयते। ...यद्वेदैर्गीयते सम्यगुपाङ्गैर्यत्प्रगीयते॥ पुराणैः स्मृतिभिश्चैव वेद एव निगद्यते। पुराणमन्यथा मत्वा तिर्यग्योनिमवाप्नुयात्॥ नारदीयपुराण II. 24. 15–24. Some of these verses (such as वेदाः प्रतिष्ठिताः ...मामयं चालयिष्यति and यत्र दृष्टं...गीयते) occur in स्कन्द, प्रभासखण्ड, 2. 90–92.

1482. पुराणेष्वर्थवादत्वं ये वदन्ति नराधमाः। तैरर्जितानि पुण्यानि क्षयं यान्ति द्विजोत्तमाः। समस्तकर्मनिर्मूलसाधनानि नराधमाः। पुराणान्यर्थवादेन (पुराणान्यर्थवादेन?) दुष्कृत् नरकमश्नुते॥ नारदीय I. 1. 57–59.

1483. The great अर्थवादाधिकरण is जै. I. 2. 1–18. There are Vedic passages like 'सोऽरोदीद्यदरोदीत्तद्रुद्रस्य रुद्रत्वम्' (तै. सं. I. 5. 1. 1), 'स आत्मनो यथाशुदक्षिणदत्' (तै. सं. II. 1. 1), 'देवा वै देवयजनमभ्यवसाय विष्णो न प्राजानन्' (तै. सं.

(Continued on next page)

the wicked man who regards as *arthavādas* the Purāṇas that are the means of uprooting (the evil effects of) all acts, reaches Hell'.

The Purāṇas introduced several striking changes in the religious rites, practices and ideals of the people. The most characteristic thought and the keynote of the Purāṇas is to declare how great rewards and results could be secured with little effort. The Viṣṇupurāṇa (VI. 2) narrates how sages approached Vyāsa with the question 'in what age does a little *dharma* yield very great rewards'? Vyāsa was bathing in the Ganges; he came out, uttered 'śūdra is good and Kali is good' and then again plunged into the river; then he again came out and said 'well done, O śūdra! you are blessed'; he again plunged into the river, came out and said 'women are good and blessed; who is more blessed than they'. When he finished his bath and performed his morning rites, the sages asked him to explain what he meant by calling Kali, śūdras and women good and blessed. He replied: 'a man secures in a single day and night in Kali age as much reward of *tapas*, celibacy and *japa* as is obtained in ten years in Kṛta age, in one year in Tretā and in a month in Dvāpara; therefore, I spoke of Kali as good; in Kali age a man secures merely by the glorification or incessant repetition of the name of Keśava what he would secure by deep meditation in Kṛta, by sacrifices in Tretā, and by worship in Dvāpara; I am pleased with Kali because a man secures great eminence of dharma with a little effort. Persons of the three higher varṇas have to study the Vedas after observing many strict rules, then they have to perform sacrifices which require wealth; they incur sin if they do not perform their duties properly; they cannot eat and drink as they please, but are dependent on the observance of many rules as to food &c.; dvijas secure higher worlds after great trouble; the śūdra secures his worlds by serving the three varṇas, he has the right to offer the *pākayajñas* (without mantras) and therefore he is more blessed than a dvija. He has not to observe strict rules about proper and disallowed food or drink and therefore he was

(*Continued from last page*)

VI. 1. 5. 1), 'तरति ब्रह्महत्यां योऽश्वमेधेन यजते' (तै. सं. V. 3. 12. 2), 'न पृथिव्यामग्निश्चेतव्यो नान्तरिक्षे न दिवि। तै. सं. V. 2. 7. The question is: are these passages to be taken literally or do they convey any meaning? The reply is: 'विधिना त्वेकवाक्यत्वात् स्तुत्यर्थेन विधीनां स्युः' (जै. I. 2. 7) i. e. they are laudatory and are meant to praise vidhis.

declared 'good' by me. A woman by serving her husband in thought, word, and deed secures with less trouble the same worlds that her husband secures with great effort and trouble and therefore I said a third time about women that they were blessed. The acquistion of *dharma* is secured with small trouble in Kali age by men who wash off all their sins by the water in the form of the qualities of their soul; śūdras do the same by being intent on service to dvijas and women also secure the same without trouble by service to their husbands. Therefore all these three are regarded by me as most blessed.'[1484] The Brahmapurāna chapter 229 verses 62–80 are identical with Viṣṇupurāṇa VI. 2. 15–30 and 34–36. The Viṣṇupurāṇa emphasizes that each one must do one's duty in the society in which one is born or one's duty which one has undertaken, that, if a person does this, he reaches the same higher worlds, whether he be a brāhmana or a śūdra. This doctrine is the same as taught in the Bhagavadgītā[1485] 18. 45 and 46 'a person secures the highest perfection (final emancipation) by being intent on carrying out the duties appropriate to him; man secures perfection (or bliss) by worshipping with the performance of his peculiar duties (not with flowers and the like or by words) Him from whom all beings proceed and by whom all this (world) is enveloped'. Ancient works like the Vedas, Jaimini's sūtras on Mīmāṁsā and the Vedāntasutras did not consider or discuss how women or śūdras were to secure higher spiritual life and final Beatitude. The Vedāntasūtra (I. 3. 34–38) denies to the śūdra the right to study the Veda and the Upaniṣads. Buddha's teaching held out the same promise of liberation from suffering

---

1484. Some of the verses are striking and they are therefore quoted here: ध्यायन्कृते यजन्यज्ञैस्त्रेतायां द्वापरेऽर्चयन्। यदाप्नोति तदाप्नोति कलौ संकीर्त्य केशवम्॥ धर्मोत्कर्षमतीवात्र प्राप्नोति पुरुषः कलौ। अल्पायासेन धर्मज्ञास्तेन तुष्टोस्म्यहं कलेः॥ ···जयन्ति ते निजाँल्लोकान् क्लेशेन महता द्विजाः॥ द्विजशुश्रूषयैवैष पाकयज्ञाधिकारवान्। निजाल्लभति वै लोकान् शूद्रो धन्यतरस्ततः॥ भक्ष्याभक्ष्येषु नास्यास्ति पेयापेयेषु वै यतः। नियमो मुनिशार्दूलास्तेनासौ साधितीरितः। ···योषिच्छुश्रूषणाद्भर्तुः कर्मणा मनसा गिरा। तद्धिता शुभमाप्नोति तत्सालोक्यं यतो द्विजाः॥ नातिक्लेशेन महता तानेव पुरुषो यथा। तृतीयं श्रूयतां तेन मया साध्विति योषितः॥ ···स्वल्पेन हि प्रयत्नेन धर्मः सिध्यति वै कलौ। नरैरात्मगुणाम्भोभिः क्षालिताखिलकिल्बिषैः॥ शूद्रैश्च द्विजशुश्रूषा तत्परैर्द्विजसत्तमाः। तथा स्त्रीभिरनायासात् पतिशुश्रूषयैव हि। ततश्चितयमप्येतन्मम धन्यतरं मतम्। धर्मशम्पादने क्लेशो द्विजातीनां कृताविव॥ विष्णुपु॰ VI. 2. 17–18, 22–24, 28–28, 34–36. The कल्पतरु (गृहस्थकाण्ड pp. 272–273) quotes from विष्णु VI. 3. 22–24 पारतन्त्र्य···रितः (तम् v. l.). The editor of कल्पतरु was unable to trace these.

1485. स्वे स्वे कर्मण्यभिरतः संसिद्धिं लभते नरः। ···यतः प्रवृत्तिर्भूतानां येन सर्वमिदं ततम्। स्वकर्मणा तमभ्यर्च्य सिद्धिं विन्दति मानवः॥ भगवद्गीता 18. 45–46.

to all men irrespective of class or caste and was therefore most attractive to śūdras. The Bhagavadgītā and the Purāṇas changed the whole outlook of Indian society, high or low, and promised the same higher spiritual life or worlds to all who did their work under a sense of social duty, did not hanker after mundane rewards and brought all their actions, in whatever avocation they might be engaged, as an offering to God. In the Padmapurāṇa[1486] Vyāsa is made to say to Yudhiṣṭhira: "It is not possible to observe in the Kali age the rules of Dharma laid down by Manu and by the Vedas; the one thing which one should do is to observe a fast on Ekādaśī in both fortnights (of a month), which is an easy means (that) requires little wealth, that entails little trouble, but yields great rewards, that is the very essence (of the teachings) of all Purāṇas; he should be pure and on Dvādaśī after worshipping Keśava with flowers he should first feed brāhmaṇas and then himself take his meal; those who desire to secure heaven should perform this vrata throughout their lives; even persons of evil conduct, the greatest sinners devoid of dharma, do not go to Yama (do not fall into hell) if they fast on Ekādaśī." The Sūtasaṁhitā states 'effort for acquiring true knowledge (of the Self) is meant for all (for persons even lower than śūdras), that effort made by explaining in a different language (than Sanskrit) and by the lapse of enough time will tend to the good (of the lowest)'. This clearly shows how the Purāṇas put before all people easy ways whereby they could attain bliss in the Hereafter.

The Baud.[1487] Dh. S., Manu and Vasiṣṭha emphasize that one should not invite a large company of brāhmaṇas at a śrāddha, because a large company destroys these five (advantages) viz. showing proper respect to invitees, propriety of place and time, cleanliness and the securing of worthy brāhmaṇas and

1486. व्यास उवाच। श्रुता ये मानवा धर्मा वैदिकाश्च श्रुतास्त्वया। कलौ युगे न शक्यन्ते ते वै कर्तुं नराधिप॥ सुखोपायमल्पधनमल्पक्लेशं महाफलम्। पुराणानां च सर्वेषां सारभूतं महामते॥ एकादश्यां न भुञ्जीत पक्षयोरुभयोरपि। द्वादश्यां तु शुचिर्भूत्वा पुष्पैः संपूज्य केशवम्॥ भुञ्जीत कृतकृत्यस्तु पश्चाद्विप्रपुरःसरम्। ...यावज्जीवं व्रतमिदं कर्तव्यं पुरुषर्षभ। स्वर्गार्ति प्राप्तुमिच्छद्भिरन्न मे नास्ति संशयः॥ अपि पापकृताचाराः पापिष्ठा धर्मवर्जिताः। एकादश्यां न भुञ्जन्ति न ते यान्ति यमान्तिकम्॥ पद्म VI. 53. 4-9. These verses are quoted as from महाभारत by हे. on व्रत vol. I. p. 1089. Vide p 44 note 108 above for some of these verses; अन्येषामपि सर्वेषां ज्ञानाभ्यासो विधीयते। भाषान्तरेण कालेन तेषां सोप्युपकारकः॥ सूतसंहिता I. 7. 22.

1487. सत्क्रियां देशकालौ च शौचं ब्राह्मणसम्पदः। पञ्चैतान् विस्तरो हन्ति तस्माज्जह्येत विस्तरम्॥ मनु III. 26, कूर्मपुराण II. 22. 27, बौ. ध. सू. II. 4. 30, वसिष्ठ XI. 28 (the last two read the 4th pāda as 'तस्मात्तं परिवर्जयेत्').

It was further provided by the Anuśāsana-parva[1488] and others that one should not go deep into examining the learning, family and character of brāhmaṇas in a rite for the gods, but in rites for the Manes close examination as to these matters is proper (or justified). The Purānas went against both these prescriptions. They are not tired of recommending again and again profuse expense in śrāddhas and condemning stinginess (lit. roguishness in spending money) in śrāddhas and also in such other matters as the observances of Ekādaśī. For example, the Viṣṇupurāna[1489] quotes nine verses (III. 14. 22–30) as uttered by the pitṛs, two of which may be translated here 'Would that a wise and blessed person be born in our family who not indulging in stinginess in spending wealth will offer pindas to us and who would donate to brāhmanas for our sake jewels, clothes, a large conveyance, wealth and all enjoyments if he has riches'! Padma[1490] recommends that avoiding stinginess brings pleasure to the *pitṛs*. The Matsya (56. 11) prescribes that one should not show stinginess in the Kṛsnāstamīvrata. The Padma says that that bad man who being possessed of wealth celebrates the *jāgara* on Ekādaśī in a close-fisted way loses his soul. The Brahmapurāna[1491] says in a general way that whoever does a religious act with stinginess is a sinner.

Manu (III. 149) provides that 'in rites in honour of gods one who knows dharma should not critically examine the brāhmanas to be invited for dinner, but in a rite for ancestors one should carefully investigate (the fitness of) brāhmanas'. This does not mean that in rites for gods any one may be invited. We have to observe the general rule of Manu (III. 128) that donors should give only to a man who has studied the Veda

1488. ब्राह्मणान्न परीक्षेत क्षत्रियो दानधर्मवित् । दैवे कर्मणि पित्र्ये तु न्याय्यमाहुः परीक्षणम् ॥ अनुशासन 90. 2; q. by हे. on श्राद्ध p 511; दैवे कर्मणि ब्राह्मणं न परीक्षेत । प्रयत्नात्पित्र्ये परीक्षेत । विष्णुधर्मसू. 82. 1–2; न ब्राह्मणान् परीक्षेत सदा देये तु मानवः । दैवे कर्मणि पित्र्ये च श्रूयते वै परीक्षणम् । वायु 83. 51.

1489. अपि धन्यः कुले जायादस्माकं मतिमाक्षरः । अकुर्वन् वित्तशाठ्यं यः पिण्डान्नो निर्वपिष्यति ॥ रत्नं वस्त्रं महायानं सर्वभोगादिकं वसु । विभवे सति विप्रेभ्यो योऽस्मानुद्दिश्य दास्यति ॥ विष्णु. III. 14. 22–23, वराह 13. 50–51 (reads सर्वं तोयादिकं वसु). All the following seven verses are the same in both पुराणs. Verses III. 14. 24–30 are q. by श्रा. क्रि. कौ. pp. 253–254 and are also explained.

1490. वित्तशाठ्येन रहितः पितृभ्यः प्रीतिमाहरत् । पद्म I. 9. 181; धनवान् वित्तशाठ्येन यः करोति प्रजागरम् । तेनात्मा हारितो नूनं कितवेन दुरात्मना ॥ पद्म VI. 39. 21.

1491. वित्तशाठ्येन यो धर्मं करोति स तु पातकी । ब्रह्म 123. 174.

dinner in rites for gods or pitṛs. So what Manu III. 149 means is that deep investigation of ancestry &c. is not necessary in rites for gods.

It is provided by the Vāyu[1492] that there is to be no examination of the qualities and character of the brāhmaṇas at Gayā and the Varāhapurāṇa provides that all brāhmanas of Mathurā are like gods and that a brāhmana of Mathurā not knowing even a *ṛk* verse is superior to a brāhmaṇa of another place that has studied the four Vedas. Vide H. of Dh. vol. IV. pp. 579, 670 for details of Gayā and Mathurā brāhmanas. The Padmapurāṇa and the Skanda (Kāśīkhaṇḍa 6. 56-57) recommend that at tīrthas (sacred places) one should not engage in investigation (of the worth) of brāhmaṇas, and that Manu declares that brāhmaṇas appearing (at a tīrtha) and desiring food should be fed.[1493]

It is not unlikely that the above passages from the Vāyu, Varāha and Padma are later interpolations. When Buddhism was flourishing large companies of Buddhist monks were fed by the people. When Buddhism declined and disappeared from India after the 12th or 13th century A. D. people came to believe that there was great merit in feeding poor brāhmaṇas just as in former times people fed monks and the Purāṇas might have only echoed and emphasized the general sentiments of the people. If the people in general had not come to believe in this, the author feels that no amount of interpolations or insistence by the so-called crafty brāhmaṇas would have been effective. Writers, Western or Indian, that, relying on the notions current in the 19th and 20th centuries, pass severe and unmeasured strictures on the provisions for brāhmaṇas in the Purāṇas do great injustice to the authors of Purāṇas that flourished about a thousand years ago or more. Such writers should compare Indian medieval conditions, ideas and doings of brāhmaṇas with the claims of the Popes, Christian priests, Inquisitions and the state of monastic Orders in Europe from about the 10th century A. D. to the 15th century. In comparison it would be

1492. न विचार्यं कुलं शीलं विद्यां च तप एव च । पूजितैस्तैस्तु राजेन्द्र तृप्तिं प्राप्नोति मानवः ॥ वायु 82. 27; अनृचै माथुरो यत्र चतुर्वेदस्तथापरः । वेदैश्चतुर्भिर्न च स्यान्माथुरेण समः क्वचित् ॥ ...मथुरायां ये वसन्ति विष्णुरूपा हि ते नराः ॥ वराह 165. 55 and 57.

1493. तीर्थेषु ब्राह्मणं नैव परीक्षेत कथंचन । अज्ञातिनमनुप्राप्तं भोज्यं तं मनुरब्रवीत् ॥ पद्म V. 29. 212. The first half is q. by श्रा. क्रि. कौ. from ब्रह्मपुराण on p. 14 and from देवीपुराण on p. 266.

found that the conditions in Europe were terribly worse than in India in those centuries.[1494]

As a consequence of the abovementioned dominating principle the Purāṇas strongly recommend *dāna* (gifts, particularly of food), pilgrimages and baths in sacred waters, vratas, ahiṁsā, bhakti, repetition of the name of god, śrāddhas &c. These will be briefly illustrated below.

The Purāṇas institute a comparison between solemn Vedic sacrifices on the one hand and pilgrimages and baths at sacred places on the other. The Vanaparva[1495] contrasts the two as follows, "the solemn sacrifices promulgated by the sages cannot be accomplished by a poor man; sacrifices require many implements and a collection of various materials, which are secured by kings or sometimes by rich men, but not by poor men who have to rely on themselves alone, who have no helpers and who do not possess means. Going to holy places confers merit and surpasses sacrifices. One does not secure that reward by such sacrifices as Agniṣṭoma, in which profuse fees are distributed, which is secured by repairing to sacred places." Vide H. of Dh. vol. IV pp. 561–564 for further encomiums of sacred places and the virtues to be cultivated for reaping the full merit of pilgrimages.

In pursuance of the same dominant principle the Anuśāsana-parva and Purāṇas extol fasts and vratas. The Anuśāsana-

1494. For the barbarities and abominations in every European country of the Inquisition, particularly in Spain, one may read W. H. Rule's 'History of the Inquisition' (1868), particulary pp. 298–314 on 'Inquisition in Goa' and Rafael Sabatini's work on 'Torquemeda and the Spanish Inquisition' (8th ed. in 1937), 'the Spanish Inquisition' by Prof. A. S. Turberville (Home University Library, 1932), who is constrained to say on p. 235 that at the best the Holy Office in Spain has a terrible record of destruction; Cambridge Medieval History vol. VI, chap. XX on 'Heresies and the Inquisition in the Middle Ages' (1929) pp. 699–726; Cambridge Medieval History vol. VI, pp. 694–695 where it is shown that 'Indulgences' (granting forgiveness of sins and a certificate of entry in Paradise) were freely put on sale by the highest ministers of the Christian Church in the hands of licensed traders without the necessity of any confession and penitence and that they became a formidable bar to the proper working of the penitential system of the Church.

1495. तीर्थाभिगमनं पुण्यं यज्ञैरपि विशिष्यते। वनपर्व 82. 17; vide H. of Dh. vol. IV p. 561 n 1263 for the whole passage.

parva[1496] (107. 5-6) remarks that fasts are equal to sacrifices in the matter of rewards. They are put forward as superior to sacrifices in Padma.[1497] It says: Viṣṇuvrata is super-eminent; a hundred Vedic sacrifices are not equal to it; by performing a sacrifice one may go to heaven, but one who observes the Kārtikavrata goes to Vaikuṇṭha (the world of Viṣṇu). For the exaggerated importance attached to fasts and vratas, vide pp. 43-45 above.

First *dāna*. High eulogies of gifts have been sung from the Ṛgveda downwards. The subject of dāna (gifts) in all its aspects has been dealt with in the H. of Dh. vol. II. pp. 837-888. The Mahābhārata in numerous places (particularly in the whole of Anuśāsana-parva) and the Purāṇas such as Matsya chap. 82-92 and 274-289, Agni chap. 208-213, Varāha 99-111, Padma V. 21. 81-213 (which agree almost verbatim with Matsya 83-92), Padma II. 39-40 and 94, III. 24, Kūrma II. 26 devote a great deal of space to the subject of *dānas*. But here only two topics in relation to gifts will be dealt with, viz. gifts of food and gifts to brāhmaṇas. The Ṛgveda condemns the person as merely a sinful one who does not offer food to the gods nor to his friends and uses it only to fill his own belly.[1498] The Ait. Br. and the Tai.[1499] Br. speak of 'food' as 'prāṇa' (life). The Baud.[1500] Dh. S. states "all beings depend on food, the Veda says 'food is life,' therefore food should be given (to others), food is the highest offering". Manu[1501] and Viṣṇu Dh. S. state 'the man who cooks food only for his own sake (and not for offering to gods and men) eats merely sin'. The Bhagavadgītā carries the same message 'those who eat food left after offering in sacrifice are freed from all sins, but those who cook food for their sake alone eat sin'. The Padma has a fine passage 'those who always feed the cripple, the blind, children, old men, persons that are dis-

1500. अन्ने श्रितानि भूतानि अन्नं प्राणमिति श्रुतिः। तस्मादन्नं प्रदातव्यमन्नं हि परमं हविः॥ बौ. ध. सू. II. 3. 68.

1501. अघं स केवलं भुंक्ते यः पचत्यात्मकारणात्। मनु. III. 118, विष्णुधर्मसूत्र 67.43,

eased, helpless and pinched by penury, always enjoy bliss in heaven; there is no end to the merit (accumulated) by constructing wells and tanks, where aquatic animals and others moving on land drink water when they desire, for water is the life of living beings and life is centred in water'. The distribution of food particularly to learned brāhmaṇas is highly praised in Brahma-purāṇa[1502] 218. 10–32, Padma V. 19. 289–307m, Agni 211. 44–46. 'The gift of food is superior to all gifts; food is the life of men, from food spring all beings; the worlds are dependent on food, therefore food is praised; man secures heaven by the gift of food; a person who joyfully gives food acquired by just means to brāhmaṇas deeply learned in the Veda is released from all sins' says Brahma. The Agnipurāṇa says 'The gifts of elephants, horses, chariots, male and female slaves and houses do not come up even to a sixteenth part of the gift of food (in merit); a person who committing a great sin afterwards distributes food becomes free from all sins and secures everlasting worlds' (211. 44-46). The Kūrma[1503] prescribes 'a man should give to a brahmacārin (Vedic student) food every day (i. e. when he comes begging); thereby he becomes free from all sins and reaches the abode of Brahmā'. Similarly, Padma calls upon house-holders to give as much cooked food to ascetics as would fill the begging bowl. From very ancient times a householder was called upon to perform five *Yajñas* (sacrifices) daily, two of which were *Baliharaṇa* and honouring a guest (Manu III. 70) and he was to place food on the ground for persons who had lost caste, who suffered from loathsome diseases, to cāṇḍālas, dogs, crows and even insects[1504] (Āp. Dh. S. II. 4. 9. 5, Manu III. 92). Vide H. of Dh. vol. II. pp. 745–747 on Vaiśvadeva and Baliharaṇa. Underlying these provisions was the noble sentiment of universal kindliness and charity, the persistent idea that, in spite of social gradations, rules and prejudices dividing

men from each other, one Supreme Light pervades and illuminates the meanest of creatures and makes the whole world kin. This spirit of a householder to regard it as his duty to offer food to all needy persons and particularly to poor and deserving students and brāhmaṇas has prevailed almost to the present day, though during the last few years shortage of food, high prices and rationing have undermined it a great deal.

Then as to gifts to brāhmaṇas. In the first place, it must be remembered that all brāhmaṇas were not priests and are not priests in modern times. Similarly, all priests in all Indian temples and shrines are not brāhmaṇas. Temple priests are comparatively a later institution and in olden times they were looked down upon and are regarded as inferior brāhmaṇas even in modern times. Manu (III. 152) states that a *devalaka* (a brāhmaṇa who performed for remuneration service before the image in a temple) was unfit to be invited at a śrāddha or to officiate in a sacrifice to gods, if he continuously served for three years in that capacity. The ideal set before brāhmaṇas from very ancient times was of poverty, of plain living and high thinking, of abandoning the active pursuit of riches, of devotion to the study of the Veda and śāstras, of cherishing a high culture and of handing down literature and cultural outlook. Smṛtis like Yāj. I. 213 recommend that even if a brāhmaṇa be fit for receiving a religious gift he should refuse gifts and thereby he secures the same worlds that habitual donors secure. It was for preserving such high ideals among brāhmaṇas that Yāj. I. 333 prescribes that a king should make gifts of cows, gold and land and should bestow on learned brāhmaṇas houses and requisites for marriage (maidens, expenses of marriages &c.). Vide H. of Dh. vol. II. pp. 856–858 where references are given to inscriptions containing donations to brāhmaṇas of houses and marriage expenses. In these days every body talks of the high culture and literary traditions of ancient India. But who cultivated the vast Vedic and other Sanskrit literature, preserved it and propagated it for several millenia? The answer would have to be that it was mostly due to some of the brāhmaṇas who stuck to the ancient ideal for thousands of years. If the Ṛgveda can be put forward in these days as the most ancient of the literary monuments in any Aryan language, who preserved its more than ten thousand verses with unparallelled care by oral transmission without hardly any variant readings. The reply will again have to be that the brāhmaṇas did it by a

self-denying ordinance. The Brāhmaṇas had to study the Veda with auxiliary lores without[1505] an eye to any ulterior motive, but simply as a duty and to understand the meaning thereof, they were to teach the Veda and other lores without demanding beforehand a fee, they had to bring up their own families, perform sacrifices and make gifts themselves. The only substantial sources of income were officiating at sacrifices and religious rites and receiving gifts. These sources must always have been variable, fitful and precarious. The brāhmaṇas had no power to tax people as in the case of tithes in the West. Nor had they a regularly paid hierarchy of deacons, priests, bishops and archbishops as in the Anglican Church Therefore, the brāhmaṇas are advised to approach the king or a rich person for their livelihood (vide Gautama IX. 63 'Yogakṣemārtham-Īśvaram adhigaccet). It should be noted that before Buddhism spread far and wide the sūtras and smṛtis emphasized that religious gifts should be made only to a worthy brāhmaṇa, learned and well-conducted. For example, Āpastamba[1506] prescribes 'one should invite for dinner in all religious acts brāhmaṇas that are pure, that have studied the Veda and that one should distribute gifts at a proper time and place, on occasions of purificatory rites and when there is a worthy recipient.' To the same effect are Vas. Dh. S. III. 8, VI. 30, Manu (III. 128, 132, IV. 31), Yāj. (I. 201), Daksa (III. 26 and 31). Not every brāhmaṇa was in those ancient times a proper recipient for a gift, but he had to possess qualities of what is called '*pātra*'. A few definitions of pātra may with advantage be cited here. The Anuśāsana-parva[1507] has a long passage emphasizing the qualities of a deserving brāhmaṇa: 'gifts made to good brāhmaṇas that are free from anger, that are intent on dharma, are devoted to truth and self-

---

1505. ब्राह्मणेन निष्कारणो धर्मः षडङ्गो वेदोऽध्येयो ज्ञेयश्चेति। महाभाष्य (Kielhorn, vol. I. p. 1) quotes it as आगम. Vide H. of Dh. vol. II pp. 105–110 on the duties of brāhmaṇas and their sources of income in ancient times.

1506. शुचीन् मन्त्रवतः सर्वकृत्येषु भोजयेत्। देशतः कालतः शौचतः सम्यक् प्रति गृहीतृत इति दानानि प्रतिपादयति। आप. ध. सू. II. 6 15. 9–10 Compare मनु III. 98.

1507. Some of the verses of अनुशासन 22 33–41 may be cited here: अक्रोधना धर्मपराः सत्यनित्या दमे रताः। तादृशाः साधवो विप्रास्तेभ्यो दत्तं महाफलम्। साङ्गांश्च चतुरो वेदानधीते यो द्विजर्षभः। षड्भ्यः प्रवृत्तः कर्मभ्यस्तं पात्रसुषयो विदुः॥ प्रज्ञाश्रुताभ्यां वृत्तेन शीलेन च समन्वितः। तारयेत कुलं सर्वमेकोऽपीह द्विजोत्तमः। ...निशम्य च गुणोपेतं ब्राह्मणं साधुसंमतम्। दूरादानाय्य सत्कृत्य सर्वतश्चापि पूजयेत्॥ verses 33, 36, 38, 41; on षड्भ्यः प्रवृत्तः the com. of नीलकण्ठ is 'अनुपद्रोकैः मधुमांसवर्जनमद्यविषापालनशौचैः सह अध्ययनयागदानेभ्यः, तान्यनुष्ठातुं प्रवृत्त इत्यर्थः।'

control yield great rewards; the sages regard that brāhmaṇa as *pātra* who studies the four Vedas with their *aṅgas* (auxiliary lores like phonetics, grammar &c.), who is active in doing six acts (viz. abstaining from wine and meat, observing the bounds of morality, purity, study of the Veda, sacrifices, making gifts). Even a single eminent brāhmaṇa endowed with intellect, Vedic learning, good conduct and character saves the whole family; one should bring from afar a brāhmaṇa on hearing that he is possessed of good qualities and is approved by good men and should welcome him and honour him in all ways'. Yāj. furnishes[1508] a brief but striking definition of a worthy brāhmaṇa 'not by Vedic learning alone nor by *tapas* (austere life) alone worthiness arises; that person is declared to be *pātra* (worthy recipient for a religious gift) where both these (i. e. Vedic learning and tapas) and good conduct exist'. Manu provides that religious gifts given to a brāhmaṇa who has not studied the Veda or who is avaricious or deceitful are fruitless and lead the donor to hell (IV. 192–194). The Bhagavadgītā also (17.22) condemns a gift given to an unworthy person as *tāmasa* (affected by *tamas*, arising from ignorance or delusion).

As Buddhism grew in popularity and secured also royal support, the brāhmaṇas had to tackle several tasks. They had to keep the number of brāhmaṇas at a high level, they had to find maintenance for those devoted to the deep study of the Veda and they had to make accommodation with prevalent Buddhist thoughts by assimilating as many of them as possible in their own writings. Every brāhmaṇa could not possess the memory, the intelligence and the persistent endeavour for long years required for memorizing and mastering even his own Veda and its subsidiary Literature. If one hundred brāhmaṇa families were patronized, hardly ten percent of them could have been masters of their own Veda, but there was always the possibility that those who were not themselves good Vedic scholars might have sons, some of whom might turn out to be profound students of the Veda. Therefore, the number of brāhmaṇas was to be increased and they had to be fed and not to be allowed to fritter away energy and time in working for their bread. It is mainly due to these factors that some of the Purāṇas contain incessant and frantic appeals for gifts to brāhmaṇas.

1508. न विद्यया केवलया तपसा वापि पात्रता । यत्र वृत्तमिमे चोभे तद्धि पात्रं प्रकीर्तितम् ॥ याज्ञ. I. 200.

At the time when most of the Purāṇas were composed, the brāhmaṇas were hemmed in by great difficulties and hostile forces. From about the 3rd century B. C. to the 7th century A. D. Buddhism enjoyed royal patronage under such great kings as Aśoka, Kaniṣka and Harṣa. Buddhism was not really a revolt against caste, but against the sacrificial system, against the Veda and its authority to show the way to salvation. Buddha did not found a new religion, but he was a great reformer of Hinduism. He laid sole stress on moral effort, ahiṁsā, satya &c. which had already been integrated into Hinduism and were part of it and which continue to this day to be part of Hinduism. Buddha in his first sermon in the deer-park near Banaras preached that one who renounced the world should shun two extremes[1509] viz. the pursuit of pleasures and the practice of useless austerities, that it is the course discovered by him that led to wisdom and *nirvāṇa*. He expounded the four noble Axioms or Truths (Āryasatyāni) viz. suffering (duḥkha), the cause of suffering[1510] viz. *taṇhā* i. e. tṛṣṇā (duḥkha-samudaya), the suppression of suffering (duḥkha-nirodha), and the way that leads to the suppression of suffering (duḥkha-nirodhagāminī paṭipadā). This last is the Noble Eight-fold path (aṣṭāṅgiko[1510a]

1509. For the two extremes to be shunned, vide Dhammacakka-ppavattana-sutta (inauguration of the kingdom of Righteousness) S. B. E. vol. XI. p. 146.

1510. It may be noted that in the Upaniṣads and महाभारत the giving up of तृष्णा or काम is emphasized. Vide यदा सर्वे प्रमुच्यन्ते कामा येऽस्य हृदि स्थिताः। अथ मर्त्यो अमृतो भवत्यत्र ब्रह्म समश्नुते॥ कठोप० VI. 14; या दुस्त्यजा दुर्मतिभिर्या न जीर्यति जीर्यतः। यैषा प्राणान्तिको रोगस्तां तृष्णां त्यजतः सुखम्॥ वनपर्व 2. 36, अनुशासन 7. 21, ब्रह्माण्ड III. 68. 100; यच्च कामसुखं लोके यच्च दिव्यं महत्सुखम्। तृष्णाक्षयसुखस्यैते नार्हतिषोडशीम्। शान्ति. 174. 46, वायु 93. 101, ब्रह्माण्ड III. 68. 103.

1510 a. Vide Dhammacakka-ppavattana-sutta in S. B. E. vol. XI. p. 147 for the eightfold path. The Pāli words are: सम्मा-दिट्ठि, सम्मा-संकप्पो, सम्मा वाचा, सम्मा कम्मन्तो, सम्मा आजीवो, सम्मा-वायामो, सम्मा-सति (सम्यक् स्मृति) सम्मा-समाधि. Vide also दीघनिकाय (Pali Text Society) vol. I. p. 157, महावग्ग (Oldenberg) vol. I. p. 10 (I. 6. 18) and धम्म-चक्क-प्पवत्तनसुत्त para 4 p. 3 (ed. by Sister Vajirā, Sarnath) and for दुःख, दुःखसमुदय, दुःखनिरोध, दुःखनिरोधगामिनी पटिपदा, vide महावग्ग (I. 6.19–22), *ibid* p. 10. These four are called आर्यसत्यानि which may mean 'the four Noble Truths' or 'the four Truths found by the Ārya' (Buddha). This bears a very close resemblance to the fourfold axioms in Yoga and Medicine set out in योगसूत्रभाष्य 'यथा चिकित्साशास्त्रं चतुर्व्यूहम्-रोगो रोगहेतुरारोग्यं भैषज्यमिति, एवमिदमपि शास्त्रं चतुर्व्यूहमेव तद्यथा-संसारः संसारहेतुः, मोक्षः, मोक्षोपायः-इति। तत्र दुःखबहुलः संसारो हेयः। प्रधानपुरुषयोः संयोगो हेयहेतुः। संयोगस्यात्यन्तिकी निवृत्तिर्हानम्। हानोपायः सम्यग्दर्शनम्। योगभाष्य on योगसूत्र II. 15.

mārgaḥ) viz. right views, right thoughts or aspirations, right speech, right actions, right living, right exertion, right recollection (or mindfulness), right meditation (i. e. briefly leading a virtuous life). These doctrines preached to all by the noble Buddha and his disciples were attractive as remarked by Rhys Davids,[1511] particularly to the śūdras whose social position was low in the Vedic times and also in the days of the smṛtis. No one could study the Veda in the presence of a śūdra, a śūdra could not perform sacrifices and had to serve the three higher varṇas in very ancient times. Almost the same position was assigned to him by Manu (VIII. 413) viz. that he was created by God for serving the brāhmaṇa, though it is doubtful whether this could be or was enforced. Vide H. of Dh. vol. II. pp. 33–36 and pp. 154–164 for the position and disabilities of śūdras from the Vedic times up to the days of the Smṛtis. It should not, however, be supposed that all India had become Buddhist. Millions still remained Hindus. There was the danger and fear that with royal patronage and the attractive features of Buddha's teachings large masses might forsake their ancient faith.

The brāhmaṇas of the times when Buddhism was at its peak had to strive to keep the banner of the Vedic religion flying, to deprive Buddhism of its hold on the masses of the people and even on the intelligentsia and to make them stick to the old fold. Buddhism itself had changed a great deal in its ideals, doctrines sometime before the beginning of the Christian era and for centuries thereafter. Buddha's original doctrines were aimed at individual effort and salvation of the individual by his own effort and self-culture. Early Buddhist texts deny the existence of anything like a soul[1512] and find no place for

---

1511. Vide his eloquent Intro. to S. B. E. vol. XI. p. 142 'Never in the history of the world had a scheme of salvation been put forth so simple in its nature, so free from any superhuman agency, so independent of, so even antagonistic to the belief in a soul, the belief in God, the hope for a future life. Buddha put forth deliberately the doctrine of a salvation to be found here in this life in an inward change of heart to be brought about by perseverance in a mere system of self-culture and of self-control. That system is called the Noble Eight-fold Path.'

1512. Vide 'Questions of Milinda' (II, 3. 6) in S. B. E. vol. XXXV pp. 88–89 for a discussion of the doctrine that there is no soul and pp. 520, 71–77 for the Buddhist theory of *kamma* (karma) and for the theory that what is reborn is *nāma-rūpa* (name and form) and not the soul. The Saundarānanda (B. I. ed. 16. 28–29) says: 'दीपो यथा निर्वृतिमभ्युपेतो नैवावनिं गच्छति नान्तरिक्षम्। दिशं न कांचिद्विदिशं न कांचित् स्नेहक्षयात्केवलमेति शान्तिम्॥ एवं कृती निर्वृतिमभ्युपेतो नैव ... कांचित् क्लेशक्षयात्केवलमेति शान्तिम्॥'.

the idea of God. Though Buddha spoke of *Nirvāṇa* he did not clearly define it nor does he specify the condition of the individual when he enters nirvāṇa. Aśvaghoṣa compares nirvāṇa to the extinction of a flame (Saundarananda, chap. XVI. 28–29). Because the doctrine of karma was deeply rooted in the popular mind at the time of Buddha, Buddhism took over that doctrine, which, to men who are not Buddhists, appears to be contradictory of the denial of the existence of a soul. The word 'Dhamma' is used in three senses in the Pāli 'Dhammapada' (which being mentioned in the questions of Milinda is earlier than the 2nd century B. C.) viz. (1) the truth or law preached by Buddha, (2) thing or form, (3) way or mode of life.

As stated above, the original Buddhism preached by the Buddha and his followers in the first century or two after his *parinirvāṇa* was more or less a strict ethical code for individuals who sought salvation from the misery of the world. The three central conceptions of very early Buddhism were the three refuges (or *ratnas*) Buddha, Dharma and Saṅgha, the Four Noble Truths and the Eightfold Path. Gradually a new doctrine was evolved.[1513] It came to be thought that to care for one's own deliverance and spend all efforts thereon was rather selfish, that as the Buddha himself out of compassion for suffering humanity worked for forty-five years to lead men to salvation by his exhortations and sermons, so a Buddhist should prefer to put off his own deliverance, should work for the deliverance of his fellowmen out of compassion (*karuṇā*) for their miserable lot and in doing so should be ready to be born again and again, should not care for his own salvation and should not be afraid of *saṁsāra*. Those holding these latter views deified Buddha, taught that Buddhahood was attained by Siddhārtha after undergoing numerous births in doing service and rendering help to others and that this was a superior code of conduct (Mahāyāna, the Great Vehicle or Way) to the selfish code of salvation for an individual himself (which came to be called Hīnayāna, the lesser Vehicle or Way). This extra-regarding gospel of Mahāyāna was very attractive and won great support in most countries of Asia.[1514]

1513. H. Kern in his 'Manual of Buddhism' (in the Grundriss p. 122 holds that Mahāyānism is much indebted to the Bhagavad-gītā. Compare 'लभन्ते ब्रह्मनिर्वाणमृषयः…सर्वभूतहिते रताः ॥' V. 25 with the Mahāyāna view.

1514. The number of Books on Buddhism is legion. For Mahāyāna Buddhism, vide 'An Introduction to Mahāyāna Buddhism' by W. M. McGovern (London, 1922); 'Aspects of Mahāyāna Buddhism' by Dr. M. N.

(*Continued on next page*)

This doctrine of Bodhisattvas (meaning 'beings destined to be enlightened') is not consistent with the gospel of Buddha as preached by him in his first sermon at Banaras. There is a difference of ideals between Hīnayāna and Mahāyāna. The original gospel relies on self-effort and moral regeneration and on the elimination of suffering and misery by the extinction of all passions and of hankerings or desires and of the desire of

(Continued from last page)

Dutt (1930); the 'Bodhisattva doctrine in Sanskrit Literature' by Dr. Har Dayal (Kegan Paul, London 1932); 'The path of the Buddha' ed. by Prof. Kenneth W. Morgan (New York, 1956) written by several scholars from different countries (for both Hīnayāna and Mahāyāna).

A few books for those who want to know more of Buddhism in general and of Hīnayāna and Mahāyāna are recommended here. 'The central conception of Buddhism' (London, 1923), 'the conception of Nirvāṇa' (Leningrad, 1927), 'Buddhist Logic' vol. I (1958), all by Th. Stcherbatsky; 'Vedantic Buddhism of the Buddha' by J. G. Jennings (Oxford Un. Press, 1948); 'Creed of Buddha' by Edmond Homes (5th ed.); 'Introduction to Tantrik Buddhism' by Dr. Shashi Bhushan Das-Gupta (Cal. University, 1950), 'the Flame and the Light' by Hugh I. Faussett (London and New York, 1958); 'the Buddha and his Dhamma' by Dr. B. R. Ambedkar (1957) in which he refrains from considering Buddhist Texts except those in Pali; 'Comparative study of Buddhism and Christianity' by Prof. F. Masutani (Tokyo, 1957). The Mahāyāna-sūtrālaṅkāra of Asaṅga (ed. by Prof. S. Levi) summarises in two verses (I. 9–10) the points (five) on which the two schools are in conflict. It-sing's 'Records of the Buddhist religion' translated by Dr. J. Takakusu (Oxford, 1896) surprisingly enough states (p. 15) 'These two systems are perfectly in accord with the noble doctrine. Both equally conform to truth and lead us to Nirvāṇa'. Buddha at least ignored (if he did not positively deny) God, he denied the individual soul and Eternity, he did not emphasize the most vital Upaniṣad teaching viz. 'anando brahmeti vyajānāt'. He imagined salvation as a state of absolute quiescence and therefore regarded ordinary life as misery and asserted that salvation may be attained even in this very life. He did not claim to be God, but a human being. There are various kinds of Mahāyāna doctrines and great diversity of definitions. It may generally be said that works professing to teach Mahāyāna practically forsake the ideal of a human Buddha, preach the worship of Buddha and future Buddhas, and assert that Nirvāṇa cannot be attained by the ancient method, that salvation cannot come in this very life but after centuries and aeons of the practice of virtue and helping others.

Mantrayāna and Vajrayāna are said by some to be branches of Mahāyāna, about the latter of which a good deal will be said in the next section. According to Bhikṣu Rāhula Sāṅkṛtyāyana, Vajrayāna (700–1200 A.D.) is a synonym of Mahāyāna (400–700 A. D.) and merely the ulterior development of it (vide p. 211 of the paper 'L' Origine du Vajrayāna et Les 84 Siddhas' in J. A. vol. 225 (1934) pp. 209–230.

life[1515] itself. Buddha's original teaching regarded it as a waste of time to ponder over such questions as 'Have I existed during the ages that are past or have I not? Shall I exist during the ages of the future? Do I after all exist or am I not?' The Sabbāsavasutta (9–13) says that a wise man walking in the noble eightfold path understands what things ought to be considered and what things ought not to be considered. Vide S.B.E. vol. XI. pp. 298–300. Buddhism brought half of Asia under its influence not only by its promise of salvation to all by self-help, but more so by its teachings of profound tenderness, of active charity, of goodness and gentleness. Mahāyāna laid great stress on doing good to all and on bhakti. Both the original teaching of Hīnayāna and the Mahāyāna teaching are attractive in their own way.

Buddhism insisted on the five *śīlas*[1516] that were binding on all Buddhists viz. prohibition of injury to and destruction of life, of theft, of sexual impurity, of lying and of intoxicating liquors. Five more precepts (which together with the preceding five were called Daśaśikṣāpadas) were added for Buddhist priests, viz. prohibition of eating at forbidden hours, of attending wordly amusements such as dancing, song, music and shows, of the use of unguents and ornaments, of the use of a large or ornamented couch and of the receiving of gold and silver. About the *śīlas* it is clear that they were adopted from the ancient Upaniṣadic and Dharmasūtra teachings. The Chāndogya narrates how Aśvapati, king of Kekaya, boasted before five great householders and theologians 'in my[1517] kingdom there is no thief, no miser, no drunkard, no man without a fire-altar in his house, no ignorant person, no adulterer, much less an adulteress'. The same Upaniṣad[1518] quotes an ancient verse 'a man who steals gold, who drinks liquor, who dishonours his guru's bed, who kills a brāhmaṇa—these four fall and a fifth also that associates with any one of these four.' It will be shown

---

1515. That destruction of desires is *nirvāṇa* is stated in Ratanasutta 14 and the simile mentioned is that of a lamp being extinguished (by lack of oil).

1516. Vide खुद्दकपाठ 2, दीघनिकाय (II. 43 p. 63) for the five śīlas and Kern's 'Manual of Indian Buddhism' p. 70.

1517. स ह प्रातः संजिहान उवाच न मे स्तेनो जनपदे न कदर्यो न मद्यपो नानाहिताग्निर्नाविद्वान्न स्वैरी स्वैरिणी कुतः। छा. उप. V. 11. 5.

1518. तदेष श्लोकः। स्तेनो हिरण्यस्य सुरां पिबंश्च गुरोस्तल्पमावसन्ब्रह्महा चैते पतन्ति चत्वारः पञ्चमश्चाचरंस्तैरिति। छा. उप. V. 10. 9.

a little later how *ahiṁsā* was emphasized even in the Upaniṣads. Thus *ahiṁsa*, non-stealing, sexual purity, truthfulness had already been emphasized in the oldest Upaniṣads. That an ascetic[1519] had to give up all property and beg for keeping body and soul together is made clear by Bṛ. Up. III. 5. 1 and IV. 4. 22, Jābālopaniṣad 5, Gautama III. 10–13, Vasiṣtha X. The other five precepts for priests such as not receiving gold or silver or giving up unguents, flowers, dancing, singing and music are laid down by Gautama[1520] II. 19 and III. 4, Vasiṣṭha X. 6 &c. for Vedic students and ascetics. Vide H. Kern (in 'Manual of Indian Buddhism, Grundriss p. 70) who remarks that the superior morality for monks is nothing else but the rule of life for the *dvija* in the 4th *āśrama*, when he is a *yati* and all the details were taken from the Dharma-sūtras and Dharmaśāstras.

Ahiṁsā—The Mahābhārata and the Purāṇas lay great emphasis on ahiṁsā (not harming or giving pain to a living creature). The Upaniṣads too emphasized ahiṁsā. The Chāndogya[1521] does so in several passages. In III. 17. 4 it says 'tapas, charity, straight-forwardness, ahiṁsā, speaking the truth—these are the fees of this (sacrifice without ceremonial)'. While describing how the person who has attained true knowledge of the Self does not return (to this saṁsāra), the Chāndogya says that 'he causes no pain to any creature except at tīrthas'. The Bṛ. Up. (V. 2.) says how Prajāpati told the gods, the *asuras* and men that the sound *'da da da'* produced by thundering

1519. एतं वै तमात्मानं विदित्वा ब्राह्मणाः पुत्रैषणायाश्च वित्तैषणायाश्च लोकैषणायाश्च व्युत्थायाथ भिक्षाचर्यं चरन्ति। बृह. उप. III. 5. 1 (after the brāhmaṇas have gained knowledge of this Self, they abstain from desire for sons, desire for wealth and desire for the worlds and wander about as beggars); अथ परिव्राड् विवर्णवासा मुण्डोऽपरिग्रहः शुचिरद्रोही भैक्षणो ब्रह्मभूयाय भवतीति। जाबालोप. 5 quoted by शङ्कराचार्य on वेदान्तसूत्र II. 1. 3 and III. 4. 20.

1520. वर्जयेन्मधुमांसगन्धमाल्यवासस्युपानच्छत्र-काम-क्रोधलोभमोहवाद्य-वादनस्नानदन्तधावनहर्षनृत्यगीतपरिवादभयानि॥ गौ. II.19; मुण्डोऽमोऽपरिग्रहः। वसिष्ठ X. 6. For the other śīlas of priests, compare with गौतम II. 19 the following from दीघनिकाय (vol. I p. 64 Sāmāññā-phala-sutta II. 45) 'विरतो विकालभोजना। नच्च-गीत-वादित-विसूकदस्सना पटिविरतो होति। माला-गन्ध-विलेपन-धारण-मण्डण-विभूसण ठाणा पटिविरतो होति। उच्चासयन-महासयना पटिविरतो होति। जातरूप-रजतपटिग्गहणा पटिविरतो होति। आमक-मंस-पटिग्गहणा पटिविरतो होति।'

1521. अथ यत्तपो दानमार्जवमहिंसा सत्यवचनमिति ता अस्य दक्षिणाः। छा. उप. III. 17. 4; आचार्यकुलाद्वेदमधीत्य ...स्वाध्यायमधीयानो धार्मिकान्विदधदात्मनि सर्वेन्द्रियाणि संप्रतिष्ठाप्याहिंसन् सर्वभूतान्यन्यत्र तीर्थेभ्यः ...न च पुनरावर्तते। छा. उप. VIII. 15; तदेतत्त्रयं शिक्षेद्दमं दानं दयामिति। बृह. उप. V. 2.

clouds conveys to the gods the necessity of self-restraint (dama), to the asuras of compassion (dayā) and to men of charity (dāna). Gautama[1522] specifies eight virtues of the soul, the first of which is compassion for all beings and states that he who has the forty saṁskāras performed on him but does not possess the eight virtues does not secure absorption into *brahma*. The Ādiparva provides 'ahiṁsā is the highest dharma for all beings; therefore a brāhmaṇa should never harm (or give pain to) any being'. The words 'ahiṁsā paramo dharmaḥ' (ahiṁsā is the highest *dharma*) occur very frequently in the Mahābhārata[1523] (e. g. in Droṇaparva 192. 38, Śānti 265. 6, 329. 18, Anuśāsana 115, 25, 116. 38, Āśvamedhikaparva 28. 16–18, 43. 21). Śāntiparva (296. 22–24) enumerates thirteen virtues common to all men, of which freedom from cruelty and ahiṁsā are the first two. Vasiṣṭha IV. 4, Manu X. 63, Yāj. I. 122 prescribe certain virtues as necessary in men of all varṇas. Vide H. of Dh. vol. II. p. 10 notes 25–27.

A few examples of emphasis on ahiṁsā in the Purāṇas may be cited here. The Vāmanapurāṇa[1524] provides: *ahiṁsā*, truth-

1522. दया सर्वभूतेषु शान्तिरनसूया शौचमनायासो मङ्गलमकार्पण्यमस्पृहेति। चत्वारिंशत्संस्कारा न चाष्टावात्मगुणा न स ब्रह्मणः सायुज्यं सलोकतां गच्छति। गौ. ध. सू. VIII. 24–25. The मत्स्य (52. 8–11) sets out these very ātmaguṇas that Gautama mentions; vide also मार्कण्डेय 25. 32–33 for almost the same eight guṇas including ahiṁsā.

1523. अहिंसा परमो धर्मः सर्वप्राणभृतां वर। तस्मात्प्राणभृतः सर्वान्न हिंस्याद् ब्राह्मणः क्वचित्॥ आदिपर्व 11. 13–14; अहिंसा सर्वभूतेषु धर्मं ज्यायस्तरं विदुः। द्रोण 192. 38; अहिंसा सर्वभूतेभ्यो धर्मेभ्यो ज्यायसी मता। शान्ति 265. 6; न हिंस्यात्सर्वभूतानि नैत्रायणगतश्चरेत्। शान्ति 329. 18; अहिंसा परमो धर्मस्तथाहिंसा परं तपः। अहिंसा परमं सत्यं यतो धर्मः प्रवर्तते॥ अनुशासन 115. 25; अहिंसा परमो धर्मो हिंसा चाधर्मलक्षणा। आश्वमेधिक 43. 21.

1524. अहिंसा सत्यमस्तेयं दानं क्षान्तिर्दमः शमः। अकार्पण्यं च शौचं च तपश्च रजनीचर। वृशाङ्गे राक्षसश्रेष्ठ धर्मोऽसौ सार्ववर्णिकः॥ वामन 14. 1–2; न वेदैर्न च दानैश्च न तपोनियमैश्चाध्वरैः। कथंचित् स्वर्गतिं यान्ति पुरुषाः प्राणिहिंसकाः। अहिंसा परमो धर्मो ह्यहिंसैव परं तपः। अहिंसा परमं दानमित्याहुर्मुनयः सदा। मशकान् सरीसृपान् वंशान्यूकाद्यान्मानवांस्तथा। आत्मौपम्येन पश्यन्ति मानवा ये दयालवः॥ पद्म I. 31. 26–28; these verses are repeated in पद्म VI. 243. 69–71 (reads मशकान्मत्कुणान् and आत्मौपम्येन रक्षन्ति); तस्माच्च हिंसा यज्ञे च प्रशंसन्ति महर्षयः। उञ्छो मूलं फलं शाकमुदपात्रं तपोधनाः। एतद्दत्त्वा विभवतः स्वर्गलोके प्रतिष्ठिताः। अद्रोहश्चाप्यलोभश्च दमो भूतदया शमः॥ ब्रह्मचर्यं तपः शौचमकार्पण्यं (ज्ञः?) क्षमा धृतिः। सनातनस्य धर्मस्य मूलमेतद्दुरासदम्॥ मत्स्य 143. 30–32; ब्रह्माण्ड II. 31. 36–38 are the same as मत्स्य (except that it reads तस्माच्च यज्ञे दानं वा) 143. 30–32, The verses उञ्छं मूलं फल'''मूलमेतत्सनातनम् occur in आश्वमेधिकपर्व 91. 32–34. For the words सनातनधर्म, vide the Khanapur plates of Mādhavavarman in E. I. vol. 27 p. 312 at p. 317 (श्रुतिस्मृतिविहितसनातनधर्मकर्मनिरतस्य) edited by Prof. V. V. Mirashi who assigns it to the 6th century A. D.

fulness, absence of stealing, charity, forbearance, self-control, quiescence of senses, absence of poor spirit or weakness, purity, *tapas*—this is the tenfold dharma applicable to all varṇas. The Padma says : not by (the study of) the Vedas, nor by gifts nor by *tapas*, nor by sacrifices do men who kill creatures reach the goal of *heaven*; ahiṁsā is the highest dharma, the highest *tapas* and the highest charity—this is what the sages always say; men that are compassionate treat flies, reptiles, stinging insects, lice and the like and human beings as themselves. Matsya goes so far as to state; great sages do not commend sacrifice in which there is killing; by donating grains of corn gathered in a field, roots, fruits, vegetables, vessel for carrying water according to their ability, sages practising austerities became established in heaven; absence of hatred and greed, self-restraint, compassion towards all beings, control of senses, celibacy, tapas, tenderness, forbearance and firmness—this is the root of the ancient dharma, which is difficult to accomplish. The Brahmāṇḍa (II. 31. 35 'tasmād-ahiṁsā dharmasya dvāram-uktam maharṣibhiḥ') says that great sages have declared that ahiṁsā is the door of dharma. The Padma (V. 43. 38) says 'there is no *dāna* nor *tapas* equal to ahiṁsā'. It is interesting to note that the Matsya and Brahmāṇḍa regard ahiṁsā as 'sanātana dharma' and condemn animal sacrifices. The Kūrma[1525] provides 'ahiṁsā, truthfulness, non-stealing, celibacy and non-possession of wealth-these are briefly declared *yamas* that produce purity of mind among men. The great sages declare that *ahiṁsā* consists in causing no pain to all beings at all times by thought, word or

---

1525. अहिंसा सत्यमस्तेयं ब्रह्मचर्यापरिग्रहौ । यमाः संक्षेपतः प्रोक्ताश्चित्तशुद्धिप्रदा नृणाम् । कर्मणा मनसा वाचा सर्वभूतेषु सर्वदा । अक्लेशजननं प्रोक्ता त्वहिंसा परमर्षिभिः ॥ अहिंसायाः परो धर्मो नास्त्यहिंसापरं सुखम् । विधिना या भवेद्धिंसा त्वहिंसैव प्रकीर्तिता ॥ कूर्म II. 11. 13-15. The लिङ्गपुराण (chap. 8. 8-9) enumerates the eight *sādhanas* of योग of which यम is first and mentions five as in कूर्म. Yamas (abstinences) are variously enumerated. Kūrma appears to follow the योगसूत्र II. 30-31 'अहिंसा-सत्य-अस्तेय-ब्रह्मचर्यापरिग्रहा यमाः । शौच-सन्तोष-तपः-स्वाध्याय-ईश्वरप्रणिधानानि नियमाः ।'. Manu IV. 204 provides generally that one should always practise yamas and that one may not always practise the niyamas, but does not name them, Medhātithi explains that yamas are prohibitions (viz. not to injure life, not to steal, not to tell an untruth, not to have forbidden sexual intercourse and not to possess wealth that belongs to another or not to accept gifts), while niyamas consist of positive acts, such as one should always study the Veda (as in Manu IV. 147). Yāj. III. 312-313 enumerates ten *yamas* viz. celibacy, compassion, forbearance, charity, absence of crooked conduct, *ahiṁsā*, non-stealing, sweetness, restraint of senses and ten niyamas. The वैखानस-स्मार्तसूत्र (IX. 4) enumerates ten yamas,

deed. There is no dharma superior to ahiṁsā, no happiness higher than (the practice of) ahiṁsā; the injury (to life) that is caused according to (Vedic) precepts is declared to be ahiṁsā.' The Upaniṣads commended a qualified ahiṁsā, while the original Pali books like the Sāmāññā-phala-sutta forbad injury to all living beings. Most of the Purāṇas, in order to convince the masses that they did not lag behind the Buddhist preachings, generally insist upon unqualified ahiṁsā. Time brings about strange changes. Professing Buddhists in Ceylon, China, Japan and many other countries have no objection to partaking of fish and meat, while following the insistent advice of the Purāṇas, millions of Indian people (not only brāhmaṇas but also others like vaiśyas and śūdras if Vaiṣṇavas) have been strict vegetarians for centuries, though Buddhism vanished from India centuries ago.

It may be noted, however, that some of the Purāṇas are against carrying the doctrine of ahiṁsā to extremes. The Brahmāṇḍa and Vāyu both say that there is no sin, great or small, in killing a person (e. g. a tyrant or a desperado), when many will live in happiness by his death.[1526]

Pūrta—The Purāṇas lay the greatest emphasis on what is called *pūrtadharma*, works of public utility, charity, social service and the relief of the poor and distressed. The word Iṣṭāpūrta occurs in the Ṛgveda once[1527] 'May you be united in the highest heaven with your pitṛs (ancestors), with Yama and with iṣṭāpūrta' (merit acquired by sacrifices and works of public utility). The word *iṣṭa* occurs several times in Ṛg. (I. 162. 15, I. 164. 15, X. 11. 2, X. 82. 2), but the meaning is not certain except in Ṛg. X. 11. 2 where it appears to mean 'sacrifice'. *Pūrta* also occurs in Ṛg. VI. 16. 18 and VIII. 46. 21, but the meaning is not certain. 'Iṣṭāpūrta' occurs in several Upaniṣads.

1526. यस्मिंस्तु निहते भद्रे जीवन्ते बहवः सुखम्। तस्मिन् हते नास्ति क्षुद्रे पातकं चोपपातकम्॥ ब्रह्माण्ड II. 36. 188, वायु 69. 162 (reads लभन्ते for जीवन्ते). The ब्रह्मपुराण 141.22 has the same idea in different words 'यस्मिन्निपातिते सौख्यं बहूनामुपजायते। क्षुद्रस्यस्तद्वधे प्राहुरश्वमेधशताधिकम्॥'. The कल्पतरु (गृहस्थकाण्ड) p. 300 quotes the verse from वायु (with slight variations viz. एधन्ते for जीवन्ते). The editor was unable to trace it. The verse should be read as निहते भद्रे and not निहतेऽभद्रे as it is printed on p, 300.

1527. संगच्छस्व पितृभिः सं यमेनेष्टापूर्तेन परमे व्योमन्। अ. X. 14. 8; इष्टस्य मध्ये अदितिर्नि धातु नो भ्राता नो ज्येष्ठः प्रथमो वि दोचति॥ ऋ. X. 11. 2.

The Chāndogya states[1528] 'But they who, living in a village, practise (a life of) sacrifices, works of public utility and almsgiving reach toward smoke &c.'. Similarly, the Praśna-upaniṣad asserts 'those, who practise the (mode of) sacrifices and works of public utility as activities to be engaged in, reach only the world of the Moon, and it is these that again return to this world'. The Muṇḍaka says 'deluded people regarding sacrifices and works of public utility as the best do not know (recognize) any other higher good; having enjoyed (their reward) on the top of heaven, they again enter this world or even a lower one'.[1529] Manu speaks of 'iṣṭa' and 'pūrta' and recommends that one should always practise with a pleased heart sacrificial gifts and gifts of the pūrta kind according to one's ability on securing a deserving brāhmaṇa. The Amarakośa defines 'iṣṭa' as sacrifices and 'pūrta' as works such as digging a well or tank. The Mārkaṇḍeya[1530] defines them as follows 'Maintaining the sacred fires, tapas, truthfulness, study of the Veda, hospitality and Vaiśvadeva—these are called iṣṭa; digging wells and tanks and building temples and distribution of food to those that need it—these are declared to be pūrta.' The Agnipurāṇa has similar verses. The Padma (VI. 243. 10–14) cites the following as dharmakārya (religious works); temples of Viṣṇu and Śiva, tanks, wells, lotus ponds, forest of vaṭa, pippala, mango, kakkola, jambu and nimba trees, flower garden, distribution of food from morning to sunset, water distribution outside towns &c. The Skanda[1531] says: the term 'pūrta' is applied in the dharmaśāstras to the erection of temples, construction of tanks, ponds and wells, laying out parks. Padma (VI. 244. 34–35) says that those who build monasteries, cow stables, houses of rest on roads,

1528. अथ य इमे ग्राम इष्टापूर्ते दत्तमित्युपासते ते धूममभिसम्भवन्ति धूमाद्रात्रिम् &c छा. उप. V. 10. 3; तद्ये ह वै तदिष्टापूर्ते कृतमित्युपासते ते चान्द्रमसमेव लोकमभिजयन्ते। त एव पुनरावर्तन्ते। प्रश्न I. 9; इष्टापूर्तं मन्यमाना वरिष्ठं नान्यच्छ्रेयो वेदयन्ते प्रमूढाः। नाकस्य पृष्ठे ते सुकृतेऽनुभूत्वेमं लोकं हीनतरं वाविशन्ति॥ मुण्डकोप० I. 2. 10.

1529. दानधर्मं निषेवेत नित्यमैहिकपौर्तिकम्। परिपुष्टेन भावेन पात्रमासाद्य शक्तितः॥ मनु. IV. 227; त्रिष्वथ क्रतुकर्मेष्टं पूर्तं स्यातादिकर्मणि। अमरकोश.

1530. अग्निहोत्रं तपः सत्यं वेदानां चैव साधनम्। आतिथ्यं वैश्वदेवं च इष्टमित्यभिधीयते॥ वापीकूपतडागानि देवतायतनानि च। अन्नप्रदानमाराम्यः पूर्तमित्यभिधीयते॥ मार्कण्डेय 16. 123–124; अग्नि 209. 2–3 (reads चानुपालनं, च प्राकृतिकं च नाकवत्, अन्नप्रदानमारामाः पूर्तं धर्मं च सूक्तिवत्). The verse वापीकूप० is q. by अपरार्क pp. 24, 290 as from महाभारत. The above two are अत्रिसंहिता 43–44 (Ānan.).

1531. सुरालयसरोवापीकूपारामादिकल्पना। पतदर्थं हि पूर्तज्ञैः धर्मशास्त्रेषु निश्चिता॥ स्कन्द X. 2. 10.

dwellings for ascetics, cottages for the poor and helpless, extensive house for Veda study, houses for brāhmaṇas, enter the world of Indra (i. e. heaven). Atri says[1532] that Iṣṭa and Pūrta are dharma common to all *dvijas*; a śūdra is entitled to perform pūrta-dharmas but not Vaidika rites (i. e. sacrifices). The Anuśāsana-parva (chap. 58) describes how parks should be laid out and tanks constructed with trees on their banks. But the Varāhapurāṇa and some smṛtis went so far as to declare that a man secures only heaven by *iṣṭa*, but he secures mokṣa (final release from saṃsāra) by pūrta[1533].

Sometimes the Purāṇas express ideas that might strike us as rather modern, when they put forward social service and removal of suffering and distress as the highest dharma. In the Mārkaṇḍeya[1534] a king solemnly states 'men do not obtain that happiness in heaven or in the world of Brahmā, which springs from giving relief to distressed beings. Sacrifices, gifts, *tapas* do not conduce to the relief here and in the next world of that man whose heart is not set on relieving the distressed'. The Viṣṇu recommends 'a wise man should say (and do) that alone by thought, word and deed which would be for the benefit of creatures here and hereafter'. The Skanda-purāṇa (Kāśīkhaṇḍa) avers 'adversities of those good men in whose heart doing good to others is awake (i. e. active) vanish and prosperity comes to them at every step. That purity is not secured by baths at holy places, that reward is not obtained by numerous gifts, that (result) is not obtained by severe austerities, that is obtained by doing good to others. After churning all extensive dicta the conclusion reached is this viz. there is no dharma higher than doing good to others and there is no sin greater than harming

1532. इष्टापूर्तं द्विजातीनां सामान्यो धर्मसाधनौ। अधिकारी भवेच्छूद्रः पूर्ते धर्मे न वैदिके। अत्रि verse 46. On p. 24 अपरार्क quotes this from जातूकर्ण्य (reads धर्मौ सामासिकौ मतौ). Vide अपरार्क p. 290 for quotations from नारद in which the illustrations of Iṣṭa and Pūrta are given.

1533. इष्टापूर्तं द्विजातीनां प्रथमं धर्मसाधनम्। इष्टेन लभते स्वर्गं पूर्तेन मोक्षं च विन्दति। वराह 172. 33, यमस्मृति 68, अत्रिसंहिता 145.

1534. न स्वर्गे ब्रह्मलोके वा तत्सुखं प्राप्यते नरैः। यद्दार्तजन्तुनिर्वाणदानोत्थमिति मे मतिः॥ यज्ञदानतपांसीह परत्र च न भूतये। भवन्ति तस्य यस्यार्तपरित्राणे न मानसम्॥ मार्कण्डेय 15. 57 and 62; प्राणिनामुपकाराय यथेहेह परत्र च। कर्मणा मनसा वाचा तथेव मतिमान् यतेत्॥ विष्णु III. 12. 45; परोपकरणं येषां जागर्ति हृदये सताम्। नश्यन्ति विपदस्तस्य सम्पदः स्युः पदे पदे॥ तीर्थस्नानैर्न सा शुद्धिर्नोपवासशतैर्न च। तपोभिरुग्रैस्तप्ताप्युपकृत्य यदाप्यते॥ परित्रायेत दार्त्तार्तं निर्गीतमिदमेव हि। नोपकारात्परो धर्मो नापकारादघं परम्॥ स्कन्द, काशीखण्ड 6. 4–5 and 7; जीवितं सफलं तस्य यः परार्थोद्यतः सदा। अग्निरापो रविः पृथ्वी वायुराकाशमेव च। परार्थं यस्य देहेते सतां चापि विशेषतः॥ ब्रह्म 125. 36–37.

others. The Brahma states 'the life of the man who always strives for the good of others is fruitful (blessed); fire, water, the Sun, the earth and various kinds of crops exist for the benefit of others, and particularly the good (exist for others' benefit)'.

It is surprising that the Bhāgavata avers what is in advance of modern socialistic doctrines 'men have ownership over only that much as would fill their belly; he who thinks as his own what is more than that is a thief and deserves punishment (as such).[1535]

Bhakti—The Purāṇas lay very great emphasis on bhakti (religion of loving faith in God). This is not the place to dilate on the history of the cult of *Bhakti* from the earliest times to modern days. For that purpose there are special treatises (some of which are noted below) that may be consulted. But a few words on bhakti in general may be said here before going into the question as to what the Purāṇas have to say thereon. Traces of the doctrine of *bhakti* may be discovered even in the Ṛgvedic hymns and mantras, some of which are full of loving faith in God, particularly in some of the hymns and verses addressed to Varuṇa and also to Indra. A few examples may be cited. 'All my thoughts[1536] (or hymns) praise Indra in unison, seeking light, longing for him, as wives embrace their husband, their fair young lover, they (thoughts) embrace him (Indra), the divine giver of gifts'; 'your friendship[1537] (with your devotee) is indestructible (everlasting); to him who desires a cow, you become a cow, to him who longs for a horse, may you be a horse;' 'O Indra, you are far better (or richer) than my father or my brother who does not feed me; (you) and my mother, O Vasu, are equal and protect (me) for (conferring) riches and favours'; 'You gave to Kakṣīvat, who offered a hymn and Soma libation to you and who had grown old, Vṛcayā, who was a young

1535. यावद् भ्रियेत जठरं तावत्स्वत्वं हि देहिनाम्। अधिकं योऽभिमन्येत स स्तेनो दण्डमर्हति॥ भागवत VII, 14. 8.

1536. अच्छा म इन्द्रं मतयः स्वर्विदः साध्रीचीर्विश्वा उशतीरनूषत। परिष्वजन्ते जनयो यथा पतिं मर्य न शुन्ध्युं मघवानमूतये॥ ऋ. X. 43. 1; compare Ṛg. I. 62. 11 for the simile.

1537. वृणाशं सक्थं तव गौरसि गम्यते। अश्वो अश्वायते भव॥ ऋ. VI. 45. 26; वसवो इन्द्रासि मे पितृकृत आतुरशुक्रतः। माता च मे छदयथः समा वसो वसुत्वनाय राधसे॥ ऋ. VIII. 1. 6; असौ च एवि वीरको गृहं गृहं विचाकशत्। इमं जम्भसुतं पिब धानावन्तं करम्भिणमपूपवन्तमुक्थिनम्॥ ऋ. VIII. 91. 2; मेनामघो वृषणश्वस्य सुक्रतो विश्वेत्ता ते सवनेषु प्रवाच्या॥ ऋ. I. 51. 13.

woman; you became the wife of Vṛṣaṇaśva; all these (favours) of yours deserve to be loudly proclaimed during the offerings of soma libations'; 'you who, shining brilliantly, come to each house assuming the form of a small man, (O Indra!) drink this Soma juice (produced) by being crushed with my teeth and mixed with fried grains, gruel, cake and laud'. Compare Rg. III. 43. 4, X. 42. 11, X. 112. 10 (in all of which Indra is called 'sakhā' friend) and I. 104. 9, VII. 32. 26 (in both Indra is said to be like a father). It will be clear from these passages that the Vedic sages had reached the stage of *sakhya-bhakti*, that the sages believed that Indra was like a mother, that he assumed the form of a wife for the sake of a devotee, that Indra partook *soma* juice from a devotee who, in the absence of the proper implements for crushing soma stalks, extracted soma juice from soma stalks crushed with the devotee's own teeth. These stories in the far-off ages of the Ṛgveda remind us of the stories in the works of the medieval ages about Rāma having accepted *badara* fruit from a Śabarī (Bhil woman) devotee who first tasted them with her teeth to see whether they were sweet or sour and the story of the God Viṭhobā of Pandharpur, having assumed the form of a *mahār* (an untouchable) and paid up to the Moslem king of Bijapur the money equivalent to the price of corn which, Dāmāji (a great devotee), who was in charge of the royal granary, allowed people distressed by famine to take away. Some mantras addressed to Varuṇa show the same kind of *sakhya-bhakti*. Vasiṣṭha[1537a] prays 'O Varuṇa! what is that great offence (committed by me) on account of which you desire to harm me, your friend and bard; declare that to me, O invincible and self-willed God, so that (after propitiating you) I shall be free from sin and may be able quickly to approach you with adoration'; 'where are those friendships of ours (of you and me) which we safely enjoyed in former times, O self-willed Varuṇa?; I (then) went to your big dwelling house that has a thousand doors; whatever offence we mortals commit against the divine hosts, O Varuṇa, whatever laws of yours we may have violated in our ignorance (or heedlessness), do not, O God, harm us on account of that sin'. It is remarkable that in the Ṛgveda there is a verse in which

---

1537 a. किमाग आस वरुण ज्येष्ठं यत्स्तोतारं जिघांससि सखायम्। प्र तन्मे वोचो दूळभ स्वधावोऽव त्वानेना नमसा तुर इयाम्॥ ऋ. VII. 86. 4; क्व त्यानि नौ सख्या बभूवुः सचावहे यदवृकं पुरा चित्। वृहन्तं मानं वरुण स्वधावः सहस्रद्वारं जगमा गृहं ते॥ ऋ. VII. 88. 5; परेयिवांसं वरुणं पृच्छे अध्वनि स्वयोनाविव वेवृजानमेदभिद्रोहं मनुष्याचरामसि। अचित्ती यत्तव धर्मा युयोपिम मा नस्तस्मादेनसो देव रीरिषः॥ ऋ. VII. 89. 5.

there is an apotheosis[1538] of '*namas*' (*namaskāra*, adoration or homage); 'Adoration itself is mighty, I offer service with adoration; adoration upholds the heaven and the earth; adoration to the gods, adoration rules these gods, whatever sin is committed (by me) I worship it away with adoration'.

Though the word 'bhakti' does not occur in the principal ancient Upaniṣads, the doctrine of the bhakti schools that it is God's grace alone that saves the devotee is found in the Kaṭha and Muṇḍaka Upaniṣads, viz. 'this Supreme Soul is not to be attained by expositions (of a teacher) nor by intelligence, nor by much learning; He is to be attained by him alone whom the Supreme Soul favours, to him this Supreme Soul discloses His form.'[1539] This emphasizes the doctrine that God's Grace alone brings salvation to the devotee. The Śvetāśvataropaniṣad employs the word *bhakti* in the same sense in which it is used in the Gītā and[1540] other works on bhakti. 'These matters declared (here) reveal themselves to that high-souled person who has the highest faith in God and the same faith in his *guru* as in God'. The same Upaniṣad emphasizes a doctrine of the bhakti school in 'I, desirous of mokṣa (liberation from saṁsāra), surrender myself as my refuge to that God who in former times created (established) Brahmā, who transmitted to him (Brahmā) the Vedas, and who illuminates the intellect of the individual soul'.

The word 'prapadye' in the Śvetāśvatara serves as the basis of the doctrine of 'prapatti' in the Vaiṣṇavite system such as that of Rāmānuja.

But among the original sources of the Bhakti cult are the Nārāyaṇīya section (chapters 335–351 of Citraśāla ed. = cr. ed. 322–339) of the Śāntiparva and the Bhagavadgītā. For the

1540. यस्य देवे परा भक्तिर्यथा देवे तथा गुरौ । तस्यैते कथिता ह्यर्थाः प्रकाशन्ते महात्मनः ॥ श्वेताश्व. VI. 23; यो ब्रह्माणं विदधाति पूर्वं यो वै वेदांश्च प्रहिणोति तस्मै । तं ह देवमात्मबुद्धि-प्रकाशं मुमुक्षुर्वै शरणमहं प्रपद्ये ॥ श्वेताश्व. VI. 18. This last verse is relied upon by स्वयंप्रभेश्वर in his bhāṣya on शाण्डिल्य-भक्तिसूत्र I. 1. 1. Barth in his 'Religions of India' translated by J. Wood (3rd ed. 1891) sets out the grounds on which western scholars (particularly Weber) held that the religion of loving faith in Kṛṣṇa was due to Christian influence and then states that he is not satisfied with this theory (pp. 219–223).

antiquity of Kṛṣṇa worship (vide pp. 129–131 above). Megasthenes states that Heracles (Harikṛṣṇa?) was worshipped by Soursenoi (Śaurasenas) on the banks of Jobares (Yamunā) and had two cities Methora (Mathurā) and Cleisbora (Kṛṣṇapura?). In the Nārāyanīya it is stated (in chap. 335. 17–24) that king Uparicara Vasu was a devotee (bhakta) of Nārāyaṇa, that he worshipped the Lord of Gods according to the *sāttvata* rules that were proclaimed by the Sun, that he (Vasu) consecrated his kingdom, wealth, wife and horses to God, thinking that they all belonged to the Bhagavat (the Adorable One) and performed sacrificial rites according to the Sāttvata rules.

In the Śāntiparva, Sātvata and Pāñcarātra are identified[1541] and it is said that the seven sages called 'citraśikhaṇḍin' (lit. whose top-knots on the head were bright or wonderful) viz. Marīci, Atri, Angiras, Pulastya, Pulaha, Kratu and Vasiṣṭha, proclaimed the (Pāñcarātra) śāstra and God Nārāyaṇa told them that the śāstra would be authoritative in the world and that king Vasu would learn the śāstra from Bṛhaspati to whom it would come by degrees from the seven sages. Chapter 336 of Śāntī declares that to the north of the Milky Sea there was territory called Śvetadvīpa, where dwelt devotees of Nārāyana who were called[1542] 'Ekāntin' and Pāñcarātra is called 'Ekānta-dharma'. A peculiar doctrine of the Pāñcarātra school is that of the four *vyūhas* (*mūrtis* or forms) viz. that the Supreme Person is Vāsudeva, the individual soul is Sānkarṣana, Pradyuma is mind and springs from Saṅkarsaṇa and Aniruddha is *ahaṅkāra* and originates from Pradyumna.[1543] It is this doctrine of the four forms of Vāsudeva, each springing from the preceding, that is refuted according to Śaṅkara in the Brahmasūtra II. 2. 42–45. The Śānti 348. 8 expressly refers to the Gītā as already declared

1541. काम्यनैमित्तिका राजन् यज्ञियाः परमक्रियाः । सर्वाः सात्वतमास्थाय विधिं चक्रे समाहितः । पाञ्चरात्रविदो मुख्यास्तस्य गेहे महात्मनः । मायणं भगवत्प्रोक्तं भुञ्जते वाग्भोजनम् ॥ शान्ति 335. 24–25.

1542. एकान्तिनस्ते पुरुषाः श्वेतद्वीपनिवासिनः । शान्ति 336. 29; vide also शान्ति 348. 62 for एकान्तिनः पुरुषाः; एकान्तिनस्ते पुरुषा गच्छन्ति परमं पदम् । नूनमेकान्तधर्मोऽयं श्रेष्ठो नारायणप्रियः ॥ शान्ति 348. 3–4.

1543. यो वासुदेवो भगवान् क्षेत्रज्ञो निर्गुणात्मकः । ज्ञेयः स एव राजेन्द्र जीवः सङ्कर्षणः प्रभुः ॥ सङ्कर्षणाच्च प्रद्युम्नो मनोभूतः स उच्यते । प्रद्युम्नाच्चोऽनिरुद्धस्तु सोऽहङ्कारः स ईश्वरः ॥ शान्ति० 339. 40–41.

to Arjuna. In[1544] chap. 349. 64 it is said that Sāṅkhya, Yoga, Pāñcarātra, Vedas and Pāśupata are five lores that differ in their views and were promulgated by Kapila (Sāṅkhya), Hiraṇyagarbha (Yoga), Apāntaratamas (the Veda), Śiva (Pāśupata), the Bhāgavat Himself (promulgator of Pāñcarātra). The Viṣṇudharmottara[1545] remarks 'for seeking Brahma (the One Reality in the Universe) there are five Siddhāntas (systems) viz. Sāṅkhya, Yoga, Pāñcarātra,[1546] Vedas and Pāśupata'. Relying on Śāntiparva 339. 68 several writers particularly those of the Rāmānuja school assert that the whole of the Pāñcarātra system has Vedic

---

1544. सांख्यं योगः पाञ्चरात्रं वेदाः पाशुपतं तथा । ज्ञानान्येतानि राजर्षे विद्धि नानामतानि वै ॥. शान्ति 349. 64; but later on it is said सांख्यस्य वक्ता कपिलः परमर्षिः स उच्यते । ...उक्तवानिदमव्यग्रो ज्ञानं पाशुपतं शिवः । पाञ्चरात्रस्य कृत्स्नस्य वेत्ता तु भगवान् स्वयम् । सर्वेषु च नृपश्रेष्ठ ज्ञानेष्वेतेषु दृश्यते ॥ शान्ति 349. 65-68 q. by परिभाषाप्रकाश p. 21 (which reads वक्ता तु भगवान् स्वयम्). These verses are borrowed almost verbatim by the योगियाज्ञवल्क्य XII. 5-6 and the same work reads 'सांख्यं योगं ...तथा । अतिप्रमाणान्येतानि हेतुभिर्न विचालयेत् ।' XII. 4 (q. by अपरार्क on p. 11), which means that the five systems are beyond the ordinary means of knowledge and they should not be disturbed by mere ratiocination.

1545. सांख्यं योगं पञ्चरात्रं शैवं पाशुपतं तथा । कृतान्तपञ्चकं विद्धि ब्रह्मणः परिमार्गणे ॥ विष्णुधर्मोत्तरपु० I. 74. 34 q. by हे. on व्रत vol. I. p. 25 and परिभाषाप्रकाश p. 22.

1546. Why the cult of Vāsudeva was called Pāñcarātra has not been satisfactorily explained anywhere in the English Histories of Indian Philosophy so far as I know. The name leads to the inference that the cult has something to do with *five* matters. But why is the word *rātra* or *kāla* used? That is the difficulty. In Śānti 336. 46 (cr. ed. 323. 42) Pañcarātra is referred to as 'Pañcakāla' (तैरिदः पञ्चकालज्ञैर्हरिरेकान्तिभिर्नरैः). Several guesses have been put forward, some of which are: (1) on five nights Nārāyaṇa taught Ananta, Garuḍa, Viśvaksena, Brahmā and Rudra; (2) The Parama-saṁhitā (31. 19) states that God imparted this doctrine in five nights to four sages, Sanatkumāra, Sanaka, Sanandana and Sanātana; (3) this cult blackened (*rātri* is dark) five teachings, viz. सांख्य, योग, पाशुपत, बौद्ध and आर्हत; (4) this (pāñcarātra) teaches five aspects पर, व्यूह, विभव (i. e. अवतार), अन्तर्यामिन्, अर्चा (images); (5) it dwells upon five duties of Vaiṣṇavas viz. tāpa (branding on the arm and other limbs), puṇḍra (upright lines made on the forehead with some colouring substance), nāma (names of Vāsudeva), mantra (like 'Om namo Nārāyaṇāya), yāga (worship of images of Vāsudeva). The Ālwar literature mentions fivefold nature viz. Para and the others. Vide K. C. Varadachari's paper on 'Some contributions of Ālwars to the philosophy of bhakti' in Silver Jubilee vol. of BORI. p. 621. The Paramasaṁhitā (I. 39-40 G. O. S. ed.) states that the five great Elements, the five Tanmātras, Ahaṁkāra, Buddhi and *avyakta*, (five categories or Tattvas of the Sāṅkhya) are the night (as it were) of the Puruṣa and therefore this śāstra (which propounds how to be free from the meshes of these five) is called Pāñcarātra.

authority, while others like Aparārka p. 13 and Paribhāṣāprakāśa (p. 23) do not accept it as thoroughly Vedic but only partially.

In the Vedāntasūtra[1547] there are four sūtras dealing with the Bhāgavata or Pāñcarātra system. The great Ācāryas are not agreed upon their interpretation, Śaṅkara saying that all the four sūtras refute some tenets of the Bhāgavatas, Rāmānuja saying that the first two sūtras (out of four) contain refutation of the Bhāgavata doctrine and the other two do not. Śaṅkarācārya makes it clear that the doctrines of the Bhāgavatas that the Supreme God Vāsudeva is the Highest Truth, that He assumes four forms, that the worship of Vāsudeva consists in continuous single-minded contemplation of Vāsudeva are not the targets for attack, that what is refuted is the doctrine of the Bhāgavatas that the individual soul called Saṅkarṣaṇa by them springs from Vāsudeva, that Pradyumna (mind) arises from Saṅkarasaṇa and that Aniruddha (ahaṁkāra) arises from Pradyumna. It appears from Śaṅkara's remarks[1548] on II. 2. 45 that in his day Śāṇḍilya was supposed to have promulgated the Bhāgavata or Pāñcarātra śāstra, because he did not find the

---

1547. The four sūtras in the Vedāntasūtra (II. 2. 42–45) are: उत्पत्त्यसम्भवात्, न च कर्तुः करणम्, विज्ञानादिभावे वा तदप्रतिषेधः, विप्रतिषेधाच्च. Though Rāmānuja enlarges upon the Pāñcarātra doctrine in his comments on the last two sūtras out of these four and quotes three passages that may be called Pāñcarātra, he does not avow either in his Śrībhāṣya or in his Vedārtha-saṅgraha that he is a Sātvata or Pāñcarātra.

1548. वेदविप्रतिषेधश्च भवति। चतुर्षु वेदेषु परं श्रेयोऽलब्ध्वा शाण्डिल्य इदं शास्त्रमधिगतवानित्यादिवेदनिन्दादर्शनात्। शाङ्करभाष्य on वेदान्तसूत्र II. 2. 45. शाङ्करभाष्य begins 'तत्र भागवता मन्यन्ते' (on ब्रह्मसूत्र II. 2. 42) and under II. 2. 44 he remarks 'न च पञ्चरात्रसिद्धान्तिभिर्वासुदेवादिव्यूहैकस्मिन् सर्वेषु वा ज्ञानैश्वर्यादितारतम्यकृताः काश्चिद्भेदोभ्युपगम्यते।'. It may further be noted that in the Śāntiparva पाञ्चरात्र is called सात्वतधर्म (chap. 348. 34 and 84). बाण in his हर्षचरित (8th उच्छ्वास), while describing the persons professing various religious and philosophical doctrines gathered near the great ācārya Divākara-mitra, separately mentions Bhāgavatas and Pāñcarātrikas 'क्षपणकच्छायासु निषण्णैः···भागवतैर्वणिभिः केशलुञ्चनैः कापिलैर्जैनलोकायतिकैः···पौराणिकैः सात्वततन्त्रैः शैवैः शाक्यैः पाञ्चरात्रिकैरन्यैश्चात्र स्वान् स्वान् सिद्धान्तान् शृण्वद्भिः &c.'. What Bāṇa probably means is that भागवत stands for the general cult of bhakti (in the Gītā) and पाञ्चरात्र for one school among भागवतs, that had as its characteristic the doctrine of four vyūhas. This is like ब्राह्मणश्रमणन्याय. The वृद्धहारीतस्मृति (11. 181–192) states that Śāṇḍilya composed a work for performing the worship of Viṣṇu by a non-Vedic procedure, that Viṣṇu cursed him to remain in hell but relented when Śāṇḍilya threw himself on his mercy and reduced the period of hell-residence.

highest bliss in all the four Vedas. In the Droṇaparva (29. 26–29) there is another and different reference to the four mūrtis of the Supreme for the benefit of the worlds viz. one performs tapas (asuterities) on the earth, the 2nd has an eye on the world's good and evil deeds; the third comes to the world in a human form and does such acts as men perform; the 4th slumbers for a thousand years and when it arises from slumber confers the highest boons on those who deserve them.

It may be noted that even in the Mahābhārata Nārada's name is connected with Pāñcarātra. It is said 'this very secret doctrine, connected with the four Vedas, having the benefit of Sāṅkhya and Yoga and spoken of as Pāñcarātra, was (originally) uttered by the lips of Nārāyaṇa and was again communicated by Nārada.[1549]

Other great sources of the cult of bhakti are the Bhagavadgītā, which is expressly mentioned in the Nārāyaṇīya section (348. 8 = cr. ed. 336. 8), the Bhāgavatapurāṇa and the Viṣṇupurāṇa. The Gītā contains the words *bhakti* and *bhakta* several dozens of times. It may be stated here that the so-called Nāradabhaktisūtras, Nārada-pāñcarātra, the Śāṇḍilya-bhakti-sūtra and the several extant Pāñcarātra-saṁhitās so far published are all later than the Gītā.[1550] The Agnipurāṇa gives the names of 25 works on Pañcarātra quoted in the note below.[1551] The Maheśvara-

---

1549. इदं महोपनिषदं चतुर्वेदसमन्वितम् । सांख्ययोगकृतं तेन पञ्चरात्रानुशब्दितम्। नारायणमुखोद्गीतं नारदोऽश्रावयत्पुनः । शान्ति 339. 111–112 (=cr. ed. 326. 100–101). The words इदं···शब्दितम् are q. by रामानुज in his भाष्य on ब्रह्मसूत्र II. 2. 45 (42 in रामानुजभाष्य B. S. S.).

1550. The reasons for this statement are not relevant to this work, but by way of example, attention may be drawn to some Śāṇḍilya-sūtras: तदेव कर्मिज्ञानियोगिभ्य आधिक्यशब्दात्, प्रश्ननिरूपणाभ्यामाधिक्यसिद्धेः (I. 2. 22–23 in Jivanand's ed. = I. 2. 15–16 in भक्तिचन्द्रिका), which clearly refer to Gītā VI. 46–47 and XII. 1 and 6–7 respectively. There is one sūtra where the Gītā is expressly mentioned viz. सैकान्तभावो गीतार्थप्रत्यभिज्ञानात् (II. 2. 83 in Jivanand's ed. = II. 2. 28 in भक्तिचन्द्रिका). स्वमेश्वर comments on this सा परा भक्तिरेवैकान्तभावो नान्यः। कुतः। गीतार्थेन प्रत्यभिज्ञाश्रवणात्। यथा नारायणीय एव 'सहोपनिषदो···ऋषिणापि वा' (शान्ति 348. 5–6) इति प्रश्ने प्रत्युत्तरम्। 'सप्तपोढेष्वनीकेषु··· भगवता स्वयम्।' (शान्ति 348. 8)। तस्मादेकान्तिता परा भक्तिरिति।

1551. विष्ण्वादीनां प्रतिष्ठादि वक्ष्ये ब्रह्मन् शृणुष्व मे। प्रोक्तानि पञ्चरात्राणि सप्तरात्राणि वै मया॥ व्यस्तानि मुनिभिर्लोके पञ्चविंशतिसंख्यया। हयशीर्षं तन्त्रमाद्यं तन्त्रं त्रैलोक्यमोहनम्॥ ···स्वायम्भुवं कापिलं च तार्क्ष्यं नारायणीयकम्॥ आत्रेयं नारसिंहाख्यमानन्दाख्यं तथाक्षणम्॥ बौधायनं तथाष्टार्कं विश्वोक्तं तस्य सारतः॥ अग्निपु० 39. 1–5. Does नारायणीयक in the verse above refer to the नारायणीय section of the महाभारत ?

tantra names 25 Pāñcarātra tantras promulgated by Viṣṇu, which are condemned therein as having no truth (26. 16 ff.).

There is an extensive Literature on the Bhakti cult. Only a few of the important works in Sanskrit, their translations and works in English are noted here. Barth, Hopkins, Keith, Dr. R. G. Bhandarkar and others have propounded different theories as to what Kṛṣṇa represented, how he was identified with Viṣṇu who appears to be another name of the Sun in the Ṛgveda and came to be regarded as the highest God in Brāhmaṇa times (as in Ait. Br. 'Agnir-vai devānām avamaḥ, Viṣṇuḥ paramaḥ) and came to be identified with sacrifice (Yajño vai Viṣṇuḥ). When Kṛṣṇa, the friend of the Pāṇḍavas was identified with the Supreme Spirit, the full-fledged doctrine of Avatāras appeared as in the Gītā. The important works on *bhakti* are: The Nārāyaṇīya section of the Śāntiparva (chapters 322–351 in the Citraśālā edition and chap. 322–339 of the critical edition); the Bhagavadgītā; several Purāṇas, the most important being Viṣṇu and Bhāgavata;[1552] the Bhaktisūtra of Śāṇḍilya with the *bhāṣya* of Svapneśvara (ed. by Jivananda, Calcutta 1876) and translation of both these (in B. I. series) by E. B. Cowell

---

1552. It is remarkable that the Bhāgavata, which is practically the most important or sole authority for all great medieval Vaiṣṇava teachers like Vallabha and Caitanya and their disciples, is not quoted anywhere by Rāmānuja (who was born in śake 1049 i. e. 1127 A. D.) in his bhāṣya on the Brahmasūtras, when he quotes over a hundred verses from the Viṣṇupurāṇa in the same. In fact, in the Vedārthsaṅgraha Rāmānuja states that in the same way as the section (anuvāka) on Nārāyaṇa among all śruti texts serves to expound the special aspect of highest Brahma so the Viṣṇupurāṇa also defines a special aspect of the highest Brahma and that all other Purāṇas should be so interpreted as not to be in conflict with it 'यथा सर्वासु श्रुतिषु केवलपरब्रह्मस्वरूपविशेषप्रदर्शनायैव प्रवृत्तो नारायणानुवाकस्तथेदं वैष्णवं च पुराणं···परब्रह्मस्वरूपविशेषनिर्णयायैव प्रवृत्तम्। अन्यानि सर्वाणि पुराणान्येतदविरोधेन नेयानि। वेदार्थसंग्रह para 110–111 pp. 141–142 (D. C. ed. 1956). रामानुज mentions (in भाष्य on वेदान्तसूत्र II. 2. 41 and 45) पौष्करसंहिता, सात्वतसंहिता and परमसंहिता among the पाञ्चरात्रसंहिताs, but does nowhere affirm that he is a follower of the पञ्चरात्र doctrine. There are numerous commentaries on the Bhāgavata and commentaries on commentaries (Das Gupta in vol. 4 pp. 1–2 lists over 40 commentaries on the Bhāgavata). It is unnecessary in this work to refer to the numerous commentaries of the disciples and followers of Madhva and other great Vaiṣṇava ācāryas. The position of Vallabhācārya (1479–1531 A. D.) appears to be that the Bhāgavata is the supreme authority in case of doubt 'वेदाः श्रीकृष्णवाक्यानि व्याससूत्राणि चैव हि। समाधिभाषा व्यासस्य प्रमाणं तच्चतुष्टयम्। उत्तरं पूर्वसन्देहवारकं परिकीर्तितम्॥ तत्त्वदीपनिबन्ध (Ahmedabad, 1926); vide also Prof. G. H. Bhatt in I. H. Q. vol. IX, 300–306. Vallabhācārya's is called पुष्टिमार्ग (meaning कृष्णानुग्रह) and he holds that even *bhakti* is difficult to accomplish in the Kali age.

(1878); Śāṇḍilya's saṁhitā (Bhaktikhaṇḍa) in the Sarasvatibhavan Series, edited by Anantasastri Phadke, (1935); Nāradabhaktisūtra with English Translation by Nandlal Sinha (Pāṇini office, Allahabad, 1911); the Nārada-pāñcarātra (containing the Jñānāmṛtasāra section) in eleven chapters (ed. for B. I. Series by C. M. Banerji, Calcutta, 1865) and English translation of it by Swami Vijñānānanda (Pāṇini Office, Allahabad, 1921); Sir R. G. Bhadarkar's 'Vaiṣṇavism, Śaivism &c.' (1913, in the Encyclopaedia of Indo-Aryan Research); 'Das-Gupta's History of Indian Philosophy' vol. IV. (1949), wherein he deals with the Bhāgavatapurāṇa and the doctrines of Madhva, Vallabha, Caitanya and their followers; Grierson's paper 'Gleanings from Bhaktamālā of Nābhādāsa', in J. R. A. S. for 1909 pp. 607–644; 'History of Śrīvaiṣṇavas', by T. A. Gopinatha Rao (Madras, 1923), 'the Gospel of Nārada' by Duncan Greenless (Adyar, 1951); Nārada-bhakti-sūtras (text, translation and notes) ed. by Swami Tyāgīśānanda (Ramakrisna Math, Mylapore, Madras, 1943) in five *adhyāyas* and 84 sūtras; the Ahirbudhnya-saṁhitā in two volumes (Adyar, 1916); Dr. F. Otto Schrader's Introduction to the Pāñcarātra and Ahirbudhnya-saṁhitā (Adyar, 1916); Jayākhya-saṁhitā with English and Sanskrit Introductions (G. O. S. 1931); the Parama-saṁhitā (G. O. S., 1946) with English Translation by Dr. S. K. Aiyangar; the Bṛhadbrahmasaṁhitā (of Nārada-pāñcarātra) in the Ānandāśrama series, 1912); Bhakticandrikā (commentary on Śāṇḍilya's Bhaktisūtras) by Nārāyaṇatīrtha (Sarasvatibhavan series, 1921, 1938); Bhaktiprakāśa of Mitramiśra (Chowkhamba Series, 1934); Bhaktinirṇaya of Anantadeva (ed. by Pandit Anantasastri Phadke, Banaras, 1937). There is a good deal of Bhakti literature in South India, such as the hymns of the Āḻwārs, but no reference is made here to it for several reasons.

Before proceeding with the treatment of *bhakti* in the Purāṇas the words 'bhakti' and 'Bhāgavata' must be briefly defined and explained. Śāṇḍilya defines[1553a] 'bhakti' as 'sā

1552a. अथातो भक्तिजिज्ञासा। सा परानुरक्तिरीश्वरे। शाण्डिल्य I. 1. 1–2; स्वमेश्वर comments: आराध्यविषयकरागत्वमेव सा। इह तु परमेश्वरविषयकान्तःकरणवृत्तिविशेष एव भक्तिः। The verse relied on is: या प्रीतिरविवेकानां विषयेष्वनपायिनी। त्वामनुस्मरतः सा मे हृदयान्मापसर्पतु॥ विष्णुपु० I. 20. 19. स्वमेश्वर also quotes गीता 'मच्चित्ता मद्गतप्राणा बोधयन्तः परस्परम्। कथयन्तश्च मां नित्यं तुष्यन्ति च रमन्ति च॥ तेषां सततयुक्तानां भजतां प्रीतिपूर्वकम्। ददामि बुद्धियोगं तं येन मामुपयान्ति ते॥ X. 9–10. On अनुरक्ति he remarks 'भगवन्महिमादिज्ञानावस्तु पश्चात् जायमानावनुरक्तिरित्युक्तम्'. स्वमेश्वर refers

(*Continued on next page*)

parānuraktiriśvare'. This may be interpreted in two ways 'the highest form of bhakti is affection fixed on God' or 'bhakti is the highest affection fixed on God'. Svapneśvara, the author of a bhāṣya on Śāṇḍilya, prefers the first and Nārada-bhakti-sūtra, Tilak and others favour the second. Svapneśvara explains that in general 'bhakti' means 'affection fixed on a being that is to be won over or worshipped', but that in this śāstra it means 'a particular state of the mind having the Supreme Lord as its object' and quotes a verse from the Viṣṇupurāṇa uttered by the great devotee Prahlāda 'May that fixed (or unwavering) love, which the ignorant (or unreflecting) people feel for worldly objects, never depart from my heart, ever remembering you'. The Gītā employs the word 'prīti' (affection) and conveys that the word 'bhakti' is derived from the root 'bhaj' to resort to. 'Those whose minds are on me, whose lives are offered to me, who instruct each other, who speak of me, are always contented and happy. On these who are continuously devoted to me and serve me with affection, I bestow that knowledge by which they reach me'. Svapneśvara explains that the word 'anurakti' (with prefix 'anu') is employed to convey that the affection for God arises *after* the devotee secures knowledge of the greatness and other attributes of the Bhagavat (Adorable One). In the Viṣṇupurāṇa the word 'anurāga' is used for 'bhakti', where, after describing the ascent of Rāma and his brothers to heaven, it says that the people of the capital of Kosala who had deep affection for those incarnate parts of the Bhagavat (Viṣṇu), having their minds fixed on them, reached the position of residence in the same world with them. Śāṇḍilya further[1553] says that there is the teaching that there is immortality for him who abides in Him. In the Chāndogya Up. it is said 'He who abides in brahman reaches immortality'. The idea is that immortality being the promise of abiding in God, there will be no indifference in the effort to know God or in the effort to

(*Continued from last page*)

to विष्णुपुराण IV. 4. 103 'येपि तेषु भगवद्वंशेष्वनुरागिणः कोसलनगरजानपदास्तेपि तन्मनस्तत्तालोक्यतामेवापुः'. The भागवत holds that the highest bhakti must be disinterested and uninterrupted; अहैतुक्यव्यवहिता या भक्तिः पुरुषोत्तमे। भागवत III. 29. 12. The next verse mentions the four stages of beatitude 'सालोक्यसार्ष्टि-सामीप्यसायुज्यैकत्वमप्युत' (एकत्व is 5th, final goal).

1553. तत्संस्थस्यामृतत्वोपदेशात्। शाण्डिल्य I.1.30; स्वप्नेश्वर explains; 'तस्मिन्नीश्वरे संस्था भक्तिर्यस्य स तथोक्तः'. The छान्दोग्य declares 'ब्रह्मसंस्थोऽमृतत्वमेति' (II. 23.1) and the same meaning is conveyed by ब्रह्मसूत्र I. 1. 7 'तद्धितस्य मोक्षोपदेशात्'.

cultivate highest affection for God. It may be noticed that the sūtras of Nārada appear to be a mere paraphrase of Śāṇḍilya's aphorisms.[1554] Śāṇḍilya further (sūtra 7) provides that bhakti, like knowledge, is not an action because it does not follow an effort of the will and that (sūtra 9) it is different from *jñāna*, as the Gītā refers to self-surrender being attained by one having knowledge after many births (Gītā VII. 19).

Our ancestors had a great *penchant* for classifications, divisions and sub-divisions. Bhakti is divided into *laukikī* (of the common people), *Vaidikī* (laid down by the Veda) and *ādhyātmikī* (philosophical), as in Padma V. 15. 164; or *mānasī* (mental), *vācikī* (verbal) and *kāyikī* (done with the body, such as fasts, vratas &c.) in Padma V. 15. 165–168; into Sāttvikī, Rājasī and Tāmasī (as in Bhāgavata III. 29. 7–10 and Padma VI. 126. 4–11); into best, middling and inferior as in Brahmāṇḍa III.[1555] 34. 38–41).

Prapatti (self-surrender) is distinguished from bhakti in works of the Rāmānuja and of other Vaiṣṇava schools. It consists of five points[1556] viz. resolution to yield (to God's will), the abandoning of opposition, faith that God will protect (the devotee), praying to God to save the devotee, and a feeling of helplessness shown by casting one's soul on Him. Bhakti has as synonyms the words' dhyāna', 'upāsanā' &c. and is subsidiary to *prapatti*. The Gītā explicitly makes no such distinction. In Gītā II. 7 Arjuna speaks of himself as 'prapanna' (who has approached or surrendered himself for salvation). The final advice at the end of the Gītā enjoins what is called *prapatti* in later works 'On me fix your mind, become my devotee, sacrifice

---

1554. अथातो भक्तिं व्याख्यास्यामः। सा त्वस्मिन्परमप्रेमरूपा। अमृतस्वरूपा च। नारद-भक्तिसूत्र 1–3.

1555. The ब्रह्माण्ड mentions नारद, शुक, अम्बरीष, रन्तिदेव, मार्कण्डेय, बलि, विभीषण, प्रह्लाद, गोपीs and उद्धव as exemplars of highest भक्ति; वसिष्ठ and मनु as practising मध्यमा and ordinary men as practising kaniṣṭhā (inferior) भक्ति. The नारदभक्तिसूत्र 83 mentions many of these as भक्त्याचार्याः: 'इत्येवं वदन्ति। जनजल्पनिर्भया एकमताः कुमारव्यासशुकशाण्डिल्यगर्गविष्णुकौण्डिल्य-शेष-उद्धव-आरुणिबलिहनुमद्विभीषणादयो भक्त्याचार्याः।'. कुमार stands for नारद, son of ब्रह्मा.

1556. ध्यानशब्दवाच्या भक्तिर्विद्यानेवाङ्गद्विधा। ...प्रपत्तिर्नाम-आनुकूल्यस्य सङ्कल्पः प्रातिकूल्यस्य वर्जनम्। रक्षिष्यतीति विश्वासो गोप्तृत्ववरणं तथा। आत्मनिक्षेपकार्पण्ये-इत्याद्यङ्ग-षाङ्गमुक्ता। यतीन्द्रमतदीपिका p. 64. This work remarks that this प्रपत्ति must be learnt from the lips of a guru and therefore it does not expound it. Some read आत्मनिक्षेपः कार्पण्यं and thus raise the aṅgas of प्रपत्ति to six.

to me, offer adoration to me; you will certainly reach me; I declare to you truly, you are dear to me. Giving up all (*dharmas*) duties, come to me as your (only) refuge; I shall release you from all sins; do not grieve'.[1557] Vide also Gītā VII. 14, 15 and XV. 4 for other instances of the use of the root 'pra-pad'. The theory propounded in the Gītā and other works on bhakti was that bhakti led on to 'prasāda' (favour or grace) of God which enables the devotee to attain mokṣa.[1558] The Gītā (18. 56, 58, 62) says 'a man, though always performing all actions, but solely depending on me, obtains an imperishable and eternal place through my favour; if you fix your mind on me, you will get over all difficulties through my favour; go to Him as the refuge with all your heart, O Arjuna, through His grace you will attain the highest peace and an everlasting abode.' In the Viṣṇupurāṇa Prahlāda[1559] is told by the Adorable One 'as your mind is firmly and devotedly fixed on me you will by my favour attain the highest bliss'. The idea of God's grace occurs both in the Kaṭha and Śvetāśvatara Upaniṣads:[1560] 'The Self, smaller than the small and greater than the great, is hidden in the heart of the creatures; a man who is free from willing anything and free from grief sees the greatness of the Self through the favour of the Creator'.

There is a great difference between the Gītā and the Nārāyaṇīya section. In the former, though the Supreme Soul is called Vāsudeva,[1561] the doctrine of the four vyūhas, that is very

---

1557. मन्मना भव मद्भक्तो मद्याजी मां नमस्कुरु । मामेवैष्यसि सत्यं ते प्रतिजाने प्रियोऽसि मे ॥ सर्वधर्मान् परित्यज्य मामेकं शरणं व्रज । अहं त्वा सर्वपापेभ्यो मोक्षयिष्यामि मा शुचः ॥ गीता 18. 65-66. धर्मान् here refers to the duties of varṇas (brāhmaṇa, kṣatriya &c) and of āśramas (such as those of householder or ascetic &c.) or धर्मान् may refer to actions enjoined by the Veda and smṛtis. This last exhortation is practically repeated from the end of the 9th chapter 'मन्मना ...नमस्कुरु । मामेवैष्यसि युक्त्वैवमात्मानं मत्परायणः ॥' 9. 34.

1558. भक्तिप्रपत्तिभ्यां प्रसन्न ईश्वर एव मोक्षं ददाति । अतस्तयोरेव मोक्षोपायत्वम् । यतीन्द्रमतदीपिका p. 64.

1559. यथा ते निश्चलं चेतो मयि भक्तिसमन्वितम् । तथा त्वं मत्प्रसादेन निर्वाणं परमाप्स्यसि ॥ विष्णुपु० I. 20. 28.

1560. अणोरणीयान्महतो महीयानात्मास्य जन्तोर्निहितो गुहायाम् । तमक्रतुः पश्यति वीतशोको धातुः प्रसादान्महिमानमात्मनः । कठोप० II. 20, श्वेताश्व० III. 20 (reads आत्मा गुहायां निहितोस्य जन्तोः, अक्रतुम्, महिमानमीशम्).

1561. बहूनां जन्मनामन्ते ज्ञानवान्मां प्रपद्यते । वासुदेवः सर्वमिति स महात्मा सुदुर्लभः ॥ गीता VII. 19; वृष्णीनां वासुदेवोऽस्मि । गीता X. 37.

characteristic of the Nārāyaṇīya section, is totally absent and further even the names of Saṅkarṣaṇa, Pradyumna and Aniruddha do not occur in the Gītā. In my opinion the Gītā is the older of the two, as it propounds the general doctrine of bhakti, while the Pāñcarātra doctrine in the Nārāyaṇīya is only one of the several bhakti schools. Moreover, the Nārāyaṇīya section represents that Gītā had already been proclaimed and that the knowledge brought from Śvetadvīpa by Nārada is the same as that declared in the Harigītā (chap. 346. 10–11, 348. 53–54). Śānti (348. 55–57) mentions that there was only one vyūha or there were two, three or four and that the Ekāntins attached great importance to ahiṁsā. Besides, the worship of Vāsudeva is older than Pāṇini, since[1562] Pāṇini teaches the formation of the word Vāsudevaka as meaning 'one whose object of worship is Vāsudeva'. Vide Dr. Bhandarkar's 'Vaiṣṇavism, Śaivism &c.' paragraphs 2–10 (pp. 3–19 of vol. IV of the collected works) for the antiquity of Vāsudeva worship. The general view of most medieval writers on Dharmaśāstra about Pāñcarātra is represented by the Pārijāta quoted in the K. R. that the Pāñcarātra[1563] and Pāśupata śāstras are authoritative only so far as they are not opposed to the Vedas. This was the view of the Sūtasaṁhitā also, on which a commentary was composed by the famous Mādhavācārya.

In some Purāṇas the word Vāsudeva is not derived[1564] from Vasudeva (as the son of Vasudeva) but from the root 'vas' to dwell. 'Vāsudeva is so called because all beings dwell in the Highest Self and Vāsudeva dwells in beings as the soul of all'. Compare Gītā 9. 29 'I am alike to all beings; none is odious to me nor dear; but those who worship me with faith dwell in me and I too dwell in them'.

1562. भक्तिः। ...वासुदेवार्जुनाभ्यां वुन्। पा. IV. 3. 95 and 98 (वासुदेवः भक्तिः सेव्यः यस्य स वासुदेवकः).

1563. पञ्चरात्रपाशुपतादीन्यपि शास्त्राणि वेदाविरुद्धानि प्रमाणमेवेति पारिजातः। कृत्यरत्नाकर p. 37; तथा च योऽशो मार्गाणां वेदेन न विरुध्यते। सोंशः प्रमाणमित्युक्तं केषांचिदधिकारिणाम्। अत्यन्तगलितानां तु प्राणिनां वेदमार्गतः। सूतसंहिता IV. 4, 16–18.

1564. सर्वाणि तत्र भूतानि वसन्ति परमात्मनि। भूतेषु च स सर्वात्मा वासुदेवस्ततः स्मृतः॥ विष्णुपु० VI. 5. 80, ब्रह्मपु० 233. 68 (reads निवसन्ति परात्मनि). There is another verse 'भूतेषु वसते योन्तर्वसन्त्यत्र च तानि यत्। धाता विधाता जगतां वासुदेवस्ततः प्रभुः॥ विष्णुपु० VI. 5. 82, ब्रह्मपु० 233. 70 (but it says that this verse contains what Prajāpati declared to great sages). विष्णुपु० (I. 2. 12–13) states 'सर्वत्रासौ समस्तं च वसत्यत्रेति वै यतः। ततः स वासुदेवेति विद्वद्भिः परिपठ्यते॥.'

The word *bhagavat* calls for a brief notice. It was generally applied to Vāsudeva. The Viṣṇupurāṇa says 'The word *bhaga* is applied to the six qualities collectively viz. fulness of sway, manliness (or energy), glory, auspiciousness, knowledge and indifference to wordly objects. This noble word *bhagavān* applies to Vāsudeva who is the Highest Brahma and to no one else'.[1565] The Viṣṇupurāṇa[1566] further states that the word 'bhagavat' may be applied secondarily to others on the ground of possessing special qualities "that person may be called 'bhagavān', who knows about the creation and dissolution (of the world), about the origin and final destiny of beings, and knows what is *vidyā* and *avidyā* (nescience). Knowledge, strength power, sway, manliness, splendour—all these in their entirety, excluding the three guṇas (and their effects) that are to be avoided, are expressed by the word bhagavat". Bhāgavata is one who worships 'Bhagavat' (i. e. Vāsudeva). This is an ancient word. It occurs in the Besnagar column inscription (of the 2nd century B C.) of Heliodora, a Greek of Takṣaśilā and ambassador of Antalikita, who calls himself a bhāgavata (a devotee of Vāsudeva); vide above p. 516 n. 742 and 'Indo-Greeks' by Prof. A. K. Narain (1957), where at end he gives the full Besnagara Ins. of nine lines and its reading (Plate VI.). It appears that 'bhagavat' was rarely applied to Śiva also. The Śvetāśvatara Upaniṣad speaks[1567] of Śiva as 'bhagavān'. Patañjali in his bhāṣya on Pāṇini V. 2. 76 speaks of Śivabhāgavata.[1568] In the Ghosuṇḍī stone

1565. ऐश्वर्यस्य समग्रस्य वीर्यस्य यशसः श्रियः। ज्ञानवैराग्ययोश्चैव षण्णां भग इतीरणा॥ एवमेव महाञ्छब्दो मैत्रेय भगवानिति। परमब्रह्मभूतस्य वासुदेवस्य नान्यगः॥ विष्णुपु॰ VI. 5. 74 and 76. The वृद्धहारीतस्मृति VI. 164-165 has ऐश्वर्यं च तथा वीर्यं तेजः शक्तिरनुत्तमा। ज्ञानं बलं यदेतेषां षण्णां भग इतीरितः। एभिर्गुणैः प्रपूर्णो यः स एव भगवान् हरिः।, शङ्कराचार्य in भाष्य on ब्रह्मसूत्र II. 2. 44 remarks about the व्यूहs 'ईश्वरा एवैते सर्वे ज्ञानैश्वर्यशक्तिबलवीर्यतेजोभिरैश्वरैर्धर्मैरन्विता अभ्युपगम्यन्ते'. शङ्कराचार्य probably follows the विष्णुपुराण VI 5. 78-79.

1566. उत्पत्तिं प्रलयं चैव भूतानामागतिं गतिम्। वेत्ति विद्यामविद्यां च स वाच्यो भगवानिति॥ ज्ञानशक्तिबलैश्वर्यवीर्यतेजांस्यशेषतः। भगवच्छब्दवाच्यानि विना हेयैर्गुणादिभिः॥ विष्णुपु॰ VI. 5. 78-79; ब्रह्मपु॰ 233. 66-68.

1567. सर्वव्यापी स भगवान् तस्मात्सर्वगतः शिवः। श्वेताश्व॰ III. 11.

1568. अयःशूलदण्डाजिनाभ्यां ठक्ठञौ। पा. V. 2. 76; महाभाष्य 'किं पोऽयःशूलेनाभिच्छति स आयःशूलिकः। किं चातः। शिवभागवते प्रामोति। एवं तर्ह्युत्तरपदलोपोऽत्र द्रष्टव्यः। अयःशूलनिघायःशूलम्। यो सुकुनोपायेनाभ्येष्टव्यानर्थान् रभसेनाभिच्छति स उच्यते आयःशूलिकः'. शिवभागवत is to be explained as शिवो भगवान् भक्तिरस्य शिवभागवतः i. e. a devotee that carried with him a tridcht, which is a weapon of Śiva.

Inscription[1569] in Sanskrit (near Nagarī in the Chitorgaḍh District of Rajputana) there is a reference to both Saṅkarṣaṇa and Vāsudeva as *bhagavat* and it calls them Sarveśvara (about 200 B. C.), while the Besnagara inscription speaks of Vāsudeva alone and Heliodora calls himself bhāgavata. In some early records such as the Pīkira grant of Simhavarman (E. I. vol. VII. p. 161) and in Gupta Inscription No. 4 (at p. 27) Simhavarman and Candragupta (II) son of Samudragupta are called '*paramabhāgavata*'. Akrūra is styled mahābhāgavata in Brahmapurāṇa 190. 20; Padma VI. 280. 27 defines a Mahābhāgavata as noted below.[1570]

Three *mārgas* (paths) are spoken of in ancient works viz. karmamārga, bhaktimārga and jñānamārga. It is necessary to say here something about the path of *bhakti* and that of *jñāna*. Both these paths are deemed to lead to the same goal, viz. *mokṣa*. The mode of approach in the two is, however, different. In the path of knowledge (or *avyaktopāsanā*) it is not bare book knowledge of *brahman* as the Supreme Soul and as *nirguṇa* that will lead to mokṣa; for that purpose what is required is the *brāhmī-sthiti* (state of identifying oneself with *brahma*) mentioned in Gītā II. 72. This condition can be secured only by great efforts and long practice as described in Gītā II. 55 and the following verses. In the path of knowledge whatever actions the person concerned may do are *brahmārpaṇa*, as described in Gītā IV. 18–24. In the path of *bhakti* the bhakta resigns himself to God's grace and whatever he does he consigns to the God worshipped by him such as Vāsudeva (*saguṇa* and *vyakta*). Arjuna asks the Lord a question in Gītā XII. 1 'of the worshippers who thus constantly devoted meditate on you and those who (meditate) on the Unperceived and Indestructible, which

1569. Vide E. I. XVI pp. 25–27 and I A. vol. 61 pp. 203–205 for the Ghosuṇḍī Stone Inscription, where Saṅkarṣaṇa and Vāsudeva are both styled 'Bhagavat' and 'Sarveśvara'.

1570. तापादिपञ्चसंस्कारी नवेज्याकर्मकारकः। अर्थपञ्चकविद् विप्रो महाभागवतः स्मृतः॥ पद्म VI. 280. 27. For तापादि, vide note 1546 above. The nine modes of worship are स्मरण &c. quoted in note 1571. The five heads under which the doctrines of the रामानुज school are discussed are: (1) जीव, (2) ईश्वर, (3) उपाय (way to God), (4) फल or पुरुषार्थ (the goals of human life), (5) विरोधिनः (obstructions or obstacles to the attainment of God). There is a work called अर्थपञ्चक by नारायण, in which each of the above five heads is shown to have five sub-divisions Vide Dr. R. G. Bhandarkar's paper in Proceedings of the International Congress of Orientalists held at Vienna in 1886, Aryan section, pp. 101–110 for a summary of the work called अर्थपञ्चक.

best know devotion'. The reply given in XII. 2–7 is 'those who, being constantly devoted and possessed of the highest devotion, worship me with a mind fixed on me are regarded by me as the most devoted. But those who, restraining the group of the senses, and with a mind equable to all, meditate on the indescribable, indestructible, unperceived (Principle), which is all-pervading, inconceivable, unconcerned, immoveable, and constant, they, devoted to the good of all beings, certainly attain to me. In the case of those whose minds are attached to the unperceived (Principle or Spirit) the trouble is much greater, since the unperceived goal is attained by embodied beings with difficulty. In the case of those, however, who dedicating all their actions to me and regarding me as their highest goal worship me, meditating on me with a devotion towards none beside me and whose minds are placed on me, I, without delay, become their deliverer from the ocean of *saṁsāra* and death'. In chapter 9 the path of bhakti is spoken of in these terms 'it is the chief among vidyās (lores), chief among mysteries; it is the best means of sanctification; it can be directly apprehended, it is in accordance with dharma, imperishable and *easy to practise*'. According to the Gītā, therefore, the path of bhakti is easier than the path of knowledge.

The Bhāgavata says that *bhakti* is ninefold[1571] viz. hearing about Viṣṇu, repeating his name, remembering him, worshipping the feet (of the image of Viṣṇu), offering pūjā, bowing (or homage), treating oneself as the slave of Viṣṇu, treating Him as a friend and surrendering one's soul to Him. According[1572] to Nārada-bhakti-sūtra it is elevenfold (as noted below). It is

1571. श्रवणं कीर्तनं विष्णोः स्मरणं पादसेवनम् । अर्चनं वन्दनं दास्यं सख्यमात्मनिवेदनम् ॥ इति पुंसार्पिता विष्णौ भक्तिश्चेन्नवलक्षणा । क्रियते भगवत्यद्धा तन्मन्येऽधीतमुत्तमम् ॥ भागवत VII. 5. 23–24. प्रह्लाद says this to his father. स्मृतिकीर्त्योः कथाश्रद्धानौ मायश्चित्तभावात् । शाण्डिल्य 74; स्मरणकीर्तनकथानमस्कारादीनामार्तभक्तौ निवेशः । स्वमेध्यप्रमहापातकिनां त्वार्तौ । शाण्डिल्य 82; पतनहेतुपापरतानां च पुनरार्तिभक्तावेवाधिकारः प्रायश्चित्तवत् तत्पापक्षयस्य सर्वापेक्षयाभ्यर्हितत्वात् । ···तदपगमे तु सुतरामधिकारसिद्धिः । The भक्तिप्रकाश (part of वीरमित्रोदय) in pp. 30–128 explains these nine at great length. Even the तान्त्रिक writers took over these nine modes of bhakti e. g. the रुद्रयामल (27. 103–104) provides 'मननं कीर्तनं ध्यानं स्मरणं पादसेवनम् । अर्चनं··· निवेदनम् ॥ एतद्भक्तिप्रसादेन जीवन्मुक्तस्तु साधकः ।'.

1572. गुणमाहात्म्यासक्ति-रूपासक्ति-पूजासक्ति-स्मरणासक्ति-दास्यासक्ति-सख्यासक्ति-कान्तासक्ति-वात्सल्यासक्ति-आत्मनिवेदनासक्ति-तन्मयतासक्ति-परमविरहासक्तिरूपा एकधा अपि एकादशधा भवति । नारदभक्तिसूत्र 83. The बृहद्नारदीयस्मृति 81–83 gives slightly differing nine aspects of bhakti.

not to be supposed that all these nine methods have to be practised at the same time. A devotee practising any one of these, viz. remembering or reciting His name, may thereby become a true bhakta, and may win God's favour and secure liberation (Śāṇḍilyasūtra 73). The Gītā (VII. 16–17) states 'four classes of men, who are (all) fortunate, worship me viz. one who is in distress, the seeker after knowledge, one who seeks some desired object (or seeks wealth), one who is possessed of knowledge; of these he who is possessed of knowledge, who is always devoted and who worships One (Being) only is distinguished (above others), for to the man of knowledge I am extremely dear and he is dear to me'. Śāṇḍilya provides that the four aspects (out of nine) viz. remembering God, reciting His name, narrating stories about Him and bowing to Him (His image), find their place in the bhakti of those who are distressed, for these are said to be the means of expiation of sins, as the Viṣṇupurāṇa says (II. 6. 39) that remembering Kṛṣṇa is superior to all prāyaścittas. Śāṇḍilya further says that those guilty of mortal (grave) sins are only entitled to the bhakti of the distressed; but when their sins have been wiped off they would be entitled to the other forms of bhakti.

Gītā does not expressly enumerate all these nine modes of bhakti, but most of them can be gathered from various passages of the Gītā such as IX. 14, 26, 27 and from passages in other Purāṇas. For example, the Viṣṇupurāṇa[1573] says 'whatever be the expiatory rites, consisting of austerities, deeds of charity &c., to remember Kṛṣṇa is superior to them all' and 'that repetition of His name with bhakti is the best solvent of all sins, as fire is of metals'. In the Bhāgavata[1574] it is said 'whatever the devotee does by his body, speech, mind, organs of sense, by his intellect or by his soul or by the force of temperament that he follows—all that he should offer to Nārāyaṇa who is highest'. This is entirely in line with Gītā IX. 27 and may be called 'dāsya-bhakti'; while Arjuna's bhakti is '*sakhya-bhakti*', as Lord Kṛṣṇa himself speaks of him as 'my devotee and a friend' (Gītā

1573. प्रायश्चित्तान्यशेषाणि तपःकर्मात्मकानि वै । यानि तेषामशेषाणां कृष्णानुस्मरणं परम् ॥ विष्णुप० II. 6. 39 = पद्म VI. 72. 13; यत्नामकीर्तनं भक्त्या विलापनमहत्तमम् । मैत्रेयाशेषपापानां धातूनामिव पावकः ॥ विष्णुपु० q. by स्वमेश्वर on शाण्डिल्यभक्तिसूत्र 74.

1574. कायेन वाचा मनसेन्द्रियैर्वा बुद्ध्यात्मना वानुसृतस्वभावात् । करोति यद्यत्सकलं परस्मै नारायणायेति समर्पयेत्तत् ॥ भाग. XI. 2 36.

IV. 3). It appears that the Gītā regards the performance[1575] of the duties of his station in life by a *bhakta* as worship (*arcana* or *pūjā*) of God 'worshipping by the performance of one's duties (without an eye to the fruit or rewards of them) God from whom the world springs and by whom all this world is permeated, a man obtains perfection (and not only by offering flowers or by reciting the name of God).

This central doctrine of the Gītā of what is called 'niṣkāma-karma' was accepted by the Purāṇas. The Viṣṇu II. 3. 25 adopts it. The Agnipurāṇa in chapter 381 gives a summary of the Gītā in 58 verses which are mostly made up of passages from the Gītā. It winds up the summary with the verse quoted in note 1575 and emphasizes bhakti in the last verse.[1576] The Garuḍa-purāṇa summarises the Gītā in 28 verses (I. 237–238). The Padma (in VI. 171–188) contains the *māhātmya* of each of the 18 chapters of the Gītā interspersed with legends about the fruit of reading each Gītā chapter (1005 verses in all). A few further examples may be cited. The Kūrma says[1577] 'therefore even a man not possessed of (high) wisdom should perform all his duties (or actions) abandoning with all efforts the fruit (or reward) of actions; he obtains (high) abode after some time'; 'actions done after offering them to me do not tend to bind down the doer but tend to *mukti* (liberation)'. The Mārkaṇḍeya also refers to 'niskāma-karma'. The Bhāgavata-purāṇa provides 'a man performing (the rites) prescribed by the Veda but without attachment (not caring for the reward) and surrendering them to God secures freedom from the bondage of *karma* and the declaration of the reward (in the Veda) is only meant for stimulating effort.'

The doctrine of *advaita* in the Upaniṣads (such as in Īśā 16, Tai. Up. III. 4 and 8, Bṛ. Up. II. 4. 14, IV. 3. 30–31, IV. 5. 15) was for the wise. They offer very little to the ordinary man

1575. यतः प्रवृत्तिर्भूतानां येन सर्वमिदं ततम्। स्वकर्मणा तमभ्यर्च्य सिद्धिं विन्दति मानवः॥ गीता 18. 46.

1576. अतः प्रवृत्ति'''भ्यर्च्य विष्णुं सिद्धिं च विन्दति। कर्मणा मनसा वाचा सर्वावस्थासु सर्वदा। ब्रह्मादिस्तम्बपर्यन्तं जगद्विष्णुं च वेत्ति यः। सिद्धिमाप्नोति भगवद्भक्तो भागवतो ध्रुवम्॥ अग्निपु० 381. 56–58. कर्माण्यसङ्कल्पिततत्फलानि संन्यस्य विष्णौ परमात्मभूते। अवाप्य तां कर्महीमनन्ते तस्मिँल्लयं ये त्वमला प्रयान्ति। विष्णुपु० II. 3. 25.

1577. तस्मात्सर्वप्रयत्नेन त्यक्त्वा कर्माश्रितं फलम्। अविद्वानपि कुर्वीत कर्मानोति चिरात्परम्॥ कूर्म I. 3. 21; 'मय्यर्पितानि कर्माणि न बन्धाय विमुक्तये।' कूर्म II. 7. 28; न च बन्धाय तत्कर्म भवत्यनभिसन्धितम्। मार्क० 92. 15; वेदोक्तमेव कुर्वाणो निःसङ्गोऽर्पितमीश्वरे। नैष्कर्म्यां लभते सिद्धिं रोचनार्था फलश्रुतिः॥ भागवत XI. 3. 46.

about God or the ultimate destiny of man or the way to God and did not solve the common man's problems. The Gītā took up the problems of the common man; it shows to the lowliest of the lowly that there is hope for him, that the One and the True Being can enter into his life, if he consecrates all the daily duties and actions of his station in life to God and that salvation will come to every one if one has loving faith in God and surrenders himself entirely to his Grace. The Gītā proclaims (IX. 30–32) 'If even a man that has been very badly conducted worships me without worshipping any one else he should be regarded as a good man, since he has resolved upon the right course; he quickly becomes a righteous soul and reaches everlasting peace: O Arjuna! you may affirm that my devotee is never ruined. By taking refuge with me even those that are born in despised castes, also women, vaiśyas and śūdras reach the highest goal'. The Śāṇḍilya-bhakti-sūtra provides[1578] that all down to persons of the despised castes are entitled (to follow the path of bhakti) as they are capable of learning bhakti at second hand just as they can learn the common rules (of ahiṁsā, truthfulness &c.). The Purāṇas speak in the same strain as the Gītā and are sometimes even more explicit and emphatic. The Brahma-purāṇa paraphrases Gītā IX. 32 and proceeds 'my devotee even if he be a *cāṇḍāla* attains the desired beatitude, if he be endowed with the right faith; what need be said about others?' The Padma[1579] states 'A Pulkasa or even a śvāpaka and other persons belonging to Mleccha tribes become eminent and worthy of being honoured, if they are solely devoted to the worship of the feet of Hari'; 'Even a śvapāka is a Vaiṣṇava if on his lips there is the name of Hari, in whose heart there is Viṣṇu and in whose stomach goes food offered to Viṣṇu'. The Bhāgavata contains[1580]

1578. आनिन्द्ययोन्यधिक्रियते पारम्पर्यात् सामान्यवत्। शाण्डिल्यसूत्र 78.

1579. पुल्कसः श्वपचो वापि ये चान्ये म्लेच्छजातयः। तेऽपि वन्द्या महाभागा हरिपादैकसेवकाः॥ पद्म I. 5. 10. येषां मुखे हरेर्नाम हृदि विष्णुः सनातनः। उदरे विष्णुनैवेद्यं स श्वपाकोऽपि वैष्णवः॥ पद्म IV. 10. 66.

1580. किरातहूणान्ध्रपुलिन्दपुल्कसा आभीरकङ्का यवनाः खसादयः। येऽन्ये च पापा यदुपाश्रयाश्रयाः शुध्यन्ति तस्मै प्रभविष्णवे नमः॥ भागवत II. 4. 18; विश्वामित्र pronounced a curse on his 50 elder sons, who did not consent to accepting Śunaḥśepa adopted as a son by Viśvāmitra as their eldest brother, that their progeny would be Andhras, be reduced to the status of the lowest class and they would be Śabaras &c. and mostly *dasyus* as follows: 'तानब्रुव्याज्जहारान्ध्रान्मजा भक्षीष्टेति। त एतेऽन्ध्राः पुण्ड्राः शबराः पुलिन्दा मूतिबा इत्युदन्त्या बहवो भवन्ति वैश्वामित्रा दस्यूनां भूयिष्ठाः। ऐ. ब्रा. VII. 18 (chap. 33. 6). In E. I. VIII p. 88 there is an Inscription of the 9th year of king Īśvarasena, an Ābhīra, son of Śivadatta, an ābhīra, in the Nasik caves (No. 15 plate VII).

the following remarkable statement: 'Homage to that Supreme Lord, by resorting to whom as refuge Kirātas[1581] (mountain-dwellers like Bhils), the Hūṇas, Andhras, Pulindas, Pulkasas, Ābhīras, Kaṅkas, Yavanas, Khasas and the like and other degraded men are purified.' These sentiments were not mere platitudes, but had been very largely acted upon. Even in the medieval ages in India we have women saints like Mirābai and Āṇḍāḷ (in South India), untouchables as saints like Nanda, Cokhāmeḷā (in Mahārāṣṭra), Rai Das (a *chāmār* disciple of Rāmānanda), sinners like Ajāmila honoured as saints. Saints like Kabir[1582] (a Moslem weaver) and Tukārām had probably not much book learning, but their hymns are recited by Hindus including orthodox brāhmaṇas.

The invasions and gradual conquest of India by Moslem invaders from the Northwest threw down a challenge to Hindus from 11th century A.D. onwards. It was met in various ways. The first was the composition of comprehensive digests of smṛtis of which the earliest extant one is the Kṛtyakalpataru of *Lakṣmīdhara* (about 1110–1130 A.D.) in the North and Hemādri in the Deccan (third quarter of 13th century). The second and the most important way was on the spiritual front. From the 13th to the 17th century there was a great revival of spirituality on an unprecedented scale which produced saints and mystics in all parts of India such as Jñāneśvara, Nāmadeva, Rāmānanda, Kabir,[1582] Caitanya,

1581. Pulkasas and Śvapākas were degraded and untouchable castes. Vide H. of Dh. vol. II pp. 88-89 for Pulkasa and p. 97 for Śvapāka (lit. who subsists on dog-meat). Pulkasa occurs in Vāj. S. 30. 17. Kirātas are assigned to caves in Vāj. S. 30. 16. The Ābhīras are described as dasyus and mlecchas in Mausala-parva 7. 46–63, they are said to have attacked Arjuna in Pañcanada when he was taking women with him after Kṛṣṇa's passing away and to have carried away Vṛṣṇi women (Mausala 8. 16–17). Vide also the same account in Viṣṇupurāṇa V. 38. 12–28. Matsya 273. 18 speaks of ten Ābhīra kings. The Khasa tribe had the custom of a brother marrying his deceased brother's widow. Vide H. of Dh. vol. III. p. 861 n. 1671.

1582. Vide G. H. Westcott on 'Kabir and Kabir-panth' (Cawnpore, 1907) and 'Kabir and his followers' by F. E. Keay (1931). Kabir's teaching was an amalgam of both Hindu and Moslem ideas. He preached a doctrine of theism that did not tolerate polytheism, incarnations and idols. Kabir is said to have been a disciple of Rāmānanda (who lived about 1400–1470 A. D.), an ascetic who preached at Benares that God should be worshiped under the name of Rāma. Kabir held to the doctrines of Karma and Transmigration. He believed in the unity of God, but makes use of many names such as Rāma, Khudā, Allāh, Śakti in speaking of Him.

Dadu (in Rajasthan), Nānak, Vallabhācārya, Ekanātha, Tukārām, Rāmadāsa (and many others of lesser fame) who all agreed on fundamentals viz. unity of God, the need of self-purification, condemnation of the pride of caste and of formalities of worship, and surrender to the Deity for salvation. The third was the creation of such independent kingdoms as that of Vijayanagara (1330–1565 A. D.), of Mahārāṣṭra (under Shivaji and the Peshwas) and of the Sikhs in Punjab. This last cannot be dealt with way in this work. The doctrine of bhakti had a great appeal to all sections of the Hindu community and its propagation by the Purāṇas went a long away in weaning away Hindus from Buddhism. Not only so, Mahāyāna Buddhism took over the doctrine of bhakti and works like the 'Questions of Milinda' and the Saddharmapuṇḍarīka[1583] contain passages which agree closely with the Gītā. The Gītā exhibits a wonderful spirit of tolerance and accommodation, not found in the scriptures of other religions which were founded by great prophets. It says[1584] 'even those, who are devotees of other deities and worship them with faith, (indirectly) worship me only but with a non-śāstric (or irregular) procedure.' The Bhāgavata-purāṇa elaborates the same idea; 'O Adorable One! others worship you alone in the form of Śiva while following the path promulgated by Śiva and propounded in different ways by several *ācāryas*, all worship you who are Lord and who comprehend in yourself all gods; those also who are devotees of other deities and appear to have different ideas do in the end reach you, just as all rivers rising in mountains and flooded by rains enter the ocean from all sides'. The Śāntiparva[1585] also contains a similar idea 'Those who worship Brahmā, Śiva or other deities and whose conduct (or practice) is intelligent will (ultimately) come to me, who am the Highest'. This doctrine has its germs in the Ṛgveda[1586]

1583. Vide H. Kern's Introduction to the translation of the Saddharmapuṇḍarīka in SBE. vol. 21, pp. XXVI–XXVIII and XXIX n. 2, XXXI n. 1, XXXI n. 2.

1584. येऽप्यन्यदेवताभक्ता यजन्ते श्रद्धयान्विताः। तेऽपि मामेव कौन्तेय यजन्त्यविधिपूर्वकम्॥ गीता IX. 23; त्वामेवान्ये शिवोक्तेन मार्गेण शिवरूपिणम्। ब्रह्माचार्यविभेदेन भगवन्समुपासते॥ सर्व एव यजन्ति त्वां सर्वदेवमयेश्वरम्। येऽप्यन्यदेवताभक्ता यद्यप्यन्यधियः प्रभो॥ यथाद्रिप्रभवा नद्यः पर्जन्यापूरिताः प्रभो। विशन्ति सर्वतः सिन्धुं तद्वत्त्वां गतयोऽन्ततः॥ भागवत X. 40. 8–10.

1585. ब्रह्माणं शितिकण्ठं च याश्चान्या देवताः स्मृताः। प्रयुञ्जन्त्यर्चयः सेवन्तो मामेवैष्यन्ति यत्परम्॥ शान्ति 341. 36.

1586. एकं सद्विप्रा बहुधा वदन्त्यग्निं यमं मातरिश्वानमाहुः॥ ऋ. I. 164. 46.

itself where it is said 'the One Reality the sages speak of under various names; they call it Agni, Yama, Mātariśvan (wind-god)'. This work cannot afford, for reasons of space, to go into the several bhakti schools such as those of Rāmānuja, Madhva (who postulated five eternal *bhedas*), Caitanya and Vallabha (that gave rise to an erotico-mystical brand of bhakti) and others.

In their zeal for the spread of the cult of bhakti the Purāṇas are sometimes guilty of gross exaggeration. The Brahma-purāṇa[1587] says 'men even after having committed many sins under the influence of error (or delusion), do not go to Hell, if they worship Hari who removes all sins; those men also who always remember Janārdana, though they may be guilty of roguery, reach, after they die, the happy world of Viṣṇu. Even a man who is habituated to flying into extreme rage, if he recites the name of Hari, has his faults destroyed and attains *mukti* (liberation) as the king of Cedi country did'. The Vāmana-purāṇa[1588] observes "what has that person got to do with many *mantras* (i. e. he has no use for those), who is a bhakta of Viṣṇu? The mantra 'namo Nārāyaṇāya' is able to accomplish all objects. Success is for those who have bhakti for Viṣṇu; how can there be failure for them in whose heart is enthroned Janārdana dark like a blue lotus?" The Vāmana and Padma Purāṇas say that a man secures the same results by repeating the names of Viṣṇu that he would secure by visiting all the tīrthas (sacred places) and holy shrines[1589] in the world.

Many Purāṇas, particularly the Viṣṇu and the Bhāgavata, are replete with the eulogies, the theory and practice of *bhakti*

1587. कृत्वापि बहुशः पापं नरा मोहसमन्विताः। न यान्ति नरकं नत्वा सर्वपापहरं हरिम्॥ ज्ञात्वेनापि नरा नित्यं ये स्मरन्ति जनार्दनम्। तेपि यान्ति तनुं त्यक्त्वा विष्णुलोकमनामयम्॥ अत्यन्तक्रोधसक्तोऽपि कदाचित्कीर्तयेद्धरिम्। सोपि दोषक्षयान्मुक्तिं लभेच्चेदिपतिर्यथा॥ ब्रह्म 216. 87–89. चेदिपति appears to refer to शिशुपाल, whose story occurs in सभापर्व chapters 43–45. He was the sister's son of Kṛṣṇa who had promised to forgive 100 *aparādhas* of his and at last killed him at the Rājasūya sacrifice of Yudhiṣṭhira. The story of शिशुपाल also occurs in विष्णु॰ IV. 15. 1–17 and it is said that शिशुपाल always took the name of Kṛṣṇa and always thought of him though as an enemy, and therefore he ultimately reached the Lord 'अयं हि भगवान् कीर्तितश्च संस्मृतश्च द्वेषानुबन्धेनापि अखिलसुरासुरादिदुर्लभं फलं प्रयच्छति किमुत सम्यग्भक्तिमतामपीति।' 17.

1588. किं तस्य बहुभिर्मन्त्रैर्भक्तिर्यस्य जनार्दने। नमो नारायणायेति मन्त्रः सर्वार्थ-साधकः॥ विष्णुर्येषां जयस्तेषां कुतस्तेषां पराजयः। येषामिन्दीवरश्यामो हृदयस्थो जनार्दनः॥ वामन 94. 58–59. For the first verse, vide also नरसिंहपु॰ 63. 6.

1589. पृथिव्यां यानि तीर्थानि पुण्यान्यायतनानि च। तानि सर्वाण्यवाप्नोति विष्णोर्नामानु-कीर्तनात्॥ वामन 94. 63, पद्म VI. 245. 85.

and illustrative stories about it. For reasons of space it is not possible to go into this matter at any length. A few noteworthy points alone will be touched. A few verses eulogising the Bhāgavatapurāṇa may be cited as samples of extreme exaggeration. 'Thousands[1590] of Aśvamedhas and hundreds of Vājapeya sacrifices are not equal to even the 16th part of the story narrated by Śuka; he who always recites a half or a quarter verse of the Bhāgavata secures the merit of Rājasūya and Aśvamedha; he who listens to the words of the śāstra of Śuka (i.e. Bhāgavata) at the time of death, Govinda being pleased with him confers on him Vaikuṇṭha; this is a good expiation for all sinners viz. uttering the name of Viṣṇu, since (at that time) their mind has Viṣṇu as the only object of thought'.[1591] Another point is the story of Ajāmila in the Bhāgavata (VI. 1. 20 ff and VI. 2), Padma (I. 31. 109 and VI. 87. 7) and other Purāṇas. Ajāmila[1592] (who abandoned his brāhmaṇa wife and kept a mistress) was a moral wreck addicted to gambling and thieving. When on his deathbed at the age of 80 he loudly called upon his youngest son named Nārāyaṇa (out of ten sons born of the mistress) with affection and recited that name and thought of that alone, he became free from his sins and attained a high position difficult to attain'. Such stories have given rise to the common belief that the last thought at one's death leads to a new birth appropriate to that thought (*ante matiḥ sā gatiḥ*). The Upaniṣads contain the germ of the idea of the last thought; vide. Chān. Up. III. 14. 1, VIII. 2. 10, Bṛ. Up. IV. 4. 5. In the 'Questions of Milinda' (SBE vol. 35 pp. 123–124) this idea of the importance of the last thought is taken up. It may be that a single heart-felt invocation of the name of God, a single act of faith after

1590. अश्वमेधसहस्राणि वाजपेयशतानि च। शुकशास्त्रकथायाश्च कलां नार्हन्ति षोडशीम्॥ श्लोकार्धं श्लोकपादं वा पठेद्भागवतं च यः। नित्यं पुण्यमवाप्नोति राजसूयाश्वमेधयोः॥ अन्तकाले तु येनैव श्रूयते शुकशास्त्रवाक्। प्रीत्या तस्यैव वैकुण्ठं गोविन्दोपि प्रयच्छति॥ पद्म VI. 191. 32, 39, 41.

1591. The Padmapurāṇa (VI. 189–194, 518 verses) contains a lengthy eulogy of the Bhāgavata-purāṇa and of listening to its recitation for seven days (*saptāha*) &c.

1592. कान्यकुब्जे द्विजः कश्चिद् दासीपतिरजामिलः। नाम्ना नष्टसदाचारो दास्याः संसर्गदूषितः॥ चन्द्रक्षकैतवैश्चौर्यैर्गर्हितां वृत्तिमाश्रितः। भागवत VI. 1. 21–22; म्रियमाणो हरेर्नाम गृणन् पुत्रोपचारितम्। अजामिलोप्यगाद्धाम किं पुनः श्रद्धया गृणन्॥ भागवत VI. 2. 49; सर्वेषामप्यघवतामिदमेव सुनिष्कृतम्। नामव्याहरणं विष्णोर्यतस्तद्विषया मतिः॥ भागवत VI. 2. 10; म्रियमाणः सुतस्नेहात्प्रोच्य नारायणेति च। तद्ध्याननाममाहात्म्यात्पदं लेभे सुदुर्लभम्॥ पद्म IV. 87. 7; विक्रीय पुत्रमघवान्यदजामिलोपि नारायणेति म्रियमाण इयाय मुक्तिम्॥ पद्म I. 31. 109.

repentance and complete surrender to God's will, cancels the result of a whole life of crime and sin. This is the moral of Ajāmila's story, but it is liable to be grossly misapprehended and might create a complacent belief that a man may commit as many sins in his life as possible, but if he remembers God at his death and repeats His name then, all sins of his are cleared away and wiped out. This is a rather dangerous doctrine. The Gītā (VIII. 5–7) puts the matter in a clear light. 'That person, who remembers me at the time of death and passes from the world leaving the body, attains my essence, there is no doubt about that. Whatever form a man remembers when he leaves the body, to that he goes, *because he was always engrossed in that form.* Therefore remember me at all times and engage in battle; there is no doubt that having fixed your mind and intellect on me you will attain to me'. This passage of the Gītā suggests that a person will remember the name of God at the time of his death only if he had been so doing all his life, while engaged in actively performing all his duties and not caring for the rewards thereof and that it is extremely rare or almost impossible for a man to remember God at the last moment when throughout his life he had been ungodly and a great sinner. The above idea is again emphasized in verses 10–13 of chap. VIII (of the Gītā) and in chap. XIII. 3 (yo yac-chraddhaḥ sa eva saḥ).

In spite of the doctrine that God is one[1593] and the doctrine that whatever form of the deity one may worship, the worship reaches the Supreme Being, Vaiṣṇavas and Śaivas have been wrangling and abusing one another. For example, the Varāha-

---

1593. The proposition that God is only one, that He is worshipped under various perceptible forms for concentrating the mind on Him, worship or contemplation of a formless object being difficult, are doctrines taught in the Purāṇas in spite of the fact that they preach worship of Viṣṇu, Kṛṣṇa, Śiva, Devī and others. Vide H. of Dh. vol. II pp. 714–715 and pp. 118–119 above. The विष्णुधर्मोत्तर I. 65. 32 states: साकारे चञ्चलक्षस्तु शून्यं शक्नोति चिन्तितुम् । अन्यथा तु सुकष्टं स्यान्निरालम्बस्य चिन्तनम् ॥; vide also विष्णुधर्मोत्तर III. 108. 23 ff, particularly the verse आदौ कृत्वा महाभागे साकारे लक्षबन्धनम् । ततः समर्थो भवति शून्ये ध्याने नरोत्तम ॥ 26. Indian theologians and philosophers deliberately spared lower forms of worship with the thought that it was better to begin at a lower rung of the ladder to the highest goal than not to have a footing at all. A well-known verse is: अग्नौ क्रियावतां देवो दिवि देवो मनीषिणाम् । प्रतिमास्वल्पबुद्धीनां योगिनां हृदये हरिः ॥ नृसिंहपुराण 62. 5 q. by अपरार्क on p. 140.

purāṇa makes Rudra declare the supremacy of Viṣṇu (chap. 70. 14 Nārāyāṇaḥ paro devaḥ), denounce Śaiva-siddhāntas that are outside the pale of the Vedas and put forward the outstanding view 'that such non-Vedic views were promulgated by Śiva himself at the request of Viṣṇu in order to delude people'.[1594] Some Purāṇas started by saying that the Bauddhas and Jainas[1595] were asuras and enemies of gods that were purposely deluded by god. For example, the Matsya (24. 43–49) says that the sons of Raji deprived Indra of his kingdom and share in sacrifices, that Bṛhaspati, at Indra's request, deluded the sons of Raji by composing a treatise of Jina-dharma which was opposed to the Veda and then Indra killed them. Vāyu 96. 230–32, Matsya 47. 11–12, Bhāgavata I. 3. 24 appear to suggest that Viṣṇu himself deluded the people. The Agni (16. 1–4) also says with reference to the Bauddhas that Viṣṇu deluded them. The Viṣṇu-purāṇa[1596] (III. 17–18) narrates that when the gods were

---

1594. त्वं च रुद्र महाबाहो मोहशास्त्राणि कारय। अल्पायासं दर्शयित्वा मोहयाशु महेश्वरः (र?)॥ वराह 70. 36; this verse and several more are quoted from वराह by अपरार्क p. 1052; ये वेदमार्गनिर्मुक्तास्तेषां मोहार्थमेव च। नयसिद्धान्तसंज्ञाभिर्मया शास्त्रं तु दर्शितम्॥ वराह 70. 41; त्वं हि रुद्र महाबाहो मोहनार्थे सुरद्विषाम्। पाखण्डाचरणं धर्मं कुरुष्व च महामते॥ तामसानि पुराणानि कथयात्र च तान् प्रति। मोहनानि च शास्त्राणि कुरुष्व च महामते॥ पद्म VI. 263. 24–25; तथा पाशुपतं शास्त्रं त्वमेव कुरु सुव्रत। कङ्कालशैवपाषण्ड-महाशैवादिभेदतः। अवलक्ष्य मतं सम्यग्वेदबाह्यं द्विजाधमाः। भस्मास्थिधारिणः सर्वे भविष्यन्ति न संशयः॥ पद्म VI. 263. 32–33. कङ्कालशैवs are the कापालिकs. Compare similar passages in Kūrma I. 12. 261-62; Devībhāgavata VII. 39. 26–31 (अन्यानि-पानि शास्त्राणि लोकेस्मिन् विविधानि च॥ श्रुतिस्मृतिविरुद्धानि तामसान्येव सर्वशः। वामकापालकं चैव कौलकं भैरवागमः॥ शिवेन मोहनार्थाय प्रणीतो नान्यहेतुकः। ...शैवाश्च वैष्णवाश्चैव सौराः शाक्तास्तथैव च। गाणपत्या आगमाश्च प्रणीता शङ्करेण तु॥ तत्र वेदाविरुद्धोंशोप्युक्त एव क्वचित् क्वचित्। वैदिकैस्तद्ग्रहे दोषो न भवत्येव कर्हिचित्॥).

1595. दिग्वाससामयं धर्मो धर्मोयं बहुवाससाम्। इत्यनेकान्तवादं च मायामोहेन नैकधा॥ तेन दर्शयता दैत्याः स्वधर्मे त्याजिता द्विज॥ विष्णुपु० III. 18. 11–12. This is an obvious reference to the Jain doctrine of सप्तभङ्गीनय.

1596. स्वल्पेनैव हि कालेन मायामोहेन तेऽसुराः। मोहितास्तत्यजुः सर्वा त्रयीमार्गाश्रितां कथाम्॥ केचिद्विनिन्दां वेदानां देवानामपरे द्विज। यज्ञकर्मकलापस्य तथान्ये च द्विजन्मनाम्॥ नैतद्युक्तिसहं वाक्यं हिंसा धर्माय चेष्यते। हवींष्यनलदग्धानि फलायेत्यर्भकोदितम्। यज्ञे-ष्वनेकैर्देवत्वमवाप्येन्द्रेण भुज्यते। शम्यादि यदि चेत्काष्ठं तद्वरं पत्रभुक् पशुः। निहतस्य पशोर्यज्ञे स्वर्गप्राप्तिर्यदीष्यते। स्वपिता यजमानेन किन्नु तस्मान्न हन्यते। तृप्तये जायते पुंसो भुक्तमन्येन चेत्ततः। कुर्याच्छ्राद्धं श्रमायासं न वहेयुः प्रवासिनः॥ विष्णुपु० III. 18. 24–29. Vide a similar narrative about Māyāmoha or Mahāmoha and his being naked, shaved, carrying peacock feathers &c. in पद्म V. 3. 346–390 (this last refers to 24 तीर्थंकरs). In the सर्वदर्शनसंग्रह (ed. by M. M. Vasudevashastri Abhyankar, 1924) under चार्वाकदर्शन certain verses are quoted from बृहस्पति which closely resemble the above, e. g. पशुश्चेन्निहतः स्वर्गं ज्योतिष्टोमे गमिष्यति। स्वपिता यजमानेन तत्र कस्मान्न हिंस्यते॥ p. 13. Vide पद्म V. 13. 370–374 for almost the same verses as in विष्णुपुराण.

defeated by the asuras (who also practised tapas and studied the Veda) they approached Viṣṇu and prayed to him to help them and to destroy the asuras and that then Viṣṇu produced from his body Māyā-moha (lit. who causes delusion by wiles) and made him over to the gods. Māyāmoha, who was naked, had shaved his head and held a bunch of peacock feathers in his hand, went to the asuras that were practising tapas on the banks of the Narmadā (III. 18. 1-2) and told them that if they followed his words they would secure *mukti*, led them away from the path of the Veda, taught them formulas of sceptical reasoning and weaned them away from their dharma. Then he approached other asuras and taught them that sacrificing animals was sinful, taught them nirvāṇa and the doctrines of *vijñānavāda*. Some of the passages are very striking 'In a short time the asuras were deluded by Māyāmoha and abandoned all concern with the path depending on the three Vedas. Some condemned the Vedas, some condemned the gods, while others condemned the body of sacrificial rites and brāhmaṇas. (They thought or said) The statement that killing an animal (in sacrifices) is desirable for the sake of Dharma (for accumulating merit) does not stand to reason; to say that offerings burnt by fire would conduce to reward (in the next world) is childish talk; (if it be said that) Indra attained the position of God by means of many sacrifices and enjoys the fuel-sticks of the śamī tree, then an animal (that subsists on leaves) is superior to Indra (who enjoys hard and thorny śamī *samidhs*). If it is desired (by the Veda) that the animal killed in a sacrifice attains heaven, then why does not the sacrificer kill his own father in a sacrifice (and send him to heaven)? If one (the son) performs śrāddha (with the thought) that what is eaten by one (brāhmaṇa diner at śrāddha) tends to give satisfaction to another (i. e. the deceased father of the offerer of śrāddha), then travellers would not carry food (on their backs) which causes weariness to them.' These are the arguments used by atheists (cārvākas). It is remarkable that even *tāntrik* works like the Kulārṇavatantra make Śiva say that he declared certain śāstras purely for deluding certain bad people who did not know the Kaula dharma.[1597]

From condemning the Jainas and Bauddhas some Purāṇas, entirely unmindful of what the Gītā declared (in note 1584),

1597. भ्रामिता हि मया देवि पशवः शास्त्रकोटिषु। कुलधर्मं न जानन्ति वृथा शास्त्राभिमानिनः॥ पशुशास्त्राणि सर्वाणि मयैव कथितानि हि। मूर्त्यर्थं तु गतेष्वेव मोहनाय दुरात्मनाम्॥ कुलार्णवतन्त्र II. 96-97 (ed. by Arthur Avalon).

proceeded so far as to say[1598] that a brāhmaṇa who is not a Vaiṣṇava is a heretic, that Viṣṇu himself assuming the form of Buddha proclaimed a false śāstra, and that all śāstras such as the Pāśupata, Vaiśeṣika of Kaṇāda, Nyāya of Gautama, Sāṅkhya of Kapila, Cārvāka of Bṛhaspati are *tāmasa*; that the *māyāvāda* (of Śaṅkara) is a false śāstra and is disguised Bauddha (doctrine) and the extensive śāstra (Pūrvamīmāṃsā) of Jaimini is condemned, since it made gods as of no use (in his system). The words of the Padma-purāṇa are; 'Listen O Goddess, while I declare to you in order the *tāmasa* śāstras, by merely remembering which even wise men become sinners. First of all I promulgated Śaiva śāstras such as the Pāśupata system; then the following were declared by brāhmaṇas that were possessed (or engrossed) by my *śakti* (power); viz. Kaṇāda proclaimed the great Vaiśeṣika system, the Nyāya and Sāṅkhya systems were declared respectively by Gautama and Kapila: the much despised Cārvāka doctrine was declared by Bṛhaspati, while Viṣṇu, assuming the form of Buddha, promulgated, for bringing about the destruction of *daityas*, the false doctrine of Bauddhas that go about naked or dressed in blue garments; I myself, O goddess, assuming the form of a brāhmaṇa declared in the Kali age the false śāstras of the doctrine of Māyā which is *bauddha* in disguise. The brāhmaṇa Jaimini composed the great system of Pūrvamīmāṃsa, which is unmeaning on account of its atheistic discourse'. Vijñāna-bhikṣu in his Sāṅkhya-pravacanabhāṣya (who flourished about 1550 A. D.) quotes eleven verses from the Padma VI. 263 and holds the peculiar view that no śāstra that is *āstika* (admits a soul) is unauthoritative nor is there any contradiction, each śāstra being of full force and true in its own sphere. The original Sāṅkhya sūtra, on which he comments, tries to establish the impossible thesis that the teachings of the Sāṅkhya are not in real or irreconcilable contradiction with the doctrine of all-pervading oneness of *brahma* or with the doctrine that *brahma* is bliss (*ānanda*) or the system of theism (i. e. a personal God). Sectarian exclusiveness and bigotry went so far that the Brahmāṇḍa[1599] contains a dialogue between sage Agastya and

---

1598. अवैष्णवस्तु यो विप्रः स पाषण्डः प्रकीर्तितः। पद्म VI. 262. 27. The बृद्ध-हारीतस्मृति also requires the zealous Vaiṣṇava not to pay homage to or worship another god nor to enter the temple of another god 'नान्यं देवं नमस्कुर्यान्नान्यं देवं समुजयेत्। नान्यप्रसादं भुञ्जीत नान्यदायतनं विशेत्॥ 8. 85-86.

1599. शृणु देवि प्रवक्ष्यामि तामसानि यथाक्रमम्। येषां स्मरणमात्रेण पातित्यं ज्ञानिनामपि॥ मयैव हि मया चोक्तं शैवं पाशुपतादिकम्। मच्छक्त्याविष्टचित्तैस्तैर्मोहनानि च ततः शृणु॥

(Continued on next page)

Rāma in which it is said that the 108 names of Kṛṣṇa (who is acknowledged by all to be an incarnation of Viṣṇu) are so potent that the merit secured by repeating thrice the 1008 names of Viṣṇu is secured by repeating only once one of the 108 names (of Kṛṣṇa).[1600]

The Viṣṇu and Padma do not stand alone in this strange story of Viṣṇu himself or through Rudra teaching false doctrines for deluding the ungodly or those that dissented from or reviled the Vedas. There were other Purāṇas that sing the same tune; for example, the Kūrma-purāṇa indulges in a *vendetta* against many śāstras and systems in several places. A few passages are set out here. (Devī says) ' the various[1601] śāstras that are found in this world and are opposed to the Vedas and smṛtis are based on *tamas* (ignorance), viz. Kāpāla, Bhairava, Yāmala (a class of Tantra works), Vāma (left-hand practices of a class of Tantras), Arhata (Jain doctrines), these and others are meant for deluding (persons); I produced these śāstras in another birth for deluding people '; ' therefore in order to protect (people) against those who were beyond the pale of the Vedas and for the destruction of sinners we shall, O Śiva, compose śāstras for deluding them; Rudra being thus advised by Mādhava (Viṣṇu) composed śāstras that delude and Viṣṇu also urged on by Rudra did the same;

(*Continued from last page*)

कणादेन तु संप्रोक्तं शास्त्रं वैशेषिकं महत्। गौतमेन तथा न्यायं सांख्यं तु कपिलेन वै॥ धिषणेन तथा प्रोक्तं चार्वाकमतिगर्हितम्। दैत्यानां नाशनार्थाय विष्णुना बुद्धरूपिणा। बौद्धशास्त्रमसत्प्रोक्तं नग्ननीलपटादिकम्। मायावादमसच्छास्त्रं प्रच्छन्नं बौद्धमुच्यते। मयैव कथितं देवि कलौ ब्राह्मणरूपिणा। ...द्विजन्मना जैमिनिना पूर्वं चेदमपार्थकम्। निरीश्वरेण वादेन कृतं शास्त्रं महत्तरम्॥ पद्म VI. 263. 67–71 and 75–76, quoted by विज्ञानभिक्षु in सांख्यप्रवचनभाष्य pp. 6–7 (B. I. edition).

1600. शृणु देवि प्रवक्ष्यामि नाम्नामष्टोत्तरं शतम्। सहस्रनाम्नां पुण्यानां त्रिरावृत्त्या तु यत्फलम्। एकावृत्त्या तु कृष्णस्य नामैकं तत्प्रयच्छति। तस्मात्पुण्यतरं चैतत् स्तोत्रं पातकनाशनम्॥ ब्रह्माण्ड III. 36. 18–20. Verses 21–41 set out the 108 names of Kṛṣṇa. The one thousand and eight names of Viṣṇu are set out in Mahābhārata, Anuśāsanaparva 149. 14–120 and the Garuḍa-purāṇa (I. 15. 1–160) contains names of विष्णु, but often different from those in अनुशासन.

1601. यानि शास्त्राणि दृश्यन्ते लोकेऽस्मिन्विविधानि तु। श्रुतिस्मृतिविरुद्धानि निष्ठा तेषां हि तामसी॥ कापालं भैरवं चैव यामलं वाममार्हतम्। एवंविधानि चान्यानि मोहनार्थानि तानि तु॥ मया सृष्टानि शास्त्राणि मोहायैषां भवान्तरे॥ कूर्म I. 12. 261–263; vide also कूर्म I. 16 17–19 and 24–26 where कापाल, नाकुल, वाम, भैरव, पञ्चरात्र and पाशुपत are mentioned as produced for the same purpose. The ताराभक्तिसुधार्णव (6th तरङ्ग) p. 272 quotes the कूर्मपुराण passage and remarks that those passages are meant only for praising the Veda and are not to be understood as conveying that *Tāntrik āgamas* are unauthoritative.

(they produced the śāstras) called Kāpāla, Nākula,[1602] Vāma, Bhairava (early and later), Pāñcarātra, Pāśupata and thousands of others; Śaṅkara came down to the earth, wearing garlands of skull-bones and covered with ashes from a cemetery and wearing profuse matted pair, trying to delude this world and engaged in begging for the benefit of these'; 'One should[1603] not honour even by words *Pañcarātra* and *Pāśupata* people that are heretics, following prohibited avocations and those who follow left-hand *śākta* practices; when Buddhist mendicants, Nirgranthas, those who study the Pañcarātra doctrines, Kāpālikas, Pāśupatas and other similar heretics, being bad and deluded, eat the śrāddha food (meant for a deceased person) that śrāddha would be of no use in this world and the next.' For details of some of the heretical sects, vide 'Heretical sects in the Purāṇas' by Śrī Radhakrishna Choudhary in ABORI vol 37 (1956) pp. 234–257.

The Gītā (in chapter 16) speaks of two classes of people, viz. those born to godlike endowments and those born with demoniac qualities and describes the latter in verses 7–20. Some of the verses probably indicate that the reference is to atheists and the like; for verse 8 states 'they say that the world is devoid of truth

---

1602. Nākula stands for what is Lakulīśa-pāśupata-darśana in the Sarvadarśanasaṅgraha. The Liṅgapurāṇa (24. 124–133) dilates upon Lakulī. The Vāyupurāṇa (chap. 23. 221–224) mentions in a prophetic vein Nakulī (Lakulī) as the founder of a Śaiva sect and Kāyārohaṇa (modern Karavan in Dabhoi Taluka of former Baroda State) as its sacred place (siddha-kṣetra). The Mathurā Ins. of Candragupta II dated in Gupta era 61 (380 A. D.) in E. I. vol. XXI pp. 1 ff shows that Lakulī, the founder of the Pāśupata sect, flourished about the first century A. D. Vide Dr. R. G. Bhandarkar's 'Vaiṣṇavism, Śaivism' &c. p 166 (in collected works) and the paper 'Antiquities in Kārvan with reference to Lakulīśa worship' in Journal of Bom. Uni. vol. 18 part 4 pp. 43–67 by Mr. M. R. Majmudar and Pāśupata-sūtra of Nakulīśa in T. S. S.; E. I. vol. XXI pp. 1–9, JBBRAS vol. XXII pp. 151–167 (both by D. R. Bhandarkar), IHQ. vol. 19 (1943) pp. 270–271 for the origin and history of the Lakulīśa sect.

1603. पाखण्डिनो विकर्मस्थान्वामाचारांस्तथैव च। पञ्चरात्रान् पाशुपतान् वाङ्मात्रेणापि नार्चयेत्॥ कूर्म II. 16. 15; वृद्धश्रावकनिर्ग्रन्थाः पञ्चरात्रविदो जनाः। कापालिकाः पाशुपताः पाषण्डा ये च तद्विधाः॥ यस्याश्नन्ति हवींष्येते दुरात्मानस्तु तामसाः। न तस्य तद्भवेच्छ्राद्धं प्रेत्य चेह फलप्रदम्॥ कूर्म II. 21. 32–33. The verse 'बौद्धश्रावक ···तद्विधाः is q. by हे. on श्राद्ध p. 365 from कूर्मपुराण and on p. 476 हे. quotes both the verses from कूर्म and reads वृद्धश्रावक०. The निर्ग्रन्थs were naked Jaina monks (vide SBE. vol. 21 p. 263 and E. I. vol. 20 p. 59) where a Jain teacher is called Nigrantha Śramaṇācārya in Gupta year 159 i.e. (478–79 A. D.). The words are: 'पञ्चस्तूप-निकायिक-निग्रन्थ-श्रमणाचार्य-गुहनन्दिशिष्यप्रशिष्याधिष्ठितविहारे.'

(i. e. contains nothing that one can believe), devoid of any fixed principle (such as virtue and vice), devoid of a Ruler, and is produced by union brought about by lust and nothing else'. After describing their thoughts and aspirations the Gītā winds up 'these perform sacrifices which are so in name only with hypocrisy and against the prescribed procedure; they hate me in their own bodies and in those of others; these impure and cruel enemies I continually throw down in demoniac wombs; coming into demoniac wombs and being deluded, in each birth they go to vilest states without ever coming to me'. This is entirely different from what the Padma and other Purāṇas say about Pāśupatas, Pāñcarātras and about non-Vaiṣṇavas.

Both the Bhāgavata and the Padma say that[1604] (the cult of) bhakti first arose in Dravida country, it progressed or prospered in the Karṇāṭaka, it was found in only a few places in Mahārāṣṭra and declined in the Gurjara country; it was, on account of the terrible Kaliyuga, broken up by heresies and remained weak for a long time; but having reached Vṛndāvana (near Mathurā) it got a fresh start and assumed fine form. In book XI. the Bhāgavata again reverts to this assertion that in Kali people are solely devoted to Nārāyaṇa only in a few places but to the greatest extent in the Dravida country where flow the rivers Tāmraparṇī, Kṛtamālā, Kāverī and Mahānadī flowing to the west and states that those who drink the waters of these rivers are generally devotees of Vāsudeva.

Most great moral and spiritual upheavals have a tendency to reach a very low level in course of time. That appears to have happened in the case of bhāgavatas. The Atri-smṛti has a verse containing a sarcastic reference to bhāgavatas[1605]: 'Those who are devoid of Vedic studies learn śāstras (such as grammar, vedānta, logic &c.), those who are wanting in śāstric lore become readers of Purāṇas for others; those who cannot be readers of Purāṇas become tillers; but those who are broken down even

1604. उत्पन्ना द्राविडे साहं वृद्धिं कर्णाटके गता । क्वचित् क्वचिन्महाराष्ट्रे गुर्जरे जीर्णतां गता ॥ तत्र घोरकलेर्योगात् पाखण्डैः खण्डिताङ्गका । दुर्बलाहं चिरं जाता पुत्राभ्यां सह मन्दताम् ॥ वृन्दावनं पुनः प्राप्य नवीनेव सुरूपिणी । भागवत I. 1. 48–50, पद्म VI. 189. 54–56. The पद्म VI. 189 speaks of the भागवत as the highest among Purāṇas: 'कलौ खलु भविष्यन्ति नारायणपरायणाः ॥ क्वचित् क्वचिन्महाराज द्राविडेषु च भूरिशः । ताम्रपर्णी नदी यत्र कृतमाला पयस्विनी । कावेरी च महापुण्या प्रतीची च महानदी । ये पिबन्ति जलं तासां मनुजा मनुजेश्वर । प्रायो भक्ता भगवति वासुदेवेऽमलाशयाः ॥ भागवत XI 5. 38–40

1605. वेदैर्विहीनाश्च पठन्ति शास्त्रं शास्त्रेण हीनाश्च पुराणपाठाः । पुराणहीना कृषिणो भवन्ति भ्रष्टास्ततो भागवता भवन्ति ॥ अत्रिसंहिता verse 384.

there, become bhāgavatas'. Atri appears to say that bhāgavatas are idlers, who do not study Veda or śāstra or who cannot even read Purāṇas to others for their livelihood or do not engage in agriculture and who pretend to be worshippers (or *bhaktas*) of Viṣṇu or Kṛṣṇa and fatten on what is given by others that are deluded into thinking that they have forsaken everything for the sake of their love of God. They become what are called 'buwās' in Marāṭhi and other modern Indian languages.

Another striking development of the bhakti cult is the Erotic Mysticism (*madhurā bhakti*) associated with the worship of Kṛṣṇa and of Rādhā in that form of Vaiṣṇavism established by Caitanya and Vallabhācārya. For the Vaiṣṇava movement inspired by Caitanya, vide Dr. S. K. De's work on 'the Vaiṣṇava faith and movement in Bengal' (Calcutta 1942) and the author's 'History of Sanskrit Poetics' (1951) about Ujjvala-nīlamaṇi of Rūpa-gosvāmin pp. 298-302. In the bhakti cult established by Vallabhācārya great importance is attached to the *guru*, who is one of the descendants of Vallabhācārya and to whom almost divine honours are paid. A wonderful development of bhakti towards Rāma, regarded in the Rāmāyaṇa and in popular tradition as a paragon of restraint and all manly virtues, culminated in an erotic mysticism about Rāma and Sītā also. The devotees of this mystic cult have to consider themselves as brides of Rāma or the female friends of Sītā, they are supposed to seek Lord Rāma's favour through Sītā, who graciously intercedes with the Lord for the devotees. Among the followers of Vallabhācārya the guru tells the devotee to look upon him (the guru) as Kṛṣṇa and upon himself or herself as Rādhikā.

For want of space further details about these bhakti cults have to be passed over.

Supreme importance is attached to Vedic mantras and also Paurāṇika mantras. They will have to be dealt with at some length in the sections on Tantras and on Pūrvamīmāṁsā. But some treatment of mantras, particularly vedic, may be given here as well. The word *mantra* occurs about twenty-five times in the Ṛgveda. Only *once* does the word *mantrakṛt* occur in the Ṛgveda[1606] (IX. 114. 2) 'O sage Kaśyapa! offer obeisance

1606. ऋषे मन्त्रकृतां स्तोमैः कश्यपोद्वर्धयन् गिरः। सोमं नमस्य राजानं यो जज्ञे वीरुधां पतिरिन्द्रायेन्दो परिस्रव। ऋ. IX. 114. 2; इस्ते दधानो दुष्णा विश्वान्यमे देवान्धावुहा निषीदन्। विहन्तीमत्र नरो धियंधा हुवा यज्ञदान् मन्त्रां अशंसन्॥ ऋ. I. 67. 2; सायण

(*Continued on next page*)

to king Soma Lord of plants with the chants of the composers (or authors) of mantras, thereby sending forth your own voice &c.' Mr. Kapali Sastry is inaccurate when he states (on p. 67 of the translation of his 'Ṛgbhāṣya-bhūmikā in English) 'we see *frequent* mention made in the Rik Saṁhitā of the rishi as the author of the mantra' and he cites only Rg. IX. 114. 2 and I. 67. 2. The latter contains no word like mantrakṛt. Rg. I. 67. 2 (addressed to Agni) runs 'holding in his hand all powers (or riches), sitting in a cave (i. e. concealed) he placed the gods in fright; heroes (men or gods) that place (offer) prayers know him (Agni) to be here when they recite mantras formed in the heart.' There is no direct reference to ṛṣis here (but to naraḥ) and what is emphasized is that mantras already extant as the heart's outpourings enable the reciters of the mantras to find him (Agni). There is nothing to show that the mantras referred to in the verse are meant to be *impromptu*; the idea is rather that mantras that already existed and conveyed heartfelt devotion have to be employed to find Agni. The very next verse makes the position clear when it says, 'like the unborn (Sun) he (Agni) supports the wide earth and fixes in its place the sky on account of the mantras that turn out true'. This clarifies two things, viz. that when this mantra (I. 67. 3) was recited there already existed a host of mantras[1607] and secondly, that the mantras that existed long before were deemed to have helped in supporting the earth and the sky. The ancient mantras were supposed to bring Indra to attend thrice in the day for a short time to the sacrifices of devotees when invoked with mantras addressed to him (Rg. III. 53. 8); similarly, mantras when recited by wise men bring Yama to receive offerings (Rg. X. 14. 4); Rg. X. 88. 14 states 'we raise our voices with mantras towards Vaiśvānara Agni, who is wise and who shines brilliantly all days'. The word mantra[1608] is

explains 'अग्नौ हविर्भिः सह पलायिते सति सर्वे देवा अभैषुरित्यर्थः ।'; अजो न क्षां दाधार पृथिवीं तस्तम्भ द्यां मन्त्रेभिः सत्यैः । ऋ. I. 67. 3.

1607. रूपं रूपं मघवा बोभवीति मायाः कृण्वानस्तन्वं परि स्वाम् । त्रिर्यद्दिवः परि मुहूर्तमागात् स्वैर्मन्त्रैरनृतुपा ऋतावा ॥ ऋ. III. 53. 8; आ त्वा मन्त्राः कविशस्ता वहन्त्वेना राजन् हविषा मादयस्व । ऋ. X. 14. 4; वैश्वानरं विश्वहा दीदिवांसं मन्त्रैरग्निं कविमच्छा वदामः ॥ ऋ. X. 88. 14.

1608. प्र नूनं ब्रह्मणस्पतिर्मन्त्रं वदत्युक्थ्यम् । यस्मिन्निन्द्रो वरुणो मित्रो अर्यमा देवा ओकांसि चक्रिरे ॥ तमिद्वोचेमा विदथेषु शम्भुवं मन्त्रं देवा अनेहसम् । ऋ. I. 40. 5-6; मन्त्रमखर्वं सुधितं सुपेशसं दधात यज्ञियेष्वा । पूर्वीश्चन प्रसितयस्तरन्ति तं य इन्द्रे कर्मणा भुवत् ॥ ऋ. VII. 32. 13; समानं मन्त्रमभि मन्त्रये वः समानेन वो हविषा जुहोमि ॥ ऋ. X. 191. 3.

also employed in the singular several times. A few striking passages are set out here. 'Indeed, God Brahmaṇaspati (Lord of Prayer) proclaims the mantra fit for recitation (by the mouth of the hotṛ), in which the gods Indra, Varuṇa, Mitra, Aryaman make their abode, O Gods!'; 'We utter that very mantra (in which Indra and other gods are praised together) in our sacrifices, the mantra being one that produces bliss and being free from all blemishes (or is incomparable); 'Do place among the Gods a mantra that is not short, that is well-arranged and that is well ornamented; ancient fetters do not reach him who is in (the good grace of) Indra by the sacrifice (or praise); 'I address the same mantra for you (all) and offer for you (all) one offering (into fire)'. From these passages it appears that when these verses were recited there was a body of already existing mantras; which were supposed to be inspired by the Lord of prayers (or speech) and from which the choice of a long and well-formed one was to be made. Apart from the above passages the word mantra occurs in Ṛg. I. 31. 13, I. 74 1, I. 147, 4, I. 152. 2, II. 35. 2, VI. 50. 14, VII. 7. 6, X. 50. 4 and 6, X. 106. 11, in only one of which (Ṛg. II. 35. 2), apart from Ṛg. I. 67. 2 already quoted, the words 'hṛda ā sutaṣṭam mantram' (mantra well chiselled from the heart) are used and in another verse more simply the word 'atakṣan' (in VII. 7. 6 *mantram* ye vāram naryā *atakṣan*) alone is used. In two passages (Ṛg. X. 95.1 and X. 191. 3 first half) the word 'mantra' appears to mean 'consultations, holding counsel together'. In Ṛg. I. 20. 4, Ṛbhus are called 'satyamantrāḥ' and are said to have made their parents young. There are controversies about what the Ṛbhus stand for and it is difficult to say what is meant by 'satyamantrāḥ' in relation to Ṛbhus. Ṛg. VII. 76. 4. is a[1609] somewhat enigmatic verse. It means 'they (Aṅgirases) alone, (our) ancient pitṛs, learned (or wise) and following the right path, enjoyed companionship among gods and they found out the Light (the Sun) concealed (by Svarbhānu, eclipse); they, whose mantras were true, brought forth Uṣas.' In some passages where other words like *stoma* or *brahma* are used, there is

1609. त इद्देवानां सधमाद आसन्ऋतावानः कवयः पूर्व्यासः। गूळ्हं ज्योतिः पितरोऽन्वविन्दन्सत्यमन्त्रा अजनयन्नुषासम्॥ ऋ. VII. 76. 4. Aṅgirases are spoken of as Pitṛs in Ṛg. X. 14. 6 (अङ्गिरसो नः पितरो नवग्वाः) and in Ṛg. V. 40. 9 Atris are said to have found out the Sun afflicted with darkness by Svarbhānu, an Āsura and no one else was able to do so (यं वै सूर्यं स्वर्भानुस्तमसाविध्यदासुरः। अत्रयस्तमन्वविन्दन् नह्यन्ये अशक्नुवन्॥). This last is a reference to a total eclipse of the Sun, on the occurrence of which the Atris probably assured frightened people that the sun would shine forth in a short time.

mention of the stoma or brahma being made and polished by the devotee (e. g. X. 39. 14 'etam vām stomam-Aśvināvakarmātakṣāma bhṛgavo na ratham'). Vide Ṛg. I. 62. 13 for 'navyam atakṣad brahma', Ṛg. V. 29.15 (Indra brahma kriyamāṇā juṣasva śaviṣṭha yā te navyā akarma); brahmakṛtaḥ (composers of prayers or praises) are mentioned in Ṛg. VII. 32. 2 and X. 50. 7. Other words like *gir* (several hundred times), dhīti (about 100 times), brahma (over a hundred times) mati (about 100 times), manīṣā (over 60 times), vacas and vacasyā (over 100 times), stoma (about 200 times), sukīrti (five times), sūkta (four times) are employed in the sense of 'thought, word or thought out hymn or verse of praise' and in several cases the sages of the Ṛgveda state that it is a new verse or hymn of praise that they employ. Vide 'navyasībhir-gīrbhiḥ' and 'giram bhare navyasīm jāyamānām' in Ṛg. V. 42. 13., in Ṛg. VI. 49. 1, VII. 53. 2; 'Pra tavyasīm *navyasīm dhītimagnaye*' in Ṛg. I. 143. 1; 'vaiśvānarāya *matir-navyasī* śuciḥ soma iva pavate' (Ṛg. VI. 8. 1) and 'iyam te *navyasī matir* agne adhāyyasmadā' (Ṛg. VIII. 74. 7); iyam te agne navyasī manīṣā' Ṛg. X. 4. 6; 'tā valgū[1610] Dasrā puruśākatamā *pratnā navyasā vacasā* vivāse' (Ṛg. VI. 62. 5); 'navyasī sukīrtiḥ' in Ṛg. I. 60. 3; 'sa pratnavat *navyase* viśvavāra *sūktāya* pathaḥ kṛṇuhi' in Ṛg. IX. 91. 5; 'nū *navyase navīyase sūktāya* sādhayā pathaḥ' in Ṛg. IX. 9. 8. It is a remarkable fact that when words like 'sukīrtiḥ' and 'sūkta' that occur only four or five times in the whole of the Ṛgveda are qualified by the word 'new or fresh', the word 'mantra' occurring so many times does not even once bear the adjective 'new'. This emphasizes the conclusion stated above that in the times of many of the extant Ṛgvedic verses mantras were a large group already existing, from which prayers were drawn as occasion required, though now and then new verses were added to those already existing. It may here be stated that in some places the Ṛgveda looks upon prayers (*dhīti*) as divine and as on the same level with Aśvins, Uṣas, and the Śun (VIII. 35. 2) and that ancient prayers were inherited from ancestors (III. 39. 2 'seyamasme sanajā pitryā dhīḥ').

Several hymns and verses of the Ṛgveda are purely philosophical, cosmological, mystic and speculative as I. 164. 4, 6, 29,

1610. Here the contrast is great. The Aśvins are *pratnā* (ancient) but the ṛṣi (in VI. 62. 5) says that he worships the ancient Dasras (Aśvins) with a *new prayer*. This ṛṣi at least does not convey that the Aśvins were seen by him.

32, 39, 42; X. 71, X. 90 (Puruṣasūkta), X. 121 (Hiraṇyagarbha), X. 129, X. 81-82 (Viśvakarman), X. 72, X. 125 (Vāk), X. 154 (state after death), X. 190 (creation).

About the meaning and purpose of Vedic mantras there are great controversies. This much may be said here that according to the Pūrvamīmāṁsā system the whole Veda is concerned with sacrifices, that Veda is divided into two classes, Mantra and Brāhmaṇa, that Vidhis (hortatory passages) are the most important part of the Veda, that a very large number of Vedic passages are mere arthavādas (that contain either praises of vidhis or are to be explained metaphorically or merely repeat what already exists or are of a legendary character) and that mantras only serve the purpose of bringing to the mind of the sacrificer or priests what is to be done in a sacrifice and that the words used in the mantras ordinarily bear the same meaning as that in popular Sanskrit.

Long before Yāska (several centuries before Christ) there were several schools of Vedic interpretation such as the Aitihāsikas (who acc. to Nir. II. 16 said that Vṛtra was an Asura son of Tvaṣṭṛ, while acc. to the Nairuktas Vṛtra means only 'cloud' and the Veda contains metaphorical descriptions of battles, that the twins that Saraṇyu is said in Ṛg. X. 17. 2 to have given up are according to the Nairuktas Indra and the Mādhyamikā-vāk, while according to the Aitihāsikas they are Yama and Yamī, as stated in Nir. XII. 10), the school of Naidānas is mentioned about 'syāla' and 'sāma' in Nir. VI 19, the school of ancient yājñikas in Nir. V. 11. Ṛg. I. 164. 32 (ya īm cakāra) is differently explained by the Parivrājakas (ascetic school) and the Nairuktas (etymologists). The Nirukta also mentions the names of seventeen individual predecessors (from whom it differs often and who differ among themselves) such as Āgrāyaṇa, Audumbarāyaṇa, Kautsa, Gārgya, Gālava, Śākaṭāyana, Śākapūṇi. There are several mantras of which two different meanings are given in the Nirukta as in Nir. V. 11 on Ṛg. VIII. 77. 4. In Ṛg. I. 164 there are several verses with two meanings or more e. g. verse 21 (yatrā suparṇā &c.) has two meanings (acc. to Nir. III. 13) one relating to the devatā Sūrya (*adhidaivata*) and the other spiritual (adhyātma); similarly, verse 32 of the same hymn has two meanings in the Nirukta (II. 8); the verse 39 (ṛco akṣare parame vyoman) is explained in four ways by Sāyaṇa; verse 41 (gaurīr-mimāya) is explained by Sāyaṇa in two ways, both being different from Yāska's explanation (in Nir.

XI. 40); verse 45 (catvāri vāk parimitā padāni) is explained in six ways (more or less different from each other) by Sāyaṇa; it is also explained in the Mahābhāṣya (p. 7 of M. M. Abhyankara-śāstri's ed.). The verse 'catvāri śṛṅgā' (Ṛg. IV. 58. 3) has been the subject of varying explanations from very early times. Nir. (XIII. 7) explains it as referring to Yajña. The Mahābhāṣya (p. 6 of the Mahābhāṣya *ibid.*) also does the same. Sāyaṇa explains it as referring to Agni (identified with yajña) and Sūrya. This verse is a riddle. Śabara[1611] in his bhāṣya on P. M. S. I. 2. 38. ('abhidhāne arthavādaḥ') explains it but Kumārila differs from him. Sāyaṇa and others explain it (e. g. the word 'tridhā') with reference to Mantra, Brāhmaṇa and Kalpa, but when this verse was first proclaimed there must have been no Brāhmaṇas and Kalpasūtras. In several cases the Nirukta gives the adhidaivata (physical) and adhyātma (metaphysical or spiritual) or adhiyajña and adhyātma as in Nir. X. 26 (on Ṛg. X. 82. 2 'Viśvakarmā vimanā), Nir. XI. 4 (on Ṛg. X. 85. 3, adhiyajña and adhidaivata meanings), Nir. XII. 37 (on Vāj. S. 34. 55 'sapta ṛṣayaḥ', both adhidaivata and adhyātma), Nir. XII. 38 (on Atharva X. 8. 9 'Tiryag-bilaś-camasa &c.' both adhidaivata and adhyātma). In Ṛg. (I. 164) verses 11–13 and 48 contain a very imaginative and poetic description of the year, the seasons, months and total days and nights.

In recent years Śrī Aurobindo in 'Hymns to the mystic Fire' (translated in the esoteric sense, 1946) and his ardent and devout disciple Sri. T. V. Kapali Sastry (in 'Ṛgbhāṣya-bhūmikā in Sanskrit and its English translation, Pondicherry 1952) have started a theory about the Ṛgveda mantras which must be briefly stated and examined. Śrī Aurobindo first intended to publish an edition of the Ṛgveda with a word by word construction and an English translation. But he gave up that idea on account of other pre-occupations and rests content in the above book with the text and translation of about 230 verses in all from the 1st, 2nd and 6th *maṇḍalas* of the Ṛgveda and a foreword of 48 pages in which he propounds his theory. While

---

1611. शबर (on पू. मी. सू. I. 2, 38) explains: 'चतस्रो होत्राः शृङ्गाणीवास्य। त्रयोऽस्य पादा इति सवनाभिप्रायम्। द्वे शीर्षे इति पत्नीयजमानौ। सप्तहस्तास इति च्छन्दांस्यभिप्रेत्य। त्रिधा बद्ध इति त्रिभिर्वेदैर्बद्धः।'. The तन्त्रवार्तिक on this says 'चत्वारि शृङ्गेति रूपकाद्वारेण यागस्तुतिः कर्मकाले उत्साहं करोति। ···चत्वारि शृङ्गा इति विवक्षयामानां ग्रहणम्। त्रयोऽस्य पादा इति शीतोष्णवर्षाकालाः। द्वे शीर्षे इत्ययनाभिप्रायम्। सप्तहस्ता इत्यश्वस्तुतिः। त्रिधा बद्ध इति सवनाभिप्रायेण।' It would be noticed that the तन्त्रवार्तिक differs from शबर on almost every clause.

this was being written by the present writer, Śrī Aurobindo's large work of 634 pages 'on the Veda' published in 1956 reached his hands. Over 60 hymns are dealt with in this big book and 283 pages are devoted to the elaboration of his theory first outlined in the brief work of Śrī Aurobindo mentioned above and reiterated with greater emphasis. On page 9 of the work of 1956 he states "the ritual system recognized by Sāyaṇa may stand, the naturalistic sense discovered by European scholarship may, in its general conceptions be accepted, *but behind there is always the true and still hidden secret of the veda* – the secret words which were spoken for the purified in soul and the awakened in knowledge'. In this work also he sticks to the meaning of ṛta as truth and on p. 84 translates 'ṛtam' as 'Truth-consciousness', when in his first work he translated 'ṛta-cit' as Truth-consciousness'. Instead of comparing the several hundred passages where the word ṛta occurs in the Ṛgveda he sticks to his own rendering which is unacceptable to most scholars and makes a very perfunctory attempt at finding the correct meaning. One should like to have some clear examples of the distinction between Light and Consciousness in modern times and also in the Veda. So far as the present writer knows, in the language of ancient symbolism Consciousness is identified with Light. In the recently published book he deals with less than $\frac{1}{17}$th of the total hymns (1017 or 1028) of the Ṛgveda. Readers are asked to subscribe to his views although he condescends to translate in the first work less than $\frac{1}{10}$th of the total number of verses in the Ṛgveda and hardly ever enters into a discussion about the meaning of words like ṛta. Śrī Aurobindo (Foreword p. III.) concedes that Sāyaṇa does not reject the spiritual authority of the Veda and that Sāyaṇa does not deny that there is a higher truth contained in the *ṛks*. He further says (IX) that we must take seriously the hint of Yāska (Śrī Aurobindo does not quote the Nirukta, but probably he has in mind Nir. I. 20 'sākṣātkṛtadharmāṇa ṛṣayo babhūvuḥ'). Then he proceeds to state (XVII) that many whole hymns of the Veda bear on their face a mystic meaning and that the ṛṣis (p. XIX) for the sake of secrecy resorted to double meanings, a device easily manageable in the Sanskrit language. This is a hypothesis which cannot at all be accepted and is no more than mere conjecture. The Vedic mantras were composed thousands of years ago, when all persons among whom the sages moved must have spoken the same language, though generally not so polished and poetical as that of the mantras and they were not addressed to men like the moderns whose

every day thoughts, surroundings and languages are entirely different. Both the Master and the disciple (Mr. Kapali Sastry) cause confusion (or, may be, are themselves confused) by supposing that the difficulties of the modern students of mantras did exist even at or near the time of the mantras. The most sublime thought of the Ṛgveda is that there is only one Spirit behind the various gods, Indra, Mitra, Varuṇa, Agni, Yama, Mātariśvan, that originally there was only that One, there was no day and night, no death and immortality. Śrī Aurobindo himself describes (p. XXXII) Ṛg. I. 164. 46 and X. 129. 2 as 'the summit of the vedic teaching.' This view of the one Entity is also illustrated in Ṛg. VIII. 58. 2 'one and the same Agni is kindled in many places, the one Sun enters the whole world and becomes many; the one Dawn illumines all this (physical) world, One became all this (assumes various forms)'. No secrecy was observed about this fundamental truth and it was proclaimed in mantras that can be understood even by an ordinary man of to-day who knows a little Sanskrit. Because we of these recent centuries cannot understand some mantras, that does not mean that the ancient seers were guilty of a subterfuge and purposely composed mantras with two meanings. They might have indulged in the pastime of two meanings (express and metaphorical) in a few cases as poetic devices.[1612] It is no fault of the sages, if we cannot understand their meaning, just as a blind man, who does not see a wooden post and comes to grief by dashing against it, should not blame the post, but should blame himself; we are to blame ourselves and should not foist upon the ancient sages a stratagem created by our own imagination or lack of knowledge (Nir. I. 16).[1613]

1612. The Master (Śrī Aurobindo) and the pupil are at variance about the poetic character of the Mantras. Śrī Aurobindo (p. XXXIV) after saying that his translation is a literary and not a strictly literal one speaks of the hymns as '*great poetry*', magnificent in their colouring and images, noble and beautiful in rhythm. Now let us hear the disciple. On p. 65 Mr. Kapali Sastry states 'the hymnal poetry is unusual, different from other poetry, even from the most superb specimen' and then he chides the readers and men like the present author and impliedly his own Master 'it is not permissible (why?) to class Vedic hymns with poetry of a literary and aesthetic kind'. On p. 31 Mr. Sastry asserts that 'mantras have two meanings, the inner which is psychological or spiritual and the true meaning and a gross or external meaning for common men' and he adds that the use of words with double meanings was *deliberate* but was *effortless* and *natural*.

1613. यथो एतदविस्पष्टार्था भवन्तीति। नैव स्थाणोरपराधो यदेनमन्धो न पश्यति पुरुषापराधः स भवति। निरुक्त I. 16.

Śrī Aurobindo admits (p. XXXIII) that there are some key words in the Ṛgveda such as *ṛta, kratu, śravas, ketu* and that elaborate work would have to be done to fix the meanings of such words. But he does not undertake a study of the key words (each of which except 'ketu' occurs hundreds of times in the Ṛgveda) by comparison of Ṛgvedic passages and considering the light shed on these words by the other Saṁhitās and the Brāhmaṇas. He mentions the occurrence of the word ṛta in I. 164. 47 and IV. 21. 3 (*sadanāt-ṛtasya*) and '*ṛtasya pathyā*' in Ṛg. III. 12. 7 and jumps to the conclusion that the last two words mean 'the path of truth' and remarks that 'we have to find the path of Truth' (Foreword p. XXX.). In the H. of Dh. vol. IV. pp. 2–5 it has been shown that ṛta in the Ṛgveda has three meanings, viz. (1) the regular and general order in the cosmos; (2) the correct and ordered way of the cult of the gods; (3) 'moral conduct of man.' In the Ṛgveda ṛta is not the same as 'satya', but the two are differentiated. In Ṛg. V. 51. 2 the Viśve-devas [1614] are described as ṛtadhītayaḥ (whose thoughts are fixed on ṛta) and 'satyadharmāṇaḥ' (whose ordinances are true or fixed) and the sage prays to them to come to his sacrifice and to drink (*ājya* and soma) by the tongue of Agni. In Ṛg. X. 190. 1 both ṛta and satya are said to have arisen from rigorous or refulgent *tapas* (of the Creator). In the Ṛgveda ṛta involved a very wide conception as stated above and 'satya' had a restricted meaning viz. truth or static order. In Ṛg. IX. 113. 4 Soma is described as one who proclaims ṛta, satya and śraddhā (faith). Therefore, Śrī. Aurobindo is quite inaccurate when he translates *ṛta* by the word 'Truth' and draws important conclusions from his inaccurate renderings. Similarly, Śrī. Aurobindo does not give a correct rendering when he translates (Foreword p. XXX) the word '*ṛtacit*' as truth-conscious (whatever that may mean acc. to Śrī. Aurobindo). Mr. Kapali Sastry (p. 46) goes a step further than his great master by stating that in the mantras true knowledge is termed 'ṛtacit' Truth-consciousness (with a capital C). It appears that both Master and disciple are misled by the meaning of 'cit' in such an attribute as 'sat-cit-ānanda', applied to *brahma*. They appear to take 'ṛta-cit' as meaning two distinct things 'ṛta' and 'cit'. The word 'ṛtacit' occurs

---

1614. ऋतधीतय आ गत सत्यधर्माणो अध्वरम्। अग्नेः पिबत जिह्वया ॥ ऋ. V. 51. 2; ऋतं च सत्यं चाभीद्धात्तपसोऽध्यजायत। ततो रात्र्यजायत ततः समुद्रो अर्णवः ॥ ऋ. X. 190.1; ऋतं वदन्नृतद्युम्न सत्यं वदन्त्सत्यकर्मन्। श्रद्धां वदन् सोम राजन् धात्रा सोम परिष्कृत इन्द्रायेन्दो परि स्रव ॥ ऋ. IX. 113. 4.

five times in the Ṛg.; in[1615] I. 145.5, IV. 3.4, V. 3. 9 ('ṛtacit is here an epithet of Agni), in VII 85. 4 (it is an adjective of hotṛ) and in IV. 16. 10 it qualifies the word *nārī* (in the context, Śacī, the wife of Indra). The present author wonders whether Śrī Aurobindo and his disciple cared to go into the meaning of 'ṛtacit' in the several verses where it occurs. They pay no attention to the word 'ṛṇacit' that occurs in Ṛg. II. 23. 17 as an attribute of Brahmaṇaspati.[1616].

The space at the author's disposal does not allow him to show up the other unwarranted propositions and conclusions of Śrī. Aurobindo and Mr. Kapali Sastry. The author will set out the final conclusion of Śrī. Aurobindo (Foreword p. XXIX) "what then is the secret meaning, the esoteric sense which emerges by this way of understanding the Veda? ..... The thought around which all is centred is the seeking after Truth, Light, Immortality. There is a truth deeper and higher than the truth of outward existence, a Light greater and higher than the light of human understanding which comes by revelation and inspiration, an immortality towards which the soul has to rise. We have to find our way to that, to get into touch with this Truth and Immortality." This is a grand peroration, but all this is built on shaky and meagre foundations, such as the wrong meanings attached to the words ṛta and ṛtacit. Mr. Kapali Sastry (on p. 46) practically reproduces this grand summing up of his *guru*.

Mr. Kapali Sastry launches (on pp. 22–26) a bitter diatribe against Sāyaṇa but ultimately he has to admit (pp. 27–28) that Sāyaṇa is not merely useful, but indispensable to the students of the Veda. On p. 23 he translates a sūtra from Jaimini's work 'the purpose of the Veda being ritualistic, words which do not have that significance are useless' and remarks that this clearly lays down that the only purpose of the Vedas is that of ritual, those that do not pertain to that (ritualistic action) are worthless. The author doubts whether Mr. Kapali Sastry has carefully read the Pūrvamīmāṁsāsūtras or has at least

---

1615. व्यन्नवीद्वयुना मर्त्येभ्योऽग्निर्विद्वाँ ऋतचिद्धि सत्यः ॥ ऋ. I. 145. 5. It will be noticed that here ऋतचित् and सत्य are both epithets of Agni. They must be given some separate meanings; स सुक्रतुर्ऋतचिदस्तु होता य आदित्य शवसा पां नमस्वान्। ऋ. VII, 85. 4 (O sons of Aditi! May that Hotṛ priest, who makes obeisance to you with strength (in a loud voice),' be a man of good deeds (or will) and knowing ṛta, moral conduct (or cosmic law). सत्यः in I. 145. 5 would have to be rendered as truthful or pure. The word चित् may be derived from root चि to gather or from चित् to know.

1616. स ऋणचिद्दणया ब्रह्मणस्पतिर्द्रुहो हन्ता मह ऋतस्य धर्तरि ॥ ऋ. II. 23. 17.

correctly stated the position; what he quotes is the Pūrvapakṣa view (prima facie view). Jaimini's position is contained in the 7th sūtra[1617] 'as those passages (that do not directly concern themselves with ritualistic actions) form one syntactically connected whole with the passages prescribing *vidhis* they are to be considered as commendatory of the vidhis'. Mr. Sastry is not satisfied with saying (on p. 8) 'the sages Madhucchandas and others are *seers* of the mantra, the *Gods were present to the vision of these seers of old* ', but he adds 'this seer of the beyond is also the hearer of the truth; therefore that the poet-seers are truth-hearers *kavayaḥ satyaśrutaḥ*, is famous in the Veda' (p. 64). The present writer wonders whether Mr. Sastry carefully read the original passages where the words 'kavayaḥ satyaśrutaḥ' occur in the Veda. The words *kaviḥ* and *kavayaḥ* occur several hundred times in the Ṛgveda, but 'satyaśrutaḥ' occurs only thrice in Ṛg. V. 57. 8, V. 58.8 and VI. 49. 6; Ṛg. V. 57. 8 and V. 58. 8 are identical. In Ṛg. V. 57. 8 and [1617a] V. 58. 8 it is the wind-gods (Maruts) that are addressed as *kavayaḥ* (wise) and *satyaśrutaḥ* (well-known as conferring true rewards) and *not sages*. VI. 49.6 (first half of which is addressed to Parjanya and Vāta-wind god) runs 'O establishers of the world! (O Maruts!) that are wise and well-known as conferring true rewards, make the world turn towards the man by whose lauds you are praised' (this half seems to be addressed to the band of Maruts). Further comment is superfluous.[1618]

1617. आम्नायस्य क्रियार्थत्वादानर्थक्यमतदर्थानां तस्मादनित्यमुच्यते । ...विधिना त्वेकवाक्यत्वात्स्तुत्यर्थेन विधीनां स्युः ॥ पू. मी. सू. I. 2. 1 and 7.

1617a. इये नरो मरुतो मृळता नस्तुवीमघासो अमृता ऋतज्ञाः । सत्यश्रुतः कवयो युवानो बृहद्गिरयो बृहदुक्षमाणाः ॥ ऋ. V. 57. 8 and V. 58. 8; पर्जन्यवाता वृषभा पृथिव्याः पुरीषाणि जिन्वतमप्यानि । सत्यश्रुतः कवयो यस्य गीर्भिर्जगतः स्थातर्जगदा कृणुध्वम् ॥ ऋ. VI. 49. 6. All words including सत्यश्रुतः कवयः in the latter half of V. 57. 8 are epithets applied to Maruts in the first half. सत्यश्रुतः कवयः in the latter half of VI. 49. 6 are vocatives as the पदपाठ shows and are addressed to Maruts as in V. 57. 8 and V. 58. 8. The words सत्यश्रुतः कवयः do not refer at all to Vedic poets in any of the three cases.

1618. The present author is aware that thousands of people look upon Śri Aurobindo as a yogin, a prophet and as a World Teacher. But the search for truth is higher than all prophets and yogins put together. Śri Aurobindo and his disciple claim that he has received a new revelation about the Veda beyond the ken of all scholars of antiquity and modern times and they have very severely handled Yāska, Jaimini, Sāyaṇa and other commentators. The devotees and admirers of Śrī Aurobindo must allow the same freedom to the critics of Śrī Aurobindo's Vedic Incubrations for showing how and why they are wrong and are requested not to take umbrage at what the present writer has said about his theories but only to reply to the author's brief criticisms on their merits or demerits.

The Mīmāṁsakas made a sweeping generalisation that the whole Veda is meant for sacrifice. They went rather too far but they had substantial grounds for doing so. On pp. 980–982 of the H. of Dh. vol. II. it has been shown how even the Ṛgveda discloses that a complicated system of sacrifices with three *savanas*, numerous priests, three fires, existed in those far-off days and sacrifices like Atirātra (Ṛg. VII. 103. 7) and Trikadruka (Ṛg. I. 32. 3, II. 11. 17, VIII. 13, 18, VIII. 92. 21, X. 14. 16) were being performed. The Mīmāṁsakas had a long tradition behind them. But the case of Śrī Aurobindo's theories is entirely different. On flimsy grounds and mistaken meanings he builds up an imposing structure of an exoteric and also an esoteric meaning of vedic mantras, propounds that the sages wanted secrecy for their doctrines and all that they were concerned with was Truth, Light and Consciousness. It has been already shown that there are several philosophical and speculative hymns in the Ṛgveda. But there is no motive of secrecy therein. If it is only Truth, Light and Consciousness with which the vedic sages were concerned ten thousand verses would not have been necessary. One should like to know what secret or higher or deeper esoteric Truth or Light or Consciousness to be kept concealed from common men is contained in hymns such as Ṛg. VII. 55 (sleeping charm), VII. 103 (maṇḍūka-stuti), X. 34 (gambler's song), X. 119 (exhilaration of power of Soma on Indra), X. 166 (invoking destruction of enemies), X. 190 (brief creation hymn), X. 191 (for concord and co-operation). Many more such hymns may be cited, where the theory of secrecy and Truth, Light and Consciousness would entirely fail. Besides, what is the secret (or spiritual or esoteric) element in such passages as those quoted above viz. I. 164. 46, X. 129. 2, VIII. 58. 2, which clearly express the most profound Truth. If the Mīmāṁsakas made a too wide generalization, Śrī Aurobindo makes a far wider generalization with very little basis.

The mantras of the Ṛgveda have a meaning and are not unmeaning letters as often in Tāntrik works. There is a discussion in Nirukta I. 15–16 where it is said that in the absence of the Nirukta the apprehension of the meaning of the words used in mantras would not follow and the view of Kautsa is cited that the Nirukta is useless for understanding the meaning of mantras, since the mantras themselves have no sense (or are useless or purposeless). Yāska[1618a] replies that mantras do possess

1618 a. अथापीदमन्तरेण मन्त्रेष्वर्थप्रत्ययो न विद्यते। ···तदिदं विद्यास्थानं व्याकरणस्य कार्त्स्न्यं स्वार्थसाधकं च। ···अर्थवन्तः शब्दसामान्यात्। ···यथो एतद् ब्राह्मणेन संपत्स्यते

(*Continued on next page*)

a meaning since they employ the very same words that are used in ordinary Sanskrit, and then quotes a passage of the Ait. Br. (I. 5). Śabara on Jai. I. 2. 41 states that where one cannot get at the meaning one has to come to some meaning on a consideration of other Vedic passages and on the basis of roots following Nirukta and Grammar.

One of the important topics dwelt upon at length in the Purāṇas is that of *avatāras*. This emphasis on the conception of avatāras has greatly influenced the forms of religious worship, vratas and festivals. The subject of avatāras has been dealt with in the H. of Dh. vol. II. pp. 717–724. It has been shown there that the beginnings of the doctrine of avatāras and of some of the well-known avatāras may be traced to the Vedic Literature viz. to the Śatapatha-Brāhmaṇa (story of Manu and the fish in I. 8. 1. 1–6), story of Kūrma (tortoise) in Śatapatha VII. 5. 1. 5, of Varāha (Boar) in Śat. Br. XIV. 1. 2. 11, Vāmana (Dwarf) in Śat. Br. I. 2. 5. 1 ff., Kṛṣṇa, son of Devakī, in Chān. Up. III. 17. 6 and that the number of avatāras and the names also varied. But the treatment was not exhaustive and hence some details are added here from the Purāṇas and from general considerations.

Avatāra (from root *tṛ*. with 'ava') means 'descending' or 'descent' and the word is applied to gods, assuming the form of a human being or even of an animal and continuing to live in that form till the purpose for which that form was assumed was carried out. Reincarnation is one of the fundamental doctrines of Christianity. But there is a vast difference between that doctrine and the Hindu theory. Re-incarnation in Christianity is single and unique, while in the Hindu theory as adumbrated in the Gītā (IV. 5–8) and the Purāṇas there have been many incarnations of the Deity and there may he many more in future. It is a comforting belief for ordinary men to hold that when the affairs of the world are in a mess God comes down to the earth to set matters right. And this belief is held not only by the Hindus and Buddhists but by many peoples (including some in the rich and educated West) far apart from each other. Most Hindus, however, do not believe that great

विधीयन्त इति, उद्दितानुवादः स भवति। एतद्वै यज्ञस्य समृद्धं यद्रूपसमृद्धं यत्कर्म क्रियमाणमनुभिवदति। निरुक्त I. 15–16: अविशिष्टस्तु वाक्यार्थः। जै. I. 2. 32; अविशिष्टस्तु लोके प्रयुज्यमानानां वेदे च पदानामर्थः। स यथैव लोके विवक्षितस्तथैव वेदेपि भवितुमर्हति। ...अर्थमत्यायनार्थमेव यज्ञे मन्त्रोच्चारणम्। शबर's भाष्य.

men, saints or prophets like Śaṅkarācārya, Nānak, Shivaji or Mahātmā Gandhi are born again as avatāras in times of crisis. The Buddhists made Buddha in their Mahāyāna teachings go through many avatāras as *bodhisattva* before he attained Buddhahood. In modern times many persons pose or are made to pose as avatāras by their admirers or followers. Recently, Mr. J. G. Bennett (Hodder and Stoughton, 1958) has published a book called 'Subud' (Sushila, Buddha, Dharma) in which he suggests his firm belief that one Pak Subuh who hails from Indonesia is an *avatar*, the messenger from above for whom mankind is waiting. The Indian theory of avatāras is connected with the theory about yugas and manvantaras. When the world is in serious trouble, people believe that deliverance will come by the grace of God and they are often justified in their belief by the appearance of godly men who appear with some noble mission and masterly idea suited to the particular time and place when they appear.

In medieval and modern times the avatāras of Viṣṇu have been regarded as ten, viz. Matsya, Kūrma, Varāha, Nṛsiṁha or Narasiṁha (Man-lion), Vāmana, Paraśurāma, Rāma (son of Daśaratha), Kṛṣṇa, Buddha and Kalkin. The Varāha-purāṇa mentions these ten in that order.[1619] In an inscription on the lintel above the figure of Śaṅkara-Nārāyaṇa in the Varāha-Perumal[1620] temple, this Paurāṇik verse except the first six letters (which cannot be read) is seen inscribed. The *locus classicus* about the descent of God in different forms is in the Bhagavadgītā[1621] viz. 'Whenever piety or righteousness (*dharma*)

1619. मत्स्यः कूर्मो वराहश्च नरसिंहोथ वामनः। रामो रामश्च कृष्णश्च बुद्धः कल्की च ते दश॥ वराह 4. 2, मत्स्य 285. 6–7 (reads कल्कीति च क्रमात्). The मत्स्य verse is quoted by अपरार्क p. 338.

1620. Vide Memoir No. 26 of the Archaeological Survey of India by H. Krishna Sastri on two statues of Pallava kings and five Pallava Inscriptions in a rock-cut temple at Mahābalipuram (p. 5), which the writer ascribes to the latter half of 7th century A. D. The preserved engraving reads ···स्य नारसिंहश्च वामनः। रामो रामस्य (श्च) रामस्य (श्च?) बुद्ध (:) कल्की च ते दश॥. The same page notes that at Sirpur in the Central Provinces is a shrine of about 8th century A. D. in which are found side by side the images of Rāma and Buddha in his usual meditative attitude.

1621. यदा यदा हि धर्मस्य···सृजाम्यहम्। परित्राणाय साधूनां ···धर्मसंस्थापनार्थाय सम्भवामि युगे युगे॥ गीता 4. 7–8; compare हरिवंश I. 41. 17 'यदा यदा ···भारत। धर्मसंस्थापनार्थाय तदा सम्भवति प्रभुः॥'; जज्ञे पुनः पुनर्विष्णुर्यज्ञे च शिथिले प्रभुः। कर्तुं धर्मव्यवस्थानमधर्मस्य च नाशनम्॥ वायु 98. 69, मत्स्य 47. 235 (reads धर्मे प्रशिथिले and असुराणां प्रणाशनम्); यदाः संसरमाणो वै योनीर्वर्तामि सत्तम। धर्मसंरक्षणार्थाय धर्मसंस्थापनाय

(*Continued on next page*)

declines and impiety grows up, I create myself. Age after age I am born for the protection of the good, for the destruction of evil-doers and the establishment of piety'. The same idea occurs in some of the *parvans* of the Mahābhārata, as in Vanaparva 272. 71 and Āśvamedhika-parva 54. 13. None of the ten avatāras, except those of Kṛṣṇa and probably Rāma, ('Rāmaḥ śastrabhṛtām-ahaṁ', Gītā X. 31) are, however, mentioned by name in the Bhagavad-gītā. The number and names of the avatāras are not uniform in the Mahābhārata. In the Nārāyaṇīya section of the Śāntiparva (chap. 339. verses 77–102) only six avatāras and their exploits are expressly mentioned, viz. Varāha (bringing up the earth submerged in the ocean), Narasiṁha (killing demon Hiraṇyakaśipu), Vāmana (vanquishing Bali and making him dwell in Pātāla), Bhārgava Rāma (extirpating kṣatriyas), Rāma, son of Daśaratha (killing Rāvaṇa), Kṛṣṇa (killing or vanquishing Kaṁsa, Narakāsura, Bāṇa, Kālayavana, Jarāsandha, Śiśupāla). Then the same chapter [1622] mentions ten avatāras as follows: Haṁsa, Kūrma, Matsya, Varāha, Narasiṁha, Vāmana, Rāma (Bhārgava), Rāma Dāśarathi, Sātvata, Kalki. Here Buddha is omitted and Kṛṣṇa is called Sātvata and Haṁsa is added. In the Harivaṁśa [1623] it is said that the past avatāras have been thousands and in future also they would be thousands. Śāntiparva says the same thing. The Harivaṁśa (I. 41. 27 ff) names only the following and their exploits, viz. Varāha, Narasiṁha, Vāmana, Dattātreya, Jāmadagnya (Paraśurama), Rāma, Kṛṣṇa and Vedavyāsa. But as Keśava is said to be the 9th (I. 41. 6) it is to be understood that Matsya and Kūrma were counted, though not expressly named and Kalki Viṣṇuyaśas is mentioned as a

(*Continued from last page*)

च। आश्वमेधिक 54. 13; असतां निग्रहार्थाय धर्मसंरक्षणाय च। अवतीर्णो मनुष्याणामजायत यदुक्षये॥ स एवं भगवान् विष्णुः कृष्णेति परिकीर्त्यते। वनपर्व 272. 71–72. ब्रह्मपु० (180. 26–27 and 181. 2–4) has almost the same words as गीता. देवीभागवत (VII. 39). 22–23 is यदा यदा'''भवति भूधर। अम्बु'''तदा वेषान् बिभर्म्यहम्॥.

1622. हंसः कूर्मश्च मत्स्यश्च प्रादुर्भावाह् द्विजोत्तम। वराहो नरसिंहश्च वामनो राम एव च॥ रामो दाशरथिश्चैव सात्वतः कल्किरेव च॥ शान्ति 339. 103–104. In आदि 218. 12 वासुदेव is called सात्वत.

1623. प्रादुर्भावसहस्राणि अतीतानि न संशयः। भूयश्चैव भविष्यन्तीत्येवमाह प्रजापतिः॥ हरिवंश I. 41. 11; अतिक्रान्ताश्च बहवः प्रादुर्भावा ममोत्तमाः॥ शान्ति 339. 106. Vide भागवत I. 3. 26 and अग्नि 16. 11–12 for similar words.

future avatāra. The usual ten avatāras are named in Varāha[1624] (4. 2, 48. 17–22, 55. 36–37), Matsya 285. 6–7, Agni (chap. 2–16 stories about all ten), Narasiṁhapurāṇa (chap. 36), Padma VI. 43. 13–15). In Vāyu 98. 68–104 the text presents the avatāras in a confused manner and appears to mention ten avatāras, viz. Varāha, Narasiṁha, Vāmana, Dattātreya, Māndhātṛ, Jāmadagnya, Rāma (Dāśarathi), Veda-vyāsa, Vāsudeva, Kalkin Viṣṇuyaśas. In Brahmāṇḍa III. 73. 75 ff there are lists of avatāras different from the present ten. In the Bhāgavata the avatāras of Viṣṇu are mentioned in several places. In I. 3. 1–25 twenty-two avatāras including Brahmā, Devarṣi Nārada (who promulgated the Sātvata system), Nara-Nārāyaṇa, Kapila (who taught to Asuri the Sāṅkhya system), Dattātreya, Ṛṣabha, (son of Nābhi and Merudevi),[1625] Dhanvantari, Mohinī, Vedavyāsa, Balarāma and Kṛṣṇa, Buddha, Kalki are mentioned. In II. 7 twenty-three avatāras are mentioned, many of which are the same as in I. 3, but in II. 7 Dhruva, Pṛthu son of Vena, Hayagrīva are mentioned, the first two of which are mentioned as avatāras hardly anywhere else. In Bhāgavata XI. 40. 17–22 the following avatāras are mentioned, viz. Matsya, Hayaśīrṣa, Kūrma, Sūkara, Narasiṁha, Vāmana, Bhārgava Rāma, Rāma, Vāsudeva, Saṅkarṣaṇa, Pradyumna, Aniruddha, Buddha, Kalki. In Bhāgavata XI. 4. 17–22 sixteen avatāras are set out, viz. usual ten plus Haṁsa, Datta (Dattātreya), Kumāra (Nārada), Ṛṣabha, Vyāsa and Hayagrīva. Twelve avatāras are noted in Matsya 99. 14 and Padma V. 13. 182–186. The Prapañcasāratantra (ascribed to the great advaita teacher Śaṅkarācārya) mentions (in Paṭala 20. 59) Matsya, Kūrma, Varāha, Nṛsiṁha, Kubja (i. e. Vāmana), three Rāmas

---

1624. The passage of Matsya (285. 6–7) is very likely a later interpolation, because in another place in the Matsya, the names of avatāras are different. In Matsya 47. 106 there is a reference to the curse on Viṣṇu by Bhṛgu that since Viṣṇu killed his wife he would have to be born seven times as a human being and the seven avatāras are Dattātreya, Māndhātā, Jāmadagnya (Bhārgava) Rāma, Rāma Dāśarathi, Vedavyāsa, Buddha, Kalkin and three more (in 47. 237–240), viz. Nārāyaṇa, Narasiṁha and Vāmana are added; in Matsya 54. 15–19, Nakṣatrapuruṣa-vrata is described and the usual ten avatāras are named.

1625. Ṛṣabha, son of Nābhi, appears to be the first tīrthaṅkara of the Jainas and was probably raised to the status of an incarnation of Viṣṇu as Buddha was raised. In भागवत I. 3. 24 बुद्ध is referred to as follows: ततः कलौ संप्रवृत्ते संमोहाय सुरद्विषाम् । बुद्धो नाम्नाऽजनसुतः कीकटेषु भविष्यति ॥, नमो बुद्धाय शुद्धाय दैत्यदानवमोहिने । भागवत X. 40. 22.

(i. e. Bhārgavarāma, Dāśarathi Rāma and Balarāma), Kṛṣṇa and Kalkin (i. e. it omits Buddha). The Ahirbudhnya Saṁhita (5. 50–57) enumerates 39 avatāras of Vāsudeva, that are set out by Otto Schrader in his Introduction to the Pañcarātra and the Ahirbudhnya Saṁhitā, pp. 42–43. The Viṣṇupurāṇa[1626] states that Lakṣmī follows Viṣṇu in his avatāras. The Purāṇas are full of the descriptions of the exploits of Viṣṇu in his several avatāras. But it should not be supposed that Śiva had no avatāras. The Vāyu (chap. 23) mentions 28 avatāras of Maheśvara the last of which was Nakulī (Lakulī) as verse 221 says. In Varāha 15. 10–19 all avatāras are praised except that of Buddha. But Varāha (48. 20–22) provides that worship of Narasiṁha frees men from the fear of sins, of Vāmana leads to removal of delusion, of Paraśurāma to wealth, one should worship Dāśarathi Rāma for the destruction of cruel enemies, one desirous of a son should worship Balarāma and Kṛṣṇa, one who desires a handsome form should worship Buddha and one should worship Kalkin for the slaughter of enemies.[1627] The Agnipurāṇa (chap. 49. 1–9) describes what characteristics the images of the ten avatāras should possess and says that the image of Buddha should be represented as having a quiet face, long ear-lobes, fair complexion, wearing an upper garment, seated in Padmāsana posture and his hands should have the *varada* and *abhaya* poses.

From the facts that Kṣemendra in his Daśāvatāra-carita[1628] (composed in 1066 A. D.), and the Gītagovinda of Jayadeva (court poet of Lakṣmaṇasena) mention the usual ten avatāras with Fish as the first and that the Matsya passage about ten avatāras is quoted by Aparārka (first half of 12th century), it follows that all the ten avatāras of Viṣṇu had become recognised throughout India at least about the 10th century A. D.

1626. एवं यथा जगत्स्वामी देवराजो जनार्दनः। अवतारं करोत्येष तथा श्रीस्तत्सहायिनी॥ पुनश्च पद्माद्भूता यदादित्योऽभवद्धरिः। यदा च भार्गवो रामस्तदाभूद्धरणी क्षितम्। राघवत्वेऽभवत्सीता रुक्मिणी कृष्णजन्मनि। अन्येषु चावतारेषु विष्णोरेषा सहायिनी॥ विष्णु I. 9. 139–141; आदित्य means वामन here.

1627. शान्तात्मा लम्बकर्णश्च गौराङ्गश्चाम्बरावृतः। ऊर्ध्वे पद्मस्थितो बुद्धो वरदाभयदायकः॥ अग्नि 49. 8; बृहत्संहिता 57. 4 पद्माङ्कितकरचरणः प्रसन्नमूर्तिः सुनीचकेशश्च। पद्मासनोपविष्टो पितेव जगतो भवति बुद्धः॥; vide वराह 48. 20–22 वामनं मोहनाशाय वित्तार्थे जमदग्निजम्। क्रूरक्षत्रविनाशाय यजेद्दाशरथिं बुधः। बलकृष्णौ यजेद्धीमान् पुत्रकामो न संशयः। रूपकामो भजेद् बुद्धं शत्रुघाताय कल्किनम्॥.

1628. मत्स्यः कूर्मो वराहः पुरुषहरिविपुर्वामनो जामदग्न्यः काकुत्स्थः कंसहन्ता स च सुगतमुनिः कार्किनामा च विष्णुः॥ दशावतारचरित I. 2.

Kumārila (7th century A. D.) did not accept Buddha as an avatāra, though about that century some people had come to recognize him as such (vide note 1629). Besides, as shown above, there were many views about the total number of avatāras, their names and the order in which they appeared. Vide Dr. Katre's paper in Allahabad University Studies, vol. X, pp. 37–130 for discussion on 33 avatāras. The Varāha avatāra is mentioned in the Eran stone Boar[1629] Inscription of Toramāṇa (Gupta inscriptions pp. 158–160) in the first quarter of the 6th century. The Raghuvaṁśa (IV. 53 and 58) refers to the recovery of land near the Sahya mountain from the Western Sea by Rāma (Bhārgava); vide pp. 89–90 and note 224 above for references in the Mahābhārata and Purāṇas to Paraśurāma's exploits. The Sarvānukramaṇī p. 42 on Ṛg. X, 110 names as ṛṣi Jamadagni or his son Rāma The Meghadūta mentions the planting of the left foot of Viṣṇu on Bali (i. e. the Vāmana avatāra). Māgha in Śiśupāla-vadha (XV. 58) regards Bodhisattva (Buddha) as an avatāra of Hari and as sought to be tempted by the hordes of Māra. Māgha[1630] flourished about 725–775 A. D. The knowledge of Vāmana and Kṛṣṇa avatāras can be carried back centuries before the Mahābhāṣya of Patañjali, since it refers to works and dramatic representations of the imprisonment of Bali and the killing of Kaṁsa (vide pp. 130, 203 and notes 330, 521 above). In the Daśāvatāra cave at Ellora one sees the representations of Varāha, Narasiṁha, Vāmana and Kṛṣṇa. These caves are ascribed to the 8th century A. D.[1631] Therefore, it appears almost certain that some at least (viz. Vāmana, Paraśurāma and Kṛṣṇa) of the usual ten avatāras had been recognised some centuries before Christ and all ten had come to be recognised by some writers and other people before the 7th century A. D.

1629. The first verse of the Inscription is: जयति धरण्युद्धरणे घनघोणाघातचूर्णितमहीध्रः। वेधो वराहमूर्तिस्त्रैलोक्यमहागृहस्तम्भः॥ Gupta Inscriptions p. 159. This was engraved in the first year of the Hūṇa king तोरमाण's reign on 10th of Phālguna, when the temple of Nārāyaṇa in his Boar avatāra was built. The probable date is about 500 to 510 A. D. This अवतार is sometimes called आदिवराह, यज्ञवराह, श्वेतवराह, महावराह. Compare हर्षचरित III 'महावराहपीवरस्कन्धपीठे नरकासुर इव भुवो गर्भादुज्जृम्भितः।'. Vide 'Royal conquests and cultural migrations' by C. Sivarāma Mūrti (Calcuttā, 1955) for plate II C. for 'Ādivarāha' of 4th century A. D.

1630. इति तत्तदा विकृतरूपमभजद्भविभिन्नचेतसम्। मारबलमिव भयङ्करतां हरिरोधिसत्त्वमभिराजमण्डलम्॥ शिशुपालवध XV. 58. For Māgha's date, vide the author's 'History of Sanskrit Poetics' (1951) pp. 112–113 and 139.

1631. Vide 'Cave Temples of India' by Fergusson and Burgess p. 438; Archaeological Survey of Western India by Burgess, Vol. V. p. 25.

The conception of avatāras contributed largely to the increase of Dharmaśāstra material. They gave rise to numerous vratas and festivals. For example, the Varāhapurāṇa devotes chapters 39–48 to dvādaśī-vratas in honour of the ten avatāras from Matsya to Kalkin. There are separate festivals called Jayantīs of the avatāras such as Narasiṁha-jayantī on Vaiśākha śu. 14, Paraśurāma-jayantī (on Vaiśākha śu. 3). Vide pp. 262–263 for the tithis and months in which the different avatāras appeared.[1631a]

Descriptions of each of the ten well-known avatāras occur in several Purāṇas; for example, Matsya avatāra is described in Matsya chap. 1-2, Agni 2, Narasiṁha 37; Kūrma in Agni 3, Bhāgavata I. 3. 16, VIII. 7-8-10, Narasiṁha 38; Varāha in Matsya 247–248, Vāyu 6. 11–26, Bhāgavata III. 13. 18–45, III. 19. 25–30, Narasiṁha 39; Narasiṁha avatāra in Brahma 58. 12 ff., 213. 43 ff., Matsya 161–163, Bhāgavata I. 3. 18, VII. 8. 18, Narasiṁha-purāṇa 41-44; Vāmana in Brahma 73 and 213. 80–185, Vāyu 98, 74–87, Vāmanapurāṇa 78. 51, Bhāgavata VIII. 18. 12 to VIII. 22. 33, Narasiṁha 45; Paraśurāma in Matsya 244–246, Bhāgavata IX. 15. 13, IX. 16. 1–26 and vide above pp. 89–90 and note 204; Rāma in Brahma 176, Agni 5–11 (the seven *kāṇḍas* of the Rāmāyaṇa are summarised), Vāyu 88. 183–198, Bhāg. IX. 10–11, Padma IV. 1–68, Narasiṁha 47–52; Kṛṣṇa in Brahma 14–17, 180–212, Agni 12–15, Bhāg. X. 3, 44–45, 50–52 &c., XI. 1 and 30, Narasiṁha 53; Buddha in Brahma 180. 27–39, Agni 16. 1–3, Varāha 180. 27–29, 213. 32 ff., Padma VI. 31. 13–15, Bhāg. I. 3. 24; Kalkin — Vide H. of Dh. III. pp. 923–925 for references. The avatāras and their *jayantīs* are described in many Dharmaśāstra works, but the Ṭoḍarānanda, vol. I. edited by Dr. P. L. Vaidya in the Ganga Oriental Series probably contains the longest account of the ten avatāras (pp. 39–386). Thousands of verses are devoted by the Purāṇas to each of the topics of *dāna* (gifts), śrāddha, tīrtha and vrata and they have been quoted at length by works on Dharmaśāstra. It would be

1631 a. The following verse is cited from the पुराणसमुच्चय in नि. सि. p. 81: मत्स्योऽभूद्भुतशुक्लिने मधुसिते, कूर्मो विधौ माधवे, वाराहो गिरिजासुते नभसि, यज्ञेसिते माधवे। सिंहो, भाद्रपदे सिते हरितिथौ श्रीवामनो, माधवे रामो गौरितिथावतः परमभूद् रामो नवम्यां मधोः॥ कृष्णोऽष्टम्यां नभसि सितपरे, चाश्विने पद्मशम्यां बुद्धः, कल्की नभसि समभूच्छुक्लषष्ठ्यां क्रमेण॥. The भक्तिप्रकाश p. 79 (of the वीरमित्रोदय) also quotes this. The नि. सि. remarks that others cite some stray verses where some of the tithis are different and that some Koṅkaṇa writers cite some verses as occurring in वराहपुराण in which मत्स्यजयन्ती is on आषाढशुक्ल eleventh, Buddha should be worshipped on पौषशुक्ल 7th and so on.

best to bring together by way of illustration a few of the pages of the previous volumes of the History of Dharmaśāstra on these subjects.

Vide vol. II. pp. 880–881 (for gifts of certain dānas called *dhenus* from Matsya chap. 82, Varāha, chap. 99–110, Agni, chap. 210), p. 882 (for gifts called parvata or meru from Matsya 83-92, Agni 210 quoted by Aparārka pp. 344–454), pp. 884–885 (for grahaśānti from Matsya 93 and about images of planets from Matsya 84), p. 892 (for dedication of a reservoir of water to the public from Matsya 58), pp. 895–896 for the planting of trees and the dedication of a garden to the public (Matsya 59, Agni 70), pp. 896–899 (for dedication of temples and consecration of images in Matsya 264–266, Agni 60 and 66); vol. IV. pp. 162–164 about various hells (Agni 203, 371, Brahma 22, 214–215, Brahmavaivarta, Prakṛtikhaṇḍa 29 and 33, Nāradapurāṇa I. 15, Padma IV. 227, Bhaviṣya, Brāhmaparva 192, Bhāgavata V. 26, Viṣṇu V. 6, Mārkaṇḍeya 12 and 14); vol. IV. p. 170 about heaven being really happiness of the mind (Brahma 22. 44 and 47, Viṣṇu IV. 6. 46); vol. IV. pp. 177–178 on the doctrine of Karmavipāka (Vāmana 12, Mārkaṇḍeya 15, Varāha 203, Viṣṇudharmottara II. 102); vol. IV. p. 181 on the signs of approaching death (Vāyu 19, Liṅga 91, Mārk. 43. 29–39 or chap. 40 of Venk. ed. and Viṣṇudharmottara III. 218); vol. IV. p. 212 on cremation (Varāha 187, Garuḍa II. 4); vol. IV. p. 256 on the persons entitled to perform funeral rites (Viṣṇu III. 13, Mārk. chap. 30 of B. I. ed. and 27 of Venk. ed.); vol. IV. pp. 261–262 the rites after death being called pūrva or nava, madhyama (navamiśra) and uttara (or purāṇa) in Viṣṇupurāṇa III. 13; vol. IV. p. 265 about an ātivāhika body being assumed by the soul of a dead person (Brahma 214, Mārk. 16, Agni 230 and 371); vol. IV. p. 272 on āśauca (impurity on birth and death) from Kūrma II. 23, Liṅga I. 89, Garuḍa, pretakhaṇḍa 5, Agni 157–158, Vāmana 14. It is unnecessary to refer to the pages of this volume itself for numerous references to Purāṇas as regards tithis, various vratas, times for religious rites, astrological matters &c.

It should not be supposed that the Purāṇas are restricted to topics called religious in popular parlance and to the five characteristic topics of creation, re-creation (*sarga*, *pratisarga* &c.) Some of the Purāṇas contain an exhaustive treatment of the duties of kings, ministers, commander-in-chief, judge, envoy scribes, court physician and of coronation, invasion &c

Many of these matters have already been dealt with in vol. III. of the H. of Dh. The most exhaustive treatment of what may be called political matters is found in Matsya chap. 215-226 and 240, Agni 218-242, Viṣṇudharmottara II, chap. 2-7, 18-21, 24-26, 28, 61-63, 66-72, 145-152, 177. Among other Purāṇas Garuḍa I. 108-115, Mārkaṇḍeya 24 (in Venk. ed, or 27 in Banerji's ed.), Kālikā 87 contain some discussion of matters political. It should be noticed that both Matsya (240. 2) and Agni (228. 1) employ the two technical words, 'Ākranda' and 'Pārṣṇigrāha' that are part of the theory of *Maṇḍala* in Kauṭilya (VI. 2. p. 260) explained in H. of Dh. vol. III. p. 222. The Matsyapurāṇa is profusely quoted by one of the earliest extant digests on Dharmaśāstra viz. the Kṛtya-kalpataru on Rājadharma (pp. 23, 25-30, 34-38, 42-43, 55-61, 118-122, 123-124, 158-161 and many verses from chap. 227 and 241 of the Matsya on the administration of justice in Vyavahāra-kāṇḍa pp. 342, 345, 348, 377, 406, 409-10, 562, 581, 594-95, 599). The same digest quotes many verses (pp. 9-13, 128, 166, 178-181) from the Brahmapurāṇa which are not found in the printed Brahma (Ānan. ed.), but which are quoted by the Rājanīti-prakāśa of Mitramiśra (borrowing from Kṛtyakalpataru) pp. 138, 158, 283, 416-419 and some by the Rājadharmakaustubha of Anantadeva (pp. 326-330). The Viṣṇudharmottara on rājadharma is not quoted in the Kṛtyakalpataru on rājadharma, but it is frequently quoted by the Rājanītiprakāśa e. g. Vi. Dh. II. 18. 1, 5-14 are quoted by R. N. P. on pp. 32-33, Vi. Dh. II. 18. 2-4 are quoted by R. N. P. p. 61, Vi. Dh. II. 22. 1-185 are quoted by R. N. P. pp. 66-81 (on mantras to be recited and the several divinities to be invoked at a king's coronation), Vi. Dh. II. 23. 1-13 are quoted by R. N. P. on pp. 82-83 (describing the rewards of the mantras recited in Vi. Dh. II. 22). Vi. Dh. is quoted 21 times by the Rājadharma-kaustubha. These three Purāṇas alone (Matsya, Agni, Viṣṇudharmottara) devote several thousand verses to the topic of rāja-dharma and allied matters. The Garuḍa-purāṇa (I. 108-115) devotes about four hundred verses to Rājanīti (political thought) but many of them are like subhāṣitas (*bon mots*) and are borrowed from Manu (e. g. Garuḍa I. 109. 1 and 52, 110. 7, 115. 63 are respectively Manu VII. 213, VIII. 26, II. 239, IX. 3), the Mahābhārata, the Nāradasmṛti (e. g. 'na sā sabhā' in Garuḍa 115. 52 is Nārada III. 18). The Garuḍa itself states that it will expound the essence of *nīti* (Rājadharma) based upon Artha-

śāstra[1632] and the like; while the colophons at the end of chapters 108–114 aver that they contain the Nītisāra promulgated by Bṛhaspati. One verse is almost the same as the Introductory verse 5 of Bāṇa's Kādambarī[1633] and I am disposed to hold that it is the Garuḍa that is the borrower.

Certain verses from the Mārkaṇḍeya-purāṇa (24. 5, 23–33 or chap. 27 and 21–31 in Banerji's ed.) are quoted by R. N. P. pp. 30–31 (about the duties of kings and their acting in the peculiar ways of five gods, viz. Indra, Sūrya, Yama, Soma and Vāyu). The Dāyabhāga quotes the Markaṇḍeya-purāṇa for pointing out that *sāpiṇḍya* in the matter of inheritance and succession is different from sāpiṇḍya for the periods of aśauca (impurity on death[1634]). The Kṛtyakalpataru on Rājadharma (pp. 182–183) quotes a passage from Skandapurāṇa on the festival of Kaumudīmahotsava to be celebrated by the king. The same passage is quoted by R. N. P. pp. 419–421.

The Kṛtyakalpataru (on Rājadharma) quotes a long passage (pp. 201–212) from Bhaviṣyapurāṇa on '*Vasordhārā*', which is quoted by the R.N.P. (pp. 447–457) from the Devīpurāṇa. The Kālikāpurāṇa in chapter 87 devotes 131 verses to Rājanīti, in which a summary is furnished of the course of conduct that should be followed by the king. This chapter expressly mentions the works of Uśanas and Bṛhaspati (verses 99 and 130) and advises the king to honour brāhmaṇas that are advanced in knowledge, learning, *tapas* and age, to control his senses, to employ the four *upāyas* (sāma, dāna, daṇḍa and bheda), to avoid the vices of gambling, drinking, indulgence in sexual matters and hunting, to practise the six guṇas (yāna, āsana &c.), to test the princes, councillors, the queens and other female relatives by *upadhās* (investigation of character by various tricks).[1635]

1632. नीतिसारं प्रवक्ष्यामि अर्थशास्त्रादिसंश्रितम्। राजादिभ्यो हितं पुण्यमायुःस्वर्गादिदायकम्॥ गरुड I. 108. 1.

1633. अकारणाविष्कृतकोपधारिणः खलाद्भयं कस्य न नाम जायते। विषं महाहेरिवमस्य दुर्वचः सुदुःसहं संनिपतेत्सदा मुखे॥ गरुड I. 112. 16; compare कादम्बरी Introductory verse 5 'अकारणाविष्कृतवैरदारुणादसज्जनात् कस्य भयं न जायते। विषं महाहेरिव यस्य दुर्वचः सुदुःसहं संनिहितं सदा मुखे॥'.

1634. अशौचार्थं तु पिण्डलेपभुजामपि तद्वत्तपिण्डलेपभोक्तृत्वेन सपिण्डत्वं मार्कण्डेयपुराणे निर्दिष्टं यथा—'पिण्डलेपभुजश्चान्ये पितामहपितामहात्। मध्यस्थुक्तास्त्रयस्तेषां यजमानश्च सप्तमः॥ इत्येवं मुनिभिः प्रोक्तः सम्बन्धः सापपौरुषः।' अशौचकर इत्यर्थः। दायभाग XI para 41. The verses 'पिण्डलेप'...सापपौरुषः' are मार्कण्डेय 28. 4–5 with slightly different readings (chap. 31 in B. I.).

1635. Compare the heading of कौटिल्य I. 10 'उपधाभिः शौचाशौचज्ञानममात्यानाम्' and the following passages: क्षीरस्वामी, while commenting on the word उपधा, quotes this heading about उपधा from कौटिल्य (expressly named).

It appears that Kauṭilya's Arthaśāstra was not available to most medieval writers and therefore they relied on the purāṇas for the treatment of Rājadharma. But the early purāṇas like the Matsya appear to have made use of Kauṭilya's work. Vide the author's paper on 'Kauṭilya and the Matsya-purāṇa' in Dr. B. C. Law presentation volume II. pp. 13–15.

In the matter of the administration of justice and the law of succession and inheritance also some of the Purāṇas have influenced the views of writers of *nibandhas*. The Kṛtya-kalpataru on Vyavahāra quotes about twelve verses from the Kālikā-purāṇa on the marks of a truthful party or witness and on the appropriate ordeals in the case of the several varṇas,[1636] their procedure and the different causes of action (vide pp. 79, 205, 210, 211, 221, 231, 238). Three verses from the Kālikā (chap. 91. 35–37) about the twelve kinds of sons and the impropriety of making a punarbhava, svayamdatta and a *dāsa* successor to a kingdom are quoted in the R. N. P. pp. 35 and 42. Verses 38–41 of Kālikā, chapter 91, about the sons that can be adopted and the age up to which they can be adopted are quoted by the Dattakamīmāṁsā p. 60 (Ānan. ed.) and by the Vyavahāramayūkha p. 114, though the latter remarks that they were not found in two or three mss. of the Purāṇa.[1637] In connection with the question of the seniority among twins the Mayūkha quotes Śrīdhara's comment on Bhāgavata (III. 19. 18) that the son born first is the younger one; but the Vyavahāramayūkha[1638] makes the interesting remark that in the Purāṇas practices opposed to the smṛtis are frequently seen.

1636. The three verses on pp. 210–211 beginning with 'paradārābhi-śāpe' &c. in Kṛtyakalpataru are quoted also by the Vyavahāramayūkha p. 45 and the Rājadharmakaustubha p. 408.

1637. यत्तु कालिकापुराणे—पितुर्गोत्रेण यः पुत्रः···गृहीत्वा पञ्चवर्षीयं पुत्रेष्टिं प्रथमं चरेत्॥ तदसगोत्रपरम्। ···इदं तु वचो न तथा विश्रम्भणीयं द्विव्यकालिकापुराणपुस्तकेष्वदर्शनात्। व्य. म. 114 (B. O. R. I. ed. 1926).

CHAPTER XXV

Causes of the Disappearance of Buddhism from India.

At the beginning of Chapter XXIV (pp. 913-14, n 1448) above, it was stated that the Purāṇas had a large share in bringing about the final disappearance of Buddhism from India, the land of its birth. The disappearance of Buddhism from India was complete and seemed to be sudden and is a complex problem. No single cause, nor even a few causes can fully account for this phenomenon. A combination of causes, both internal and external, must have been in operation for a pretty long time to bring about this remarkable event. It may be admitted that some of the causes are more or less conjectural. In the first quarter of the 5th century A. D. Fa-Hian found Buddhism in a flourishing condition in India, while in the first half of the 7th century A.D. Yuan Chwang appears to say that the decline of Buddhism had set in. It-sing found Buddhism very much on the decline in the beginning of the 8th century A.D. An attempt will be made here to discuss briefly the several causes that have been put forward by scholars for explaining the almost total disappearance of Buddhism from India. A few of the contributions bearing on this subject may be noted here. 'Religions of India' by A. Barth, translated by J. Wood (1882) pp. 133-139; Journal of Pali Texts Society (1896 pp. 87-92) on 'Persecution of Buddhists in India' by Rhys Davids; Kern's 'Manual of Buddhism' (in the German Grundriss pp. 133-134); 'Buddhist India' by Rhys Davids (1903, pp. 157-158, 319); I. H. Q. vol. IX pp. 361-371 (where the causes of the disappearance of Buddhism emphasized by M. M. Haraprasad Shastri are enumerated); 'The Sum of History' by René Grousset, translated by A. and H. Temple Patterson pp. 101-105 (Tower Bridge Publications, 1951); 'The Decline of Buddhism in India' by Dr. R. C. Mitra (1954), particularly pp. 125-164; 'Life and Teaching of Buddha' by Devamitta Dharmapala (G. A. Natesan & Co., Madras, 1938); '2500 years of Buddhism' edited by Prof. P. V. Bapat, 1956 pp. 360-376; 'The Path of the Buddha' by Prof. Kenneth W. Morgan pp. 47-50 (New York, 1956); 'How Buddhism left India' by N. J. O'Connor, Ralph Fletcher Seymour, Chicago (1957).

Before setting out the main causes of the virtual disappearance of Buddhism from India certain general points have to be emphasized. Buddha was only a great reformer of the Hindu religion as practised in his time. He did not feel or claim that he was forming a new religion, nor did he renounce the Hindu religion and all its practices and beliefs. The Buddha referred to the Vedas and Hindu sages with honour in some of his sermons. He recognised the importance of Yogic practices and meditation. His teaching took over several beliefs current among the Hindus in his day such as the doctrine of Karma and Rebirth and cosmological theories. A substantial portion of the teaching of Buddha formed part of the tenets of the Upaniṣadic period. At the time when he was born there were two main currents of thoughts and practices prevalent among the people, one being the path of sacrifices to Gods and the other being the path of moral endeavour, self-restraint and spiritual goal. It has been shown above (pp. 917–918) how the Upaniṣads assigned a lower position to the Vedas and the sacrifices enjoined therein and how spiritual knowledge after cultivating high ethical qualities was deemed greater than sacrifices. The Upaniṣads first began by symbolical interpretation of Vedic sacrifices, as for example in Bṛ. Up. I. 1. 1, where Uṣas, Sūrya and Saṁvatsara are said to be respectively the head, the eye and the soul of the sacrificial horse or as in Chān. Up II. 2. 1–2, where the five parts of the Sāman employed in a sacrifice are symbolically identified with earth, fire, sky, sun and heaven. Then they proceed to belittle the Veda as mere name and as much inferior to *brahmavidyā* (e. g. Bṛ. Up. IV. 4. 21, I. 4.10, Chān. Up. VII. 1–4, Muṇḍaka I. 1. 4–5. It is generally held by all Sanskrit scholars that at least the oldest Upaniṣads like the Bṛhadāraṇyaka and the Chāndogya are earlier than Buddha, that they do not refer to Buddha or to his teachings or to the *piṭakas*. On the other hand, though in dozens of *Suttas* meetings of brāhmaṇas and Buddha or his disciples and missionaries are reported they almost always seem to be marked by courtesy on both sides. No meetings are recorded in the early Pali Texts or brahmanical Texts about Śākyans condemning the tenets of ancient brahmanism or about brāhmaṇas censuring the Bauddha heterodoxy. Besides, in all these meetings and talks, the central Upaniṣad conception of the immanence of *brahma* is never attacked by Buddha or by the early propagators of Buddhism. What Buddha says may be briefly rendered as follows: "Even so have I, O Bhikkhus, seen an ancient path, an ancient road followed by

rightly enlightened persons of former times. And what, O Bhikkhus, is that ancient path, that ancient road, followed by the rightly enlightened ones of former times? Just this very Noble Eightfold Path, viz. right views...&c. This, O Bhikkhus, is that ancient path, that ancient road, followed by the rightly enlightened ones of former times. Along that (path) I have gone and while going along that path, I have fully come to know, old age and death. Having come to know it fully, I have told it to the monks, the nuns, the lay followers, men and women; this *brahmacarya* is prosperous, flourishing, widespread, widely known, has become popular and made manifest well by gods and men."[1639] It will be noticed that the Noble Eightfold Path which the Buddha put forward as the one that would put an end to misery and suffering is here expressly stated to be an ancient path trod by ancient enlightened men. Buddha does not claim that he was unique, but claimed that he was only one of a series of Enlightened men and stressed that the moral qualities which he urged men to cultivate belonged to antiquity. In the Dhammapada and the Suttanipāta (Mahāvagga, Vāseṭṭha sutta) the truly virtuous man is spoken of as brāhmaṇa: "I speak of him as brāhmaṇa, who causes no harm (or evil) in body, word and thought, who is guarded as regards these three sources"; 'neither by matted hair nor by lineage, nor by caste, does one become a brāhmaṇa'; 'that man in whom there is truth and righteousness is blessed and is a brāhmaṇa'; 'him who does not cling to desires (or pleasures) as water does not stick to a lotus leaf or as a mustard grain (does not stick) on the top of an awl, I call a brāhmaṇa.'[1640] Moreover, it does not appear that at any time

---

1639. Vide संयुत्तनिकाय (P. T. S.), part II (Nidānavagga) edited by M. Leon Feer pp. 106–107 paragraphs 21–33, a few sentences from which may be quoted here: 'एवमेव खवाहं भिक्खवे अद्दसं पुराणं मग्गं पुराणंजसं पुब्बकेहि सम्मासंबुद्धेहि अनुयातं॥ कतमो च सो भिक्खवे मग्गो पुराणंजसो'''अनुयातो। अयमेव अट्ठंगिको मग्गो। सेय्यथापि समादिट्ठि। '''अयं खो भिक्खवे पुराणमग्गो अनुयातो। तं अनुगच्छिं। तं अनुगच्छन्तो जरामरणं अभिञ्ञासिं। '''तद् अभिञ्ञाय आचिक्खिं भिक्खूनं भिक्खुनीनं उपासकानं उपासिकानं। तयिदं भिक्खवे ब्रह्मचरियं इद्धं चेव फीतं च वित्थारिकं बहुजञ्ञं पुथुभूतं याव देवमनुस्सेहि सुप्पकासितं ति।'

1640. यस्स कायेन वाचाय मनसा नत्थि दुक्कतं। संवुत्तं तीहि ठानेहि तमहं ब्रूमि ब्राह्मणम्॥ न जटाहि न गोत्तेन न जच्चा होति ब्राह्मणो। यम्हि सच्चं च धम्मो च सो सुची सो च ब्राह्मणो॥ वारि पोक्खरपत्तेव आरग्गेरिव सासवो। यो न लिम्पति कामेसु तमहं ब्रूमि ब्राह्मणम्॥ धम्मपद verses 391, 393, 401 (of Dr. P. L. Vaidya's edition of 1934 in Devanāgarī type); सुत्तनिपात (महावग्ग, वासेट्ठसुत्त) has the last verse. With the verse 'na jaṭāhi

(*Continued on next page*)

the whole of India or even large portions of it were completely Buddhistic. The people of India as a whole were always Hindus.[1641]. There were many millions of people at all times who professed Hinduism and not Buddhism. Bssides, even when Buddhism secured the patronage of emperors like Aśoka, Kaniṣka and Harṣa Buddhism was mainly restricted to monasteries and schools and great tolerance prevailed. For example, Harṣa's father was a great devotee of the Sun and he himself is described in his Banskhera and Madhuban plates as a great devotee of Śiva, though his elder brother Rājyavardhana is described as *paramasaugata* (a great devotee of Buddha) and he appears to have shown favour to the Buddhist pilgrim (Yuan Chwang).[1642]

Some recent authors like Prof. K. W. Morgan hold that the most important causes of the disappearance of Buddhism were decline of vigour in the Saṅgha, the Moslem invasions and the opposition of the Hindu community ('The Path of the Buddha' p. 48).

There is a good deal of truth in A. Coomaraswamy's contention that the more profound is one's study of Buddhism and Brahmanism the more difficult it becomes to distinguish between

(*Continued from last page*)

&c.' compare महाभारत, वनपर्व 216. 14-15 'यस्तु शूद्रो वमे सत्ये धर्मे च सततोत्थितः। तं ब्राह्मणमहं मन्ये वृत्तेन हि भवेद् द्विजः॥. Vide H. of Dh. vol. II p. 101 for other passages from the Great Epic similar to these. With the verse वारि पोक्खर-पत्तेव &c. compare Chān. Up. IV. 14. 3 'यथा पुष्करपलाश आपो न श्लिष्यन्त एवमेवंविदि पापं कर्म न श्लिष्यत इति' and Gītā V. 10 'लिप्यते न स पापेन पद्मपत्रमिवाम्भसा'.

1641. Vide for a similar view expressed by a great French *savant* and Sanskrit scholar Prof. L. Renou in 'Religions of ancient India' (University of London, 1953) p. 100.

1642. For Banskhera Plate of the year 22 (of the Harṣa era) i. e. 628-29 A. D., vide E. I. vol. IV pp. 210-211 and for the Madhuban plate of Harṣa in the year 25 i. e. 631-32 A. D., vide E. I. vol. I pp 72-73 (Bühler) and E. I. vol. VII pp. 157-158 (Kielhorn). Yuan Chwang does not mention that Rājyavardhana was a great devotee of Buddha but he tries to paint Harṣa as full of faith in Buddha from the beginning and narrates a fictitious story describing how Harṣa was prevented from mounting the throne and induced to take the title Kumāra by a Bodhisattva who miraculously appeared to him in return for his worship This shows that the accounts by the 'Master of the Law' must sometimes be taken with a pinch of salt. Vide Watters on 'Yuan Chwang's Travels in India' (London, 1904) vol. I p. 343 for this story.

the two or to say in what respects Buddhism is really unorthodox (vide his 'Hinduism and Buddhism' p. 452). Buddha and his successors really attacked some popular varieties of Brahmanism. Mrs. Rhys Davids in her lecture on 'The relations between Early Buddhism and Brahmanism' (published in I. H. Q. vol. X. pp. 274-286) endeavours to show that the Tripiṭakas do not refer to rupture with brāhmaṇas and that what Buddha preached was in agreement with the central tenet of immanence in the Brahmanism of the day. Buddha agreed (or at least had no quarrel) with the Upaniṣad teaching about high moral endeavour being a necessary pre-requisite for *brahma* realization and *mokṣa* (as in Bṛ. Up. IV. 4. 23 'tasmād-evamvic-chānto dānta upratas-titikṣuḥ samāhito bhūtvā ātmanyevātmānam paśyati', Kaṭha Up. I. 2. 23, I. 3, 8, 9, 13, 15, Praśna Up. I. 15–16, Muṇḍaka I. 2. 12–13).

The main matters of controversy between Buddha and the Hindu religious and philosophical system current in his time are generally held to have been caste divisions and pride of caste, the absolute authoritativeness of the Vedas and the great importance attached to sacrifices.[1642a] Buddha asserted that righteousness and wisdom were the best, he did not expressly deny the existence of God but proclaimed that it was unnecessary to be definite nor did he pronounce his definite views on such questions as whether the world is eternal or non-eternal, since according to him, to cogitate on such points would be "a thicket of theorizing, wilderness of theorizing, the tangle of theorizing, the bondage and shackles of theorizing ..... nor would it conduce to aversion, passionlessness, tranquillity, peace, illumination and *nirvāṇa*."[1643] Buddha did not think much

---

1642 a. Barth in 'Religions of India' (pp. 125–126) scouts the theory that the institution of the Saṅgha and primitive Buddhism were a reaction against the regime of caste and the spiritual yoke of the brāhmaṇas and calls that theory 'a fiction of romance.'

1643. Vide Majjhima-nikāya (Cūla-Māluṅkyasutta and Aggi-vaccagotta-sutta) ed. by V. Trenkner, vol. I suttas 63 and 72 pp. 431 and 486 'न निब्बिदाय न विरागाय न निरोधाय न उपसमाय न अभिञ्ञाय न सम्बोधाय न निब्बानाय संवत्तति.' These very words occur in the Poṭṭhapada-sutta of the Dīgha-nikāya when Buddha was asked by Poṭṭhapada whether the world was permanent or otherwise, whether it was without end or not, whether the soul (jīva) and body were different and he replied that he did not expound these matters because they served no purpose and did not lead to nirvāṇa (Pali Texts Society, vol. I pp. 188–189 para 28).

of worship or prayer. According to him, what mattered was the deliverance of man from sorrow and suffering and the attainment of nirvāṇa[1643a] (which state he did not care to define clearly and precisely). The original doctrine (called *hīnayāna*, 'the lesser way or vehicle') held that the experience of enlightenment and *nirvāṇa* can be secured by human beings in this very life if they follow the path chalked out by Buddha.

The causes that have been advanced from time to time by scholars for the total disappearance of Buddhism from India must now be dealt with. (1) Persecution is alleged by some scholars as at least one of the main causes. King Puṣyamitra of the Suṅga dynasty is charged with having proclaimed that whoever would bring to him the head of a *śramaṇa* would receive one hundred *dīnāras*;[1644] Mihirakula, king of Kashmir,

---

1643 a. The word 'Nirvāṇa' literally means 'blown out, extinguished, or become cooled'. Taking the view most favourable to Buddha's teaching, it implies the blowing out or extinction of the fires of *kāma* (lust or desire), *krodha* (anger or ill-will), *moha* (ignorance or stupidity) and transformation of these into moral purity, goodwill (or charity) and wisdom. It is not like the Biblical Heaven. It is a state of perfect enlightenment, peace and bliss, attainable not merely after death, but in this very life and on this earth. It is really indescribable as stated in the Pali Udāna VIII 'unbecome, unborn, unformed &c.' and resembles the words used in speaking of *brahma* as 'neti neti' in Bṛ. Up. II. 3. 6, IV. 2. 4, IV. 4. 22, IV. 5. 15.

1644. The words in the Aśokāvadāna No. 29 (the Divyāvadāna ed. by Cowell and Neil, Cambridge, 1886, p. 434) 'यावत् पुष्यमित्रो यावत्सङ्घनरामं निर्ह्रत्य प्रवातयन् प्रस्थितः। स यावच्छाकलमनुप्राप्तः। तेनाभिहितम्। यो मे श्रमणशिरो दास्यति तस्याहं दीनारशतं दास्यामि। ...यदा पुष्यमित्रो राजा प्रवातितस्तदा मौर्यवंशः समुच्छिन्नः'. Puṣyamitra is said by most authorities to be a Śuṅga and was called *senānī* in the Purāṇas, in Harṣacarita (VI) and in the Ayodhyā Inscription (in E. I. vol. 20 p. 54), while the above *avadāna* calls him Maurya. This shows either the ignorance of the writer of the Divyāvadāna (which is a late work) or the text itself may be incorrect or corrupt. Vide Pro. of the 6th Indian History Congress (Aligarh, 1943) pp. 109–116 where Mr. N. N. Ghosh propounds the theory that Puṣyamitra did persecute Buddhists, though his successors did not; on the other hand Dr. Ray Chaudhari in 'Political History of India' (5th ed.) does not agree to the theory of persecution by पुष्यमित्र. In the Āryamañjuśrī-mūla-kalpa (T. S. S. part III, 53rd chapter pp. 619–620) it is stated in a prophetic vein that a certain king called Gomimukhya (and also Gomiṣaṇḍa) extending his rule from East India to Kashmir will make Buddha's *śāsana* (system) disappear, will destroy *vihāras* and kill monks'. K. P. Jayaswal in 'Imperial History of India in a Sanskrit text' (p. 19) holds that Gomimukhya is a concealed name for

(Continued on next page)

is accused by Yuan Chwang (or more correctly, Hsuan Tsang according to some modern writers) with having overthrown Buddhist topes in Gandhāra, with destruction of monasteries and the slaughter of myriads of Buddhists (vide 'In the footsteps of Buddha' by René Grousset pp. 119–120 on Mihirakula, the Indian Attila); king Śaśāṅka is said by Yuan Chwang to have destroyed the Bo-tree (*Bodhidruma*), replaced the image of Buddha by one of Maheśvara and to have destroyed the religion of Buddha and dispersed the order (vide Beal's 'Buddhist Records of the Western World' Vol. II. pp. 118, 122 and Watters on 'Yuan Chwang's Travels' Vol, II, pp. 115–116); king Sudhanvan is supposed to have issued at the instigation of Kumārila [1644a] a proclamation to take effect from the Himālayas to Cape Comorin (which is palpably absurd) that he would put to death any servant of his who did not kill the Buddhists. These instances are carefully examined by no less a scholar than Rhys Davids in the Journal of the Pali Texts Society for 1896 (pp 87–92). After adverting to the facts that there is nothing about persecution in the Pali Piṭakas, that the tone of Pali books is throughout appreciative of brāhmaṇas, that no details are given and that hardly any names of persons suffering by

---

(*Continued from last page*)

Puṣyamitra, that the portion above quoted was written about 800 A. D. and was translated into Tibetan in 1060 A. D. (Intro. p. 3). Vide 'Puṣyamitra and the Śuṅga Empire' by Ramaprasad Chanda in I.H.Q. vol. V pp. 393–407 at p. 397 (for the concluding sentences of the Divyāvadāna in English) and pp. 587–613 and a recent paper on 'Puṣyamitra Śuṅga and Buddhists' by Hari Kishore Prasad in JBRS. vol. 40 pp. 29–38.

1644a. Vide also 'Buddhist India' by Rhys Davids pp. 318–320 (5th ed. of 1917, the first being of 1903) about persecution and 'Life and Teaching of Buddha' by Devamitta Dharmapala p. 7 about Kumārila and Śaṅkara having waged only a polemic war and nothing more. The Tantravārtika of Kumārila also suggests that the Buddhists were afraid of polemic skirmishes with the Mīmāṅsakas and that, while stating in one breath that everything is momentary, the Buddhists at the same time foolishly boasted that their sacred texts also were eternal, borrowing that idea from the Vedic doctrines; यथा मीमांसकत्रस्ताः शाक्यवैशेषिकादयः। नित्य एवागमोऽस्माकमित्याहुः शून्यचेतनम् ॥ p. 235; तत्र शाक्यैः प्रसिद्धापि सर्वक्षणिकवादिता। त्यज्यते वेदसिद्धान्ताज्जल्पद्भिर्नित्यमागमम् ॥ p. 236. Vide note (2011) which will show that Kumārila was prepared to admit the usefulness of Buddha's teachings up to a certain point. Other literary works also show that it was a polemic war e. g. the वासवदत्ता of सुबन्धु (not later than 6th century A. D.) says 'केचिज्जैमिनिमतानुसारिण इव तथागतमतध्वंसिनः' (p. 144, Hall's ed.).

persecution are mentioned, he asserts that he does not believe in these stories, but adds that he does not go so far as to maintain that there is no truth at all in the legend about Puṣyamitra (but judgment must be reserved in view of the text in the *avadāna* being corrupt and the author of it being grossly ignorant). As to the legend about Sudhanvan and Kumārila he holds that of all the cases of alleged persecution this is the weakest and that it is no more than boastful and rhetorical exaggeration.[1645] Rhys Davids emphasizes that the adherents of both faiths so diametrically opposed to each other lived in continuous peace side by side for a thousand years, that this redounds to the credit of the whole Indian people from the time of Aśoka

---

1645. In the शङ्करदिग्विजय of माधवाचार्य it is stated (I. 56 and 59) that king Sudhanvan was an avatāra of Indra and Kumārila of Skanda (who is also known as Kumāra). The order of Sudhanvan is couched in that work as follows: व्यधादाज्ञां ततो राजा वधाय श्रुतिविद्विषाम्। आ सेतोरा तुषाराद्रेर्बौद्धानाबृद्ध-बालकम्। न हन्ति यः स हन्तव्यो भृत्यानित्यन्वशान्नृपः॥ (शङ्करदिग्विजय I. 92-93). This seems to be a palpably absurd legend. No king in ancient India, much less one called Sudhanvā, ruled over the vast territory from the Himālayas to Rāmeśvara. Further, it may be noted that the order, supposing one was issued, was addressed only to the king's servants and not to one and all. The Śaṅkaradigvijaya (XV. 1) states that when Śaṅkarācārya started on a pilgrimage to Rāmeśvara king Sudhanvan accompanied him. Mādhavācārya, being blinded by his zeal to glorify his hero to the utmost, goes on heaping one legend on another and casts all history and chronology to the winds. For example, he narrates that Ācārya Abhinavagupta (a great Śaiva and Tāntrika teacher) was vanquished by Śaṅkara in disputations (XV. 158) and that Abhinavagnpta practised black magic against the great Ācārya. From Abhinavagupta's own works it appears that his literary activity lay between 980 to 1020 A. D. (vide the author's 'History of Sanskrit Poetics', 1951, pp. 231-232), while no scholar would place Śaṅkarācārya later than 800 A. D. Mādhavācārya also says (XV. 157) that Śaṅkara vanquished by his arguments Śrīharṣa, author of Khaṇḍanakhaṇḍa-khādya, who could not be vanqnished by Guru, Bhaṭṭa and Udayana. Śrīharṣa flourished about the end of the 12th century A. D. Taranath in his 'History of Buddhism' says 'It was probably about this time that the terrible enemies of the Buddhists, Śaṅkarācārya and his disciple Bhattā-cārya appeared, the former in Bengal and the latter in Orissa. A short time after the Buddhists were persecnted in the South by Kumāralila and Kaṇādaruru; here mention is made of the Buddhist king Śālivāhana, though the Buddhists relate that in the end Dharmakīrti triumphed in the discus-sion with Kumāralila, Śaṅkarācārya or Bhaṭṭācārya &c. (I. A. vol. IV. p. 365). It will be noticed how the account is altogether confused. Vide Dr. Mitra's 'Decline of Buddhism' p. 129.

downwards and that India never indulged in persecution in anyway approaching to the persecution of reforming Christians by the orthodox Church or the persecution of Christians by the Roman authorities. Dr. R. C. Mitra in "Decline of Buddhism in India" (pp. 125–130) arrives at the same conclusion about the cases of persecution. Barth (in 'Religions of India' p. 136) admits that everything tends to prove that Buddhism became extinct from sheer exhaustion and that it is in its own inherent defects that we must seek for the causes of its disappearance. He prefaces this remark with the words 'the most reliable documents, coins and inscriptions, bear evidence of a tolerance exceptionally generous on the part of the civil powers' (p. 133) and illustrates this by examples.[1645a] It should be noted that great Smṛtikāras like Yājñavalkya laid down that when an Indian king reduced a kingdom to subjection, it was the conqueror's duty to honour the usages, the transactions and family traditions of the conquered country and to protect them. Aśoka, though himself a believer in Buddha's teachings, shows great

---

1645 a. यस्मिन्देशे य आचारो व्यवहारः कुलस्थितिः । तथैव परिपाल्योऽसौ यदा वशमुपागतः ॥. Nothing is gained by a total denial of even sporadic cases of religions persecution and vandalism. But such cases are very few and their very paucity emphasizes and illuminates the great religious tolerance of the Indian people for more than two thousand years. One interesting instance is found in an inscription from Ablur published in E. I. vol. V pp. 213 ff (at p. 243), where the story is told of an intense devotee of Śaivism named Ekāntada Rāma, who, in a controversy with the Jainas of Huligere (Lakṣmeśvara) led by a village headman named Saṅkagauḍā made a wager in a writing on palmyra leaf to the effect that he would cut his own head, place it at the feet of Somanātha in Huligere and have the head restored after seven days and that, if he succeeded, the Jains were to give up their faith and God. Ekāntada Rāma succeeded, but the Jainas refused to destroy the image of Jina, whereupon Rāma routed the horses and guards sent by the Jainas, laid waste the Jaina shrine and built a big Śiva shrine there. The Jainas complained to king Bijjala who sent for Rāma and questioned him. Rāma produced the writing containing the terms of the wager, but offered to perform the same feat. The Jainas were not prepared to face the same test again. Bijjala asked the Jainas to live peaceably with their neighbours, gave a *jayapatra* (document of Rāma's success) and granted a village to the temple of Somanātha. It is clear that a Jain image was overthrown and a Śaiva one was substituted by Rāma (leaving aside the superhuman feat ascribed to him). Rāma is to be placed shortly before 1162 A. D. There is a great difference between local brawls as in the above case and a general policy by a community or a king of wholesale persecution.

tolerance by requiring honour to be shown to all beliefs and sects in his 12th Rock Edict in the words 'Neither praising one's own sect nor blaming other sects should take place,' that 'other sects ought to be duly honoured in every case', that 'concord (samavāya) alone is meritorious, that is they should both hear and honour each other's Dhamma'.[1646] In the 7th Pillar Edict (Delhi-Topra p. 136) Aśoka proclaims that he appointed officers called Mahāmātras to look after the Saṅgha (the community or body of preaching Buddhist mendicants), brāhmaṇas, Ājīvikas, Niggaṇṭhas and all other *pāsaṇḍas* (sects). India has been for thousands of years a country of nearly absolute tolerance, which is literally a religion, while European religiosity has nearly always been intolerant and, when not intolerant, it is tantamount to mental hostility or complete indifference. Most Indian religious people were and are ready to agree that there may be alternative approaches to the mystery of life and the salvation of the soul. Indians feel amused at the claims of millions of people that some prophet revered by them has got the monopoly of the knowledge of God and the Hereafter. This tolerance for differing tenets and cults persisted in India with rare exceptions throughout the long stretch of time from centuries before Aśoka onwards till about 1200 A. D. when Moslems overran India. A few striking instances (both early and late) may be cited here: (1) Khāravela again, a Jain king of Kaliṅga (2nd or 1st century B. C.), granted freedom from taxation to brāhmaṇas in the 9th year of his reign (E. I. vol. XX. p. 79 and 88); (2) The Nasik cave Ins. No. 10 records that Uṣavadāta, son-in-law of Ksatrapa Nahapāna of the Ksaharāṭa lineage made very large gifts to gods and brāhmanas on the

1646. Vide 'Inscriptions of Aśoka' ed. by Dr. Hultzsch (1925) pp. 20–21 for the text and translation of the Rock Edict from Girnar. Dr. Minakshi in 'Administration and Social life under the Pallavas' (University of Madras, 1938, pp. 170–172) after remarking that Pallava monarchs as a class were tolerant towards all religious sects, points out that king Pallavamalla indulged in some harsh methods and persecution. Prof. Arnold Toynbee in 'East and West' (Oxford Uni. Press) points out that Christianity and Islam have seldom been content to follow the practice of 'live and let live' and that both of them have been responsible for some of the bitterest conflicts and cruellest atrocities that have disgraced history' (p. 49). Similarly, V. O. Vogt in 'Cult and Culture' condemns the unbending arrogance of Moslems and Christian Missionaries in their claims of revealed authority and laments that religion will meet disaster unless it universalizes its own conception of Revelation to embrace the future as well as the past (p. 70).

banks of sacred rivers and at Bharukaccha (modern Broach), Daśapura, Govardhana and donated a field for feeding a congregation of Buddhist monks (E. I. Vol. VIII p. 78); (3) The Gupta kings were generally devotees of Viṣṇu but they also made gifts to Buddhist monks e. g. Gupta Inscription No. 5 ('Gupta Inscriptions' ed. by Fleet pp. 31–34) records a grant by Āmrakārdava (an officer of Chandragupta II) to an Āryasaṅgha in the Gupta year 93 (412–3 A. D.); (4) Siri Chāntamūla I, an Ikṣvāku king of Śrīparvata in Āndhradeśa, had performed Agniṣṭoma, Vājapeya and Aśvamedha sacrifices but the ladies of that family were almost all Buddhist and one of them erected a pillar in honour of the supreme Buddha (E. I. Vol. XX. p. 8 and Jayaswal's 'History of India' 50–350 A. D., p 175); (5) The Maitraka rulers of Valabhī (in Kathiawar) were all orthodox Hindus and almost all are described as great devotees of Maheśvara (Śiva). The Journal of the University of Bombay vol III. (pp. 74–91) sets out five grants (four Buddhist and one to a brāhmaṇa) The first is issued by a feudatory Gārulaka Mahārāja Varāhadāsa in Valabhī year 230 (= 549 A.D.) and the others by the Valabhī kings themselves. The four Buddhist records make grants to Yakṣaśūra-vihāra and Pūrṇabhaṭṭa-vihāra (both monasteries for nuns) of lands and villages for providing garments, food, beds, seats and medicines to the nuns and for providing for incense, flowers, sandalwood &c. for the worship of Buddha images; (6) A king of Orissa, named Śubhākaradeva, who was son of a Buddhist king and who styles himself *paramasaugata*, made a grant of two villages in the latter half of the 8th century to a hundred brāhmaṇas belonging to various gotras (E. I. vol. 15 at pp. 3–5 Neulpur grant); (7) Vigrahapāla, king of Bengal, who belonged to the Buddhist Pāla dynasty, granted in the 12th year of his reign a village to a Sāmavedi brāhmaṇa after taking a bath in the Ganges on a lunar eclipse in honour of Buddha (Bhagavantam Buddhabhaṭṭārakam uddiśya) by the Amgacchi grant (E. I. Vol. XV. p. 293 at pp. 295–298, about 1000 A. D.); (8) The successor of king Vigrahapāla (iii) by name Mahīpāla granted a village in honour of Buddha after a bath in the Ganges in Viṣuva-saṅkrānti to a brāhmaṇa (E. I. Vol. XIV. p. 324); vide also I. A. vol. 21 pp. 253–258 for a grant of Devapāladeva, a Buddhist king of Bengal, about the end of the 9th century, recording a grant of a village to a learned brāhmaṇa. (9) In the Kalacuri stone Inscription from Kasia (E. I. vol. XVIII p. 128) the first invocation in prose is to Rudra and then to Buddha, the first two

verses are in praise of Śaṅkara, 3rd in praise of Tārā (a Buddhist deity) and the 4th and 5th verses praise Buddha (who is styled Munīndra); (10) Kumāradevī, 4th queen of Govindacandra (1114–1154 A. D.), a Gāhaḍavala king of Kanauj and an orthodox Hindu, built a *vihāra* in which she placed an image of Dharma-cakra Jina i. e. Buddha (vide E. I. Vol. IX p. 319 at p. 324); (11) Govindacandra himself made a gift of six villages to a Buddhist learned ascetic (Śākyarakṣita by name) who hailed from Utkala (Orissa) and to his pupil for the benefit of the Saṅgha at Jetavana Mahāvihāra (vide the Saheṭ-Maheṭ plate of Govindacandra dated *saṁvat* 1186, i. e. 1128–29 A. D. recorded in E. I. vol. XI p. 20 at p. 24). (12) The Madanapur plate of the Buddhist king Śrīcandra[1647] of East Bengal records that the king made a grant of land to a brāhmaṇa named Śukradeva 'in honour of Buddha-bhaṭṭāraka' after having bathed on the Agastitṛtīyā day. (13) The Dambal (inscription of the times of Cālukya Tribhuvanamalla alias Vikramāditya (in śaka 1017 i. e. 1095–96 A. D.) begins with an invocation to Buddha and records certain grants to two vihāras, one of Buddha built by certain Seṭṭis of Dharmāpura or Dharmavoḷal (i. e. Dambal in Dharwar District) and the other of Tārādevī by a Seṭṭi of Lokkiguṇḍi (or modern Lakkuṇḍi). (14) In E. I. vol. XVI p. 48 at p. 51 (Inscription of Lakṣmeśvara in 1147 A. D.) a general is styled as the restorer of the four sects viz. Śaiva, Vaiṣṇava, Bauddha and Jaina (catuḥ-samaya-samuddharaṇam). (15) A stone inscription from Śrāvastī (modern Saheṭ-Maheṭ) of (Vikrama) saṁvat 1276 (1219–20 A. D.) records that a certain person Vidyādhara of the Vāstavya family established a convent for Buddhist ascetics at the town where the inscription was put up (I. A. Vol. 17 p. 61). (16) The Kumbhakoṇam Inscription of Sevappa Nāyaka of Tanjore (of 1580 A. D.) records the gift of some land in the brāhmaṇa village (*agrahāra*) of Tirumaliarājapuram to an individual attached to a temple of Buddha at Tiruvilandura.[1648]

1647. There is divergence of views about the date of Śrīcandra. Vide Dr. R. C. Majmudar's 'History of Bengal', vol. I p. 196 (where the beginning of 11th century A. D. has been accepted by some scholars as the date of Śrīcandra).

1648. The last two examples indicate that, though Jayacandra of Kanauj was defeated and Kanauj was taken by the Mahomedans in 1193 A. D., Buddhism had not become totally extinct in North India in the first quarter of the 13th century A. D. and that some remnants of Buddhism existed in South India up to the 16th century A. D.

The above examples show that in all parts of India in the North as well as in the South, the general rule among kings and their officers was tolerance and care for all faiths. If there was rarely some persecution it was by an individual king or officer or the like. On the other hand, though Aśoka, as an inheritor of the Indian royal tradition of showing honour and respect to all faiths of the subjects irrespective of his own religious views, breathes a striking spirit of tolerance in his 7th and 12th Rock edicts, one cannot help a suspicion that in the later part of his life he seems to gloat over the fact that the gods worshipped as divinities in Jambudvīpa had been rendered false and he proudly proclaims that this result is 'not the effect of my greatness but of my zeal'.

It should be noted that even Aśoka's ahimsā was at first not thorough-going but qualified. In his first Rock Edict he himself states that in his royal kitchen thousands of animals were killed, but that he had reduced the slaughter to two peacocks a day and one deer (that too rarely) and that even the three animals would not be killed in future (vide C. I. I. vol. I pp 1–2). Whether this last promise was really carried out is not clear. Besides, Aśoka appears to have carried his solicitude for the protection of all life too far and used against human beings his absolute power like a dictator. In the 4th Delhi Topra Pillar edict (C. I. I., vol. I p. 124) he mentions that his revenue settlement officers called Lajūkas had to deal with many hundred thousands of men and were given the discretion to award punishments including the *death sentence* and that a respite of three days was allowed in which the relatives of the man condemned to death could persuade the lajūkas to grant reprieves. In the fifth Delhi-Topra pillar edict (*ibid.* pp 125–128), after 26 years of his being anointed he declared that 23 kinds of birds and other animals (such as parrots, *mainas*, ruddy and wild geese, doves, certain kinds of fish, tortoises) were not to be killed at all, that ewes and sows that were with young or were in milk or the young of these that were less than six months old were also not to be killed; he also forbade the sale of fish on certain Full Moon days and the days previous to them and following them, the castration of bulls, rams, horses on 8th, 14th and 15th days of a month and the branding of horses and bulls on Puṣya and Punarvasu and on cāturmāsis. These sweeping regulations must have caused great hardships to poor people and must have assumed the form of rigid coercion more or less, particularly

when all discretion was left to the lajūkas. Later in life Aśoka appears to have tried to undermine the worship of Hindu Gods. In a Rupnath Rock Inscription[1649] published by Bühler in I. A. vol. VI pp. 154–156 it was stated that he had been an *upāsaka* (lay worshipper of Buddha) for certain years but that he was not zealous, that for a year or more (he had become zealous), that during that (last interval) those gods that were held to be true gods in Jambudvīpa (i. e. India) had been made (to be regarded as) false and that was the reward of his zeal. This could be construed as saying that when he became a zealous Buddhist he tried to dissuade people from the

---

1649. The important words in the Rock edict at Brahmagiri, Rūpanāth and six other places are quoted here (there are slight variations and some omissions in almost all of them here and there); I follow the reading in the Rūpanath text given by Prof. Jules Bloch in 'Les Inscriptions d' Aśoka' (Paris, 1950 pp. 145–148) 'देवानं पिये देवमाह · सातिरेकानि अढतियानि व (स्सानि) य सुमि पाकासके (उपासके?) नो चु बाढि पक्कते (पक्कन्ते) · सातिलेके चु छवच्छरे य सुमि हकं संघ (संघे) उपेते बाढि च पक्कन्ते · या इमाय कालाय जम्बुदिपस्सि अमिस्सा देवा हुसु ते दानि मिस्सा कटा · पक्कमस्स हि एस फले · नो च एसा महत्तता पाप्पोत्तवे · खुदकेन पि पक्कमिनेन सकिये विपुले पि स्वगे आरोढेवे · (the rest is omitted). The Erragudi copy of the edict reads 'इमिना चु कालेन अमिस्सा सुनिस्सा देवेहि ते दानि मिस्सिभूता'. Two others from near by regions read इमिना चु कालेन अमिस्सा समाना सुनिस्सा जम्बुदीपस्सि मिस्सा देवेहि · There are some gaps and mistakes in these and it is not clear what is meant. Probably the sentence in these latter may be rendered 'During that time men that were true (or, if we take *amissā* as equal to amiśrā 'that were not mixed with gods') became false (or, became mixed with gods'). The words from पक्कमस्स onwards mean 'this is the result of zeal; it cannot be attained by greatness (by one occupying a merely high position); even for a small person it is possible to reach heaven by zeal.' Mr. Ramchandra Dikshitar in Prof. Rangaswami Aiyangar Presentation volume pp. 25–30 argues that Aśoka was a Hindu as he refers to 'Svarga'. This is not correct, since the edict itself recites that Aśoka had been a lay follower of Buddha for more than 2½ years before the date of the edict and that for more than a year before it he approached the community of monks and became a zealous Buddhist (or probably a monk). Even early Pali works speak of Gods from heaven coming to pay respect to Buddha. So the mere mention of *svarga* means little. Aśoka does not appear to have been trained in the sacred Pali books if any existed. He hardly ever mentions nirvāṇa, never mentions fundamental tenets of early Buddhism (in all his numerous edicts) like the Four Noble Truths or the Noble Eight-fold Path or Pratītya-samutpāda. He was probably attracted by Buddha's teachings on moral endeavour and subscribed to them and disliked sacrifices. He appears to have believed in gods and desired that the people should strive for heaven (vide 6th Rock edict at Girnar 'परत्र च स्वर्गं आराधयन्तु' and similar words in the 10th Rock edict). This is all that can be said positively.

worship of gods and probably resorted to coercive measures in that direction. This very inscription is edited at C. I. I., Vol. I. pp. 166 by Dr. Hultzsch and the translation of the important sentence is changed and is given as 'And those gods who during that time had been unmingled with men in Jambudvīpa have now been made (by me) mingled with them; for this is the fruit of zeal'. This new translation cannot be understood as it stands and on p. 168 (note 3) Hultzsch admits that this sentence is enigmatical and tries to show that it refers to religious shows at which effigies of gods were shown in order to convey to the subjects that they would be able to reach the abodes of gods by the zealous practice of Buddha's Dhamma. This interpretation is extremely far-fetched and does not fit into the context. How can the mere showing of exhibitions and their effect on people be regarded as the reward of zeal? Besides, in the very first rock edict he forbids assemblies or festival meetings (C. I. I. vol. I. p. 1 'na ca samājo kattavyo)' except such as were regarded good by Aśoka and asserts that the king sees great evil in festival meetings. Aśoka probably followed what Āp. Dh. S. I. 11. 32. 19 provides for Vedic householders 'sabhāḥ samājāṁśca' (varjayet), sabhā meaning 'gambling hall'. The author is not satisfied with the translation of Hultzsch, particularly when Bühler and Senart (pp. 168 note) agreed as to the meaning of the important sentence about gods.[1650]

About Emperor Harṣa also Yuan Chwang narrates that he caused the use of animal food to cease throughout the five Indies and he prohibited the taking of life under severe penalties (vide Watters' work cited above p. 344). This also must have been felt by large populations as coercive and bordering on persecution. It is remarkable that Harṣa felt no qualms in reconciling his zeal for bird and animal life and keeping vast armies on a war footing for conquest.

1650. Hultzsch himself in JRAS for 1910 at p. 1310 translated 'those who at that time were (considered by me) the true gods of Jambudvīpa are now considered false (by me)'. The Mysore texts of this edict insert 'men' after the word 'those'. The great difficulty is about the words 'amissā' and 'missā kaṭā'. They may respectively stand for 'amṛṣā' (not false) or 'amiśrā' (not mixed) and 'mṛṣā kṛtā' (made false) or miśrā kṛtā (made mixed). There is no word for 'considered'. A straightforward translation of 'amissā devā husu' would be 'that were the true (not false) gods' and of 'missā katā' would be 'were made false'.

A few more striking examples of tolerance of other faiths and spirit of accommodation may be cited here. The great Hindu emperor Samudragupta allowed the building of a splendid three-storied convent at Bodh Gaya at the request of the Buddhist king Meghavarṇa of Ceylon about 360 A. D. Vide 'Early History of India' by V. A. Smith (4th ed. of 1924 pp. 303–304), where the historian further points out that when Yuan Chwang visited Bodh Gaya, that convent was a magnificent establishment occupied by a thousand monks. One Muhammad Ufi relates an anecdote. Though Mahomed of Gazni plundered Kathiawad and Gujarat several times and desecrated temples, the Hindus made a distinction between such invading and destructive marauders and peaceful Muslims residing in Gujarat for trade. Some Hindus at Cambay, being incited by some Parsis, destroyed a mosque and killed some Muslims. One Muslim that escaped approached the king Siddharāja with a petition. The king in disguise inquired into the matter, punished the offenders, gave to the Moslems one *lakh* of *Balotras* to rebuild the mosque and presented to the Khatib four articles of dress which were preserved in the mosque. Ufi declares that he never heard a story comparable to this. Vide Elliotts' History of India, Vol. II pp. 162–163. The Somanath–Paṭṭan Inscription (in I. A. Vol. XI p. 241) is a most remarkable document. A Muslim ship-owner from Hormuz acquired a piece of land in the sacred town of Somanath–paṭṭan, built a mosque, a house and shops thereon. The purpose of the grant was to confirm the purchase and to provide for the application of the income from the shops for particular Moslem religious festivals to be celebrated by the Shia sailors of Somanath and to provide that the surplus left, if any, was to be made over to the sacred towns of *Mecca and Medina*. It is dated in four eras, first in Rasul Mahammad *saṁvat* i. e. Hijra year 662, then Vikrama *saṁvat* 1320 (1264 A. D.), Valabhī year 945 and Siṁha saṁvat 151 (i. e. probably of Cālukya Siddharāja Jayasiṁha). Syrian Christians were given special privileges by generous Hindu rulers in South India.

The above examples will indicate what tolerance was practised by Indian kings and people even in the mediaeval period when Moslem invaders were ruthlessly attacking India. The reader should visualise to himself what the fate of a Hindu would have been, if he had the audacity to build a temple in Christian or Moslem countries or tried to collect materials for

describing the Christian or Muslim religion and ways of life in the 13th century A. D. like Alberuni, who was able to collect, without molestation, from Hindu Pandits and people vast material in the 11th century A. D.

How intolerant most Moslem kings were need not be dwelt upon at length. A few typical examples may be cited from the Cambridge History of India, vol. III. Firuz Shah Tughlak burnt a brāhmaṇa who tried to propagate his religion (*ibid.* p. 187); Sikander Lodi did the same (*ibid.* p. 246) to a brāhmaṇa and was guilty of wholesale destruction of Hindu temples; Sultan Sikandar of Kashmir offered his subjects the choice between Islam and exile (*ibid* p. 280); Hussein Shah of Bengal sent an army to destroy Navadvīpa and converted many brāhmaṇas forcibly. Jehangir says in his 'Memoirs' (translated by A. Rogers and edited by H. Beveridge, 1909 pp. 72–73) that he killed Guru Arjun for his religious activities. Vide 'History of Aurangzeb' by Jadunath Sarkar vol. III. chap. XXX. pp. 265–279 for *firmans* to demolish temples such as those of Somanātha, Mathurā, Viśvanātha in Benares, Ujjain and Appendix V. It is not necessary to go into great details about the terrible persecution of the Jews in Europe and the horrible deeds of the Inquisition in Europe and particularly in Spain and Portugal. For the persecution and expulsion of the Jews in Europe one may read 'A short History of the Jewish people' by Cecil Roth (MacMillan and Co. 1936) chapters XX–XXI. References to several works have been given above on p. 933 note 1494 about the Inquisition. A few instances of the intolerance and barbarities of that body may be cited. The Inquisition staged what are called acts of faith or 'autos-da-fé'. In the presence of thousands of people severe punishment would be inflicted on harmless individuals whose adherence to the Holy Catholic faith was suspected. Those that professed penitence were stripped of their property and condemned to imprisonment, deportation or the galley. The minority who refused to confess to their crime of heresy or gloried in their views would be burnt at once. Kings and nobles graced such spectacles by their presence and such spectacles were arranged at the marriages of high persons or on the birth of a son to the reigning monarch. During the three centuries when the Inquisition was active, it is found that the it condemned about 375000 people, of whom at least one-tenth were burnt; vide Cecil Roth's 'A short History of the Jewish people' (1936) p. 312. Henry C. Lea in 'Superstition and

force' (1878) pp. 426-427 remarks 'The whole system of the Inquisition was such as to render resort to torture inevitable. Its proceedings were secret; the prisoner was carefully kept in ignorance of the exact charges against him and of the evidence on which they were based. He was presumed to be guilty and his judges bent all their energies to force him to confess. To accomplish this no means were too base or too cruel'.

It would be instructive to read what the state of Hindus was under Portuguese rule in Goa, where the infamous Inquisition was established in 1560 A. D. and continued its intolerant and inhuman work for about 250 years more. Those interested may consult 'A India Portuguesa', vol. II. published by the Portuguese Government in 1923, particularly the paper by Antonio de Noronha, a former judge of the High Court of Goa, on 'Os Indus de Goa' pp. 211–355. A brief passage from a paper on 'Historical essay on the Konkani Language' by J. H. de Cunha Rivara, who was General Secretary to the Portuguese Governor General in India from 1855 to 1870 A. D., is very illuminating. It runs (original in Portuguese) 'we shall now endeavour to investigate the causes, which under the Portuguese regime, were either favourable or contrary to the culture of the Konkani language. In the first ardour of conquest temples were demolished, all the emblems of the Hindu cult were destroyed and books written in the vernacular tongue, containing or suspected of containing idolatrous precepts and doctrines, were burnt. There was even the desire to exterminate all that part of the population which could not be quickly converted; this was the desire not only during that period, but there was also at least one person who, after a lapse of two centuries, advised the Government, with magisterial gravity, to make use of such a policy.' The writer further notes that the long distance of Goa from Portugal, the invincible resistance offered by a numerous population amongst whom the principal castes had reached a very high degree of civilization, obliged the conquerors to abstain from open violence and to prefer indirect, though not gentle, means to achieve the same end.[1650a].

Buddha's renunciation of his princely position, of his young wife, child and home, to become a wandering ascetic for discovering the path of humanity's deliverance from sorrow and

---

1650a. Quoted from p. 161 of 'The Printing Press in India' by Prof. A. K. Priolkar (Bombay, 1958).

suffering, his subsequent mortification of the body for years, his retirement into solitude for meditation, his struggle with Māra and final victory, his confidence that he had discovered the path of deliverance, his constant travels from city to city and village to village for about forty-five years for preaching the great truths he had discovered, his crusade against the slaughter of innocent and dumb animals in sacrifices, his passing away full of years and in peace and contentment – this panorama of Buddha's life had a noble grandeur and irresistible human appeal. Edwin Arnold in his preface (p. XIII) to his poem 'Light of Asia' (1884) pays a very eloquent tribute to Buddha's teaching in the following words 'this venerable religion which has in it the eternity of an universal hope, the immortality of a boundless love, an indestructible element of faith in the final good and the proudest assertion ever made of human freedom'. The torch lighted by Buddha was kept burning brightly by a succession of able and worthy disciples till Buddhism reached its peak about the 6th century A. D. A reaction had already begun by that time. Substantial changes in the old Buddhist faith had been made, the ideals had changed (as noted above). From being a faith without a clear acceptance of God, many sects arose that had become thoroughly theistic and Buddha himself came to be worshipped as if he were God and the sects were gripped by the strange doctrines and evil practices of Vajrayāna Tāntrik sects; and Buddhism became a medley of conflicting dogmas and was riven with dissensions and internecine rupture. Discussions as to doctrines arose immediately on the passing away of Buddha, when the first council was held at Rājagṛha, a second one being held about one hundred years later at Vesāli and a third one at Pāṭaliputra under Aśoka. In all four councils appear to have been held to secure 'saṅgīti' (standardized scriptural recital) according to traditions, but no Pali book can be traced back to a time before the council held in the time of Aśoka (about 250 B. C.). These discussions and subsequent schisms very much undermined Buddhism. This is mentioned as the first of the four main causes of the decline and disappearance of Buddhism from India by N. J. O'Connor.

III. From about the end of the 7th century A. D. India was divided into several independent but small and warring States. Buddhism could not secure the favour and patronage of powerful and zealous monarchs and emperors like Aśoka, Kaniṣka and

Harṣa. Royal patronage on a large scale having ceased from the end of the 7th century A. D., except under the Pāla kings of Bengal, Buddhism began to wane.

IV. Many of the ablest and most vigorous exponents of Buddhist thought and faith left India for propagating their faith in other lands. Dr. Radhakrishnan in 'India and China' names 24 eminent Indian scholars who went to China for propagating Buddha's teachings from the 3rd Century A. D. to 973 A. D. (p. 27) and also mentions a few Chinese scholars who came to India for visiting the sacred places of Buddhism and for making a study of Buddhism on the spot (*ibid.* pp. 27-28).

V. The observance of the high moral ideals inculcated by Gotama Buddha must have been found irksome by at least a great many of his followers, and particularly after his personal example ceased to exist. In the Mahāparinibbānasutta (S. B. E. vol. XI. p. 127) we are told that Subhadda, a barber who had been received in the Order in his old age, addressed the brethren, that deeply mourned and lamented on Buddha's nirvāṇa, as follows: "Weep not, neither lament. We are well rid of the *Great Samana*. We used to be annoyed by being told 'this becomes you, this beseems you not'. But now we shall be able to do whatever we like; and what we do not like that we shall not have to do." Ordinary people could not be fed for long on mere repetition of the sermon on suffering being the lot of man, on monasticism, aversion to speculation and on promises of nirvāṇa which was hardly ever well defined. By nirvāṇa Buddha probably meant extinction of egoism and desires, a state of bliss beyond understanding and not a complete annihilation or extinction. But this last was the sense in which many understood it. Buddha had an aversion to speculation and particularly to issues that were irrelevant to his purely moral approach and purpose. Several questions of a metaphysical or speculative character such as whether the world is permanent or not, whether it is finite or not, whether the soul is the same as the body or other than the body, whether the Tathāgata continues after death or not were left unanswered by Buddha (vide Majjhima Nikāya discourse 63, Trenckner's ed. vol. I.). Monasteries of Buddhist monks and nuns became in course of time centres of idleness, pleasures and immorality, and of debased practices like those of Vajrayāna Tāntricism. A well-known scholar like Rāhula Sāṅkṛtyāyana, himself a Buddhist bhikṣu, in a paper on 'Vajrayāna and the 84 Siddhas' contributed to the

Journal Asiatique vol. 225 (1934) pp. 209–230 was constrained to say " The monasteries and temples were gorged with riches due to the pious offerings made by the multitudes. The life of the monk became more comfortable than that of the layman. The discipline weakened and many unfit persons entered the community.[1651] The easy life associated with the culture of a sensual art under the cover of cultured paintings, meditation, gods and goddesses must have inclined the minds towards sensuality. Already from the Kathāvatthu[1651a] (XXIII. 1) we know that the Andhaka School was disposed to permit *Maithuna* (copulation) for a special object; it was introduced in the mystic cult. Coming to the south, the practice of mantras, psychical practices, and a certain indulgence in the pleasures of sense were united; the Vajrayāna was complete ".

VI. Smṛtis like those of Gautama (IX. 47, 68, 73), Manu (IV. 176, 206, X. 63), Yājñavalkya (I. 156, III. 312–313), while asking the people to honour the Vedas and learned brāhmaṇas laid great emphasis[1652] on *Ahiṁsā*, truthfulness, charity, self-

---

1651. A paper of Dr. A. S. Altekar in the Pro, of the 17th All India Oriental Conference at Ahmedabad, 1953 (pp. 243–246) on Śramanera-Tīkā (about 11th century A. D.) on the Ācārasāra (laying down rules for Buddhist novices) enumerates admonitions (some of the striking ones being set out on p. 245) that lead to the conclusion that the monks had a fairly large number among them that brought Buddhism into disrepute. In the ' Questions of king Milinda ' S. B. E, vol. 35 pp. 49–50, to the question why people joined the *saṅgha*, Nāgasena gives the significant answer that some joined the saṅgha for the reason that sorrow may perish and no further sorrow may arise, ' the complete passing away without clinging to the world is our heighest aim '; "'some have left the world in terror at the tyranny of kings; some have joined to be safe from being robbed, some harassed by debts and some perhaps to gain a livelihood.

1651 a. एकाधिप्पायो मेथुनो धम्मो पटिसेवितब्बो ति। आमन्ता। कथावत्थु XXIII, 1.

1652. अहिंसा सत्यमस्तेयं शौचमिन्द्रियनिग्रहः। एतं सामासिकं धर्मं चातुर्वर्ण्येऽब्रवीन्मनुः॥ मनु X. 63; अहिंसा सत्यमस्तेयं शौचमिन्द्रियनिग्रहः। दानं दमो दया क्षान्तिः सर्वेषां धर्मसाधनम्॥ या. I. 22; अथाष्टावात्मगुणाः। दया सर्वभूतेषु क्षान्तिरनसूया शौचमनायासो मङ्गलमकार्पण्यमस्पृहेति। यस्यैते चत्वारिंशत्संस्कारा न चाष्टावात्मगुणा न स ब्रह्मणः सायुज्यं सालोक्यं गच्छति। गौतमधर्मसूत्र VIII 23–25. The मत्स्यपुराण (52. 8–10) mentions these very eight as ' ātmaguṇas ' after referring to the Veda and ācāra ' वेदोऽखिलो धर्ममूलमाचारश्चैव तद्विदाम्। अष्टावात्मगुणास्तस्मिन्प्रधानत्वेन संस्थिताः।' मत्स्य 52. 7–8; the Atrismṛti (verses 34–41) mentions almost all these eight and defines them and Haradattā on Gautama quotes eight verses defining these eight *guṇas*. धम्मपद verse 131 is ' सुखकामानि भूतानि यो दण्डेन विहिंसति। अत्तनो सुखमेसानो पेच्च सो न लभते सुखम्॥ '

restraint, sexual purity and other virtues for persons of all the four varṇas, just as Buddha and early Buddhist works did for his followers. The sentiment in Manu V. 45 and the Viṣṇu-dharma-sūtra 51. 68 'he, who kills harmless animals (like deer) merely for the sake of his own pleasure, never increases nor prospers in happiness, whether living or after death,' finds a parallel in Dhammapada 131. Even the Ṛgveda solemnly says (X. 85. 1) 'the earth is supported by Truth, the sky is supported by the Sun'. The Muṇḍaka Up. exhorts 'Truth alone is victorious, not falsehood' (III. 1. 6).

VII. The strong faith and the alertness of brāhmaṇas who welded into a coherent whole the Veda, the philosophy of the Upaniṣads, Yogic practices of a middle path as in Gītā VI. 15-17, the doctrine of salvation by faith and bhakti for all preached in the Gītā gradually held an irresistible appeal.

VIII. In re-orienting their religious outlook and practices to stem the tide of Buddhism and make Hinduism popular, the brāhmaṇas and other leaders of Hindu society of the centuries before and after the Christian era had to make compromises of a far-reaching character; the old Vedic gods (like Indra and Varuṇa) receded into the background though not totally forgotten, most of the Vedic sacrifices had to be given up, deities like Devī, Gaṇeśa and the Mātṛs had to be brought to the front, Paurāṇika mantras came to be used along with Vedic ones as the mantras even in śrāddha (e. g. 'dātāro nobhivardhantām' &c. which occurs in Manu III. 259, Yāj. I. 246, Matsya 16. 49–50, Padma, Sṛṣṭikhaṇḍa 9. 117, Kūrma II. 22. 60 and other works). Even an early writer like Varāhamihira (first half of 6th century A.D.) in describing the Puṣya-snāna for the king provides ordinary mantras (Bṛ. S. 47. 55–70) to be recited by the *purohita* along with mantras in the Atharvaveda, Rudra (Tai. S. IV. 5. 1–11), the Kūṣmāṇḍa mantras (Vāj. S. XX. 14–16 and others, Br. S. 47. 71) and winds up the whole procedure with a well-known Paurāṇika verse.[1653] Even Aparārka (pp. 14–15) had to say that in Devapūjā the procedure to be followed is that in the Narasiṁhapurāṇa (probably something like the one in chap. 2 of the Narasiṁha Purāṇa) and in the matter of 'pratiṣṭhā' (establishment of images) also Paurāṇika procedure was to be adopted. Besides, emphasis was laid on ahiṁsā, charity (dāna),

1653. यान्तु देवगणाः सर्वे पूजामादाय पार्थिवात्। सिद्धिं दत्त्वा तु विपुलां पुनरागमनाय च॥ बृहत्सं. 47. 49.

pilgrimages and vratas and it was said that the latter two were more efficacious than even Vedic sacrifices. These changes seriously reduced the appeal of Buddhism. The purāṇas contained stories of gods and avatāras that vied in their appeal to the common man with the Buddhist Jātaka tales. The Kādambarī of Bāṇa (first half of 7th century A. D.) states that the people of Ujjayinī were fond of the Mahābhārata, Purāṇas and Rāmāyaṇa (Mahābhārata-Purāṇa-Rāmāyaṇā-nurāgiṇā &c). This is put down as the last of the four causes of the decline of Buddhism by O'Connor.

IX. From about the 7th century A. D. Buddha began to be recognised by Hindus as an *avatāra* of Viṣṇu and by the 10th century Buddha came to be so recognised throughout India by almost all Hindus.

X. Moslem fanaticism and invasions of India delivered the *coup de grace* (final blow) to Buddhism about and after 1200 A. D. by ruining famous universities like those of Nālandā and Vikramaśilā and the monks were mercilessly killed in large numbers. Those who escaped the carnage fled to Tibet and Nepal. H. M. Elliott's History of India (as told by its own historians) vol. II p. 306 contains a passage from Tabakat-i-Nasiri about Bakhtiyar Khilji that states that Bakhtiyar led his army to Behar and ravaged it, that great plunder fell in his hands, that most of the inhabitants of the place were brāhmaṇas with shaven heads, that they were put to death, that large numbers of books were found and it was discovered that the whole fort and city was a place of study (*madrasa*). The description indicates that brāhmaṇa with shaven heads were Buddhist monks.

It should not be supposed that Buddhist bhikkhus renounced wealth altogether. Vide I. A. vol. VII pp. 254–256 (Inscriptions 2 and 9 at Kuda) where bhikṣus and bhikṣuṇīs are donors and Cunningam's 'Bhilsa Topes' p. 235–236 where there are many bhikṣus and some bhikṣuṇīs among donors. The great appeal of the original Buddhism to common men lay in its spirit of self-abnegation, discipline, service and sacrifice.

When Moslem invaders exterminated the monks the laity became bewildered and were either converted to Islam or became slowly absorbed among Hindus. It has been already stated that Buddha himself was against the admission of women into the Saṅgha but at the persistent requests of his favourite pupil

Ānanda he yielded and prophesied that his pure Dharma, which otherwise would have flourished for a thousand years, would not last so long but only for 500 years. Vide 'Cullavagga' in SBE. vol. XX p. 325.

The Pātimokkha for monks contains 227 articles which were to be recited twice a month in an assembly of at least four monks and confessions of breaches of the rules had to be made. If one reads the Cullavagga (SBE. XX. pp 330-340), one may understand how the gatherings of legions of monks and nuns in immense monasteries led in some cases to sapping the ordinary observances of decency and morality. At first the Pātimokkha could be recited to nuns by monks and the nuns could confess their lapses to monks but this had to be changed later and it was laid down that only bhikkhunīs could do these things for them. P. 333 of the same shows how nuns quarrelled among themselves and came to blows and p. 335 narrates how some monks threw dirty water on nuns and how they uncovered their bodies and thighs before nuns.

The author has cited the above as the main causes of the disappearance of Buddhism following what most have written. Different writers attach importance to a few of them according to their individual leanings. While prepared to concede that the causes noted above went a long way in bringing about the downfall of Buddhism in India, he feels that the principal cause was that large sections of the Indian population came to realize that the persistent teaching of the world being a place of suffering, of giving up all desires and of monasticism, which were preached by the writers on Buddhism to all and sundry, was too much for ordinary men to attempt and that the Hindu ideal of an ordered scheme of life into four *āśramas*,[1654] with peculiar duties and rights, particularly the importance attached to the gṛhasthāśrama showed to vast populations that family life properly regulated and disciplined was capable of realizing the highest that man was capable of and that too much insistence on the giving up of all desires (including desire for life) sapped the very stability and continuance of human society and

---

1654. In 'the Philosophy of the Upanishads' by Deussen tr. by A. S. Geden (1906), the distinguished author after adverting to the peculiar rights and obligations of the four life-stages (āśramas) remarks 'the entire history of mankind does not produce much that approaches in grandeur to this thought' (p. 367).

gradually led on to the loss of physical and mental virility to idleness, base morals and race suicide. Manu III. 77–78, VI 89–90, Vas. Dh. S. VIII. 14–17, Visnu Dh. S. 59, 29, Daksa II. 57–60 and many other sages and writers praise the stage of householder as the highest.[1655] The Mahābhārata (Śānti 270. 6–11) and the Rāmāyana, Ayodhyā 10ɔ, 2) and the Purānas also sing the same tune; vide H. of Dh. vol. II. pp. 425–426 and 540–541.

Not only Dharmaśāstras but also great poets like Kālidāsa emphasized the supreme importance of the householder's stage to society. In the Raghuvamśa[1656] (V. 10) king Raghu says to a learned brāhmana student 'it is now time for you to pass on to the second stage of life that is capable of being useful to (men of) other āsramas'. In the Śākuntala also Kālidāsa harps on the same idea.

When Buddha came to be worshipped by Buddhists as God, when Buddhists gave up the original characteristic doctrine of the attainment of the peace and bliss of *nirvāṇa* in this very life through the eradication of selfish desires by following the Noble Eightfold Path, when Buddhists adopted the doctrines of bhakti and the ideal they set up was the evolution of bodhisattvas through aeons by good deeds, the line of demarcation between Buddhism and popular Hinduism became very thin and was gradually obliterated. Buddhism disappeared from India because of these deviations from the original doctrine and because the brāhmaṇas made Hinduism very comprehensive by finding a place for purely monistic idealism, for the worship of several gods, for the performance of vedic or other religious rites (i. e. Karmamārga) as a preparation for higher spiritual life. The ultimate victory of Hinduism shows the strength and comprehensiveness of its religion and philosophy as against the onesidedness of Buddhism in its various phases and its silence on matters of great moment to the inquiring human mind.

1655. Vide गृहात्त्रयोप्याश्रमिणो ज्ञानेनान्नेन चान्वहम् । गृहस्थेनैव धार्यन्ते तस्माज्ज्येष्ठाश्रमो गृही ॥ मनु III. 78; मार्कण्डेयपुराण 26. 3–6 ' वत्स गार्हस्थ्यमास्थाय नरः सर्वमिदं जगत् । पुष्णाति तेन लोकांश्च स जयत्यभिवाञ्छितान् ॥ पितरो मुनयो देवा भूतानि मनुजास्तथा । कृमिकीटपतङ्गाश्च वयांसि पशवोऽसुराः ॥ गृहस्थमुपजीवन्ति ततस्तृप्तिं प्रयान्ति च । सुखं चास्य निरीक्षन्ते अपि नो दास्यतीति वै ॥ सर्वस्याधारभूतेयं वत्स धेनुस्वरूपिणी ॥ (chap. 29. 3–6 of B. I. edition).

1656. अपि प्रसवेन महर्षिणा त्वं सम्यग्विनीयानुमता गृहाय । कालो ह्ययं संक्रमितुं द्वितीयं सर्वोपकारक्षममाश्रमं ते ॥ रघुवंश V. 10; अध्यास्तां वसतिरसुनाप्याश्रमे सर्वभोग्ये । शाकुन्तल I.

The Purāṇas and Dharmaśāstras put so much emphasis on ahiṁsā that millions of people in India became and are even now strict vegetarians not only among brāhmaṇas, but also among vaiśyas and śūdras, while it appears that Buddhists all over the world are not strict vegetarians at all. To-day very few of the ideal virtues that Buddhism set before even laymen are a matter of endeavour for most Buddhists in all lands. In spite of Buddha's crusade against animal sacrifices and Aśoka's drastic measures to eliminate the killing and cruelty to birds and beasts, it is found that some Vedic sacrifices (including animal sacrifices) continued to be performed by Indian kings and common people during the centuries before and after the Christian era. A few examples are cited here: (1) Senāpati Puṣyamitra (about 150 B. C.) performed two Aśvamedhas (E. I. vol. XX. pp 54-58, Harivaṁśa III. 2. 35 ff[1657] (which latter speaks of Senānī Kāśyapa-dvija as performer of Aśvamedha in Kali age) and Kālidāsa's Mālavikāgnimitra (Act V) where he is spoken of as engaged in Rājasūya sacrifice; (2) Khāravela, king of Kaliṅga and a Jain, performed in the 6th year of his reign a Rājasūya (E. I. XX. p. 79); (3) Bhavanāga of the Bhāraśiva lineage (about 200 A. D.) glorified as the performer of ten Aśvamedhas in Vākāṭaka plates (Chammak plate of Vākāṭaka Pravarasena II. in Gupta Inscriptions No. 55 pp. 236-237,[1658] and in Poona plates of Prabhāvatīguptā, the chief queen of Vākāṭaka Rudrasena II in E. I. vol. XV. p. 39); (4) Vākāṭaka emperor Pravarasena I. (about 250 A. D.) is described as the daughter's son of Bhavanāga and as the performer of four Aśvamedhas (in E. I. vol. XV. p. 39); (5) The great Gupta emperor Samudragupta (about 325-370 A. D.) is described in some Gupta Inscriptions as one who restored the Aśvamedha sacrifice that had long been in abeyance (vide Bilsad Stone inscription in Gupta Inscriptions No. 10 at p. 42 and the Bihar Stone pillar Inscription of Skandagupta, *ibid*,

---

1657. The reference from हरिवंश is as follows: औद्भिज्जो भविता कश्चित्सेनानीः काश्यपो द्विजः। अश्वमेधं कलियुगे पुनः प्रत्याहरिष्यति॥ तद्युगे तत्कुलीनश्च राजसूयमपि क्रतुम्। आहरिष्यति राजेन्द्र श्वेतग्रहमिवान्तकः॥ भविष्यपर्व 2. 40-41. Here it is said that a सेनापति of the काश्यपगोत्र will perform an अश्वमेध in कलियुग and a scion of his family will perform राजसूय.

1658. About Bhavanāga it is said 'अंसभारसंनिवेशितशिवलिङ्गोद्वहनशिव-सुपरितुष्ट-सप्तुत्पादित-राजवंशानां पराक्रमाधिगतभागीरथ्यमलजलमूर्धाभिषिक्तानां वृषाश्व-मेधावभृथस्नातानां भारशिवानां महाराजश्रीभवनाग-दौहित्रस्य'''वाकाटकानां महाराजश्रीरुद्र-सेनस्य &c.'। Gupta Inscriptions No. 55 pp. 236-237.

No. 12 at p. 51); (6) The Pallava King Śivaskanda-varman (about 300–350 A. D.) is praised as the performer of Agniṣṭoma, Vājapeya and Aśvamedha (E. I. vol. I. p. 2 at p. 5); (7) The Pallava king Simhavarman is spoken of as the performer of several Aśvamedhas (Pikira grant in E. I. vol. VIII. p. 159 at p. 162); (8) Cālukya king Pulakeśi I (about 570 A. D.) performed Aśvamedha (Aihoḷe Inscription of śaka 536 in E. I. vol. VI. p. 1); (9) Cālukya king Pulakeśi II performed Aśvamedha (Aihoḷe Ins. of śaka 536 in E. I. vol. VI. p. 1 and Talamanchi plates of Vikramāditya I. in E. I. vol. IX. p. 98 in A. D. 660); (10) the Viṣṇukuṇḍin Mādhava-varmā (a relative of the Vākāṭaka family) is recorded (in E.I. vol IV. p. 196) as having performed eleven Aśvamedhas, one thousand Agni-ṣṭomas, Pauṇḍarika,[1659] Puruṣamedha, Vājapeya, Ṣoḍaśin and Rājasūya (about the 7th or 8th century A. D.). For other instances of Aśvamedhas performed by kings, vide H. of Dh. vol. II. pp. 1238–39.

It may be noted that even learned brāhmaṇas sometimes performed eleborate Vedic sacrifices. For example, the fifth in ascent from Bhavabhūti performed a Vājapeya at Padmapura in Dakṣiṇāpatha. In the Vājapeya, seventeen was a characteristic number and seventeen animals were to be sacrificed therein. Vide for description of Vājapeya, H. of Dh. vol. II. pp. 1206–1212. As Bhavabhūti flourished in the first half of the 8th century A. D., the fifth in ascent from him who performed Vājapeya must have flourished about a hundred years before him i. e. in the first half of the 7th century A. D.

In these days it has become a fashion to praise Buddha and his doctrines to the skies and to disparage Hinduism by making unfair comparisons between the original doctrines of Buddha with the present practices and shortcomings of Hindu society. The present author has to enter a strong protest against this tendency. If a fair comparison is to be made it should be made between the later phases of Buddhism and the present practices of professed Buddhists on the one hand and modern phases and practices of Hinduism on the other. The Upaniṣads had a nobler philosophy than that of Gautama the Buddha, the latter merely based his doctrines on the philosophy of the Upaniṣads. If Hinduism decayed in course of time and exhi-

1659. It is possible that this statement about the performance of so many solemn vedic sacrifices is boastful and exaggerated.

bited bad tendencies, the same or worse was the case with later Buddhism which gave up the noble but human Buddha, made him a god, worshipped his images and ran wild with such hideous practices as those of Vajrayāna. As a counterblast to what modern encomiasts often say about Buddhism the present author will quote a strongly-worded (but not unjust) passage from Swami Vivekānanda's lecture on "The sages of India" (Complete Works, volume III. p. 248-268, 7th ed. of 1953 published at Māyāvatī, Almora) "The earlier Buddhists in their rage against the killing of animals had denounced the sacrifices of the Vedas; and these sacrifices used to be held in every house ... ... These sacrifices were obliterated and in their place came gorgeous temples, gorgeous ceremonies and gorgeous priests and all that you see in India in modern times. I smile when I read books written by some modern people who ought to know better that the Buddha was the destroyer of Brahmanical idolatry. Little do they know that Buddhism created brahmanism and idolatry in India. ... Thus in spite of the preaching of mercy to animals, in spite of the sublime ethical religion, in spite of the hair-splitting discussions about the existence or non-existence of a permanent soul, the whole building of Buddhism tumbled down piecemeal; and the ruin was simply hideous. I have neither the time nor the inclination to describe to you the hideousness that came in the wake of Buddhism. The most hideous ceremonies, the most horrible, the most obscene books that human hands ever wrote or the human brain ever conceived, the most bestial forms that ever passed under the name of religion have all been the creation of degraded Buddhism" (pp. 264-265).

SECTION VI

CHAPTER XXVI

Tāntrik doctrines and Dharmaśāstra

In H. of Dh. vol. II. p. 739 while dealing with the worship of Durgā, who is also worshipped as Śakti (cosmic power or energy), it was stated that the influence of Śākta worship has been great throughout India and a promise was given that a brief treatment of Śāktism would follow in a later volume. It is now time to deal with Śāktas and Tantras, which exercised some influence over the Purāṇas and directly and through the Purāṇas over Indian religious ritual and practices in the medieval ages.

There is a vast literature on Tantras, published and unpublished. There are Buddhist Tantras, Hindu Trantras and Jaina Tantras. There is a philosophical or spiritual side in some of the Tantras which has not been much studied except by Arthur Avalon, B. Bhattacharya and a few others. In the popular mind Tantras have been associated with the worship of Śakti (Goddess Kālī), with mudrās, mantras, maṇḍalas, the five *makāras*, the Dakṣiṇamārga and the Vāma-mārga, and magic practices for acquiring supernatural powers. All that can and will be attempted here is to trace briefly the origin of Śāktism and Tantra and point out some of the ways in which *tantra* has entered into Hindu ritual directly and indirectly through the Purāṇas.

The Amarakośa states that *tantra* means 'principal matter or part', 'siddhānta' (i. e. doctrine or śāstra), a loom or paraphernalia. But it does not state that tantra means a certain peculiar class of works. Therefore, the inference is not altogether unjustifiable that in its time works bearing the peculiar character of what are called Tantras were either not composed or had not at least attained great vogue. In Ṛg. X. 71. 9 the word 'tantra' occurs and appears to mean a loom. 'These ignorant[1660] men do not move about lower down (in this world) nor in a higher

---

1660. इमे येऽर्वाङ् न परश्चरन्ति न ब्राह्मणासो न सुतेकरासः । त एते वाचमभिपद्य पापया सिरीस्तन्त्रं तन्वते अप्रजज्ञयः ॥ ऋ. X. 71. 9. सायण explains : सिरीः सीरिणो भूत्वा तन्त्रं कुविलक्षणं तन्वते विस्तारयन्ति कुर्वन्तीत्यर्थः ।.

world, being neither (learned) brāhmaṇas nor some-extracting priests; these resort to speech (of a vile kind) and with that vile speech they engage in handling ploughs and looms'. The Atharvaveda (X. 7. 42) ('tantram-eke yuvatī virūpe abhyākrāmam vayataḥ saṇ-mayūkham') employs the word tantra in the same sense and so does the Tai. Br. II. 5. 5. 3 in a closely similar passage. Pāṇini (V. 2. 70) derives the word 'tantraka' (a cloth that is recently taken away from a loom) from '*tantra*'. The Āp. Śr. employs the word[1661] tantra in the sense of 'procedure containing many parts'. The Śāṅ. Śr. applies the word tantra to what being once done serves the purpose of many other actions. The Mahābhāṣya on Pāṇini IV. 2. 60 and Vārtika 'sarvasāder-dvigośca laḥ' cites 'sarvatantraḥ' and 'dvitantraḥ' as examples meaning 'one who has studied all the tantras' or 'one who has studied two tantras', tantra probably meaning 'siddhānta'. In Yāj. I. 228 ('tantram va vaiśva-devikam') the word tantra is employed in the sense in which the commentary on the Śāṅ. Śr. takes it. The 15th adhikaraṇa of Kauṭilya's Arthaśāstra bears the title 'Tantrayukti' (vide J. O. R., Madras, vol. 4, 1930, p. 82 ff) meaning the main canons or propositions or principles of exposition of a śāstra. Caraka (Siddhisthāna, chap. 12. 40-45) also speaks of '36 tantrasya yuktayaḥ' and Suśruta (Uttaratantra, chap. 65) names 32 tantrayuktis. In Bṛhaspati and Kātyāyana and in the Bhāgavata the word tantra is employed in the sense of 'doctrine' or 'śāstra'. Śabara in his *bhāṣya* on Jaimini XI. I. 1 remarks that when any thing or act, once done, becomes useful in several[1662] matters, that is called 'tantra'. Saṅkarācārya in several passages of his bhāṣya on the Vedāntasūtras speaks of the Sāṅkhya system as sāṅkhya-tantra and of the Pūrvamīmāṃsā as 'prathama-tantra'.[1663] In the Kālikā-

1661. उदित आदित्ये पौर्णमास्यास्तन्त्रं प्रक्रमयति प्रागुदयादमावास्यायाः। आप. श्रौ. I. 15.1, on which the com. says 'अङ्गसमुदायस्तन्त्रम्। तत्प्रक्रमयति यजमानोऽध्वर्युणा।' 'तन्त्रलक्षणं तत्।' शा. श्रौ. I. 16 6 on which the com. says 'यत्सकृत्कृतं बहूनामुपकरोति तत्तन्त्रमित्युच्यते।'.

Here the पञ्चरात्र is called सात्वततन्त्र. 'यत्सकृत्कृतं बहूनामुपकरोति तत्तन्त्रमित्युच्यते यथा बहूनां ब्राह्मणानां मध्ये कृतः प्रदीपः।' शबर's भाष्य on जै. XI. 4. 1.

1663. On वे. सू. II. 2. 1 the Śāṅkara-bhāṣya says 'तथापि महाजनपरिगृहीतानि महान्ति सांख्यादितन्त्राणि ... सम्यग्दर्शनायोपादेयानीत्यपेक्षा &c.'; vide also भाष्य

(*Continued on next page*)

purāṇa (87. 130) the works of Uśanas and Bṛhaspati on Rājanīti (the science of statecraft) are called tantras and in 92. 2 the Viṣṇudharmottara-purāṇa is called tantra. In all these cases the peculiar meaning attached to the word tantra in medieval times does not occur.

It is difficult to determine the exact[1664] time when the word tantra came to be employed in the sense in which it is used in the so-called tantra literature nor is it possible to decide what people first introduced tantra principles and practices or where they first arose. M. M. Haraprasad Shastri was inclined to hold that the principles and practices of tantra came to India from outside and he relies mainly on a verse in the Kubjikāmatatantra[1665]

(*Continued from last page*)

on V. S. II. 1. 1, and II. 4. 9 (where a half verse from सांख्यकारिका 29 'सामान्यकरणवृत्तिः प्राणाद्या वायवः पञ्च' is cited as belonging to तन्त्रान्तर. The सांख्यकारिका itself calls सांख्य system 'Tantra' in verse 70 'tena ca bahudhā kṛtam tantram'. On वे. सू. III. 3. 53 the पूर्वमीमांसासूत्र is referred to as 'प्रथमे तन्त्रे' in the भाष्य.

1664. Vide Dr. B. Bhattacharya's Intro. to Buddhist Esoterism (p. 43), which work will be referred to hereafter as B. E.

1665. I. H. Q. Vol. IX p. 358 f. n. 'गच्छ त्वं भारते वर्षे अधिकाराय सर्वतः। पीठोपपीठक्षेत्रेषु कुरु सृष्टिमनेकधा॥'. Vide H. P. Sastri's Cat. of Palm-leaf mss. in Nepal Durbar Library (Calcutta, 1905), Preface p. LXXIX, for the verse in Kubjikāmata, the ms. of which is written in late Gupta characters (i. e. about 7th century A. D.). Dr. B. Bhattacharya appears to hold the same opinion (p. 43 of the work cited in the preceding note). Arthur Avalon in Mahānirvāṇatantra (3rd ed. of 1953 p. 560) holds that tantra was brought into India from Chaldea or Śakadvīpa. In 'Modern Review' for 1934 pp. 150–156 Prof. N, N. Choudhuri tries to prove that Indian tāntricism has its origin in the Bon religion of Tibet. He relies on the Tibetan tradition of Asaṅga having introduced Tāntricism in India. But that tradition is mainly based on Taranath's History of Buddhism. Lama Taranath was born in 1573 A. D. (1575 A. D. according to some) and completed his history in 1608 i. e. he wrote about twelve hundred years after Asaṅga. Prof. Choudhuri further relies on the colophon to Ekajaṭāsādhana (in Sādhanamālā No. 127, आर्यनागार्जुनपादैर्भोटेषु उद्धृतमिति). But this sentence is dropped in three out of the eight mss. on which the edition is based. Prof. Choudhuri further asserts that the guru's position 'in tantra' is neither Vaidika nor Paurāṇika. Here he is wrong. The Vidyāsūkta in Nirukta (II. 4) and the passage of the Śvetāśvatara Upaniṣad quoted in note 1540 make the Vaidika position of the guru clear. As for the Paurāṇika position of guru, vide the Liṅgapurāṇa (quoted in note 1718 below) and Devībhāgavata (XI. I. 49 'Gurur-brahmā' &c. in the same note) and the verse 'यस्य देवे परा भक्तिर्यथा देवे तथा गुरौ॥ तस्यैते कथिता ह्यर्थाः प्रकाशन्ते महात्मनः॥' श्वेताश्व० उप. VI. 23 and अग्निपु. 392. 6.

which says 'go thou to the country of Bhārata for exercising dominance on all sides and bring about new creation in various ways in *pīthas*, *upapīṭhas* and *kṣetras*'. With all respect to that great scholar it has to be said that the passage does not affirm that tantra principles were then unknowe in India and were first introduced in Bhārata after that verse was uttered. That passage could very well have been uttered even when tantra practices had already taken hold of people's minds in India and the reference to pīṭhas and ksetras (in the verse) clearly indicates that what is meant is only a record of an existing fact, just as the Purāṇas speak in a prophetic vein about what is past. It is possible that a few mystic practices of *Kulācāra* or *Vāmācāra* owe their origin to foreign elements or sources. But the one verse on which M. M. H. P. Shastri relied is far too inadequate for *proving* this. The Rudrayāmala (ed. by Jivananda, 1892) contains a panegyric of the Atharvaveda (17th patala, verse 4), saying that all gods, all beings (on land, in water and air), all sages, Kāmavidyā and Mahāvidyā dwell in it; verses 10–17 dwell upon the mysterious Kuṇḍalinī, verses 31 ff dilate upon Yogic practices and six *cakras* in the body, verses 51–53 mention Kāmarūpa, Jālandhara, Pūrnagiri, Uḍḍiyāna, and a few others as Kālikā pīṭhas. Bagchi (in 'Studies in Tantra' pp. 45–55) adduces some evidence of foreign elements in the tāntrik doctrines. The Rudrayāmala[1666] (17th Paṭala, verses 119–125) states that Mahāvidyā appeared to sage Vasiṣṭha and asked him to go to Cīnadeśa and Buddha, who is said to have taught Vasiṣṭha the *Kaula* path, Yoga practices for the attainment of siddhis (extraordinary powers) and directed him to make use of five *makāras* (*madya* &c.) in his *sādhanā* for becoming a perfect Yogin. All this shows that pīthas flourished in India when the Rudrayāmala was composed, that Tāntrik practices had grown in China or Tibet and that Buddha was deemed to have taught those practices, which is a libel and a vile travesty of Buddha's noble teaching.

1666. यः कुलार्थी सिद्धमन्त्री भवेद्वाचारनिर्मलः। प्राप्नोति साधनं पुण्यं वेदानामप्यगोचरम्॥ बौद्धवेशेऽथवेवे महाचीने सदा व्रज॥ ...मत्कुलज्ञो महर्षे त्वं महासिद्धो भविष्यसि॥ ...ततो मुनिवरः श्रुत्वा महाविद्यासरस्वतीम्। जगाम चीनभूमौ च यत्र बुद्धः प्रतिष्ठति॥ ...बुद्ध उवाच। वसिष्ठ शृणु वक्ष्यामि कुलमार्गमनुत्तमम्। येन विज्ञान(तन्त्र?)मात्रेण रुद्ररूपी भवेत्क्षणात्॥ ...अतः कुलं समाश्रित्य सर्वसिद्धीश्वरो भव॥ मासेनाकर्षणं सिद्धिर्द्विमासे वाक्पतिर्भवेत्। ...शक्तिं विना शिवोऽशक्तः किमन्ये जडबुद्धयः। इत्युक्त्वा बुद्धरूपी च कारयामास साधनम्॥ कुरु त्वं महाशक्तिसेवनं मद्यसाधनम्। ...महिरासाधनं कर्तुं जगाम कुलमण्डले। मद्यं मांसं तथा मत्स्यं मुद्रा मैथुनमेव च॥ पुनः पुनः साधयित्वा पूर्णयोगी बभूव सः॥ रुद्रयामल, 17th पटल verses 121–123, 125, 135, 152–153, 157–158, 160–161.

Magic spells are found in plenty in the Atharvaveda and some mystic words or syllables are used even in the Rgveda; e. g. the word 'vaṣaṭ' occurs in Rg. VII. 99. 7, VII. 100. 7 and other verses and the word *svāhā*[1667] occurs over a dozen times in the Rgveda (e. g. in I. 13. 12, V. 5, 11, VII. 2. 11). A sleep-inducing spell occurs in Rg. VII. 55. 5–8,[1668] which verses occur also in the Atharvaveda IV. 5. 6, 5, 1, 3 and which spell was probably employed by a *purohita* to put to sleep some noble man complaining of sleeplessness at night. Some Western scholars have held that this hymn is a lover's charm for a clandestine meeting with his lady-love. But the whole hymn has hardly any words of love in it and the author is not able to accept that theory as proved. Rgveda X. 145 is a hymn to be employed against a co-wife, the first verse of which is 'I dig up this herb, which is a most powerful creeper, by which (a woman) injures her co-wife and by which she secures her husband (to herself alone)'.

The Rgveda frequently mentions magicians who appear to have been mostly non-Aryans described as *adeva* (godless), *anṛtadeva* (worshipping false gods), śiśnadeva (lecherous, Rg. VII. 21. 5, X. 99. 3). For reasons of space, it is not possible to go into great details. Tāntrik works describe the six cruel acts which will be dealt with later on. In the Vedic times it was supposed that some wicked people could by charms and incantations bring about the death of men and animals or make them ill. Two long hymns (VII. 104 and X. 87 both containing 25 verses) are enough to show how the Rgveda people were afraid of black magic. Both hymns are full of the words '*Yātudhāna*' (one who employs black magic) and 'rakṣas' (devil or evil spirit), the word yātu being the same as '*jādu*' (employed in Marathi and other regional Indian languages). There were female evil spirits also called 'piśāci' (Rg. I. 133. 5 'O Indra! destroy the reddish very powerful piśāci and kill all evil spirits)'. A few verses from the Rgveda may be translated

---

1667. In the Tantras the word 'svāhā' in mantras is indicated by such a word as 'wife of Agni'. Vide Tāntrik Texts, vol. 7, where स्वाहा is called वह्निजाया, ज्वलनवल्लभा and द्विठ, also शारदातिलक VI. 62–63.

1668. सस्तु माता सस्तु पिता सस्तु श्वा सस्तु विश्पतिः। ससन्तु सर्वे ज्ञातयः सस्त्वयमितो जनः॥ य आस्ते यश्च चरति यश्च पश्यति नो जनः। तेषां सं हन्मो अक्षाणि यथेदं हर्म्यं तथा। ...प्रोष्ठेशया वह्येशया नारीर्यास्तल्पशीवरीः। स्त्रियो याः पुण्यगन्धास्ताः सर्वाः स्वापयामसि॥ ऋ. VII. 55. 5–8.

here. 'May I (Vasiṣṭha) die this very day if I be a practitioner of black magic or if I have scorched the life of any person; may he, who falsely called me a practitioner of black magic, lose his ten sons; may Indra kill with a terrible weapon him who called me *yātudhāna*, though I am not so and who, being himself a rakṣas, declares himself to be pure; may he, being most wretched, fall below all beings (Ṛg. VII. 104. 15-16); O Maruts! may you spread in different places among the people, and wish to seize the devils and pound to dust the devils (rakṣasaḥ) who assuming the form of birds fly about at night and who, when the sacrifice is shining, produce deadly obstacles (*ibid.* verse 18); O Indra! kill the male practitioner of black magic and also the female (magician) that destroys with wiles; may the (devils) worshippers of foolish deities perish with their necks cut off; and may they not be able to see the sun rising (Ṛg. VII 104. 24); O Agni, split the skin of the yātudhāna, may thy destructive bolt kill him by its heat; O Jātavedas! shatter his joints, may some carnivorous beast longing for flesh seek (devour) the broken (yātudhāna); O Agni! shatter the yātudhānas by your heat, and the rakṣas by your glow and destroy the worshippers of foolish gods (*mūradevān*) and, shining towards those that feed on the lives of men (*asutṛpaḥ*), shatter them' (Ṛg. X. 87. 5 and 14).

In the Āp. Gṛ. (III. 9. 5-8) it is said that the plant used by the co-wife is called Pāṭhā and the hymn (Ṛg. X. 145) is employed for securing domination over the husband and for harming a co-wife. Ṛg. I. 191 is a charm against various poisons. In the Atharvaveda there are numerous hymns styled 'śatrunāśana' (destructive of enemies) e. g. II. 12-24, III. 6, IV. 3 and 40, V. 8, VI. 6, 65-67 and 134. Atharva II. 11 is styled 'Kṛtyā-dūṣaṇa' (counteracting black magic). A few of the typical verses may be cited[1669] here. 'Employ magic spells against him, who hates us and whom we hate; attain (i. e. dominate) him who is superior and surpass him who is (our) equal'; 'O Soma! strike in the mouth with your thunderbolt him who speaks evil of us that speak what is good and may he, being crushed, run away'. The Śukranītisāra (ed. by G. Oppert, 1882) provides that the Tantras are the Upaveda of the

1669. प्रति तमभि चर योऽस्मान् द्वेष्टि यं वयं द्विष्मः। आप्नुहि श्रेयांसमति समं क्राम॥ अथर्व II. 11. 3; यो नः सोम सुशंसिनो दुःशंस आदिदेशति। वज्रेणास्य मुखे जहि स संपिष्टो अपायति॥ अथर्व VI. 6. 2; विविधोपास्यमन्त्राणां प्रयोगाः सुविभेदतः। कथिताः सोपसंहारास्तद्धर्मनियमैश्च यत्। अथर्वणां चोपवेदस्तन्स्वरूपः स एव हि॥ शुक्रनीतिसार IV. 3. 39.

Atharvaveda. Atharva III. 25 and VI. 130 are spells respectively employed by a man and a woman to soften the heart of the person loved; Atharva II. 30 and 31 are charms for driving away or destroying worms that cause diseases and V. 36 is a charm against *piśācas* (goblins).[1670] The sound 'phaṭ' occurs in Vāj. S. In the Āp. Śr. Sūtra *phaṭ* is employed in offering Soma stalks in *abhicāra* (employment of spells for a malevolent purpose). Phaṭ is a sound frequently employed in the worship of Devī in Tantra works. But no direct connection or line of evolution from the Atharvaveda to the Tantras can be traced. The Tattvasaṅgraha of Śāntarakṣita (705–762 A. D.) connects even Buddha with magic practices. It says 'all wise men declare that it is dharma from which results worldly prosperity and the highest beatitude. Seen results such as intelligence, health, rulership are produced by properly observing the rules about mantras, yoga and the like declared by him (i. e.[1671] by Buddha)'. But one cannot place implicit reliance on any writer's statement made more than a thousand years after the event or person referred to in it. There are, however, stories in the Pali sacred books about the cultivation of magic powers among Buddha's own disciples, e. g. the story of Bhāradvāja[1672] who rose in the air for a bowl carved out of very fragrant

---

1670. For the sound 'phaṭ' in Durgā-pūjā, vide p. 161 n. 416; उपरि प्रता भङ्क्ष्न हतोऽसौ फट् प्राणाय त्वा व्यानाय त्वा। वाज. सं. VII. 3. on which the com. महीधर explains 'उपरि आगतेन भङ्क्ष्न आमर्देन असाविति देवदत्तादिनामनिर्देशः। असौ द्वेषो हतो निहतः सन् फट् विशीर्णो भवतु। ...स्वाहाकारस्थाने फडिति अभिचारे प्रयुज्यते।

1671. यतोऽभ्युदयनिष्पत्तिर्यतो निःश्रेयसस्य च। स धर्म उच्यते ताहक् सर्वैरेव विचक्षणैः॥ तदुक्तमन्त्रयोगादिनियमाद्विधिवत्कृतात्। प्रज्ञारोग्यविभुत्वादि दृष्टधर्मोपि जायते॥ तत्त्वसंग्रह p. 905; कमलशील (pupil of शान्तरक्षित) comments 'तेन भगवतोक्तधर्मो मन्त्र-योगादिनियमश्चेति विग्रहः। योगः समाधिः। आदिशब्देन मुद्रामण्डलादिपरिग्रहः।'. The first verse appears to have been based on the वैशेषिकसूत्र I. 1. 1–2 'अथातो धर्मं व्याख्यास्यामः। यतोऽभ्युदयनिःश्रेयससिद्धिः स धर्मः।'. The word अभ्युदय has been variously interpreted by the commentators of Kaṇāda's sūtra, but gene rally अभ्युदय means 'wordly happiness or prosperity'; compare भरत's नाट्यशास्त्र 'विवाहप्रसवावाहप्रमोदाभ्युदयादिषु। विनोदकरणं चैव धृतमेतत्प्रकीर्तितम्॥' chap. IV. 263 (G. O. S.). Some take it to mean स्वर्ग in contradistinction to निःश्रेयस (which means मोक्ष or अमृतत्व).

1672. The story of Puṇḍola Bhāradvāja, a disciple of the Blessed One (Buddha) rising in the air, taking the bowl and going thrice round the city of Rājagṛha in the air, is narrated in Cullavagga (S. B. E. Vol. XX pp 78 ff). But it is said there that Buddha rebuked his disciple, ordered that bowl to be broken and reduced to powder.

sandalwood. Further, there is a story of miraculous powers possessed by all the members of the family of a layman called Mendaka (viz. himself, his wife, son and daughter-in-law) in Mahāvagga VI. 34. 1 ff. (S. B. E. vol. XVII. pp. 121 ff). Here again we have to remember that there is nothing in the *Tipiṭaka* or any early Buddhist document to prove that Buddha or his first disciples had anything to do with *mudrās*, mantras and *maṇḍalas* and that neither Yuan Chwang nor I-tsing refers to any Tantras, though both of them refer to the Buddhist monasteries as centres of Buddhist culture (vide Dr. De in N. I. A. vol. I. pp. 1 ff). In the introduction to Sādhanamālā (vol. II. LXVIII.) Dr. Bhattacharya relies upon the words 'Sugatopadiṣṭam' and 'Sugataiḥ' occurring on pp. 334–335 of the Sādhanamālā for holding that Buddha himself must have promulgated some mantras. There are two weighty objections viz. 'Sugataiḥ' does not always mean Buddha, but means also 'followers of Buddha' and secondly, just as most Hindu Tantras are dialogues between Śiva and Pārvatī, so later Buddhist writers might have easily said that they are quoting the Buddha; the same objection applies to Kamalaśīla's remarks quoted by Dr. Bhattacharya, as Kamalaśīla and his teacher flourished about 1200 years after Buddha.

The question whether Buddhist Tantras were prior to Hindu Tantras or *vice versa* is difficult to decide. It appears probable that both arose nearly about the same time. Vide 'The Śāktas' by E. A. Payne pp. 72–74 for discussion of views. In the Sādhanamālā (a Vajrayāna work consisting of 312 small works composed according to Dr. Bhattacharya from the 3rd century A. D. to 12th century A. D.) four *pīṭhas* (chief centres) of Vajrayāna[1673] are mentioned viz. Kāmākhyā, Sirihaṭṭa (or Śrīhaṭṭa), Pūrṇagiri and Uḍḍiyāna. The first two are respec-

1673. It appears that in some Tantra works five Pīṭhas are named (according to H P. Sastri's Cat. of Nepal Palm-leaf and selected paper mss. in the Nepal Durbar Library, Calcutta, 1905, p. LXXX) viz. Oḍḍiyāna (in Orissa, says H. P. Sastri), Jāla (in Jalandar), Pūrṇa Mataṅga in Śrīśaila and Kāmākhyā in Assam. The very fact that five pīṭhas are named in the work supposed to be delivered by Śiva shows beyond doubt that before the work Tāntrism had spread in all parts of India. The Sādhanamālā (vol II pp. 453 and 455) mentions Uḍḍiyāna, Pūrṇagiri, Kāmākhyā and Sirihaṭṭa; the Kulacūḍāmaṇitantra (Tāntrik texts, Vol. IV) in 6th paṭala verses 3–7) refers to five pīṭhas viz. Uḍḍiyāna, Kāmarūpa, Kāmākhyā, Jālandhara and

(*Continued on next page*)

tively identified with Kāmākhyā or Kāmarūpa (three miles from Gauhati) and modern Sylhet. The exact situation of the other two is a controversial matter. M. M. H. P. Shastri identified Uddiyāna (which is most frequently mentioned as a pīṭha) with Orissa. His son Dr. B. Bhattacharya thinks it most probable that Vajrayāna Tāntricism arose in Uddiyāna (p. 46 of Intro. to B. E.). Dr. Bagchi in 'Studies in the Tantras' pp. 37–40 furnishes good grounds for holding that Uddiyāna was near Swat valley in N. W. India and Grousset 'In the footsteps of Buddha' pp. 109–110 holds the same view. The Bārhaspatya-sūtra (ed. by F. W. Thomas) names eight Śāktaksetras (III. 123–124). In his Intro. to Sādhanamālā (vol. II. p. LXXVIII) Dr. Bhattacharya holds that the Hindu tantras were introduced on the model of the Buddhist tantras. But Winternitz (in 'History of Indian Literature', Eng. tr., vol. II. p. 401) states that this view of Dr. Bhattacharya is contrary to the facts and the present writer agrees with this view.

Though Dr. Bhattacharya admits that Buddhism and Jainism exploited Hindu gods in the earlier period, he asserts (on p. 147 of his Intro. to B. E.) that 'it is possible to declare without fear of contradiction that the Buddhists were the first to introduce the Tantras in their religion and that the Hindus borrowed them from the Buddhists in later times'. It is no honour to ancient Hindus to be called the pioneers in the practice of black magic. But scholars have to seek truth irrespective of the question of honour or dishonour. Very weighty arguments are advanced by Valleé Poussin (in E. R. E. vol. XII. p. 193), Winternitz and Payne (on 'Śāktas p. 73) for the opposite view and the present author agrees with them. Hundreds of works were translated from Sanskrit into Tibetan and Chinese. The traffic of borrowing has been all one way from India to Tibet and China. Vide a paper on 'China's debt to India' by Prof. Liang Chi Chao in Viśvabhāratī Quarterly, vol. II. for 1924–25 pp. 251–261, where it is stated that 24 Hindu scholars from A. D. 67 to 789 came to China, besides 13 from Kashmir and that the Chinese scholars that went to India for study from 265–790 A. D. numbered 187 of which the names of 105 can be ascertained.

(Continued from last page)

Pūrṇagiri (vide also 3rd paṭala, 59–61). In I. H. Q. vol. XI. pp 142–144 it is argued that Uḍḍiyāna and Śahore are in Bengal. The Devībhāgavata (VII. 30. 55–80) names over one hundred kṣetras of Devī.

There is hardly any evidence of the translations of Chinese or Tibetan works into Sanskrit. Besides, the three great Chinese travellers never refer to the study of Buddhist Tantras in India. Watters on 'Yuan Chwang's Travels in India' vol. I. p. 360 narrates a story from the pilgrim's life that when he left Ayodhyā in a boat and proceeded east down the Ganges, *thugs* that looted the boat decided to sacrifice him to Durgā but that the Chinese pilgrim was saved by a hurricane which put the thugs in terror, who released him and treated him with reverence. Vide also 'In the Footsteps of Buddha' by René Grousset pp. 133–135 for this incident. We see that there is evidence of the prevalence of Tāntrik and Śākta worship in India long before the 7th century A. D. There is hardly any evidence of any Buddhist Tāntrik work before 650 A. D. except perhaps the Guhyasamājatantra and Mañjuśrīmūlakalpa, both of which contain late elements. In this way, presumption and chronology are both against borrowing by Hinduism from Buddhist Tibetan or Chinese Tāntrik works. Vide 'Tibet past and present' by Sir Charles Bell (1924) pp. 23, 25, 29, Sardar K. M. Panikkar's work 'India and China' (1957) p. 70, 'Introduction of the alphabet in Tibet' by M. M. Dr. Satischandra who holds that it was borrowed from Magadha in 7th Century A. D., that show that a written script based on an Indian alphabet as prevalent in Kashmir was first introduced about 640 A. D., that the Tāntrik Buddhist Padmasambhava was summoned from Uḍḍiyāna by a Tibetan king Ti-son De-tson (749–786 A. D.) on the recommendation of Śāntarakṣita Bodhisattva and was induced to settle in Tibet. Bunjiu Nanjio's 'Catalogue of Tripiṭaka' (Oxford, 1883), appendix II. p. 445 No. 155 shows that Amoghavajra translated many works between 746 and 771 A. D., died in 774 A. D. and that it was under his influence that Tantra doctrines gained currency in China. It is clear from the works of Bāṇa as detailed later on that worship of Caṇḍikā with wine and flesh was prevalent in India long before 600 A. D., that Śrīparvata was famed for its tāntrik *siddhis*, that Śivasaṁhitās existed, that japa of mantras a crore of times in a cemetery was supposed to confer *siddhis*, that he 14th of the dark half of a month was deemed the proper tithi for japa and black magic. Therefore, it is most likely that Śākta or Tāntrik doctrines were taken to China and Tibet from India and not *vice versa*. Prof. P. V. Bapat in '2500 years of Buddhism' (pp. 360–376) follows (at p. 363) Dr. B. Bhattacharya and tries to prove that Tibetan Tāntrism is earlier than Hindu Tāntrism, but his arguments

like those of Dr. Bhattacharya do not carry conviction at all. Dr. A. S. Altekar in his paper on Sanskrit Literature in Tibet (ABORI. vol. 35 pp. 54–66) shows how Buddhism entered into Tibet in the reign of Strong-Tsan-Gampo (637–693 A. D.), that about 750 A. D. ;Padmasambhava from Orissa and Vairocana from Kashmir were pioneers and how about 4500 works were translated into Tibetan.

Even Dr. Bhattacharya admits that Buddhist Tantras in outward appearance resemble in a marked degree Hindu Tantras (p. 47 of Intro. to B. E.), but he contends that in the subject matter, the philosophical doctrines and religious principles there is little similarity. As Buddhism did not believe in Hindu gods they do not speak about Śakti or Śāktism. But just as in Hindu Tantras there is the male principle Śiva and the female principle of Devī, the Buddhists postulate Prajñā (which is feminine) and Upāya (masculine) as two principles and invest them with the same roles as those of Śiva and Devī but reversed in character. They had to graft on the idea of *Śūnyatā* the ideas underlying the concepts of Śiva and Devī or Śakti. The subject matter is very similar as regards the goal and means (Yoga &c) and the procedure of mantra, guru, maṇḍala &c. is the same. The most important and early works of Buddhist Tāntric cult, the Prajñopāya-viniścayasiddhi and Jñānasiddhi are not earlier than the 8th century A. D., when Śāktism and Tāntrism had both been long established in India.

The word 'Śākta' means one who is a worshipper or devotee of 'Śakti' (cosmic power or energy). It appears that long before the 8th century A. D. this cult had spread in almost all parts of India, particularly in Bengal and Assam. Śakti under different names (such as Tripurā, Lohitā, Ṣḍaśikā, Kāmeśvarī) was conceived to be the primordial principle of all activity in the universe and is generally worshipped under the name of Devī. The Devīmāhātmya is one of the chief works of the Śāktas and has been described above on pp. 155–156. The chief characteristics of the Śākta cult are the doctrine that God or Deity is one and is to be conceived as the mother and also the destroyer[1674] and that there is a special form of ceremonial

1674. One of the *dhyānas* of Devī as Kālī is as follows: शवारूढां महाभीमां घोरदंष्ट्रां हसन्मुखीम् । चतुर्भुजां खड्गमुण्ड-वराभयकरां शिवाम् । मुण्डमालाधरां देवीं ललज्जिह्वां दिगम्बराम् । एवं सञ्चिन्तयेत्कालीं श्मशानालयवासिनीम् ॥ कालिकाम्र in शाक्तप्रमोद (Venk. ed.)

worship which sometimes assumed debased and revolting forms. Devī has been eulogised in other Purāṇas also as in Vāmana (18-19), Devī-bhāgavata (III. 27), Brahmāṇḍa (that contains the Lalitāmāhātmya in 44 chapters), Matsya (13. 24-54, where 108 names of Devī and 108 places of her worship are set out), Kūrma (I. 12). In the last Purāṇa (Kūrma I. 12) Devī is called Mahāmahiṣamardinī (98), Anāhatā, Kuṇḍalinī (128), Durgā, Kātyāyanī, Caṇḍī, Bhadrakālī (143 and 148) and it is stated that the śāstras opposed[1675] to the Veda and Smṛti that are popular among people such as Kāpāla, Bhairava, Yāmala, Vāma, Ārhata were propagated by Devī for deluding the world and were based on ignorance. Vide also Brahmapurāṇa (181. 48-52) for names of Devī and for the proposition that Devī when worshipped with offerings of wine, flesh and other edibles becomes pleased and grants men's desires. Bhadrakālī is comparatively an ancient name. In the Śāṅ. Gṛ. (SBE vol. XXIX p. 86) it is provided that an offering is to be made to Śrī at the head of the bed on which the householder sleeps and at the foot of the bed to Bhadra-kālī, while Manu provides that, in the daily *baliharaṇa*, *bali* (offering) is to be offered to Bhadrakālī in the south-west.

The Tantras and Śākta works have much in common, the main point of difference being that in the Śākta cult Devī (or Śakti) is worshipped as the highest, while Tantras (which include also Buddhist and Jaina works) are not restricted to the worship of Devī or Śakti, but may be agnostic, Vedāntic or Sāṅkhya in their philosophical outlook. Dr. B. Bhattacharya (in Intro. to Guhyasamājatantra p. XXXIV and in Intro. to Sādhanamālā vol. II. p. XIX) states that, for a work to be called a real Tantra, there must be the element of Śakti in it. But this is plainly rather an over-statement. The Vāyupurāṇa enumerates the Śākta among six *darśanas* (philosophic points of view) as in note [1675a].

Even the Ṛgveda speaks of the Śaktis of the great gods of the Vedic pantheon. But the Śakti or Śaktis are of the God

---

1675. यानि शास्त्राणि दृश्यन्ते लोकेऽस्मिन्विविधानि तु। श्रुतिस्मृतिविरुद्धानि निष्ठा तेषां हि तामसी॥ कापालं भैरवं चैव यामलं वाममार्हतम्। एवंविधानि चान्यानि मोहनार्थानि तानि तु॥ कूर्म I. 12. 261-262. These verses are quoted by रघुनन्दन in स्मृतितत्त्व I. pp. 785-786 (under मलमासतत्त्व).

1675 a. आद्यं शैवं वैष्णवं च सौरं शाक्तं तथार्हतम्। षड्दर्शनानि चोक्तानि स्वभावनियतानि च। 104. 16.

nimself and not a separate creative principle and sometimes Śakti is meant as part of the poet, priest or sacrificer (as in Ṛg. I. 31. 18, I. 83. 3, IV. 22. 8, X. 25. 5). The word 'Śakti' occurs in the Ṛgveda about a dozen times in the singular as well as in the plural, five times with Indra,[1676] once with Aśvins (Ṛg. II. 39. 7), twice with pitṛs (I 109. 3, VI. 75. 9) and once with gods in general (X. 88. 10, who are said to have created Agni with their powers). Sometimes, the word 'Māyā' is used with regard to Indra instead of the word Śakti. 'O Indra! I long for your great friendship and powers (śaktīḥ)...understand that you are our great protector; I proclaim your ancient and recent deeds, O Indra endowed with powers (Śaktīvaḥ)!.....; 'Indra assuming[1677] many forms by his powers (māyābhiḥ) repairs (to many sacrifices), ten hundred horses are yoked to his chariot'. In these passages there is no question of worshipping śakti or śaktis of the god praised. The more frequent word, however, is 'Śacī' ('śacībhiḥ' occurring 36 times and 'śacyā' 12 times). The word 'Śacīpati' (lord of Śacī or power) occurs sixteen times in the Ṛgveda and has been applied in all places to Indra, except once in Ṛg. VII. 67. 5 (where it is applied to Aśvins). It cannot be said that in the Ṛgveda 'Śacī' is the wife of Indra (as it is said in later mythology), since the plural is more frequent than Śacī in the singular and since Aśvins also are called 'Śacīpatī' once. Similarly, the word 'Śacīvaḥ' occurs eleven times, in nine of which it is addressed to Indra but it is once applied to Agni (Ṛg. III. 21. 4) and once to Soma (Ṛg. IX. 87. 9). The ideas associated with the words 'Śakti' and 'Śacī' are those of creation, protection, valour, and bounty. In Ṛg. I. 56. 4 Indra's power is called 'Devī taviṣī' but the word Śacī does not occur in that verse. There is a sublime hymn (Ṛg. X. 125) of the power of Vāk (speech), wherein Vāk is said to associate with Rudras, Ādityas, Vasus, all gods and is

1676. महत्ते सख्यं वसिम शक्तीवो तृत्रघ्ने नियुतो वान्ति पूर्वीः। महि स्तोत्रमव आगन्म वूरेरस्माकं सु मघवन् बोधि गोपाः॥ ऋ. III. 31. 14, प्र ते पूर्वाणि करणानि वोचं प्र नूतना मघवन्या चकर्थ। शक्तीवो यद्विभरा रोदसी उभे जयन्नपो मनवे दानुचित्राः॥ ऋ. V. 31. 6. Vide also Ṛg. VII. 20. 10, X. 88. 10 (स्तोमेन हि दिवि देवासो अग्निमजीजनन्शक्तिभी रोदसिप्राम्॥).

1677. इन्द्रो मायाभिः पुरुरूप ईयते युक्ता ह्यस्य हरयः शता दश॥ ऋ. VI. 47. 18. On this the बृह. उप. II. 5. 19 says 'इदं वै तन्मधु दध्यङ्ङाथर्वणोऽश्विभ्यामुवाच। तदेतदृषिः पश्यन्नवोचत्। इन्द्रो मायाभिः ··· शता दश॥ इति। अयं वै हरयोऽयं वै दश च सहस्राणि बहूनि चानन्तानि च। तदेतद्ब्रह्म &c.'

declared to support Mitra and Varuṇa, Indra and Agni, the Aśvins, Soma, Tvaṣṭṛ, Pūṣan and Bhaga. Vāk is said to stretch the bow for Rudra in order that the destructive enemy of *brahma* (prayer or God Brahmā) may be killed, that Vāk stands occupying all worlds and that her body touches heaven, that it is beyond heaven and the earth, that Vāk stands so vast by its greatness'. Vāk becomes the principle of all energy. According to the Nighaṇṭu (I. 11), menā, gnāḥ and śacī are three of the 57 words meaning 'Vāk'. In Tai. S. V. 1. 7. 2 the metres are called 'gnās'. Rg. I. 164. 41 is an enigmatic description of Vāk explained in Nirukta XI. 40. It should be noticed that, just as Devī or Śakti is associated with Śiva in later literature, so are Indrāṇī, Varuṇānī, Agnāyī, Rodasī associated with Indra, Varuṇa, Agni and Maruts respectively as wives. 'I invoke Indrāṇī,[1673] Varuṇānī and Agnāyī for my welfare and for drinking Soma'; 'May the women, the wives of gods, partake of the offering, viz. Indrāṇī, Agnāyī, the brilliant (wife) of the Aśvins, Rodasī; may Varuṇāṇī listen (to our laud); may the goddesses partake (of offerings) at the time (appropriate) for women'. It must be said, however, that these goddesses (devīḥ) play a very subordinate part in the Ṛgveda. No direct connection can be traced between these Vedic goddesses and the later conception of Devī or Śakti. Indrāṇī is invoked for protection in Ṛg. I. 22. 12, II. 32. 8, V. 46. 8, X. 86. 11-12. In Ṛg. V. 46. 8 Indrāṇī and three others are called Devapatnīs and 'gnās'. In Ṛg. I. 61. 8 it is said that the gnās, the wives of gods, wove, when Indra struck the demon Ahi, a song of worship. The word 'gnā' occurs 20 times in the Ṛg. in the nominative, objective, instrumental and locative and is an Indo-European word for wife (Greek has it). Vide Nir III. 21 where 'menā' and 'gnā' occur. In the Kenopaniṣad Umā Haimavatī (daughter of Himavat) tells of *Brahma* to the gods Agni, Vāyu and Indra (III. 12). In the Śvetāśvataropaniṣad it is said 'they (brahmavādins) endowed with meditation and Yoga saw Śakti (power) abiding as non-different from God and concealed (from com-

1678. इन्द्राणीमुप ह्वये वरुणानीं स्वस्तये। अग्नायीं सोमपीतये। ऋ. I. 22. 12; उत ग्ना व्यन्तु देवपत्नीरिन्द्राण्यग्नाय्यश्विनी राट्। आ रोदसी वरुणानी शृणोतु व्यन्तु देवीर्य ऋतुर्जनीनाम्॥ ऋ. V. 46. 8. सूर्या is said to be the wife of Aśvins in Ṛg. X. 85. 8-9; यास्क explains Ṛg. V. 146. 8 in निरुक्त XII. 46 and holds रोदसी as the wife of रुद्र; in. Ṛg. V. 56. 8 the Maruts are said to have 'Rodasī' on their chariot; in Ṛg. V. 61.4 the Maruts are said to have a beautiful wife; in VI. 50.5 Rodasī is called devī and is said to be mixed up with Maruts. In Ṛg. I. 167.4 and VI. 66.6 Rodasī is connected with Maruts.

prehension) by its own attributes (or by sattva, rajas and tamas).' The same Upaniṣad (in VI. 8) speaks of *Brahma* as possessing the highest Śakti[1679] in various forms and this text is quoted by Śaṅkarācārya on Vedāntasūtra II. 1. 24. In the *bhāṣya* on Vedāntasūtra II. 1. 30 and in the sūtra itself *Brahma* is said to be endowed with all powers. Vide also Śvetāśva. IV. 1. The Nārāyaṇopaniṣad contains an invocation of Durgā-devī[1680] 'I approach as a refuge the blazing goddess Durgā, brilliant like fire, luminous owing to *tapas*, that is resorted to for (yielding) the rewards of religious actions; O goddess possessed of excellent might! adoration to your power'. Rāghavabhaṭṭa[1681] avers that Tantra cult is based on Śruti as can be seen from the Upaniṣads called Rāmapūrvottara-tāpanīya and Nṛsimhapūrvottara-tāpanīya. Similarly, Bhāskararāya in his commentary Setubandha on Vāmakeśvaratantra mentions several Upaniṣads as treating in detail of the bhakti of Mahātripura-sundarī and interprets Rg. V. 47. 4 'catvari īm' as referring to Kādividyā. But all these Upaniṣads seem to be purposely composed to bolster up the *tantras* that had come to be looked down upon and they

1679. ते ध्यानयोगानुगता अपश्यन्देवात्मशक्तिं स्वगुणैर्निगूढाम्। श्वेताश्व० I. 3; परास्य शक्तिर्विविधैव श्रूयते स्वाभाविकी ज्ञानबलक्रिया च॥ श्वेताश्व० VI. 8; सर्वोपेता च तद्दर्शनात्। वेदान्तसूत्र II. 1. 30, on which शङ्कर says 'एकस्यापि ब्रह्मणो विचित्रशक्तियोगादुपपद्यते विचित्रो विकारप्रपञ्च इति।: But this is entirely different from the later Śākta doctrines. Here Brahma is said to be endowed with various Śaktis (not one), white Śakti among Śāktas is the female principle that is supreme. It is possible that such a vedānta doctrine of śakti might have suggested the later all-engrossing power of Śakti as the only deity or principle

1680. तामग्निवर्णां तपसा ज्वलन्तीं वैरोचनीं कर्मफलेषु जुष्टाम्। दुर्गां देवीं शरणमहं प्रपद्ये सुतरसितरसे नमः। नारायणोपनिषद् 2. 1.

1681. श्रुतिमूलकता तु रामपूर्वोत्तरतापनीय-कृसिंहपूर्वोत्तरतापनीय-सौराष्टाक्षर-शैवपञ्चाक्षरात्मिका च साक्षाच्छ्रुतिरुपलभ्यत एव। राघवभट्ट on शारदातिलक p. 2; श्रीमहात्रिपुरसुन्दर्याश्च गौणीं भक्तिं सेतिकर्तव्यतांकां निरूपयितुमेवंपर्येण सुन्दरीतापनीपञ्चकं भावनोपनिषत्कौलोपनिषद्-गुह्योपनिषन्महोपनिषच्चेत्यादयो वेदशिरोभागाः प्रवृत्ताः। सेतुबन्ध on वामकेश्वरतन्त्र p. 4; तथा च बह्वृचैराम्नायते-चत्वार ईं बिभ्रति...अन्तान्-इति। अत्र हि कादिविद्याया ईकारचतुष्टयवत्त्वविशेषणद्वारोद्धारः कृतः। सेतुबन्ध p. 17. In शाक्तोपनिषद्; edited with the com. of उपनिषद्ब्रह्मयोगिन् by Pandit A. Mahadevaśāstri, Adyar, 1925, are printed त्रिपुरा, त्रिपुरातापिनी, देवी, बह्वृच, भावना, सरस्वतीरहस्य, सीता, सौभाग्यलक्ष्मी (the भावनोपनिषद् occurring on pp 68–73). In the बह्वृचोपनिषद् (on p. 62) occurs the passage 'सैषा परा शक्तिः सैषा शाम्भवी विद्या कादिविद्येति वा हादिविद्येति वा सादिविद्येति वा रहस्यमोमों वाचि प्रतिष्ठा।.' The com. explains: श्रीमत्पञ्चदशाक्षरीप्रविभक्ता क ए ई ल ह्रीं-प्रथमखण्डात्मना कादिविद्येति वा-ह स क ह ल ह्रीं-इति द्वितीयखण्डात्मना हादिविद्येति वा स क ल ह्रीं-इति सादिविद्या वा रहस्यम्।.

are mostly mentioned by late medieval writers like Rāghavabhaṭṭa and Bhāskararārya. There are two great hymns addressed to Durgā in the Mahābhārata,[1682] viz. in Virāṭaparva (chap. 6) by Yudhiṣṭhira and the other in Bhīṣmaparva (chap. 23) by Arjuna, but they are discarded as apocryphal in the Poona critical edition. The Gangadhara stone Inscription of Viśvavarman of 480 of the Mālava era (424 A.D.) refers to Mātṛs (Mother Goddesses) and Tantra.[1683] The Br. S. 57. 56 mentions the groups of Mātṛs. The Vṛddha-Hārīta-smṛti recommends that the householder should not enter places of Śaiva, Bauddha, Skānda and Śākta[1684] cults. The Viṣṇupurāṇa[1685] (one of the earliest among extant Purāṇas) speaks of the whole world as that of Viṣṇu, who is the highest *Brahma* and is endowed with

---

1682. In JRAS for 1906 pp. 355–362 B. C. Majumdar endeavours to show that the two hymns to Durgā are late interpolations in the Mahābhārata, probably derived from practices of non-Aryan Śūdras in Oriya-speaking hill tribes of Sambalpur. But he forgets that apart from other sources Kālidāsa (not later than about 400 A. D.) speaks of Pārvatī as Umā, Aparṇā, Durgā, Gaurī, Bhavānī and Caṇḍī in his several works and also that Kālidāsa refers to the Ardhanārīśvara form of Śiva. In the last verse of the Śākuntala Kālidāsa speaks of Śiva as 'parigata-śaktiḥ' and thereby suggests that at least the germs of the later Śakti worship were not unknown in his times. Therefore, the worship of Durgā in her several aspects is older than 300 A. D. by at least a century or more; vide pp. 185–186 above.

1683. मातृणां च प्रमुदितघनात्यर्थनिर्ह्रादिनीनां तन्त्रोद्भूत-प्रबलपवनोद्धूर्तितम्भोनिधीनाम् । in Gupta Inscription No 17 p. 72. The बृहत्संहिता 57. 56 provides rules about images of Mātṛs 'मातृगणः कर्तव्यः स्वनामदेवानुरूपकृतचिह्नः', the विष्णुधर्मोत्तरपुराण (in I. 226) mentions a large number of मातृs including काली and महाकाली (in all over 180). Vide a recent work on 'the Cult of the Mother Goddesses' by E. O. James (London, 1959), of which pp. 99–124 deal with India; 'Matsyendranātha and his Yoginī cult' by Dr. Karambelkar in I. H. Q. Vol. XXXI (for 1935) pp. 362–374, which show that Ādinātha (Śiva Himself) was the guru of Matsyendranātha, who was himself guru of Gorakṣanātha, the former being called Lnipa (in Tibet), one of the 84 *Siddhas*; vide Cunningham's Archaeological Survey Report IX, for the temple of 64 Yoginīs at Bheraghat and 'Tāntrik cult in Epigraphs' by Mr. B. P. Desai in J. O. R (Mad.), Vol. 19 pp. 285–288.

1684. शैवपाशुपताद्यशास्त्रस्थानानि न विशेत् क्वचित् । वृद्धहारीतस्मृति XI. 143.

1685. एतत्सर्वमिदं विश्वं जगदेतच्चराचरम् । परब्रह्मस्वरूपस्य विष्णोः शक्तिसमन्वितम् । विष्णुपु V. 7. 60; सुरामांसोपहारैश्च भक्ष्यभोज्यैश्च पूजिता । वृणामभीष्टकामांस्त्वं प्रसन्ना संप्रदास्यसि ॥ विष्णुपु. V. 1. 86. This verse occurs in ब्रह्मपुराण 181. 52 and the preceding three verses which contain the names of Durgā are the same in both.

Śakti, enumerates some of the names of Durgā as Āryā, Vedagarbhā, Ambikā, Bhadrā, Bhadra-kālī, Kṣemadā, Bhāgyadā and winds up by stating that when Durgā is worshipped with offerings of wine, flesh, various kinds of foods, she, being pleased, would fulfil all desires of men. In the Kādambarī of Bāṇabhaṭṭa there is a long description of the temple of Caṇḍikā at a few days' journey from Ujjayinī, where there was an old Draviḍa devotee, in which the following points deserve to be noted, viz. offerings of the heads of animals, lion as *vāhana*, the slaughter of Mahiṣāsura, the doctrines of Pāśupatas written down on small books of palm leaves containing jugglery, tantra and mantras, Durgā-stotra written on a piece of cloth, ruined temples of the Mātṛs and description of the Draviḍa devotee as knowing thousands of wonderful stories about Śrīparvata. Bāṇa describes at length what queen Vilāsavatī, pining for a son, began doing to placate all Gods viz. sleeping in the shrines of Caṇḍikā where *guggulu* was being incessantly burnt, taking auspicious baths on nights of dark 14th in public squares where magic circles had been drawn by great magicians, visiting temples of Mātṛs, wearing amulets inside which were pieces of birch leaves on which mantras had been written with yellow pigment, and, when delivery was near, her bed was rendered holy with various herbs, roots and yantras (figures or diagrams). In the Harṣacarita (III) there is a reference to magic circles and to human sacrifices in the description of the Śaiva ascetic Bhairavācārya who had all the Śaiva-saṁhitās by heart, who performed the *japa* of a mahāmantra called Mahākālahṛdaya a crore of times in a cemetery and wanted the help of Puṣpabhūti (an ancestor of Emperor Harṣa) for perfection in that mantra to be achieved by subduing a *vetāla* and who ultimately attained to the position of Vidyādhara and rose into the starry firmament. In the last Introductory verse of the Harṣacarita the Emperor Harṣa is, by means of puns, called the Śrīparvata in yielding all Siddhis (supernatural powers, or fulfilment) according to the wishes of all suppliants.[1686] These descriptions from the works of Bāṇa (first half of 7th century) show how even long before the 7th century A. D. the worship of Caṇḍī with flesh and the Śākta or Tāntrik paraphernalia of mantras, siddhis, maṇḍalas and yantras had gripped the minds of all Indian people, great

1686. जयति ज्वलत्प्रतापज्वलनाकारकृतजगद्रक्षः। सकलप्रणयिमनोरथसिद्धिश्रीपर्वतो हर्षः॥ हर्षचरित 1. 21; सौदामिनी says in मालतीमाधव 'गुरुचर्या तपस्तन्त्रमन्त्रयोगाभियोगजाम्। इमामाक्षेपिणीं सिद्धिमातनोमि शिवाय वः॥' IX.

and small, rich and poor. In the Mālatīmādhava (Act V) we have a gruesome picture of human sacrifice to Cāmuṇḍā. In the same drama Saudāminī is described as observing the vows of a Kāpālika on Śrīparvata and as having secured supernatural powers by means of mantras. Śrīparvata is mentioned as a holy place of Śiva and Devī in Vanaparva 85. 19–20. The Vāsavadattā of Subandhu (p. 87 of Hall's ed.) speaks of Śrīparvata as 'Sannihita-mallikārjunaḥ.' Later on a few passages from Sanskrit and Prakrit literature will be cited to show how the teaching of Tāntrik practices led to great moral debasement and revolting orgies in the name of religion.

The literature on Tantras was vast (vide 'Principles of Tantra' ed. by A. Avalon, part 1 pp. 390–392 for a long list of Tantras). Both Hindu and Buddhist writers composed numerous works on Tantra and a very large number of subjects came to be included in Tantra works. Buddhist and Hindu Tantras are alike in some respects but they differ in the topics discussed, philosophical doctrines and some religious principles and practices. Tāntra works were introduced into Tibet, Mongolia, China, Japan and South East Asia. Originals of many of the Sanskrit Tāntrik works are now not available, but the translations of some of them in Tibetan are available.[1687] It is aid that even now if proper search is made, three hundred works on Tantra may be discovered (vide Dr. B. Bhattacharya in vol. X. of Śrī Rāmavarmā Institute of Research at Cochin p. 81).

It is difficult to give a general definition of Tantras. The word 'Tantra' is derived usually from 'Tan' to spread and 'trai' (to save). 'It spreads (dilates upon) many matters including the tattvas and mantras and affords protection;

1687. The following works will convey some idea of Śākta doctrines and practices: R. G. Bhandarkars's 'Vaiṣṇavism, Śaivism &c.' (in Collected Works, Vol. IV pp. 203–210); 'Sakti and Śākta' by Sir John Woodroffe (1920); 'Serpent Power' by Arthur Avalon (Sir John Woodroffe); 'the Śāktas' by E. A. Payne (Oxford University Press, 1933) 'Sakti or divine power' by Dr. Sudhendu Kumar Das (Calcutta University, 1945); 'Doctrine of Śakti in Indian Literature' by Dr. P. C Chakravarti (1940). Vide Prof. Bagchi's 'Studies in the Tantras' pp 1–3 for the introduction of four Tāntrik texts in Kambuja (Cambodia) about 800 A. D. named 'Śiraścheda, Vināśikha, Sammoha and Nayottara and 'Inscriptions from Kambuja' by Dr. R. C. Majumdar (Calcutta, 1953) pp. 362, 373–374 and JRAS for 1950 pp. 163–65 for relics of Śāktism in Moslem Malaya.

therefore it is called Tantra'.[1688] They can only be described but one matter is included in almost all of them, viz. the five 'Makāras'. Often they contain an amalgam of religion, philosophy, superstitious dogmas, rites, astronomy, astrology, medicine, prognostications. They resemble the Purāṇas in several respects. The Buddhists deified many important personages of Buddhism and took over in course of time certain Hindu deities like Gaṇeśa and Sarasvatī. Tantras are classified by comparatively later works into three groups, Viṣṇukrānta, Rathakrānta and Aśvakrānta and 64 Tantras are assigned to each of the three groups (vide Tāntrik Texts, vol. I. ed. by Arthur Avalon, Introduction pp. II–IV); but these numbers seem to be fictitious. The same Tantra is put in two classes by certain works. The Kulārṇava-tantra (III. 6-7) speaks of five *āmnāyas* (East, West, South, North and ūrdhva) as the paths to Mokṣa. The Paraśurāma-kalpasūtra[1689] I. 2 does the same. Besides, Tāntrik worshippers are divided into three classes viz. Śaiva, Śākta and Vaiṣṇava. Bagchi states ('Studies in Tantras' p. 3) that Tāntrik literature is classified into *Srotas* (which are three) *Pīṭha* and *Āmnāya*. The Saundaryalaharī, ascribed by some to the great Advaita teacher Śaṅkarācārya, refers to sixty-four Tantras (in verse 31 which begins 'catuṣṣaṣṭyā tantraiḥ' which, it is said therein, were declared by God Śaṅkara for deluding[1690] the world. Several Hindu and Buddhist Tantras

---

1688. तनोति विपुलानर्थान् तत्त्वमन्त्रसमन्वितान्। त्राणं च कुरुते यस्मात् तन्त्रमित्य-भिधीयते॥.

1689. भगवान् परमशिवभट्टारकः...भगवत्या भैरव्या स्वात्माभिन्नया पृष्टः पञ्चभिर्मुखैः पञ्चाम्नायान् परमार्थसारभूतान् प्रणिनाय। परशुरामकल्पसूत्र I. 2. There exist works that mention the mantras and *dhyānas* of the five āmnāyas; for example, D. C. ms. No. 394 of 1882–83 does so (cat. vol. XVI on Tantra mss, pp 339–340).

1690. The evidence for attributing the work Saundaryalaharī to the great ācārya is not strong. In H. P. Śāstri's Cat. of Palm-leaf mss. in Nepa Durbar Library p. LXII there is an entry for तारारहस्यवृत्तिका, a Tāntrī compilation by a Śaṅkarācārya of Gauḍadeśa. This would emphasize that caution is required in accepting works ascribed to Śaṅkarācārya as genuine works of the great Advaita teacher. Vide D. N. Bose on 'Tantras, their philosophy and occult secrets' pp 29–30 for the names of 64 tantras mentioned in the Vārāhī-tantra together with the verses therein and Saundaryalaharī (tr. pp. 117–120) for a list of 64 tantras and Bagchi's 'Studies in the Tantras' p. 5 for the names of tantras considered authoritative in the 8th century A.D. and even prior to it. The तन्त्रालोक of अभिनवगुप्त states that there are groups of ten, 18 and 64 Śaiva tantras 'दशाष्टादशचैवस्यदभिन्नं यच्छासनं विभोः।

(*Continued on next page*)

have been published and we have now a fair idea of what the numerous Tantras must have been like. Some of the published Hindu Tantras are Kulārṇava, Tantrasāra, Nityotsava, Paraśurāmakalpa-sūtra, Pārānandasūtra, Prapañcasāra, Mantra-mahodadhi of Mahīdhara, Mahānirvāṇatantra, Rudrayāmala, Vāmakeśvaratantra, Śāradātilaka (about 11th century A. D.). Besides, there are works like the Tantrāloka and Mālinīvijaya-vārtika of Abhinava-gupta of Kashmir Tāntrism. They stand somewhat apart from the works enumerated above. Among the published Buddhist tantras are; Advayavajrasaṅgraha, Āryamañjuśrīmūlakalpa, Guhayasamāja-tantra (probably 6th century A. D.), Jñānasiddhi of Indrabhūti (717 A. D.), Niṣpanna-yogāvali of Abhayākaragupta (composed between the last quarter of 11th and first of 12th century A. D.), Prajñopāya-viniścaya-siddhi of Anangavajra (about 705 A. D.), Ṣaṭ-cakra-nirūpaṇa (1577 A. D.), Sādhanamālā (containing 312 small works supposed to be from 3rd to 12th century A. D.). Of the Buddhist Tantras Āryamañjuśrīmūlakalpa and Guhyasamāja-tantra[1691] are the oldest according to Dr. B. Bhattacharya (Intro. p. XXXVIII. to Guhya-samājatantra). Most of the above works have been published by Arthur Avalon (Sir. John Woodroffe) and in the Gaikwad Oriental Series. Some of the Hindu Tantras contain sublime philosophical views derived from the Upaniṣads and the Gītā or from the Sāṅkhya and Yoga and the final goal according to them is *Mukti* (liberation from the

---

(*Continued from last page*)

तन्त्तारं त्रिकशास्त्रं हि तन्त्तारं मालिनीमतम् ॥ I. 18 (Kashmir S. series, Vol. XXII p. 35). The नित्याषोडशिकार्णव (a part of वामकेश्वरतन्त्र) names the 64 Tantras in verses 13–22 of the first विश्राम, but it includes eight Yāmalas among Tantras, while Dr. Bhattacharya (in 'Introduction to E. B. p. 52) tries to distinguish Āgamas and Yāmalas from Tantra and also in his Intro. to Sādhanamālā Vol. II. pp. XXI–XXII. The कौलावलीनिर्णय of ज्ञानान्दगिरि (Tāntrik Texts, vol. XIV) enumerates numerous tantras including Yāmalas in I. 2–14 and names (I. 92–93) eight gurus.

1691. Dr. Bhattacharya in Intro. to Guhyasamāja p. XXXIV holds that Asaṅga is probably the author of the Guhyasamāja and therefore that work belongs to the 3rd or 4th century A. D. One has only to read the Mahā-yānasūtrālaṅkāra of Asaṅga ed. by Sylvain Levi and compare its refined and correct Sanskrit with the rather barbarous Sanskrit of the Guhyasamāja to come to the conclusion that the latter is not Asaṅga's work. There is no evidence to prove that Guhyasamāja belongs to the 3rd or 4th century A.D. It is probably two or more centuries later than that; Bagchi ('Studies in Tantras' p. 41) is against identifying Asaṅga, the author of Sādhana No. 159, with the great teacher of Yogācāra,

cycle of births and deaths) for all men but to be secured by following the path laid down by the Tantras. As the number of published Hindu Tantras is considerable, reference will be made mainly to a few viz. Kulārṇava, Pārānandasūtra, Prapañcasāra, Māhānirvāṇatantra, Vāmakeśvaratantra (Ānan. ed.), Śaktisaṅgamatantra, Śāradātilaka and in the case of the Buddhist tantras to Āryamañjuśrīmūla-kalpa, Guhyasamājatantra, Prajñopāyaviniścayasiddhi, Jñānasiddhi, Sādhanamālā, Sekoddeśaṭīkā. The purpose of most Buddhist Tantras is to indicate a short path for attaining Buddha-hood through Yoga practices and they introduce the element of Śakti for Yogic practices and for securing miraculous powers (called *siddhis*). In the History of Dharmaśāstra not much need be said about Buddhist Tantras except for comparison and stress will have to be laid on the Hindu Tantras alone. The philosophical aspects of Tāntrik culture may be studied in the Paraśurāmakalpasūtra, the Vāmakeśvara-tantra, Tantrarāja, the works on Kashmir Śaivism, works of Bhāskararāya, Bhāvanopaniṣad. This last is a late work dignified with the title of Upaniṣad, as it deals with *bhāvanā* and summarises the Vāsanāpatala of Tantrarājatantra (vide Intro. to the latter p. 3). There are also Vaiṣṇava Tāntras like the Gautamīya-tantra (D. C. ms. No. 1120 of 1886–1892) and Kramadīpikā of Keśava (who was a successor of Nimbārka) with the commentary of Govinda Vidyāvinoda (published in the Chowkhamba S. series), which are not referred to in this work from considerations of space. Vide Agnipurāṇa 39. 1–7 for the names of twenty-five Vaiṣṇava Tantras dealing with the establishment of Viṣṇu image and other matters and Māheśvaratantra 26. 16–20.

The Hindu tantras which are supposed to have embodied dialogues between Śiva and Devī or Skanda or Bhairava and rarely others as in Dattātreyatantra (D. C. ms. No. 962 of 1887–91) endeavour to show that they base themselves on the Vedas, Āgamas, Smṛtis and Purāṇas, that there is an easier and quicker way to the final goal of mokṣa and they often quote Vedic verses. For example, in the Kulārṇava, Śiva says to Devī 'I churned the great ocean of Vedas and Āgamas with the churning handle of (correct) knowledge. I knew the essence of these and took out the Kuladharma,[1692] that the Kaulaśāstras are autho-

1692. मथित्वा ज्ञानदण्डेन वेदागममहार्णवम्। सारज्ञेन मया देवि कुलधर्मः समुद्धृतः॥ कुलार्णव॰ II. 10; the पारानन्दसूत्र III. 64 is almost the same 'मथित्वा ज्ञानमन्थेन

(Continued on next page)

ritative like Vedic texts and should not be nullified by ratiocination.' The same Tantra further asserts 'one who has studied the four Vedas but is ignorant of Kuladharma is inferior to a *cāṇḍāla*, while a cāṇḍāla who knows Kuladharmas is superior to a brāhmaṇa. If all dharmas such as sacrifices, pilgrimages and vratas are put on one side and Kuladharma on another side, Kaula (dharma) is superior.'[1693] It is, therefore necessary to understand what is meant by Kula or Kauladharma. The Guhya-samāja[1694] states that Guhya means the three viz. body, speech and mind and 'samāja' means 'coming together', that Kula may comprehend five matters or three or 101 and that Guhya (as defined) is *trikula*.' God Śaṅkara[1695] declared five tattvas, viz. wine, flesh, fish, mudrā (hand and finger poses or the woman helper of a yogin) and sexual intercourse, that are acts that become the means for the attainment of the position of a *vīra* and that the mantra of Śakti does not confer perfection unless one follows the practices of Kula; therefore a person

वेदागममहार्णवम्। पारानन्दमतं शुद्धं रत्नज्ञेन मयोद्धृतम्॥ इति' (p. 7); 'कुलशास्त्राणि सर्वाणि मयैवोक्तानि पार्वति। प्रमाणानि न सन्देहो न हन्तव्यानि हेतुभिः॥ देवताभ्यः पितृभ्यश्च मधुवाता ऋतायते। स्वादिष्ठया मदिष्ठया क्षीरं सर्पिर्मधूदकम्। हिरण्यपावाः खादिश्च अवधन्त् पुरुषं पशुम्। दीक्षासुपेयादित्याद्याः प्रमाणं श्रुतयः प्रिये॥ कुलार्णव II. 139–141. देवताभ्यः पितृभ्यश्च is वायुपु. 74. 15, मधु...यते is Rg. I. 90. 6, स्वादि...ष्ठया is Rg. IX. 1. 1, क्षीरं...दकम् is Rg. IX. 67, 32; हिरण्यपावाः is in Rg. IX. 86. 43. Most of the Vedic references are cleverly chosen to suggest sweet wine and flesh.

1693. एकतः सकला धर्मा यज्ञतीर्थव्रतादयः। एकतः कुलधर्मश्च तत्र कौलोऽधिकः प्रिये॥ चतुर्वेदी कुलाज्ञानी श्वपचादधमः प्रिये। श्वपचोऽपि कुलज्ञानी ब्राह्मणादतिरिच्यते॥ कुलार्णवतन्त्र II. 11 and 67. Vide महानिर्वाणतन्त्र IV. 42 for almost the same words.

1694. त्रिविधं कायवाक्चित्तं गुह्यमित्यभिधीयते। समाजं मीलनं प्रोक्तं सर्वबुद्धाभिधानकम्॥ गुह्यसमाज 18th पटल p. 152; पञ्चकं त्रिकुलं चैव स्वभावैकशतं कुलम्।... तत्त्वं पञ्चकुलं प्रोक्तं त्रिकुलं गुह्यमुच्यते। ibid. p. 153.

1695. वीरसाधनकर्माणि पञ्चतत्त्वोदितानि च। मद्यं मांसं तथा मत्स्यमुद्रामैथुनमेव च। एतानि पञ्च तत्त्वानि त्वया प्रोक्तानि शङ्कर। महानिर्वाण I. 57; साधकs are of three kinds पशु, वीर and दिव्य. Vide शक्तिसङ्गमतन्त्र, कालीखण्ड VI. 21, महानिर्वाण I. 51 and 55, IV. 18–19, कौलावलीनिर्णय VII. 186. कुलाचारं विना देवि शक्तिमन्त्रो न सिद्धिदः। तस्मात्कुलाचाररतः साधयेच्छक्तिसाधनम्। मद्यं मांसं तथा मत्स्यं मुद्रा मैथुनमेव च। शक्तिपूजाविधावाद्ये पञ्चतत्त्वं प्रकीर्तितम्॥ महानिर्वाण० V. 21–22. आद्ये is vocative of आद्या applied to शक्ति, the spouse of शिव. The कौलावलीनिर्णय states चण्डिकां पूजयेद्यस्तु विना पञ्चमकारकैः। चत्वारि तस्य नश्यन्ति आयुर्विद्या यशो धनम्॥ मद्यं मांसं...मैथुनमेव च।... मकारपञ्चकं देवि देवताप्रीतिदायकम्॥...विना पञ्चोपचारं हि देवीपूजां करोति यः। योगिनीनां भवेद्भक्ष्यः पापं चैव पदे पदे॥ IV. 24–28; besides, कौलावलीनिर्णय II. 101–105 are more striking: संस्थाप्य वामभागे तु शक्तिं स्वामिपरायणाम्।...विना शक्त्या तु या पूजा विफला नात्र संशयः। तस्माच्छक्तियुतो वीरो भवेच्च यत्नपूर्वकम्। या शक्तिः सा महादेवी हररूपस्तु साधकः। अन्योन्यचिन्तनाच्चैव देवत्वमुपजायते।...शक्तिं विनापि पूजायां नाधिकारी भवेत्तदा॥.

should be devoted to the Kula practices whereby he would attain to the sādhanā of Śakti; wine, flesh, fish, mudrā and sexual intercourse—these are declared to be the five tattvas in the procedure of the worship of Śakti. In another place the Mahānirvāṇa[1696] says that the individual soul, *prakṛti*, space, time, *ākāśa*, earth, water, fire and Vāyu—these are called 'Kula' and that way of life whereby one looks upon all these as *brahma* without distinction is called Kulācāra, that confers the four goals viz. dharma, artha, kāma and mokṣa. The Śaktisaṅgama-tantra states that Kula means the *upāsakas* (worshippers)[1697] of Kālī. The Kulārṇava states 'Kula means gotra and that springs from Śakti and Śiva; that man is called Kaulika who knows that mokṣa is secured from that (i. e. Śakti and Śiva). Śiva is called 'Akula' and Śakti is called 'Kula'; those who contemplate on Kula and Akula are the wise kaulikas." Various other definitions are given in Guhyasamāja (Ist paṭala p. 6), in the Preface p. VIII of the Śaktisaṅgama-tantra, Tārākhaṇḍa But the same Tantra clinches the matter by declaring that "Śakti is known as *Kula*; her worship and the like are described; that should be known as 'Kulācāra', which is difficult of attainment even for gods. Worship, done with these alone viz. wine, flesh, fish, mudrā and sexual intercourse, is known as Kulācāra." The Pārānanda-sūtra[1698] provides that the highest self is one,

1696. जीवः प्रकृतितत्त्वं च दिक्कालाकाशमेव च। क्षित्यप्तेजोवायवश्च कुलमित्यभिधीयते। ब्रह्मबुद्ध्या निर्विकल्पमेतेष्वाचरणं च यत्। कुलाचारः स एवाद्ये धर्मकामार्थमोक्षदः॥ महानिर्वाण० VII. 97–98. In VII. 109–110 it identifies the five तत्त्व, मद्य, मांस, मत्स्य, मुद्रा and मैथुन with the five elements viz. तेजः (अग्नि), पवन, आपः, पृथिवी and वियत्.

1697. श्रीकाल्युपासका ये च तत्कुलं परिकीर्तितम्। तेषां समूहो देवेशि कुलं सङ्कीर्तितं मया॥ शक्तिसङ्गम, कालीखण्ड chap. 3. 32; मद्यं मांसं तथा मत्स्यं मुद्रा मैथुनमेव च। एभिरेव कृता पूजा कुलाचारः प्रकीर्तितः॥ शक्तिसङ्गम०, ताराखण्ड, 36th पटल, verses 18–20; कुलं गोत्रं समाख्यातं तच्च शक्तिशिवोद्भवम्। येन मोक्ष इति ज्ञानं कौलिकः सोभिधीयते॥ अकुलं शिव इत्युक्तं कुलं शक्तिः प्रकीर्तिता। कुलाकुलानुसन्धानाच्चिप्पुणाः कौलिकाः प्रिये॥ कुलार्णव 17. 26–27. The पञ्चमकार-शोधनविधि (ms. D. C. No. 994 of 1891–95 folio 13 b) states 'मद्य...मैथुनमेव च। भाग्यहीना (नैः?) न लभ्यन्ते मकाराः पञ्च दुर्लभाः॥'.

1698. एकः परमात्मा। ईश्वराः सप्त। असंख्या जीवाः। ब्रह्मविष्णुशिवसूर्यगणेशशक्तिभैरवाश्चेश्वराः। पारानन्दे मते त्रयो मार्गाः। दक्षिणः। वामः। उत्तरः। तथैव गाथामुदाहरन्ति। दक्षिणादुत्तमं वामं वामादुत्तरमुत्तमम्। उत्तरादुत्तमं किंचिन्नैव ब्रह्माण्डमण्डले। वामाचारो द्विप्रकारो मध्यमोत्तमभेदेन। मद्यमैथुनमुद्राभिर्युक्तोऽसावुत्तमः स्मृत इति। मद्यमांसमत्स्यमुद्रामैथुनैर्युक्तो मध्यमः। पारानन्दसूत्र (G. O. S.) pp 1–3, 13; compare कुलार्णवतन्त्र II. 7–8 'वैष्णवादुत्तमं शैवं शैवाद् दक्षिणमुत्तमम्। दक्षिणादुत्तमं वामं वामात् सिद्धान्तमुत्तमम्। सिद्धान्तादुत्तमं कौलं कौलात्परतरं नहि'॥. वामाचार was possibly so called because woman (वामा) played an important part in it or it was secretly practised (which is a crooked way.)

that there are seven Lords (Īśvara) viz. Brahmā, Viṣṇu, Śiva, Sūrya, Gaṇeśa, Śakti and Bhairava, that individual souls are countless, that there are three *mārgas* (paths) viz. Dakṣiṇa, Vāma and Uttara, each succeeding one being superior to each preceding one, that Dakṣiṇa-mārga is the one declared in the Veda, smṛtis and purāṇas, that the Vāma (way) is declared by the Veda and Āgamas, while the third (Uttara) is the one declared by the words of the Veda and of the Guru and that the Guruvākya is that of one's guru who is himself *Jīvan-mukta* and who gives instruction as to a mantra. That sūtra further provides that the Vāmācāra is of two kinds, *madhyama* (middling) and *uttama* (best), that uttama is the one which is concerned with wine, sexual intercourse and hand poses, while madhyama is one where all five, wine, flesh, fish, mudrā and *maithuna* are resorted to. It should be noticed that the Tantras themselves designate the use of five makāras in worship as Vāmācāra and not their orthodox partisans of Yoga, as Heinrich Zimmer alleges in 'The art of Indian Asia' vol. I. p 130. Pārānandasūtra[1699] prescribes that the disciple has to undergo *dīkṣā* (consecration) from a qualified guru, who instructs the disciple as to the mantra, who holds a mouthful of water in his own mouth and passes it into the mouth of the disciple that accepts the mantra while he gulps down the water. This procedure applies if the guru is a brāhmaṇa, but if the guru is a kṣatriya he should recite the mantra in the right ear of the disciple. The Tantrarāja-tantra provides that the guru should wait for 1, 2, 3, 4 or 5 years according as the intending disciple belongs to the four varṇas or to a mixed caste, should test his qualities and devotion and then communicate to him the mantra; otherwise, both guru and disciple would come to grief (Tāntrik Texts, vol. VIII. II. 37–38). Most works on Tantra provide that the knowledge conveyed by the guru and worship with five *makāras* must be kept secret and if made public falling in hell is the result. Vide Paraśurāma-kalpasūtra I. 12 and Śaktisaṅgama-tantra.[1700] After undergoing dīkṣā and receiving the mantra the disciple has to follow the orders

1699. प्रत्यङ्मुख उदङ्मुखं शिष्यं तदिष्टमन्त्रमुपदिशेत्। मन्त्रं ग्राहयित्वा मुखजलगण्डूषं धृत्वा मन्त्रं जप्त्वा शिष्यमुखे निक्षिपेत्। निगिरन्नेव शिष्यो मन्त्रं गृह्णीयात्। एष ब्राह्मणोपदेशक्रमः। क्षत्रश्चेन्मन्त्रं ग्राहयित्वोपदिशेद् दक्षिणे कर्णे। पारानन्दसूत्र p. 5 sūtras 12–16.

1700. आनन्दं ब्रह्मणो रूपं तच्च देहेष्ववस्थितम्। तस्याभिव्यञ्जकाः पञ्च मकाराः, तैरेवं मुक्त्या, प्राकट्याच्चिरयः। परशुरामकल्पसूत्र I. 12; वेदशास्त्रपुराणानि स्मृतिर्वेदाङ्गना तथा। इदं तु शाम्भवी विद्या गुप्ता कुलवधूरिव॥ गुप्तं कौलिकाचारमनुगृह्णन्ति देवताः। बाध्यन्ते तं प्रपद्यन्ते नाशयन्ति प्रकाशने॥ शक्तिसङ्गम, तारा० 36. 24–25.

of the guru till the former has a vision of the deity.[1701] Guru is higher than all other men, mantra is higher than guru, the deity is higher than the mantra and the highest self is higher than the *devatā*. In order to attain *siddhis* the guru is to be served by disciples with devotion in all ways. There is only one way viz. bhakti (devotion) for those (disciples) that long for worldly pleasures, heaven or mokṣa, as the Śruti says 'there is no other way'. Jīvan-mukti[1702] means 'to have a vision of the Deity worshipped' and 'one who is liberated, though living, is not tainted by his acts, whether meritorious or otherwise'. This doctrine closely follows what is said in some of the Upaniṣads about the man who has realised *brahma* that 'he shakes off *puṇya* and *pāpa* and having cast aside the body he reaches the world of *brahma*; he does not return i. e. he never again undergoes *saṁsāra*'. One should strive for that stage. Therefore one who has obtained correct knowledge should become a *bhakta* (devotee). All these, viz. one in distress, the seeker after knowledge, one who seeks some desired object and one who has obtained correct knowledge, are noble, but the man, who has knowledge about God, when he becomes a devotee, reaches the world of the Highest Self, as the Vedic words say 'one who knows brahma reaches the Highest'. With all this sublime philosophy as the background the Pārānandasūtra frankly provides that the guru, after completing the worship up to the offering of a handful of flowers and having offered into fire some food, should make a collection of *makāras*, should again come to the place for worshipping the Deity and offer food into fire, should hand over to the neophyte a bowl for drinking wine,

1701. मन्त्रदीक्षातः प्राग्देवतासाक्षात्कारादुर्वह्मज्ञाप्यो भवति। सर्वेभ्यः परो गुरुर्गुरोः परो मन्त्रो मन्त्रात्परा देवता देवतायाः परः परमात्मेति भावयेत्। भोगस्वर्गापवर्गकांक्षिणां भक्तिरेवैकः पन्था नान्यः पन्था इति श्रुतिः। पारानन्द० pp 6–7 sūtras 35, 38, 59. The श्वेताश्वतरोप० III. 8 and VI. 15 have 'तमेव विदित्वातिमृत्युमेति नान्यः पन्था विद्यतेऽयनाय'. This half verse also occurs in वाज. सं. 31. 18.

1702. स्वोपास्यदर्शनं जीवन्मुक्तिः जीवन्मुक्तो न कर्मभिर्लिप्यते पुण्यैः पापैर्वा। न स पुनरावर्तते। न स भूयः संसारं सम्पद्यते। तस्माच्चद्दर्शने यतितव्यम्। ज्ञानी भक्तो भवेत्। आर्तजिज्ञासुरर्थार्थिज्ञानिन उदारास्तत्रेशस्य ज्ञानी भक्त एव परमात्मलोकं प्राप्नोति ब्रह्मविदाप्नोति परमिति श्रुत्यात्। पारानन्द p. 9 sūtras 3–8. The words न च पुनरावर्तते occur in छा. उप. VIII. 15 at the end and the words 'ब्रह्मविदाप्नोति परम्' are तै. उप. (ब्रह्मानन्द-वल्ली) at the very beginning. The words आर्त...ज्ञानी भक्त एव are borrowed from गीता VII. 16–17 'चतुर्विधा भजन्ते...उदाराः सर्व एवैते ज्ञानी त्वात्मैव मे मतम्।'. Compare मुण्डकोप० III. 1. 3 (तदा विद्वान् पुण्यपापे विधूय निरञ्जनः परमं साम्यमुपैति), छा. उप. VIII. 13, महानिर्वाणतन्त्र IV. 22 (ब्रह्मज्ञाने समुत्पन्ने मेध्यामेध्यं न विद्यते।' and VII. 94) (ब्रह्म...ज्ञे कृत्याकृत्यं न विद्यते॥).

mudrā, materials for dinner with condiments and a courtezan and should instruct the neophyte, that has accepted the three *makāras* (madya, mudrā and maithuna), as regards the kaula practices.[1703] Then the Pārānanda-sūtra devotes two pages (16–17) to the kauladharmas taught to the neophyte, from which a few striking passages may be cited. "A young[1704] courtezan is Śakti incarnate, is *brahma*; women are gods and the very life-breath and are ornaments (of the world); they should not be censured nor angered"; 'after worshipping the gods and gurus in the way laid down by the Veda and the Tantras a man does not incur sin if he drinks wine while remembering god or has sexual intercourse with a courtezan. He who partakes of wine and the rest merely for pleasing himself falls into a terrible hell. He who giving up the ordinances of śāstra acts as he pleases does not attain *siddhi* in this world, nor heaven nor the Highest goal (*mokṣa*). A worshipper should drink wine only up till his eyes do not begin to roll and up till his mind does not become unsteady; to drink beyond that stage is bestial'. The Pārānandasūtra (pp. 70–71) describes the procedure of a festival (Utsavavidhi) among Tāntrikas. The mantra is 'Īśvarātman, tava dāsoham', which may be given to even a cāṇḍāla or may be accepted from a cāṇḍāla. It is further provided that the followers of Vāma-mārga may employ the following mantras about the three makāras, that (the best among)

1703. गुरुः पुष्पाञ्जल्यन्तामर्चां विधाय हुत्वा हविः प्रतिपत्त्यगारं प्रविश्य मकारत्रयमङ्गीकृत्य पुनर्देवतागारमागत्य हुत्वा देवतां ससमस्तमण्डलामभ्यर्च्य नवशिष्यायालिपात्रं समुद्रं सव्यञ्जनभोजनसम्भारं सवेश्याकं प्रयच्छेत्।...गृहीतमकारत्रयं नव्यं शिष्यं कौलिकधर्मानुपदिशेत्। पारानन्द pp. 15–16, sūtras 56 and 63.

1704. स्वेच्छाशक्तुमती शक्तिः साक्षाद् ब्रह्म न संशयः। तस्माच्तां पूजयेद्भक्त्या वस्त्रालङ्कारभोजनैरिति॥ स्त्रियो देवाः स्त्रियः प्राणाः स्त्रिय एव हि भूषणम्। स्त्रीणां निन्दा न कर्तव्या न च ताः क्रोधयेदपि॥ इति। देवान् गुरून्समभ्यर्च्य वेदतन्त्रोक्तवर्त्मना। देवं स्मरन् पिबन् मद्यं वेश्यां गच्छन्न दोषभाक्॥ इति। सेवेदात्मसुखार्थं यो मद्यादिकमशास्त्रतः। स पतति नरकं घोरं नात्र कार्या विचारणा॥ यः शास्त्रविधि ... परां गतिम्॥ इति। यावच्च चलते दृष्टिर्यावच्च चलते मनः। तावत्पानं प्रकुर्वीत पशुपानमितःपरम्। इति। जीवन्मुक्तः पिबेदेवमन्यथा पतितो भवेत्॥ इति। पारानन्द० pp. 16–17 sūtras 64, 65, 74–76, 80–81. Extravagant praise is bestowed on women in several tantras such as in Śaktisaṅgama-tantra, Kālīkhaṇḍa 3. 142–144 and Tārākhaṇḍa 13. 43–50 and in कौलावलीनिर्णय X. 88. The half verse 'स्त्रियो...भूषणम्' occurs in शक्तिसङ्गमतन्त्र, ताराखण्ड 23. 10. The verse यः शास्त्र० is भगवद्गीता 16. 23. For यावच्च...परम् compare कुलार्णवतन्त्र VII. 97–98. The कुलार्णव states that every woman is born in the *kula* of the great Mother and so one should not beat a woman even with a flower even if she be guilty of a hundred misdeeds, one should not mind the faults of women and should make known only their good points (XI. 64–65). Vide also कौलावलीनिर्णय X. 66–69.

Vāmācāras should resort to. They are: 'I take this holy nectar, which is a medicine (antidote) for *saṁsāra*, which is a means of cutting off the snares by which the *paśu* (in man) is bound and which is declared by Bhairava' (this when taking the first i. e. wine); 'I take this mudrā which is 'ucchiṣṭa' of the Lord (i. e. which has been first offered to God), which destroys the torments of the heart, which produces joy and which[1705] is enriched with other food materials' (this when taking mudrā); 'I take this divine young woman who has drunk wine, that always makes the heart full of bliss and that brings about my sādhanā' (when taking one of the women that are brought together).

The Hindu Tantra works present two sides, one philosophical and spiritual, the other popular, practical and more or less magical, which relies on mantras, mudrās, maṇḍalas, *nyāsas*, *cakras* and *yantras* as physical means to realize one's identity with the Supreme Power or Energy by concentration and as conferring extraordinary powers on the devotee. This may be illustrated by reference to two typical tantras, the Śāradātilaka and the Mahānirvāṇa-tantra. The Mahānirvāṇa-tantra, though it speaks of the five makāras as means of *upāsanā* and though it states that when the great Tantra is understood, the Vedas, Purāṇas and śāstras are hardly[1706] of any use, puts forward the striking conception in IV. 34–47 that Parameśvara is one and to be described as *sat*, *cit* and *ānanda*, that He is one without a second, is beyond the *guṇas* and is to be known from the Vedānta texts. It further on says that the best mantra is 'om saccidekam brahma' (III. 14), that those who perform the upāsanā of the Highest Brahma do not require other means of worship (sādhanā); by sticking to this mantra man becomes *brahma*. In the 4th chap. however, the Mahāparinirvāṇa starts by saying that Durgā is the highest prakṛti of Paramātmā, she has various names such as Kālī, Bhuvaneśvarī, Bagalā, Bhairavī, Chhinnamastakā, that she is Sarasvatī, Lakṣmī and Śakti, that she assumes various forms for securing the purpose of her devotees and for the destruction of demons. In the Kaliyuga perfection cannot be attained without following *kula* practices, which lead

---

1705. Mudrā has not here the sense of 'hand and finger poses' but one of the meanings that will be noted under mudrā later.

1706. किं वेदैः किं पुराणैश्च किं शास्त्रैश्चागमैः शिवे। विज्ञातेऽस्मिन्महातन्त्रे सर्वसिद्धीश्वरो भवेत्॥ महानिर्वाण II. 31.

to the knowledge of brahma and the man who possesses knowledge of brahma is a liberated soul, though living (he is *Jīvanmukta*). Then there is high praise (IV. 10 ff) of Devī who is spoken of as the primordial Śakti (ādyā paramā śakti) and all gods including Śiva himself derive their powers from this Highest Śakti. A rather astounding statement is made in[1707] the words 'as there was partaking of wine and the rest in Satya, Tretā and Dvāpara yugas, one should do the same in Kali-yuga, but in accordance with the *kula* way, and that Kali does not affect those who give to the truthful Yogin the five tattvas (wine &c.) sanctified according to the kula way'. Then a mantra of ten syllables is declared 'hrīm śrīm krīm parameśvari[1708] svāhā', by merely listening to which a man becomes *jīvanmukta*. Then by various combinations of the mystic syllables with Parameśvarī and Kālikā twelve mantras are produced (V. 18). But the mantras do not confer siddhi unless the kulācāra way is followed viz. the five tattvas 'madya' &c. are offered (V. 22-23). Then a Gāyatrī mantra is set out (V. 62-63) as 'adyāyai vidmahe Parameśvaryai dhīmahi | tan-naḥ Kālī pracodayāt ||', which is to be muttered thrice daily. The Sāṅkhya tattvas, Prakṛti, Mahat, Ahaṅkāra &c. are welded on to the worship of Śakti and the Vedic mantra 'Haṁsaḥ śuciṣad' (Ṛg. IV. 40. 5) with the Tāntrik *bīja* Hrīm (V. 197). The Tantra gives directions for the sanctification of flesh (V. 203-208, where Ṛg. I. 22. 20 'tadviṣṇoḥ paramam padam' is employed), of fish (V. 209-210) where the mantra 'Tryambakam' (Ṛg. VIII. 59. 12) is employed, of mudrā (V. 211-212 where the mantras 'Tad Viṣṇoḥ paramam' and 'tad-viprāso' Ṛg. I. 22. 20-21, are employed) to be offered to Devī. The Mahānirvāṇatantra

---

1707. सत्यत्रेताद्वापरेषु यथा मद्यादिसेवनम्। कलावपि तथा कुर्यात् कुलवर्त्माश्रुसारतः॥ ...कुलमार्गेण तत्त्वानि शोधितानि च योगिने। ये दद्युः सत्यवचसे न हि तान् बाधते कलिः। महानिर्वाण० IV. 56 and 60. It may be stated here that in the two editions of the महानिर्वाण there is a difference of a few verses here and there.

1708. In the तन्त्र works the letters of the bījas in mantras are often indicated in a roundabout or mystic way. One example about the माया-बीज ह्रीं may be set out here. प्राणेशस्तैजसारूढो भेरुण्डा व्योमबिन्दुमान् (महानिर्वाण V. 10); here ह is प्राणेश, र is तैजस, ई is भेरुण्डा, व्योमबिन्दु is अनुस्वार and this gives the bīja ह्रीम्; क्लीं and क्रीं are described in नित्याषोडशिका० (I. 162-64) in a similar way. ह्रीं and श्रीं are respectively the बीजs of माया (or भुवनेश्वरी) and of लक्ष्मी. Vide मातृकानिघण्टु (Tāntrik Texts Vol. I. 5-22, pp 26-34 for बीजनिघण्टु, pp 35-45 for मातृकानिघण्टु i. e. for ओम् and letters of the alphabet from अ to क्ष). Every bīja mantra must have the *bindu* on it, as in Hrīm, Śrīm, Krīm &c. 'बिन्दुयोगं विना बीजत्वायोगात्' (सेतुबन्ध p 50 on नित्याषोडशिकार्णव).

(18th century) being composed after Śāktism had come into great ridicule and obloquy is rather sober.[1709] It says that women of good birth should simply smell wine and not drink it, while householder *sādhakas* should drink only as much as is contained in five cups, since by drinking too much men of good family incur the loss of *siddhi*, and should drink only so long as the wine quaffed does not make their eyes roll or does not make their mind confused. As to the last tattva (maithuna) the sādhaka was to confine himself to the woman he chooses as his Śakti (VI. 14) and if his wife is alive he is not to touch another woman with a vicious intent, otherwise he would go to hell.[1710] In keeping with its desire to present respectability along with tāntrik practices, the Mahānirvāṇa devotes chapter VIII. to the duties of *varṇas* and āśramas, the duties of the king, the duties of servants in general, provides[1711] that persons of all varṇas are to marry within the varṇa and dine with persons of the same varṇa, except when engaged in Bhairavī cakra and Tattva-cakra (VIII. 150), when men of all varṇas are like the best brāhmaṇas, and no consideration of the castes of the participants arises nor any question about *ucchiṣṭa*. It prescribes that no one has the adhikāra to engage in the performance of Tattvacakra unless he is a *sādhaka* endowed with knowledge of *brahma*. In that *cakra* the tattvas (wine and the others) should be collected and placed in front of the Devī, the mantra 'Hamsaḥ' (Rg. IV. 40. 5) should be recited over all tattvas and the tattvas should be offered to the Highest Self with the verse 'Brahmārpaṇam brahma havir' (Bhagvadgītā IV. 24 = Mahānirvāṇa VIII. 214)

1709. अलिपानं कुलस्त्रीणां गन्धस्वीकारलक्षणम्। साधकानां गृहस्थानां पञ्चपात्रं प्रकीर्तितम्॥ अतिपानात्कुलीनानां सिद्धिहानिः प्रजायते। यावच्च चालयेद्दृष्टिं यावच्च चालयेन्मनः। तावत्पानं प्रकुर्वीत पशुपानमतःपरम्॥ महानिर्वाण० VI. 194. The cup should be of gold or silver or of glass or of cocoanut shell but should not be more than five *tolakas* in capacity and not less than three 'पानपात्रं प्रकुर्वीत न पञ्चतोलकाधिकम्। तोलकत्रितयाक्यूनं स्वार्णं राजतमेव च। अथवा काचजनितं नारिकेलोद्भवं च वा। महानिर्वाण VI. 187–188. For similar provisions about पानपात्र, compare कौलावलीनिर्णय VIII. 55–56.

1710. स्थितेषु स्वीयदारेषु स्त्रियमन्यां न संस्पृशेत्। दुष्टेन चेतसा विद्वानन्यथा नारकी भवेत्॥ महानिर्वाण० VIII. 40.

1711. संप्राप्ते भैरवीचक्रे सर्वे वर्णा द्विजोत्तमाः। निवृत्ते भैरवीचक्रे सर्वे वर्णाः पृथक् पृथक्॥ नामजातिविचारोस्ति नोच्छिष्टादिविवेचनम्। चक्रमध्ये गता वीरा मम रूपा नराकृतयः॥ चक्राद्विनिसृताः सर्वे स्वस्ववर्णाश्रमोदितान्। लोकयात्राप्रसिद्ध्यर्थं कुर्युः कर्म पृथक् पृथक्॥ महानिर्वाण० VIII. 179–180, 197. The verse प्रवृत्ते भैरवीचक्रे...पृथक् occurs also in कौलावलीनिर्णय VIII. 48–49. भैरवीचक्र and तत्त्वचक्र are described in महानिर्वाण० VIII. 154–176 and VIII. 204–219 respectively.

and all the sādhakas should engage in drinking and eating.[1712] Chap. IX enumerates and describes ten *saṃskāras* from garbhādhāna to marriage for members of the three varṇas and nine for śūdras (omitting *upanayana*), wherein Vedic mantras are prescribed as in the Dharmasūtras and smṛtis. One interesting item is what is called Śaiva marriage, which is of two kinds, one entered into according to the rules of *cakra* and the other lasting for life. It is further provided that in Śaiva marriage[1713] no question of *varṇa* or age arises and that if a man has children from a wife married in the *brāhma* form and also children of a Śaiva marriage, it is only the former that take as heirs and the latter are entitled only to food and raiment (IX. 261-264). Chapters X, XI, XII of the Mahānirvāṇa deal respectively with *śrāddhas*, *prāyaścittas* for sins and *vyavahāra*.

It is necessary now to turn to the Śāradātilaka which belongs to about the 11th century A. D. That work is divided into 25 *paṭalas* and contains over 4500 verses. It presents in the beginning a somewhat abstruse and involved philosophy. It says that Śiva is both *nirguṇa* and *saguṇa*, the former being different from Prakṛti, the latter being associated with Prakṛti. Then it describes the order of evolution and manifestation as follows :— From the Saguṇa Parameśvara described as "Sac-cidānanda-vibhava' Śakti[1714] proceeds; from the latter arises *nāda* (para) and from nāda arises *bindu* (para) which is divided into three viz. bindu (apara), nāda (apara) and *bīja*; the first is indentified with Śiva, bīja being Śakti and *nāda* being the coming together of the two (Śiva and Śakti). Śakti creates the worlds, she is *śabda-bhahma* (I. 56) and is called parāśakti (I. 52) and para-devatā (I. 57). She flashes like lightning in the ādhāra-cakra.[1715]

1712. ततो ब्राह्मेण मनुना समर्प्य परमात्मने। ब्रह्मज्ञैः साधकैः सार्धं विदध्यात्पान-भोजनम्॥ महानिर्वाण० VIII. 216. मनु is often used in the sense of मन्त्र; vide कुलार्णव XII. 18, बृहद्धारीतस्मृति VI. 161, 163. मन्त्र and मनु are both derived from the same root '*man*' to think. The ब्राह्म-मनु is ओं सच्चिदेकं ब्रह्म.

1713. वयोवर्णविचारोत्र शैवोद्वाहे न विद्यते। ibid, IX. 279.

1714. Rāghavabhaṭṭa, the very learned commentator of the Śāradātilaka, who composed his commentary in Banaras in Vikrama year 1550 (1494 A. D.) explains that in the Sāṅkhya system Śakti is called Prakṛti, in Vedānta Māyā and in Śivatantras Śakti.

1715. Vide षट्चक्रनिरूपण (Tāntrik Texts, vol. II. ed. by Arthur Avalon) verses 4-49, Dakṣiṇā-mūrtisaṃhitā VII. 11-16 for cakras and "Serpent Power" (by A. Avalon, ed. of 1953) which contains an English translation

(*Continued on next page*)

Śakti assumes the form of Kuṇḍalinī in the human body. From Śambhu in the form of *bindu* arise in order Sadāśiva, Īśa. Rudra, Viṣṇu, Brahmā; from the avyakta *bindu* arise in order the mahat-tattva, ahaṅkāra and the other tattvas mentioned in the Sāṅkhya system. Śakti is all-pervading and yet more subtle than the subtlest, she is the Kuṇḍalinī coiled like a serpent and manifests herself in the form of the fifty letters of the Sanskrit alphabet (from 'a' to 'kṣa').

Before proceeding further some explanation of the six *cakras* which form an important constituent subject of several tantras is needed. There are said to be six cakras (centres) in the human body viz. Ādhāra or Mūlādhāra (at the base of the spine), Svādhiṣṭhāna (near the generative organ), Maṇipūra (near the navel), Anāhata (near the heart), Viśuddha (near throat), and Ājñā (between the brows). Besides these, there is Brahmarandhra figured as the pericarp of the thousand-petalled lotus

---

(*Continued from last page*)

of षट्चक्रनिरूपण in which plate I shows the positions of the six cakras also called lotuses (*padma*), plates II to VII facing pp. 356, 365, 370, 382, 392, 414 illustrate the six chakras from Mūlādhāra to Ājñā together with their colours, numbers of petals, letters, the devatās in each and other details. These are drawings used by the Yogis. Plate VIII facing p. 430 illustrates '*sahasrāra*'. Vide C. W. Leadbeater's work on 'the chakras' (Adyar, 1927), in which the author claims that the illustrations of the cakras represent them as they actually appear to those who can see them and on p. 56 he furnishes a table of the colours of the lotus petals as observed by Leadbeater and his friends, and as described in षट्चक्रनिरूपण, शिवसंहिता and गरुडपुराण. The Rudrayāmala (17th Paṭala, verse 10) speaks of Kuṇḍalī as 'Atharvavedacakrasthā Kuṇḍalī paradevatā', verses 21-24 speak of Kuṇḍalinī passing from Mūlādhāra-cakra and reaching the crown of the head that has the thousand-petalled lotus, that when united with Śiva he (sādhaka) drinks nectar there. Rudrayāmala (27. 58–70) dilates on the six cakras and the Sahasrāra together with the *dalas* (petals) and letters assigned to each. A stern warning has to be given that none should try to experiment about the cakras by reading books or try to rouse the Kuṇḍalinī except under the guidance of a real Master in Yoga, as otherwise very dangerous consequences would follow. Even as regards wrong methods of Prāṇāyāma and Dhāraṇā, the Vāynpurāṇa (chap. XI. 37–60) states that Yoga practices by ignorant men result in dullness of intelligence, deafness, dumbness, blindness, loss of memory, premature old age and disease and it specifies certain remedies to cure these defects. The present author knew a person who practised prāṇāyāma continuously for long periods becoming stone deaf, though otherwise he was strong and muscular, and an expert in ear diseases declared on examination that there was no possibility of his recovery by the methods of modern medical science.

within the crown of the head. The cakras are often indentified with the nerve plexuses of modern physiology, but the descriptions in Sanskrit works of the Kuṇḍalinī and the cakras are meant to refer not to the gross body but rather to what is situated in the subtle body that vanishes when a man dies. The idea of the relevant Sanskrit texts is that the Kuṇḍalinī Śakti ('Kuṇḍalin' means a serpent) is asleep in the Mūlādhāra-cakra coiled like a serpent and has to be roused by the practices of Yoga and deep meditation.[1716] The Śāradātilaka asks in an eloquent stanza the sādhaka to meditate upon the Kuṇḍalinī which when roused passes from the Mūlādhāra-cakra by means of the Suṣumnā-nāḍī (which is in the centre of the spinal column) through all the six cakras, unites with Śiva in the Sahasrāra (thousand-petalled) cakra and then returns to Mūlādhāra. Each of the six cakras is said to have a certain number of petals viz. 4, 6, 10, 12, 16, 2 (50 in all) in order from Mūlādhāra to Ājñā (vide Rudrayāmala, 17th Paṭala, verses 55-56). The letters of the alphabet also are 50 (from 'a' to 'kṣa') and they are assigned in groups to the six cakras as follows: ha and kṣa to Ājñā, 16 vowels to Viśuddha in the throat, letters ka to ṭha (12 in all) to Anāhata, letters Ḍa to Pha (10) to Maṇipūra, ba to la (6 in all) to Svādhiṣṭhāna, letters va to sa (4) to Mūlādhāra. Some tantras state the colour of each of the six cakras and identify them with the five elements and the mind. These speculations of the Yoga and Tantras are

1716. देवीभागवत XI. 1. 43 is: आधारे लिङ्गनाभिप्रकटितहृदये तालुमूले ललाटे द्वे पत्रे षोडशारे द्विदशदशदलद्वादशार्धे चतुष्के। नासान्ते बालमध्ये डफकठसहिते कण्ठदेशे स्वराणां हं क्षं तत्त्वार्थयुक्तं सकलदलगतं वर्णरूपं नमामि॥; that nectar flows over कुण्डलिनी when it reaches सहस्रार is stated in verse 47 of the same 'प्रकाशमानां प्रथमे प्रयाणे प्रतिप्रयाणेप्यमृतायमानाम्। अन्तः पदभ्यामनुसञ्चरन्तीमानन्दरूपामबलां प्रपद्ये॥; मूलोल्लिसद्भुजङ्गराजमहिषीं यान्तीं सुषुम्नान्तरं भित्त्वाधारसमूहमाशु विलसत्सौदामिनी-सन्निभाम्॥ व्योमाम्भोजगतेन्दुमण्डलगलद्दिव्यामृतौघप्लुतां सम्भाव्य स्वगृहं गतां पुनरिमां सञ्चिन्तयेत्कुण्डलीम्॥ शारदा० 25 65; vide *ibid*. 25. 78 for the वर्णs assigned to the six चक्रs. मूल and स्वगृह in (verse 65) mean the मूलाधारचक्र and भुजङ्गराजमहिषी means कुण्डलिनी. Vide षट्चक्रनिरूपण verse 53 also, for the stream of nectar flowing over कुण्डलिनी in सहस्रारपद्म. Vide मन्त्रमहोदधि IV. 19-25, ज्ञानार्णवतन्त्र (24. 45-54), महानिर्वाणतन्त्र V. 113-115, for the number of petals in cakras, their colours, the letters assigned to each and their identification with the five elements and mind and सौन्दर्यलहरी verse 9 'महीं मूलाधारे...सहस्रारे पद्मे सह रहसि पत्या विहरसे॥' for identifying the five elements and the mind with the six cakras. In 'Sarasvatībhavana Studies' Vol. II. pp. 83-92 Pandit Gopinath Kavirāja describes the system of *cakras* according to Gorakṣanātha. The रुद्रयामल (36. 6-168) sets out 1008 names of कुण्डलिनी, all of which begin with the letter क.

developments of the ancient Upaniṣad theories briefly noticed below.[1717]

Letters form words and words form mantras, that are the power incarnate of Śakti. Then the Śāradātilaka describes āsana, maṇḍapa, kuṇḍa, maṇḍala, pīṭhas (on which images of gods are to be placed), dīkṣā (initiation), prāṇapratiṣṭhā (vivifying images), production of sacrificial fire. The Śāradātilaka (I. 109 and V. 81–91), the Varivasyārahasya (II. 80), the Paraśurāmakalpasūtra (I. 4, 'Ṣaṭ-triṁśat tattvāni viśvam') and other Tāntrik and Āgamic works enumerate 36 tattvas (including those of the sāṅkhya system). From chap. VII. to XXIII mantras of different deities, their formation, use and results, abhiṣekas and mudrās are described. Yantras are dealt with in chap. XXIV and Yoga in chap. XXV. It must be said to the credit of the Śāradātilaka that it treats of only mantras and mudrās and hardly anywhere treats of the other makāras. The Śāradātilaka has been profusely quoted as an authoritative Tantra by medieval Dharmaśāstra writers like Govindānanda, Raghunandana, Kamalākara, Nīlakaṇṭha, Mitramiśra and orthers. In J. G. J. R. I. vol. III. pp. 97–108 M. M. Gopinath Kavirāja contributes a learned paper on nāda, bindu and kalā and takes great pains to elucidate these and hopes that his exposition will make the meaning of these words clear (p. 103). But the author feels grave doubts whether most readers will find the meanings clear.

Many tantras speak of the five makāras as the means of worshipping Devī, as enabling a man to possess miraculous

---

1717. From the times of the Upaniṣads the heart is likened to a lotu and it is said "There are hundred and one Nāḍis (arteries or veins) of the heart; *one of them penetrates the crown of the head; moving upwards by it* a man (who is emancipated) reaches immortality." Vide 'अथ यदिदमस्मिन् ब्रह्मपुरे दहरं पुण्डरीकं वेश्म दहरोऽस्मिन्नन्तराकाशस्तस्मिन्यदन्तस्तदन्वेष्टव्यं तद्वाव विजिज्ञासितव्यमिति। छा. उप. VIII. 1. 1.; तदेष श्लोकः। शतं चैका हृदयस्य नाड्यस्तासां मूर्धानमभिनिःसृतैका। तयोर्ध्वमायन्नमृतत्वमेति विष्वङ्ङन्या उत्क्रमणे भवन्ति। छा. उप. VIII. 6. 6. The same verse (शतं चैका) is कठोप. VI. 16 and compare प्रश्नोप. III. 6 for a similar statement; compare वे. सू. III. 2 7 'तदभावो नाडीषु तच्छ्रुतेरात्मनि च' and IV. 2.17; in the भाष्य on IV. 2. 17 शङ्कराचार्य quotes the verse 'शतं चैका' &c. The मिता. on या. III. 108–109 *refers to* इडा, पिङ्गला, सुषुम्ना and ब्रह्मरन्ध्र and the रुद्रयामल (VI. 49) speaks of ten nāḍīs of which the three Iḍā &c. represent Soma, Sūrya and Agni. मैत्रुपनिषद् VI. 21 is: अथान्यत्राप्युक्तम्। ऊर्ध्वगा नाडी सुषुम्नाख्या प्राणसञ्चारिणी तालवन्तर्विनिःसृता। The word is written sometimes as सुषुम्णा. The बृह. उप. II. 1. 19 speaks of 72000 nāḍīs that start towards Purītat from the heart and या, III. 108 also says the same.

powers and as leading to final liberation. The Kulārṇava states 'the great Bhairava has prescribed that in the Kaula system Siddhi (perfection) results from those very substances by (resorting to) which (ordinarily) men incur sin'. That means that the Kaula system eradicates poison by poison or, to employ modern terminology, its principles are like those of Homeopathy.[1718]

The Tantras seem to be not unaware that in prescribing the five *makāras* as leading to mukti (final liberation) they were playing with fire. The Kulārṇava itself remarks (II. 117–119 and 122) 'If by merely drinking wine a man were to attain siddhi (miraculous powers, perfection), then all wretched drunkards may attain siddhi. If, by merely eating meat a holy goal were to be secured then all meat-eaters in the world would be holy men. If by mere intercourse with a woman (called *śakti*) mokṣa was to result, then all men in the world may attain liberation. To follow the path (of Kula) is indeed more unattainable than walking on the edge of a sword, than clinging to a tiger's neck, than holding a serpent (in one's hand)'. The Kulārṇava prefaces the preceding dicta by the words 'Many, who are devoid of traditional knowledge and who profane (the śāstra) by false ideas, imagine that the Kaulika doctrine is this and that, relying on their (poor) intellect' (II. 116).

The Devībhāgavata provides (XI. 1. 25) that so much of tantra as is not opposed to the Veda is undoubtedly authoritative (vedāvirodhi cet tantram tat pramāṇam na saṁśayaḥ), but what is opposed to Veda is not authoritative.

There appears to have been great rivalry between the Hindu and Buddhist tantras. The Śaktisaṅgama-tantra, one of the most popular and most exhaustive works on tantra, states that Devī manifests herself for the destruction of Bauddha and other heretical sects, for the removal of the confusing admixture of

1718. यैरेव पतनं द्रव्यैः सिद्धिस्तैरेव चोदिता। श्रीकौलदर्शने चापि भैरवेण महात्मना। कुलार्णव V. 48; vide ज्ञानसिद्धि (Buddhist tantra) I. 15 'कर्मणा येन वै सत्त्वाः कल्पकोटिशतान्यपि। पच्यन्ते नरके घोरे तेन योगी विमुच्यते॥' and compare प्रज्ञोपाय० (Buddhist) V. p. 23 verses 24–25 'जनयित्रीं स्वसारं च स्वसुतां भागिनेयिकाम्। कामयन् तत्त्वयोगेन लघु सिध्येत साधकः॥' (both works in 'Two vajrayāna texts,' G. O. S.). Bagchi in 'Studies in tantras' (pp 36–37) shows that according to some Tāntrik works the words जनयित्री, स्वसृ, भागिनेयी have esoteric meanings and not the ordinary meanings. But in the context in which they are employed in the two vajrayāna texts, it is rather difficult to hold that they are employed in any esoteric or symbolic sense.

different cults, for the establishment of the (true) cult, for the protection of what the brāhmaṇas stand for and for the perfect attainment of mantra-śāstra.[1719] The Bauddha tantras, on the other hand, were not slow to retaliate.

It would not be entirely out of place if a few words were devoted to the Bauddha Tantras, particularly of the Vajrayāna. It has already been shown above (pp. 943–44 note 1516) that all Buddhists, whether of the *hīnayāna* or *mahāyāna* type, were required to observe strict rules and regulations such as those of *pañcaśīlas* and of taking refuge with Buddha, Dharma and Saṅgha and of daśaśīlas (for monks). The goal of nirvāṇa (particularly under Mahāyāna doctrines) could be reached only after a very long time or after several births. As luxuries viz. flesh, fish, wine and women had been banned, the general mass of the people and probably monks also were tired of the strict mode of life and long waiting for the goal. Buddhist Tantras like the Guhyasamāja (that belongs to the Vajrayāna school) provided an easy process by which liberation and even Buddhahood could be secured in a short time and even in[1720] one life and averred that Bodhisattvas and Buddhas attained the seat of *dharma* by enjoying all objects of pleasure as they[1721] pleased. The word Vajra means both 'diamond' and 'thunderbolt'. The first meaning appears to have been principally meant in the Guhyasamāja but the 2nd meaning also must have been sometimes intended. Vajra denotes anything which is hard like a diamond. In the Guhyasamājatantra the word Vajra, either singly or in compounds, occurs hundreds of times. Kāya (body), Vāk (speech) and citta (mind) are called 'trivajra' (Guhya, pp. 31, 35, 36, 43). Numerous other things[1722] are called 'vajra',

(*Continued on next page*)

such as the *śūnya* (the Absolute of the Mādhyamaka school) and also Vijñāna (consciousness), which is the sole reality according to the Yogācāra school, and the Mahāsukha (Bliss) added by the Śāktas. It also means the male organ in the mystic language of Śāktas. Though the original Buddhist rules insisted on ahiṁsā, Guhyasamāja permitted several kinds of flesh, such as that of elephants, horses, dogs and even human[1723] flesh. Early Buddhism insisted upon truthfulness and continence (brahmacarya); vajrayāna, being an innovating revolt, allowed the killing of all animals, speaking untruth, intercourse with women (including even incest with the mother, sister[1724] and daughter) and appropriating wealth not donated by any one. This was called vajramārga (the path of vajra), which is said to have been the doctrine of all Buddhas.

The Prajñopāya (I. 20) describes the state reached by the Vajrayāna method as follows. 'It is neither duality nor non-duality, it is full of peace, beneficent, present everywhere, to be realised by one's own self, steady (unchanging), undisturbed and full of Prajñā (wisdom) and Upāya (activity with compas-

be noted that the Jñānasiddhi II. 11 (Buddhist work) states 'क्षीन्द्रियं च यथा पद्मं वज्रं पुंसेन्द्रियं तथा॥'. शून्यता is called वज्र because it is वज्रं सारमसौ(सें?) क्षीर्यमच्छेद्याभेद्यलक्षणम्। अद्वाहि अविनाशि च शून्यता वज्रमुच्यते॥ अद्वयवज्रसंग्रह (G. O. S. pp. 23, 37). This is somewhat like the doctrine of Brahma and Ātman in the Bhagavadgītā II. 23–25 (नैनं छिन्दन्ति शस्त्राणि &c.). ज्ञानसिद्धि p. 76 explains: सर्वसत्त्वेषु महाकरुणाप्रमाणानुगतं बोधिचित्तं वज्र इत्यर्थः ' i.e. वज्र and बोधिचित्त (Enlightenment) are synonymous. न द्वयं नाद्वयं शान्तं शिवं सर्वत्र संस्थितम्। प्रत्यात्मवेद्यमचलं प्रज्ञोपायमनाकुलम्॥ प्रज्ञोपाय० I. 20; प्रज्ञापारमिता सेव्या सर्वथा मुक्तिकांक्षिभिः।...ललनारूपमास्थाय सर्वत्रैव व्यवस्थिता। अतोऽयं वज्रनाथेन प्रोक्ता बाह्यार्थसम्भवा॥ प्रज्ञोपाय० V. 22–23.

1723. मांसाहारादिकृत्यार्थं महामांसं प्रकल्पयेत्।...हस्तिमांसं हयमांसं श्वानमांसं तथोत्तमम्। भक्षेदाहारकृत्यार्थं न चान्यत्तु विभक्षयेत्। प्रियो भवति बुद्धानां बोधिसत्त्वश्च धीमताम्। अनेन खलु योगेन लघु बुद्धत्वमाप्नुयात्। गुह्यसमाज० 6th पटल p. 26; vide ज्ञानसिद्धि of इन्द्रभूति I. 12–14 for similar verses, प्राणिनश्च त्वया घात्या वक्तव्यं च मृषा वचः। अदत्तं च त्वया ग्राह्यं सेवनं योषितामपि॥.

1924. अनेन वज्रमार्गेण वज्रसत्त्वान् प्रचोदयेत्। एषो हि सर्वबुद्धानां समयः परमशाश्वतः॥ गुह्यस०, 16th पटल p 120; ये परद्रव्याभिरता नित्यं कामरताश्च ये।...मातृभगिनीदुहितृश्च कामयेद्यस्तु साधकः। स सिद्धिं विपुलां गच्छेत् महायानाग्र्यधर्मताम्। गुह्यस. 5th पटल p. 20; 'सर्वाङ्गकुत्सितायां वा न कुर्यादवमाननाम्। स्त्रियं सर्वकुलोत्पन्नां पूजयेद् वज्रधारिणीम्॥ चण्डालकुलसम्भूतां डोम्बिकां वा विशेषतः। जुगुप्सितकुलोत्पन्नां सेवयन् सिद्धिमाप्नुयात्। ज्ञानसिद्धि I. 80 and 82. Vide Dr. Guenther's exposition of this passage and of a similar one from Prajñopāya. V. 25 in 'Yuganaddha' pp. 106–109. Vide Dr. S. B. Das-Gupta in 'Introduction to tāntrik Buddhism' p. 114.

sion) and it further provides (V. 22-23) that 'by those who hanker after liberation perfection of wisdom must be sought (resorted to or adored) in all ways. This perfection of wisdom is everywhere present assuming the form of woman'. Prajñā was linked up with an intense state of emotion called Sukha or Mahāsukha (great bliss). "It being of the nature of endless bliss is designated mahāsukha; it is beneficent all round, most eminent and conduces to complete enlightenment' (Prajñopāya. I. 27) and 'this all Buddha knowledge which is by its nature to be experienced by one's inmost self is called Mahāsukha (great bliss) since it is the most eminent of all pleasures' (Jñānasiddhi VII. 3). The word Prajñā is feminine in gender and therefore some Vajrayāna writers identified Prajñā with woman; by erotic symbolism and far-fetched analogies the cult of woman was started.

Dr. H. V. Guenther has published a book styled 'Yuganaddha' propounding the Tāntrik view of life based only on Buddhist Tantras and endeavours to prove in that work (of about 190 pages) that the Buddhist Tāntrikas try to restore life in its entirety, which is neither an indulgence in passions nor a rejection and escape, but a complete reconciliation to the hard facts of life, that the sexual aspect of the Tantras is but the corrective against the one-sided intellectualism and rationalism of mere philosophy which is unable to cope with the problems of everyday life and that the symbol of Yuganaddha points to the unique harmony and interpenetration of masculinity and feminity, of blunt truth and symbolic truth, of intellect and humanity. It is not possible even to summarize this work or criticize it here. The core of the doctrine of the Vajrayāna tantras is found in the passages quoted in notes 1720-21, 1723-24. The argument is: according to these Tantras perception of wholeness is the most joyous of all human experiences and man's experience will not be full but only partial if he has no experience of feminity i. e. of everything female. He may experience feminity through all female members of his family. Therefore, it is not to be wondered at, says Dr. Guenther, that 'this experience so often has an incestuous character'. Then he offers (on pp. 106-112) a lengthy explanation of what he means which, the present author has to confess, is not quite clear to his moderate mental abilities. Dr. Guenther appears to be steeped in all the latest theories of modern psychologists like those of Freud and tries to expound that Buddhist authors of the 8th century A. D. like Anaṅgavajra and Indrabhūti had plumbed the depths of the

psychical life on the lines of modern psycho-analysis. Granting for a moment all that Dr. Guenther says about bi-sexuality, about sexual partnership being the best expression for the most intimate relation between two opposites, about woman being for the male a material object and a goddess, the present writer feels that one question appears to have been not satisfactorily answered or explained, viz. why did not the Buddhist Tāntrikas simply exhort the sādhaka to understand the emotions, view-points and value of woman as a mother, sister, wife, daughter or as a woman in general and why did they frequently and blatantly harp upon sexual intercourse of even an incestuous kind as a quick method of realizing the goal?

The Guhyasamāja-tantra puts forward a quick and short method for realising Buddhahood and for the attainment of miraculous powers (siddhis) through the processes of Yoga. The siddhis are said to be of two kinds, Sāmānya (ordinary,[1725] such as becoming invisible) and Uttama (highest i. e. attaining Buddhahood). Four means for securing ordinary *siddhis* are mentioned and they are called *Vajra-catuṣka*. It is further provided that the best *siddhi* is acquired by the nectar of knowledge due to the six aṅgas[1726] of Yoga (and by no other way) viz. Pratyāhāra, Dhyāna, Prāṇāyāma, Dhāraṇā, Anusmṛti and Samādhi. It is worthy of note that the first three aṅgas of yoga mentioned in the Yogasūtra viz. *yama, niyama*[1727] and *āsana* are omitted and a new one, Anusmṛti, is added. Yama could not be included because to the Guhyasamāja it did not matter if the sādhaka ate flesh, or indulged in sexual intercourse or told lies, while in Yogasūtra *yamas* are *ahiṁsā, satya* (truthfulness), *asteya* (not appropriating anything that does not belong to one), *brahmacarya* (sexual purity) and *aparigraha* (non-acceptance of gifts). Niyamas could not be included because among the five

1725. अन्तर्धानादयः सिद्धाः (? सिद्धयः) सामान्या इति कीर्तिताः। सिद्धिरुत्तम-मित्याहुर्बुद्धत्वा बुद्धत्वसाधनम्॥ चतुर्विधमुपायं तु बोधिवज्रेण वर्णितम्।...सेवाविधानं प्रथमं द्वितीयमुपसाधनम्। साधनं तु तृतीयं वै महासाधनं चतुर्थकम्॥ सामान्योत्तमभेदेन सेवा तु द्विविधा भवेत्। वज्रं चतुष्केण सामान्यमुत्तमं ज्ञानामृतेन च॥ गुह्यसमाज. 18th पटल p. 162.

1726. उत्तमे ज्ञानामृते चैव कार्यं योगषडङ्गतः। सेवा षडङ्गयोगेन कृत्वा साधनमुत्तमम्। साधयेदन्यथा नैव जायते सिद्धिरुत्तमा। प्रत्याहारस्तथा ध्यानं प्राणायामोऽथ धारणा। अनुस्मृतिः समाधिश्च षडङ्गो योग उच्यते। गुह्यसमाज pp. 163. All these six are defined on pp. 163–164. अनुस्मृति is defined as 'स्थिरं तु वज्रमार्गेण स्फारयीत स्वधातुषु। विभाव्य षडनुस्मृत्या तदाकारं तु संस्मरेत्। अनुस्मृतिरिति ज्ञेया मतिमासोऽत्र जायते॥' गुह्यस० p. 164

1727. For यम and नियम vide note 1525 above and the eight aṅgas of योग are: यम-नियम-आसन-प्राणायाम-प्रत्याहार-धारणा-ध्यान-समाधयोऽष्टावङ्गानि। योगसूत्र II. 29

niyamas are svādhyāya (Veda study) and (Īśvarapraṇidhāna) devotion to or surrender to God. Many Bauddhas reviled the Veda and acknowledged no Supreme Deity. The Guhyasamāja introduced Yogic practices for quickly securing Buddhahood. The idea of allowing flesh and sexual intercourse seems to have been that the Yogin is to be indifferent as to what he does so long as he is striving for the goal of Buddhahood, for development of his psychic life and that he may disregard all social conventions and rules.[1728] Another innovation of the Vajrayāna was the introduction of *upāsanā* of Śakti for liberation through Yoga. The Guhya-samāja provides that if even after making efforts for six months, the sādhaka has no realisation, he may repeat his efforts for three times more and if even after that he has no enlightenment he should resort to Haṭhayoga and then he would attain correct knowledge through Yoga. A further innovation was the theory of the five Dhyāni-buddhas,[1729] emanating from the Bhagavān, who represent the five Skandhas or fundamental principles of which the whole creation is composed and each of whom was associated with a female Śakti. The teaching of the Guhyasamāja is that if psychical power and miraculous siddhis are to be developed females must be associated with those who undertake Yogic exercises to achieve their ends. Thus the prophecy of the founder of Buddhism pronounced, when yielding to the pressure and entreaties of his favourite disciple Ānanda for allowing women to be members of the *saṅgha* and to be nuns, that on account of this innovation his system would stand fast only for five hundred years, though otherwise it would have lasted for a thousand years, was literally fulfilled (vide Cullavagga

1728. भक्ष्याभक्ष्यविनिर्मुक्तः पेयापेयविवर्जितः। गम्यागम्यविनिर्मुक्तो भवेद्योगी समाहितः॥ ज्ञानसिद्धि I. 18; गम्यागम्यादिसङ्कल्पं नात्र कुर्यात् कदाचन। मायोपमादियोगेन मोक्तव्यं सर्वमेव हि॥ वज्रोपाय० p. 23 v. 29.

1729. Vide Dr. Bhattacharya's Introduction to Guhyasamāja-tantra p. XIX and his Intro. to B. E. pp. 32–33, 70, 80–81, 121, 128–130 for the theory of Dhyāni-buddhas, their śaktis, kulas, the meaning of kula &c. On p. 32 of B. E. Dr. Bhattacharya observes 'we have already mentioned that Buddhism was a challenge to and repudiation of earlier Brāhmanism. It was now the part of Tāntrik Buddhism to challenge the authority of Buddha and repudiate the original Buddhism. All kinds of worldly enjoyments were forbidden (by Buddha), especially wine, women, fish, meat and exciting food. All these the Tāntrikas of the later age introduced into their religion and even went so far as to declare that without these emancipation was impossible'.

X. 1. 6 in Vinaya Texts, vol. III. S. B. E. XX. p. 325). If we accept 483 B. C. as the date of Buddha's Parinirvāṇa (as many scholars hold) or 477 B. C. (as A. Foucher holds) 500 years therefrom would bring us to the first century A. D. and it is clear that by a century or two after that time much of Buddha's teaching appears to have been almost completely swamped by doctrines of Mahāyāna and Vajrayāna Tantras. By a strange irony of fate Buddha's 'dharma-cakra-pravartana' came to be transformed into 'adharma-cakra-pravartana' by many of his so-called followers of the Vajrayāna. In the Mahā-parinibbāna-sutta V. 23 (S. B. E. vol. XI. p. 91) the Buddha was very strict and warned bhikkhus not to see bhikkhunis, not to talk to them if they could not avoid seeing them, and to be wide awake if a nun talked to them. Buddha severely rebuked one of his disciples for showing his miraculous powers (vide p. 1037 and n. 1672 above), but Guhyasamāja and other Buddhist tantras make provision for endowing the sādhaka with miraculous powers, such as causing rainfall in case of drought (Guhya-samāja p. 84), killing an enemy by magical rites over an effigy of the enemy (*ibid.* p. 96). Besides, the Guhyasamāja knows the six cruel or terrible magic acts (called 'ṣaṭkarmāṇi), viz. *Śānti* (rite for averting disease or black magic), *vaśīkaraṇa* (bewitching women and men and even gods), *stambhana* (stopping the movements or actions of others), *vidveṣaṇa* (creating enmity between two friends or two persons who love each other), *uccāṭana* (making a person or enemy flee from the country, town or village), *māraṇa* (killing or causing permanent injury to living beings). The Guhyasamāja mentions these six (putting 'ākarṣaṇa' for 'vidveṣaṇa') respectively at pp. 168, 165, 96, 87 (Ākarṣaṇa), 81, 130. Vide Sādhanamālā pp. 368–369 for the same and for the shape of maṇḍalas and times for each of the six cruel rites. Even the rather sober Śāradātilaka-tantra mentions these six (23. 122), defines them (23. 123–125), provides that Rati, Vāṇī (speech or Sarasvatī), Ramā, Jyeṣṭhā, Durgā and Kālī are respectively the six deities of these six cruel acts and must be worshipped at the commencement, that six periods of ten *ghaṭikās* from sunrise are respectively appropriate to these six and so also are certain seasons (23. 126–139). It is most astounding that the Prapañcasāra (23. 5) ascribed to the great advaita teacher Śaṅkarācārya describes at length a mantra called Trailokya-mohana for accomplishing the above six cruel acts.

Both Hindu and Buddhist Tantras[1730] lay great emphasis on the importance and qualifications of the *guru*. The Bauddha Tantras have the highest praise for the guru. The Jñānasiddhi (13. 9–12) prescribes high qualifications and the Prajñopāyaviniścaya-siddhi (III. 9–16) contains a grand eulogy of the guru, identifying him with Buddha and calling him omniscient and so on. The Advayasiddhi of Lakṣmīṅkarā (about 729 A. D.), who started the astounding doctrine that one should offer worship to one's own body wherein all gods reside, says that in the three worlds there is none higher than the ācārya. In the Nityotsava of Umānanda-nātha, pupil of Bhāsurānanda-nātha (i. e. Bhāskararāya as he was called before he took dīkṣā) the guru Bhāskararāya is praised in the following hyperbolical terms[1731] 'to whom no part of the earth was unseen (owing to his yogic sight), there was no king who was not his slave, to whom no śāstra was unknown; why use more words, whose form was the highest Śakti herself.' But the Jñāna-siddhi and Kulārṇava (XIII. 128) warn against gurus who falsely pretend to know the truth and give instruction in dharma from greed for money. The Kulārṇava (*ullāsas* XII and XIII) are devoted to the qualifications and greatness of guru. The Śāradātilaka also sets out the qualifications of the tāntrika guru (II. 142–144) and of the disciple (III. 145–152).[1732] The guru among other matters 'must know the essence of all Āgamas and the principles and meaning of all śāstras, he must be one whose words come out true, who has a quiet mind, who has profoundly studied the Veda and its meaning, who follows the path of Yoga and whose bearing is as beneficent as that of a deity.' Among the many requirements about a disciple,[1733] one is that he must keep secret the mantra and pūjā imparted by his guru. The disciple places the guru's feet on his head and surrenders his body, wealth and even life to

1730. आचार्यात्परतरं नास्ति त्रैलोक्ये सचराचरे। यस्य प्रसादात्माप्यन्ते सिद्धयोऽनेकधा बुधैः। Intro. to साधनमाला vol. II. p. LXIV–LXV.

1731. यस्याहङ्को नैव भूमण्डलांशो यस्यादासो विद्यते न क्षितीशः। यस्याज्ञावं नैव शास्त्रं किमन्यैः यस्याकारः सा परा शक्तिरेव ॥ Introductory verse 4 of the नित्योत्सव. Dr. B. Bhattacharya in his Intro. to the गुह्यसमाज॰ p. XIII has completely misunderstood this verse when he translates it as 'the Parā Śakti is she to whom no part of the wide universe remains unseen &c.'.

1732. सर्वागमानां सारज्ञः सर्वशास्त्रार्थतत्त्ववित्।...अमोघवचनः शान्तो वेदवेदार्थपारगः॥ योगमार्गानुसन्धायी देवताहृद्यचङ्गमः। शारदा॰ II. 142–144.

1733. मन्त्रपूजादिरहस्यानि यो वोपचरति सर्वदा। शारदा॰ II. 151.

the guru. The necessity of a guru for the acquisition of esoteric philosophy is stressed by the Upaniṣads also. For, example the Kaṭhopaniṣad[1734] says 'this knowledge cannot be obtained by ratiocination, it can be understood well only when expounded by another'; the Chāndogya (IV. 9. 3) says 'Sir, I have heard from men like you that only knowledge that is learnt from a teacher leads to real good'. The Liṅgapurāṇa[1735] and others say that guru is identical with Śiva and the rewards of devotion to Śiva and to the guru are the same. The Kulārṇava (XI. 46) emphasizes that the order of the succession of gurus, the Āgamas, Āmnāya, mantra and practices—all these when learnt from the lips of a guru become fruitful and not otherwise. The Prapañcasāra provides 'the disciple should consider in his mind that guru, *devatā* and mantra are one and should repeat a hundred times the mantra that he received by the favour of the guru.'

The Vedānta system requires for its understanding high intellectual and moral attainments and could be followed by only a few gifted souls. It is claimed that Tantras provide a method which assists men of ordinary intellect and which utilizes visual and physical processes for the attainment of spiritual experience, for the development of psychic forces and for the quick attainment of liberation by such practices as the repetition of mantras, mudrās, nyāsa, maṇḍalas, cakras and yantras. The respect for the guru sometimes reached amongst Tāntrik writers to extreme and disgusting lengths as the note below will indicate.[1736]

1734. नैषा तर्केण मतिरापनेया प्रोक्तान्येनैव सुज्ञानाय प्रेष्ठ। कठ II. 9.

1735. यो गुरुः स शिवः प्रोक्तो यः शिवः स गुरुः स्मृतः। यथा शिवस्तथा विद्या यथा विद्या तथा गुरुः॥ शिव-विद्यागुरोस्तस्माद् भक्त्या च सदृशं फलम्। सर्वदेवमयो देवि सर्वशक्तिमयो हि सः॥ लिङ्गपुराण I. 85. 164-165; गुरुर्ब्रह्मा गुरुर्विष्णुर्गुरुर्देवो महेश्वरः। गुरुरेव परं ब्रह्म तस्मै श्रीगुरवे नमः॥ देवीभागवत XI. 1. 49; in the ललितोपाख्यान in the ब्रह्माण्डपु. it is said 'मनुष्यचर्मणा बद्धः साक्षात्परशिवः स्वयम्। सच्छिष्यानुग्रहार्थाय गूढं पर्यटति क्षितौ॥ अत्रिनेत्रः शिवः साक्षाद्दत्तुर्बाहुरच्युतः। अथर्ववदनो ब्रह्मा श्रीगुरुः कथितः प्रिये॥' 43. 68-70. These verses from ललितोपाख्यान are the same as कुलार्णव XIII. 54 and 57 and several verses are common to both. The question as to who is the borrower is very difficult to decide. The शारदातिलक (V. 113-114) has 'गुरुविद्यादेवतानामैक्यं सम्भावयन् धिया। प्रणमेद् दण्डवद्भूमौ तदेकं तं देवतात्मकम्॥ तस्य पादाम्बुजद्वन्द्वं निजे मूर्धनि योजयेत्। शरीरमर्थं प्राणं च सर्वं तस्मै निवेदयेत्॥; गुरुणा समनुगृहीतं मन्त्रं सद्यो जपेच्छतावृत्या। गुरुदेवतामन्त्राणामैक्यं सम्भावयन् धिया शिष्यः॥ प्रपञ्चसार VI. 122.

1736. भगिनीं वा सुतां भार्यां यो वदाकुलयोगिने। मद्यमांसाय देवेशि तस्य पुण्यं न गण्यते॥ q. by तारारहस्यवार्णव IV. p. 116.

The teaching of Tāntrika texts about the five *makāras* must have created a very unhealthy and debased state among all classes, particularly the lower orders of Society. The centuries from the 7th to the 12th A. D. were the peak period of Tāntrik works and cults, both Hindu and Buddhist. In a certain cult of the Vajrayāna the gurus wore a blue vesture. A story is narrated of a guru (a monk) of the *sammitiya* sect who went dressed in a blue dress to a courtezan. He did not return to the monastery at night. When asked in the morning by his disciples why he put on a blue dress, he explained the great spiritual merit of the blue-coloured dress. Since then his followers began to wear blue dress and in their book called 'Nīlapaṭadarśana' it is written 'the god Kāmadeva (Eros) is a jewel, a courtezan is a jewel, wine is a jewel; I bow to these three jewels; other so-called jewels are three glass beads'. It should be remembered that for devout Buddhists, Buddha, Dharma and Saṅgha are three Ratnas (jewels). The followers of the Nīlapaṭadarśana deemed these last three to be as worthless as glass beads. Vide Bhikṣu Rāhula Sāṅkṛtyāyana's paper 'On Vajrayāna or Mantrayāna' in J. A. vol. 225 (1934) p. 216 where this is narrated. False gurus must have gone about deluding people with rosy prospects of bliss and liberation by the easy method of drinking wine, eating flesh and free association with all sorts of women. The Indian literature of those centuries is full of condemnation and caricatures of the methods of Tāntrik worship by means of wine, flesh and sexual laxity. A few instances may be cited here. In the *prākrit* play called Karpūramañjarī of Rājaśekhara (about 900 A. D.), a character called Bhairavānanda [1737] who was

---

1737. The original verses I. 22–24 are in Prākrit. Their Sanskrit equivalents are set out here. मन्त्राणां तन्त्राणां न किमपि जाने ध्यानं च नो किमपि गुरुप्रसादात्। मद्यं पिबामो महिलां रमामो मोक्षं च यामो कुलमार्गलग्नाः॥ एण्डा चण्डा दीक्षिता धर्मदारा मद्यं मांसं पीयते खाद्यते च। भिक्षा भोज्यं चर्मखण्डं च शय्या कौलो धर्मो कस्य नाभाति रम्यः॥ मुक्तिं भणन्ति हरिब्रह्मसुखा अपि देवा ध्यानेन वेदपठनेन क्रतुक्रियाभिः। एकेन केवलसुमादयितेन लब्धो मोक्षः सखे सुरतकेलिसुरारसेः॥. It is quite possible that the name भैरवानन्द is doubly suggestive. The पारानन्दसूत्र mentions several Tāntrik teachers whose names end in आनन्द such as अमृतानन्द (pp. 54, 73), उन्मादानन्द (pp. 54, 72, 76), ज्ञानानन्द (pp. 54, 73, 91), देवानन्द (p. 44), परानन्द (pp. 72, 91 the author of पारानन्दसूत्र), मुक्तानन्द (p. 54), सुरानन्द (pp. 54, 70, 72). Besides, several teachers have the word भैरव as part of their names and are profusely quoted in the पारानन्दसूत्र, viz. आकाशभैरव (9 times), उन्मत्तभैरव (17 times), कालभैरव (11 times); भैरव as an author is mentioned once on p. 66. राजशेखर probably meant a hit at one or more of these

(*Continued on next page*)

supposed to possess wonderful powers is introduced and he says (while representing that he was somewhat tipsy) 'owing to the favour of our guru we know nothing about mantras or tantras or meditation. We drink wine, dally with women and yet, being devoted to the Kula path, we reach *mokṣa*. A fierce strumpet is given dīkṣā and made a lawful wife, wine is drunk and flesh is consumed, our food is got by begging for alms, our bed is a piece of hide. To whom would the Kauladharma not appear attractive? Even gods headed by Viṣṇu and Brahmā declare that liberation is attained by meditation, Veda study and performance of Vedic sacrifices; only one God, the husband of Umā, perceived that mokṣa (can be attained) by dalliance with women and by wine'. The Yaśastilaka-campū (composed in 959 A. D.) after referring to the Dakṣiṇa and Vāma paths of Śaivāgama quotes a verse of the great poet [1738] Bhāsa "a person should drink wine, look at the face of the woman dear to him, wear a dress naturally charming and free from being odd; may the adorable Śiva be long-lived, who (first) discovered such a path to mokṣa!" The Daśāvatāra-carita of Kṣemendra (3rd quarter of 11th century A. D.) states in one verse what the Tāntrik gurus and their followers did "Gurus declare that liberation follows by the drinking of wine from the same goblet by various craftsmen such as washermen, weavers, workers in hides, *kāpālikas*, in the procedure of cakrapūjā, and by dalliance with women without the least scruple and by always leading a life of festivities." [1739] The Rāja-taraṅgiṇī (middle of 12th

(*Continued from last page*)

tāntrik authors who favoured the makāras. Acc. to Intro. (p. XII) to परानन्दसूत्र, the work was composed probably between 900 to 1200 A. D. The परशुराम-कल्पसूत्र (I. 40) provides that after दीक्षा the guru is to give a name to the disciple ending in आनन्दनाथ. The महानिर्वाण (X. 182) also says the same thing.

1738. इममेव च मार्गमाश्रित्याभाषि भासेन महाकविना। पेया सुरा प्रियतमामुख-मीक्षणीयं प्राह्यः स्वभावललितोऽविकृतश्च वेषः। चेनेदृमीदृशमदृश्यत मोक्षवर्त्म दीर्घायुरस्तु भगवान् स पिनाकपाणिः॥ यशस्तिलकचम्पू p. 251. This is verse 7 in the मत्तविलास-प्रहसन of पल्लव king महेन्द्रविक्रमवर्मन् put in the mouth of a कपाली. This creates a puzzle. Either the Yaśastilaka committed a mistake in naming the author or the verse is one from Bhāsa's genuine dramas not yet found and bodily taken by the author of the मत्तविलास which, being a parody, was after all not a serious matter. I incline to the latter view.

1739. चक्रस्थितौ रजक-वायक-चर्मकार-कापालिकमद्यशिल्पिभिरेकपात्रे। पानेन मुक्तिमविकल्परतोत्सवेन वृत्तेन चोत्सवता गुरवो वदन्ति॥ p. 162 of दशावतारचरित. चक्रपूजा will be referred to a little later.

century A. D.) has several references to the Tāntrikas and their doings. In V. 66 Kalhaṇa says that during [1740] the reign of Avantivarman of Kashmir, *siddhas* (persons possessed of miraculous powers like *aṇimā*) such as Bhaṭṭa Kallaṭa were born for the benefit of the world. In describing the effects of the rule of a good king Yaśaskara (939–948 A. D.), Kalhaṇa [1741] remarks that during his reign were not seen housewives figuring as divinities at the rite of gurudīkṣā and shaking their heads for detracting from the eminent character (attributed to) of their husbands.' King Kalaśa of Kashmir (1063–1089 A. D.) became a pupil of Pramadakaṇṭha, son of Amarakaṇṭha who was a good brāhmaṇa, but Kalaśa, who by nature was evil-minded, was instructed in evil practices by his guru Pramadakaṇṭha and the latter made the former ignore the distinction between women who are approachable and who are not. In this connection, Kalhaṇa bitterly [1742] bewails "what other unscrupulousness of this guru (of Kalaśa) should be described by me, when, leaving aside all scruples, he committed incestuous intercourse with his own daughter." This establishes that in the 11th century A. D.

1740. अनुग्रहाय लोकानां भट्टश्रीकल्लटादयः। अवन्तिवर्मणः काले सिद्धा भुवमवातरन्॥ राजत. V. 66. अवन्तिवर्मन् reigned from 855 A. D. to 883 A. D. Kallata's is a great name in Kashmir Śaivism. It may be noted that the Vajrayāna cult of Buddhism speaks of 84 सिद्धपुरुषs that flourished from the 7th to the 9th century A. D, Vide Intro. to E. B. p. 34 and Bhikṣu Rāhula Sāṅkṛtyāyana's paper on 'the origin of Vajrayāna and the 84 siddhas' in J. A. vol. 225 (1934) pp 209–230 in which at pp. 220–225 there is a detailed list of the 84 *siddhas* from Lūipā to Bhalipā with their castes and status, place of origin and names of the contemporaries of some of them from the 8th century A. D. onwards. मत्स्येन्द्रनाथ is said to be the same as Lūipā; vide I. H. Q. vol. XXXI pp. 362–375 for Dr. Karambelkar's paper on 'Matsyendranāṭha and his Yoginī cult.'

1741. नाद्दश्यन्त च गेहिन्यो गुरुदीक्षोत्थदेवताः। कुर्वाणा भर्तृशीलश्रीनिषेधं मूर्धधूननैः॥ राजत. VI. 12. This shows that, there being equality of sexes among Tāntrikas, women used to be made gurus in Tāntrik rites. Vide प्राणतोषिणी p. 179 for qualifications of a woman *guru* and p. 540 for worship of the wife of a guru and of a woman as a guru in her own right. The guru and his predecessors are to be worshipped by disciples as sacrificers. When the latter praised the husbands of the women that had become gurus, they shook their heads in disagreement and thereby impliedly criticized the character of their husbands. Kalhaṇa says that this did not happen in the reign of Yaśaskara, who must have frowned upon the practices of tāntricism and hence occasions for women being gurus did not arise.

1742. गुरोर्गतविकल्पत्वं तस्याग्यत्किमिवोच्यताम्। त्यक्तशङ्कः प्रवृत्ते स्वसुताभुरतेपि यः॥ राजत. VII. 278.

in Kashmir there were Tāntrik gurus that literally carried out what the Guhyasamājatantra quoted in note 1724 apparently recommended to Buddhist Yogis. In the drama called Mohaparājaya by Yaśaḥpāla under king Ajayadeva, successor of Kumārapāla, among the *dramatis personae* is a *kaula* who declares his doctrine to be eating flesh every day, drinking wine without any qualms and allowing the mind free scope.[1743] Aparārka quotes a verse which shows that, in the midst of numerous cults, it was difficult to be consistent: "A person may be at heart a Kaula (follower of the Kula doctrine), in outward appearance he may look a Śaiva, and he may follow Vaidika rites in his usual practices. One should live grasping what is essential like the cocoanut[1744] fruit". It appears that great scholars and poets had a sneaking admiration for Tāntrika worship. The great writer Vidyāpati of Mithilā appears to be a Vaiṣṇava from his devotional songs, but wrote the Śaivasarvasvasāra (so he may be called a Śaiva), and wrote also Durgābhaktitaraṅgiṇī (and thus appears to have been a Śākta) and composed also a Tāntrik[1745] work. The very first verse of Vidyāpati's 'Puruṣaparīkṣā' contains an invocation of Ādi-Śakti.' Bengal and Assam were the strongholds of Śākta doctrines and even now Kāli worship is still in vogue there, but it was the great Bengal

---

1743. In मोहराजपराजय (G. O. S.) p. 100 the कौल says 'खाद्यते मांसमनुदिनं पीयते मद्यं च सुकृतदुष्कृतम्। अनिवारितमनःप्रसर एव धर्मो मया दिष्टः॥ (Sanskrit rendering of a Prākrit verse). The drama was written between 1172–1175 A. D.

1744. अन्तःकौलं बहिःशैवं लोकाचारे तु वैदिकम्। सारमादाय तिष्ठेत्तु नारिकेलफलं यथा॥ अपरार्क p. 10. I prefer the reading of one the mss. noted in the foot notes. The printed text reads अन्तःशैवं बहिःकौलं लोकाचारे etc. The cocoanut fruit presents three aspects, first there is the hard outside shell, then there is the soft and tasty kernel inside the hard shell and thirdly there is water in addition to the soft kernel. The कुलार्णवतन्त्र has 'अन्तःकौलो बहिःशैवो जनमध्ये तु वैष्णवः। कौलं सुगोपयेद्देवि नारिकेलफलाम्बुवत्॥ XI. 83. One ms. reads अन्तःकौला बहिःशैवाः सभायां वैष्णवा मताः and this last is often quoted. The कौलावलीनिर्णय (X. 84–95) reads अन्तःशाक्ता बहिःशैवाः...मताः। नानावेशधराः कौला विचरन्ति महीतले॥. The sect mark of both Śaivas and Śāktas is *tripuṇḍra* (three parallel lines of holy ashes on the forehead from one eye to the other, drawn with three fingers other than the thumb and small finger). Vide बृहज्जाबालोपनिषद् IV. 10–11, देवीभागवत XI. 15. 17–23.

1745. Vide a paper of D. C. Bhattacharya in J. G. J. R. I. vol. VI pp. 241–247 on Vidyāpati's work on Tantra. The first verse of पुरुषपरीक्षा (Darbhanga ed. of 1888) is 'ब्रह्मापि यां नौति नुतः सरण्यां (सुरण्यां ?) यामश्चितोऽर्धचन्द्रेन्दुमौलिः। यां ध्यायति ध्यानगतोपि विष्णुस्तामादिशक्तिं शिरसा नमामि॥'

king Ballālasena who discarded Devīpurāṇa as an authority in his encyclopaedic work on gifts called Dānasāgara.[1746]

It is possible that the founders of the Tāntrik or Śākta cult of the five *makāras* threw defiance at the terrible aspect of God or the Highest Spirit, that rules the destinies of men and things and that made men sometimes suffer terribly even if they led lives of virtue, to do the worst for their disregard of conventional morality and social practices and hoped by their Yoga exercises to attain to high psychical powers and bliss.[1747] There is another possible motive also. Masses of common people were being drawn towards Buddhism. The founders of Hindu Tāntrik cults wanted to retain them within the Hindu fold. As common people drank wine and ate meat, they were told that they would attain higher spiritual levels even while indulging in meat and drink provided they followed Tāntrik gurus and practices. The idea was that Śakti was all and was for all; *bhoga* (enjoyment) need not be given up, as man is part of Devī or Śiva. Bhoga should be sublimated, that is all that is required in Kaulaśāstra. The Tāntrikas[1748] substitute a yoga of enjoyment (bhoga) for the yoga of abstinence and asceticism. When indulging in the left-hand path practices the sādhaka is supposed or held to be destroying the egoistic elements of the soul.

The Mahānirvāṇatantra and a few others endeavour to stem the tide of sexual immorality and promiscuity. For example, Rāmeśvara, the commentator of Paraśurāmakalpasūtra, says that one that has not conquered his senses has no *adhikāra* for Kaulamārga (p. 153). This is in direct conflict with what even the Mahānirvāṇatantra says that all men from brāhmaṇas to the untouchables have adhikāra for Kula practices. Modern apologists for Tāntrism emphasize that the instructions embodied in the Guhyasamāja, the directions for the mode of life to be led by followers of Vajrayāna, apply only to the Yogis who have attained some degree of yogic perfection. But the obvious

1746. नानावेशधराः कौलाः कुलाचारेषु निश्चलाः। सेवन्ते त्वां कुलाचारैर्नहि तान् बाधते कलिः ॥ महानिर्वाणतन्त्र IV. 63.

1747. Vide Dr. B. Bhattacharya's Intro. to Guhyasamāja p. XXII for the above sentiments.

1748. यत्रास्ति भोगो न च तत्र मोक्षो यत्रास्ति मोक्षो न च तत्र भोगः। श्रीसुन्दरीसेवनतत्पराणां भोगश्च मोक्षश्च करस्थ एव ॥ quoted in हंसविलास (from कौलरहस्य) p. 104; विप्राद्यन्त्यजपर्यन्ता द्विपदा येऽत्र भूतले। ते सर्वेऽस्मिन्कुलाचारे भवेयुरधिकारिणः ॥ महानिर्वाण 14. 184.

reply is 'who is to decide that a particular person had attained the minimum spiritual level except the man himself and, supposing that all the directions were meant for Yogis, why was it necessary to say in a blatant manner and language that a Yogi practising Vajrayāna may engage in what common and less sophisticated people deem to be incest? This is not the place to reply to all apologists for ancient and medieval Tāntrik works. But a few must be dealt with because they are liable to create misunderstandings, if allowed to go uncriticized. In his Preface to 'Principles of Tantra' Part 2, Sir John Woodroffe states (p. IX.) that the use of flesh, fish and wine was common in the Vedic age and that the Mahābhārata and some Purāṇas like the Kālikā, Mārkaṇḍeya and Kūrma refer to consumption of wine, meat and fish. This looks like special pleading and is misleading. The question is: was *surā* offered to the gods in every day or periodic sacrifices as an offering in the Ṛgveda or any other Veda. In the Vedic age wine may have been known and even drunk, but what is material to recognize is that there is a difference made between Soma and *surā*. Vide Śat. [1749] Br. "Soma is truth, prosperity, light and surā is untruth, misery and darkness" (V. 1. 5. 28). While Soma is mentioned hundreds of times in the Ṛgveda, has the 9th maṇḍala of the Ṛgveda specially reserved for its praises and was offered to gods, the word *surā* occurs only six times in the Ṛgveda and it is nowhere expressly stated that it was offered to any god as a religious offering; on the contrary, in a hymn to Varuṇa, surā is put forward as leading to the commission of sin just as anger and gambling do (Ṛg. VII. 86. 6 'na sa svo. dakṣo Varuṇa dhrutiḥ sā surā manyur-vibhīdako acittiḥ). In his zeal for the vindication of Tāntrism Arthur Avalon is injudicious enough to misinterpret simple words. In the Intro. to 'Principles of Tantra' p. VII he quotes Ṛg. I. 166. 7 "arcantyarkam madirasya pitaye" and translates "worshipping the Sun before drinking madirā (wine)." The word here is *madira* (and not 'madirā'), it is an adjective and means "exhilarating". The word "Madirā" never occurs in the Ṛg. while "madira" as an adjective, occurs at least sixteen times and qualifies Soma, Indu, Aṁsu, Rasa or Madhu, generally expressed (and rarely implied). There is no word for "before." That quarter means 'they (the worshippers or Maruts) worship (Indra) who is worthy of praise (and a friend of the Maruts) in order that he may come for

1749. सत्यं वै ज्योतिः सोमोऽमृतं पाप्मा तमः सुरा। शतपथ V. 1. 5. 28.

drinking the exhilarating (Soma).' The word madirā (for wine) hardly ever occurs in any genuine work of Vedic times. Its earliest occurrence is probably in the Mahābhārata. Reference is also made by modern apologists to the offering of surā in the Sautrāmaṇī *iṣṭi* in honour of Indra. But the circumstances are peculiar. Sautrāmaṇī is only one out of numerous sacrifices and the occasions for performing it were rare i. e. it was performed at the end of Rājasūya and also at the end of *Agnicayana* and when a priest who had drunk too much of soma vomited. The most important fact, however, is that the remnants of surā offered in Sautrāmaṇī were not drunk by the priests engaged in it but a brāhmaṇa had to be hired for drinking the remnants and if no brāhmaṇa could be secured then the remnants were to be poured over an ant-hill (vide H. of Dh. vol. II. p. 1226 for details). The Kāṭhakasaṁhitā [1750] contains an interesting passage "Therefore an elderly person and a youngster, the daughter-in-law and the father-in-law, drink liquor and remain babbling together; thoughtlessness is sin; therefore a brāhmaṇa does not drink surā with the thought that 'otherwise (if I drink it) I may be tainted by sin'; therefore this is for kṣatriya; one should say to a brāhmaṇa that surā, if drunk by a kṣatriya, does not harm the latter." These passages show that not only the priests did not drink surā even in Sautrāmaṇī but that it had become difficult to hire a brāhmaṇa for drinking it by the time of the Kāṭhaka-saṁhitā. The passage of the Vājasaneya Saṁhitā 19. 5 relied on at p. VII (of Intro. to 'Principles of Tantra' part II) also refers to Sautrāmaṇī and to no other sacrifice. The mantra is "Brahma kṣatram pavate teja indriyam surayā somaḥ suta āsuto madāya" and means that "Soma when mixed with surā becomes a strong drink and leads to intoxication." The Chāndogya V. 10. 9 (q. above p. 1578 n. 943) counts the drinker of surā among the five grave sinners. Therefore, there is hardly any analogy between the offering of wine in Sautrāmaṇī and the teaching about offering wine to Devī as provided in the Tantras. Similarly, the reference to the Atharvaveda as containing magical rites does not help at all. Society had advanced far beyond that stage and Manu XI. 63 looked upon abhicāra (i. e. performance of a magic rite like Śyenayāga for killing a person) and mūlakarma (i. e. bringing

1750. तस्माज्ज्यायांश्च कनीयांश्च स्नुषा श्वशुरश्च सुरां पीत्वा सह लालपत आसते। पाप्मा वै माहल्यं तस्माद् ब्राह्मणः सुरां न पिबति पाप्मना नेत्संसृज्या इति तदेतत् क्षत्रियाय ब्राह्मणं नृपाचैनं सुरा पीता हिनस्ति। काठकसंहिता XII. 12.

under one's control a person or a woman by herbs and mantras) as a sin, though a lesser one (an upapātaka). The reference to the Mahābhārata (Udyogaparva, 59. 5 ff) is again misleading. Wine was drunk by people in the Mahābhārata times, but not as part of a religious ritual as in the Tantras. Vide pp. 964–966 of H. of Dh. vol. III for a note on 'intoxicating drinks.' The reference to Mārkaṇḍeya and other purāṇas is of no avail as evidence, since at least the present author holds that those parts of the Purāṇas were written and interpolated after Tāntrik rites had taken a firm hold on some sections of the Hindu society. The reference to sexual intercourse in the Mahāvrata [1751] is most misleading. In the Tantras like the Kulārṇava and the Guhyasamāja it is the sādhaka himself who is to practise *maithuna* as one of the ways of securing marvellous powers and higher spiritual attainments. But in the Mahāvrata the sexual intercourse is by strangers to the sacrifice (and not by the *yajamāna* nor by any of the priests), is a purely symbolical act and bears no analogy to a sādhaka himself engaging in maithuna as a religious rite to placate the Devī. Even a late reformist work like the Mahānirvāṇa (VIII. 174–175) expressly says that those of the five tattvas which a sādhaka can secure, such as flesh and others, should have recited over them the mantra 'ām, hrīm, krom, svāhā' a hundred times, that he should reflect that everything is a product of *brahma*, should close his eyes, should offer those to Kālī and should himself drink and eat them. As the Tāntrik prescriptions of the *makāras* for attainment of miraculous powers and of liberation had shocked people and had brought the tantras into great disrepute, later Hindu Tāntrik works like the Śaktisaṅgamatantra (between 1555–1607 A. D.) began to offer symbolic interpretations. They [1752] say that the

Vide 'Śakti and Śākta' pp. 339–340 where madya, māṁsa, matsya and maithuna are interpreted esoterically for a 'divyabhāva' following Yoginītantra (chap. VI) and from Āgamasāra. One verse from the former may be quoted

(*Continued on next page*)

words 'madya, mudrā, maithuna' &c. are not used in the ordinary popular sense but in a special esoteric sense. For example, mudrā has several senses, viz. a mixture of jaggery and ginger, or of salt and oil-cake or garlic and tamarind fruit, or wheat and māṣa beans, that madya (wine) is not what is prepared from mādhavī (spring flower) but it springs from the joyful experience (or *rasa*) of Śakti, when effort is made to awaken the Kuṇḍalinī. It may be admitted that some Tāntrik works and writers divide men into three classes, paśu (the bestial ones), vīra (those that have made great progress on the path of spiritual discipline) and daiva (those who are godlike). As regards these three, the five makāras are assigned by some apologistic writers different meanings. D. N. Bose in his work 'Tantras, their philosophy and occult secrets' boldly asserts (p. 110) that the real significance of the five makāras has been deliberately perverted by vicious people and explains (p. 111) that *madya* is the nectarine stream issuing from the cavity of the brain where the soul resides, matsya means suppression of vital airs, māṁsa means 'vow of silence,' 'maithuna' means 'meditation on the acts of creation and destruction.'

The Tāntrikas clothe their practices in bombastic and high-sounding words. The five makāras are called pañca-tattvas, kuladravyas or kulatattvas. Maithuna is generally referred to as pañcamatattva, the woman with whom sexual intercourse is to be had or who was at least to be associated with a male in Tantra worship is called Śakti (vide Kulārṇava VII 39–43 and Mahānirvāṇa VI. 18–20) or *prakṛti* or *latā* and this special ritual is called 'Latāsādhana' (Mahānirvāṇa I. 52). Wine is called tīrthavāri (holy water) or kāraṇa (VIII. 168 and VI. 17). The Mahānirvāṇa-tantra, though a reformist work and in certain cases asking the king to punish drunkards (XI. 113–121),

---

(*Continued from last page*)

'सहस्रारोपरि बिन्दौ कुण्डल्या मेलनं शिवे। मैथुनं परमं द्रव्यं यतीनां परिकीर्तितम्॥. Substitutional तत्त्व are also variously mentioned for पशु, who is the lowest kind of the worshippers of Śakti. The कौलावलीनिर्णय V. 113–123 suggests various substitutes viz. a ब्राह्मण may employ honey in a copper vessel or cow's milk or the water of cocoanut fruit in a bell-metal vessel, that, in the absence of flesh, garlic and ginger may be used for flesh, milk of buffalo or sheep for fish, roasted fruits and roots for *maithuna*. It will be, however, noticed in the above and also later on that the explanations do not all completely agree and therefore raise doubts about their veracity.

waxes eloquent over wine and praises it as Tārā in the form [1753] of a fluid substance, as the saviour of individual souls, as the mother (or producer) of bhoga (enjoyment) and mokṣa (liberation) and as the remover of misfortunes and diseases and after some further praise of wine winds up by saying that those men who drink wine according to the rules and with a well-controlled mind are gods on earth (XI. 108). For the worship of Śakti the five tattvas are absolutely necessary (Mahānirvāṇa-tantra V. 21–24 quoted in note 1695 above and [1754] Kulārṇava V. 69 and 76). Some tantras say that the meaning of tattva differs according as the person concerned is Tāmasika (a *paśu* kind of worshipper), Rājasika (a vīra as he is called), sāttvika (a divya, a person who is godlike). Madya means according to various Tāntrik Texts real wine as well as a substitute like cocoanut water or any other liquid; it also means that intoxicating knowledge that comes of Yoga practices, whereby the worshipper becomes senseless as regards the external world. *Māṁsa* is the act whereby the sādhaka surrenders himself and his action to Lord Śiva. *Matsya* (fish, of which the first part 'mat' means 'mine') is that psychical state by which the worshipper sympathizes with the pleasure and pain of all beings. *Maithuna* is the union of the Śakti Kuṇḍalinī (the woman inside a man's body) in the Mūlādhāra-cakra with the supreme Śiva in the Sahasrāracakra in the highest centre of the brain and is the stream of the sweet juice that drops from the Sahasrāra. Preparation of hemp (called *vijayā* or '*bhāng*') is madya for some. The Mahānirvāṇa says (VIII. 170 and 173) that 'madhura-traya' may be substituted for wine and for 'Maithuna' meditation on the feet of the (image of) Devī and *japa* of the desired mantra may be substituted. The Kaulāvalīnirṇaya (III. 111) boldly states that if a man, after partaking of vijayā (*bhāng*) engages in meditation, he sees directly before him the form of the goddess as described in the Dhyānamantra. Some Tantras like the

1753. सुरा द्रवमयी तारा जीवनिस्तारकारिणी। जननी भोगमोक्षाणां नाडिनी विषहां वजाम्॥ महानिर्वाण० XI. 105.

1754. कुलद्रव्यैर्विना कुर्याज्जपयज्ञतपोव्रतम्। निष्फलं तद्भवेद् देवि भस्मनीव यथा हुतम्॥; मन्त्रपूतं कुलद्रव्यं गुरुदेवार्पितं प्रिये। ये पिबन्ति जनास्तेषां स्तन्यपानं न विद्यते॥ कुलार्णव V. 69 and 76. The words स्तन्य ... विद्यते mean that he is not born again. The कुलार्णव (V. 79–80) ordains 'सुरा शक्तिः शिवो मांसं तद्भोक्ता भैरवः स्वयम्। तयोरैक्यसमुत्पन्न आनन्दो मोक्ष उच्यते॥ आनन्दं ब्रह्मणो रूपं तच्च देहे व्यवस्थितम्। तत्पानिभ्यञ्जनं मद्यं योगिभिस्तेन पीयते॥'.

Kaulajñānanirṇaya and Bhāskararāya [1755] in his commentary on Lalitāsahasranāma say that when Kuṇḍalinī is roused by a yogin and it reaches the thousand-petalled cakra (Sahasrāra) from which (that has on its pericarp the moon) drops nectar which is figuratively spoken of as *madya* (vide notes 1716, 1752). The Kulārṇava at first asserts (I. 105–107) 'Mukti does not result from the study of the Veda nor by the study of śāstras, it results from (correct) knowledge alone, that the āśramas are not a means of mokṣa nor are the darśanas the means, nor all the śāstras, that it is knowledge alone that is the cause, that it is the knowledge imparted by the teaching of the guru that confers *mukti*, all (other) vidyās are mockery.' Then in the Vedāntic strain it affirms (I. 111–112) "two words (respectively) lead to bondage or liberation viz. (this is) '*mine*' or 'nothing is *mine*'. A person falls in bondage by the thought 'this is mine' and becomes liberated by realising 'nothing is mine' and that that is proper action that does not lead to bondage and that is real lore that leads to liberation." After these high thoughts the same Tantra (II. 22–23 and 29) proceeds to Kaula doctrine. 'If a man is a yogin he does not (ordinarily) enjoy life, while one who enjoys life does not know yoga; but the Kaula doctrine combines both *yoga* and *bhoga* and is superior to all (other doctrines); in the Kaula doctrine bhoga turns into yoga directly, what is sin (acc. to ordinary people) becomes meritorious, *saṁsāra* turns into mokṣa. Kaula knowledge enlightens him whose mind is purified by the mantras of Śaiva worship, Durgā worship &c."

The Kulārṇava appears to be in two minds to ordinary men like the present writer. While in one breath as shown in note 1718 it frankly recommends the drinking of wine and eating of flesh to the followers of Kaula doctrine, it also endeavours to give an esoteric meaning to the *makāras* as follows (V. 107–112): Frequently reaching the *brahmarandhra* from the mūlādhāra, there arises the bliss of the union of the Kuṇḍalinī-Śakti with the moon in the form of Intelligence (*cit*, Śiva); the person who is intent on tasting the nectar oozing from the lotus in the

1755. सा (कुण्डलिनी) हि मूलाधाराख्ये चक्रे सार्धत्रिवलयाकारेण सुप्ता सती योगिभिरुत्थाप्य षट्चक्राणि ब्रह्मविष्ण्वादिग्रन्थींश्च भेदयन्ती सहस्रारं नीता सती तत्कर्णिकारूपचन्द्रमण्डलादसृतं स्रावयति। p. 52 of भास्करराय's com. सौभाग्यभास्कर on ललितासहस्रनाम on verses 87–91 कुलामृतैकरसिका ... सहस्राराम्बुजारूढा सुधासाराभिवर्षिणी। ... महाशक्तिः कुण्डलिनी बिसतन्तुतनीयसी॥ (Nir. ed. of 1935). Compare कौलज्ञाननिर्णय VI. 18–19 p. 16.

crown of the head is said to drink *sudhā* (nectar, wine); other people drink mere wine. When the adept [1756] in Yoga cutting the beast (ego) doing good or evil actions with the sword of knowledge (of reality) makes his mind merge in the Highest, he is said to be eater of pala (the Highest, flesh). The (Yogin) who restraining the several senses by his mind concentrates them on the Self, becomes 'matsyāśī',[1757] others are only killers of living beings. The Śakti (the woman associated with a sādhaka) of a beastly man is unenlightened but that of the Kaulika is enlightened; he who honours (or resorts to) such a Śakti is really a worshipper of Śakti. When a man is filled through and through with the bliss due to the union of the Highest Śakti with the Self (Śiva), that is called Maithuna (copulation); all other men are merely licentious persons.

The apologists for unpopular Tāntrik practices offer explanations of the five 'makāras' more or less on the lines of the Kulārṇava. For example, in his Introduction to the 'Principles of Tantra' (part II) Arthur Avalon (Sir John Woodroffe) gives (pp. CVII–CVIII) an esoteric explanation of the word 'drinking' used in such a verse as that in the Pārānandasūtra, 'Having drunk again and again, having fallen upon the earth, then having got up and again drunk (wine) there is no rebirth.' [1758]

1756. आमूलाधारमाब्रह्मरन्ध्रं गत्वा पुनः पुनः । चिच्चन्द्रकुण्डलीशक्तिसामरस्यसुखोदयः ॥ व्योमपङ्कजनिस्यन्दसुधापानरतो नरः । सुधापानमिदं प्रोक्तमितरे मद्यपायिनः ॥ पुण्यापुण्यपशुं हत्वा ज्ञानखड्गेन योगवित् । परे लयं नयेच्चित्तं पलाशी स निगद्यते ॥ मनसा चेन्द्रियगणं संयम्यात्मनि योजयेत् । मत्स्याशी स भवेद्देवि शेषाः स्युः प्राणिहिंसकाः ॥ अमुद्धा पक्षोः शक्तिः प्रबुद्धा कौलिकस्य च । शक्तिं तां सेवयेद्यस्तु स भवेच्छक्तिसेवकः ॥ पराशक्त्यात्ममिथुनसंयोगानन्दनिर्भरः । य आस्ते मैथुनं तत् स्यादपरे स्त्रीनिषेवकाः ॥ कुलार्णव V. 107–112. The 4th *tattva* is *Mudrā*, but the latter word is often applied to the Śakti associated with a sādhaka.

1757. 'Palāśī' means 'eater or enjoyer of Pala.' Pala means 'flesh', and pala stands for Para (Highest) 'aś' *r* and *l* are often interchangeable in Sanskrit and the root 'aś' may mean 'to reach' as well as 'to eat. Matsyāśī literally means 'eater of fish,' but in the esoteric interpretation "matsya" stands for 'manas' (mind) plus 'sya' representing 'saṁyama' (restraint).

1758. जीवन्मुक्तः पिबेदेवमन्यथा पतितो भवेदिति । पुनः पीत्वा पुनः पीत्वा पतित्वा धरणीतले । उत्थाय च पुनः पीत्वा पुनर्जन्म न विद्यते ॥ पारानन्दसूत्र p. 17 sūtras 81–82; the Intro. to 'Principles of Tantra' (part II) p. CVIII. It reads the first half of the verse as पीत्वा पीत्वा पुनः पीत्वा पीत्वा पतति भूतले. But there is hardly any difference in the literal meaning. Vide कुलार्णवतन्त्र VII. 100 which reads पीत्वा पीत्वा ... यावत्पतति भूतले.' रामेश्वर, commentator of परशुराम-कल्पसूत्र,

(*Continued on next page*)

He explains 'Being thus awakened Kuṇḍalinī enters the great road to liberation (mukti), that is, the Sushumnā nerve, and penetrating the centres one by one, ascends to the Sahasrāra and there coming in blissful communion with the Lord of Lords, again descends down through the same passage to the Mūlādhāra Chakra. Nectar is said to flow from such communion. The sādhaka drinks it and becomes supremely happy. This is the wine called Kulāmṛta, which a sādhaka of the spiritual plane drinks..... In reference to a sādhaka of the spiritual (ādhyātmika) class the Tantra says 'Pītvā pītvā...vidyate'. During the first stage of Ṣaṭ-cakra-sādhanā the sādhaka cannot suppress his breath for a sufficiently long time at a stretch to enable him to practise concentration and meditation in each centre of Power. He cannot therefore detain Kuṇḍalinī within the Sushumnā longer than his power of Kumbhaka permits. He must consequently come down upon the earth i. e. the Mūlādhāra, which is the centre of the element earth, after having drunk of the heavenly ambrosia. The sādhaka must practise this again and again and by constant practice, the cause of rebirth i. e. *vāsanā* (desire) is removed." This explanation sounds very profound and highly psychical, but it is not at all convincing. Similarly, the present author wonders how many writers on Tantras and how many Tāntrikas understood the theory of sublimation put forward in 'Tantras as a way of realization' (Cultural Heritage of India, Vol. IV. pp. 233–235) by way of explaining the insistence on five makāras. The first question is: why was it necessary to employ vulgar language to describe a state of profound bliss? Supposing the explanation of madya offered by Woodroffe is accepted, what is the explanation about offering flesh and fish? One cannot easily get out of 'matsyāśī' and 'māṁsāśī' the esoteric sense required by the apologists. The Kulārṇava, the Pārānanda-sūtra and several

---

(*Continued from last page.*)

quotes पीत्वा ... पतति भूतले, and takes it in a literal sense by citing a passage आगलान्तं पिबेद् द्रव्यं (on V. 22 p. 213) from कुलार्णव VII. 99. कौलावलीतन्त्र (VIII. 164–165) has this verse but reads पतित्वा च महीतले. The next verse in this last work is: अलिमीनाङ्गनासङ्गे यत्सुखं जायते नृणाम्। तदेव मोक्षो विदुषामविदुषां च पातकम्। VIII.165–166. Verses 213–214 refer to the fifth makāra in *cakrapūjā* and verses 223–225 justify promiscuous intercourse in Śrīcakra and verse 226 says 'it is the sinful *vāsanā* that is reprehensible, but to the pure-hearted everything is pure (*omnia sanctis sanctis*)'. The कालीविलासतन्त्र (ed. by A. Avalon, 1917 Tantrik Texts, vol. VI.) has the verse पीत्वा पीत्वा ... पुनः पीत्वा पतनं सत्यसंमतम्। (VI. 25).

other works almost always employ the words madya, māṁsa and fish in the ordinary sense. They rarely, if at all, drop the hint that words like matsya and māṁsa are being used in an esoteric sense and proceed to deal with realities of madya and flesh. The Kulārṇava quotes (II. 126) the verse of Manu IX, 93 (surā vai malam-annānām &c.), provides for the preparation of the three kinds of surā (V. 15–21), and says (V. 30) that surā is the 12th kind among intoxicants and that there are eleven other kinds of intoxicants made from jack-fruit, grapes, dates, sugar-cane &c. (V. 29). In XI. 22–35 the Kulārṇava dilates upon the etiquette to be observed in drinking wine as part of Kaula practice. It proceeds (V. 44) to divide flesh into three classes viz. of animals that fly in the sky (birds), of acquatic animals and of those that move on the earth. The [1759] Svacchandatantra (a work of great authority in Kashmir Śaivism) prescribes that various kinds of fish and meat and other food that can be licked and drunk should be poured in front of Śiva (image) and one should not stint for money. Quotations from Pārānanda-sūtra (notes 1698, 1703-4) make it perfectly clear that the words madya, māṁsa, and maithuna are employed therein in the ordinary sense. Pārānandasūtra (on pp. 80–81, paragraphs 69–70 and pp. 82–83 para. 76–80) describes such obscene details of the sādhaka's sexual intercourse that it is not possible to set them down here. The ordinary worship of Devī was elaborate enough, containing as it did 16 *upacāras* (vide p. 164 note 420 above). Where was the necessity of bringing in wine, meat and maithuna as an absolutely necessary part of the worship of Devī? The Kulārṇava and other tantras praise the Vedas, employ vedic mantras and quote[1760] Upaniṣad and Gītā passages. For example, Mahānirvāṇa V. 197 ff employs Vedic mantras (as noted on p. 1058) for sanctifying the five makāras, the three mantras 'Āpo hi ṣṭhā' Ṛg. X. 9. 1–3 in Nāmakaraṇa (*ibid.* IX. 150–152), 'Tac-cakṣur' Ṛg. VII. 66. 16 in Niṣkramaṇa (*ibid.* IX. 163), 'Viṣṇuryonim' Ṛg. X. 184. 1 in Garbhādhāna (*ibid.* IX. 96), 'Ayam te yonir' Ṛg. III. 29. 10 in the worship of Agni (*ibid.* IX. 21) and the verse 'Kālī Karālī' (Muṇḍakopaniṣad I. 2. 4)

1759. मत्स्यमांसाद्यनेकानि लेह्यपेयानि यानि च। अग्रमापूरयेच्छम्भोर्विचक्षणाव-विवर्जितः॥ स्वच्छन्दतन्त्र II. (पटल) 135 (Kashmir S. series with the com. उद्योत of क्षेमराज); मद्यं मांसं तथा मत्स्यानन्यानि च वरानने। साचारांश्च निराचारांल्लिह्यिमो न जुहुप्तयेत्। *ibid* V. 48.

1760. कुलार्णव XII. 33 cites the verse यस्य देवे &c. (which is श्वेताश्वतरोप. VI. 23); *vide* महानिर्वाण II. 44–45 for adopting तै. उप. 'भीषास्माद्वातः पवते भीषोदेति सूर्यः। ... मृत्युर्धावति पञ्चमः।

in the worship of the seven tongues of Agni. The Mahānirvāṇa (VIII. 214–215) prescribes Gītā IV. 24 (brahmārpaṇam brahma havir) as the mantra to be recited by the leader of the Tattva-cakra in offering the five *tattvas* and in sanctifying them. In spite of all this lip service to the Veda the tantras ignore the great moral dangers involved in their persistent teaching of five makāras and also pay no heed to the impressive advice of the Gītā (III. 21) that whatever a great or honoured man does or holds as authoritative is followed by all common people. There are several late medieval works about the Kaula cult that speak of drinking wine, eating flesh and maithuna in the vulgar sense as means of Devī worship and yet assert that by doing so *mukti* (liberation) would be secured. Two verses from a ms of a tāntrik work called Kaularahasya (containing one hundred verses) will bring home to the reader how common people understood the cult of the *makāras*.[1761]

Prof. Heinrich Zimmer in the 'Art of Indian Asia' (vol. I pp. 129–130) observes 'such living forms are suggested to the Indian artist by a dynamic philosophy that is intrinsic to his religious and philosophical tradition, for the worship of the life-force pouring into the universe and maintaining it, manifesting itself no less in the gross matter of daily experience than in the divine beings of religious vision constitutes the very foundation of Indian religious life. According to this doctrine which was particularly influential in the great periods of Indian art, release from the bondage of our normal human imperfection can be gained not only through the world-negating methods of asceticism (yoga) but equally through a perfect realization of love and its sexual enjoyment (bhoga). According to this view which has been eloquently expressed in the so-called Tāntric symbols and rituals of both the Hindu and Buddhist traditions, there is intrinsically no antagonism between *yoga* and *bhoga*. The role played by the guru, the spiritual guide and teacher in the stern masculine disciplines of yoga, is

1761. निधाय धारां वदने सुधायाः श्रीचक्रमभ्यर्च्य कुलक्रमेण। आस्वाद्य मद्यं पिशितं सुगाक्षीमालिङ्ग्य मोक्षं सुधियो लभन्ते॥ आस्वादयन्तः पिशितस्य खण्डमाकण्ठपूर्णं च सुधां पिबन्तः। सुगेक्षणासङ्गतमाचरन्तो मुक्तिं च मुक्तिं च वयं व्रजामः॥ verses 4 and 7 of कौलरहस्य, D. C. ms. No. 959 of 1884–87 copied in संवत् 1790, i. e. in 1734 A. D. This may be compared with the doctrine of the नीलपटदर्शन quoted above (p. 1073). There is a ms. in the BORI at Poona (D. C. No. 994 of 1891–1895) called पञ्चमकारशोधनविधि, which describes the sanctifications of five makāras with Vedic mantras on the same lines as the महानिर्वाणतन्त्र cited above.

taken over in the initiations of bhoga by the devout and sensual helpmate. The initiating woman plays the part of Śakti while the male initiate assumes that of Śiva and both attain together to the realisation of the immanence within themselves of the consubstantiality of the Goddess and the God.' It has already been stated (p. 1054) that Prof. Zimmer is wrong in thinking that the Tāntrik rites were systematically disparaged as 'vāmamārga' by the Indian partisans of Yoga. He is also wrong (p. 130) when he says that 'throughout the first millenium A. D. they (Tāntric rites) were a basic element of normal Indian experience.' There is really very little evidence to substantiate this claim. He makes this sweeping generalisation as an art-critic and historian of Indian Art from the few tāntric sculptures on the Puri and other temples in Orissa and some other places in India. Vide the well-known work 'Bengal Lancer' by F. Yeats-Brown (London, Golancz, 1930) pp. 236–237, where the superintendent of the temple of Jagannātha justifies the obscene frescoes on the ground that until a man is master of his gross body he cannot see the Godhead and feels sure that future ages will look on Tántrik psychology with understanding.

One or two very peculiar notions and practices of the Tāntrikas may be briefly mentioned here. The offering of flesh, wine and mudrā to the *devatā* with the recital of three *bījas* 'āṅ, hrīm, krom' and the mantras 'om Ānandabhairavāya namaḥ' and 'om Ānandabhairavyai namaḥ' was technically called *śuddhi* [1762]. The Mahānirvāṇa and Tantrarāja-tantra state that to drink wine without *śuddhi* [1763]

1762. शुद्धिं विना मद्यपानं केवलं विषभक्षणम्। चिररोगी भवेन्मन्त्री स्वल्पायुर्म्रियतेऽचिरात्॥ महानिर्वाण० VI. 13. Sir John Woodroffe offers the rather amusing explanation that wine without food produces greater injury and that *japa* of mantra and the performance of other rites were believed by the sādhakas to remove the curse from wine and that the sādhaka meditates upon the union of the Goddess and God Śiva in the wine, the latter being itself a devatā. सत्यत्रेताद्वापरेषु यथा मद्यादिसेवनम्। कलावपि तथा कुर्यात् कुलधर्मानुसारतः॥ कुलमार्गेण तत्त्वानि शोधितानि च योगिने। ये दद्युः सत्यवचसे नहि तान् बाधते कलिः॥ महानिर्वाण० IV. 56–60.

1763. The कुलार्णव (17. 25) defines वीर as 'वीतरागमदक्रोधकोपमात्सर्यमोहतः। रजस्तमोविदूरत्वाद्वीर इत्यभिधीयते॥'. In spite of these requirements of high qualities the रुद्रयामल (in 28. 31–36) provides that a वीर should honour the beautiful wife of another (or 'his own wife or another's') wearing charming ornaments whose body is suffused with erotic passion and who has become

(*Continued on next page*)

was like swallowing poison, that the person doing so would suffer from diseases for a long time, would soon die prematurely and that wine was to be drunk even by one who has attained some perfection only up till the mind has reached an ecstatic state of absorption (in thoughts of Devī) and that if he drinks beyond that stage he at once becomes a sinner (vide also Kulārṇava VII. 97–98 for the last proposition).

A most revolting rite from the view-point of all unsophisticated people is what is called 'cakra-pūjā' (worship in a circle). An equal number of men and women without distinction of caste and even near blood relations secretly meet at night and sit in a circle (vide Kaulāvalinirṇaya VIII. 76). The Goddess is represented by a *yantra* (diagram). There is a leader of the cakra. The regulations were that only persons who had attained the status of *Vīra* (defined above in n 1763) were to be admitted[1764] and *paśus* (ordinary men with beastly passions not curbed) were to be excluded. What assurance was there that the leader of the cakra himself possessed the noble qualities mentioned in the verse quoted above and would choose only men possessed of similar qualities? The women assembled cast their bodices in a receptacle and each of the assembled men secured a female companion for that night by lot i. e. by taking a bodice out of those contained in the receptacle. The practice of

---

(Continued from last page)

gay with wine 'अथ वीरो यजेत्कान्तां परकीयामथापि वा। ... मद्यनानलतत्साङ्गमासवानन्द-निग्रहात्। &c. The महानिर्वाण० I. 57 refers to the three categories of साधक: viz. पशु, वीर and दिव्य, the last being defined as दिव्यश्च देवतामायः शुद्धान्तःकरणः सदा। द्वन्द्वातीतो वीतरागः सर्वभूततनः क्षमी॥ (*ibid.* I. 55). The Tantras contain conflicting views on these three bhāvas. The Kālīvilāsa-tantra says that men of divya type existed only in Satya-yuga and Tretāyuga, Vīra only in Tretā and Dvāpara and these two were non-existent in Kali and Paśu-bhāva remained in Kali (VI. 10 and 21).

1764. Vide 'Śakti and Śākta' p. 354, Farquhar's 'Outlines of the religious Literature of India' p. 203, महानिर्वाणतन्त्र VIII. 204–219, श्रीचक्र-कृत्तान्तं शुभं वा यदि वाशुभम्। कदाचिदेव वक्तव्यमित्याज्ञा परमेश्वरि॥ कुलधर्मादिकं सर्वं सर्वावस्थासु सर्वदा। गोपयेच्च प्रयत्नेन जननीजारगर्भवत्। वेदशास्त्रपुराणानि इतिहासानि गणिका इव। इयं तु शाम्भवी विद्या गुप्ता कुलवधूरिव॥ कुलार्णव XI. 79, 84, 85. In the महानिर्वाण (IV. 79–80), however, Śiva is made to say that the Kaulika-sādhana should be made openly and that what he said in other tantras about the concealment of Kaulikadharma not being blamable was not applicable when the Kali age became powerful.

Śrīcakra must have given rise to great obloquy and unpopularity for the Tāntrikas. Therefore, the Kulārṇava[1765] advises that cakrapūjā should be *sub rosa*. 'What happens at Śrīcakra, whether good or bad, should never be uttered (in public); this is the order (of God); one should never give out information about what happens at Cakrapūjā'. The 18th century Mahānirvāṇatantra, which is reformist in character, states that, since in the Kali age (in which people are weak and the influence of sinful age is very strong), for the last tattva (i. e. maithuna) one's own wife is alone to be the Śakti because in that case no fault can be found or some substitute like red sandalwood paste may be employed. In the author's youth whispers floated about that in some towns in Mahārāṣṭra cakrapūjā was practised, that even great Pandits thought that their learning was due to the favour of Devī, that they, though very orthodox in other respects, took once a year in Devīpūjā a thimbleful of wine as *prasāda*. The learned Achyutarāya[1766] Modak of Nasik composed at Nasik a work called 'Avaidikadhikkṛti' (condemnation of non-vaidika practices) wherein he severely handled the cult of the five makāras.

Naturally common people, who could not appreciate or understand the abstruse and subtle philosophy of Śakti, Nāda, Bindu and so forth, seized with avidity upon the apparently easy path of worship of Śakti by the five makāras and the mantras, bījas, cakras and the like taught by the Tantras and it has been seen above (pp. 1073–76) to what depths some persons professing to be gurus, Śāktas and Tāntrikas descended in course of time.

The path of the Tantras was in its higher level one of *Upāsanā* or *Bhakti*, though it very often degenerated into magic and moral depravity. The deity worshipped viz. Parameśvarī

1765. शेषतत्त्वं महेशानि निर्वीर्ये प्रबले कलौ। स्वकीया केवला ज्ञेया सर्वदोषविवर्जिता॥ अथवात्र स्वयम्भ्वादि कुसुमं माणवल्लभे। कथितं तत्पतिनिधौ कुसीदं परिकीर्तितम्॥ महानिर्वाण० VI. 14–15; अत्र means 'in offering शेषतत्त्व' (i. e. the 5th). The com. explains 'कुसीदं रक्तचन्दनम्'. Women that could be śaktis were of three classes, स्वीया (one's own wife), परकीया (wife of another) and साधारणी (a woman who is a *veśyā*).

1766. Vide for Achyutarāya Modak 'Taraporevalā Commemoration volume' of the Deccan College Research Institute, pp. 214–220. The work was finished at Pañcavaṭī in śaka 1736 Phālguna bright half 10th (i. e. in 1815 A. D.).

presented three aspects to the *upāsaka*[1767] (devotee) viz. gross (sthūla), subtle (sūkṣma) and para (highest). The first aspect is represented by the form of Devī with hands, feet and other limbs, which is fit for worship with the hands and the eyes of the devotee; the second aspect consists of mantras, which are fit for apprehension with the organs of hearing and speech by those who have the good fortune to receive the mantras from a worthy guru. The third aspect (*para*) is one to be apprehended by the mind of the sādhaka and described as all-pervading consciousness and the like (in Nityāṣoḍaśikā VI. 49–50).

Some modern writers have been somewhat unjust to the whole Tāntrik literature in labelling it all as black magic or as full of obscenities. The present writer is not one of those who sometimes hold that what is not understood is either false, absurd or non-existent. He is prepared to believe that the end and aim of a few of the higher minds among Tāntrikas and of some of the works on Tantra was the attainment of high spiritual powers by Yoga practices, the Realization of the Supreme Tattva (Principle) variously designated as *Brahma*, Viṣṇu, Śiva or Devī, and Liberation (mokṣa). He is aware that many of these claim to be based on Vedic traditions, teachings and practices and to have further developed the conceptions underlying Vedic teachings and ritual and that even the magic rites contained in several Tāntrik works had their counterparts, though on a much smaller scale, in the Ṛgveda, the Atharvaveda, Sāmavidhāna Brāhmaṇa and other Vedic works. The present author, though he has carefully studied many of the Tantras and the Yogasūtra of Patañjali with the bhāṣya and commentaries thereon, has to admit that he has had no mystic experience, but he is not prepared to deny that prophets, saints, poets and others might have mystic visions and experiences. Man's psychic powers are vast

1767. अथात्रोपास्याया: परमेश्वर्यास्त्रीणि रूपाण्युपास्तियोग्यानि स्थूलं सूक्ष्मं परं चेति। तत्राद्यं करचरणाद्यवयवशीलं मन्त्रसिद्धिमतां चक्षुरिन्द्रियपाणीन्द्रिययोर्योग्यम्। ततः पद्मनिभां देवीं बालार्ककिरणारुणाम्, इत्यादिना वक्ष्यमाणम्। द्वितीयं मन्त्रात्मकं पुण्यवतां श्रवणेन्द्रियवागिन्द्रिययोर्योग्यम्।... तृतीयं वासनात्मकं पुण्यवतां मनसो योग्यं — चैतन्यमात्मनो रूपम् — इत्यादिना षष्ठे पटले वक्ष्यमाणम्। एतत्त्रितयातीतं तु वाङ्मनसातीतं युक्तैरवंतयाऽनुभूयमानमखण्डं रूपम्। सेतुबन्ध on नित्याषोडशिका॰ pp. 7–8. The words चैतन्यमात्मनो रूपम् occur in नित्याषोडशिका॰ VI. 50 p. 213. नित्या is 'श्रीपरमशिवाभिन्ना शक्तिरेव तावच्छिरसेत्युच्यते।' सेतुबन्ध on p. 25. The नित्याषोडशिका॰ (I. 138–160) contains a finely worded description of the gross aspect of Devī beginning with the half verse 'ततः पद्मनिभां देवीं बालार्ककिरणारुणाम्.'

and unknown as propounded in Alexis Carrell's work 'Man the unknown' and in 'Invisible influence' by Dr. Alexander Cannon (15th impression, Rider and Co., London, 1935). He knows that some of the Tāntrik works made a distinction between the rules of ordinary social life and conventions (samājā-dharma) and the peculiar forms of Tāntrik worship, in which, while it lasts, no distinction is made on the ground of caste or sex (vide notes 1711 and 1713). It may further be conceded that the Tantra works placed women on a footing of equality with men, gave them an exalted position and that they endeavoured to provide a common platform (as shown in *n.* 1704 above) for differing and wrangling sects of Vaiṣṇavas, Śaivas and others by putting forward Devī as the object of worship for all; but they had not much success as is shown by the facts that Vaiṣṇavas and Śaivas still carried on their quarrels and that the Tāntrik texts themselves fell into five classes, viz. Śaiva, Śākta, Vaiṣṇava, Saura and Gāṇapatya and that there are differing doctrines among the Tāntrikas called Kādimata, Hādimata &c.

The matters that distinguish Tāntrik works from other religious literature in Sanskrit are the [1768] promise of the attainment of miraculous powers, the Realization of the one Supreme Principle in a short time by means of the Tāntrik *sādhanā* 'method or procedure' (vide Intro. to 'Principles of Tantra' p. XIV), by their insistence on the worship of Devī with makāras alone as yielding the desired results (as in Mahānirvāṇa V. 24 'pañcatattva-vihīnāyām pūjāyām na phalod-

---

1768. Sir John Woodroffe remarks (in the Introduction to his 'Principles of Tantra' part 2, pp. XII-XIV) that the one topic that appears to differentiate Tantras from other religious works is the constituent parts of its ritual such as the mantras, bījas, mudrās, yantras, *bhūtaśuddhi* and that it is mainly by these items rather than by anything else that the tāntrik character of a work is established. Vide also 'the Śāktas' by E. A. Payne p. 137 for a similar view. Sir. John Woodroffe, while reviewing Payne's work (in JRAS for 1935 at p. 387), himself agreed that what distinguished the Śākta ritual is the mantra and magical sections and that part of it which deals with the secret ritual, that, while there is ordinarily no *bhoga* (enjoyment) where there is *yoga*, in the Śākta doctrine a man may have both *yoga* and *bhoga* and that this is a distinct and profound characteristic of that doctrine. Even the Buddhist Vajrayāna Tantras purport to aim at the attainment of *bodhi* (vide Guhyasamāja p. 154, Sādhanamālā I. p. 225 and II. p. 421) and ज्ञानसिद्धि I. 4 ये तु सत्त्वाः समाख्याताः सर्वसङ्कल्पवर्जिताः। ते स्पृशन्ति परां बोधिं जन्मनीहैव साधकाः॥.

bhavaḥ') and on their peculiar ritual of mantras, bījas (syllables meaningless to ordinary men), nyāsas, mudrās, cakras, yantras and similar things for attaining their goal. The condemnation poured on Tāntricism is principally due to their insistence on wine, meat and sexual unions as the best and the only means for the effective worship of Devī, their theory that by merely repeating some mantra or mantras over wine, meat and other tattvas, by offering them to Devī and by meditation on her, one may drink wine or eat meat, when in the same breath they say emphatically that partaking of wine and meat is sinful without this ritual. This antagonizes those who are not *kaulas* and who hold that this persistent teaching is very dangerous for the common run of men and savours of hypocrisy.

Some of the Tantras practically inculcated what appears to non-tāntrikas unbridled licence. The Kaulāvalī-nirṇaya (IV. 15 ff) asserts: 'The Śāktas have no higher means of happiness and liberation than the fifth tattva (i. e. maithuna); a sādhaka becomes *siddha* only by the (practice) of the fifth tattva. If he resorts only to the first (i. e. wine) he becomes only Bhairava, if only to the 2nd (meat) he becomes Brahmā, by the third (fish) he becomes a mahābhairava, by the 4th (mudrā) he becomes foremost among sādhakas.[1769] The same Tantra goes further and frankly says 'all women are fit for intercourse to a (Śākta) worshipper except the wives of his guru or of those Śāktas who have attained to the status of *Vīra*, that for those who have reached the stage of *advaita* there is no prohibition nor is anything enjoined. To the pure everything is pure, it is only the hankering that is blamable.' In this connection that work advances certain puerile and obscene arguments (in VIII. 223-225) about illicit or incestuous intercourse that cannot be set out here. That tantra does not stand alone in such statements. For example, the Kālīvilāsatantra (X. 20-21) allows adulterous intercourse to a 'Śākta' devotee pro-

---

1769. अथातः संप्रवक्ष्यामि पञ्चतत्त्वविनिर्णयम्। पञ्चमात्तु परं नास्ति शाक्तानां सुखमोक्षयोः। केवलैः पञ्चमैरेव सिद्धो भवति साधकः। केवलेनाद्ययोगेन साधको भैरवो भवेत्। &c. कौलावलीनिर्णय IV. 15-16; गुरुधीरवधूस्त्यक्त्वा रन्याः सर्वाश्च योषितः। एता वर्ज्याः प्रयत्नेन सन्दिग्धानां च सर्वदा॥ अद्वैतानां च कुत्रापि निषेधो नैव विद्यते। ... अत एव यदा यस्य वासना कुत्सिता भवेत्। तदा दोषाय भवति नान्यथा दूषणं क्वचित्॥ कौलावलीनिर्णय VIII. 221-222, 226; पवित्रं सकलं चैव वासना कुत्सिता भवेत्। ibid. XVII. 170. दीक्षितः परनारीषु यदि मैथुनमाचरेत्। न बिन्दोः पातनं कार्यं कृते च ब्रह्महा भवेत्। यदि न प्रपतेद् बिन्दुः परनारीषु पार्वति। सर्वसिद्धीश्वरो भूत्वा विहरेद् भूमिमण्डले॥ कालीविलाससन्त्र X. 20-21.

vided it is not carried to the last stage of emission and avers that, if he observes the condition in the proviso, he would become the master of supernatural powers in spite of adultery. It should be noted that the author of this work has unabashed hardihood to make Śiva tell this to Pārvatī. About wine that work remarks 'just as drinking of soma[1770] is prescribed for brāhmaṇas is solemn Vedic sacrifices, similarly wine should be drunk at proper times (or according to the practice of Kaulas), since it confers enjoyment as well as mokṣa; drinking wine is blamable in the case of those who hanker after benefits or who are egoistic; but in the case of those that are free from egoism there is neither prohibition (of drinking) nor the enjoining of it. One who is free from the fetters of making distinctions should practise drinking wine for the purpose of remembering the meaning of the mantras and for making his mind fixed (on worship) but he who resorts to wine, and other tattvas merely for pleasure is sinful.' The teachings of works like the Kaulāvalī-nirṇaya about drinking wine and sexual intercourse with all sorts of women as the highest means of Śakti worship by persons professing to be *advaitins* led to great depravity and sexual immorality and orgies as indicated by the criticism in medieval works cited above (pp. 1073–76) that regarded Tāntrik teachings as execrable, though some medieval Hindu works admitted into religious practices nyāsa, mudrā, yantra and the like, which were deemed to be innocuous and which would be described in this work later on. The mere intention of doing good if certain conditions were fulfilled is not enough excuse, when it is most likely that the means proposed for attaining a high spiritual level and for liberation would have the opposite effect on most people. Taking all things into consideration, the present author is constrained to observe that medieval and recent writers who severely criticized Tāntrik works were on the whole largely justified in their condemnation of Tāntrik practices as enunciated in many Tāntrik works and of the works themselves. For one man that attained super-normal powers, high spiritual level and great mystic experience there must have been hundreds of hypocrites, charlatans, and licentious men who deluded trustful and ignorant men and particularly women.

1770. यथा क्रतुषु विप्राणां सोमपानं विधीयते। मद्यपानं तथा कार्यं समये भोगमोक्षदम्॥ फलार्थिनामवश्यत्वं दूषणमेव हि। निरहंकारिणां चैव न निषेधो न वा विधिः॥ कौलावली० VIII. 90–91; मन्त्रार्थस्मरणार्थं तु मनसः स्थैर्यहेतवे। मेद्यपात्रविनिर्मुक्तो मद्यपानं समाचरेत्। सेवेत यः सुखार्थाय मद्यादीनि स पातकी॥ ibid. VIII. 74.

Only a few Purāṇas like the Devīpurāṇa, the Kālikā, the Devīmāhātmya in the Mārkaṇḍeya provide for the employment of some of the condemned makāras (madya, māṁsa, matsya) in the worship of the Great Goddess. From about the 6th or 7th century A.D. Purāṇas began to incorporate the special ceremonial characteristics of the Śāktas and Tāntrikas. Aparārka quotes a passage[1771] from the Devīpurāṇa wherein the qualifications of a *Sthāpaka* (one who performs Devapratiṣṭhā) are set out, viz. he would be the best Sthāpaka for establishing images of Devī and the Mātṛs, who knows the *vāma* (left or opposite) and the *dakṣiṇa* (right) path of worship, who has thoroughly mastered the veda relating to the Mātṛs (the Mother Goddesses), who is clever in the interpretation of Pañcarātra works and is proficient in the Tantras of the Mātṛs &c. The Kālikā-purāṇa devotes many chapters (54 ff) to the description of mantras, kavacas, mudrās, nyāsas &c. The Bhāgavatapurāṇa also and Agni[1772] 372.34 expressly say that the worship of gods and of Viṣṇu also is either *vaidikī*, *tāntrikī* or *miśrā*, the first and third being for the three higher varṇas and the tāntrikī for śūdras. The Bhāgavatapurāṇa refers to the worship of Keśava laid down in the Tantras for him who desires to cast out the knot (bondage or grief) of the heart. It (Bhāgavata) also mentions[1773] Vaidikī and Tāntrikī dīkṣā (in XI. 11. 37) and refers to the Tāntrik method of the aṅgas, upāṅgas, āyudhas and decorations in the worship of the Lord of Lakṣmī.[1774] Some of the Purāṇas and medieval nibandhas, however, fully utilized what Tantras had to say about mantras, japa, nyāsa, maṇḍala, cakra, yantra and

1771. यदपि देवीपुराणे—वामदक्षिणवेत्ता यो मातृवेदार्थपारगः। स भवेत्स्थापकः श्रेष्ठो देवीनां मातरा(तृका!) सु च। पञ्चरात्रार्थकुशलो मातृतन्त्रविशारदः। &c. अपरार्क p. 16, who then quotes Matsya 265. 1–5 for the qualifications of sthāpaka in which there is no reference to वाम, दक्षिण or तन्त्र. This and the quotations from the Bhāgavata indicate that the Matsya was composed some centuries before the देवीपुराण and भागवतपुराण.

1772. वैदिकस्तान्त्रिको मिश्रो विष्णोर्वै त्रिविधो मखः। त्रयाणामीप्सितेनैकविधिना हरिमर्चयेत्। अग्नि 372. 34.

1773. य आशु हृदयग्रन्थिं निर्जिहीर्षुः परात्मनः। विधिनोपचरेद् देवं तन्त्रोक्तेन च केशवम्॥ लब्धानुग्रह आचार्यात्तेन सन्दर्शितागमः। पिण्डं विशोध्य संन्यासकृतरक्षोऽर्चयेद्धरिम्॥ भागवत XI. 3. 47 and 49. Here पिण्डशोधन refers to the भूतशुद्धि prescribed in such तान्त्रिक works as महानिर्वाणतन्त्र (V. 93–105) and taken over in late medieval works like the पूजाप्रकाश pp. 129–133 and न्यास also is mentioned as a means of protection against evil.

1774. तान्त्रिकाः परिचर्यायां केवलस्य श्रियः पतेः। अङ्गोपाङ्गायुधाकल्पं कल्पयन्ति यथैव हि। भागवत XII. 11. 2.

similar matters. This will be illustrated later by some examples. Even for such a simple and common topic as the 16 upacāras of worship, the Varṣakriyā-kaumudī (p. 156) and Ekādaśī-tattva (p. 59) quote the Prapañasāra-tantra (VI. 41-42).

The Purāṇas and some smṛtis prescribe short mantras of five, six, eight, twelve, thirteen and more syllables as very efficacious for securing all objects. A few of them are set out in the note[1775] below. Medhātithi or Manu says that the word mantra primarily means a part of the Veda comprising Rgveda, Yajurveda and Sāmaveda, treated as such by those who have studied the Veda, and that expressions like "Agnaye svāhā"[1776] employed in rites like Vaiśvadeva are called mantras in a secondary sense by way of praise. The vedic conception was that a mantra has great potency and that it must be correctly repeated to secure the desired result, that a mantra defective as to accent or as to a letter or wrongly applied did not convey the meaning intended and that becoming a thunderbolt in the form of a word or words it destroys[1777] the *yajamāna*. Vedic mantras are

---

1775. Vide शारदातिलक I. 73 ff for references to mantras of five or more letters. A pañcākṣara mantra is नमः शिवाय (in लिङ्गपुराण I. 85); the same becomes a mantra of six letters when 'om' is prefixed. Other mantras of six letters are: ओं नमो विष्णवे (in वृद्धहारीतस्मृति VI. 213), ओं नमो हराय (in हेमाद्रि on व्रत vol. I. p. 227), श्रीरामरामरामेति (vide note 219 above) and two more on p. 434 under 'Ṣaḍakṣaramantra'; 'Khakholkāya namaḥ' is a ṣaḍakṣara mantra of Āditya quoted from भविष्यपुराण in हेमाद्रि (व्रत II. p. 521) and in Kalpataru on vrata p. 9 and 199 (in the latter it is called मूलमन्त्र under Nimbasaptamī, the description of which is taken from Bhaviṣya, Brāhma-parva, chap. 215 and 216); mantras of eight letters are: ओं नमो नारायणाय (in नारदपुराण I. 16. 38-39, ब्रह्मपुराण 60. 24, वराहपु. 120. 7), ओं नमो वासुदेवाय (in वैखानसस्मार्तसूत्र IV. 12, नरसिंहपु. 63 6, q. by अपरार्क, मत्स्यपु. 102. 4 q. by स्मृतिच. I. p. 182 as मूलमन्त्र); a mantra of twelve letters is ओं नमो भगवते वासुदेवाय (in नारदपु. I. 16. 38-39, नरसिंहपु. 7. 43); for a mantra of 13 letters about राम, vide note 219 above); mantras of 16 letters are गोपीजनवल्लभचरणौ शरणं प्रपद्ये (in नारदपु. II. 59. 44) and ह्रीं गौरि कमलवासिनि गोपेश्वरि हुं फट् स्वाहा (in शारदा० IX. 99).

1776. मन्त्रशब्देन देवतोद्देशशब्दवान् स्वाहाकारान्तोऽग्नये स्वाहेत्येवमादिर्निर्दिश्यते। न ह्यग्ने मन्त्रा वैश्वदेवेषु विनियुक्तास्तेषु च मन्त्रत्वं प्रशंसयोच्यते। न तु स्वाध्यायेऽपठितानां मन्त्रत्वमस्ति। स्वाध्यायैकदेशः कश्चिद्ऋग्यजुःसामात्मको वेदाध्यायिभिर्मन्त्र इति व्यवह्रियते। व्यवहारतश्च पदार्थावगमनम्। मेधातिथि on मनु III. 121 (in Dr. Jha's edition).

1777. Vide H. of Dh. vol. II. p. 347 and note 840, where verse 52 from the Pāṇinīyaśikṣā is quoted and the story of the result of wrong accentuation of the word 'indraśatruḥ' is briefly set out from Tai. S. II. 4. 12. 1 and Śat. Br. I. 6. 3. 8-16.

of four classes viz. *ṛk* (which is metrical), *yajus* (which has no restriction as to metre but which must be a sentence), a *sāman* (which is sung) and *nigada* (i. e. *praiṣa*, meaning words that are addressed by one person to another calling upon the latter to do a certain act, e. g. the words 'srucaḥ sammṛḍḍhi, prokṣaṇīr-āsādaya'. Nigadas are yajus in form but are distinguished from yajus by the fact that the former are loudly uttered, while a yajus is ordinarily recited in a low voice.[1778] The most sacred mantra is the Gāyatrī (Ṛg. III. 62. 10 'tat-savitur' &c). The Atharvaveda (XIX. 71. 1) calls it Vedamātā (the mother of the Veda). The Bṛhadāraṇyakopaniṣad (V. 14) contains a grand eulogy of the Gāyatrī.[1779] *Om* is a very sacred syllable, a symbol of *brahma* and may be called in the language of the Tantras a bīja. There are only a few syllables such as *om*, *phaṭ*, *vaṣaṭ* in the Vedic literature that on the face of them have no meaning but are like *bīja* mantras in the Tantra sense. There is a *Bījanighaṇṭu* (a dictionary of bīja mantras) printed in 'Tāntrik texts' Vol. I, pp. 28–29 (where monosyllabic bījas such as Hrīm, Śrīm, Krīm, Hum, phaṭ, are set out and described in symbolic words indicated in note 1708 above. It is stated about a dozen times in the Aitareya Brāhmaṇa viz. it is the perfection of sacrifice when it is *rūpasamṛddha* (perfect as to its form) i. e. when the ṛk verse pointedly refers to the sacrificial act that is being performed.[1780] The Nirukta (I. 15–16) starts a lengthy discussion on Kautsa's view that mantras have no sense (or are purposeless). There is a long discussion in the Pūrvamīmāṁsāsūtra (I. 2. 31 ff) on the same lines as in the Nirukta. Jaimini states that there is no difference in the meanings of words employed in the Veda and those employed by people and Śabara adds in his *bhāṣya* (on P. M. S. I. 2. 32) that mantras are recited in sacrifices only for the purpose of conveying or manifesting the meaning.[1781] It is difficult to

1778. Vide Jai. II. 1. 35–45 and H. of Dh. Vol. II. pp. 983–984 and note 2232 for further details about these.

1779. Vide H. of Dh. Vol. II. pp. 302–304 for the meaning and eulogies of Gāyatrī in various Sanskrit works and pp. 301–302 for the eulogy of 'om', which is called 'praṇava'.

1780. एतद्वै यज्ञस्य समृद्धं यद्रूपसमृद्धं यत्कर्म क्रियमाणमृगभिवदति। ऐ. ब्रा. III. (अध्याय), 5 (खण्ड).

1781. The Nirukta (I. 16) quotes this Brāhmaṇa passage but reads ऋग्यजुर्वाभिवदतीति in its discussion on the question whether Vedic mantras are significant. The words of the Ait. Br. 'yat karma kriyamāṇam ṛgabhivadati'

(*Continued on next page*)

define what a vedic mantra is and it is generally understood, as said by Śabara, that passages or verses are mantras that are recognised as such by the learned.[1782] The whole Veda is divided into five categories viz. *Vidhi* (hortatory passages as in 'Agnihotram juhuyāt'), *mantras*, *nāmadheya* (names such as Udbhid in 'Udbhida yajeta' or 'Viśvajit' as in 'Viśvajitā yajeta'), *niṣedha* (prohibition as in 'nānṛtam vadet') and *arthavāda* (explanatory or laudatory passages as in 'Vāyu is a deity that is swiftest'). The Nirukta (I. 20) embodies the ancient view that the sages had an intuitive perception of Dharma and they transmitted the mantras by oral instruction to those that came after them and that had no intuitive perception of Dharma. The *mantras* and *stotras* were supposed even in the Ṛg. to induce the gods to come to the sacrifices and to bestow on those who recited them protection, valiant sons, cattle, wealth, victory and all sorts of things (e. g. vide Ṛg. I. 102. 1–5, II. 24. 15–16, II. 25. 2, III. 31. 14, IX. 20. 7, IX. 72. 9, X. 78. 8, X. 105. 1). It has been shown above p. 920 (in notes 4167–4168) how the Purāṇas prescribed their own mantras for many religious acts but those mantras also are significant and not meaningless.

Mantras are the very heart and core of Tantraśāstra so much so that the śāstra is often spoken of as mantraśāstra. The theory of Tāntrik writings such as the Prapañcasāra and Śāradātilaka about mantras may be briefly stated as follows: In the human body there are ten nāḍīs, the three principal being Iḍā (on the left side from the left testicle to the left nostril), Suṣumnā (in the middle of the body in the spinal chord) and Piṅgalā (on the right side from the right testicle to the right nostril). The Kuṇḍalinī lies asleep coiled like a snake in the Mūlādhāra-cakra. It is a form of the *śabda-brahma*. The Devī (or Śakti) assumes the form of Kuṇḍalinī, all gods reside in Devī and all mantras are Her forms (Śāradātilaka I. 55–57). It has already been stated how from contact with light (Jyotiḥ) Śakti becomes conscious and has a desire to create, then it solidifies and appears as a *bindu*. Through the instrumentality

(*Continued from last page*)

contain the same doctrine that the PMS and Śabara emphasize viz. mantras are 'arthapratyāyaka' or 'arthaprakāśaka'. शबर on अविशिष्टस्तु वाक्यार्थः (पू. मी. सू. I. 2. 32) says 'अर्थप्रत्यायनार्थमेव यज्ञे मन्त्रोच्चारणम्'.

1782. अनाम्नातेषु मन्त्रत्वमाम्नातेषु हि विभागः। पू. मी. सू. II. 1. 34 on which Śabara remarks अनाम्नातेषु मन्त्रत्वं न स्यादभिधायकेष्वपि। नाभिधायकत्वं मन्त्रत्वे हेतुः किं तर्हि। अभियुक्तप्रयोगः। येऽभियुक्तैर्मन्त्रा इति भोक्ष्यन्ते न ते मन्त्राः॥'.

of Kāla (Time) bindu divides itself into three, gross (i. e. bīja), subtle (sūkṣma i. e. nāda which is bījabindu) and *para* (i. e. bindu which is kāryabindu). This last is of the nature of an unmanifest sound and is called *śabdabrahma*[1782a] by the sages (Śāradātilaka I. 11–12, Prapañcasāra I. 41 ff). Śabdabrahma exists in all things as consciousness; it exists in the bodies of living human beings in the form of Kuṇḍalinī and then appears as letters in prose, poetry and so forth, being carried by Vāyu (air) to the throat, palate, teeth &c. The sounds thus produced are called *akṣaras* and when written they are spoken of as *varṇas* (letters of the alphabet, mātṛkā, which are 50 from *a* to *kṣa*). The impulse to sound production arising in mūlādhāra-cakra is called 'parā' (vāk), it is called paśyantī when it reaches 'svādhiṣṭhāna-cakra, madhyamā in the heart and vaikharī in the mouth. Both akṣara and varṇa are Kuṇḍalinī made articulate in speech and visible in writing. All the *mantras* (some say they are nine crores) are evolved from the varṇas of the alphabet that are deemed (by Tāntrikas) to be living conscious sound powers. It is the bīja mantras like hrīm, śrīm, krīm that make visible the form of the Devatā (Mahānirvāṇa V. 18–19).[1783] It is wrong to suppose that mantras are mere letters or words or language. They assume different forms, such as bīja-mantras, kavaca, hṛdaya &c. The bījamantras like Hrīm (representing Tribhuvaneśvarī or Māyā), Śrīm (representing Lakṣmī), Krīm (representing Kālī) cannot possibly be called language, since they convey no meaning to ordinary men. They are the Devatā (Iṣṭadevatā of the

---

1782 a. देवी is described in शारदातिलक I. 56–57 as शब्दब्रह्मस्वरूपिणी and पञ्चाशद्वर्णरूपिणी.

1783. ताराद्या कमलाद्या च वाग्भवाद्या यथाक्रमम्। ब्राह्मणक्षत्रियविशां सावित्री कथिता कलौ॥ ··· द्विजादीनां प्रभेदार्थं शूद्रेभ्यः परमेश्वरि। सन्ध्येयं वैदिकी प्रोक्ता प्रागेवाह्निककर्मणाम्॥ महानिर्वाण० VIII. 87–88. ओम् is called तार, श्रीं is कमलाबीज and ऐं is वाग्भवबीज. About गायत्री the शारदा० (XXI. 1–3) says 'अथो वक्ष्यामि गायत्रीं तत्त्वरूपां त्रयीमयीम्। यया प्रकाश्यते ब्रह्म सच्चिदानन्दलक्षणम्। प्रणवाद्या व्याहृतयः सप्त स्युस्तत्पदादिकाः। चतुर्विंशत्यक्षरात्मा गायत्री शिरसान्विता॥ सर्ववेदोद्भूतः सारो मन्त्रोयं समुदाहृतः॥. For the seven व्याहृतिs, vide H. of Dh. vol. II. p. 301 note 713. Each is to be repeated preceded by *om*. The शिरस् of गायत्री is ओमापो ज्योती रसोऽमृतं ब्रह्मभूर्भुवः स्वरोम्। The विष्णुधर्मोत्तर I. 165 says about गायत्री 'अभिचारेषु तां देवीं विपरीतां प्रयोजयेत्॥ कार्या व्याहृतयश्चात्र विपरीताक्षरास्तथा। विपरीताक्षरं कार्यं शिरश्च मनुजेश्वर॥ आदौ शिरः प्रयोक्तव्यं प्रणवान्ते च यादव। स्वाहास्थाने च फट्कारं साध्यनामसमन्वितम्। गायत्रीं चिन्तयेच्चात्र दीप्तानलसमप्रभाम् ··· अभिचारे च होतव्या राजिका विषमिश्रिताः॥ स्वरक्तमिश्रं होतव्यं कटु तैलमथापि वा। अल्पापराधे न कर्तव्यमभिचारं तथैव तु॥ महापराधं बलिनं देवब्राह्मणकण्टकम्। अभिचारेण यो हन्याच्च स दोषेण लिप्यते॥ verses 55–63.

sādhaka, the worshipper) imparted to the sādhaka by the qualified guru at the time of dīkṣā (initiation). They are not efficacious if merely learnt by reading books. A mantra according to Tāntrik works is the sound body of Śakti charged with the vibrations of the spiritual personality of the original Tāntrika seer of the *mantra* and endowed with a perpetual store of power by the Tāntrik seer. What is needed to awaken Power in the disciple and to reap the full effect of the mantra is the touch of the *guru*, the imagination and concentrated will power of the sādhaka. The deity willed that certain letters uttered by the seer should as sound or sounds convey such and such a meaning and should have a certain potency. The sounds represented by the letters are forms of Śivaśakti i.e. *Śabdabrahma*. From this last the whole world proceeds in the form of sounds (śabda) and the objects (*artha*) which sounds or words denote. The Devatā, the mantra and the guru are the essentials of *sādhanā* (procedure that leads on to Siddhi, laid down in Tāntrik works); the disciple has to revolve in his mind that the three are non-different. Mantra is not the same thing as a prayer. For a prayer a person may employ any words that he may choose, but in the case of a mantra definite letters are considered necessary, which are deemed to be the forms in which Śakti manifests Herself to the worshipper. A mantra may be in the form of words that have an obvious meaning or in the form of letters arranged in a particular order and that have no meaning to the uninitiated. It is recognised in some of the works on this śāstra that thought has creative power, that each person is Śiva, and can attain to higher and higher spiritual levels depending upon his ability to realise himself as Śiva. Thoughts are real, kind thoughts will do good to ourselves and to those around us, evil thoughts and wishes of others may cause us suffering.

Tāntrik works have their own mantras and they also employ Vedic mantras. For example, the mantra 'Jātavedase sunavāma' (Ṛg. I. 99. 1), though addressed to Agni, is employed in later works for invoking Durgā, the mantra 'Tryambakam yajāmahe' (Ṛg. VII. 59. 12) is addressed to Rudra, but is called Mṛtyuñjaya-mantra or mṛtasañjīvinī mantra in Tāntrik works and is prescribed for purifying the mind (*cittaśuddhi*) in the Mahānirvāṇa (VIII. 243). Similarly, the Gāyatrī mantra (Ṛg. III. 62. 10) is employed by the Tāntrikas. Vide Śāradātilaka XXI. 1–8 and 16 (latter for *dhyāna* of Gāyatrī) and Prapañcasāra, which

devotes the whole chapter 30 to the explanation of *om*, the *vyāhṛtis* and the words of the Gāyatrī and Gāyatrī-sādhana). The Mahānirvāṇa prescribes the performance of Vaidikī *sandhyā* to be followed by the Tāntrikī *sandhyā*. The Tāntrikī Gāyatrī is 'Ādyāyai vidmahe Parameśvaryai dhīmahi | tan-naḥ Kālī pracodayāt ||' (Mahānirvāṇa V. 62–63). Even Śūdra Tāntrikas were to recite this last, while the three higher classes were to repeat the vedic Gāyatrī employing *om*, *śrīm* and *aim* before it respectively. The importance of guru, mantra and devatā is emphatically brought out in the following verse 'the person, who considers guru as a mere mortal, a mantra as mere letters and images (of deities) as mere stones falls into Hell.'[1784] The Rudrayāmala says 'If Śiva is angered, Guru can save (the pupil), but if Guru is angered, no one can save (the pupil)'.

The Paraśurāmakalpasūtra, Jñānārṇavatantra, the Śāradātilaka and almost all Tāntrika works say that mantras possess wonderful and inconceivable powers,[1785] that a follower of Tantra secures all powers by following the practices of the school of his guru traditionally handed down and by faith, that mantras are the means of securing the fruits desired, that the authoritativeness of Tantraśāstra depends mainly on the faith of the followers of the śāstra; that the sādhaka should come to feel that guru, mantra, the deity, his own soul, mind and life-breaths are all one and then he will possess the knowledge of the Highest Self. Some ot the Tāntrik works contain most exaggerated praises of mantras, particularly the śrīvidyāmantra of sixteen letters; e. g. Jñānārṇava says 'Even crores of Vājapeyas and thousands of Aśvamedhas are not equal (in merit) to even the utterance of Śrīvidyā and so also gifts of crores of Kapilā cows cannot be compared to one utterance of *Śrīvidyā* (24th

1784. गुरौ मनुष्यबुद्धिं च मन्त्रे चाक्षरबुद्धिकम्। प्रतिमासु शिलाबुद्धिं कुर्वाणो नरकं व्रजेत्॥ कुलार्णव XII. 45, कौलावलीनिर्णय X. 12–13; रुद्रयामल (II. 65) says 'गुरुः पिता गुरुर्माता गुरुर्देवो गुरुर्गतिः। शिवे रुष्टे गुरुस्त्राता गुरौ रुष्टे न कश्चन॥' This verse occurs in कुलार्णव 12. 49 (reads गुरुर्देवो महेश्वरः).

1785. मन्त्राणामचिन्त्यशक्तिता। संप्रदायविश्वासाभ्यां सर्वसिद्धिः। विश्वासमूर्यिष्ठं प्रामाण्यम्। गुरुमन्त्रदेवतात्ममनःपवनानामैक्यनिष्कालनादन्तरात्मविप्तिः। परशुरामकल्पसूत्र I. 7–11; अकारादिक्षकारान्ता मातृका पीठरूपिणी। ··· ककारादिक्षकारान्ता वर्णास्तु शिवरूपिणः। पञ्चाशद्वर्णरूपेण शब्दाख्यं वस्तु सुव्रते। ··· ज्ञानार्णवतन्त्र I. p. 1; मातृकावर्णभेदेभ्यः सर्वे मन्त्राः प्रजज्ञिरे। मन्त्रविद्याविभागेन त्रिविधा मन्त्रजातयः॥ ··· पुंमन्त्रा हुंफडन्ताः स्युर्ढ्रीं ढान्ताश्च स्त्रियो मताः। नपुंसका नमोन्ताः स्युरित्युक्ता मनवस्त्रिधा॥ शारदा० II. 57 and 59. Vide p. 118 note 305 where the verse 'चिन्मयस्य &c' is quoted; राघवभट्ट quotes it on शारदा० II. 59.

paṭala, verses 74-76). Vide Agnipurāṇa 125. 51-55 for mantras employed in killing an enemy, chapters 134 and 135 for Trailokyavijayavidyā and Saṅgrāmavijayavidyā respectively.

Numberless mantras are contained in the Tantras made from different arrangements of the constituent parts of a mantra. The Mahānirvāṇa first gives a mantra of ten syllables as noted below and then by different arrangements of the letters and by addition of certain other syllables and words like 'Kālike' it forms twelve mantras, remarks that there are crores of mantras and that the mantras contained in all Tantras are all mantras of the Great[1786] Devī.

The word *mantra* is explained as derived from 'man' to think and 'trai' or 'trā'. Yāska's Nirukta (VII. 12) derives it simply from 'man'. The Kulārṇava says 'mantra' is so called since it saves from all dangers, as the *sādhaka* thereby is led to ponder over God of immeasurable refulgence that is the only principle (in the world)'. A similar derivation is given by Rāmapūrvatāpanīya Upaniṣad, by the Prapañcasāra and other Tantras.[1787] Numerous varieties of mantras called Kavaca, Hṛdaya, Upahṛdaya, Netra, Astra, Rakṣā and so forth are specified in the Tāntrik texts, one or two of which may be illustrated in the note below and the rest are passed over for reasons of space.[1788]

1786. The mantra of ten syllables in महानिर्वाण० V. 10-13 is क्रीं क्रीं क्रीं परमेश्वरि स्वाहा. Then it proceeds: 'तव मन्त्रा ह्यसंख्याताः कोटिकोट्यर्बुदास्तथा। ... येषु येषु च तन्त्रेषु ये ये मन्त्राः प्रकीर्तिताः। ते सर्वे तव मन्त्राः स्युस्त्वमाद्या प्रकृतिर्यतः॥ महानिर्वाण० V. 18-19.

1787. क्रियाकर्मैक्यकर्तृणामर्थी मन्त्रो वदत्यथ। मननात् प्राणनान्मन्त्रः सर्वबाध्यस्य वाचकः॥ रामपूर्वतापिनीय-उप. I. 12; ददाति दिव्यभावं क्षिणुयाद्दुरितान्यतो भवेद्दीक्षा। मननात्तत्त्वपदस्य त्रायत इति मन्त्रमुच्यते भयतः॥ प्रपञ्चसार V. 2; मननात्तत्त्वरूपस्य देवस्यामिततेजसः। त्रायते सर्वभयतस्तस्मान्मन्त्र इतीरितः॥ कुलार्णव 17. 54.

1788. The ब्रह्माण्डपुराण III. 33 provides for a मन्त्र of ten syllables, 'गोपीजनवल्लभाय स्वाहा' together with ऋषि, छन्दस्, देवता and विनियोग 'गोपीजनपदस्यान्ते वल्लभाय समुच्चरेत्। स्वाहान्तोयं महामन्त्रो दशार्णो मुक्तिमुक्तिदः॥ सदाशिवस्तस्य ऋषिः पङ्क्तिश्छन्द उदाहृतम्। देवता कृष्ण उद्दितो विनियोगोऽखिलाप्तये॥' verses 3-4. Then the कवच called त्रैलोक्यविजय is described in verses 5-27 beginning with त्रैलोक्यविजयस्याथ कवचस्य प्रजापतिः। ऋषिश्छन्दश्च जगती देवो राजेश्वरः स्वयम्। त्रैलोक्यविजयप्राप्तौ विनियोगः प्रकीर्तितः। प्रणवो मे शिरः पातु श्रीकृष्णाय नमः सदा। पायात्कपालं कृष्णाय स्वाहेति सततं मम॥ कृष्णेति पातु नेत्रे मे कृष्ण स्वाहेति तारकाम्।... क्लीं कृष्णाय नमः कर्णौ पातु कल्पतरुर्मम। श्रीं कृष्णाय नमः पातु नित्यं मेऽधरयुग्मकम्॥ ... इति ते कथितं भूप सर्वाघौघविनाशनम्। त्रैलोक्यविजयं नाम कवचं परमेशितुः। &c. For a comparatively modern कवच of आद्या कालिका, vide महानिर्वाणतन्त्र VII. 56-65, and नारदपु० II. 56. 48-50 for a कवचमन्त्र beginning with पूर्वे मां पातु गोविन्दो ... भूतले पातु वाराहस्तथोर्ध्वे च त्रिविक्रमः॥ (in four दिशाs, 4 कोणदिशाs, पाताल and ऊर्ध्व with different names of विष्णु).

The Śāradātilaka divides mantras into male, female and neuter; masculine mantras end in 'hum' and 'phaṭ', female mantras in 'svāhā' and neuter mantras end with 'namaḥ'. This is stretched further so as to apply to letters viz. the vowels ṛ ṝ, ḷ ḹ are said to be neither and the rest are said to be not neuter but only short and long (Śāradātilaka, VI. 3 and Rāghavabhaṭṭa thereon). Śāradātilaka (from chap. VII to XXIII) is devoted to mantras of Sarasvatī, Lakṣmī, Bhuvaneśvarī, Tvaritā and others, Durgā,[1789] Tripurā, Gaṇapati, Candramas. Many of the mantras are to be repeated thousands of times or *lakhs* of times in order to secure full effect. For example, in X. 105–107 the Śāradātilaka prescribes that a certain mantra should be repeated five lakhs of times and then fifty thousand āhutis of ghee should be made and worship of the Devī with the procedure prescribed should be performed. The worshipper then secures whatever he may desire and can make kings sub-servient to his will. Another noticeable feature is that the mantras are treated like the mantras of the Veda and mention is made in the manner of the Anukramaṇīs of the sage, the metre, the deity and the viniyoga (or purpose for which it is to be used or employed). Though the Śāradātilaka is a sober work free from the sexual practices of Vāmamārga, still it does contain mantras for magical purposes such as bringing women under control (IX. 103–104, X. 76),[1790] bringing about the paralysing or the death of an enemy by mantras (XI. 60–124, XXI. 95 XXII. 1 ff).

The Buddhist Tantras did not lag behind the Hindu Tantras in the matter of the potency of mantras. The Sādhanamālā[1791]

1789. The दुर्गागन्त्र is 'ओं ह्रीं दुं दुर्गायै नमः' (शारदा० XI 1-2) and then the work proceeds ऋषिश्च नारदश्छन्दो गायत्रं देवता मनोः। दुर्गा समीरिता सद्भिर्दुरितापविवारिणी॥ (XI. 3); दुरितापविवारिणी refers to the विनियोग; about the monosyllabic mantra 'śrīm' these are set out as follows; बीजमेतच्छ्रियः प्रोक्तं चिन्तामणिरिवापरः। ऋषिर्भृगुर्निचृच्छन्दो देवता श्रीः समीरिता॥ शारदा० VIII. 2-3.

1790. मूलमन्त्रं जपेन्मन्त्री नित्यमष्टसहस्रकम्। सप्ताहाद्वाञ्छितां नारीमाहरेत्स्मरविह्वलाम्। शारदा० IX. 103–104; सिद्धं मन्त्रं जपेन्मन्त्री सहस्रं शयनस्थितः। यां विचिन्त्य स्त्रियं रात्रौ सा समायाति तत्क्षणात्। *ibid.* X. 76. मूलमन्त्र would be ह्रीं श्रीं क्रीं.

1791. किमस्त्यसाध्यं मन्त्राणां योजितानां यथाविधि। साधनमाला p. 575; ओं आः ह्रीं हुं हूँ हः अयं मन्त्रराजो बुद्धत्वं ददाति किं पुनरन्याः सिद्धयः। *ibid.* p. 270; यातु किं बहु वचनीयं परमतिदुर्लभं बुद्धत्वमपि तेषां पाणितलावलीनबदरकफलमिवावतिष्ठति। *ibid.* p. 62, ओम् चलचल चिलिचिलि चुलुचुलु कुलकुलु हुलुहुलु हुंहुंहुंहुं फट्फट्फट्फट् पद्महस्ते स्वाहा दिने दिने पञ्चवारान् त्रिसन्ध्यमुच्चारयेत्। गर्दभोपि ग्रन्थशतत्रयं गृह्णाति। *ibid* p. 87; the

(*Continued on next page*)

asserts that there is nothing that cannot be accomplished by mantras if proper procedure is followed. For example, it says that a certain mantra that is a prince among mantras confers Buddhahood, what need is there to say about othere siddhis, that by another mantra even Buddhahood which is extremely difficult to attain is like a jujube fruit placed on the palm of the hand and that a certain mantra (of unmeaning words) if repeated five times at three periods in the day viz. the morning, noon and evening, makes even a fool (lit. an ass) master of three hundred works. The Buddhist Tantras also prescribe repetition of mantras for a lakh[1792] of times (vide Sādhanamālā, vol I, No. 165

(Continued from last page)

सद्धर्मपुण्डरीकसूत्र chap. 21 (B. I. series ed. by Dr. Nalinaksha Dutt, 1952) contains several धारणीs (Talismanic sentences), one of which may be cited here (p. 267) 'अथ खलु बोधिसत्त्वो ... इमानि धारणीमन्त्रपदानि भाषते स्म। तद्यथा। ग्रले महाग्रले उक्के तुक्के मुक्के अडे अडाविति कृत्ये ... इट्टिनि विट्टिनि ... कृत्यावति स्वाहा'.

1792. ओं मणितारे हुं। लक्षजापेनार्या अग्रत उपतिष्ठति। यदिच्छति तत्सर्वं ददाति। विना मण्डलकरणानोपवासेन केवलं जापमात्रेण सिध्यति सर्वं कार्यं च साधयति। साधनमाला vol. I. p. 221. आर्या here means Goddess Tārā. The most famous mantra among Buddhists is 'Om Maṇipadme hūm' where 'maṇipadme' is vocative (and probably refers to Tārā deity, who has a jewel lotus). Vide Dr. F. W. Thomas in JRAS for 1906 p. 464. It is often rendered as 'Hail, the jewel lotus'. While these pages were passing through the press the present author received a work called 'Foundations of Tibetan mysticism' according to the Esoteric Teachings of the Great Mantra 'Om Maṇi Padme Hūṁ' by Lama Anagarika Govinda (pub. by Rider and Co. London, 1959). It is impossible to deal with this work in this note. He states that the Mantra 'Om' &c. is dedicated to Avalokiteśvara (a fine photographic plate of whom occurs as the Frontispiece). None who is not a confirmed Tibetan Buddhist scholar or monk will accept his interpretations of the words of the mantra. On p. 27 he states that the mantra is pronounced in Tibet as 'Oṁ Maṇi Pémé Hūṁ' and that the complete formula is 'Oṁ... Hūṁ, Hrīḥ' (p. 230); on pp. 84 ff. he scouts the idea that tāntrism is a Hinduistic reaction taken over by later Buddhist schools. He offers different esoteric meanings of the words of the mantra, e. g. on p. 130 he says 'oṁ is the ascent towards universality, Hūm is the descent of the states of universality into the depth of the human heart'; on p. 131 'Oṁ is the infinite, but Hūṁ is the infinite in the finite, the eternal in the temporal' &c.; on p. 230 'In the Oṁ, we experience the *Dharmakāya* and the mystery of the universal body, in 'maṇi' the *Sambhogakāya*, in the Padma we experience the Nirmāṇakāya, in the Hūṁ we experience the *Vajrakāya* as synthesis of the transcendental body of the three mysteries; in the Hriḥ, we dedicate the totality of our transformed personality to the service of Amitābha; on p. 256 'thus Oṁ...Hūṁ embodies the happy tidings of liberation, of the love towarde all living beings and of the way that leads to final realization.' The present author is constrained to say that by similar arbitrary interpretations the words of any mantra may be made to yield similar senses.

p. 336 and No. 108. p. 221). Some of the mantras embody the doctrines of Mahāyāna with the addition of syllables like om, phaṭ, svāhā (such as 'om śūnyatā-jñānavajrasvabhāvātmakoham' in Sādhanamālā vol. I. p. 62). The Prapañcasāra, which is ascribed to the great advaita teacher Śaṅkarācārya and on which Padmapāda is said to have written a commentary (both published by A. Avalon in Tāntrik Texts, vol. XVIII–XIX, 1935), contains a mantra called Trailokya-mohana for the purpose[1793] of the six cruel magic rites and (in 34. 33) describes a *yantra* (diagram) by worship of which a sādhaka can make a woman smitten with passion for him and draw her to him. This, among other matters such as ungrammatical forms, raises grave doubts as to whether the work was really composed by the first Śaṅkarācārya. It may, however, be stated that the learned Rāghavabhaṭṭa in many places in his commentary on the Śāradātilaka (such as I. 7, 8, 12) quotes the Prapañcasāra (I. 42, 44) as the great ācārya's work and several later writers do the same. It has to be borne in mind, however, that about 400 works are ascribed to the great advaita Ācārya and that Rāghavabhaṭṭa was separated by at least seven centuries from the great Ācārya and his ascription therefore cannot be accepted with implicit faith without more evidence.

Several Purāṇas are affected by the theory about the power of mantras of the Tāntrika type. The Garuḍa-purāṇa (I. chap. 7 and 10) employs many monosyllabic unmeaning mantras like hrām, kṣaum, hrīm, hum, huḥ, śrīm, hrīm and says (I. 23) that 'om Khakholkāya Sūryamūrtaye namaḥ' is the mūlamantra of the Sun and this mantra is employed for sun-worship in an early digest like the Kṛtyakalpataru on vrata (p. 9 note). The Bhaviṣya-purāṇa (Brāhmaparva 215. 4) gives 'Khakholkāya namaḥ' as the mūlamantra in Sun worship. The Bhaviṣya (Brāhma. 29. 9-15) provides that 'gam svāhā' is the mūlamantra of Gaṇapati worship, cites the mantras for *hṛdaya*, śikhā, kavaca &c. and a Gāyatrī suited to Gaṇapati.[1794] Garuḍa I. 38 contains a long prose mantra of Cāmuṇḍā. The Agni-

1793. मारणोच्चाटनद्वेषस्तम्भाकर्षणकांक्षिणः। भजेयुः सर्वथैवेनं मन्त्रं त्रैलोक्यमोहनम्॥ प्रपञ्चसार XXIII. 5. Vide शक्तिसङ्गमतन्त्र VIII. 102–105 and जयाख्यसंहिता 26th पटल, verse 24 for the same. Agni-purāṇa Chap. 138 deals with the six cruel acts.

1794. गं स्वाहा मूलमन्त्रोयं प्रणवेन समन्वितः। गां नमो हृदयं सेयं गीं शिरः परिकीर्तितम्। शिखां च गूं नमो ज्ञेयं गैं नमः कवचं स्मृतम्। गौं नमो नेत्रमुद्दिष्टं गः फट् कामास्त्रमुच्यते। भविष्य (ब्राह्म 29. 9 ff). The गायत्री is महाकर्णाय विद्महे वक्रतुण्डाय धीमहि। तन्नो दन्तिः प्रचोदयात्॥ (*ibid.* 29. 15).

purāṇa also contains many mantras of the Tāntrik type. Chap. 121 verses 15–17 provide[1795] for a mantra whereby enemeis are brought under control (as noted below) and verses 17–19 speak of a mantra for paralysing (*stambhana*) of an enemy. Chap. 133–135 of the Agni contain several mantras of the Tāntrik type. Chapter 307 contains several mantras of bringing under control the three worlds.

A mantra called Mahāśvetā is spoken of in the Bhaviṣya-purāṇa which is mentioned in the Kṛtyakalpataru on vrata (p. 9) and in Ekādaśītattva p. 40 and it is 'hrām hrīm saḥ' and the japa of that mantra on Sunday with fast is said to yield what one desires.[1796]

The later medieval digests on Dharmaśāstra adopt the Prāṇapratiṣṭhā-mantra evolved by the Śāradātilaka (XXIII. 71–76). The Devapratiṣṭhā tattva[1797] (pp. 506–507) quotes these verses from Śāradātilaka, sets out the mantra and explains the verses at length. The Divyatattva also (pp. 609–610) does the same. The Vyavahāramayūkha (p. 86) sets out the same mantra for the consecration of the image of Dharma in the ordeal of Dharma without expressly naming the Śāradātilaka. The Nirṇayasindhu (pp. 349–350) has an elaborate rite of the Prāṇapratiṣṭhā of images full of Tāntrik elements like the words vaṣaṭ, hrīm, and phaṭ and employs the same procedure as the one prescribed by the Śāradātilaka without expressly mentioning the latter. The Śāradātilaka appears to follow earlier works like the Jayākhyasaṁhitā (Paṭala XX) and Prapañcasāra-tantra (35. 1–9 ff).

1795. पार्थिवे चाष्टवर्णीकारं मध्ये नाम च विन्यसेत् ॥ ह्रीं पुटं पार्थिवे विन्यसेत् ह्रीं विन्यसेत् लिखेद्बहून्। गोरोचनाकुङ्कुमेन भूर्जे वस्त्रे गले धृतम् ॥ शत्रवो वशमायान्ति मन्त्रेणानेन निश्चितम्। अग्नि. 121. 15–17.

1796. उपवासं च ये कुर्युरादित्यस्य दिने तथा। जपन्ति च महाश्वेतां ते लभन्ते यथेप्सितम् ॥ महाश्वेतामन्त्रस्त्वागमे। ह्रामित्युक्त्वा ततो ह्रीं तु सकारश्च विसर्गवान्। महाश्वेताख्य-मन्त्रोयं भानोरष्टाक्षर ईरितः ॥ ए. त. p. 40. The verse उपवासं च is quoted by हे. on व्रत vol. II. part 2 p. 520.

1797. तेनायं मन्त्रः। आ ह्रीं क्रों यं रं लं शं षं सं हों हंसः अमुष्य प्राणा इह प्राणाः। अमुष्य जीव इह स्थितः। अमुष्य सर्वेन्द्रियाणि। अमुष्य वाङ्मनश्चक्षुःश्रोत्रघ्राणप्राणा इहागत्य सुखं चिरं तिष्ठन्तु स्वाहा। देवप्रतिष्ठातत्त्व pp. 506–507. अमुष्य refers to the name of the divinity whose image is to be established. If it is a Goddess then the words अमुष्याः or अस्यै are to be substituted. The तन्त्रराजतन्त्र (XIII. 62–68) sets out the प्राणप्रतिष्ठाविद्या of 40 letters from अमुष्य to स्वाहा in the technical language of Tāntrik works.

Reasons of space preclude further illustrations of the use of Tāntrik mantras by medieval digests on Dharmaśāstra. One matter of contrast between Vedic mantras and some Tāntrik mantras may be noticed. A Vedic mantra, according to Jaimini (I 2. 32), was significant, but the Tantras go so far as to teach the repetition of mantras that have no meaning or that contain the letters of the mantra in reversed form. For example, the Kālīvilāsatantra (XXII. 21) says that the reverse of the three letters of the mantra 'om Durge', as 'rgedu om' yields all desires ('rgedu om tryakṣaram mantram sarvakāmaphalapradam)'. The Sad-dharmapuṇḍarīka[1798] (a standard work of Mahāyāna Buddhism) chap. 21 (text edited by Kern and Bunyiu Nanjiu, 1912 and translated in S. B. E. vol. XXI, pp. 370–375) contains spells (called Dhāraṇīpadāni). It should not be supposed that spells were peculiar to Hindus or Buddhists. Many ancient peoples believed that words and letters have magic power and that belief led on to another belief that it did not matter even if the letters and words had no sense. E. J. Thomas in 'History of Buddhist thought' (reprint of 1953) states that spells similar to Hindu and Buddhist types exist in old English, Old High German and Keltic (p. 186).

The repetition of mantras, Vedic as well as Tāntrik, is called 'Puraścaraṇa'[1799] (which literally means 'performing or carrying out before'). The Mahānirvāṇa (VII. 76–85) sets out various modes of puraścaraṇa (brief as well as elaborate). One way is to bring together five *tattvas* on the 14th tithi of a dark fortnight or on a Tuesday or Saturday, then the Devī is to be worshipped and the worshipper is to repeat ten thousand times with single-mindedness the mantra in *mahāniśā* (midnight), then he is to feed persons devoted to *brahman* and becomes one who has carried out puraścaraṇa. Another way is that he should repeat every day one thousand times the mantra beginning on a Tuesday up to (including) the next Tuesday, so that by repeating the mantra in all eight thousand times on eight days,

---

1798. A very brief spell from the सद्धर्मपुण्डरीक may be set out here by way of sample: ज्वले महाज्वले उक्के मुक्के अडे अडावति ... स्वाहा। p, 372 of SBE vol. XXI which is quoted above in note 1791. All the words excluding स्वाहा are in the vocative. उक्के, for उल्के, ज्वले for ज्वाले.

1799. Puraścaraṇa of a mantra has several constituent elements viz. dhyāna (meditation on the form of the deity to be worshipped), worship, japa of the mantra, homa, tarpaṇa, abhiṣeka and feeding brāhmaṇas. In a brief puraścaraṇa the first three alone are included. Tarpaṇa means satiating with water the deity and the pitṛs.

he will be deemed to have performed puraścaraṇa. Sometimes, it is prescribed[1800] that a mantra such as 'Śivāya namaḥ' (this is five-lettered mantra) or 'Om Śivāya namaḥ' (a ṣaḍakṣara mantra) should be repeated 24 lakhs of times and the sādhaka should offer into Agni twenty-four thousand *āhutis* of *pāyasa*. Then the mantra becomes perfect and confers on the sādhaka whatever he desires. The Kulārṇava states that Puraścaraṇa is so called because by the five-fold *upāsanā* the deity desired (as if) moves[1801] before the worshipper for conferring on him her favour. A mantra like the Gāyatrī is[1802] to be repeated every day 1008 or 108 or 10 times. This requirement is in keeping with what the Purāṇas and Dharmaśāstra works say. For example, the Nāradapurāṇa (II. 57.54) provides that a mantra is to be repeated 8, 28, or 108 times. The Ekādaśītattva[1802] quotes Devīpurāṇa for the proposition that the offerings in the homa to planets should be 108, 28 or 8 according to one's ability.

Rāghavabhaṭṭa in his commentary on Śāradātilaka (16. 56) has a very exhaustive and learned note on the details of puraścaraṇa that are common to all mantras. According to the Vāyavīya-saṃhitā[1803] the perfecting of the procedure of the mūlamantra is called puraścaraṇa, since it has to be practised before the acts in which it is to be employed. The Kulārṇava[1804] provides that there are at least five constituent elements of puraścaraṇa viz. pūjā (worship of the desired deity) three times a day, japa (muttering of the mantra), *tarpaṇa*, homa, and

1803. वायवीयसंहितायाम् । साधनं मूलमन्त्रस्य पुरश्चरणमुच्यते । पुरतश्चरणीयत्वाद्विनियोगात्क्रियार्थकर्मणाम् । पुरतो विनियोगस्य चरणाद्वा तथोदितम् ॥ राघवभट्ट on शारदा०; and सेतुबन्ध of भास्करराय p. 99 reads पुरतश्चर्यमाणत्वाद्विनियोगाद्धि.

1804. संसारे दुःखभूयिष्ठे यदीच्छेत्सिद्धिमात्मनः । पञ्चाङ्गोपासनेनैव मन्त्रजापी भवेत् सुखम् । पूजा त्रैकालिकी नित्यं जपस्तर्पणमेव च । होमो ब्राह्मणभुक्तिश्च पुरश्चरणमुच्यते । यद्यदङ्गं विहीयेत तत्संख्याद्विगुणो जपः । कुर्याद् द्विश्चतुःपञ्चसंख्यां वा साधकः प्रिये । ... सुभोजितेषु विप्रेषु सर्वं हि सफलं भवेत् । सम्यक्सिद्धिकमन्त्रस्य पञ्चाङ्गोपासनेन च । सर्वे मन्त्राश्च सिध्यन्ति त्वत्प्रसादात्कुलेश्वरि । कुलार्णवतन्त्र XV. 7-9 and 11-12 q. by राघवभट्ट.

dinner to brāhmaṇas; that if any one of these cannot be carried out, then he should perform japa of the mantra twice as many times more as the number prescribed for that constituent, that, in the absence of some constituents, by providing a good dinner to brāhmaṇas everything becomes successful and that if one mantra is perfected by performing the five constituents mentioned above, then he secures *siddhi* of all mantras. Rāghavabhaṭṭa suggests another way of puraścaraṇa viz. one should be pure,[1805] observe a fast and then in an eclipse of the sun or moon should stand in the navel-deep water of a river directly falling into the sea, should recite a mantra with concentration of mind from the time the eclipse begins till its end, thereafter perform homa and the rest in order reducing each to 1/10 of the number of japa recitation, then secure the guru's contentment (by gifts) and that by this method mantra becomes perfect and the deity becomes favourable. The Kaulāvalinirṇaya describes (14th *paṭala*, verses 75–260) a terrible sādhanā whereby in a single night a sādhaka secures mantra-siddhi viz. by going to a cemetery or other lonely spot after one watch of the night, securing the corpse of a cāṇḍāla, or of one who is killed by some one with a sword or one bitten by a snake or a young handsome warrior dying in a battle (not killed by himself), he should wash the corpse, offer worship to it and to Durgā and repeat the mantra ('om Durge Durge rakṣaṇī svāhā'). If he is not frightened by the terrific sights that he may see and after following a very long procedure he secures *mantrasiddhi*. The Tārābhaktisudhārṇava (*taraṅga* IX pp 345 ff) describes the 'śavasādhana-vidhi' and so does the Kulacūḍāmaṇi-tantra (Tāntrik texts, vol. IV.) VI. 19–28.

Rāghavabhaṭṭa further quotes a passage[1806] to the effect that if the sādhaka satisfies his guru who is a form of the deity

1805. अथवान्यप्रकारेण पुरश्चरणमुच्यते। ग्रहणेऽर्कस्य चेन्दोर्वा शुचिः पूर्वमुपोषितः। नद्यां सप्तमृगाम्भस्यां नाभिमात्रेऽम्भसि स्थितः। ग्रहणादि तु मोक्षान्तं जपेन्मन्त्रं समाहितः। अनन्तरं तद्दशांशक्रमाद्धोमादिकं चरेत्। तदन्ते मन्त्रसिद्ध्यर्थं गुरुं संपूज्य तोषयेत्। ततश्च मन्त्रसिद्धिः स्यात् देवता च प्रसीदति। q. by राघवभट्ट on शारदा॰ 16 56 and by स्मृति कौस्तुभ (pp. 73–74); vide ध. क्रि. कौ. pp. 109–110 where these verses (with slight variations) are quoted from आगम. Vide शक्तिसङ्गमतन्त्र (ताराखण्ड) 17. 40–45, some portion of which is 'चन्द्रग्रहे पुरश्चर्या सर्वसिद्धिकरी मता। यथादृष्टं विधीयेत तत्साङ्गे द्विजभोजनम्। दशांशं हवनं कुर्यात्तर्पणं तद्दशांशतः। मार्जनं तद्दशांशेन तद्दशांशेनाभिषेचनम्। यथादृष्टं विधीयेत तत्संख्याद्विगुणो जपः।'

1806. अथवा देवतारूपं गुरुं भक्त्या प्रतोषयेत्। पुरश्चरणहीनेपि मन्त्रः सिध्येन्न संशयः॥ ... पुरस्क्रिया तु मन्त्राणां प्रधानं बीजमुच्यते। येषां जपे च होमे च संख्या नोक्ता मनीषिभिः।

(*Continued on next page*)

worshipped, he would secure perfection of mantra even without puraścaraṇa, that puraścaraṇa is the main seed (cause) of (the perfection of) mantras, that where the number of times a mantra is to be recited is not expressly stated, it should be repeated 8000 times. Rāghavabhaṭṭa quotes a verse saying that just as a man in the grip of diseases is incapable of performing all actions a mantra devoid of puraścaraṇa is declared to be in a similar condition.

The Agnipurāṇa, Kulārṇava and Śāradātilaka lay down rules about the places where puraścaraṇa of a mantra is to be practised. The following places are commended[1807] for those who are engaged in perfecting a mantra, viz. holy places, river bank, caves, mountain top, ground near a *tīrtha*, confluence of rivers, holy forests and parks, the root of a *bilva* tree, mountain slopes, temple, seashore, one's own house or any place where the mind (of the sādhaka) feels happy. Rules were also laid down as to the food on which the sādhaka was to subsist during the days of puraścaraṇa viz. food[1808] obtained by begging for alms (for *brahmacārin* and *yati*), *haviṣya* food (prescribed for vratas), allowed vegetables, fruits, milk, bulbous roots, barley meal. The Mantramahodadhi (25. 66–71) sets out what is haviṣya food in śānti and proper food in the other cruel rites. Rāghavabhaṭṭa (on 16. 56) adds many rules from other sources, such as the sādhaka performing puraścaraṇa should avoid sexual intercourse, flesh, wine, should not speak with women and śūdras, nor speak untruth, nor pamper his senses, should carry on the *japa* from morning till noon, should not allow a break, should repeat the mantra the same number of times every day.

तेषामष्ट सहस्राणि संख्योक्ता जपहोमयोः। राघवभट्ट on शारदा० 16. 56. The verse मुर... मुच्यते occurs in कौलावलीतन्त्र XII. 108 (reads प्रधानं जीव उच्यते). व्याधिग्रस्तो यथा देही सर्वकर्मसु न क्षमः। पुरश्चरणहीनोयं तथा मन्त्रोऽपि कीर्तितः। राघव० on शारदा० 16. 56. This mantra is q. by नित्याचारपद्धति of विद्याकर p. 454 (but reads जीवहीनो यथा०). साधकः साधयेन्मन्त्रं देवतायतनादिके। शुद्धभूमौ गृहे भार्च्य मण्डले हरिमीश्वरम्। अग्निपु. 29. 1.

1807. पुण्यक्षेत्रं नदीतीरं गुहा पर्वतमस्तकम्। तीर्थप्रदेशाः सिन्धूनां सङ्गमः पावनं वनम्। उद्यानानि विविक्तानि बिल्वमूलं तटं गिरेः। देवतायतनं कूलं समुद्रस्य निजं गृहम्। साधनेषु प्रशस्तानि स्थानान्येतानि मन्त्रिणाम्। अथवा निवसेत्तत्र यत्र चित्तं प्रसीदति॥ कुलार्णव XV. 22–24, शारदा० II. 138–140 (except the last half verse); vide अहिर्बुध्न्यसंहिता 20. 52–53 for similar provisions.

1808. मैदयं हविष्यं शाकानि विहितानि फलं पयः। मूलं सक्तुर्यवोत्पन्नो भक्ष्याण्येतानि मन्त्रिणाम्। शारदा० II. 140–141; for हविष्य, vide H. of Dh. vol. IV. p. 149 note 343.

The Jayākhya-saṁhitā (19th paṭala, verses 13–33) says that, for three years after the sādhaka begins puraścaraṇa of the mantra chosen, various obstacles and disturbances present themselves but if his mind and action are not affected by them, then from the 4th year he comes to be served by disciples that surrender everything to him, that after seven years even proud kings approach him for favour, after the 9th year he notices many wondrous things such as joy, sound dreams, sweet music and fragrance,[1809] hears loud vedic recitation, he eats and sleeps little (yet does not become lean), that these are signs of his having reached perfection in the mantra. The same work provides that such signs he should not divulge to any one but his own guru and if he divulges those happy signs to others siddhis run away from him (19. 34–37). The same Saṁhitā (15. 186–188) provides that the syllables svāhā, svādhā, phaṭ, hum and namaḥ are to be respectively employed in homa, in rites for *manes*, destructive activities, creating hatred among friends and for securing *mokṣa*. All tāntrik works emphasize that mantra must be received from a qualified guru and the *sādhanā* of the mantra must be done under the guidance of the guru till the disciple himself becomes a *siddha*. As shown above it was believed that mantras would confer the highest spiritual and supernormal powers, would bring to the sādhaka all desired objects and mokṣa. The Kulārṇava states[1810] 'It it declared in the doctrine taught by Śiva that without dīkṣā there would be no mokṣa, that dīkṣā cannot be had without an *ācārya* (guru) and that mantras would yield no fruit unless a guru instructs (a disciple) about them'.

1809. The Yogasūtra III. 36 and bhāṣya thereon state that some of the powers developed are that the yoga expert hears divine music and receives the impression of fragrant scents. In 'Bengal Lancer' F. Yeats—Brown (London, 1930) narrates (pp. 246–247) how he had the experience that the room in which he and his American friends were sitting was filled by a yogic teacher who wore nothing but his *dhoti* with the perfume of *attar* of roses, then with the scent of violets, musk, sandalwood, with nothing else with him except cotton wool on which he focussed a magnifying glass. The Śv. Up. II. 13 details the first signs of the effectiveness of yoga practices 'लघुत्वमारोग्यमलोलुपत्वं वर्णप्रसादः स्वरसौष्ठवं च। गन्धः शुभो मूत्रपुरीषमल्पं योगप्रवृत्तिं प्रथमां वदन्ति॥'.

1810. विना दीक्षां न मोक्षः स्यात्प्रोक्तं शिवशासने। सा च न स्याद्विनाचार्यमित्याचार्य-परम्परा॥ ... अन्तरेणोपदेष्टारं मन्त्राः स्युर्निष्फला यतः। कुलार्णव XIV. 3–4.

It was further provided[1811] that there was no siddhi (miraculous powers due to mantras) nor mokṣa for him who had not had dīkṣa performed for him, that therefore a man should by all means receive dīkṣā from a guru and that when one is endowed with the ceremony of dīkṣā the distinctions based on caste vanish and a śūdra and a brāhmaṇa cease to be so (when both have undergone dīkṣā). It was held that, if a person were to engage in the japa of a mantra written in a book, he would not secure siddhi and he would surely meet losses at every[1812] step.

In the Mahānirvāṇa (II. 14–15 and 20) it is said that Vedic mantras yielded desired results in Satya and other yugas, but in Kaliyuga they are like serpents without poison or like dead ones, that in the Kaliyuga the mantras declared in tantra works yield fruits quickly and are commended for employment in all actions such as *japa* and sacrifices. There is no such path as the one propounded in Tantras that would lead to mokṣa or to happiness in this world and the next. The Mahānirvāṇa prescribes that 'om sac-cid-ekam brahma' is the best of mantras (III. 14), that those who perform the upāsanā of the highest *brahma* are in need of no other sādhanā and that by the mere perfection of that mantra the individual soul merges in *brahma*.[1813] So *Mokṣa* was one of the aims. Another aim was the attainment of miraculous or supernormal powers. The Prapañcasāra enumerates[1814] the eight siddhis and states that one who is endowed with these eight is a liberated soul and is spoken of as a *yogin*. The theory of siddhis is an ancient conception and occurs in the Āpastamba-dharmasūtra.[1815] The eight siddhis are named and

1811. देवि दीक्षाविहीनस्य न सिद्धिर्न च सद्गतिः। तस्मात्सर्वप्रयत्नेन गुरुणा दीक्षितो भवेत्॥ गतं शूद्रस्य शूद्रत्वं विप्रस्यापि च विप्रता। दीक्षासंस्कारसम्पन्ने जातिभेदो न विद्यते॥ कुलार्णव XIV. 97 and 91.

1812. पुस्तकाल्लिखितो मन्त्रो येन सुन्दरि जप्यते। न तस्य जायते सिद्धिर्हानिरेव पदे पदे॥ q. by राघवभट्ट on शारदा० IV. 1.

1813. परब्रह्मोपासकानां किमन्यैः साधनान्तरैः। मन्त्रग्रहणमात्रेण देही ब्रह्ममयो भवेत्॥ महानिर्वाण III. 23–24. The मन्त्र is ओं सच्चिदेकं ब्रह्म and it is preceded by ऐं, ह्रीं or श्रीं according as विद्या, माया or श्री is to be worshipped (महानिर्वाण III. 35–37).

1814. अणिमा महिमा च तथा गरिमा लघिमेशिता वशित्वं च। प्राप्तिः प्राकाम्यं चेत्यष्टैश्वर्याणि योगयुक्तस्य॥ अष्टैश्वर्यसमेतो जीवन्मुक्तः प्रवर्तते योगी। प्रपञ्चसार 19. 62–63. For a personal experience of levitation in modern times; vide 'The invisible influence' by Dr. Alexander Cannon (15th impression, 1935) chap. II, pp. 39–41. The कल्पतरु (मोक्षकाण्ड pp. 216–17) quotes a long prose passage from the ancient writer देवल who names and illustrates the eight siddhis or vibhūtis (omits गरिमा and adds यत्रकामावसायित्व).

1815. अथापि सङ्कल्पसिद्धयो भवन्ति। यथा वर्षं प्रजा दानं दूरे दर्शनं मनोजवता यच्चान्यदेवं युक्तम्। आप. ध. सू. II. 9, 23. 6–7.

explained in the Yogasūtrabhāṣya as follows[1816]: Aṇiman (becoming small like an atom, atomization), laghiman (levitation), mahiman (becoming magnified like a mountain or the sky, magnification), prāpti (all objects becoming near to him such as touching the moon with one's fingertip, extension), prākāmya (the non-obstruction of his desire such as diving into the earth underground and coming up as if he were in water), vaśitva (mastery of the five elements and their products such as a jar), Iśitva (sovereignty over the production, absorption or arrangement of elements and their products), yatra-kāmāvasāyitva (the power to determine things according to his wish or will i. e. he may will that poison should have the effect of nectar and brings about that result). A siddha would be one who has secured these eight siddhis. The Gītā (X. 26) says that the sage Kapila is the great one among siddhas ('siddhānām kapilo muniḥ'). The Yogasūtra further speaks of siddhis as fivefold viz. proceeding from birth, from drugs, from mantras, from *tapas* (austerities) and from concentration. There were other objects also sought to be achieved by mantras, such as the six cruel rites and making women to have passion for a man. This shows that not only Tāntrikas, but those who practised yoga believed in the power of mantras to confer supernormal powers on the yogin. The Yogasūtra provides that some of the siddhis (as in III. 37) are obstacles to the attainment of *samādhi* and they are siddhis only to those who have awakened from trance.[1817] Yāj (III. 202–203) provides that the power to disappear, to enter another body and temporarily to abandon one's body, to create at one's will objects-these and other powers are characteristic signs of the attainment of siddhis by Yoga and that when one attains perfection in Yoga one can cast away the mortal coil and be able to become immortal in brahma.

A great deal is said about the six cruel rites in the Tantras such as Prapañcasāra (V), Śāradātilaka (23. 121–145), Śaktisaṅgamatantra (Kālikhaṇḍa VIII. 102–106), Mantramahodadhi (25th Taraṅga). The Śāradātilaka (23. 137–141) deals with the six methods or arrangements of mantra along with the name of the enemy against whom the six rites were to be practised,

1816. विभूतिर्भूतिरैश्वर्यमणिमादिकमष्टधा। अमरकोश; ततोऽणिमादिप्रादुर्भावः कायसम्पद्धर्मानभिघातश्च। योगसूत्र III. 44; जन्मौषधि-मन्त्र-तपःसमाधिजाः सिद्धयः। योगसूत्र IV. 1. The भाष्य explains मन्त्रैराकाशगमनाणिमादिसिद्धिः.

1817. ते समाधावुपसर्गा व्युत्थाने सिद्धयः। योगसूत्र III. 37.

viz. the arrangements called *grathana, vidarbha, sampuṭa, rodhana, yoga* and *pallava*. These are all passed over here. But it appears that even the early Purāṇas were influenced by rites of black magic. For example, the Matsya[1818] says 'in *vidveṣaṇa* (creating enmity among friends or among those who love one another) and in *abhicāra*, a triangular kuṇḍa is recommended and homa should be offered in it by priests that wear red flowers and red sandalwood paste, that wear the sacred thread in the *nivīta* way, that put on red turbans and red garments, the fuel sticks should be smeared with the fresh blood of crows collected in three vessels and should be offered with the left hand holding the bones of a hawk. The priests should have their hair untied on the head and should contemplate the befalling of evil on the enemy; they should recite the mantra 'durmitriyās-tasmai santu' and also the syllables 'hrīm' and 'phāṭ' and having recited over a razor the mantra used in *śyenayāga*, the priest should cut into pieces an effigy of the enemy with that razor and throw into the fire the pieces of the effigy. This rite yields results only here (in this world), but no good results in the next world and therefore one (who engages in this rite) should then perform a śānti. The Matsya also provides for a rite for bringing a person (or a woman) under control or for *uccāṭana* (chap. 93. 139–148). It is possible that the Tāntrikas and the Matsya both developed their magic rites of six kinds from the Śyenayāga mentioned in the Brāhmaṇas and Śrauta-sūtras. The Agnipurāṇa (chap. 138) also deals with those evil rites. The Ahirbudhnya-saṃhitā, though mainly a work of the Pāñcarātra cult, is full of lore on mantras.[1819] In chap. 52 (verses

1818. विद्वेषणेऽभिचारे च त्रिकोणं कुण्डमिष्यते। ... होमं कुर्युस्ततो विप्रा रक्तमाल्यानुलेपनाः। निवीतलोहितोष्णीषा लोहिताम्बरधारिणः। त्रयवायसरक्ताढ्य पात्रत्रयसमन्विताः। समिधो वामहस्तेन श्येनास्थिबलसंयुताः। होतव्या शुक्लकेशैस्तु ध्यायद्भिररिशिवं रिपौ। दुर्मित्रियास्तस्मै सन्तु तथा हुं फडिमीति च। श्येनाभिचारमन्त्रेण क्षुरं समभिमन्त्र्य च। प्रतिरूपं रिपोः कृत्वा क्षुरेण परिकर्तयेत्। रिपुरूपस्य शकलान्यथैवाग्नौ विनिक्षिपेत्। ... इहैव फलदं पुंसामेतज्जामुत्र शोभनम्। तस्माच्छान्तिकमेवात्र कर्तव्यं भूतिमिच्छता॥ मत्स्य 93. 149–155. For 'nivita' way of wearing Yajñopavita, vide H. of Dh. vol. II. pp. 287–289 footnotes 673–674 and 679. In the तै. सं. I. 4. 4. 5 and तै. ब्रा. II. 6. 6. 3 occurs the mantra सुमित्रा न आप ओषधयः सन्तु दुर्मित्रास्तस्मै भूयासुर्योऽस्मान् द्वेष्टि यं च वयं द्विष्मः।' श्येन was the name of an *abhicāra* (magic) rite (vide Jaimini I. 4.5 and Śābara thereon), was a modification of सोमयाग and in the texts about श्येन (viz. श्येनेनाभिचरन् यजेत) occur the words 'लोहितोष्णीषा लोहितवसना निवीता ऋत्विजः प्रचरन्ति' (आप. श्रौ. 22. 4. 13 and 23) q. by शबर on जै. X. 4. 1. Vide षड्विंश-ब्राह्मण III. 8. 2 and 22 for the same passages.

1819. पञ्चरात्रमयी दिव्या सांख्ययोगादिसंमिता। संहितेयं महाभुजा नानातन्त्रमयी परा॥ अहिर्बुध्न्यसं० 59. 70.

2–88) it deals with the linguistic occultism of such mantras as 'om namo Viṣṇave'. It says that mantras have three senses sthūla (gross), sūkṣma (subtle) and highest; chap. 51 explains these three about the Tāra or Tāraka mantra viz. Om.

It may be noted here that the Buddhist Tantras also claimed to show the way to the attainment of various objects, from success in love affairs to liberation and all these could be mostly secured by mantras. The Buddhist Tantra writers of the Vajrayāna school state that there were 84 *siddhas*, whose names are still cherished[1820] and honoured in Nepal and Tibet. The Buddhists mentioned eight siddhis but they were somewhat different from those of the Yogasūtra. The Sādhanamālā mentions them as follows: Khaḍga (a sword over which mantras have been muttered whereby the user of it succeeds in battle), Añjana (collyrium applied to eyes which enables a person to see buried treasure), Pādalepa (ointment applied to the soles of the feet enabling a person to move anywhere undiscovered), Antardhāna (becoming invisible before the very eyes of persons watching him), Rasarasāyana (power of transmitting baser metals into gold or finding out an elixir for immortality), Khecara (being able to fly up in the sky), Bhūcara (going swiftly anywhere on the earth) and Pātālasiddhi (diving underneath the earth[1821]). As the Buddhist monks were to possess no property, they had a craving for wealth and supposed that by means of certain mantras, the lord of wealth (Kubera) would confer on them riches that would last for ever.[1822] They also believed that by mantras they would make

1820. Vide Dr. Bhattacharya's 'Introduction to Buddhist Esoterism' pp. 84, 96 and 126 for references to 84 Siddhapuruṣas and 'Cultural Heritage of India' Vol. IV, pp. 273–279 on 'Cult of the Buddhist Siddhāchāryas' by Prof. P. C. Bagchi at p. 274 for the names of 84 Siddhas according to Tibetan tradition. The tradition of Siddhas continued right down to modern times; vide ABORI, Vol. 19 pp. 49–60 for the account of a brāhmaṇa called 'Śivayogi' of Śṛṅgārapura in the Ratnagiri District, who went from Koṅkaṇa to a siddha at Rāḍhā in Bengal, served him devotedly for a long time, himself became a Siddha, returned to his native place and built a monastery there. The हठयोगप्रदीपिका (I. 5–8) names about thirty Mahāsiddhas from Ādinātha (Śiva), Matsyendranātha, Gorakṣanātha, Allamaprabhu and others.

1821. खड्गाञ्जनपादलेपान्तर्धानरसरसायनखेचरभूचरपातालसिद्धिमुखाः सिद्धीः साधयेत्। साधनमाला No. 172 p. 350.

1822. एवंप्रकारैः सलिलप्रदानैः सन्तुष्टचित्तो द्रविणाधिराजः। ददेद्धनान्यक्षयवृत्ति-भाञ्जि तस्याधशो परलोकेन साधयन्॥ साधनमाला No. 296 p. 580.

some of the Hindu gods their servants, viz. that they would be surrounded by many *apsarases* (heavenly damsels), that Indra would be their umbrella-bearer, Brahmā would be councillor and Hari door-keeper.[1823] They wanted to defeat opponents in public discussions and to acquire proficiency in Śāstras without study through the power of mantras alone (vide Sādhanamālā Nos. 151, 155, 256). They were also anxious to cure and avert diseases and remove snake poison. They thought that by mantras they would attain to omniscience and Buddhahood (vide notes 1791–92).

As stated above (notes 1810–11) a mantra had to be received from a guru after initiation (dīkṣā). Therefore, a few words must be said about dīkṣā. The Tāntrikas did not discover any new concept in dīkṣā. From very ancient Vedic times there was upanayana regarded as the beginning of the spiritual birth of a boy and the sacrificer had to undergo a purificatory ceremony before embarking on the performance of a sacrifice, but both were not so elaborate as the dīkṣā described in some of the Tāntrika works. Vide H. of Dh. vol. II, pp. 1135–1140 for Vedic dīkṣā (in Agniṣṭoma), the observances and references to the Brāhmaṇas and the Śrautasūtras. The Tai. S. (VI. I. 1–3 and VII. 4. 8) refers to dīkṣā and the Ait. Br. (I. 3) mentions the main items in Vedic dīkṣā, such as bath with sacred water on the sacrificer, smearing the face and other parts of the body with butter, applying collyrium to the eyes, purification of the sacrificer's body twice by the *adhvaryu* with three bunches of seven *darbhas* each above the navel and then below it with mantras, entering a pavilion specially prepared for the sacrificer, covering him with a garment that envelopes him as a sack envelopes an embryo, dark antelope skin as an upper garment. The Śat. Br. also refers to the details of dīkṣā and states that thereby the sacrificer becomes one among the gods for the time being (vide III. 1. 2. 10–21, III. 1. 3. 7–28) and for the idea that dīkṣā symbolizes a new birth for the sacrificer. The Atharva-veda says 'Great truth, formidable moral order, vows of initiation, austerities, prayer (or knowledge) and sacrifice support the earth.'[1824]

1823. किं च भगवतो लक्षत्रयजापात् उभयचक्रवर्तिराज्यमाद्युक्षीभवति, अनेकाप्सरोभिः परिवृतः पुरस्कृतो विद्याधरस्थाने महलसुखमनुभवन्नेव तिष्ठति, देवेन्द्रश्छत्रधरो भवति, ब्रह्मा च मन्त्री ... हरिः प्रतिहारः। साधनमाला No. 260 pp. 509–510.

1824. The शतपथ III. 2. 1. 19 and 22 is 'देवान्वा एव उपावर्तते यो दीक्षते स देवतानामेको भवति'; सत्यं बृहद्वृतमुग्रं दीक्षा तपो ब्रह्म यज्ञः पृथिवीं धारयन्ति। अथर्व XII. 1. 1.

Dīkṣā is treated elaborately in some of the Tantras such as Prapañcasāra (V and VI), Kulārṇava (14. 39 ff), Śāradātilaka (4th paṭala), Nityotsava (pp. 4–10), Jñānārṇava (24th paṭala), Viṣṇusaṁhitā (X), Mahānirvāṇa (X. 112–119) and in Liṅgapurāṇa (II. 21). The Nirṇaysāgara Press brought out an edition (in 1935) of a work called Dīkṣāprakāśikā of Viṣṇubhaṭṭa, pupil of Satyānandanātha, composed in śaka 1719 (1797 A. D.). Almost all of them derive[1825] the word from the root 'dā' (to give) and 'kṣi' to destroy, in various ways. The Kulārṇava defines it as 'the good call it dīkṣā because it confers a divine (holy) state and wipes off all sins, thereby freeing a man from the bondage of saṁsāra'; the Śāradātilaka states 'since it confers divine knowledge and destroys sins it is named dīkṣā by the teachers that know the Tantras.'

The Śaktisaṅgama-tantra regards an eclipse of the sun or the moon (particularly of the moon) as the best time for undergoing initiation for a mantra from a guru and remarks that when performed in an eclipse, the week day, *tithi*, *nakṣatra* or month or *Yoga* or *Karaṇa* need not be considered.[1826] The Kālīvilāsatantra states that if one is fortunate enough to secure Svātī nakṣatra and Friday on the 5th tithi of the dark half of Phālguna and undergoes dīkṣā on that date, that yields the rewards of a crore of ordinary dīkṣās (VI. 3–4). The N. S. (p. 67) quotes the Jñānārṇava to the effect that the dīkṣā as to a mantra should be on the day of a solar or lunar eclipse or within seven days from an eclipse and adds that the principal time is solar eclipse and quotes Kālottara to the effect that, if the time of a solar eclipse is secured for dīkṣā, one need not consider the month, tithi, the week day and the like. N. S. also quotes a passage from Yoginītantra condemning dīkṣā on a lunar eclipse. Vide Muhūrtakalpadruma of Viṭṭhala p. 94 verse 6 (Nirn. ed.) for further details about times and places for dīkṣā.

1825. यथाज्ञ दिव्यभावं क्षिणुयाद् दुरितान्यतो भवेद्दीक्षा । प्रपञ्चसार V. 2; दिव्यभावप्रदानाज्ञ क्षालनात्कल्मषस्य च । दीक्षेति कथिता सद्भिर्भवबन्धविमोचनात् ॥ कुलार्णव 17. 51 (here क्ष is said to represent क्षालन and not क्षय as in others); दिव्यज्ञानं यतो दद्यात्कुर्यात्पापस्य संक्षयम् । तस्माद्दीक्षेति संयोक्ता देशिकैस्तन्त्रवेदिभिः ॥ शारदा० IV. 2.

1826. चन्द्रसूर्यग्रहे दीक्षा सर्वदीक्षाशुभा मता । चन्द्रग्रहे शक्तिदीक्षा सर्वदीक्षोत्तमोत्तमा । न वार-तिथि-ऋक्षादि न लग्ननियमस्तथा । न योगकरणं वापि न विचारं समाचरेत् । शक्तिसङ्गम, ताराखण्ड 17. 36–38; मन्त्रदीक्षाप्रकारस्तन्त्रे द्रष्टव्यः । दीक्षाग्रहणमुपदेशस्याप्युपलक्षणम् । युगे युगे तु दीक्षासीदुपदेशः कलौ युगे । चन्द्रसूर्यग्रहे तीर्थे सिद्धक्षेत्रे शिवालये । मन्त्रमात्रप्रकथनमुपदेशः स उच्यते । धर्मसिन्धु p. 32.

The Agnipurāṇa (chapters 27, 81–89 and 304) deals with dīkṣā at great length and is full of Tāntrik mantras and rites, but reasons of space forbid any treatment of the same here. The Jñānārṇava (24. 45–53) provides that at the time of initiation (dīkṣā) the guru has to instruct the disciple or novice as regards the six *cakras* (Ādhāra up to Ājñā) together with the number of petals in each, the colour of each, the letters of the alphabet assigned to each.

Late Dharmaśāstra works relied for the initiation into mantras on tantra works. For example, the Dharmasindhu (p. 32) expressly says so. There is a difference between Dīkṣā and *upadeśa*, which latter means the communication of only a mantra in a solar or lunar eclipse, at a tīrtha, Siddhakṣetra (sacred region once inhabited by a siddha) or in a Śiva temple. Raghunandana in Dīkṣātattva (vol. II. pp. 645–659) gives a lengthy treatment of dīkṣā at the beginning of which he remarks that in the Śāradātilaka and other works numerous topics of dīkṣā are described but as in his time all those were not being followed he attempts only a brief treatment.

The Mahānirvāṇa states (X. 201–202) that the guru for giving dīkṣā when the disciple is a Śākta, Śaiva, Vaiṣṇava, Saura or a Gāṇapatya, should be of the same sect, but a *kaula* is a good guru for every one. The Mahānirvāṇa (X. 112) provides that a person does not become a Kaula by merely drinking wine, but he becomes so only after *abhiṣeka*. Then (in verses 113–193 of 10th ullāsa) the Mahānirvāṇa provides an elaborate procedure of complete *abhiṣeka* somewhat resembling Christian Baptism. There is first on the day previous to the day of abhiṣeka worship of Gaṇeśa, then of eight Śaktis (Brāhmī &c.), lokapālas and their weapons. Then the next day (i. e. the day of abhiṣeka) after a bath the neophyte donates sesame and gold for the removal of all sins and approaches a guru with the prayer to perform abhiṣeka. Then the guru draws a *sarvatobhadra* maṇḍala on an altar, sanctifies the five tattvas, places an auspicious jar and fills it with wine or with holy water. The principal part consists in the guru's sprinkling with water the disciple to the accompaniment of 21 mantras (X. 160–180) invoking[1827] the gods Brahmā, Viṣṇu, Śiva, the Mātṛs, various Śaktis, the avatāras, the numerous forms of Devī, the dikpālas,

1827. One अभिषेकमन्त्र may be quoted for sample 'गुरवस्त्वाभिषिञ्चन्तु ब्रह्मा-विष्णुमहेश्वराः। दुर्गालक्ष्मीसरस्वत्यस्त्वामभिषिञ्चन्तु मातरः॥' X. 160.

the nine planets, nakṣatras, *yogas*, weekdays, *karaṇas*, seas, sacred rivers, nāgas, trees &c. Then the guru gives the disciple a new name ending in Ānandanātha, who honours the guru and other Kaulas present. This ceremony may go on for 9, 7, 5, 3 nights or one night. Vide Tantrarājatantra II. 58–72, Jñānasiddhi (XVII) for similar procedure of abhiṣeka. Vide the Introduction to the Sekoddeśaṭīkā, a Buddhist Tāntrik work (in G. O. S.) edited by Mario E. Carelli, for its resemblance to the Christian rite of Baptism. The Ahirhudhnya-saṁhitā (chap. 39) provides a procedure of *Mahābhiṣeka* as one remedy against all diseases, as one destroying all enemies and for the attainment of all desired objects.

There were four kinds of dīkṣas, Kriyāvatī, Varṇamayī, Kalāvatī and Vedhamayī and there were elaborate rules about *vāstuyāga*, construction of maṇḍapa, kuṇḍas and sthaṇḍila, which are all passed over for reasons of space.

CHAPTER XXVII

Nyāsas, Mudrās, Yantra, Cakra, Maṇḍala, etc.

One of the important items in the Tāntrik ritual and worship is *nyāsa*, which means 'mentally invoking a god or gods, mantras and holy texts to come to occupy certain parts of the body in order to render the body a pure and fit receptacle for worship and meditation'. Several works such as the Jayākhya-saṁhitā (Paṭala XI), Prapañcasāra (VI), Kulārṇava (IV. 18 ff) refer to several kinds of nyāsa; the Śaradātilaka (IV. 29–41, V. 5–7), Mahānirvāṇatantra (III. 41–43, V. 113-118) describe several varieties of nyāsa. Rāghavabhaṭṭa on Śāradātilaka (IV. 29–41) cites numerous quotations on *nyāsa* from an extensive literature. There are several kinds of nyāsa such [1828] as Haṁsanyāsa, Praṇavanyāsa, Mātṛkānyāsa, Mantranyāsa, Karaṇyāsa, Aṅganyāsa, Pīṭhanyāsa. Praṇavanyāsa is illustrated as 'om ām Brahmaṇe namaḥ', 'om ām Viṣṇave namaḥ' and so on for all the names set out by Rāghavabhaṭṭa on Śāradātilaka 25. 58. The Aṅganyāsa (nyāsa on parts of the body) is illustrated as follows: om hṛdayāya namaḥ, om śirase svāhā, śikhāyai vaṣaṭ, om kavacāya hum, om netratrayāya (or netradvayāya) vaṣaṭ, om astrāya phaṭ'. Several Purāṇas contain provisions about *nyāsa*. The Garuḍapurāṇa (I. chapters 26, 31, 32) describes aṅganyāsa as part of worship, japa and homa. The Nāradīyapurāṇa (II. 57. 13–14), the Bhāgavata (VI. 8, about 40 verses), Brahma (60. 35–40) provide for nyāsa of the mantras 'om namo Nārāyaṇāya', and 'om Viṣṇave namaḥ'. The Kālikāpurāṇa (chap. 77) deals with Mātṛkānyāsa. The Smṛtimuktāphala (Āhnika pp. 329–331) quotes several passages dealing with nyāsa of the 24 letters of the Gāyatrī (Ṛg. III. 62. 10) on several parts of the body, meditation on each of the 24 letters as having certain colours of flowers and as identical with certain gods and avatāras and nyāsa of the Gāyatrīpādas on limbs. The Brahmapurāṇa

---

1828. राघवभट्ट illustrates हंसन्यास as 'हं पुरुषात्मने नमः, सः प्रकृत्यात्मने नमः, हंसः प्रकृतिपुरुषात्मने नमः' on शारदा॰ IV. 29; आत्मनो देवताभावप्रदानादेवमेति च। एवं समस्ततन्त्रेषु विद्वद्भिः समुदीरितम्॥ हृदयशिरसोः शिखायां कवचास्त्रयोस्तु सह चतुर्थीषु। नत्या हुत्या च वषट् हुं वौषट् फट्पदैः षडङ्गविधिः॥ प्रपञ्चसार VI. 5–6. Compare शारदा॰ IV. 33–35 and महानिर्वाण III, 142 *for similar provisions.*

(60. 35-39) deals with the nyāsa of the mantra 'om namo Nārāyaṇāya' on the fingers and also on other parts of the body, and speaks of Karanyāsa and Aṅganyāsa in 38. 26. Padma[1829] (VI. 79. 17-30) describes the nyāsa of the names of Viṣṇu on the limbs of the body from the head to the feet and Padma VI. 85. 26 speaks of Aṅganyāsa and Karanyāsa with the mantra 'om namo bhagavate Vāsudevāya'. The Matsyapurāṇa[1830] provides for the employment in nyāsa of mantras with 'om' prefixed to them. Karāṅganyāsa and Aṅganyāsa of Gāyatrī are dealt with in Devībhāgavata XI. 16. 76-91 and it expressly names nyāsa as part of *sandhyā* worship.[1831] Vide also Devībhāgavata XI. 7. 26-38 for nyāsa and Kālikāpurāṇa 53. 36. The Devībhāgavata (VII. 40. 6-8) mentions the nyāsa of certain letters on such parts of the body as the chest, the space between the eyebrows, the head. The Bṛhad-yogiyājñavalkya[1832] contained

---

1829. The passage of पद्म VI. 79. 17-30 begins and ends as follows: शिखायां श्रीधरं न्यस्य शिखाधः श्रीकरं तथा। हृषीकेशं तु केशेषु मूर्ध्नि नारायणं परम्॥ एवं न्यासविधिं कृत्वा साक्षान्नारायणो भवेत्। यावन्न व्याहरेत्किंचित् तावद्विष्णुमयः स्थितः॥

1830. ओङ्कारपूर्वका ह्येते न्यासे बलिनिवेदने। मन्त्राः स्युः सर्वकार्याणां वृद्धिपुष्टिफलप्रदाः॥ मत्स्य 266. 29.

1831. अथ न्यासविधिं वक्ष्ये सन्ध्यायाः अङ्गसम्भवम्। XI. 16. 76. The संस्काररत्नमाला, a comparatively modern work, remarks (p. 229) that Nyāsa has no Vedic authority and hence some do not perform it 'एषोऽङ्न्यासः। एतमेके नेच्छन्ति स ह विधिरवैदिक इति॥'. The षडङ्गन्यास of गायत्री takes the form 'तत्सवितुर्हृदयाय नमः, वरेण्यं शिरसे स्वाहा, भर्गो देवस्य शिखायै वषट्, धीमहि कवचाय हुं, धियो यो नो नेत्रत्रयाय वौषट्, प्रचोदयात् अस्त्राय फट्। इति षडङ्गन्यासः कार्यः। न वा कार्यो न्यासविधेरवैदिकत्वादिति गृह्यपरिशिष्टे स्पष्टम्। तेनाक्षरन्यासपादन्यासादीनां मुद्रादिविधेः शापमोचनादिविधेश्च तान्त्रिकत्वेनावैदिकत्वादनावश्यकत्वं वेदितव्यम्। धर्मसिन्धु III. p. 272. The passage quoted by Aparārka is interesting and a few verses are cited here 'अप्त्वग्नौ हृदये सूर्ये स्थण्डिले प्रतिमासु च। षट्सोपेषु हरेः सम्यक्पूजनं मुनिभिः स्मृतम्। अग्नौ क्रियावतां देवो दिवि देवो मनीषिणाम्। प्रतिमास्वल्पबुद्धीनां योगिनां हृदये हरिः॥ आनुष्टभस्य सूक्तस्य त्रिष्टुबन्तस्य देवता। पुरुषो यो जगद्बीजमृषिर्नारायणः स्मृतः॥ प्रथमां विन्यसेद्धाम्ने द्वितीयां दक्षिणे करे। तृतीयां वामपादे तु चतुर्थीं दक्षिणे न्यसेत्। ... अष्टौ पञ्चदशीं चैव षोडशीं मूर्ध्नि विन्यसेत्। अपरार्क pp. 140-141. आनुष्टभस्य सूक्तस्य refer to the पुरुषसूक्त (ऋ. X. 90), the first fifteen verses of which are in Anuṣṭubh metre and the 16th (last verse) is in त्रिष्टुभ् metre. The verses from अप्त्वग्नौ to नारायणः स्मृतः are नरसिंहपुराण 62. 5-8 (with slight variations).

1832. अङ्गुष्ठे चैव गोविन्दं तर्जन्यां तु महीधरम्। मध्यमायां हृषीकेशमनामिकां त्रिविक्रमम्। कनिष्ठिकायां न्यसेद्विष्णुं हस्तमध्ये च माधवम्। स्मृतिच. I. p. 198 quoting योगियाज्ञवल्क्य. These verses are quoted by स्मृतिमुक्ताफल (आह्निक p. 331) from the स्मृतिचन्द्रिका. The ed. of बृहद्योगियाज्ञ. (chap. V) published by the कैवल्यधाम of Lonavala deals with nyāsa but does not contain the above verses.

verses dealing with the nyāsa of the names of Viṣṇu such as Govinda, Mahīdhara, Hṛṣīkeśa, Trivikrama, Viṣṇu, Mādhava on the fingers of the right hand and the palm and back respectively, which are quoted by the Smṛticandrikā (I. p. 198) as from Yoga-yājñavalkya and which have been taken over in the *sandhyā* worship in modern times. The latter work (Sm. C, I. p. 145) also contains Aṅganyāsa of several portions of Gāyatrī, the nyāsa of the single letters of the Gāyatrī on the limbs and Aparārka (p. 140) quotes a passage for the employment of the sixteen verses of the Puruṣasūkta (Ṛg. X. 90) for nyāsa on the several limbs in the worship of Viṣṇu. For the nyāsa of the letters of the alphabet from 'a' to 'kṣa', vide Śāradātilaka V. 5-8 and Rāghavabhaṭṭa on V. 4 who quotes verses setting out how each letter is to be meditated upon. The Mahānirvāṇa (V. 176-178) also specifies the limbs on which there is to be nyāsa of the letters of the alphabet from the forehead downwards.

The above passages show that the item of nyāsa was taken over from Tāntrika works in the Purāṇas for the rites of the orthodox people several centuries before Yogayājñavalkya, Aparārka (first half of 12th century A. D.) and the Smṛticandrikā. The Varṣakriyākaumudī[1833] (about first half of 16th century) shows that long before it the Garuḍa and the Kālikā purāṇas contained provisions on nyāsa. The Devapratiṣṭhātattva of Raghunandana (p. 505) speaks of Mātṛkānyāsa and Tattvanyāsa. The Pūjāprakāśa section of the Vīramitrodaya dwells upon Mātṛkānyāsa, Aṅganyāsa, Gāyatrīnyāsa on pp. 130, 131, 132 respectively. The Bhaktiprakāśa (pp. 88-89) of the same work deals with Mātṛkānyāsa. In modern times some orthodox people still perform two kinds of nyāsas as follows; The Antarmātṛkā which consists in the mystic assignment (*mentally*) of the letters of the alphabet (from 'a' to 'kṣa') on the fingers of the hands and on the palm and back of the hands and on several parts of the body viz. the throat, organs of generation, the ādhāra place and the middle of the eyebrow (as the seats of the six psychic cakras mentioned in note 1715 above). The Bahirmātṛkānyāsa consists in assigning the individual alphabet letters with *anusvāra* on each on the limbs from head to feet in such forms as 'ām namaḥ mūrdhni' and so on.

1833. वत्सकालिकापुराणादिषु प्रथमान्तानां केवलानामादीनां न्यासदर्शनात्। व. क्रि. कौ. p. 124.

The word nyāsa is derived from the root 'as' 'to cast' with 'ni' and literally means 'placing or depositing in or on'. The Kulārṇava explains it as follows:[1834] 'nyāsa is so called because therein riches that are acquired in a righteous way are deposited or placed with persons whereby all-round protection is got' (so by the ritual touching of the chest and other limbs with the tips of the fingers and the palm of the right hand accompanied by mantras the worshipper can act fearlessly in the midst of bad men and becomes like a god). Vide Jayākhyasaṃhitā quoted below.[1835]

The subject of nyāsa was briefly dealt with in H. of Dh. Vol. II. p. 319–320. In 'Principles of Tantra' Sir John Woodroffe (pp. LXXI–LXXVII) compares the ritual of nyāsa with the Christian method of making the sign of the cross.

Mudrā is another characteristic item in Tāntrik ritual. The word *mudrā* has several meanings, four of which have a bearing on Tantrik practices. It means a posture in yogic practices in which the whole body plays a part. It also means the symbolic or mystic intertwining of the fingers and hands as part of religious worship. Mudrā is also the 4th of the five *makāras* and means various kinds of grains mixed with ghee or other ingredient (vide note 1752 above) or parched grains. A fourth meaning of mudrā is the woman with whom a Tāntrika yogi associates himself (as in Prajñopāya o V. 24 and Sekoddeśaṭīkā p. 56). The Kulārṇava derives the word from 'mud' meaning 'delight' or 'pleassure' and 'drāvay' (causal of 'dru') and says 'mudrās' (ritual finger and hand poses) should be shown (in worship) and are so known because they give delight to the gods and make their minds melt (with compassion for the worshipper). But the Śāradātilaka[1836] appears to derive it from 'mud' and 'rā' (to

1836. मुदं कुर्वन्ति देवानां मनांसि द्रावयन्ति च। तस्मान्मुद्रा इति ख्याता दर्शितास्ता कुलेश्वरि॥ कुलार्णव 17. 57; मुदं कुर्वन्ति देवानां राक्षसान्द्रावयन्ति च॥ विष्णुसंहिता VII. 43; आवाहन्यादिका मुद्राः प्रवक्ष्यामि यथाक्रमम्। यासिर्विरचितासित्तु मोदन्ते सर्वदेवताः॥ शारदा० 23. 106, on which राघवभट्ट comments 'रा दाने। मुदं राति ददातीति मुद्रेति निर्वचनम्।... अत एव तद्दर्शनेन देवताहर्षोत्पत्तिः। स्वाङ्गुल्यो हि पञ्चशक्तात्मिका अङ्गुलाद्या

(Continued on next page)

give) and according to it *mudrā* means 'what affords pleasure to the Gods'. Other derivations are also proposed (vide J. O. R. Baroda, vol. VI. p. 13). Rāghavabhaṭṭa states that the fingers from the thumb to the small finger are identified with the five elements viz. ākāśa (sky or ether), wind, fire, water and earth and that their contact with each other tends to make the deity favourable and delighted and induces the deity to be present at the worship, and that various appropriate mudrās are to be employed in worship, at the time of japa, in meditation and in all rites performed for securing some desired object or benefit, since they induce the deity to be present (near the worshipper[1837]). It was supposed that mudrās helped in enhancing concentration on the part of the worshipper. Even as early as the 7th century it was believed that the making of mudrās may bring to life one who, being poisoned had fallen into coma, as the Kādambarī quoted below shows. The Varṣakriyā-kaumudī quotes a verse saying that japa, prāṇāyāma, worship of gods, yoga, meditation and *āsanas* are fruitless unless accompanied by appropriate mudrās.

The word mudrā occurs in the name of Lopāmudrā,[1838] wife of Agastya, who figures in a hymn of the Rg. (I. 179. 4). The word 'mudrā' is not mentioned in the Amarakośa.

(*Continued from last page*)

आकाशवाय्वग्निसलिलभूरूपास्तासां मिथः संयोगरूपसङ्क्षेत्रात्कोपि देवतामयुणीभावपूर्वको मोदः सांनिध्यकरो भवति। तदुक्तम्। पृथिव्यादीनि भूतानि कनिष्ठाद्याः क्रमान्मताः। तेषामन्योन्यसम्भेदप्रकारैस्तत्त्वपञ्चता।', योगिनीहृदय I. 57 derives as in कुलार्णव. The verse 'मोचयन्ति महाविद्याः' quoted in J. O. I, Baroda, vol. VI, p. 13 as from कामकलाविलास occurs in a footnote appended by the editor (in the Kashmir series of texts) and not in the text of the कामकलाविलास. The half verse 'यामिर्वि...देवताः' of शारदा० 23. 106 is the same as मुद्रानिघण्टु (Tāntrik texts vol. I, p. 46).

1837. अर्चने जपकाले तु ध्याने काम्ये च कर्मणि। तत्तन्मुद्राः प्रयोक्तव्या देवतासंनिधापकाः q. in पूजाप्रकाश। p. 123 and by राघवभट्ट on शारदा० 23.336: स्नाने चावाहने चैव प्रतिष्ठायां च रक्षणे। नैवेद्ये च तथार्घे च तत्तत्कर्मप्रकाशने। स्थाने मुद्राः प्रकर्तव्याः स्वस्वलक्षणसंयुताः॥ Tāntrik texts vol. I. p. 46, verses 1-3; मुद्राबन्धाद् ध्यानाद्वा विषमप्रसुप्तस्योत्थापने कीदृशी युक्तिः। कादम्बरी, उत्तरभाग (in शुकनास's consoling speech to तारापीड on the reported heart failure of Candrāpīḍa; compare आर्षमञ्जुश्री-मूलकल्प p. 369 'निर्विषोपि भवेत्क्षिप्रं यो जन्तुर्विषमूर्च्छितः। चत्वारिंशति समाख्याता मुद्रा श्रेष्ठा महर्धिका॥; प. क्रि. कौ. p. 156 'मुद्रां विना तु यज्जाप्यं प्राणायामः सुरार्चनम्। योगो ध्यानासने चापि निष्फलानि तु भैरव'॥. This verse is कालिकापुराण 70. 35. मुद्राभिरेव तुष्यन्ति न पुष्पादिकपूजनैः। महापूजा कृता तेन येन मुद्राष्टकं कृतम्॥ मेरुतन्त्र 17. 22.

1838. लोपामुद्रा वृषणं नी रिणाति वीरमधीरा धयति श्वसन्तम्॥ ऋ. I. 179. 4.

The H. of Dh. vol. II. (pp. 320–321) makes a brief mention of mudrās in worship and refers to the work of Miss Tyra de Kleen on the mudrās practised by Bauddha and Śaiva priests called *pedandas* in the island of Bali. Here the same subject will be dealt with in a little more detail and from different points of view.

There is a great divergence among the Tantra, Purāṇa and Yoga works on the number, names and definitions of mudrās. This may be briefly illustrated.

In the Tāntrik texts (Vol. I. pp. 46–47) there is a nighaṇṭu (a glossary or enumeration) of mudrās with names and definitions, where it is stated that nine mudrās (*āvāhanī* and others) are common (i. e. capable of being employed in any worship); and then are enumerated mudrās specially appropriate to Viṣṇu worship (19 in all viz. Śaṅkha, Cakra, Gadā, Padma, Veṇu, Śrīvatsa, Kaustubha, Vanamālā, Jñāna, Vidyā, Garuḍa, Nārasiṁhī, Vārāhī, Hayagrīvī, Dhanus, Bāṇa, Paraśu, Jagan-mohinī, Vāma; ten of Śiva (Liṅga, Yoni, Triśūla, Akṣamālā, Abhīti i. e. abhaya, Mṛga, Asikā, Khaṭvāṅga (a club with a skull at the top), Kapāla, Ḍamaru; one of the Sun (viz. Padma); seven of Gaṇeśa (Danta, Pāśa, Aṅkuśa, Avighna, Paśu, Laḍḍuka, Bījapūra (i. e. a citron).[1839]

The Śārādatilaka (23. 106–114) names only nine mudrās and defines them, while the Viṣṇusaṁhitā (VII) says that mudrās are innumerable (verse 45), names about thirty and defines them and Jñānārṇava (IV), mentions at least nineteen. The Jayākhyasaṁhitā (8th Paṭala) has about 58 mudrās. The Tāntrik[1840] works provide that mudrās should be practised

---

1839. These Mudrās are also mentioned in a work called Mudrā-lakṣaṇa (D. C. Ms. 291 of 1887–91). Some of these mudrās in connection with the worship of individual gods occur in Viṣṇusaṁhitā VII and in Jñānārṇava IV. The Mudrānighaṇṭu names and defines mudrās of Śakti, Agni, Tripurā and other deities. The mudrās specially appropriate in the worship of Viṣṇu, such as Śaṅkha, Cakra, Gadā, Padma, Kaustubha, Śrīvatsa, Vanamālā, Veṇu are described in a work called Nāradatantra quoted by Varṣakriyākaumudī pp. 154–156.

1840. पटान्ते बन्धयेद् मुद्रां न चापि कथयेद् बुधः। कथनाज्जायते क्षेत्रतस्मात्प्रोच्या सदा बुधैः। आनन्त्यादखिला मुद्रा वक्तुं ब्रह्मन् न शक्यते। विष्णुसंहिता VII. 44–45 (T.S.S.); न जातु दर्शयेन्मुद्रा महाजनसमागमे। गुह्यमेतन्मुनिश्रेष्ठ तस्माद्गुप्तिं नियोजयेत्। नार्हायिनस्य मुद्राणां लक्षणानि प्रकाशयेत्। क्षुभ्यन्ति देवतास्तस्य मन्त्रं च विफलं भवेत्॥ quoted from महासंहिता by राघवभट्ट on शारदा० 23. 114; स्मृतिच्च. (I p. 148) quotes the first verse and the last half verse.

secretly under cover of a garment and not in the presence of many people and should not be announced to another as otherwise they become fruitless. The Kāmakalāvilāsa of Puṇyānanda expressly mentions (in verse 46) Trikhaṇḍā-mudrā and refers to the fact that there are nine mudrās.[1841] The Nityāṣoḍaśikārṇava (3rd viśrāma) first defines Trikhaṇḍā, then names and defines nine mudrās most of which bear names different from those in the Śāradātilaka. The Mudrās mentioned by Nityāṣoḍaśikā apart from Trikhaṇḍā, are: Sarvasaṅkṣobhakāriṇī, Sarvavidrāviṇī, Ākarṣiṇī, Sarvāveśakarī, Unmādinī, Mahāṅkuśā, Khecarī, Bījamudrā, Yonimudrā.

The Jñānārṇava Tantra (IV. 31–47 and 51–56 and XV. 47–68) names over thirty mudrās, several of which bear the same names as those in Nityāṣoḍaśikārṇava, are defined in a similar way and are quoted by Bhāskararāya in his commentary on the latter work. In these circumstances the author proposes to name and describe first of all the nine mudrās of the Śāradātilaka.[1842] (1) Āvāhanī mudrā consists in folding both hands in a hollow and filling the hollow completely with flowers; (2) sthāpanī is the same as āvāhanī but the folded hands are held upside down; (3) the 'sannidhāpana-mudrā' occurs when the two hands are formed into a closed fist, are joined together with only the

1841. आधारनवकरणा नवचक्रत्वेन परिणतिं गताः॥ नवनाथास्तत्रयोऽपि च मुद्राकारेण तान्यके॥ कामकलाविलास verse 67.

1842. सम्यक् सम्पूरितः पुष्पैः कराभ्यां कल्पितोऽञ्जलिः। आवाहनी समाख्याता मुद्रा देशिकसत्तमैः॥ अधोमुखी कृता सैव प्रोक्ता स्थापनकर्मणि। आश्लिष्टमुष्टियुगला भोक्तताङ्गुष्ठदुग्मका॥ सन्निधाने सन्मुद्दिष्टा मुद्रेयं तन्त्रवेदिभिः। अन्तर्गर्भिणी सैव सन्निरोधे समीरिता॥ उत्तानौ द्वौ कृतौ मुष्टी संमुखीकरणी स्मृता। देवताङ्गे षडङ्गानां न्यासः स्यात्सकलीकृतिः॥ सम्यक्स्तकृता मुष्टिर्दीर्घाधोमुखतर्जनी। अवगुण्ठनमुद्रेयमनिलो ग्रामिता सती॥ अन्योन्याभिमुखाश्लिष्टकनिष्ठानामिका पुनः। तथा च तर्जनीमध्या धेनुमुद्रा समीरिता॥ अमृतीकरणं कुर्यात्तया देशिकसत्तमः। अन्योन्यग्रथितामुष्टा प्रसारितकराङ्गुली॥ महामुद्रेयमुद्दिता परमीकरणे बुधैः। प्रयोजयेदिमा मुद्रा देवतायागकर्मणि॥ शारदा० 23. 107–114. It may be noted that the ज्ञानार्णवतन्त्र (IV, 32–37) names and describes eight of these nine mudrās almost in the same words, omitting संमुखीकरणी and calling the महामुद्रा of शारदा० by the name परमीकरण. The कुलार्णव (17, 90-93) has eight out of these nine, omitting संमुखीकरणी and employing the words परमीकरण for महामुद्रा. Both कुलार्णव and शारदा० connect अमृतीकरण with धेनुमुद्रा. The कौलावलीनिर्णय VII. 5–14 has eight out of the nine described by शारदा० and appears to be based on the कुलार्णव. The half-verse देवताङ्गे ... कृतिः occurs in कुलार्णव 17. 92 and कुलार्णव 17. 93 says 'शनसेरयञ्जलिर्देवि परमीकरणं प्रिये।'. महानिर्वाण० VI. 77 states 'शीलयेद् देवमुद्धर्यं षड्भिः सकलीकृतिः'. The mudrās described in शारदातिलक are quoted by ब. भि. को. p. 153.

thumbs raised up; (4) 'Sannirodhanī' means the same as the preceding but with the thumbs closed inside the fist; (5) the mudrā is called 'Sammukhīkaraṇī' when the two closed fists are held upwards; (6) 'Sakalīkṛti' mudrā is the action of making the nyāsa of the six limbs on the limbs of the (image of) the *devatā* (deity worshipped); (7) the 'Avaguṇṭhana' mudrā consists in closing the fingers held straight and turned downwards and waving the hand round (the image); (8) 'Dhenumudrā' (a complicated pose) is formed by putting the right small finger over the right ring finger, intertwining the former with the left ring finger, the left small finger as it is, to be intertwined with the right ring finger, the left ring finger is to be passed over the left middle finger and the left thumb, and to be intertwined with the right hand middle finger brought to the right side of the left index finger and the right hand index finger to be joined with the left hand middle finger; (9) Mahāmudrā is constituted by intertwining the thumbs of both hands *and holding the other fingers straight.*

Some of the works on Yoga describe various mudrās. For example, the Haṭhayogapradīpikā (III. 6-23) describes at length ten mudrās and the Gheraṇḍasaṁhitā (III. 1-3) speaks of 25 mudrās and describes them in one hundred verses. The Śivasaṁhitā (IV. 15-31) mentions ten mudrās as the best. An important mudrā in Haṭhayoga practices is the Khecarīmudrā described in Devībhāgavata XI.66.62-65, Śivasaṁhitā IV. 31-33, Gheraṇḍasaṁhitā III. 25-27, Haṭhayogapradīpikā III. 32-53. This description differs from the definition of Khecarī in Jñānārṇava (15. 61-63) and Nityāṣoḍaśikārṇava III. 15-23. The Vajrolīmudrā (in Haṭhayogapradīpikā III. 82-96) cannot be set out here for reasons of decency and it was supposed to prolong the life of a yogin even after indulgence in sexual orgies.

Some of the Purāṇas contain an extensive treatment of mudrās. The Kālikāpurāṇa mentions aṅganyāsa, karanyāsa in chap. 66 and mudrās like Dhenumudrā, Yonimudrā, Mahāmudrā, Khecarīmudrā in 70. 36-56, 78. 3-6; Devībhāgavata (XI. 16. 98-102) speaks of 24 mudrās at the time of Gāyatrī-japa; the Brahmapurāṇa[1843] and Nāradīyapurāṇa set out eight mudrās

1843. पद्मं शङ्खश्च श्रीवत्सो गदा गरुड एव च। चक्रं खड्गश्च शार्ङ्गं च अष्टौ मुद्राः प्रकीर्तिताः॥ ब्रह्म 61. 55, नारदीय II. 57. 55-56. It may be noted that these are mentioned among 19 Viṣṇu mudrās enumerated from Tāntrik texts vol. I.

(*Continued on next page*)

of Viṣṇu worship. Vide Agnipurāṇa, chap. 26, for a brief reference in 7 verses to some mudrās. The Kālikāpurāṇa (70. 32) states that there are 108 mudrās, 55 for general worship and 53 on special occasions, such as collecting materials, drama, acting (naṭana).

Most verses of the Brahmāṇḍapurāṇa (in the Lalitopākhyāna, chap. 42) are the same as in the Mudrānighaṇṭu pp. 55–57 verses 110–118; but the largest number of mudrās in dancing is contained in the Viṣṇudharmottara (III). In chap. 32 it speaks of numerous rahasya (secret) mudrās in prose called mudrāhastas and in chap. 33 (1–124) it describes over one hundred sāmānyamudrās and the colophon at the end of the chapter calls them 'nṛttaśāstramudrās' (mudrās in the science of dramaturgy).[1844] This opens up a subject which cannot be gone into here, viz. whether the mystic hand poses (mudrās) in worship were derived from the postures (*karaṇas*), *recakas* (gestures) and 32 *aṅgahāras* (movements of limbs) described in the Nāṭyaśāstra[1845] of Bharata (chapters 4, 8 and 9). It may be noted that the Nāṭyaśāstra (in IV. 171 and 173) speaks of 'nṛttahastas'. Pāṇini knew naṭasūtras of Śilālin and Kṛśāśva.[1846] Bharata speaks of four kinds of acting (*abhinaya* 8. 9–10) viz. āṅgika, vācika, āhārya, and sāttvika. In the 9th chapter the movements of the hands and fingers intertwined or joined are set out. Muṣṭi is defined by Bharata in 9. 55. Mudrās would fall under āṅgika abhinaya; *aṅgahāras* depended upon *karaṇas*

(*Continued from last page*)

cited above. All these except श्रीवत्स are named and defined in the पूजाप्रकाश pp. 124–125. The पूजाप्रकाश p. 136 prescribes that in the worship of विष्णु 'āvāhana' should be made with the mantra 'Sahasraśīrṣā' (*Ṛg.* X. 90. 1) and 14 mudrās shown 'सहस्रशीर्षेतिमन्त्रेणावाहनं कुर्यात् । तत आवाहनादिचतुर्दशमुद्राः प्रदर्शयेत् । ताश्च आवाहनी स्थापनी संमुखीकरणी सन्निरोधिनी प्रसादमुद्रा अवगुण्ठनमुद्रा शङ्खचक्रगदापद्ममुसलखड्गधनुर्बाणमुद्राः ।'.

1844. Vide विष्णुधर्मोत्तर III. 32 which begins अथातो मुद्राहस्तान् व्याख्यास्यामः and ends with a verse एता रहस्यमुद्रास्ते मयोक्ता नृपसत्तम । अतःपरं प्रवक्ष्यामि सामान्यास्ता निबोध मे ॥ : इत्युद्देशे तु ते प्रोक्ता मुद्राहस्ता मया नृप । दर्शयेन्मन्त्रयुक्तानां परां सिद्धिमभीप्सताम् ॥ विष्णुधर्मोत्तर III. 33. 121.

1845. करणैरिह संयुक्ता अङ्गहाराः प्रकल्पिताः । एतेषामिह वक्ष्यामि हस्तपादविकल्पनम् । नाट्यशास्त्र IV 33–34; illustrations of the 108 aṅgahāras enumerated in नाट्यशास्त्र IV. 34–55 are given in the GOS edition of the नाट्यशास्त्र (vol. I), copied from the Naṭarāja temple gopuras at Chidambaram in South India.

1846. पाराशर्यशिलालिभ्यां भिक्षुनटसूत्रयोः । कर्मन्दकृशाश्वादिनिः ॥ पा. IV. 3, 110–111.

and the latter consisted of different arrangements of hands and feet. It is likely that the mudrās in the Hindu and Buddhist Tāntrik works are based on the poses that were evolved in ancient Indian dance and drama and that find their earliest extant description in Bharata-nāṭyaśāstra and that are also to be found in later medieval works on dramaturgy such as the Abhinayadarpaṇa.[1847]

The Āryamañjuśrīmūlakalpa names and defines 108 mudrās (p. 380). On p. 376 it states that the combination of mudrās and mantras would bring success in all actions and neither *tithi*, nor *nakṣatra* nor fasting would be required. In the Viṣṇudharmottarapurāṇa[1848] there is a fine eulogy of the mudrās made in dancing viz. they are the graces of the rich, the removers of the sorrow of the distressed, the instruction of the ignorant, the increase of the blessedness (or charm) of women; they were created by Vāsudeva for the removal of portents, as the means of prosperity and of the attainment of desired objects.

The Buddhists also had mudrās. One of the early works of the Mahāyāna school viz. Āryamañjuśrīmūlakalpa is full of mudrās in the 35th paṭala (pp. 355–381) and states (on p. 380) that there are 108 mudrās.[1849] L. H. Waddell in 'the Buddhism of Tibet or Lamaism' (London, 1895) describes nine mudrās practised in Tibet by the Lamas (pp. 336–337).

In the Indian Antiquary, vol. 26 (1897), pp. 24–25, Burgess mentions nine Buddhist mudrās (slightly differing from Waddell's descriptions) as follows :—(1) Bhūmispṛś or Bhūmisparśa mudrā, an attitude of Śākya Buddha (making the earth as witness); (2) Dharmacakra mudrā (teaching attitude); (3) Abhaya mudrā (of blessing), in which the left hand is open

1847. Vide अभिनयदर्पण (edited by Dr. Manomohan Ghosh, 1957) p. 47 where certain postures of the hands are called Śaṅkha, Cakra, Sampuṭa, Pāśa, Kūrma, Matsya, Varāha, Garuḍa, Simhamukha, which, as noticed above, are among the mudrās mentioned in the Mudrānighaṇṭu (Tāntrik texts, edited by Avalon, vol. I p. 46 verses 5–7 and pp. 49–50 verses 32 ff, which define Vaiṣṇava mudrās some of which like Garuḍa occur in the Nāṭyaśāstra IX. 201 also.

1848. ईश्वराणां विलासं तु चार्तानां दुःखनाशनम्। मूढानामुपदेशं तत् स्त्रीणां सौभाग्यवर्धनम्। शान्तिकं पौष्टिकं काम्यं वासुदेवेन निर्मितम्। विष्णुधर्मोत्तर III. 34. 30–31.

1849. Vide आर्यमञ्जुश्रीमूलकल्प (35th paṭala) p. 372 for अभयमुद्रा and वरदमुद्रा.

on the lap, the right hand is raised in front of the chest with the fingers and thumb half extended and with the palm facing forwards; (4) Jñānamudrā (Dhyāna mudrā?) or Padmāsana-mudrā (posture of contemplation); (5) the Vara or Varadamudrā, in which the right hand hangs down over the knee, the palm of the hand turned outwards symbolising charity; (6) Lalita-mudrā (enchanting or bewitching); (7) Tarkamudrā (right hand raised to the chest and slightly constricted; (8) Śaraṇa-mudrā (of refuge or protection); (9) Uttarabodhimudrā (pose of highest perfection, which is apt to be confounded with Dharmacakramudrā).

The Jainas also had mudrās. In J. O. I. (Baroda), vol. VI. No. 1 pp. 1–35 Dr. Priyabala Shah contributes an interesting paper on two Jaina works, one of which called Mudrāvicāra describes 73 mudrās and the other called Mudrāvidhi lists 114 mudrās.

In a recent work 'Royal conquests and cultural migrations' Mr. C. Sivaramamurti (Calcutta, 1955) remarks (on p. 43) that the 'hastas' and '*karaṇas*' on the Gopura at Chidambaram are found also in the Śiva temple at Prambanan in Java, where one can observe many of the *karaṇas* like Patākā, Tripatāka, Ardhacandra, Śikhara, Kartarīmukha, Śūci and hastas like Añjali, Puṣpaputa. In another recent work 'Contributions to the History of the Indian Drama' by Dr. Manomohan Ghosh (Calcutta, 1958) it is stated that in the bas-reliefs of Bayon (Angkor Thom) certain aspects of the Cambodian dance and drama, particularly certain gestures depicted and actually observed in practice now in the dances in the royal palace, are similar to those described in the Nāṭyaśāstra of Bharata such as Añjali, Patākā, Ardhacandra, Muṣṭi, Candrakalā and Kapota (p. 63).

Some Sanskrit medieval Dharmaśāstra works from the 13th century A. D. dilate at some length on mudrās. Hemādri on Vrata (vol. I. pp. 246–247) speaks of mudrās called Mukula, Paṅkaja, Niṣṭhura and Vyoma. The Smṛticandrikā (1st half of 13th century A.D.) names and defines 24 mudrās (I. pp. 146–147). The names are the same as in Devībhāgavata XI. 16. 98–102. The Pūjāprakāśa (part of Vīramitrodaya) defines in all 32 mudrās of which eight, viz. Āvāhanī, Sthāpanī, Sannidhāpanī, Saṁrodhinī, Prasāda, Avaguṇṭhana, Sammukha, Prārthanā are common to the worship of all gods, some are specially appropriate

in Viṣṇu worship, some in worship of the Sun, Lakṣmī and Durgā and the Añjali and Saṁhāra mudrās (the last two) used in the worship of all gods. The Āhnikaprakāśa (part of Vīramitrodaya) names 24 mudrās to be shown at the time of the japa of Gāyatrī (pp. 298–299) which are the same as in Devī-bhāgavata XI. 16. 98–102, but it quotes them as from Brahmā.[1850] It is difficult to say what work is meant by Brahmā. Mudrās were not universally practised. It is clear from the Dharmasindhu and Saṁskāra-ratnamālā quoted in note 1831 that Nyāsa and Mudrā were held to be non-vedic in Mahārāṣṭra at least.

Another item in the Tāntrik worship is that of Maṇḍala which has been also a prominent feature of orthodox Hindu practices in medieval and modern times. But it cannot be said that the concept of maṇḍalas was borrowed by Sanskrit writers from the Tāntrikas. The word was used in the sense of orb or circle. In the Tai. S. V. 3. 9. 2 reference is made to circular bricks (maṇḍaleṣṭakā); vide also Śat. Br. IV. I. 1. 25. The orb of the Sun is also called the wheel (cakra) in Ṛg. IV. 28. 2 and V. 29. 10. The Bṛ. Up. says 'this Āditya is what is (called) truth[1851] (satya)' and refers to the Person in the orb (maṇḍala) of the sun. Then it came to mean any figure or diagram (generally

1850. वरदाभयमुद्रे च वरदाभयवत् प्रिये। ज्ञानार्णवतन्त्र IV. 39; the Vara and Abhaya mudrās are defined in Jayākhyasaṁhitā VIII. 104–5 as follows: सुस्पष्टं दक्षिणं हस्तं स्वात्मनस्तु पराङ्मुखम्। पराङ्मुखं लम्बमानं वामपार्णिं प्रकल्पयेत्। क्रमाद्वरा-भयाख्यं तु इदं मुद्राद्वयं द्विज।, विज्ञेयं लोकपालानामिन्द्रादीनां समासतः। See 'Buddha and the Gospel of Buddha' by A. Coomaraswamy (London 1916) p. 262 for a Bhumisparśa-mudrā from Ceylon (of 18th century A. D.) and 'Buddhist Art in India' by Prof. Grünwedel tr. by Agnes C. Gibson, figure 126 p. 178 for Bhumisparśamudrā (of Buddha) and pp. 38 and 330 (of Coomaraswamy's work) for Dharmacakramudrā respectively of Gupta period and from Gandhāra (1st or 2nd century A. D.) and Dr. B. Bhattacharya's 'Buddhist Iconography' plate XXVIII for the same. Vide 'Serpent Power' by A. Avalon (5th edition, 1953 pp. 480 and 488) for illustrations of Yogimudrā in Siddhā-sana and Mahāmudrā respectively as practised by modern practitioners of yoga. In the Memoirs of Arch. S. I. No. 66 plate XIII (g) has Abhayamudrā of standing Buddha and 'Buddhist Art in India' (above) p. 192 has Abhaya-mudrā of Maitreya from a relief in Swat, while in V. A. Smith's 'History of Fine Art in India and Ceylon' (ed. of 1930) plate 113 shows Buddha seated in Abhayamudrā from Java. Vide N. K. Bhattasali's 'Iconography of Buddhist and Brahmanical sculptures in the Dacca Museum' (1929) plate VIII opposite p. 30 for a fine Bhūmisparśa mudrā of Buddha and pp. 56 and 57 plates XX and XXI for Varada mudrās (right hand).

1851. तदेतत्सत्यमसौ स आदित्यो य एव एतस्मिन्मण्डले पुरुषो यश्चायं दक्षिणेऽक्षन् पुरुषः। बृह. उप. V. 5. 2; vide बृह. उप. II. 3. 3.

circular) drawn on an altar and the like. In the Śulbasūtras of Āpastamba and Kātyāyana reference is made to the squaring of a circle (maṇḍala).[1852] The Matsyapurāṇa refers in several passages to maṇḍalas drawn with powders of five colours (as in 58. 22). It also refers to the figure of a lotus of twelve or eight petals drawn with saffron or red sandalwood paste or with various colours (72. 30; 62. 15; 64. 12–13; 74. 6-9 a lotus figure with eight petals and pericarp for sun worship). Varāhamihira in Bṛ. S. (chap. 47) describes[1853] a very auspicious ceremony called Puṣyasnāna in which a maṇḍala was to be drawn on holy ground with powders of different colours in which positions were to be assigned to gods, planets, stars etc. The Brahmapurāṇa (28. 28) mentions the invocation of the Sun on the figure of a lotus and Brahmapurāṇa (61. 1–3) about the worship of Nārāyaṇa on a maṇḍala in the form of a lotus is quoted by Raghunadana in Puruṣottama-tattva (p. 569). The Harṣacarita[1854] (first half of 7th century A. D.) refers to a large maṇḍala being drawn in several colours. The Varāhapurāṇa refers to the images or paintings of Lakṣmī and Nārāyaṇa in a maṇḍala for worship (chap. 99. 9–11). The Agnipurāṇa (chapter 320) refers to eight maṇḍalas, Sarvatobhadra and others. Several maṇḍalas are described in Śāradātilaka III. 113–118, 131–134, 135–139 (navanābhamaṇḍala), in Jñānārṇava 26. 15–17 and other works. According to the Amarakośa[1855] Sarvatobhadra is a variety of

1852. चतुरश्रं मण्डलं चिकीर्षन् मध्यात् कोट्यां निपातयेत्। पार्श्वतः परिकृष्यातिशय-तृतीयेन सह मण्डलं परिलिखेत्। सा नित्या मण्डलम्। यावद्धीयते तावदामन्तु।; मण्डलं चतुरश्रं चिकीर्षन् विष्कम्भं पञ्चदशभागान् कृत्वा द्वावुद्धरेत्। त्रयोदशावशिष्यन्ते सा नित्या चतुरश्रम्। आपस्तम्बशुल्बसूत्र III. 2–3 (Z. D. M. G. vol. LV. p. 579); compare a similar ptovision in the Śulbasūtra of Kātyāyana q. by राघवभट्ट on शारदातिलक III. 57. Vide 'The science of the Śulba' (a study in early Hindu Geometry) by Bibhutibhushan Datta (Calcutta, 1932) pp. 140 ff. The three fire-mounds required in vedic sacrifices are Gārhapatya, Āhavanīya and Dakṣiṇāgni and they have to be respectively circular, square and semi-circular in form and a further requirement is that all the three have to be equal in area. Therefore, the Āp. Śulbasūtra provides a method for securing this when it says that a person desiring to make a circle (equal in area) to a square etc.

1853. तस्मिन् मण्डलमालिख्य कल्पयेच्च मेदिनीम्। नानारत्नाकरवतीं स्थानानि विविधानि च।... वर्णकैर्विविधैः कृत्वा हृद्यैर्गन्धगुणान्वितैः। यथास्वं पूजयेद्विद्वान्गन्धमाल्यानुलेपनैः। बृहत्संहिता 47. 24 ff. तस्मिन् refers to भूमदेशे.

1854. महामण्डलमिवानेकवर्णरागमालिखन्तं ... शिवकलिमिव विष्णु विक्षिपन्तं (भैरवाचार्यं...) ददर्श। हर्षचरित III.

residence for kings or rich people. The Śāradātilaka (III. 106-130) deals at length with the construction of a Sarvatobhadra-maṇḍala and remarks that it is common to all worship[1856] and provides (III. 122-124) that the maṇḍala should be drawn with five coloured powders viz. yellow with turmeric powder, white produced from husked grains of rice, red with Kusumbha powder, black with the fine powder of half burnt inferior cereals sprinkled with milk and greenish with powder of the leaves of bilva. The Prapañcasāra (V. 64-65) and Agni (30. 19-20) provide for similar coloured powders. The Vāstuyāgatattva of Raghunandana (p. 416) quotes the Śāradātilaka (III. 123-124) about the five powders. The Jñānārṇavatantra (24. 8-10 and 26. 15-17) appears to hold that maṇḍala and *cakra* are synonyms and states that a maṇḍala with nine angles may be drawn on an altar in a pavilion (maṇḍapa) with saffron or vermilion powder.[1857] The Mahānirvāṇatantra also refers to maṇḍalas drawn with coloured powders (X. 137-138). Four characteristics of maṇḍala ceremonies are maṇḍala, mantra, pūjā and mudrā.

The Buddhist tantras also make much of maṇḍalas. In the Mañjuśrīmūlakalpa maṇḍalas are described with special directions for painting them. The Guhyasamājatantra speaks of a maṇḍala of 16 cubits with a *cakra* inside. Vide Prof. G. Tucci's 'Indo-Tibetica' vol. IV part I (Rome, 1941) which gives tables containing maṇḍalas and A. Getty's 'The Gods of Northern Buddhism' (1908) Plate XVI for a maṇḍala of nine elements, and 'Contributions to the study of maṇḍala and mudrā' by Erik Haarh pp. 57-91 of vol. XXIII. Nos. 1 and 2 (1958) of Acta Orientalia of the Oriental Societies of Denmark, Norway &c. in which at the end there are photographs of about 100 hand poses (mudrās). The Niṣpannayogāvali (G. O. S.) of Abhayākara-gupta, a contemporary of Rāmapāla, king of Bengal (1084-1130 A. D.), describes 26 maṇḍalas in 26 chapters, each maṇḍala having a central deity and other minor Buddhist divinities, sometimes more than one hundred in number.[1858]

1856. मण्डलं सर्वतोभद्रमेतत्साधारणं स्मृतम्। शारदा० III. 131.

1857. मण्डपं (पे?) वेदिकां कृत्वा पुष्पवैतानमण्डितम्। ...वेदिकायां वरारोहे कुंकुमेनाथ वा प्रिये। सिन्दूररजसा वापि विलिखेच्चक्रमुत्तमम्। ज्ञानार्णव 24. 8-10; नवकोणं विरचयाथ सिन्दूरेण महाप्रभम्। कलशाद् नव संस्थाप्य हेमरत्नादिपूरितान्। एकं वा कलशं रम्यं स्थापयेद्देशिकोत्तमः। दक्षतो मण्डलं कृत्वा कुङ्कुमाद्यैर्विचित्रितम्। ibid. 26. 15-16.

1858. Vide Dr. B. Bhattacharya's article in J. G. J. R. I. Vol. VI. pp. 273-281 for the importance of Niṣpannayogāvali of Abhayākaragupta for Buddhist deities and psychic literature.

In the collection of the rites and worship called 'Rgvedabrahmakarmasamuccaya' published by the Nirnayasāgara Press (6th ed. Bombay 1935) there are at the beginning several maṇḍalas, plain or drawn in various colours, such as the Sarvatobhadra, Caturliṅgatobhadra, Prāsādavāstumaṇḍala, Gṛhavāstumaṇḍala, Grahadevatāmaṇḍala, Hariharamaṇḍala, Ekaliṅgatobhadra. The Smṛtikaustubha mentions Dvādaśaliṅgatobhadra, Hariharamaṇḍala inside which there is Sarvatobhadra pp. 410–411 (of Nirn. ed. of 1909). They are all passed over here. Sarvatobhadra literally means 'auspicious on all sides'. This concept of an auspicious figure or diagram was carried over in the realm of Poetics. Daṇḍin in his Kāvyādarśa cites a verse in the form called Sarvatobhadra, which is an illustration of what are called 'citra-bandhas'.[1859] About a century before Daṇḍin, the Kirātārjunīya (15. 25) gives an illustration of 'sarvatobhadra'.

In the Acta Orientalia volume referred to above there is an interesting analysis of the contents of two Tibetan mss., one containing what is called 'Rice-maṇḍala' in which 37 elements

1859. आहुर्वर्त्मेदं नाम श्लोकार्धभ्रमणं यदि। तादृष्टं सर्वतोभद्रं भ्रमणं यदि सर्वतः॥ काव्यादर्श III. 80. किरातार्जुनीय (sarga 15 v. 25) furnishes the following as सर्वतोभद्रः देवाकालिनिकावादे वाहिकास्त्वस्वकाहि वा। काकारेमभरे काका निस्वभव्यभवानि॥ An example of a verse in the सर्वतोभद्रबन्ध is furnished by काव्यादर्श III. 82, which is as follows:

सा	मा	या	मा	मा	या	मा	सा
मा	रा	ना	या	या	ना	रा	मा
या	ना	वा	रा	रा	वा	ना	या
मा	या	रा	मा	मा	रा	या	मा
मा	या	रा	मा	मा	रा	या	मा
या	ना	वा	रा	रा	वा	ना	या
मा	रा	ना	या	या	ना	रा	मा
सा	मा	या	मा	मा	या	मा	सा

are indicated by their names (vide figure 1) and the other containing 123 drawings of mudrās (hand poses).

Another characteristic item in Tāntrik worship is '*yantra*' (geometrical diagram), sometimes called *cakra* also, which one finds to some extent also in the Purāṇas and slightly in modern orthodox practices. A *yantra* is a diagram (or figure) engraved, drawn or painted on metal, stone, paper or other material. It resembles a maṇḍala but differs from it in this that a maṇḍala may be employed in the worship of any *devatā*, while a yantra is specially appropriated to the worship of a particular deity or employed for a particular purpose. The Kulārṇava-tantra[1860] states; 'Yantra is a development (or product) of mantra and a deity apprehended in the form of a mantra; the deity worshipped on the yantra immediately becomes favourable; yantra is so called because it removes all pains (or perturbations) arising from such faults as love and anger; if God is worshipped in yantras, he is pleased'. The same Tantra further says 'if worship is done without a yantra the *devatā* is not pleased'. Here the word 'yantra' is derived from the root 'yantr'. In another place the same tantra states 'Yantra is so declared because it always saves (the worshipper) from Yama (god of death) and goblins and other dangers'. The Rāmapūrvatāpanīya Upaniṣad[1861] observes 'the arrangement (or preparation) of a yantra is the body of the deity which confers safety'. The Kaulāvalīnirṇaya observes 'worship (of a deity) without employing a yantra, satiating (the goddess) without offering flesh, drinking wine without being accompanied by a Śakti (the wife or other woman associated with a Śākta worshipper)-all these yield no fruit.' Some works evolved a 'yantra-gāyatrī' also.[1862]

1860. यन्त्रं मन्त्रमयं प्रोक्तं देवता मन्त्ररूपिणी। यन्त्रे सा पूजिता देवी सहसैव प्रसीदति॥ कामक्रोधादिदोषोत्थसर्वदुःखनियन्त्रणात्। यन्त्रमित्याहुरेतस्मिन् देवः प्रीणाति पूजितः॥ कुलार्णव VI. 85–86 (The first half verse is quoted from अगस्त्यसंहिता by व. कि. कौ. p. 147); विना यन्त्रेण पूजा चेद् देवता न प्रसीदति। Ibid. X. 109; यमभूतादिसर्वेभ्यो भयेभ्योपि कुलेश्वरि। त्रायते सततं चैव तस्माद्यन्त्रमितीरितम्। Ibid XVII. 61. Here य is supposed to stand for यम and others, त्र is derived from the root 'trai' (or 'trā'). विना यन्त्रेण या पूजा विना मांसेन तर्पणम्। विना शक्त्या तु यत्पानं तत्सर्वं निष्फलं भवेत्॥ कौलावलीनिर्णय VIII. 41-42. साभयस्यास्य देवस्य विग्रहो यन्त्रकल्पना॥ विना यन्त्रेण चेत्पूजा देवता न प्रसीदति। रामपूर्वतापनीयोप. I. 13.

1861. It will be noticed that the latter half is the same as the latter half of कुलार्णव X. 109. Vide Heinrich Zimmer's 'Myths and symbols in Indian Art and civilization' pp. 140–148 on 'yantra'; also अहिर्बुध्न्यसंहिता chap. 36 where the construction and worship of Sudarśanacakra is described.

1862. The यन्त्रगायत्री is: यन्त्रराजाय विद्महे परमेष्ठाय धीमहि। तन्नो यन्त्रं प्रचोदयात्॥ मेरुतन्त्र 33. 13.

These passages make it clear that a yantra was deemed to be a factor helping in restraining the restless movements of the mind due to anger, love and the like and in making the mind concentrate on a diagram or model deemed to represent the deity worshipped. It induced concentration and encouraged the mental realization of the deity. The distinction between the *devatā* and yantra is similar to that between the soul and the body. Most Hindus look upon such forms of worship without antipathy because it is felt that they serve as a way of approach to divinity for ordinary unsophisticated people and that it is better to have one's foot on the lowest rung of the ladder to higher life than to have it on no rung at all.

Yantras are described in such Tāntrik and other works as Tripurātāpanī Upaniṣad (II. 3), Prapañcasāratantra (paṭalas 21 and 34), Śāradātilaka (VII. 53-63, XXIV), Kāmakalāvilāsa (verses 22, 26, 29, 30, 33), Nityāṣoḍaśikārṇava (I. 31-43) Nityotsava (pp. 6, 64–65), Tantra-rājatantra (II. 44–51, VIII. 30 ff. XXXIII), Ahirbudhnyasaṁhitā (chap. 23–26), Mantramahodadhi (20th Taraṅga), Kaulajñānanirṇaya (X, which speaks of them as cakras), Kaulāvalīnirṇaya (III. 105–135), Merutantra (33rd prakāśa, 562 verses), Mantramahārṇava-tantra (Uttarakhaṇḍa, 11th taraṅga). It is not possible to deal with all this large material here. The Padma (Pātālakhaṇḍa, 79. 1) provides that the worship of Hari (Viṣṇu) may be performed on the Śālagrāma stone or on a jewel or a yantra, a maṇḍala, or images, and not merely in a temple. The Ahirbudhnya-saṁhitā (chap. 36, verses 5-66) describes the procedure of the worship of a Sudarśana-yantra by a king or other personage desiring wealth or prosperity. One yantra or cakra may be explained and illustrated here. The most noted is *Śrīcakra* described in two verses quoted[1863] below and explained in some detail in the

1863. बिन्दु-त्रिकोण-वसुकोणदशारयुग्म-मन्वस्रनागदलसंयुतषोडशारम् । वृत्तत्रयं च धरणीसदनत्रयं च श्रीचक्रराजमुदितं परदेवतायाः॥ q. by शङ्करविजय of आनन्दगिरि (B. I. ed. of 1868) p. 255 and by सेतुबन्ध on नित्याषोडशिका 1. 31 from यामल (*probably from the* रुद्रयामल *said to be composed by the great* शङ्कराचार्य *himself*) and चतुर्भिः श्रीकण्ठैः शिवयुवतिभिः पञ्चभिरपि प्रभिन्नाभिः शम्भोर्नवभिरपि मूलप्रकृतिभिः। त्रयश्चत्वारिंशद्वसुदलकलाश्रत्रिवलयत्रिरेखाभिः सार्धं तव भवनकोणाः परिणताः॥ सौन्दर्यलहरी verse 11 in ed, by Ganesh and Co. Madras, 1957 with Com. लक्ष्मीधरा. Some writers read in the 2nd verse चतुश्चत्वारिंशत्. वसु stands for 8, मनु for 14, नाग for 8, कला for 16. There are two ways of describing it viz. from the bindu onwards (which is called Sṛṣṭi-krama) or from the outer lines to the bindu (which is called saṁhāra-krama). Vide 'Shakti and Shākta' by Sir John

(*Continued on next page*)

Setubandha commentary on Nityāṣoḍaśikārṇava (I. 31–46). The latter verses explain how the Cakra is to be drawn with the bindu in a small triangle. The bindu represents Śakti or Mūla-prakṛti solidified. In published works on Tantra the Śrīcakra is represented in colours (as in Saundaryalaharī published by Ganesh & Co. Madras, 1957, facing the title page), while others represent it only by means of plain uncoloured lines (as on the outer cover of the above edition of Saundaryalaharī or on the cover of the Kāmakalāvilāsa ed. by A. Avalon and published by Ganesh and Co. 1953). In some works the figure of Śrīcakra shows no gates as on the cover in 'Principles of Tantra' by A. Avalon or on the cover of Kāmakalāvilāsa, while gates are shown in other works (as in the above edition of Saundaryalaharī before the Sanskrit text). There are nine triangles, five of which have their apex pointing downwards and these represent Śakti and four (representing Śiva) have an apex pointing upwards. The bindu is situated in the smallest triangle pointing downwards. Then there are two pairs of ten triangles (shown in some books as blue and red respectively), then fourteen triangles (coloured blue in some works), then eight-petalled lotus (sometimes coloured red), 16 petalled lotus (coloured blue), then three circles, then three boundary lines with four gates, these two latter being the outer sections of the yantra and the lotuses of 8 and 16 petals being the inner section of the yantra. There are in all 43 angles (some works make 44). The part of the Cakra within the boundary lines is called *bhūpura*. The worship of yantra is *bahiryāga* (outer or external worship of Śakti). The internal worship (*antaryāga*) consists in taking the awakened Kuṇḍalinī through the cakras from Mūlādhāra to Ājñācakra and then uniting it with the Lord Śiva in the Sahasrāra-cakra, the six cakras from Mūlādhāra being identified with

---

(*Continued from last page*)

Woodroffe (3rd edition of 1929 published by Ganesh & Co, Madras) pp. 399 ff for explanation of the figure of Śrīcakra. A tāntrik work called Devī-rahasya (D. C. ms. No. 490 of 1895–98) quotes the verse बिन्दुत्रिकोण...देवताया: (on folio 31a) but also cites another verse describing this चक्र somewhat differently. Cakras are differently enumerated in different works. For example, in D. C. ms. No. 962 of 1884–1887 called चक्रभेद, five cakras employed in the worship of Durgā according to Kaulāgama are राजचक्र, महाचक्र, देवचक्र, वीरचक्र and पशुचक्र (Cat. vol. XVI. on Tantra p. 163), while in another ms. D, C. No 964 of 1887–91, several other cakras are described such as अकडमचक्र, ऋणधनशोधनचक्र, राशिचक्र, नक्षत्रचक्र (Cat. vol. XVI. on Tantra p. 251).

the five elements and mind. This is described in Saundaryalaharī (verse 9). To what lengths 'Śakti' worshippers had gone in the worship of Devī by the *bahiryāga* method would be clear from a passage quoted from the commentary of Lakṣmīdhara, almost the latest among the numerous commentators of the Saundaryalaharī, who was horrified by the methods of Kaulikas.[1864]

The Setubandha on Nityāṣoḍaśikārṇava is at great pains to emphasize that the worship of Tripurasundarī is of the nature of upāsanā and not of the nature of *bhakti* and that this upāsanā is of two sorts, one consisting of the recitation of the mantra of the Devī and the other consisting of the worship of the yantra[1865] (or cakra). Verses 126–204 of the Nityāṣoḍaśikārṇava detail the different items in the worship of the Śrīcakra. The Nityāṣoḍaśikā and other Tāntrik works say that the great Tripurasundarī is seated in the Śrīcakra.[1866] The great aim of the Śākta *sādhaka* is apparently to realize his identity with the yantra, the mantra, the guru and Tripurādevī. The Varṣakriyākaumudī quotes a verse stating that worship of yantra performed with all mantras is commended and by so doing a worshipper may secure whatever he desires.[1867]

Even a comparatively sober work like the Śāradātilaka provides for the drawing up of yantras for wicked purposes. For example, in VII. 58–59 it describes an Āgneya-yantra to be drawn on a garment secured from a pile in a cemetery and buried near the house of one's enemy for the latter's destruction.

1864. तवाधारे मूले सह समयया लास्यपरया नवात्मानं मन्ये नवरसमहाताण्डवनटम्। उभाभ्यामेताभ्यामुदयविधिमुद्दिश्य दयया सनाथाभ्यां जज्ञे जनकजननीमज्जगदिदम्॥ सौन्दर्य० verse 41 p. 181 (ed. of Ganesh and co. 1951). The com. of लक्ष्मीधर remarks 'अत एव कौलास्त्रिकोणे बिन्दुं नित्यं समर्चयन्ति। ... श्रीचक्रस्थितनवयोनिमध्यगतयोनिं भूजहेमपद्मरत्नपीठादौ लिखितां पूर्वकौलाः पूजयन्ति। तरुण्याः प्रत्यक्षयोनिमुत्तरकौलाः पूजयन्ति। उभयं योनिद्वयं बाह्यमेव नान्तरम्। अतस्तेषामाधारचक्रमेव पूज्यम्। ... अत्र बहु वक्तव्यमस्ति तत्तु अवैदिकमार्गत्वात् स्मरणार्हमपि न भवति।'.

1865. अस्य तन्त्रस्य प्राधान्येन त्रिपुरसुन्दर्युपासनाविधान एव तात्पर्यावगमात्। सा चोपासना मानसक्रियाविशेषरूपा। ... तस्मादनुरागव्यावृत्ता क्रियैवोपासना। सा च द्विविधा-तन्मन्त्रजपरूपा तद्यन्त्रपूजारूपा चेति। सेतुबन्ध on नित्या० I. 125 p. 68.

1866. संस्थितात्र महाचक्रे महात्रिपुरसुन्दरी। नित्याषोडशिका० I. 82; ज्ञाता स्वात्मा भवेज्ज्ञानमर्च्यं ज्ञेयं बहिःस्थितम्। श्रीचक्रपूजनं तेषामेकीकरणमीरितम्॥ तन्त्रराजतन्त्र 35. 6; आसीना बिन्दुमये चक्रे सा त्रिपुरसुन्दरी देवी। कामेश्वराङ्कनिलया कलया चन्द्रस्य कल्पितोत्संगा॥ verse 37 of कामकला०.

1867. सर्वेषामपि मन्त्राणां पूजा यन्त्रे प्रशस्यते। यन्त्रे मन्त्रं समाराध्य यद्यभीष्टं तदाप्नुयात्॥ व. क्रि. कौ. p. 147.

In XXIV. 17–18 and 19–21 two yantras for the destruction of an enemy are described. Vide above p. 1105 for Prapañcasāra (34. 33) providing a yantra for creating passion in a woman and making her run to the person practising magic.

The Tantrarājatantra provides (8th Paṭala, verses 30–32) that yantras that yield all desired objects should be engraved, painted or drawn on pieces of gold, silver or copper or on cloth or birch leaf with paste of sandalwood, agalochum, camphor, musk or saffron and should be worn on the head or the arms or neck, waist or wrist or one should worship them after placing them somewhere (on the ground &c.); vide also Prapañcasāra-tantra XI. 46 for similar provisions.

At the end of this chapter on Tāntrik doctrines and practices reference must be made to a remarkable circumstance. The Sarvadarśanasaṁgraha of Sāyaṇa-Mādhava (14th century A.D.), that deals with 15 *Darśanas* (points of view or philosophical views), has not a word to say about Tantras, though it devotes considerable space to the atheistic Cārvāka-darśana and the unorthodox Bauddha and Jaina systems. It is impossible to believe that the most learned brothers Sāyaṇa and Mādhava were unaware of the works on Tantra. The silence must be due to some special reason. If one may make a conjecture, it appears that Tāntrik doctrines were discarded for the same reasons that induced the Bengal king Ballālasena in his Dānasāgara to exclude the Devīpurāṇa from the authorities on which he meant to rely. At the time when Sāyaṇa and Mādhava flourished (about middle of 14th century A. D.) Tāntrik doctrines and practices had come into great disrepute. Therefore, Tāntrik doctrines were probably passed over in silence by Sāyaṇa-Mādhava.

APPENDIX TO SECTION VI

Some important published texts consulted by the author on Tāntricism are set out here. Sanskrit works are arranged in the order of the Sanskrit alphabet, but are transliterated in English and their names are printed in italics. Information about authors, dates and editions is set out briefly where available.

Advayavajrasaṅgraha of Advayavajra (11th century A. D.); contains 21 short works on Buddhist philosophy (in G.O.S.), ed. by H. P. Shastri, with a valuable Introduction.

Ārya-Mañjuśrīmūlakalpa (published in TSS in three parts and 721 pages); contains parts of different dates (from 4th to 9th century A. D.). It is Buddhist and included in Tibetan Kangyur. It has now 55 chapters, but a Chinese translation of 10th century has only 28 chapters. Dr. B. Bhattacharya ascribes it to 2nd century A. D.; but Winternitz disagrees (vide IHQ. IX. pp. 1 ff.). Jayaswal in 'Imperial History of India' gives the text of *paṭalavisara* 53 containing 1003 verses, out of which verses 6-344 deal with the biography of Buddha up to his *nirvāṇa* and real history is given from about 78 A. D. to 8th century A. D. in verses 345-980.

Īśānaśivagurudevapaddhati of Īśānaśivagurudevamiśra, in four parts, Sāmānyapāda, Mantrapāda, Kriyāpāda and Yogapāda; it contains about 18000 ślokas and is published in T. S. S.; it mentions Gautamīya Tantra, Prapañcasāra and Bhojarāja; composed about 1100 A. D. or a little later.

Kāmakalāvilāsa of Puṇyānandanātha, with the commentary Cidvallī of Naṭanānandanātha (Kashmir S. S.); there are 55 verses with tr. and notes by Arthur Avalon (pub. by Ganesh & Co. Madras, 1953), originally in Tāntrik Texts vol. X.

Kālacakratantra (Buddhist)-Vide J. A. S. B., Letters, vol. XXVIII (1952) pp. 71-76 for an account of this work by Biswanath Bandopadhyaya

Kūlajñānanirṇaya-ed. by Prof. P. C. Bagchi (in Calcutta S. Series, 1934); H. P. Shastri assigned the ms. of it to 9th century A. D., but Prof. Bagchi (p. 3) places it in the

middle of the 11th century A. D. It is ascribed to Matsyendrapāda in the colophons. Vide p. 1115, n 1820 above for Matsyendranātha.

Kālivilāsatantra—ed. by A. Avalon in Tāntrik Texts, vol. VI (1917) in 35 paṭalas. In X. 20-21 it frankly allows adultery provided the sexual act is not completed. It mentions (in XX. 1) the Kālikāpurāṇa and in XV. 12–13 contains a mantra in a language resembling Assamese and eastern Bengali.

Kulacūḍāmaṇi-tantra (ed. by A. Avalon in Tāntrik Texts, vol. IV, 1915) in seven paṭalas and 430 verses. In I. 4–12 names of 64 tantras are cited.

Kulārṇava-tantra—It is in 17 *ullāsas* and contains over 2000 verses. It is a famous work profusely quoted (published in Tāntrik Texts, vol. V, London, 1917). It is an early tantra, probably composed before 1000 A. D. In the colophons it is said to be a tantra of the Ūrdhvāmnāya (the fifth of the five āmnāyas) and as part of the work of one lakh and a quarter verses. Vide A. B. O. R. I. vol. XIII. pp. 206–211 for a paper on 'Kulārṇava-tantra, its extent and contents' by Prof. Chintaharan Chakravarti.

Kaulāvalīnirṇaya of Jñānānandagiri in twenty-one *ullāsas*, ed. by A. Avalon in Tāntrik Texts, vol. XIV; in I. 2–14 names numerous Tantras including yāmalas and in I. 92–93 eight former gurus are named.

Gaṇapatitattva – Old Javanese Text, critically edited, annotated and translated by Dr. (Mrs.) Sudarśadevī Singhal (pub. by International Academy of Sciences, New Delhi, 1958); refers to Mūlādhāra and other Cakras with their positions and colours, six aṅgas of Yoga excluding *yama*, *niyama*, *āsana* and adding *tarka*; gives an account of the production of *nāda* from Niṣkala and of bindu from nāda and so on, of mantras, *bījās* &c.

Guhyasamājatantra or *Tathāgata-guhyaka* (*Buddhist*): It is published in G. O. S.; it is assigned to 4th century A. D. by Dr. B. Bhattacharya (in Intro. to Sādhanamālā, vol. II, p. XCV); vide p. 1050 above for criticism of this view. It probably belongs to the 5th or 6th century A. D. Vide notes 1673 and 1691.

Gorakṣasiddhāntasaṅgraha published in S. B. Texts (1925); mixture of Yoga and Tantra.

Cidgaganacandrikā; ascribed to Kālidāsa; ed. by Trivikramatirtha in Tāntrik Texts, Vol. XX.

Jayākhyasaṁhitā (published in G. O. S.)—a Pāñcarātra work ascribed to 450 A. D. by Dr. B. Bhattacharya; contains some Tantra topics such as Yakṣiṇī-sādhana, Cakrayantra-sādhana, Stambhana.

Jñānasiddhi of king Indrabhūti, disciple of Anaṅgavajra and father of guru Padmasambhava; pub. in 'Two Vajrayāna Texts' (G. O, S.); assigned to about 717 A. D. (Intro. p. 10); gives in a nutshell leading doctrines of Vajrayāna.

Jñānārṇavatantra, pub. by Anan. Press, Poona; contains 26 paṭalas and about 2300 verses.

Tantrarājatantra, ed. in Tāntrik Texts, vol. VIII and XII and pub. by Ganesh & Co. Madras, 1954, with the commentary Manoramā by Subhagānandanātha; it has 36 chapters. It gives an account of the Kādimata.

Tantrasāra of Kṛṣṇānanda, pub. in Ch. S. S.; about 17th century A. D.

Tantrasāra of Abinavagupta, a summary of Tantrāloka, pub. in Kashmir S. S. (1918). About the first quarter of 11th century A. D.

Tantrābhidhāna with Bījanighaṇṭu and Mudrānighaṇṭu, ed. by A. Avalon in Tāntrik Texts, vol. I. (1913).

Tantrāloka of Abhinavagupta with the com. of Jayaratha, pub. in Kashmir S. S. in several volumes; composed about 1000 A. D.

Tārātantra, ed. by Śrī Girisacandra and pub. in the Gauḍa-granthamālā No. 1 (1913); in 6 paṭalas and 150 verses. It declares that Buddha and Vasiṣṭha were Tāntrik sages of old and nine Kaula gurus whose names end in 'nātha' are mentioned; refers to Mahācīnākhya Tantra and provides for devotee (only male) offering his own blood to Tārā.

Tārābhaktisudhārṇava, of Narasiṁha Ṭhakkura, who was 5th in descent from Govinda Ṭhakkura, author of Pradīpa, com. on Kāvyaprakāśa; composed about 1680 A. D.; ed. by Pancanan Bhattacharya (in Tāntrik Texts vol. XXI, 1940);

a large work in eleven Taraṅgas and 435 pages on the worship of Tārā, one of ten vidyās connected with Śakti (not the Buddhist divinity Tārā). The 9th Taraṅga deals with the horrible rite of Śavasādhana (pp. 345–351).

Tārārahasya of Brahmānanda, pub. by Jivananda (1896); mentions Mahācīna, Nīlatantra, Yoginītantra, Rudrayāmala.

Tripurārahasya of Hārītāyana, with com. called Tātparyadīpikā of Śrīnivāsa; pub. in S. B. series; it is a discourse by Hārītāyana to Nārada. Tārākhaṇḍa portion of it is philosophical.

Tripurāsārasamuccaya of Nāgabhaṭṭa with the com. of Govindācārya; pub. by Jivananda (1897).

Dakṣiṇāmūrti-saṁhitā on Śrīvidyopāsanā in 65 paṭalas and about 1700 verses; pub. in S. B. series.

Nityāṣoḍaśikārṇava (part of Vāmakeśvaratantra) with the com. Setubandha by Bhāskararāya (1700–1750 A. D.); pub. by Anan. Press (1944).

Nityotsava of Umānandanātha (who bore the name of Jagannātha before *dīkṣā* and who was a Mahārāṣṭra brāhmaṇa patronized by the Tanjore Maratha Chief); this is a supplement to Paraśurāmakalpasūtra; Umānandanātha was a pupil of Bhāsurānandanātha (Bhāskararāya before dīkṣā) and composed the work in Kali era 'rasārṇava-karivedamiteṣu' (Kali 4846 i. e. 1745 A. D.). It is probable that the word arṇava is used for seven instead of for 4 as usual (i. e. 4876, equal to 1775 A. D.); pub. in G. O. S. (1923).

Niṣpannayogāvalī of Abhayākaragupta, a contemporary of king Rāmapāla of Bengal (1084–1130 A. D.). It is Buddhist. The author was a Professor at the Vikramaśilā University in Bihar; describes 26 maṇḍalas, each having a central deity and other minor Buddhist deities that sometimes exceed 100. It is valuable for later Buddhism, its pantheon and ritual; pub. in G. O. S. (1949).

Paraśurāmakalpasūtra, with com. Saubhāgyodayā of Rāmeśvara, pub. in G. O. S. (1923); earlier than 1300 A. D.; claims to be composed by Paraśurāma, son of Jamadagni and chief disciple of Lord Mahādeva.

Pādukāpañcaka, ed. by A. Avalon in Tāntrik Texts, vol. II (1913).

Pārānandasūtra, pub. in G. O. S. (1931); not earlier than 900 A. D., says Dr. B. Bhattacarya.

Prajñopāya-viniścaya-siddhi of Anaṅgavajra, one of the 84 siddhas venerated in Tibet; Buddhist Vajrayāna work pub. in G. O. S. (1929); composed about 705 A. D. acc. to Dr. B. Bhattacharya in Intro. p. XII.

Prapañcasāra (ascribed to Śaṅkarācārya) with com. Vivaraṇa by Padmapāda; pub. in Tāntrik Texts (vol. III) and later a new ed in vol. XVIII–XIX (1939). Vide p. 1105 above. In 36 paṭalas.

Prāṇatoṣiṇī, compiled by Rāmatoṣaṇa Bhattacharya and pub. by Jivananda (Calcutta); it is a very large modern work in 1097 pages.

Brahmasaṁhitā, with the commentary of Jīva Gosvāmi; for Vaiṣṇavas; pub. in Tāntrik texts, vol. XV.

Mantramahodadhi of Mahīdhara with his own commentary; composed in Vikrama year 1645 (1588–89) A. D.; pub. by Jīv. and Venk. Press.

Mahānirvāṇatantra, with the com. of Hariharānanda Bhāratī. It is a leading but late work on Tantra, published very often; ed. by A. Avalon in Tāntrik Texts, vol. XIII in 14 *Ullāsas* as the first part; the ed. of 1929 by Ganesh & Co. has been used in this work; the third ed. of 1953 differs slightly here and there.

Mātṛkā-cakra-viveka of Svatantrānandanātha, with the com. of Śivānanda; pub. in S. B. series, 1934.

Māheśvaratantra, in 51 paṭalas and 3060 verses (pub. in Ch. S. S.); mentions that Tantras are 64 (1. 15 and 26. 11) and names 25 Vaiṣṇava tantras (26. 16–20) and holds that Bauddha tantras are misleading and meant for cruel rites (26. 21–22).

Merutantra; extensive work in 35 chapters, 821 pages and about 16000 verses; pub. by Venk. Press, Bombay, 1908.

Yoginītantra, published by Jivananda; q. by Raghunandana in Ekādaśītattva p. 58.

Yoginīhṛdaya—the last three chapters of Nityāṣoḍaśikārṇava (VI–VIII) are so called.

Yoginīhṛdayadīpikā of Amṛtānandanātha, disciple of Puṇyānandanātha, pub. in S. B. series, 1923; about 10th or 11th century A. D.

Rudrayāmalatantra, ed. by Jivananda (2nd ed. in 1892). A very extensive work in 66 chapters and in over 6000 verses

(mostly in Anuṣṭubh metre), supposed to have been declared by Bhairavī to Bhairava (Śiva). It was said to be a huge work in a lakh and a quarter ślokas, e. g. D. C. ms. No. 667 (*i*) of 1895–1902 called Dhanadāpuraścaraṇavidhi states in the colophon that it is part of the Rudrayāmala (iti Rudrayāmala-sapādalakṣagrantho.... Kiṅkiṇī-tantrokta-Dhanadā-puraścaraṇa-vidhiḥ; BORI cat. of mss., vol. XVI. on Tantra p. 247).

Lalitāsahasranāma with the com. Saubhāgyabhāskara of Bhāskararāya son of Gambhīrarāya, minister of the Bijapur Moslem king; written in *saṁvat* 1785 i. e. 1729 A. D.; Nir. ed. of 1935.

Varivasyārahasya of Bhāskararāya (called Bhāsurānandanātha after dīkṣā) with his own com. called Prakāśa. He flourished between 1700–1750 A. D.; pub. at Adyar, 1934.

Viṣṇu-saṁhitā in 30 paṭalas; pub. in T. S. S. 1925.

Śaktisaṅgamatantra, in four parts, viz. Kālī, Tārā, Sundarī and Chinnamastā; three parts dealing with the first three pub. in G. O. S.; between 1505–1607 A. D. Vide Poona Orientalist, vol. XXI. pp. 47–49 (between 1530–1700 A. D.).

Śaktisūtra—Vide Sarasvatībhavana Studies, vol. X. (pp. 182–187); has 113 sūtras and com. on 19 sūtras; attributed to Agastya by the commentary; the sūtra mentions Jaimini and Vyāsa.

Śāktapramoda (a recent work), compiled by Śrīrājadevanandanasiṁha, chief of Śivahara; pub. by Venk. Press, 1951; contains 17 tantras viz. Kālītantra, tantras called Ṣoḍaśī, Bhuvaneśvarī, Chinnamastā, Tripurabhairavī, Dhūmavatī, Bagalāmukhī, Mātaṅgī, Kamalātmikā, Kumārikā, Balidānakrama, Durgā, Śiva, Gaṇeśa, Sūrya, Viṣṇu.

Śaradātilaka of Lakṣmaṇa-deśikendra (disciple of Utpala); one of the most famous works on tantra. Aufrecht (p. 64) enumerates several commentaries, the most learned and lucid of which is the Padārthādarśa of Rāghavabhaṭṭa, composed in *saṁvat* 1550 (i. e. 1493–94 A. D.). Rāghavabhaṭṭa hailed from Mahārāṣṭra and was a resident of town Janasthāna (Pañcavaṭī) on the banks of the Godāvarī; pub. in Kashi S. S. and in Tāntrik Texts, vol. XVI and XVII. Śāradātilaka was composed about the 11th century

A. D. Raghunandana expressly names Rāghavabhaṭṭa as the commentator of the Śāradatilaka in Jyotistattva p. 580.

Śricakrasambhāratantra—A Buddhist work; Tibetan text and English translation by Lama Kazi Dawa Samdup and edited in Tāntrik Texts, vol. VII by A. Avalon, 1919.

Śyāmārahasya of Pūrṇānanda in 16 chapters, ed. by Jivananda; 16th century A. D.

Ṣaṭ-cakra nirūpaṇa, of Pūrṇānanda in 85 verses; pub. in Tāntrik Texts, vol. II; composed śaka 1499 (i. e. 1577–78 A. D.).

Sanatkumāra-tantra – is a dialogue between Sanatkumāra and Pulastya in eleven paṭalas and about 375 verses. Published by Jyestharam Mukundji in Bombay in 1905. It is a mixture of Yoga and tāntrik technique and inculcates the worship of Kṛṣṇa in Tāntrik bījas like 'klīm, gauṁ &c'.

Sādhanamālā, published in two volumes in G. O. S. with a long Intro. to vol. II by Dr. B. Bhattacharya; contains 312 Sādhanas, many of which are anonymous and are known to Tibetan Kangyur; Dr. Bhattacharya states that the Sādhanas range in dates from third century A. D. to 12th century A. D. Winternitz, in I. H. Q. vol. IX (pp. 5–6), does not accept the view that the Prajñāpāramitāsādhana was composed by Asaṅga.

Sāmrājya lakṣmī-pīṭhikā – said to be part of Ākāśa-bhairava Mahātantra, published in Tanjore Sarasvatī Mahal Series in 139 chapters, of which the first 30 are connected with mantra, japa, homa,; chapters 31 ff deal in detail with departments of State, coronation (chap. 43 ff) and festivals like those of New Year, Rāmanavamī, Navarātra, &c.

Sekoddeśaṭīkā – a Buddhist work of Śrīnaḍapāda,; text ed. by Mario E. Carelli in G. O. S. with an Intro. in English.

Saundaryalaharī, ascribed to the great Śaṅkarācārya, has numerous commentaries; ed. by Sir John Woodroffe and pub. at Adyar (1937); ed. of 1957 with three commentaries and English translation published by Ganesh & Co. Madras. There is an excellent edition of this work in 100 verses (text, English translation by Prof. W. Norman Brown, Harvard University Press, 1958).

Śrīvidyāratnasūtra, attributed to Gauḍapāda (in 101 sūtras) with the commentary of Śaṅkarācārya, pupil of Vidyāraṇya,

on 21 sūtras; ed. by Pandit Gopinatha Kaviraja in S. B. Texts series, Benares (1924).

Haṁsavilāsa, of Haṁsamiṭṭhu; pub. in G. O. S. (1937); the author was born in Gujarat in Vikrama year 1794 on Phālguna Full moon day (1738 A. D.). Though not a purely Tāntrik work it quotes many Tāntrik works such as the Kulārṇava (pp. 68–76), Kaularahasya (p. 104), Yoginī-tantra (p. 103), Śāradātilaka (pp. 84–85, 105 ff). It deals with many other topics such as figures of speech, erotic subjects.

Hevajratantra, edited and translated by Dr. D. L. Snellgrove (Oxford University Press, 1959), in two parts. This work came to the author's hands while this Appendix was passing through the Press. Part I (pub. in 1959) contains Introduction (pp. 1–46), English translation (pp. 47–119), contents (pp. 121–125), diagrams (pp. 126–129), Glossary (pp. 131–141) and Index (pp. 142–190); Part II contains Sanskrit texts and Tibetan texts based on a Nepalese ms. lent by Prof. Tucci; com. called Yogaratnamālā by Pandita Kāṅha has been included from an old Bengali ms. The editor holds (part I p. 14) that Hevajratantra was in existence towards the end of 8th century A. D. and that Advayavajra-saṅgraha and Sekoddeśaṭīka borrow from Hevajra-tantra. Sādhanamālā No. 229 (two opening verses) are the same as Hevajra II. 8. 6–7. Hevajra is an invocation of vajra. On p. 11 part I the editor questions how the yogins could call themselves Buddhists when they experienced enlightenment in the embrace of a yoginī. Part I p. 70 mentions Jālandhara, Oḍḍiyāna, Paurṇagiri as pīṭhas and several upapīṭhas, upakṣetras. The term Śakti does not occur in Hevajra but its place is taken by Prajñā. Part II verses 11–15 p. 98 express how the followers of this tantra had sexual experiences with women called mudrās and how thereby they secured *siddhi*. Part I p. 54 contains ritual for gaining mastery over a young woman. Part II p. 2 states 'Hekāreṇa mahākaruṇā vajram Prajñā ca bhaṇyate; Prajñopāyātmakam tantram tan-me nigaditam śruṇu'. This is a very valuable addition to the literature on Tantra and has been very well edited.

Some important works and papers on Tantra—vide also note 1687 for works on Śakti cult.

'Lights on the Tantra' by M. P. Pandit (published by Ganesh & Co., Madras, 1957) This is a booklet of 54 pages of text and pp. 55-71 of notes containing hardly anything valuable of the author's own; over three-fourths of it consists of long quotations from the works of Woodroffe (particularly from 'Śhakti and Śhākta'), Sri Aurobindo and Shri Kapali Sastry and is here and there marked by bold and unwarranted assertions such as 'It is the central truths of the Tantra thought and ritual that form the backbone of the Hindu religion today' (p. 36). The present author repudiates totally this assertion. The author of this booklet has to admit that in the case of the Tāntrik cult that abuse of the body of occult knowledge for malevolent purposes instead of for the material and spiritual advancement of man and the vulgarization of the profound rationale of the mystic ritual are deplorable deformations (p. 36), that there has doubtless been a gross misuse of the knowledge developed by this science and that spurious texts have sprung up (p. 21).

'History of Philosophy, Eastern and Western' ed. by Dr. S. Radhakrishnan, vol. I. pp. 401–428 on 'Exposition of Śākta belief' by M. M. Gopinath Kaviraj (1953).

'Tibetan Book of the Dead' by Dr. W. Y. Evans-Wentz (3rd ed., Oxford University Press, 1957).

'Tibetan Yoga' by Bernard Bromage (2nd ed. 1959 by Aquarium Press) – deals with magical and religious practices of Tibetans, spells, and exercises which are deemed to produce supernatural powers.

SECTION VII

CHAPTER XXVIII

MĪMĀṀSĀ AND DHARMAŚĀSTRA

The Yājñavalkya-smṛti provides that there are fourteen sources of vidyās (knowledge) and of Dharma,[1868] viz. Purāṇa, Nyāya, Mīmāṁsā, Dharmaśāstra, Aṅgas (six) and the Vedas (four). A similar verse is quoted by some as Manu's, but it is not found in the extant Manusmṛti. It is therefore necessary to consider the origin and meaning of the word Mīmāṁsā, to set out the principal doctrines of that Śāstra, to mention the important rules of interpretation and the maxims of the Mīmāṁsā in their application to topics of Dharmaśāstra and to refer to some of the important works of that Śāstra together with their approximate dates.

The word mīmāṁsā has a great antiquity behind it. The Tai. S. VII. 5. 7. 1[1869] says 'the expounders of Brahma (Veda) discuss (the question) whether a day should be omitted or not'. Here the verbal form 'mīmaṁsante' is employed in the sense of discussing or investigating a doubtful point and arriving at a decision thereon. In another passage of the Tai. S. the same form

---

1868. पुराणन्यायमीमांसा ... च चतुर्दश॥ या. I. 3, quoted in n 1337 above. The बृहद्योगियाज्ञवल्क्य reads 'पुराणतर्कमीमांसा ... चतुर्दश' (12.3). अपरार्क p. 6 quotes from विष्णुपुराण the verse 'अङ्गानि वेदाश्चत्वारो मीमांसा न्यायविस्तरः। पुराणं धर्मशास्त्रं च विद्या एताश्चतुर्दश॥'. It is विष्णुपु. III. 6. 27, वायु 61. 78. This is quoted as Manu's by Prof. T. R. Chintamani in JOR, Madras, vol. XI. supplement p. 1. It occurs in भविष्य (ब्राह्मपर्व 2. 6) also. Vide H. of Dh. vol. I. p. 112 note 198 where औशनसधर्मशास्त्र is quoted for 14 विद्याs and H. of Dh. vol. III. p. 10 note 17 (for the four additional vidyās bringing the total up to 18). Vide a recent publication of Dr. G. S. Ghurye (1957, Bombay) on Vidyās (or Indian contribution to Sociology of knowledge) for detailed treatment. Even before the days of Kālidāsa the Vidyās had been 14 as indicated by Raghuvaṁśa V. 21 (वित्तस्य विद्यापरिसंख्यया मे कोटीश्चतस्रो दश चाहरेति॥).

1869. उत्सृज्यां 3 नोत्सृज्या 3 मिति मीमांसन्ते ब्रह्मवादिनस्तद्वाहुरुत्सृज्यमेवेति ...। तै. सं. VII. 5. 7. 1; व्याहृते देवयजने याजयेद्व्याहृत्कामं यं पात्रे वा तल्पे वा मीमांसेरन् ... नैनं पात्रे न तल्पे मीमांसन्ते। तै. सं. VI. 2, 6. 4–5. The last sentence means 'they do not have any doubt about his being fit for dining with them or fit for relation with him by marriage'.

and another 'mīmāṁseran' are used in the same sense. In several other places the Tai. S. raises points for discussion with the words 'the brahmavādins discuss' but without employing the word mīmāṁsante or a cognate word. Vide Tai. S. II. 5. 3. 7 (about the deity of *sānnāyya*), V. 5. 3. 2, VI. 1. 4. 5., VI. 1. 5. 3–5. The Kāṭhaka Saṁhitā[1870] puts forward a doubtful point for investigation without the words 'Brahmavādins say', but with the word 'mīmāṁsante'. The Atharvaveda[1871] states 'men separately discussing many times noted on the earth her actions'. In another place it employs the words *mīmāṁsita* and *mīmāṁsamāna*. The Śāṅkhāyana[1872] Br. has 'they discuss the question whether one should offer homa after the sun rises or before the sun rises'. The Tai. Br. employs the word mīmāṁsā and the Śatapatha also in the Kāṇva recension does so (vide S. B. E. vol. 26 note 1). In the Chāndogyopaniṣad[1873] it is stated that five scholars very learned in the Veda and possessed of large houses (wealth) named Prācīnaśāla Aupamanyava and others got together and entered upon the consideration of the question 'what is (the nature of) our self and what is Brahma-?'. In the Tai. Up. occur the words 'this is the investigation into (the nature of) Bliss (Brahma)'. In both these passages the word mīmāṁsā is used in the sense of 'consideration' (vicāraṇā) of high philosophical topics.'

Pāṇini provides[1874] for the formation of seven roots with *san* affix (Desiderative), one of which is 'mīmāṁsate' from

---

1870. आधेयोऽग्नी ३ नाधेया ३ इति मीमांसन्ते श्वोऽग्निमाधास्यमानेना ३ इति। काठकसं. VIII. 12.

1871. पश्यन्त्यस्याश्चरितं पृथिव्यां पृथङ्नरो बहुधा मीमांसमानाः। अथर्व IX. 1. 3; स य एवं विद्वाञ्च द्विषन्नदीयाञ्च द्विषतोऽन्नमश्नीयाञ्च मीमांसितस्य न मीमांसमानस्य। अथर्व IX. 6 (2). 24.

1872. उदिते होतव्या ३ मनुदित इति मीमांसन्ते। शां. ब्रा. II. 8. Compare मनु II. 15; सैषा मीमांसाऽग्निहोत्र एव सम्पन्ना। तै. ब्रा. III. 10. 9.

1873. प्राचीनशाल औपमन्यवः ... ते हैते महाशाला महाश्रोत्रियाः समेत्य मीमांसां चक्रुः को न आत्मा किं ब्रह्मेति। छा. V. 11. 1; सैषानन्दस्य मीमांसा भवति। तै. उप. II. 8.

1874. गुप्तिज्किद्भ्यः सन्। मान-बध-दान्-शान्भ्यो दीर्घश्चाभ्यासस्य। पा. III. 1. 5–6; the काशिका explains 'मान पूजायाम्। ... एतेभ्यो धातुभ्यो सन् प्रत्ययो भवति। अभ्यासस्य चेकारस्य दीर्घादेशो भवति। मीमांसते ... मानेर्जिज्ञासायाम्।'. The bhāṣya of Śaṅkarācārya on V. S. I. 1 winds up the discussion with the words तस्माद् ब्रह्मजिज्ञासोपन्यासमुखेन वेदान्तवाक्यमीमांसा तद्विरोधितर्कोपकरणा निःश्रेयसप्रयोजना प्रस्तूयते।' on which the भामती remarks 'मान् माने-इत्यस्माद्वा मान पूजायाम्-इत्यस्माद्वातोः, मान-बध इत्यादिनानिच्छार्थे सति स्युत्पादितस्य मीमांसाशब्दस्य पूजितविचारवचनत्वात् &c.

'mān' and the Kāśikā adds that it means 'desire to know i. e. investigation and final conclusion', having in view probably the sūtras 'Athāto dharma-jijñāsā' and 'Athāto brahma-jijñāsā'.

The foregoing brief discussion shows that long before the Upaniṣads the word 'mīmāṁsā' had come to mean 'investigation into a topic of discussion and coming to a conclusion thereon'. The same word acquired a restricted sense (as in the verse of Yāj. quoted above) viz. investigation into Dharma and arriving at conclusions on doubtful matters by interpretation and reasoning.

Some of the Dharmasūtras disclose familiarity with purely Mīmāṁsā terms and principles. For example, Gaut. states[1875] that an option is allowed only when there is a conflict between two texts of equal authority. The Āpastamba Dharmasūtra is the only Dharmasūtra that contains numerous Mīmāṁsā terms and doctrines. It says 'a positive Vedic text has more force than an usage which merely leads to an inference (of its being based on a Vedic text now lost)'.[1876] This is similar to Jaimini I. 3. 3 'If there is a conflict (between an express Vedic text and a smṛti text) the latter is to be discarded but if there be no conflict an inference may be drawn (that the smṛti text is based on some Śruti)'. Āp. says 'the rules about *anadhyāya* (stopping Veda study on *parvan* &c.) are applicable only to learning the Vedic mantras and not to their application in sacrifices'. In another place Āp. provides 'where activity takes place because of finding pleasure therefrom (i. e. from a worldly motive), there is no (inference of its being based on) śāstra', which is similar to Jaimini's rule. For reasons of space other examples of close agreement between Āp. Dh. S.[1877] and Jaimini are simply referred

---

1875. तुल्यबलयोर्विकल्पः। गौ. I. 5; compare जै. XII. 3. 10 एकार्थास्तु विकल्पेरन् समुच्चये ह्यावृत्तिः स्यात्प्रधानस्य; शबर explains: ये त्वेकार्थाः एककार्यास्ते विकल्पेरन् यथा व्रीहियवौ; vide शबर 'तुल्यार्थयोर्हि तुल्यविषययोर्विकल्पो भवति न नानार्थयोः।' on जै. X. 6. 33; compare मनु II. 14 'श्रुतिद्वयं तु यत्र स्यात्तत्र धर्मावुभौ स्मृतौ।'.

1876. श्रुतिर्हि बलीयस्यानुमानिकादाचारात्। आप. ध. I. 1. 4. 8; compare 'विरोधे त्वनपेक्षं स्यादसति ह्यनुमानम्' जै. I. 3, 3; विद्यां प्रत्यनध्यायः श्रूयते न कर्मयोगे मन्त्राणाम्। आप. ध. I. 4. 12. 9, compare जै. XII. 3. 19 विद्यां प्रति विधानाद्वा सर्वकालं प्रयोगः स्यात्कर्मार्थत्वात् प्रयोगस्य।'; यत्र तु प्रीत्युपलब्धितः प्रवृत्तिर्न तत्र शास्त्रमस्ति। आप. ध. 1877. अङ्गानां तु प्रधानैरभ्यपदेश इति न्यायविस्तरमयः। आप. ध. II. 4. 8. 13, compare जैमिनि I. 3. 11-14 (कल्पसूत्राधिकरण); अथापि नित्यानुवादमविधिमाहुर्न्याय-

(*Continued on next page*)

to in the note below and not explained at length. These examples show that in Āpastamba's day Mīmāṁsā doctrines had been far advanced and since he employs the words 'Nyāyavit-samaya' (the *siddhānta* or doctrine of those who know Nyāya) and 'Nyāyavidaḥ', it follows that he is referring to some work on Mīmāṁsā or some author who composed a mīmāṁsā-sūtra. The correspondence in ideas and words between Āp. and the Pūrvamīmāṁsāsūtra is so close that one is tempted to argue that Āp. knew either the extant mīmāṁsāsūtra or at least an earlier version of it containing almost the same expressions. It will not do to say that all the above passages are later interpolations. They have all been commented upon by Haradatta.

Some Śrautasūtras such as that of Kātyāyana contain rules of the interpretation of Vedic texts that are similar to Jaimini's sūtras and sometimes are stated almost in the same words.[1878]

(*Continued from last page*)

विद्: &c.। आप. ध. II. 6. 14, 13, compare जै. VI. 7. 30 'अर्थवादो वा विधिशेषत्वात् तस्माच्चित्याद्यनुवादः स्यात्।'; तस्यां क्रयशब्दः स्तुतिमात्रम्। धर्माद्धि सम्बन्धः। आप. ध. II. 6. 13. 11, compare जै. VI. 1. 15 क्रयस्य धर्ममात्रत्वम्।

1878. It may be noted that P. M. S. writers are often called 'Nyāya-vidaḥ' by Śaṅkara (on V. S. III. 4. 22), by Viśvarūpa and others. Bhāskara in his commentary on Brahmasūtra (I. 1. 1. p. 5, Chowkhamba series) states: यच्छब्द आह तदस्माकं प्रमाणमिति हि न्यायविदः. These are the words of Śabara in his bhāṣya on P. M. S. III. 2. 36. On Yāj. I. 58 the Bālakrīḍā of Viśvarūpa says "Tathā ca naiyāyikāḥ, 'na hi vacanasyātibhārosti-tyāhuḥ'". These are the words of Śabara on Jaimini III. 2,3 viz. 'Kimiva vacanam na kuryāt nāsti vacanasyātibhāraḥ'. So here Śabara is called Naiyāyika. On Yāj. I. 53 the Bālakrīḍā says 'Nyāyavidaśca Yājñikāḥ | api vā sarvadharmaḥ syāt tannyāyatvād vidhānasya'. This last is Jai. I 3. 16 So here Jaimini is called Nyāyavid and Yājñika. Similarly, on Yāj. I. 87 the Bālakrīḍa quotes Jai. VI. 8. 17 as the words of 'Nyāyavido yājñikāḥ'. The J. N. M. V. says *nyāyas* are the *adhikaraṇas*, deciding points of Dharma and expounded by Jaimini 'जैमिनिनोक्तानि धर्मनिर्णायकान्यधिकरणानि न्यायाः.' The writers of Śrautasūtras are called merely Yājñikas by Bālakrīḍa on Yāj. I. 38 'Tathā ca yājñikāḥ vyavahāryā bhavanti ityāhuḥ'. This quotation is from Kātyāyana Śrautasūtra 22. 4. 27–28. Besides, the sūtra 'Prāyaścittavidhānācca,' is the same in both Kāt. Ś. I. 2. 19 and P. M. S. VI. 3. 7 and Kāt. Ś. I. 8. 6 is the same as P. M. S. XII. 3. 15; moreover, Kāt. Ś. IX. 11. 14–15 employ almost the same words as in P.M.S. III. 5. 36–39, though they hold opposite views. The P. M. S. (IV. 4. 19–21) holds that the Piṇḍapitṛyajña is not an *aṅga* of the rites on darśa (i. e. amāvāsyā), but an independent rite, while the Kāt. Śr. (IV. 1. 28–30) holds that it is an *aṅga*. In the discussion on the meaning of the word Vaiśvā-

(*Continued on next page*)

Only a few examples may be cited here; compare Kāt. I. 1. 9–10 (about rathakāra) with Jai. VI. 1. 44; Kāt. I. 1. 12–14 with Jai. VI. 1. 51 and VI. 8. 20–22; Kāt. I. 1. 18–20 with Jai. XII. 2. 1–4; Kāt. I. 2. 18–20 with Jai. VI. 3. 2–7 (about *nitya-karma* yielding full reward, even though some *aṅga* could not be performed), also Kāt. I. 3. 1–3 with Jai. I. 1. 35–40; Kāt. I. 3. 28–30 with Jai. VI. 6. 3. Sometimes, the Kāt. Ś. takes a view opposite to that of the Pūrvamīmāṁsā but the words are often almost the same.

The Vārtikas of Kātyāyana on Pāṇini and the Mahābhāṣya show that Mīmāṁsā technical terms and doctrines had been elaborated long before them. For example, the Vārtikas employ the technical Mīmāṁsā terms '*prasajyapratiṣedha*' (Vārtika 7 on Pāṇini I. 1. 44, Vārtika 5 on I. 2. 1, Vārtika 2. on VII. 3. 85), *paryudāsa* (Vārtika 3 on I. 1. 27), the word 'Śāstrātideśa' (in Vārtika on VII. 1. 96), the distinction between 'niyama' and 'vidhi' (in Vārtika 1 and 2 on III. 3. 163), the word 'prakaraṇa' (vārtika 4 on Vi. 2. 143). Patañjali's Mahābhāṣya is full of Pūrvamīmāṁsā matters. The word 'Mīmāṁsaka' occurs in bhāṣya on Pāṇini II. 2. 29. The Mahābhāṣya cites the well-known passage 'the five five-nailed animals may be eaten' and remarks that the sentence conveys that others than those five were not to be eaten.[1879] But Patañjali does not employ the word Parisaṅkhyā of which the above (five) is an example, according to mīmāṁsā works. Jaimini employs the word

(*Continued from last page*)

nara occurring in Ṛg. I. 98. 1. and I. 59. 6 the Nirukta (VII. 21-23) cites the views of 'ācāryāḥ', of the ancient Yājñikas (who held that Vaiśvānara means the sun in the sky) and of 'Śākapūṇi' (who holds that it means the terrestrial Agni). The Nirukta mentions the views of Yājñikas in V. 11, VII. 4 (where Yājñikas differ from the Nairuktas), in IX. 29 where the Nairuktas hold that Anumati and Rākā are wives of the gods while the Yājñikas held that these were the names of Paurṇamāsī), in XI. 31 (where a similar conflict between the views of the two interpreters of Sinīvālī and Kuhū is mentioned) and XI. 42–43 (where also the views of Yājñikas and Nairuktas are mentioned).

1879. भक्षनियमेनाभक्षप्रतिषेधो गम्यते। पञ्च पञ्चनखा भक्ष्या इत्युक्ते गम्यत एतद्-तोऽन्येऽभक्ष्या इति। महाभाष्य (ed. Kielhorn vol. I. p. 5). Compare शबर on जै. X. 7. 28 'किं तु परिसंख्यया प्रतिषेधः स्यात्। यथा पञ्च पञ्चनखा भक्ष्या इति शशादीनां पञ्चानां कीर्तनादन्येषां भक्षणं प्रतिषिध्यत इत्ययमर्थो वाक्येन गम्यते.' The five animals are: शल्यकः श्वाविधो गोधा शशः कूर्मश्च पञ्चमः॥ रामायण IV. 17. 39; मनु V. 18 adds खड्ग (rhinoceros) to these five. Vide या I. 177 for five and गौ. ध. सू. 17. 27 'पञ्चनखाश्च। शल्यकशशश्वाविद्गोधाखड्गकच्छपाः' (अभक्ष्याः).

Parisaṅkhyā in VII. 3. 22. The Mahābhāṣya on IV. 1. 14 (vārtika 5) and on IV. 1. 93 (vārtika 9) gives valuable information viz. a brāhmaṇa woman is called 'Kāśakṛtsnā' if she studies the Mīmāṁsā expounded by Kāśakṛtsni.[1880] This establishes that in Patañjali's time a mīmāṁsā work composed by Kāśakṛtsni was in existence and women were found studying it. It is not certain what the Kāśakṛtsni-mīmāṁsā contained i. e. whether it was like the Pūrvamīmāṁsā of Jaimini or it was like the Uttaramīmāṁsā (Vedāntasūtra) or dealt with both mīmāṁsā and vedānta, which latter is not unlikely. The V. Ś. mentions the opinion of a teacher Kāśakṛtsna (in I. 4. 22), which Śaṅkarācārya regards as the final conclusion supported by the real import of Śruti. The son of Kāśakṛtsna might have been called Kāśakṛtsni (Pāṇini IV. 1. 95). The Vārtikas and Patañjali are full of the discussion of important matters on which the Mīmāṁsā has its own doctrines. In the Vārtikas 35 to 59 on Pāṇini I. 2. 64 (Sarūpāṇām-ekaśeṣa ekavibhaktau) there is a lengthy dicsussion on the question of the import of words, viz. whether it is *ākṛti* or *vyakti*. It is said in Vārtika 35 that, according to Vājapyāyana, ākṛti is the import of a word, while, according to Vyāḍi (in Vārtika 45 'dravyābhidhānam Vyāḍiḥ), *dravya* (or *vyakti*) is the import of a word (*pada*). The Mahābhāṣya notes that Pāṇini wrote some sūtras (such as I. 2. 58 'Jātyākhyāyām' &c) in which he accepted *jāti* as the import of words, while in other sūtras (such as I. 3. 64 'sarūpāṇām' &c) he

1880. काशकृत्स्निना प्रोक्ता मीमांसा काशकृत्स्नी काशकृत्स्नीमधीते काशकृत्स्ना ब्राह्मणी। महाभाष्य on पा. IV. 1. 14. If काशकृत्स्नि's मीमांसा dealt with पूर्वमीमांसा matters it is surprising that the extant पूर्वमीमांसासूत्र makes no reference to काशकृत्स्नि, when it names, besides जैमिनि, *nine* predecessors viz. आत्रेय, आलेखन (VI. 5. 17), आश्मरथ्य (VI. 5. 16), ऐतिशायन, कामुकायन, कार्ष्णाजिनि, बादरायण, बादरि and लाबुकायन. Dr. Umesha Mishra omits by oversight आश्मरथ्य from the list of the predecessors of जैमिनि in his 'critical bibliography of mīmāṁsā' added at the end of M. M. Jha's 'Pūrvamīmāṁsā in its sources.' काशकृत्स्नि's मीमांसा, being mentioned by पतञ्जलि, must be placed not later than 200 B. C. If काशकृत्स्नि wrote on पूर्वमीमांसा as is most likely, one would naturally expect that if the extant पूर्वमीमांसासूत्र was composed after 200 B. C. and about 200 A. D. (as both Jacobi and Keith propose) काशकृत्स्नि should have been mentioned by the पू. मी. सू. But if जैमिनि was earlier than काशकृत्स्नि or was a contemporary of the latter, then it would be natural if the पू. मी. सू. does not mention him. Therefore, though an argument from mere silence is not very strong, it is likely that the present P. M. S. was composed at least before 200 B. C.

accepted 'dravya' as the import of words.[1881] It is to be noted that, according to Jaimini (I. 3. 33 'ākṛtistu kriyārthatvāt), ākṛti is the import of words. On vārtika 3 on Pāṇ. IV. 1. 92 (Sāmānyacodanāstu viśeṣeṣu) Patañjali says that the vidhis declared with reference to certain things and objects in general really apply to individuals and he gives purely mīmāṁsā examples in this connection as set out in the note. The Vārtikakāra and Patañjali both use the word '*codanā*'[1882] in the Pūrvamīmāṁsā sense and give examples which are familiar to us from Śābarasbhāṣya. Among the purposes served by a study of grammar, *ūha* (which is the subject of the 9th chapter of PMS) is one. On Pāṇini I. 4. 3 Patañjali uses the language of Mīmiṁsā 'apurva eva vidhirbhaviṣyati na niyamaḥ.'

It appears that the Saṅkarṣakāṇḍa was very much neglected from early times. There is a conflict of views about its authorship. The Nyāyapariśuddhi of Veṅkaṭanātha (I. H. Q. vol. IX. at p. 299) states that Kāśakṛtsna was the author of the Saṅkarṣakāṇḍa. It appears from Śabara's bhāṣya that[1883] that Kāṇḍa existed in his day and was looked upon by him as Jaimini's work. Śaṅkarācārya in his bhāṣya on V. S. III. 3. 43 (pradānavadeva tad-uktam) mentions the Saṅkarṣa, quotes a sūtra therefrom, holds that it was known to the Vedāntasūtra and appears to convey that it was a work of Jaimini. Rāmānuja also appears to hold that Jaimini was the author of 16 chapters (comprising

the twelve called Pūrvamīmāṁsā and the four forming the Saṅkarṣa). The Kalpataruparimala of Appayyadīkṣita on V. S. III. 3. 43, while conceding that the Saṅkarṣakāṇḍa was undertaken for discussion about *devatās*, insists that it is a •pariśiṣṭa (supplement) of the P. M. S. of twelve chapters consisting as it does of discussions on several topics treated in the P. M. S. and being of a miscellaneous nature, that it does not begin with nor conclude with the discussion about devatās and that its first sūtra is 'anuyajatīti anuvaṣaṭkāraś-codyate'. Since the Saṅkarṣakāṇḍa has had hardly any influence on Dharmaśāstra works no further reference need be made to it in this work.[1884]

Later medieval writers look upon the mīmāṁsāśāstra as the most important of vidyāsthānas (other than the Vedas), since it removes the ignorance, doubts and mistaken notions about the sense of several (Vedic) passages, and since all vidyāsthānas require its aid for the determination of the nature of their real meaning.[1885]

In some works like the bhāṣya of Rāmānuja on V. S. and the Prapañcahṛdaya [1886] the Mīmāṁsāśāstra is stated to be as one whole containing twenty adhyāyas (chapters) and we are told that there was a (bhāṣya) commentary called Kṛtakoṭi on the whole of it by Bodhāyana, that later on a concise commentary was composed by Upavarṣa, that Devasvāmin wrote a commentary

X. pp. 153–54 for the author's paper on Bhavadāsa as a predecessor of शबर. भवदास is named in श्लोकवार्तिक (प्रतिज्ञासूत्र verse 63) and the न्यायरत्नाकर on p. 133 states that भवदास split पू. मी. सू. I. 1. 4 into two. Vide Intro. to तत्त्वबिन्दु pp. 19–20 for भवदास.

on 16 chapters and Bhavadāsa also composed a commentary on Jaimini, but that Śabara wrote a bhāṣya only on the first 12 chapters and did not comment on Saṅkarṣa. In I.H.Q. (vol. 15 pp. 262–263) reference is made to an inscription of Rājarāja (999 A. D.) which records the gift of certain lands to a learned brāhmaṇa who was to provide to four pupils board and teaching in several subjects, one of which is specified as the mīmāṁsā of twenty adhyāyas. These 20 chapters are made up as follows:—12 chapters (each divided into four *pādas*, except chapters III, VI and X, each of which has eight pādas, in all sixty pādas) ascribed to Jaimini, 4 chapters called Saṅkarṣakāṇḍa and 4 chapters constituting the Vedāntasūtra. The twelve chapters often called Pūrvamīmāṁsā make an extensive work containing 915 or about one thousand adhikaraṇas (according to different writers) and about 2700 sūtras, dealing with numerous topics and laying down important rules of vedic interpretation. Yāj. (in I. 3) means by Mīmāṁsā probably the work of Jaimini in 12 chapters. Many writers such as Mādhavācārya [1887] speak of two Mīmāṁsās, Pūrva and Uttara, respectively comprising the 12 chapters ascribed to Jaimini and the four chapters forming the Vedāntasūtra. Śaṅkarācārya refers to the extant Pūrvamīmāṁsā as Dvādaśalakṣaṇī in his bhāṣya on Vedāntasūtra III. 3. 26, as 'Prathamatantra' in bhāṣya on V. S. III. 3. 25, III. 3. 53 and III. 4. 27, as Prathama-kāṇḍa in bhāṣya on V. S. III. 3. 1, III. 3. 33, III. 3. 44, III. 3. 50, as Pramāṇalakṣaṇa in bhāṣya on V. S. III. 4. 42. On V. S. III. 3. 53 he speaks of the first pāda of the P. M. S. as 'Śāstrapramukha eva prathame pāde' and thereby conveys that he regards that the PMS and VS form one entire śāstra.

From here onwards up to note 1890 the discussion is also comprised (though a little more briefly) in the present author's paper on 'Pūrvamīmāṁsā, Brahmasūtra &c' contributed to the Prof. De Felicitation volume (pp. 119–139).

There are very difficult and controversial questions about the authorship of the extant Pūrvamīmāṁsāsūtra and of the extant Vedāntasūtra (or Brahmasūtra) and their relation to each other. All of them cannot be gone into here. The first matter to be noted is that, though the number of the Vedāntasūtras is only about 1/5th of the number of the P. M. S., the V. S. contains

---

1887. .ये पूर्वोत्तरमीमांसे ते व्याख्यायातिसंग्रहात्। कृपालुर्माधवाचार्यो वेदार्थं वक्तुमुद्यतः॥ Intro. verse 4 to the Com. on the ऋग्वेद (Poona ed.), Some mss. read सायणाचार्यो for माधवाचार्यो.

more personal references (i. e. 32) than the P. M. S. (i. e. 27). In the 2nd place, we find that the Vedāntasūtras mention Jaimini eleven times and Bādarāyaṇa nine times, while the P. M. S. names Bādarāyaṇa and Jaimini only five times each. The question arises whether Jaimini and Bādarāyaṇa were contemporaries and, if not, what the relation between the two was. Scholars are generally agreed that they were not contemporaries. There is a tradition of some antiquity contained in the Sāmavidhānabrāhmaṇa[1888] according to which Jaimini was a pupil of Pārāśarya Vyāsa. It has been shown above (p. 857, note 1390) how the Purāṇas declare that Vyāsa Pārāśarya, also called Kṛṣṇa Dvaipāyana, arranged the one Veda into four and imparted the Ṛgveda, Yajurveda, Sāmaveda and Atharvaveda respectively to Paila, Vaiśampāyana, Jaimini and Sumantu. In the Mahābhārata Sumantu, Jaimini, Vaiśampayana, Paila are stated along with Śuka (the son of Vyāsa) to be the pupils of Vyāsa; vide Sabhā 4. 11 and Śāntiparva 328. 26–27 (cr. ed. 314, 23–24, 29) and 350. 11–12 (cr. ed. 337. 11–12). In the *tarpaṇa* provided for in the Āśvalāyanagṛhyasūtra (III. 4. 4) occurs the very interesting passage 'Sumantu-Jaimini-Vaiśampāyana-Paila-Sūtra-bhāṣya-Bhārata—Mahābhārata—Dharmācāryāḥ.' The above passages make it clear that several centuries before the Christian era Jaimini's was an honoured name and connected with the Sāmadeva. Scholars have examined the references to Jaimini and Bādarāyaṇa in the P. M. S. and the V. S. Prof. K. A. Nilankanta Sastri in I. A. Vol. 50 pp. 167–174 on Jaimini and Bādarāyaṇa arrives at the somewhat startling conclusion that there were three Jaiminis. T. R. Chintamani on p. 14 of the supplement to J. O. R. Madras, Vol. XI agrees with Prof. Nilakanta Sastri. Jaimini is named five times in the extant P. M. S. viz. at III. 1. 4, VI. 3. 4, VIII. 3. 7, IX. 2. 39, XII. 1. 7. Commonsense requires us to hold that these five

---

1888. सोऽयं प्राजापत्यो विधिस्तमिमं प्रजापतिर्बृहस्पतये बृहस्पतिर्नारदाय नारदो विष्वक्सेनाय विश्वक्सेनो व्यासाय पाराशर्याय व्यासः पाराशर्यो जैमिनये जैमिनिः पौष्पिण्ड्याय पौष्पिण्ड्यः पाराशर्यायणाय पाराशर्यायणो बादरायणाय बादरायणस्ताण्डि-शाट्यायनिभ्यां ताण्डिशाट्यायनिनौ बहुभ्यः &c.। सामविधानब्रा. (at end). The न्या. र. on श्लोकवा. (प्रतिज्ञासूत्र v. 23) sets out the गुरुपरम्परा of पूर्वमीमांसा as ब्रह्मा-प्रजापति-इन्द्र-आदित्य-वसिष्ठ-पराशर-कृष्णद्वैपायन-जैमिनि. The युक्तिस्नेहप्रपूरणी p. 8 (in Chowkhamba series) gives two similar गुरुक्रमs slightly differing from that of the सामविधानब्रा॰ and from each other. The गुरुपरम्परा is practically useless up to वसिष्ठ. It may be noted that in the सामविधान॰ Jaimini is said to be the disciple of Vyāsa Pārāśarya while between Jaimini and Bādarāyaṇa intervene two other names.

references about Jaimini must have been made to the same person. If two different Jaiminis were intended by the P. M. S. (other than its own author) in the five sūtras a clear warning would have been given by the author. As shown below a sūtra should leave no ambiguity. Prof. Sastry holds that Jaimini mentioned in VI. 3. 4 is different from the Jaimini in the other four passages, because Śabara does not employ the word ācārya for qualifying Jaimini on VI. 3. 4 as he does in the four other cases and because the view put forward in VI. 3. 4 appears to be Pūrvapakṣa, while in the four other cases Jaimini's view is the siddhānta view of the Mīmāṁsā-sūtra. The number of sūtras in which Jaimini is named is very small (only 5), out of which the word ācārya is applied to Jaimini by Śabara in four places and not so applied in one. This is a very slender and inadequate ground for holding that the Jaimini in P. M. S. VI. 3. 4 is different from the Jaimini named in four other places. The usages of ācāryas as to employment of qualifying words like 'ācārya' or 'bhagavat' to authors mentioned by them differ. Kumārila applies no epithet like 'ācārya' or 'bhagavān' to Jamini and in one place [1889] charges Jaimini with composing sūtras containing not much substance. In the sūtras in which Jaimini is named in the VS (viz. in I. 2. 28, I. 2. 31, I. 3. 31, I. 4 18, III. 2. 40, III. 4. 2, III. 4. 18, III. 4. 40, IV. 3. 12, IV. 4. 5, IV. 4. 11) Śaṅkarācārya adds the qualification 'ācārya' in all except on III. 4. 40, although Jaimini propounds many propositions not acceptable to Bādarāyaṇa the author of V. S. or to Śaṅkara. In III. 4. 40, however,[1890] he omits the qualification 'ācārya' as regards both Jaimini and Bādarāyaṇa. No one has argued that because the word ācārya does not qualify Bādarāyaṇa in III. 4. 40, the Bādarāyaṇa in that sūtra is different from the Bādarāyaṇa named in other sūtras. In another place (on V. S. IV. 1. 17) it may be noted Śaṅkarācārya remarks that both Jaimini and Bādarāyaṇa are in agreement that certain acts of the *kāmya* type are of no help in

---

1889. 'सन्ति च जैमिनेरेवंप्रकाराण्यनत्यन्तसारभूतानि सूत्राणि।' तन्त्रवार्तिक p. 895 (on उपवीतं लिङ्गदर्शनात् सर्वधर्मः स्यात्, which is the first of six sūtras after III. 4. 9 that were omitted by Śabara).

1890. The sūtra is 'तद्भूतस्य तु नातद्भावो जैमिनेरपि नियमातद्रूपाभावेभ्यः' वे. सू. III. 4. 40 on which Śaṅkara remarks: जैमिनेरपीत्यपिशब्देन जैमिनिबादरायणयोरत्र संप्रतिपत्तिं ज्ञापयति अविप्रतिपत्तिवाद्धर्थाय. This means that बादरायण is the author of III. 4. 40 (in which बादरायण is not named at all) and therefore of the entire Vedānta-sūtra.

attaining real knowledge of brahma. This shows that according to Śaṅkara, Jaimini had treated of how brahma-vidyā arises. As regards the second reason, it does not clearly or indisputably appear that VI. 3. 4 is a pūrvapakṣa view. In that *adhikaraṇa* the Pūrvapakṣa is stated in the first sūtra [1891] viz. as to such *nitya* rites as Agnihotra or Darśapūrṇamāsa a man who can carry out all the details in their entirety is alone entitled to engage in them. The 2nd sūtra states the *siddhānta* view that, as regards *nitya* acts, it is not absolutely necessary that one should be able to perform all details (aṅgas) therein; the third sūtra only states that smṛti declares that it is a fault if the principal rite is not performed and therefore the principal rite being obligatory must be performed. Then comes the 4th sutra in which the name of Jaimini occurs. Śabara's bhāṣya on this sutra is extremely meagre (2½ lines in print) and not clear. The Ṭup-ṭikā does not comment separately on each of the sūtras of VI. 3. 1–7, [1892] it omits the name of Jaimini in its explanation and its concluding words on this adhikaraṇa appear to support the interpretation of the 4th sūtra advanced by the present author. No one doubts that sūtras 5–7 support the siddhānta view. If VI. 3. 4 were a pūrva-pakṣa sūtra, it is expected that sūtra 5 should contain the word 'tu' or 'api vā' in order to indicate that it refutes the

1891. सर्वशक्तौ प्रवृत्तिः स्यात्तथाभूतोपदेशात्। अपि वाप्येकदेशे स्यात्प्रधाने ह्यर्थनिर्वृत्तिर्गुणमात्रमितरत्तदर्थत्वात्। तदकर्मणि च दोषस्तस्मात्ततो विशेषः स्यात्प्रधानेनाभिसम्बन्धात्। कर्माभेदं तु जैमिनिः प्रयोगवचनैकत्वात् सर्वेषामुपदेशः स्यादिति। अर्थस्य त्वपवर्गित्वादेकस्यापि प्रयोगे स्याद्यथा क्रत्वन्तरेषु। पू. मी. सू. VI. 3. 1–5. It appears that the अध्वरमीमांसा-कुतूहलवृत्ति by Vāsudeva-dīkṣita (ms. in the Madras Govt. Oriental Mss. Library) reads कर्मभेदं for कर्माभेदं and अर्थस्यपवर्गित्वात् in sūtras 4 and 5. I am indebted to Dr. V. Rāghavan for this reference. In a complete ms (zz A in Prof. Velankar's Catalogue p. 317 No. 1091) of the bhāṣya of Śabara in the Bombay Asiatic Society's Mss. Library on VI. 3. 1 the words जैमिनिर्मन्यते स्म are omitted and कर्मभेदं is read for कर्माभेदम्. The word 'upadeśa' in the 4th sūtra may be taken in the same sense in which it is used in PMS I. 1. 5 'autpattikastu ... tasya jñānam-upadeśaḥ' or in the general sense of 'instruction'.

1892. The दुपट्टीका on पू. मी. सू. VI. 3. 4 appears to make this clear 'सूत्रकारो नित्ये इतिकर्तव्यतामिच्छति। ... एवं च साङ्गं यावज्जीवं न शक्नोति कश्चिदपि कर्तुमिति कृत्वा यावच्छक्नुयादित्युपनिबध्यते। शक्तस्य कामतो वैगुण्यं स्यात्।'. The last sentence means 'if one, being able to finish an obligatory rite with all details, omits some part at his sweet will, then there would be defect in the rite itself'.

view expressed in sūtra 4. What that sūtra means is that the dropping of some aṅga in the *nitya* rite does not make that rite a different one from the same *nitya* rite when performed with all aṅgas, since the text about its performance (with all aṅgas or with some aṅgas) is one and the same and the vedic instruction is that all aṅgas have to be done (if possible). Interpreted thus, that sūtra is not a pūrvapakṣa at all, but only emphasizes the siddhānta with additional reasons. The upshot would be that Jaimini mentioned five times in PMS is only one person and that he is a different person (who had written on P. M.) from the reputed author of the extant PMS.

A parallel may be cited. Śaṅkarācārya makes one adhikaraṇa of sūtras 26–33 of V. S. I. 3 (devatādhikaraṇa) which establishes that not only men but gods are qualified to study the Vedāntaśāstra and names Bādarāyaṇa twice in the same adhikaraṇa (in I. 3. 26 and 33) and in I. 3. 33 he employs the word 'tu' because that sūtra is a reply to Jaimini's view contained in I. 3. 31–32. Similarly, the PMS puts forward the siddhānta view in VI. 3. 2 and names Jaimini in VI. 3. 4 for the same purpose.

Even Prof. Sastry admits that in four out of the five references where Jaimini is expressly named, his views are the siddhānta views. The cases of PMS IX. 2. 3 and XII. 1. 59 are somewhat remarkable. The adhikaraṇa in both cases consists of only one sūtra, which is the siddhānta view and Jaimini is expressly named therein. In PMS III. 1. 4 Jaimini differs from Bādari (III. 1. 3) and two more sūtras are added to complete the adhikaraṇa. In PMS VIII. 3. 7 Jaimini's view is opposed to that of Bādari (VIII. 3. 6), is the siddhānta view and there is no separate sūtra setting forth the view of the author of the PMS.

From the remarks of Śaṅkarācārya on V. S. III. 4. 40 (quoted in note 1890) it follows that he regarded Bādarāyaṇa as the author of the Vedāntasūtra. In V.S. III. 2. 38-39 the Siddhānta is stated that the rewards of actions are given by Īśvara (God), while Jaimini's view is that it is Dharma that gives the rewards of actions (III. 2. 40) and in the next sūtra (III. 2. 41) it is stated that Bādarāyaṇa holds the former view (or that the former of the two, Īśvara and Dharma, gives the reward is the view of Bādarāyaṇa). Here Bādarāyaṇa is expressly mentioned as holding the same view as that in the Siddhāntasūtra III. 2. 38.

The observations of Śaṅkarācārya in introducing[1893] the last sūtra of the VS make it perfectly clear that he regarded Bādarāyaṇa as the author of the entire Vedāntasūtra. No satisfactory explanation is offered why it was necessary to mention Bādarāyaṇa nine times in the VS when all the 555 sūtras thereof are deemed to have been composed by Bādarāyaṇa, or why it was necessary to mention in a work containing about 2700 sūtras all deemed to be composed by Jaimini, the views of Jaimini five times when in all cases or at least in four out of the five cases the views are identical with the reputed author of the PMS. Only two theories are possible viz. to hold that there is no explanation or to hold that there were two Jaiminis and two Bādarāyaṇas.

The problem of the author of the VS is rather complicated. Bhāskara (like Śaṅkara) holds that Bādarāyaṇa is the author of VS, since he begins his commentary on VS with an obeisance to Bādarāyaṇa who sent forth (into the world) the Brahmasūtra that brings about the cessation of the bondage of birth. The Pañcapādikā of Padmapāda (a disciple of Śaṅkarācārya) performs (in the 2nd Introductory verse) an obeisance to Bādarāyaṇa.[1894] Rāmānuja, on the other hand, makes confusing statements. In the 2nd verse of his introduction to the Śrībhāṣya[1895] on VS he calls upon all good men to drink the nectar-like words of Pārāśarya, but in his bhāṣya on VS II. 2. 42 he holds that Bādarāyaṇa was the author of the Mahābhārata, wherein the Pāñcarātra-śāstra is expounded at great length (in Śāntiparva chap. 334–339 = cr. ed. 321 ff.) as also of the VS[1896]. But Yāmunācārya, the preceptor of the teacher

1896. यद्यपि भगवता बादरायणेन हृदमर्थान्येव सूत्राणि प्रणीतानि विवृतानि च तानि परिमितगम्भीरभाषिणा भाष्यकृता विस्तृतानि च तानि गम्भीरन्यायसागरभाषिणा श्रीवत्साङ्क-मिश्रेणापि०। सिद्धित्रय (Chow. S. S.) pp. 5–6.

of Rāmānuja, ascribes the VS to Bādarāyaṇa. In spite of Śaṅkarācārya, Vācaspati-miśra, author of the famous Bhāmatī on[1897] Śaṅkarācārya's bhāṣya on VS, makes an obeisance to Vedavyāsa, the author of Brahmasūtra The Parāśara-mādhavīya is in two minds; in vol. I part I pp. 52, 97, vol. II. part 2 pp. 3 and 275 Bādarāyaṇa is said to be the author of the VS, but in a few other places VS is spoken of as Vyāsasūtra (vol. I. part 1, pp. 56, 113). The above conflict of testimony gives rise to the important question whether Bādarāyaṇa, the supposed author of the Vedāntasūtras, is identical with Vedavyāsa or is different from him. Śaṅkarācārya's bhāṣya points to the conclusion that in his opinion at least they are different.[1898] For example, on V. S. I. 3. 29 he quotes a verse of Vedavyāsa in support of the proposition of the VS that the Veda is eternal. On VS II. 3. 47, in support of the proposition that, though the individual soul is an aṁśa of the Supreme Self, the latter is not at all affected by the suffering of the individual soul, Śaṅkara quotes two verses as smṛti from the Mahābhārata. This makes it clear that, if the author of the VS was identical with Vedavyāsa, the author of the Mahābhārata, Śaṅkarācārya would not have cited the latter as an independent smṛti source supporting the former or would at least have used some such language as 'this very author has said elsewhere that' &c. The same reasoning would apply to Śaṅkarācārya's comments. If that great ācārya was of the opinion that the author of the VS was the same as that of the Mahābhārata and the Gītā he would not have cited passages from the Epic and the Gītā as Smṛtis supporting the reasoning of the VS.

If it were contended that there is only one Jaimini (and not two, much less three) a serious difficulty arises. Why should the author of PMS (containing about 2700 sūtras) refer to himself by name in five places only. The usual explanation offered

---

1897. ब्रह्मसूत्रकृते तस्मै वेदव्यासाय वेधसे। ज्ञानशक्त्यवताराय नमो भगवतो हरेः॥ भामती, 5th Intro. verse.

1898. अत एव च नित्यत्वम्। वे. सू. I. 3. 29; भाष्य 'वेदव्यासश्चैवमेव स्मरति। 'युगान्तेन्तर्हितान्वेदान्सेतिहासान्महर्षयः। लेभिरे तपसा पूर्वमनुज्ञाताः स्वयम्भुवा॥' इति. This verse is शान्तिपर्व 210. 19 (cr. ed. 203. 17); स्मरन्ति च। वे. सू. II. 3. 47; भाष्य "स्मरन्ति च व्यासादयो यथा जैवेन दुःखेन न परमात्मा दुःखायत इति। 'तत्र यः परमात्मा हि स नित्यो निर्गुणः स्मृतः। न लिप्यते फलैश्चापि पद्मपत्रमिवाम्भसा॥ कर्मात्मा त्वपरो योसौ मोक्षबन्धैः स युज्यते। स सप्तदशकेनापि राशिना युज्यते पुनः॥' इति". These two are शान्तिपर्व 352. 14–16 (cr. ed. 339. 14–15).

by some commentators when Pāṇini names[1899] his predecessors, viz. that they are named for showing his reverence for them, would be of no avail as to Jaimini, since it cannot be said that the author of PMS Jaimini shows respect to himself. When Jaimini mentions Bādarāyaṇa in I. 1. 5 and XI. 1. 65 Śabara[1900] explains this is done for showing respect to Bādarāyaṇa or for spreading his fame. Another explanation that ancient authors often refer to themselves in the 3rd person will not do. Why should the author of about 2700 sūtras choose five places only for referring to himself. Therefore, one is compelled to hold that, if Jaimini is the author of the extant PMS and mentions the views of Jaimini five times only, there was a predecessor and namesake of his called Jamini who had expressed his views in a different work.

There are eleven sūtras in the VS in which the views of Jaimini are referred to. They are (as stated above) VS I. 2. 28 and 31, I. 3. 31, I. 4. 18, III. 2. 40, III. 4. 2, III. 4. 18, III. 4. 40, IV. 3. 12, IV. 4. 5, IV. 4. 11. Out of these eleven there are six references to Jaimini (viz. I. 2. 28, I. 2. 31, I. 4. 18, IV. 3 12, IV. 4. 5, IV. 4. 11) for which no corresponding *adhikaraṇa* or sūtra in the PMS can be pointed out, while sūtras III. 2. 40, III. 4. 2, III. 4. 18 attribute views to Jaimini, which are well-known doctrines of the PMS. VS I. 3. 31 corresponds to PMS VI. 1. 5 and on III. 4. 40 (quoted in note 1890 above) Jaimini and VS agree. Therefore, it appears that the Jaimini who expresses views on purely Vedāntic topics and whose views are not found in PMS composed a work on Vedānta.

There are in VS nine sūtras in which Bādarāyaṇa is named viz. in VS I. 3, 26 and 33 (Bādarāyaṇa being twice named in the same *adhikaraṇa* as opposed to Jaimini), III. 2. 41, III. 4. 1, III. 4. 8, III. 4. 19, IV. 3. 15, IV. 4. 7, IV. 4. 12. It may be noted that in all these cases (except in IV. 3. 15) the views ascribed to Bādarāyaṇa are opposed to those of Jaimini or are slightly different (only VS IV. 4. 7 and IV. 4. 12). Prof. Nilakanta Sastri thinks that all the views mentioned as Bādarāyaṇa's are the views of the author of the VS who employs

---

1899. On तृषि-सृषिकृशेः काश्यपस्य (पा. I. 2. 25) the महाभाष्य says 'काश्यप ग्रहणं किमर्थम्। काश्यपग्रहणं पूजार्थम्'.

1900. बादरायणग्रहणं बादरायणस्येदं मतं कीर्त्यते बादरायणं कीर्तयितुं नात्मीयं मतं पर्युदसितुम्। शबर on पू. मी. सू. I. 5 p. 25; बादरायणग्रहणं कीर्त्यर्थं नैकीयमतार्थम्। शबर on पू. मी. सू. XI. 1. 65,

the third person for himself as ancient authors do (I. A. vol. 50 at p. 169). This does not afford a satisfactory explanation of the question why it was necessary to invoke Bādarāyaṇa's name in nine cases only for buttressing up the position of the author of the VS (that has 555 sūtras). If the author of the VS and Bādarāyaṇa named nine times are identical, the name of Bādarāyaṇa should ordinarily appear towards the end of the *adhikaraṇa* and not in the middle. Two examples may be cited here to illustrate how VS deals with references to Bādarāyaṇa. In III. 2 38-41 (which is one *adhikaraṇa*) the *siddhānta* view is first stated with reasons in III. 2. 38-39, then Jaimini's view is cited (III. 4. 40) and then Bādarāyaṇa is mentioned as agreeing with the view first put forth 'pūrvam tu Bādarāyaṇo hetuvyapadeśāt), the difference being that the *siddhānta* is based upon 'upapatti' while Bādarāyaṇa relies upon 'hetuvyapadeśa' (in śruti and smṛti). This shows that different reasons were assigned by the author of VS and by Bādarāyaṇa for the same proposition. VS. III. 4. 18-20 form one *adhikaraṇa* about *sannyāsa*. Jaimini starts the pūrvapakṣa that the Chān. Up. (II. 23. 1 'trayo dharmaskandhāḥ') only makes a passing reference to the āśramas, there is no vidhi (injunction) in that text and there is no exposition also. Then Bādarāyaṇa's view is cited 'anuṣṭheyaṁ Bādarāyaṇaḥ sāmyaśruteḥ' i. e. *sannyāsa* should be resorted to just as one resorts to the householder's stage. Then comes the view of the author of the VS that there is a vidhi of *sannyāsa* in that text. If Bādarāyaṇa and the author of VS be held identical, why was it necessary to add the sūtra 'vidhirvā dhāraṇavat' (VS III. 4. 20) after stating Bādarāyaṇa's view? It would be also noticed that the reasons given in the two sūtras differ. In VS IV. 4. 10-14 first the views of Bādari and Jaimini on Chān. Up. VIII. 2. 1, 5 are set out, then Bādarāyaṇa's view is set forth (in IV. 4. 12) and then two more sūtras are added by the author of VS. Therefore, these illustrations show that, though the final conclusion of Bādarāyaṇa and the author of VS is the same, the language and the reasons are different, and that Bādarāyaṇa named in the VS was a predecessor of the author of the extant VS that had composed a work on Vedānta, whom the author of the VS strengthens with reasons of his own.

In Pāṇini's time there were mendicant ascetics (bhikṣus) who studied the 'Bhikṣusūtra of Pārāśarya' or 'the Bhikṣusūtra of Karmanda' and were designated 'Pārāśariṇaḥ' and

'Karmandinaḥ'.[1901] A bhikṣu represents the order of *Sannyāsa*. Therefore, a Bhikṣusūtra must have had as its subject sannyāsa, the time for it, the rules of the order, the final goal to be attained and so on. The Bṛ. Up. (III. 5. 1 and IV. 4. 22) emphasizes that those who realize *brahma* give up all desires and practise begging. The Gautama-dharmasūtra[1902] says the same thing. No trace is found of the Bhikṣusūtra of Karmanda. But it is possible to say that the Bhikṣusūtra propounded by Pārāśarya must have been somewhat like the extant Brahmasūtra or one of its predecessors. This would be the earliest reference to a sūtra by Pārāśarya on the sannyāsāśrama. The date of Pāṇini is not beyond dispute. But no modern scholar would place him after 300 B. C. The present writer would place him as early as at least 500 or 600 B. C. The result would be that the Bhikṣusūtra of Pārāśarya named by Pāṇini would have to be placed at some time between 400 B. C. to 700 B. C. Further light is shed by Vārtika[1903] (1) on Pāṇini IV. 1. 97, from which it follows that Vyāsa's '*apatya*' (son) was called Vaiyāsaki, that is Śuka (according to the Mahābhāṣya). Bādarāyaṇa is formed from Badara which is a word in the Naḍādi-gaṇa (consisting of about 76 words), according to Pāṇini IV. 1. 99 (Naḍadibhyaḥ phak), Bādari being the son of Badara, Bādarāyaṇa being the grandson (or a remoter male descendant) of Badara. At some period Vyāsa and Bādarāyaṇa came to be confounded and Śuka, who was the son of Vyāsa according to the Vārtika and the Mahābhāṣya, came to be called Bādarāyaṇi (son of Bādarāyaṇa) as shown by the Bhāgavatapurāṇa (XII. 5. 8 where Śuka is said to be 'Bhagavān Bādarāyaṇiḥ'). It appears that from the 9th century A. D. Bādarāyaṇa came to be confounded with Vyāsa Pārāśarya.

1901. पाराशर्यशिलालिभ्यां भिक्षुनटसूत्रयोः । कर्मन्दकृशाश्वादिनिः । पा. IV. 3, 110–111 : पाराशर्येण प्रोक्तं भिक्षुसूत्रमधीयते पाराशरिणो भिक्षवः, कर्मन्देन प्रोक्तं भिक्षुसूत्रमधीयते कर्मन्दिनो भिक्षवः । सि. कौ. It is possible that Pāṇini refers to a sūtra work on ancient Sāṅkhya by Pañcaśikha. This will be briefly discussed in another chapter below. It will be shown later from the Mahābhārata that Pañcaśikha was called bhikṣu and Pārāśarya (vide note 2186 below).

1902. ब्रह्मचारी गृहस्थो भिक्षुर्वैखानसः । ...अनिचयो भिक्षुः । ...भिक्षार्थी ग्राममियात् । गौतमधर्मसूत्र III. 2. 10–13.

1903. सुधातुरकङ् च । पा. IV. 1. 97; सुधातुव्यासयोः वार्तिक ।; सौधातकिः । वैयासकिः शुकः । महाभाष्य.

A brief examination of the citation of the views of Bādarāyaṇa and Jaimini in the PMS and the Brahmasūtra[1904] is necessary. Bādarāyaṇa is named only five times by the P. M. sūtra as said above. (1) In P. M. S. I. 1. 5 the author claims that he and Bādarāyaṇa are agreed on the eternity and infallibility of the Veda; (2) In P. M. S. V. 2. 17–20, there is a discussion on Nakṣatreṣṭi. In the model sacrifice there are certain homas called Nāriṣṭha; the question is whether in the modifications of the model wherein certain subordinate homas colled *upahomas* are prescribed, the Nāriṣṭha homas precede or follow the Upahomas. The *siddhānta* view is that Nāriṣṭhahomas precede, Ātreya being of the opposite view and Bādarāyaṇa supporting the *siddhānta*. (3) In P. M. S. VI. 1. 8 Bādarāyaṇa's view is that not men alone but women also are entitled to take part in *kratus* (Vedic sacrifices) and this is the *siddhānta* of the P. M. S.; (4) P. M. S. X. 8. 35–46 make an extensive *adhikaraṇa* in which the question is whether the texts prescribing Āgneya and Aindrāgna *puroḍāśas* in Darśapūrṇamāsa for a sacrificer who has not performed soma sacrifice constitute a vidhi (of the two) or only an anuvāda, Bādarāyaṇa's view in PMS. X. 8. 44 being that its is a *vidhi* and the *siddhānta* being that there is an anuvāda (X. 8. 45). (5) PMS XI. 1. 54–67 constitute a lengthy *adhikaraṇa* and the discussion concerns the question whether *āghāra* and other aṅgas are to be repeated with each of the principal matters (Āgneya and others) in Darśapūrṇamāsa or are to be performed only once.

With regard to these five cases where Bādarāyaṇa is cited in the P. M. S. three points emerge, viz. the author of the P. M. S. agrees with Bādarāyaṇa's view in all except in X. 8. 44 (where the two differ), that the view attributed to Bādarāyaṇa in P. M. S. I. 1. 5 has correspondence with the views of the V. S. (1. 3. 28–29) and that four views out of five refer to purely sacrificial matters to which nothing corresponds in the V. S. It follows that the author of the extant P. M. S. had some work of Bādarāyaṇa dealing with Pūrvamīmāṁsā matters before him and that, if Bādarāyaṇa be the author of the extant V. S., the latter had composed a work on Pūrvamīmāṁsā matters also or that there was another Bādarāyaṇa who wrote only on Pūrva-

1904. Prof. Nilakant Sastry's paper referred to above is valuable, but several of his conclusions set out on p. 172 of I. A. vol. 50 cannot be accepted by the present writer, who regrets that Prof. Sastry did not consider much other matter relevant to the points discussed by him.

mīmāṁsā. The five references to Jaimini in P. M. S. have been noted above and the sūtra VI. 3. 4, which led Prof. Sastry to postulate three Jaiminis, has been already explained as not necessarily leading to any such conclusion.

Another alternative might be put forward viz. that works by Jaimini and Bādarāyaṇa did not exist before the extant V. S. and P. M. S., but that the references to Jaimini and Bādarāyaṇa concern views current in the schools of Jaimini and Bādarāyaṇa. But this is not a likely hypothesis. The extant V. S. and P. M. S. are meant for all throughout Āryāvarta and it is not likely that the oral traditions of two schools were supposed to be known to all and sundry in the whole of the country.

In several cases where Bādarāyaṇa is mentioned, the extant V. S. makes certain additions and explanations. It has been shown above that Śaṅkarācārya, Bhāskara and Yāmuna ascribe the V. S. to Bādarāyaṇa and that Vācaspati and others hold that Vyāsa Pārāśarya is the author of V. S. It is difficult to explain how Vedavyāsa came to be identified with Bādarāyaṇa after the 9th century A. D. Some other relevant matters have also to be considered. A verse about *kṣetra* and *kṣetrajña* in the Bhagavadgītā raises a problem. In Gītā[1905] 13. 4 it is said 'this

---

1905. ऋषिभिर्बहुधा गीतं छन्दोभिर्विविधैः पृथक् । ब्रह्मसूत्रपदैश्चैव हेतुमद्भिर्विनिश्चितैः ॥ गीता 13. 4 ; the first half refers to the passages in the Vedas and Upaniṣads and the 2nd half to the Brahmasūtrapadas. ब्रह्मसूत्रपदैश्चैव must be connected with *gītam* according to all commentators. The present writer feels that the word 'ṛṣibhiḥ' also must be understood in the second half of the verse. If ṛṣibhiḥ is required to be connected with 'chandobhiḥ', there is no reason why that word should not be connected with 'Brahmasūtrapadaiḥ' also. Two words in the instrumental are employed in the first half (viz. ṛṣibhiḥ (agents) and 'chandobhiḥ' (means); if we understand 'ṛṣibhiḥ' in the 2nd half, we shall have a symmetrical arrangement viz. 'ṛṣibhiḥ' (agents) and 'Brahmasūtrapadaiḥ' (means). There is a contrast between Vedic and Upaniṣadic passages in the first half and Brahmasūtra passages that are well reasoned and definite in the 2nd half. Then the meaning will be that sages had composed several Brahmasūtras. The author is inclined to hold that the Gītā refers to several Brahmasūtras current in its day and not to the extant Vedāntasūtra. Here commentators other than Śaṅkarācārya understand by the word 'Brahmasūtra' the work going under that name in these days. The late Lokamānya Tilak in his Marathi 'Gītārahasya' discusses (in appendix part 3 pp. 527–534 of the ed. of 1915) the question of the relation of the Gītā and Brahmasūtra and puts forward his own surmise

(*Continued on next page*)

real nature of kṣetra and kṣetrajña has been separately sung (i. e. propounded) in many ways by the sages in different vedic hymns (or metres) and by the words of the Brahmasūtra that are full of reasoning and that arrive at definite conclusions'. Here the Gītā expressly mentions Brahmasūtra. If one turns to the extant Brahmasūtra (or Vedāntasūtra), it is found that in many sūtras reliance is placed on smṛti, which is taken to mean the Gītā by all ācāryas. For example, on 'Smṛtiśca' (V. S. I. 2. 6) the only Smṛti passages cited by Śaṅkarācārya are Gītā 18. 61 and 13. 2. Similarly, on 'api ca smaryate' (V. S. I. 3. 23) Śaṅkara cites only Gītā 15. 6 and 12; on 'api ca smaryate' (V. S. II. 3. 45) the only Smrti passage quoted by Śaṅkara is Gītā 15. 7; on 'Smaranti ca' (V. S. IV. I. 10) only Gītā 6. 11 is quoted; on 'Yoginaḥ prati ca smaryate smārte caite' (V. S. IV. 2. 21) Gītā 8. 24-25 alone are set forth as the passages meant to be explained. Therefore, though the Bhagavadgītā is not expressly named in the Brahmasūtra, the ācāryas are agreed that the Bhagavadgītā alone is relied upon and referred to in all the above-mentioned sūtras. We have, therefore reached this position that the Gītā mentions the Brahmasūtra which must be held to be earlier than the Gītā, but as Gītā passages are declared to be at the basis of some of the Vedāntasūtras, the Gītā must be earlier than the V. S. This is contradictory; Śaṅkarācārya,[1906] who saw the contradiction, therefore explained 'Brahmasūtrapadaiḥ' as passages (of Upaniṣads) that suggest (i. e. propound) doctrines about brahma (i. e. he interprets 'sūtra' as meaning 'sūcaka'). But this explanation is far-fetched and has not been accepted by other commentators. Therefore, other theories have to be put forward viz. that the author of both is the same or that the Mahābhārata and Gītā were receiving accretions from time to time and that when the

---

(*Continued from last page*)

that the author who composed the extant Brahmasūtra redacted the original Mahābhārata and Gītā and gave them both the present form. The present writer regrets that he cannot accept this surmise of the late Lokamānya. It may be pointed out that Prof. R. D. Karmarkar in (ABORI vol. III. pp. 73-79) did not accept Lokamānya's explanation of 'Brahmasūtrapadaiḥ' and held that in Gītā 13. 4 the word 'Brahmasūtrapadaiḥ' does not refer to the Bādarāyaṇa sūtras but refers to some similar other works. But he did not pursue that matter further.

1906. ब्रह्मणः सूचकानि वाक्यानि ब्रह्मसूत्राणि तैः पद्यते गम्यते ज्ञायते इति तानि पदान्युच्यन्ते। तैरेव च क्षेत्रक्षेत्रज्ञयोर्याथात्म्यं 'गीतम्' इत्यनुवर्तते। 'आत्मेत्येवोपासीत' इत्यादीभिर्हि ब्रह्मसूत्रपदैरात्मा ज्ञायते। शङ्कर on गीता 13. 4.

final redaction of the Mahābhārata (including the Gītā) was made the verse about Brahmasūtra was inserted in the Gītā or that in the times of the Gītā there were several works called Brahmasūtra other than the extant one.

The present writer thinks it highly probable that the Gītā had before it several works called Brahmasūtras and in 13. 4 refers to them and not to the extant Brahmasūtra of Bādarāyaṇa. A brief examination of the authors mentioned in the PMS and VS is necessary. Both these works mention by name several individual authors (besides Jaimini and Bādarāyaṇa). Both PMS and VS mention the following:—

Ātreya – PMS IV. 3. 18, V. 2. 18, VI. 1. 26 and VS III. 4. 44;

Āśmarathya – PMS VI. 5. 16 and VS I. 2. 29, I. 4. 20;

Kārṣṇājini – PMS IV. 3. 17, VI. 7. 35 and VS III. 1. 9.

Bādari – PMS III. 1. 3, VI. 1. 27, VIII. 3. 6, IX. 2. 33 and VS. I. 2. 30, III. 1. 11, IV. 3. 7, IV. 4. 10;

PMS also names Ālekhana (VI. 5. 17), Aitiśāyana (III. 2. 44, III. 4. 24, VI. 1. 6), Kāmukāyana (XI. 1. 58 and 63) and Lāvukāyana (VI. 7. 37), these being not mentioned at all in the VS. On the other hand VS mentions Auḍulomi (I. 4. 21, III. 4. 45, IV. 4. 6) and Kāśakṛtsna (I. 4. 22), both being absent from PMS. The PMS very rarely refers to some ācāryas as 'eke' in I. 1. 27 and IX. 3. 4; V. S. has 'eke' in I. 4. 9 and 18, II. 3. 43, III. 2. 2. and 13, III. 4. 15, IV. 2. 13 and 'ekeṣām' in I. 4. 13, IV. 1. 17, IV. 2. 13 and 'anye' in III. 3. 27, in all of which the reference in V. S. is to other recensions of the Veda or Upaniṣads, while in III. 4. 42 'eke' refers to ācāryāḥ and in III. 3. 53 'eke' refers to Lokāyatikas. Vyāsa or Pārāśarya is not mentioned by name in PMS or VS. The case of Bādari requires careful consideration. The PMS mentions both Bādarāyaṇa and Jaimini only five times each, while PMS and VS mention (each) Bādari four times. Bādari differs from Jaimini on two important points viz. the denotation of the word 'śeṣa' and the remarkable view that even śūdras are entitled to perform *agnihotra* and other Vedic rites. In VS. Bādari is mentioned as differing from Jaimini on the *upāsanā* of Vaiśvānara in Chān. Up. V. 18. 1–2 and on the words 'sa enān brahma gamayati' (Chān. Up. IV. 15. 5) and in VS IV. 4. 10 Bādari is opposed to Jaimini about a released soul. It follows from this brief analysis and the mention of Bādari four times in PMS and also in VS that both the latter had before them a work of Bādari dealing with Pūrva-

mīmāṁsā matters and also with Vedānta. Ālekhana and Āśmarathya are both quoted at least 16 times in Āp. Śr. Sūtra, their views are quoted frequently as in conflict on the ritual of sacrifices and these are the only two individual authors quoted in Āp. Śr. S. It is likely that Ātreya, Āśmarathya and Kārsṇājini composed a work or works dealing with both systems and Auḍulomi (quoted thrice by VS) and Kāśakṛtsna composed works on the Vedānta. Vide Tantravārtika on I 3. 2 p. 169 note 2010 for the view that the present PMS was preceded by several efforts in the same direction.

From the above discussion it may very plausibly be held that the word 'Brahmasūtrapadaiḥ' in Gītā 13. 4 refers to some sūtra works such as those of Bādari, Auḍulomi, Āśmarathya and one or two others and not to the extant Brahmasūtra. No one can say that Bādari and Ātreya are not 'ṛsis'. Śabara refers to Ātreya as 'Muni' on PMS VI. I. 26.

It should be remembered that Jaimini, Bādari and Bādarāyaṇa are gotra names. But Vyāsa is not a gotra name and Pārāsarya is one of the three *pravaras* of the group of Parāśaras.[1907]

The Āp. Śr. Sūtra 24. 8. 10 (ed. by Garbe) and the Pravaramañjarī (ed. by Chentsalrav, Mysore, 1900) p. 61 mention Bādarāyaṇa as a sub-section of Viṣṇuvṛddhagotra, while p. 38 of the latter work mentions Jaimini along with Yāska, Vādhūla, Mauna and others as having the pravara 'Bhārgava-vaitahavya-sāvataseti' and pp. 108 and 178 cite Bādari (or Vādari) as a sub-division of Parāśaras. Therefore, it was possible that several individuals separated by a century or more could bear the name of Jaimini or Bādarāyaṇa.

We have also to answer the observations of the Naiṣkarmya-siddhi of Sureśvarācārya (the most famous of the disciples of Śaṅkarācārya himself) that Jaimini does not mean that all passages of the Veda relate to sacrificial rites and that if he really meant that, he would not have composed 'Śārīrakasūtra' beginning with 'athāto brahma-jijñāsā' and 'janmādyasya yataḥ', containing an investigation of the purport of all Vedānta passages, laying bare the nature of brahma and supporting his words with profound reasoning; but that as a matter of fact he

1907. अथ पाराशराणां ऽयार्षेयः। वसिष्ठ-शाक्त्य-पाराशर्येति। पराशरवच्छक्तिवद्वसिष्ठवदिति। आप. श्रौ. सूत्र. 24. 10. 6.

did compose such a śārīrakaśāstra. This passage means that Jaimini composed a sūtra work called Śārīrakasūtra on the investigation and knowledge of brahma, which began with two sūtras that were the same as the first two sūtras of the extant Vedāntasūtra.[1908] Col. Jacob in his Introduction (p. 3) to the first edition of the Naiṣkarmyasiddhi thought that the Naiṣkarmyasiddhi made Jaimini the author of the Vedāntadarśana. He is inaccurate, since all that Sureśvara says is that Jaimini composed not only a sūtra work on the Karmamīmāṁsā but he also composed a work called Śārīrakasūtra on the doctrines of brahmamīmāṁsā, but he does not convey that the whole of the extant Vedāntasūtra is the work of Jaimini. Dr. Belvalkar [1909] postulates two propositions, viz. that there were brahmasūtras written separately for the Chāndogya Upaniṣad and the Bṛhadāraṇyaka-Upaniṣad and other Upaniṣads for each Śākhā and secondly, that the Śārīrakasūtra of Jaimini was bodily incorporated within and forms the main part of the contents of the present text of the Brahmasūtra. The present author takes strong objections to both these propositions. He cannot go into this question at length here but has to remark that these propositions are based on little evidence. If 'janmādyasya yataḥ' was also a sūtra of Jaimini who was specially connected with the Sāmaveda by the Mahābhārata and Purāṇas, why is it that that sūtra is supposed by the bhāṣyakāras as based on a passage of the Taittirīya-upaniṣad? The Chāndogya and Bṛhadāraṇyaka Upaniṣads are each nearly thrice as long as all the other eight Upaniṣads (out of the principal ten Upaniṣads) and six times longer than the Taittirīya Upaniṣad. Therefore, these two Upaniṣads figure largely in the discussions in the extant Brahmasūtra. The 2nd proposition is hardly more than a pure guess. There is no evidence to establish that the main part of the extant Vedāntasūtra is bodily taken from Jaimini's Śārīrakasūtra, when the latter has not come down to us and when no sūtras therefrom

1909. Vide his 'Gopal Basu Mallik Lectures on Vedānta Philosophy' pp. 141–142.

(other than the two noted above) are quoted anywhere as from Jaimini's Śārīrakasūtra.

Then some sūtras of VS in which the words 'tad-uktam'[1910] occur have to be considered. There are eight sūtras that contain those words. Śaṅkarācārya holds that in VS I. 3. 21, II. 1. 31, III. 3. 18 (where 'tad uktam' occur) the reference is to the preceding sūtras of the VS itself. On V. S. III. 3. 26, III. 3. 33, III. 3. 50 and III. 4. 42 Śaṅkarācārya holds that these respectively refer to PMS X. 8. 15, III. 3. 8, XI. 4. 10 and I. 3. 8-9 and that VS III. 3. 43 refers to a sūtra of the Saṅkarṣakāṇḍa. The other ācāryas differ from Śaṅkarācārya in several places and among themselves. Vallabhācārya, who had come to regard the Bhāgavata as of equal authority with the Veda and as even superseding the latter, holds that the words 'tad-uktam' in VS III. 3. 33, III. 3. 50 and III. 4. 42. refer to passages of the Bhāgavatapurāṇa. The VS III. 3. 44 appears to echo the words and principles of PMS III. 3. 14.[1911] The words 'tad-uktam' should ordinarily mean the same thing throughout *i. e.* they should everywhere be taken as referring to the PMS or to VS. But no ācārya is prepared to accept entirely one of these two alternatives. It may further be noted that the extant P. M. S. very rarely employs the words 'tad-uktam' as in V. 3. 9 where it refers to PMS V. I. 19.[1912] The P. M. S., though it mentions Bādarāyaṇa five times, nowhere appears to be influenced by the V. S. On the other hand, not only are some of the sūtras of V. S. containing the words 'Tad-uktam' deemed to be references to the P. M. Sūtras, but the V. S frequently employs peculiar Pūrvamīmāṁsā words such as arthavāda, prakaraṇa, liṅga, vidhi, śeṣa and purely P. M. matters such as in III. 3. 26 (kuśāchandastutyupagānavat), III. 3. 33 (aupasadavat), III. 4. 20 (dhāraṇavat), IV. 4. 12 (Dvādaśāhavat). Therefore, the extant VS very much presupposes the P. M. S., while the latter cannot be said to have been influenced by VS to any noticeable extent.

The present author now wishes to draw together the separate threads that have been spun so far about Vyāsa, Jaimini,

---

1910. Vide a brief note 'The problem of Tad-uktam Sūtras' by Prof. P. M. Modi in I. H. Q. Vol. 13 pp. 514-520.

1911. Compare 'लिङ्गभूयस्त्वात्तद्धि बलीयस्तदपि' वे. सू. III. 3. 44 with 'श्रुतिलिङ्गवाक्यप्रकरणस्थानसमाख्यानां समवाये पारदौर्बल्यमर्थविप्रकर्षात्' पू. मी. सू. III.3.14.

1912. अन्ते वा तदुक्तम् । पू. मी. सू. V. 3. 9. This refers to V. 1. 19 (अन्ते तु बादरायणस्तेषां प्रधानशब्दत्वात्). In पू. मी. IX. 2. 2 occur the words 'तदुक्तदोषत्व' which refer to पू. मी. VII. 2. 13.

Bādarāyaṇa, the PMS and the VS and tries to present a tentative pattern of conclusions as follows:—

1. The Mahābhārata and some Purāṇas state that Jaimini was a pupil of Pārāśarya Vyāsa. But this is said in relation to the transmission of the Sāmaveda to Jaimini and therefore must be confined to that matter alone (and not extended to other matters) in accordance with the mīmāṁsā maxim 'yāvadvacanam vācanikam.' We have got a Jaiminīya Brāhmaṇa, a Jaiminīya Śrauta-sūtra and Gṛhya-sūtra. The tradition about the imparting of Sāmaveda to Jaimini may be true and at present there is no evidence to show that it is wrong. There is, however, no warrant for extending this tradition to the reputed authors of the PMS and the VS. Late medieval writers like Vallabhācārya, whose weakest points were lack of correct knowledge of history and chronology and the obsession to glorify to the skies their favourite authors and works, extended the above tradition about the Sāmaveda to the authors of the two sūtra works,[1913] viz. PMS and VS. From the above discussion it follows that the extant PMS is earlier than the extant VS and that the author of the extant PMS could not have been a disciple of the author of the extant VS. The medieval writers failed to pay proper attention to the fact that Jaimini and Bādarāyaṇa are also gotra names and not merely individual names.

2. From Pāṇini we know that there were two *bhikṣu-sūtras* composed by Pārāśarya and Karmanda before his time. Patañjali mentions a mīmāṁsā work composed by Kāśakṛtsna. There is, therefore, no doubt that sūtra works on 'bhikṣus' and mīmāṁsā had come to be composed several centuries before the Christian era.

3. From the examination of the views of Jaimini mentioned in the extant VS it appears that Jaimini composed a work on Vedānta also. Some corroboration is lent to this view by the remarks of the Naiṣkaramyasiddhi quoted on p. 1175 above. There is nothing to show that this Jaimini was a pupil of Bādarāyaṇa or of Pārāśarya. On the contrary, the words 'Jaiminer-api' in VS. III. 4. 40 convey great solicitude on the part of the author of the extant VS for Jaimini's support. The author of the

---

1913. On तत्तु समन्वयात् (V. S. I. 1. 4) वल्लभाचार्य says: तथा हि जैमिनिर्धर्मजिज्ञासामेव प्रतिज्ञाय तत्प्रतिपादकस्य पूर्वकाण्डस्य समन्वयमाह। अवान्तरवाक्यानां प्रकारशेषत्वात्। न च सर्वस्मिन् वेदे धर्म एव जिज्ञास्यस्तदुपयोग्य व्यासेन ब्रह्मजिज्ञासायाः प्रतिज्ञातत्वात्।

extant VS shows special respect for Jaimini's views, since he quotes Jaimini more times than other ācāryas (including Bādarāyaṇa). It becomes necessary to hold that there were two authors named Jaimini, one dealing with both PM and Vedānta subjects and the other deemed to be the author of the extant PMS. This Jaimini is different from Jaimini deemed to be the author of the extant PMS.

4. The fact that PMS mentions five times Bādarāyaṇa's views, four of which are concerned with purely sacrificial matters and the fact that the VS mentions Bādarāyaṇa nine times in connection with Vedānta matters, leads to the inference that Bādarāyaṇa must have composed a work dealing with PM and Vedānta topics. That work has not come down to us. This Bādarāyaṇa is different from the Bādarāyaṇa regarded by Śaṅkarācārya and others as the author of the extant VS. Thus there are two authors named Bādarāyaṇa.

5. The author of the extant VS was, according to Śaṅkarācārya, Bhāskara and some other early bhāṣyakāras, also Bādarāyaṇa, but from about the 9th century A. D. onwards he came to be confounded with Vedavyāsa.

6. So far as the PMS and VS are concerned, there are only two Jaiminis (and not three, as Prof. Sastry holds in I. A. vol. 50 p. 172) and two Bādarāyaṇas.

The present section is concerned mainly with the influence of Pūrvamīmāṁsā doctrines and methodology on Dharmaśāstra works. But it must be mentioned here that Pūrvamīmāṁsā works from that of Jaimini onwards also rely upon smṛtis and Dharmaśāstra. A few examples may be cited. The PMS I. 3 deals with the limits of the authoritativeness of smṛtis, PMS VI. 7. 6 mentions the word 'Dharmaśāstra'. The P. M. S. expressly relies on smṛti in support of its propositions (as in XII. 4. 43). On PMS VI. 1. 12 Śabara quotes a smṛti verse, which is almost the same as Manu VIII. 416 and Ādiparva (82. 23=Cr. Ed. 77. 22). Śabara frequently quotes Dharmasūtras and metrical smṛtis to elucidate and strengthen his arguments; e. g. Śabara on PMS VI. I. 10 quotes Ap. Dh. S. II. 6. 13. 11 and states on PMS VI. I. 15 that the sale of a daughter mentioned in the smṛtis is not approved of by *śiṣṭas*.[1914] It is not necessary to cite further

1914. विक्रयो हि श्रूयते शतमतिरथं दुहितृमते दद्यात्, आर्षे गोमिथुनम्-इति। शबर on VI. 1. 10 and 'स्मार्तं च श्रुतिविरुद्धं विक्रयं नाद्रियन्ते' on PMS. VI. 1. 15. Vide

(*Continued on next page*)

examples to support the proposition stated above. Those interested may consult the present author's paper on "Gleanings from Śabara and the Tantravārtika' JBBRAS vol. 26 (old series, 1924) pp. 83–98 and on 'Tantravārtika and Dharmaśāstra' in JBBRAS, New series, vol. 1 and 2 for 1925 (pp. 95–102).

We must now turn to the Pūrvamīmāṁsāsūtra itself. In relation to every śāstra there are what are called four *anubandhas* (indispensable elements) [1915] viz. *Viṣaya* (the subject to be treated of), *prayojana* (the purpose or object), *sambandha* (the relation of the śāstra to the prayojana) and *adhikārin* (the person entitled or competent to study the śāstra). The Ślokavārtika [1916] remarks 'as long as the purpose of any śāstra or of any undertaking (or act) whatever is not declared, so long no one will take it (i. e. study or do it).' Therefore, the very first sūtra of the PMS puts forward the subject (viṣaya) and the purpose of the śāstra (prayojana). [1917] That sūtra states 'next, therefore, (should be undertaken) the investigation and consideration of dharma'. The *sambandha* of this śāstra with the *prayojana* is that of *sādhya* (the object to be attained) and *sādhana* (the means of attaining) i. e. this śāstra is the means of attaining the knowledge of dharma. Therefore, as remarked by the Śāstra-

(*Continued from last page*)

आप. ध. सू. II. 6. 13. 11 for the first sentence and मनु III. 53 for 'आर्षे गोमिथुनं शुल्कम्'; on P. M. S. VI. 8. 18 शबर quotes यथैव स्मृतिः, धर्मे... नातिचरितव्येति, धर्मप्रजासंपन्ने दारे नान्यां कुर्वीतेति च। एवमिदमपि स्मर्यत एव, अन्यतरापायेऽन्यां कुर्वीतेति।; आप. ध. (II. 5. 11. 12–13) has the two सूत्रs, धर्मप्रजा... कुर्वीत and अन्यत... कुर्वीत (with slight variations).

1915. The four अनुबन्धs in the case of the पूर्वमीमांसा may be briefly put as 'शास्त्रे धर्मादिर्विषयः, तदवबोधः प्रयोजनं, त्रैवर्णिकोऽधिकारी, विषयविषयिभावादयः सम्बन्धाः'.

1916. सर्वस्यैव हि शास्त्रस्य कर्मणो वापि कस्यचित्। यावत्प्रयोजनं नोक्तं तावत्तत्केन गृह्यते॥ श्लोकवा. (प्रतिज्ञासूत्र) 12. q. by बालक्रीडा on या. I. 1. p. 2.

1917. अथातो धर्मजिज्ञासासूत्रमाद्यमिदं कृतम्। धर्माख्यं विषयं वक्तुं मीमांसायाः प्रयोजनम्॥ श्लोकवा. (प्रतिज्ञासूत्र) v. 11. अथ means आनन्तर्य i. e. after the study of the Veda from a guru that has already taken place. The शास्त्रदीपिका says (p. 12) 'तत्सिद्धमध्ययनादनन्तरं धर्मजिज्ञासा कर्तव्येति। सा चतुर्विधा धर्मस्वरूप-प्रमाण-साधन-फलैः।'. The न्यायरत्नाकर comments on verse 18 (of प्रतिज्ञासूत्र) 'योयं पूर्वोक्तेन प्रयोजनेन सह शास्त्रस्य साध्यसाधनसम्बन्धः स एव शास्त्रारम्भहेतुः.' Compare the well-known maxim 'प्रयोजनमनुद्दिश्य न मन्दोऽपि प्रवर्तते' found in श्लोकवा. (सम्बन्धाक्षेप-परिहार v. 55). Writers of the Prābhākara School hold that the word dharma in P. M. S. I. 1. 2 means 'Vedārtha'. Vide Ṛjuvimalā-pañcikā on Bṛhatī (p. 20) 'चोदनासूत्रेण चोदनालक्षणः कार्यरूप एव वेदार्थः, न सिद्धरूप इति प्रतिज्ञातम्। तदनेन भाष्येण व्याख्यायते। धर्मशब्दश्च वेदार्थमात्रपरः।'.

dīpikā (on P. M. S. II. 1. 1), the proper subject of this śāstra is Dharma and not the meaning of the Veda (tasmād dharma ityeva śāstraviṣayo na vedārtha iti). The *adhikārin* is one who has studied the Veda or a part of it from a guru and is treated of at length in the 6th chapter of the P. M. S.

The Mīmāṁsāsūtra does not state how much of the Veda has to be studied before one enters on understanding the meaning of it. Here the Smṛtis come to one's help. Gautama II. 51–53 prescribes several options viz. twelve years for one Veda or 12 years for each of the four vedas or so long as he can commit to memory (one Veda). Manu III. 1–2 are similar viz. one should study vedas for 36 years under a guru or for 18 years or nine years or for as many years as would be required for committing Veda to memory and they permit the option of studying the three Vedas or two Vedas or one Veda. Yāj. I. 36 remarks that Vedic studenthood lasts 12 years for each Veda or five (for each Veda) or some sages say for as many years as the student would require to master (one Veda or more). But even these prescriptions must have been rather a tall order for many brāhmaṇas, kṣatriyas and vaiśyas. Further, the Mīmāṁsā requires that not only should a person of the three *varṇas* (classes) study the Veda but he must also engage in understanding its meaning. On PMS I. 1. 1 Śabara states that the venerable Yājñikas do not [1918] declare that rewards result from the mere study (memorizing) of the Veda and that where the Vedic texts appear to assign a reward for the mere memorizing of Veda they are merely arthavādas (intended only to praise Veda study), as in Tai. Ār. II. 15 which states[1919] 'whatever (vedic texts about a) sacrifice he memorizes the result is that he, as it were actually performs that, and he secures absorption into (or communion with) Agni, Vāyu, Sūrya. The Tai. Up. I. 9 attaches the greatest importance to *svādhyāya* (memorizing the Veda) and *pravacana* (teaching it or expounding it) and after stating the views of two sages cites the view of Nāka Maudgalya that svādhyāya and pravacana are the most important to be resorted to or striven for, though ṛta, satya, dama, śama, agnihotra, hospitality and others may be combined with them, the reason

1918. न च तस्याध्ययनमात्रात्तत्रभवन्तो याज्ञिकाः फलं समामनन्ति। शबर on I. 1. 1.

1919. तस्मात्स्वाध्यायोऽध्येतव्यो यं यं क्रतुमधीते तेन तेनास्येष्टं भवत्यग्नेर्वायोरादित्यस्य सायुज्यं गच्छति। तै. आ. II. 15; ऋतं च स्वाध्यायप्रवचने च ... सत्यमिति सत्यवचा राथीतरः। तप इति तपोनित्यः पौरुशिष्टिः। स्वाध्यायप्रवचने एवेति नाको मौद्गल्यः। तद्धि तपः तद्धि तपः। तै. उ. I. 9.

being that those two constitute *tapas*. The PMS in III. 8. 18 (jñāte ca vācanam na hy-avidvān vihitosti) provides that only *he who knows the Veda has adhikāra for performing sacrifices*. Śabara[1920] raises the question how much of the Veda must a man know in order to be entitled to perform a vedic sacrifice and replies that he must have memorized as much of the veda as would enable him to carry to its completion the vedic sacrifice undertaken by him. The Tantravārtika on the same sūtra adds that the whole veda is to be studied during the period of studenthood, but if anyone is unable to memorize the whole veda, but somehow only the portion on Agnihotra and Darśa-pūrṇamāsa, then it cannot be said that he has no adhikāra for performing those two. To memorize the Veda and also to study its meaning was a formidable task. Many verses of the Veda had a threefold application with reference to sacrifices (adhiyajña), with reference to the deities (adhidaivata or adhidaiva) and adhyātma (with reference to the spiritual or metaphysical meaning). Vide Nir. III. 12 (where Ṛg. I. 164. 21 is explained in two ways, adhidaivata and adhyātma), X. 26 (where Ṛg. X. 82. 2 is explained in two ways, adhidaivata and adhyātma), XI. 4 (where Ṛg. X. 85. 3 is explained in adhiyajña and adhidaivata ways), XII. 37 (where Vāj. S. 34. 55 is explained in the adhidaivata and adhyātma ways), XII. 38 (where Atharva X. 8. 9 is explained in adhidaivata and adhyātma ways). Manu (VI. 83) lays down the *japa* (muttering) of Veda of the adhiyajña, ādhidaivika and ādhyātmika types. Manu I. 23 and Vedāṅga-jyotiṣa say that the mantras of the three vedas were drawn from Agni, Vāyu and Sūrya for the carrying out of yajñas. Viśva-rūpa on Yāj. I. 51[1921] explains the words 'vedam vratāni vā pāram nītvā' as memorizing the Veda and completely understanding its meaning and not merely memorizing it. Dakṣa says that Vedābhyāsa (study of the Veda) comprehends five[1922]

1920. न ह्यविद्वान् विहितोऽस्ति। यो ह्यविद्वाक्सावधिकृतः सामर्थ्याभावात्। ... कियता पुनर्विदितेन विद्वानधिक्रियत इति। यावता विदितेन शक्तो भवति यथोक्तं क्रतुमभिनिर्वर्तयितुं तावद्यो वेद स तेन क्रतुनाधिक्रियते।... सर्वे क्रतवः कथं ज्ञायेरन् पृथक् पृथगिति कृत्स्नस्य वेदस्याध्ययनं श्रूयते। शबर on पू. मी. सू. III. 8. 18; अवश्यं ब्रह्मचर्यकाल एव समस्तो वेदोऽध्येतव्यः। यदि तु कश्चिदशक्तो नाधीते सकलम्, अग्निहोत्रदर्शपूर्णमासमात्रं कथंचिदधिगच्छति न तत्र तस्यानधिकारः। तन्त्रवा. p. 1122 on same sūtra.

1921. वेदस्य पारनयनमर्थतो ग्रन्थतश्च स्वीकरण न ग्रन्थत एव। विश्वरूप on या I. 51.

1922. वेदस्वीकरणं पूर्वं विचारोऽम्यसनं जपः। तदानं चैव शिष्येभ्यो वेदाभ्यासो हि पञ्चधा॥ दक्षस्मृ. II. 34, q. by मिता० on या. III. 310 (without name), अपरार्क p. 126 on या. I. 99 (from दक्ष).

matters viz. first memorizing it, reflection over it, constant repetition of it, *japa* and imparting it to pupils. These were ideals attained by a few persons only, while most brāhmaṇas generally rested content with memoriznig one Veda or a portion of it.

The Pūrvamīmāṁsāśāstra is the most extensive of all the *darśanas*.[1923] Śāstra is that which regulates and declares (human) activities and abstentions by means of eternal words (Veda) or by works composed by men.[1924] And it has about 2700 sūtras and over 900 adhikaraṇas (called *nyāyas* or conclusions on topics for discussion). Some sūtras are often repeated such as 'Liṅgadarśanāc-ca' (which occurs about 30 times) and 'tathā cānyārthadarśanam' (that occurs about 24 times). An adhikaraṇa is described as having five constituents, viz. (1) the topic for discussion, (2) the doubt about it, (3) the *prima facie* view, (4) the refutation of the prima facie view, (5) the final conclusion.[1925] A sūtra (aphorism) should be concise[1926] (contain a few letters), but clear in its meaning, substantial, of wide application (lit. facing all directions), should be without pauses or interjected letters and should be faultless. A bhāṣya is that which sets out the meaning of the sūtra in sentences that follow the words of the sūtra and that makes its own contribution (to the elucidation of the subject of the sūtra), while a vārtika is one that considers what is stated in the sūtra, or what

---

1923. The Darśanas are many, as appears from the सर्वदर्शनसंग्रह of माधवाचार्य, but the orthodox and famous darśanas are six and run in pairs, viz. न्याय and वैशेषिक, सांख्य and योग, पूर्वमीमांसा and उत्तरमीमांसा. In I. A. vol. 45 pp. 1-6 and 17-26, it is stated that the सर्वदर्शनसंग्रह was not composed by माधवाचार्य who became later on Vidyāraṇya, but was composed by a nephew of माधवाचार्य, who was a son of सायण (at pp. 22 ff.)

1924. प्रवृत्तिर्वा निवृत्तिर्वा नित्येन कृतकेन वा। शासनाच्छंसनाच्चैव शास्त्रमित्यभिधीयते॥ भामती on वे. सू. I. 1. 3, which is quoted by परा. मा. II. 2 p 288 as from a पुराण. The first half is श्लोकवा. (शब्दपरिच्छेद v. 4).

1925. विषयो विशयश्चैव पूर्वपक्षस्तथोत्तरम्। निर्णयश्चेति पञ्चाङ्गं शास्त्रेधिकरणं स्मृतम्॥ q. by तिथितत्त्व p. 92, अधिकरणकौमुदी of रामकृष्ण (Chowkhamba series), सर्वदर्शनकौमुदी p. 89 (T. S. S.). Some read निर्णयश्चेति सिद्धान्तः, others like माधवाचार्य set out the five as विषय, विशय (or सन्देह), सङ्गति, पूर्वपक्ष and सिद्धान्त.

1926. अल्पाक्षरमसन्दिग्धं सारवद्विश्वतोमुखम्। अस्तोभमनवद्यं च सूत्रं सूत्रविदो विदुः। (पञ्चपादिका of पद्मपाद p. 82, ब्रह्माण्ड II. 33. 58, वायु 59. 142, युक्तिदीपिका p. 3 which explains अस्तोभं as अपुनरुक्तं). The पञ्चपादिका quotes this verse as from पौराणिकs and remarks 'सर्वतोमुखमिति नानार्थतामाह' and the com. says 'अर्थैकत्वादेकं वाक्यमिति न्यायस्य सूत्राण्यविषयत्वात् न वाक्यभेदः'.

is omitted or what is not well stated.[1927] The Kāvya-mīmāṁsā of Rājaśekhara defines the words sūtra, bhāṣya, vṛtti, ṭīkā, kārikā &c. in chap. II.

Having declared in the first sūtra that after a person has studied the Veda and because he has done so, PMS proceeds to say that he should start on the consideration of what dharma[1928] is. The 2nd sūtra, therefore, defines 'dharma as an act conducive to a man's highest good, that is characterized by an exhortative (vedic) text.' Śabara explains that 'codanā' means a sentence that urges or exhorts a person to do an act. So this conveys that the means of knowledge (pramāṇa) as regards dharma are vedic sentences and it also means that what is characterized or indicated by *codanā* is dharma i. e. the nature (svarūpa) of Dharma is made manifest. The word 'artha' is put in to exclude acts (from being designated dharma) that may be mentioned in the veda but the result of doing which is evil, such as the sentence 'one practising black magic (to harm a person) may perform the *Śyena* sacrifice.' This is not dharma, but adharma, since the practice of black magic is condemned as sinful. This vedic sentence does not say that one should inflict injury, it only says that śyenayāga brings about injury and if one desires to inflict injury, śyena is the means.[1929] The Ślokavārtika remarks that the words, 'codanā', 'upadeśa' and 'vidhi' are synonyms according to

---

1927. सूत्रार्थो वर्ण्यते यत्र वाक्यैः सूत्रानुसारिभिः। स्वपदानि च वर्ण्यन्ते भाष्यं भाष्यविदो विदुः।. भामती on ब्रह्मसूत्र I. 1. 1 quotes a verse 'लघूनि सूचितार्थानि स्वल्पाक्षरपदानि च। सर्वतः सारभूतानि सूत्राण्याहुर्मनीषिणः॥' q. by युक्तिदीपिका p. 3; उक्तानुक्तदुरुक्तचिन्ताकरं वार्तिकम्। आनन्दागिरि on बृहदारण्यकोपनिषद्भाष्यवार्तिक p. 7 quotes a verse 'उक्तानुक्तद्विरुक्तादिचिन्ता यत्र प्रवर्तते। तं ग्रन्थं वार्तिकं प्राहुर्वार्तिकज्ञा मनीषिणः।' Should we read दुरुक्तादि for द्विरुक्तादि?

1928. शबर says 'एवमधीतो वेदो धर्मजिज्ञासायां हेतुर्ज्ञातः, अनन्तरं धर्मो जिज्ञासितव्य इत्यतःशब्दस्य सामर्थ्यम्।; the न्या. र. says एतदुक्तं भवति। वेदाध्ययनादनन्तरमस्य एवाधीतवेदत्वारकारणात् तदर्थं धर्मजिज्ञासा कर्तव्येति' (on v. 112 of प्रतिज्ञासूत्र of श्लोकवा०).

1929. तस्माच्चोदनालक्षणोऽर्थः श्रेयस्करः। ... य एव श्रेयस्करः स धर्मशब्देनोच्यते। उभयमिह चोदनया लक्ष्यते अर्थोऽनर्थश्चेति। कोऽर्थः, यो निःश्रेयसाय ज्योतिष्टोमादिः। कोऽनर्थः, यः प्रत्यवायाय श्येनो वज्र इषुरित्येवमादिः। तत्र अनर्थो धर्म उक्तो मा भूदिति अर्थग्रहणम्। कथं पुनरसावनर्थः। हिंसा हि सा हिंसा च प्रतिषिद्धेति। ... नैव श्येनाद्यः कर्तव्या विज्ञायन्ते। यो हि हिंसितुमिच्छेत् तस्यायमभ्युपाय इति तेषामुपदेशः। श्येनेनाभिचरन् यजेत इति हि समामनन्ति, न 'अभिचरितव्यम्' इति। शबर on I. 1. 2 at end. Vide पू. मी. सू. I. 4. 5 and III. 8. 36–38 for श्येनयाग which is a modification of ज्योतिष्टोम and पू. मी. सू. VII. 1. 13–16 for इषुयाग, where on VII. 1. 13 शबर quotes आप. श्रौ. 22. 7. 18 'समानमितरच्छ्येनेन.'

Śabāra, the bhāṣyakāra. The word 'vidhi' is often translated as injunction (i. e. an authoritative order) but in common parlance 'injunction' means 'restraining a person from doing something.' Therefore, the word, 'codanā' or 'vidhi' has often been translated in these pages as 'exhortatory passage or exhortation.' The result is that dharma means a religious act (a yāga) which confers highest good. In Rg. X. 90. 16 'yajña' is spoken of as the first (or ancient) dharma (yajñena yajñam-ayajanta devāstāni dharmāṇi prathamānyāsan) and Śabara (in the bhāṣya on P. M. S. I. 1. 2) quotes this verse for the proposition that the Veda expressly says that dharma means 'yāga'. That Vedas have been promulgated for yajña is stated by the Vedāṅgajyotisa [1930] verse 3 (Vedā hi yajñārthamabhipravṛttāḥ). Medieval Dharmaśāstra writers like the Mitāksarā (on Yāj. II. 135), Dāyatattva (p. 172), Vy. M. (p. 157) quote a verse ascribed to Devala or Kātyāyana, which provides that all wealth is created for sacrifices, that, therefore, one should expend it on purposes of dharma and not on women, fools and irreligious people [1931] (vide H. of Dh. Vol. III. p. 609 n. 1155 for further passages of similar import and their application).

Śabara introduces the 2nd sūtra by saying that what is to be investigated and understood is what dharma is (i.e. what is its nature-svarūpa), what are its characteristics, what are the means of attaining it, what are deceptive (wrong) means of attaining it and what does it lead to (what the fruit or reward of knowing it is) and replies that the second sūtra explains the first two of these (viz. what dharma is and what its characteristics are [1932]).

1930. चोदना चोपदेशश्च विधिश्चैकार्थवादिनः। श्लोकवा. on औत्पत्तिकसूत्र v. 11, on which the काशिका remarks 'तत्र चोदना विधिपदपर्यायः शब्दविशेषो भाष्यकारस्याभिमत इत्याह चोदनेति। एतदुक्तं भवति — विधायकशब्द उपदेश इति.'

1931. यज्ञार्थं विहितं वित्तं तस्मात्तद् विनियोजयेत्। स्थानेषु धर्मजुष्टेषु न स्त्रीमूर्खविधर्मिषु॥ The मिता. on या. II. 135 strenuously opposes the proposition contained in this verse.

1932. स पुनः कथं जिज्ञासितव्यः। को धर्मः कथंलक्षणः। काऽस्य साधनानि कानि साधनाभासानि किंपरश्चेति। तत्र को धर्मः कथंलक्षण इति एकेनैव सूत्रेण व्याख्यातम्... चोदनालक्षणो धर्मः इति। ... चोदना इति क्रियायाः प्रवर्तकं वचनमाहुः। आचार्यचोदितः करोमीति हि दृश्यते। लक्ष्यते येन तल्लक्षणम्। धूमो लक्षणमग्नेरिति हि वदन्ति। तया यो लक्ष्यते सोऽर्थः पुरुषं निःश्रेयसेन संयुनक्तीति प्रतिजानीमहे। शाबरभाष्य on I. 1. 2; again on II. 1. 1 'चोदना च क्रियाया अभिधायकं वाक्यं वाक्ये च पदानामर्थाः।'; श्लोकवा. 'तेन प्रवर्तकं वाक्यं शास्त्रेऽस्मिंश्चोदनोच्यते' चोदनासूत्र v. 3); तत्र यो धर्मः इत्युद्दिश्य स चोदनालक्षणश्चोदनाप्रमाण इति प्रमाणवचन इति प्रमाणवचनव्यक्तिः। यश्चोदनालक्षण इत्युद्दिश्य स धर्म इति स्वरूपवचनव्यक्तिः।

That is, 'codanās' (vedic hortatory texts) are the pramāṇa (means of knowledge) about dharma and whatever is laid down by hortatory vedic texts is dharma (i. e. Dharmasvarūpa). The relation of Dharma to the Veda and the Pūrvamīmāṁsā-śāstra is clearly and succinctly brought out in a verse of Kumārila himself as follows: [1933] "When discussion about the correct knowledge of Dharma is being carried on, Veda being the means of such knowledge, mīmāṁsā will supply complete information about the subject of the procedure or method.' Just as even if a man has good sight he cannot perceive anything unless there is light, so unless a man knows the methods laid down by PMS he cannot correctly judge what Dharma is. Jaimini then examines the means of knowledge (pramāṇas) and holds that except *śabda* (i. e. the Veda) there is no means of knowledge about Dharma. One cannot perceive directly what Dharma is i. e. Dharma is not *pratyakṣa*. All the other pramāṇas except śabda are based on pratyakṣa and therefore they cannot define or explain what Dharma is. According to Kumārila there are six pramāṇas, pratyakṣa (direct perception), anumāna (inference), upamāna (analogy), śabda, arthāpatti and abhāva (non-existence). Prabhākara does not accept the last as a pramāṇa.

The subjects of the twelve chapters of the PMS are stated in the J. N. M. V. to be respectively: (1st chapter) *pramāṇa* (means of knowledge; (2nd) *bheda* (six grounds on which religious rites are distinguished from each other and the distinctions of rites as principal and subsidiary); (3) Śeṣa (the meaning of śeṣa being 'ancillary or what subserves another that is called *śeṣin* or what is helpful to another'), how it is employed and the relative strength of śruti, liṅga, vākya, prakaraṇa, sthāna and samākhyā; (4) *prayukti* (what is obligatory and what is addressed to the performer's conscience i. e. what is *kratvartha* and what is *puruṣārtha*); (5) Krama (principles of settling the order or sequence depending on śruti &c.); (6) adhikāra (persons entitled to perform yāga); (7) sāmānyātideśa (extension of items in the model yāga to its modifications); (8) Viśeṣātideśa (extension of items to individual rites); (9) ūha (adaptation of mantras and saṁskāras); (10) bādha

1933. धर्मे प्रमीयमाणे हि वेदेन करणात्मना। इतिकर्तव्यताभागं मीमांसा पूरयिष्यति॥ बृहट्टीका (of कुमारिल) q. by तन्त्ररहस्य (G. O. S., 1956, p. 36). This verse is introduced with the following lucid remarks 'वेदवाक्यार्थसंशये सति तन्निर्णयौपयिकन्यायनिबन्धनं हि शास्त्रं मीमांसा। ...सा च करणीभूतस्य वेदस्येतिकर्तव्यता। यथा चक्षुष आलोकः। यथा वानुमानस्य व्याप्तिस्मरणम्। यथा वोपमानस्य सादृश्यम्। यथा वा अर्थापत्तेः सन्देहापत्तिः।'.
